The rearing of quail is Mr. Harry Rudolph's pet amusement. He is a thorough sportsman, and, to use his own words, "would rather gun than eat." Quail and pheasant shooting is his delight, and he confesses he always had a fancy for the game little Bob White. About three years ago he was given a brace of live quail while gunning at Newkirk station, in New Jersey. These were the nucleus of his present stock. He brought them to his home, at 1800 Bouvier street, and fitted up a cage for them in his little back lot. He gradually acquired a few other birds, which paired off and began to lay and hatch eggs during the summer. The small ones were successfully hatched out, but died very shortly after. Mr. Rudolph determined to discover the cause of their early demise, and, knowing it must be lack of proper food, determined to watch the habits of the older birds and experiment upon them with varieties of grain and insect food. In spite of the amusement of his friends, who considered his attempt impossible, Mr. Rudolph set to work in earnest to raise quail, and, after numerous failures, was able in his second year to successfully hatch and raise a brood of quail. He had hit upon the right method of feeding them, and the young birds were as strong and healthy as if born under natural conditions. Since then he reckons that 65 per cent. of his young birds have been successfully brought to maturity. As statistics show that hardly 50 per cent. of wild game birds attain their full size, owing to the number of their natural foes, such as hawks and vermin, this is an extremely good record.

In a small yard, scarcely 20ft. square, Mr. Rudolph keeps his pets. The inclosure is shut in on three sides by a wooden fence, and on the fourth by the rear wall of the house. Around the borders are beds of geranium and small shrubs. In the center is a patch of grass, with a tall plant in the middle. On one side of the lot are the cages, in which three brace are paired off in separate coops. In the fourth cage is a lonely and disconsolate hen, while running loose about the yard are two cocks and a hen, with three chicks. The latter are a remarkable brood. They were hatched, with five others, on the 8th of July, which is nearly one month ahead of the breeding season. The defunct ones were killed by the inclement weather or some other cause common to infant quail, but the survivors remain perfectly healthy and are already able to care for themselves.

In addition to rushing the breeding season, the hen one week ago commenced to lay a fresh lot of fifteen eggs in a new nest, upon which she will no doubt shortly sit. Moreover, in another corner of the yard the cocks have prepared another nest, as if the hen contemplated rearing a third family this season.

The other pairs in the coops have each a nestful of eggs, which Mr. Rudolph expects will shortly be hatched. When the next brood are born the chicks loose in the yard, together with the parent birds, will be shut up to make room for the newcomers. Owing to the extreme pugnacity of the cocks, it is impossible to let more than one pair loose at a time, or the lives of the birds would be endangered. The pairing off of two cocks with one hen, although rare, is occasionally found. The two male birds who champion the little mother hen live in peace and harmony, and both work together at making the nests and take their turns in sitting on the eggs.

The principal food which Mr. Rudolph gives to his pets is grain; grasshoppers also form part of their dietary. But the secret by which he manages to raise the young Mr. Rudolph refuses to reveal. He states that it is something natural to the birds in wild life, but beyond that he will not commit himself. The quail are very fond of hempseed, but they get so fat on it that its value as wholesome food is very small. It would soon kill them off. It is useful, however, in feeding hens which have been setting in order to bring them back to their proper condition.

Mr. Rudolph states that he spends hours each day in merely watching. "By that means," he says, "I can thoroughly learn their habits, so that I get to know the meaning and object of their every movement."

In preparing the nest, he has noticed that the quail does not pick up the straw or piece of hay in the beak, as other birds do, but, by a graceful motion of the neck, it throws it over the back, until it has collected a heap of bits behind its feet. The straw glides down the smooth back of the bird and falls to the ground. At first it would seem that this action of the quail is only a futile endeavor to poise it, but, as the bird does so every time until a pile is collected, it evidently has an object in so doing. This is possibly to clean the particles, for when a sufficient pile has been prepared, the dainty little bird throws the bits on its back, this time letting none fall, and bears them off in triumph to the nest. The latter is of loose construction, and, alike in the woods or in captivity, is laid in a small hollow. The egg is pure white, and resembles that of a pigeon. The usual quota is from 17 to 21, and the time of hatching about 23 days. The young birds are helped out of the eggs by the parents, who, with their sharp beaks, cut off the butt or wide end. The chick then hops out, and at once begins to run about and pick up food. The infant bird is covered with a soft, striped coat of brown down, and resembles a mouse in the way it runs about and crouches in the grass. They are soon independent of the parent birds, and but for the danger from their many foes would need no protection. The watchful eye of the mother looks out for the danger, and on the slightest alarm is ready with a protecting wing.

All the time the hen bird is sitting the cock stands near and utters a low, soft and coaxing cry, as of a nurse "crooning" to a baby. The cock also continues this note all the time that it is sitting on the nest.

Every morning the birds awake at sunrise and make the neighborhood ring with their shrill cry of *Bob White* or *buckcheat*, as some aver it is. The morning, moreover, is the only time that the birds utter this call, for the remainder of the day keeping up an almost incessant *chee-weep*. The cry of cock or hen can only be distinguished by the coarseness of the male bird's note. Mr. Rudolph feeds his birds at an early hour, and finds that their appetites are very strong. After they have "gorged without restraint," the quail retire into the bushes to sleep off the effects of their meal. They get very lethargic toward the middle of the day and another nap is necessary. The caged birds, although thoroughly "acclimatized," are extremely restless, and run up and down the front of their cage all the time that they are not nesting, after the manner of captive lions.

After the evening meal—for two feeds a day is their allowance—the birds retire to roost. The uncaged birds, Mr. Rudolph has observed, do not like to rest under cover, but prefer to sleep on the open ground, cruching down so low that they cannot be observed. They are hearty sleepers and cannot be easily disturbed. They never holla at night, although if frightened in full daylight their cries are very loud. Mr. Wood states that when wild the quail sleep in a circle with their heads turned outward and their tails touching.

In the winter Mr. Rudolph keeps his birds out in the yard, as during the warmer months, for they are exceedingly hardy. When in their wild state starvation, not cold, kills them, and in consequence they can be readily entrapped, for hunger makes them forget their cunning.

Mr. Rudolph is confident now that he can keep any species of quail and breed them. In the near future he intends to try the experiment of placing quails' eggs under a bantam hen, and believes that he can hatch and rear the little ones in spite of their wildness and the strange habits of the foster mother. From a commercial point of view, his secret should be of much value to game fanciers and also to purveyors. Mr. Rudolph, however, never eats them, and, unless necessary, seldom kills any of his birds. Those he has had for three years show as good signs of living as any freshly caught birds.

The young ones which he has hatched out have, in their turn, raised new broods, and no deformity is noticed in those born in captivity. Every new brood maintains the peculiarities, and, as far as can be observed, the habits, of wild birds. Their motions and manner of eating in nowise resemble chickens. A visitor sitting in Mr. Rudolph's inclosure could shut his eyes and imagine himself miles away, among the cornfields, far from the dust and din of town, as he hears the cheeping of the little ones and the soft, coaxing note of the father bird.

Mr. Rudolph has found it impossible to tame his birds so far as to let themselves be handled. Though the quail undoubtedly know him, they are just as shy with him as they would be in the open fields. The utmost he has been able to do is to get a hen to take a fly from his fingers. The young ones are equally shy, but prove themselves very teachable, for already they will answer to his whistle.

Nearly all of his birds are bald on the top of their heads. This is owing to their wildness when in cages, flying up against the bars or roof of their houses. At first, indeed, so wild were they, many of them were killed, committing accidental suicide in that manner. Since then, however, the survivors have learned by experience and no cases of *felo de se* have been reported for some time past. The caged birds are otherwise as wild as if captured yesterday.

"At first I used to be," said Mr. Rudolph, "much bothered about the cats, for they would do their level best to get a tender young quail for their meals. Only one cat ever got a meal off my birds." With a significant look he shook his head and continued: "But I got even with them and they don't trouble me any more. I haven't seen a cat around here for a month."

The much-abused sparrow is another sworn foe to Mr. Rudolph's birds, for many a young quail has succumbed to a knock on the head from those ubiquitous Englishmen. The mother quail are continually on the lookout and are ever ready to fly to the rescue.

A local taxidermist has cleverly stuffed a number of the little birds who have succumbed from these and various causes. They represent a very interesting group. It is Mr. Rudolph's intention to procure a fine cock and hen and have them also stuffed with the brood. Such a group is a great rarity, as, though it is very easy to procure the eggs, a newly-born covey of quail is extremely hard to procure.

Mr. Rudolph's birds are all of the species known as *Ortyx virginianus*, or Virginia quail. It is of the same family as and differs very little from the partridge of Great Britain, except in size. It is of a reddish brown color on the upper part of the breast, and the male bird is marked over the eyes and under the chin with white bands. In the hen these bands are of a yellowish-brown hue. The sides of the neck are brown, sprinkled with black and white, the wings are grayish brown, and the tertials are edged with stripes of a yellow-white color. In the case of his birds, Mr. Rudolph notices that many of them vary in color, some being much lighter than others. Moreover, he has observed a growth of pure white feathers in the wings, which are regularly out once in every three weeks. It is curious that these white feathers, which usually are seen only in the severest winters, should appear in the hot months.

When Austin Whitcomb was in Kentucky last fall he secured some young quail. On his return he gave a pair to George A. Galloupe. The hen quail in due time commenced laying and died after depositing her fifteenth egg. With commendable loyalty and devotion the male quail went on to the nest and sat there, after the most approved fashion, for four weeks, at the end of which period the substitute came off with a full count of lively young quail.—*Beverly (Mass.) Citizen*.

The Newark, N. J., *Sunday Call* records that Mr. David B. Dickinson, of Lower Chatham Bridge, has again been successful in getting woodducks' eggs and raising a brood under a hen. He has been doing this for many years, and generally the ducks fly away at the end of the season if he does not kill them for specimens.

SOME HYDRAULIC ENGINEERS.

LAST week, while making some repairs, I found the nest of an English sparrow built directly in the gutter on the eave of my house. The gutter is a tin swinging gutter, and at that point the shingle ends projected well down into it. I found at the bottom the nest constructed of coarse material, splinters of wood, weeds, etc., through which the water could readily run. A large mass was used, and the nest proper was far back under the shingles and up above the water flow, and was made of fine closely compacted and cemented material.

The pond on my land has been frequently drained of water, which passed into a hole near the bottom and ran thence through a tunnel to the creek more than 200 yds. away. This tunnel was made by muskrats, and it passed under a hill the surface of which at one point must be at least 15 ft. above the tunnel. Now the questions are, how could the muskrat engineer and make such a tunnel, and what prompted the sparrow to so construct the nest as to avoid the flow of water in the gutter—reason or instinct?

J. S. M.

KENTUCKY.

HEN AND KITTEN.—Editor Wm. Seavy, of the *Pulaski, Va., News*, sends us this item, for the truthfulness of which the *News* vouches: The little eight-year-old son of Harry Alexander has a hen at his home in Newbern that is taking care of a young kitten in place of a brood of chickens, and is apparently as fond and proud of it as though it were a young chick. The boy found biddy sitting on her nest in the barn, and putting his hand beneath her to see what she was covering was surprised to find the kitten. The foster mother was very indignant and vexed when her little charge was temporarily removed, and pecked viciously at the boy's hand when he removed it. It was returned to the nest. It is supposed some cat had taken her young offspring to the nest for safety and the hen insisted on taking it in charge. There is no accounting for the strange freak taken now and then by some animals in adopting and caring for the young of some other species.

A BLACK WOODCHUCK.—Williamsport, Pa., Aug. 26.—Tuesday, Aug. 25, I was shown a jet black woodchuck or ground hog, which had been killed that same morning in Bradford county, Pa., and which fine animal I purchased to be mounted for my collection of mammals. The animal is not large for a woodchuck, but appears to be several years old, judging by the toughness of the muscles, etc. It makes the impression at first sight of a cub bear. The beautiful gloss of its hair, however, attracts attention at once. On each side of the animal's head is a large spot of dark chestnut brown, front part of muzzle or mouth is whitish, forming a circle of about one inch diameter. All the rest of the body is as black as black can be, and its back vies with the sheen of mink or otter.—AUGUST KOCH.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

TWO WEEKS OUT OF PURGATORY.

THURSDAY, Oct. 30.—After wakefully sleeping all night on the cars, we had a couple of hours in Boston for breakfast at Young's before taking the 9 A. M. train to Portland. Lunched at the Union Depot, where two ebony sharks unsuccessfully attempted to magnify a 70 cent *à la carte* into a \$1 *table d'hôte*. Leaving Portland and its ungente blackies at 1:15 P. M., reached Leeds Junction at 3 P. M., and Farmington at 5 o'clock, where we took a narrow-gauge car for Strong. It is said to be impossible in northern Maine to maintain a track wider than 2 ft., owing to the severity of the winters, which will contract a 4 ft. 8 in. road into narrow gauge after a single season. From Strong another little wood-burning locomotive kept showering stars into the night till it landed us at Kingfield at 7 P. M. Supper ended at the country hotel, we negotiated with the stage owner for a special rig to Smith's Farm next day. From Portland, and even from Boston, the country had taken on the Down-East look, and all things discovered Yankeeedom, from the train men with their broad A's and eternal guessing to the omnipresent mince pie; but this stage owner was the first native with whom we had to wrestle in a bargain. Having agreed to carry us to Stratton, it took him half an hour more to fix, or rather tell us the price. Repeated requests for the information were answered evasively, and twice the direct question about price arrested him just as he was slinking through the door. Finally after a supreme effort he named a reasonable figure, and we parted with him for the night.

Friday, Oct. 31.—By 7:30 A. M. we were in a two-horse conveyance bound for Stratton. A hearty young Blue Nose occupied the fourth seat, while the place of the driver was filled by a most independent and remarkable youngster of a baker's dozen years of age, who took the responsibility of bringing us over twenty-eight miles of rough road. The Nova Scotian with his coporeal laugh was an interesting and amusing traveling companion, who as much deserves a full-length portrait as did Thoreau's Canadian; his indelicate handling but thorough appreciation of a cigarette were alone a rich study in contrast.

On the right hand side of the road from Kingfield and above the neighboring hills rose the snow-covered crest of Mt. Bigelow, a glorious and impressive sight. Especially was it to be remembered as we had been riding through a desolate stretch of burnt land, bare of everything but charred stubs standing in their blackness.

Saturday, Nov. 1.—The baggage with driver on a buckboard, one of the party horseback and the other and two guides afoot, we reached Tim Pond, seven miles distant, by noon. The camp consists of twelve log cabins clustered on a low knoll a couple of hundred feet from the east end of the pond, and around the cabins is a cleared space of two or three acres, edged with the original forest. The main body of the pond lying in front of the camp is roughly rectangular in shape and about half a mile long by three-eighths of a mile wide. Toward the southeast four miles away is Kennebag Mountain, and between it and the pond is a double range of hills called

the South and Southwest Ridge a mile or more distant. Across the pond is Black Mountain, looking like a reclining elephant, and at the west is Maple Hill. The strip of flat ground around the pond a mile or so wide is swampy in places, and as we found later most abominable traveling. Around the shore, in stretches hundreds of yards long, is an embankment looking for all the world like an artificial levee.

After lunch we went out for a few hours, bringing home mental photographs of deer tracks, one partridge and four appetites. The day ended in the log cabin, basking and blinking in the yellow fire light.

The cabin of logs is about 15×20 ft. in size, with split cedar shingles laid nearest the sky. A piazza roof keeps the rain off the wash-room, which is open on three sides and floored with a bit of the earth's crust. Within the hut is sheathed with boards, and at the east end are two beds separated by a narrow passageway, a second floor five feet up, laid half across the cabin, forming a sort of attic for baggage. At the southwest end of the room is an open fireplace 5 ft. broad and 3 deep, arched at the top. The gray stones roughly set in coarse mortar are built into an irregular square chimney, which rises a couple of feet above the ridge pole. The hearth bottom is of large flat rocks, making a space 6×8 ft. for the embers to roll out upon. The surface of the chimney stones is unevenly darkened by the smoke escaping through holes in the flue. The flames rise through a sooty hemisphere black as the dome of night, and now and then a vagrant spark striking the tindery surface wakes up a host of bright little devils, who, unafraid by the rusty old fire dogs, scamper about in their golden night shirts till the mother imp puts them to bed again. The blazing logs light up the cabin, and an occasional damp chunk sizzling in imitation of the quiet kettle's voice pleasantly relieves the stillness. Comfort and content now cover us as thickly as will the heavy bed quilts a little later on, and but for the sword of departure that must fall next week we could dream away the evening hours with no intrusive thought of shop or any outer world activity. The woodpile blocks up the end of the room on both sides of the chimney, a couple of cords of potential warmth that will minister to rest and indolence. A reclining canvas chair of primitive construction, which proves the science of comfort to be an universal and intuitive knowledge, brings to the occupant mixed visions of the remote past and to-morrow's possible luck.

Sunday, Nov. 2.—Mac started for Beaver Bog and did not get there, but was home by nightfall in a condition approximating to physical collapse. This is a record of a pleasure trip, so no account will be given of his first Beaver Bog adventure, which for him shall live only in bitter memory. I went to the west end of Black Mountain, cruised around a while in a snow flurry and then crossed the 7-Ponds road to a deserted cabin, where "Obiter Dicta" and a *Police Gazette* were found moldering away together in a single grave and exhibiting no more antagonism than Messrs. Birrell and Fox would exhibit under like post-mortem circumstances. Crossing Alder Stream we ascended a hill, and on the way bagged almost half a dozen partridges, of which G. shot five. While we were sitting on the hill the afternoon passed with unconscionable slowness, for every minute of the two hours' watch brought new unhappiness to a body that would have shivered to pieces had it not been stiffened and solidified by cold. At half-past three, when the guide was timed to reappear, heard a slight noise in the woods, which was followed a moment later by a sound, the like of which I had never before listened to. The first thought was that the guide was dangerously amusing himself at my expense, so I didn't raise my rifle. Then I perceived a pair of tall gray ears through the trees, and concluded that a wild jackass had come within range, but as we were not after that sort of venison I still kept the gun lowered, taking the precaution, however, to raise the hammer in case the visitor should become belligerent. Finally a short tail switched a few feet behind the ears and proved the owner of the whistling bray to be a small deer standing head on. Quickly overestimating the distance about 500 per cent. I fired three shots at a spot a foot or more higher than where the head of this strange creature was indistinctly seen. A mountain ash shattered 8 ft. above the deer tracks showed that the powder was good and the aim (for the ash) was true. When we got to camp it was mildly suggested that a good hunter would not confound a jackass, a guide and a whistling deer, but then first impressions sometimes fool us, as Balaam found out long ago.

Monday, Nov. 3.—Leaving Mac loafing about the camp I started on the Beaver Bog trail, went around Maple Hill, and then up toward Black Mountain, where I watched for an hour or two. Sitting on the hillside this cold, still afternoon, it required a constant effort of will to keep eye and ear attentive to the signs of deer, for the quiet woodland prospect, enlivened only by the quick antics of the squirrels and the modest ways of the little mice, induced rather to reverie and nearby observation. The forest here is rough and wild, the evergreens mostly scrawny black spruces, with some balsams, a few hemlocks, and occasionally a white cedar, the hard woods being beech, maple and birch. In the open country nearer the farm lands are found second growth white and yellow (?) pines; and it is there the two varieties of spruces intermingle their green and glaucous leaves most effectively. These and the pines are lightened up by groves of tamarack, whose salmon yellow fall foliage replacing their soft green summer covering will soon disappear and leave them in their bare ugliness. But all these sights were left at Stratton. On this cold hillside the colors are fit only for a winter landscape. The ashen sky tones with the gray lace work of impending branches and their coverlids of snow, while nearer the earth, boles of spruce, rock maple and yellow birch deepen the general coloring. The deciduous trees have shed their leaves and the silhouettes of the branches plainly mark the different species. Now a few leaves only remain on little 2 ft. maple saplings, which cling to their possessions as if doubtful of the coming of another spring. It may be, however, that these infant maples are only copying the fault of a neighboring beech without knowing that they must ultimately give way to the law of their inherited nature. The mice and squirrels are about, and occasionally lesser animations come in view; a belated moth looking for a yellow leaf to match its wings, that it may die in a harmony of color, and close behind comes a shrunk mosquito blue with cold. But the guide returns for his detour around the hill,

and his too evident breaking of twigs, not to mention a very human but very artificial cough permits only a momentary belief that he is edible and worth shooting at.

Tuesday, Nov. 4.—As our bodies this morning showed signs of rebelling against this unaccustomed way of life, we decided to give them a day of rest, and sent the guides off to get meat for camp. G. returned by noon, having shot two buck caribou within a mile of the pond, so, of course, all indisposition vanished and we started for the place at once. The caribou lay where they fell, and were the center of a perfect hunting scene. While they were being resolved into a transportable state I foraged for fuel over the picturesque neighborhood, and soon had a fire blazing at the foot of a big birch. Mac in the meantime sat on a fallen tree with pipe in mouth and, for aught I know, was in communion with the familiar spirit of the place. His easy attitude and benignant face expressed a placid interest in all about him, while the incense of the nocturnal weed wafted gently upward toward Diana's nose. The records of the hunt, the mossy forest floor and the big trees near at hand called "As You Like It" to his mind, though he did not say who figured as Rosalind in his imagination. In this new forest of Eden we spent the middle part of the day, and with lunch swallowed large drafts of Sooshong tea and sylvan beauty. W. traveled all day without seeing anything, getting home at 8 P. M. with his much dilapidated trousers, and would have had to lie out all night but for birch-bark torches, blazed trees and signal shots fired at camp.

Wednesday, Nov. 5.—Spent the morning lugging in the caribou over three-quarters of a mile of rough and swampy trail, and after lunch all started up Seven-Ponds buckboard road. G. and I followed north on partridge track and got one, then crossed to south of road and watched for deer a while. Mac went further along and waited, while W. circled to the north. They saw a bear track made within a day or two. Reached camp at 5:30 P. M.

Thursday, Nov. 6.—Got away at 7:15 A. M. and went about a mile from the pond up the South Ridge, where we watched a little distance apart for four hours, but saw nothing bigger than a squirrel. G., however, got a young buck deer, about half a mile west of us. The dropping of water, ice and lumps of snow from the trees was continuous, and each new sound suggested venison: but none came within sight or ken. The snow gobs and icicles falling on the wet snow made every conceivable intaglio, resembling the footprints of all sorts of uncreated and impossible beasts, from monopedes to multipeds, not to mention a variety of winged and amphibious things. G. and I brought in the deer over some two miles of no path at all, swamps and thickets alternating in very displeasing variety. Found Mac hunting an elusive musquash, which he got after scaring it to death with several pounds of ammunition. A saddle of caribou (much like deer, but coarser) for dinner restored wasted tissue.

[CONCLUDED NEXT WEEK.]

CHICAGO AND THE WEST.

CHICAGO, Ill., Aug. 25.—Mr. W. R. Boyle, otherwise "Billy" Boyle, otherwise the proprietor of the English chop house where they formerly served illegal prairie chickens—note the past tense—now wears a heavy pall of gloom on his noble brow. Mr. Boyle will not speak to a shooter. Mr. Boyle is angry, fairly boiling over, so to speak. He doesn't think sportsmen ought to eat prairie chickens and ducks at his place and then "give it away." "That ain't right," says Mr. Boyle. It is a little tough for Mr. Boyle.

Mr. Boyle wanted to fight his case, and as it was about the clearest case in the lot of those discovered in the late raids, the opposition gladly accommodated him. Then he wanted his case continued, and again he was accommodated. Yesterday morning was the final day set for trial. Mr. Low, the sportsmen's attorney, was ready, and so were Mr. Donald, Mr. Harryman and myself, the witnesses in this case. Mr. Boyle's attorney wanted another continuance, because his wife was still sick and because Mr. Boyle was probably in Indiana. To this Mr. Low objected, and claimed a forfeiture of the \$200 cost bond filed with the first continuance. Justice White declared the bond forfeited. This \$200 now stands a debt against Mr. Boyle's property. If he chooses to step up and pay his fine and costs, he can avoid the remainder of the \$200. If the justice consents to set aside the forfeiture and hear evidence, he could, prosecution being willing, get his case into court again. He can also go to a higher court with it, in which case he will only lose more money. Mr. Boyle would better pay his fine. Also, he would better not sell any more illegal game.

We have now five straight cases against Rector's restaurant besides the case in which I would be only a solitary witness and which would not be so strong legally as those in which two or three witnesses were on hand. Mr. Rector will get his foot in about \$180 worth this time, in all probability.

A friend of mine tried Kern's restaurant yesterday for prairie chicken. The waiter sized him up carefully and asked him, "Do you see it on the bill of fare?"

"No, I don't see it there," said my friend and emissary.

"Then we don't got it," said the waiter with a grievous, pained sort of look.

Mr. Kern has not yet told the Illinois State Sportsmen's Association where he, or his steward more properly, bought those six prairie chickens that he had. He has said that "he might do that," but he hasn't done it. Now, Mr. Kern is, or has been supposed to be, and has posed to be, a prominent sportsman and devoted to true sportsmanship. If he is loyal to his professions, why has he not vindicated himself? Why has he not washed his hands? Why has he not told where these birds were purchased? This action of his has hurt him with some of the old standbys of the Association. I know what I am talking about when I say that the talk against him is growing stronger. Two cases against Mr. Kern remain untold. I think I state absolute facts when I say that these cases will be pushed unless Mr. Kern divulges where those birds were purchased. Mr. Kern will think this a "bluff." He will be mistaken. He has gotten out of this too easily, so people think since his silence about the game market. We want South Water street worse than we want Mr. Kern.

There was talk in this town here lately about a motion

made in the Illinois State Sportsmen's convention three or four years ago, a motion said to have been seconded, or at least supported by Mr. Chas. Kern. The motion was passed. It forever disbarred from the Association contests any man convicted of an offense against the game laws. This was the popular statement of it, and the talk became general that Mr. Chas. Kern, ex-president of the State Association, president of the Audubon Club, etc., etc., etc., would therefore be barred from the privileges of the Association tournaments.

Mr. Kern is so barred to-day.

Of course in a matter of this kind the only thing to do was to go to the records. I went to Mr. Shepard, secretary of the Association, and put the question to him. "There never was any such motion made," said he. Then I asked him to find the records for 1888 and 1889. Meantime I asked Mr. W. N. Low about this same motion.

"Yes, sir," said Mr. Low very positively, "there was such a motion made, and I know it, because I made it. I don't remember who seconded it, but it was passed. That was the year when Roll Organ was president. The records ought to show this."

Mr. Shepard showed me the records for 1888, and they held no account of this motion. They did mention that the president's address was omitted, and that in a stirring speech Mr. Low denounced the game law violators. The records may or may not be correct. I dare not say they are not, for if that insinuation should reach Mr. Shepard he would simply fall dead of horror.

Mr. Shepard did not have the transcript for the convention of 1889, but he did have the original notes, and in them he showed me the following:

"Moved by Mr. Sheahan and seconded, that any member having been found guilty of violating the game laws be barred from all privileges of this Association. Carried."

This was June 4, 1889, the year Mr. Low was president. This is exactly how the record stands. It is official, whether explicit or not. Compare this record with that of Justice White's police court, and it is needless to say that right now, without further action, Mr. Chas. Kern, ex-president of the State Association, etc., etc., can not compete in a tournament sweepstakes here next June. He can not vote in the convention. He can not make any ringing speeches there. He isn't in it. Of course, Mr. Kern has plenty of friends in the Association. They will smooth this all up. They will accept his alibi. They will get him back in. They will rescind the above obnoxious motion. And thereby they will satisfy the Illinois State Sportsmen's Association, and will put it on record to the exact contrary of the above motion. That will be very nice.

It is not of record that Mr. Kern made a speech.

I like my old friend, Col. Bond, the king of the Chicago game dealers, because I can always go down and have a pleasant time with him and learn a lot about where illegal game is not sold, and a lot about the virtues of those good men, the game dealers. Besides, the Colonel is pretty clever and pleasant anyhow. Last winter I published several letters from him, until he began to mark them "Not for publication." This morning I got another letter from him, which reads as follows:

If you have leisure I would like to have you call on me as I want to talk with you. I inclose a letter for your perusal. I have many of such tenor.

The letter which the Colonel mentions has the signature carefully torn off, but I give it unchanged elsewhere, as it may give a pointer to some sportsman who wants some good chicken shooting. It reads:

JOHNSTOWN, Neb., Aug. 19.—Messrs. Bond & Whitcomb, Chicago, Ill.: Dear Sirs.—It will be lawful to handle all kinds of game in this State after the 1st of September. Can you handle grouse and chickens there? The prospects are favorable for a good trade here; but if we can't sell in Chicago will have to ship further East. Please give me prices on venison dried. Yours respectfully,

I don't know what the Colonel wants to see me about. Maybe he wants to explain again that if Chicago doesn't handle illegal game, New York and Boston will. This, of course, makes it all right for Chicago to do so. I will go down and see my pleasant friend pretty soon and find out what is troubling his mind. It can't be the new game warden, or perhaps these new restaurant cases.

Evaston Gun Club performed a novel act of justice lately. It found a citizen who had killed nine prairie chickens illegally. The club told him it proposed to enter suit. The citizen was a pretty decent sort of a fellow, and he just compromised the suit by paying \$45 into the hands of the club treasury! This is certainly a trifle unique.

They caught another fellow killing prairie chickens out that way not long ago, and took him before a justice, who asked him what defense he had to make.

"I never killed no chickens, judge," said the prisoner, "I only killed two meadow larks that these fellers t'ought was chickens."

"Ten dollars and costs!" roared the justice; and till to-day the culprit in the case, who didn't know that larks are protected, thinks he was a victim of misplaced confidence.

To-day I learn that State Warden Buck sent two lady detectives to Wm. Werner's restaurant for illegal prairie chickens. That was last week. They reported themselves unable to buy any, which many of Billy Werner's friends will be glad to hear.

A typical letter of the sort I am getting about now is the following from Mr. Ray Tompkins, of Elmira, N. Y., which reads:

Last year I asked you for some advice, followed it out and had the best of sport. I visited many lakes north of Trout Lake, Wis., and found all the fishing I wanted. For one who is willing to take his pack on his back and throw back what fish are not necessary for his existence, this region will furnish all the sport he may wish.

Now I am after more advice. I hope to make a trip west to Devil's Lake, Dakota, after ducks and geese in October, and I want to know if I can get some chicken shooting without going far from my way. I note by yesterday's *FOREST AND STREAM* you speak of the region about Devil's Lake as being good. Are you assured if this is so? From Devil's Lake, after a week or ten days' shooting, I want to go from Hallock or Crookston into Minnesota after big game. Do you know of any people in either of those places who could guide me or advise me after I got there? Anything you will write me will be greatly appreciated. Would it pay me to take my dogs so far for chickens?

I never was at Devil's Lake. Last fall I heard of many shooters going further west than that for geese, but should think that one who had never had better shooting would believe the goose and duck shooting still possible there the best on earth. The Turtle Mountain

region, north of there, was reported good last year for sharp-tailed grouse. Personally I can not speak for it. If Mr. Tompkins, and everybody else, will write to Mr. C. D. Gammon, 139 N. Des Plaines street, Chicago, and to Mr. Geo. T. Farmer, Rookery Building, Chicago, they will strike mighty clever men who have shot all through that country and know it well. I take the liberty of giving their addresses publicly, because I want to make them a whole lot of trouble which after all they will probably enjoy. They are pretty near decent men, both of them. I bear in mind that they reported last fall that the Devil's Lake country was unpleasant from the fact that hotel men, teamsters and farmers were all rank robbers—\$10 a day for a team, and that sort of thing. This is worth investigating.

I should think it safest and wisest to take one's dogs in with him. Then he is all ready, provided the dogs are any good. By October, however, even in this lower latitude, the grouse are all packed, and do not lie close to the dog. When a dog is to be used at all, it is best to take one along if possible. What is the fun in hunting over another fellow's dog?

At Hallock or Crookston I know no one to whom I could direct a sportsman. Mr. Chas. Hallock, that eminent sportsman after whom this town was named, has within the past three years said that the great Roseau Swamp, east of that place, contained abundance of deer and some elk and moose. Will some reader from that section respond?

Mr. Merrill, of Milwaukee, has gone to Andover, S. D., for his chicken shooting. This is on the Hastings & Dakota division of the St. Paul Railway. Mr. Merrill says the shooting is good all the way from Ortonville, Minn., to Fargo, Dakota. Earlier in the season, while having some dogs trained, Mr. Merrill found birds very abundant at Stuart, Minn. He found 25 coveys in one day.

Mr. C. S. Burton to-day told me he had just talked with a man from Neche station on the Great Northern Railway, N. D., and the latter said that he had never seen so many birds as there were this year around that place. Mr. Burton is a shooter and this should be reliable, as his friends would not misinform him.

Mr. W. L. Shepard starts next week for chicken shooting near Volga, S. D. This point I have mentioned earlier.

Mr. Burton and party will make their annual trip to northwestern Minnesota within a week or so. They will go to Detroit Lake possibly.

Mr. Alex. T. Loyd and R. R. Donnelly, accompanied this year by Mr. F. R. Bissell and one or two others perhaps, will this fall make their regular chicken trip, starting this week, probably for Stuart City and Detroit. They talked of Tracy, much further south, but fear dryness there.

Shooters should be careful where they go in northwestern Minnesota this fall, for there has been considerable drought in some sections. A letter received to-day from F. A. Pheatt, an old trapper of Dalton, Minn., gives the following blue report:

"I thought I would let you know how the local ducks are and what the prospects are for shooting. There are no ducks, no game of any kind so far, and if we don't have rain before long, and lots of it, I don't look for any shooting this fall to amount to anything. Everything is dried up, what wasn't last year is this, and is so hard that there are no plovers in the country. I never knew game so scarce as this fall so far."

I do not learn that this is general, and have heard that in Dakota the season has been favorable. The crop reports indicate good game weather. E. HOUGH.

THE SAFETY OF HAMMERLESS GUNS.

Editor *Forest and Stream*:

In your last number I notice "Hints in Handling Guns," which are good. One sentence struck me as peculiar: "Hammerless guns are a constant danger to persons boating." I have hunted ducks and shot at them a good many times from a boat, and have used and been in company with persons who used hammerless guns for years and never had an accident, nor did any of the numerous friends using these guns while in my company have one. On the other hand, with people using hammer guns the case has been entirely different, and memory recalls many hair-breadth escapes and some serious accidents, and also some deaths occurring from the use of hammer guns, which could not have occurred had a hammerless been used. A hammerless gun is far more safe than any make of gun with hammers, and if properly constructed with a good "block safety" there is no possible danger of shooting your friends or yourself; and if no "block safety" is used, there is not near the danger of accidents in using a hammerless that there is in one with "dog ears." When two people are in the boat and you are going to the shooting ground allow only one gun to be loaded after the parties have taken their places, one of them facing the bow, the other to use oars or paddle. When the place designed to shoot over is reached, remove the shells, set out four decoys, assume your places, and if shooting from a boat face each other, and never swing your gun over your companion's head, nor around in front of him, but let each do his shooting from the right side as you face each other, and my word for it no one will be harmed. The writer has been in this position and seen his companion kill thirty ducks when not three fell to his gun. But how was it when the setting sun was sinking in the western horizon and the ducks were returning to the "marsh"? Then my companion could sit and watch me kill or miss them the same as I did him during the morning flights. HAMMERLESS.

CAZENOVIA, N. Y.

THE WEEDSPORT ROD AND GUN CLUB has been organized at Weedsport, N. Y., with these officers: President, Dr. Haskell; Vice-President, B. J. Hoyt; Secretary and Treasurer, E. L. Benedict; Directors—H. A. Stevens, Geo. Stickle, J. I. Weed, C. F. Brooks, A. Stickle. The club proposes to see that the game laws are enforced. They will occasionally hold social meetings and target shoots.

SPORTSMEN ATTENTION!—If you want fine sport and plenty of feathered game, go to northern Iowa. The shooting is excellent and you cannot fail to enjoy the trip. Or if you desire to go a little further, the prairie and lake region of Minnesota is equally good for both fish and game, and the distance not much greater. Both are reached by the Chicago, St. Paul & Kansas City Railway, the leading line for sportsmen and tourists between Chicago and the Northwest, as well as the West and Southwest, and a favorite route with all who have traveled over it. Tourist tickets now on sale. For any further information call on or address F. H. Lord, General Passenger and Ticket Agent, Phoenix Building, Chicago, Ill.—Advs.

THE open season on partridge, or ruffed grouse, began on Tuesday, Sept. 1, in Maine, New Hampshire and Vermont. The open season on woodcock also began on the same day in Maine and New Hampshire, but in Vermont the open season on that bird began on Aug. 15.

Mr. J. O. Frost, of the flour trade, and very well known all over New England, lives on a fine farm in southern Vermont. He dearly loves to shoot, and likes better still to have his friends enjoy a good shoot. He lives in a good partridge section, and usually there are some birds to be had; but this year he tells me that he has not seen a single flock. He remarks that there ought to be some partridges in the woods about his place. By special statute, enacted in 1890, dogs are prohibited for hunting grouse in the State of Vermont. See *Book of the Game Laws* (Forest and Stream Publishing Co.).

W. H. Coggin, salesman with Dwinell, Hayward & Co., well known in the New England coffee trade, has just returned from his vacation trip. He has been absent two weeks. With his brother-in-law, W. H. Doan, he hired a cottage at Northport, Me. just out of Belfast Bay.

sight. This was the closest I remember ever to have been to this wild bird in his native state, when seen. I have been closer to one, but then I did not know it until he flew.

This bird had heard me walking, and his curiosity had prompted him to come to the edge and look down to discover the cause of the noise. Perceiving that my back was toward him he knew I could not see him, and so had remained; perhaps he had not seen enough of me to satisfy him, and when I turned round he knew I could not reach him from the lay of the ground. He probably had never been shot at, and knew nothing of the killing power of the gun which I held in my hand or of man's ability to harm at a distance. There is a possibility also that this bird had never even seen a man, although this is hardly probable.

SCHENECTADY, N. Y.

WILD RICE.

CHICAGO.—Mr. F. A. Howe, a prominent member of the Tolleston Club, one of Chicago's most esteemed sportsmen, one of the thoughtful and investigating sort,

INDIANA.—Fremont, Ind., Aug. 18.—I would like to offer a suggestion, that more of the readers of your paper would keep a memorandum of each day's shooting, giving an account of each shot and description of the ground covered each day, etc., etc., and send a copy of the same to your paper at least once each month. We have prairie chicken in this county and the county west and north of us. Partridges and quail are more more plenty than they have been for many years. A great many of the farmers object to hunting on their premises. I noticed the frequent mention in *FOREST AND STREAM* of Arctic owls being killed during the last winter. I send you by present mail photos of a pair which I secured last December. Two others were killed in this county in the same month.—Mc.

MISSOURI PRAIRIE CHICKENS.—Alexandria, Mo.—The open season for grouse shooting here in Missouri begins Aug. 1, and on that date and for a week or so following there is a general slaughter of these splendid game birds. City hunters come out and camp, and invade stubble fields and pastures and shoot most every grouse that they

AMONG THE WILDFOWL.—I.

"JUST AS THEY WERE WHEN I TOOK THEM."

Mrs. Coggin and her sister, Miss Ella F. Doan, were in the party to make it complete. They went fishing every day, when the weather would permit, and it was generally fine. They were there for fishing. It was mackerel this year that they caught, instead of pickerel and bass in the Hampden Pond, as last year. One morning they made a catch of 42 mackerel, the ladies greatly enjoying the sport. They had always enough for the table. The fishermen in that section had a good deal to say about "trow bait." They had it. It was clams chopped up, and when kept for several days in warm weather, it was fit to be called any sort of bait, except sweet-smelling. This "trow bait" would insure the fishermen a plenty of mackerel almost any morning. One morning the Coggin party decided to try it. They hired the owner of the "trow bait" to scatter it plentifully over the surface of the sea, as was his wont. Then they all fell to fishing, but without a blessed mackerel, after a two hours' trial. They sent the owner of "trow bait" home, and did not ask for his services again.

A peculiar attraction to be shown at the Eastern Maine Fair, in Bangor, in a few days, is a pair of tame moose, found and captured by one Burgoin, near the Hunt farm, in the vicinity of Mattawamkeag.

Camp Leatherstocking is completed, on the knoll known as Cherrytree Point, just below Camp Stewart, at the upper end of Richardson Lake, Me. This camp is the property of Mr. N. G. Manson, Jr., of the firm of Bellows & Manson, of the Boston iron trade. O. W. Cutting, the well-known guide and camp cook, has been master builder. It is said that the camp is a beauty. Dr. Haven of Boston is to build a fine camp on the green island that divides the West Arm from the upper end of Richardson Lake. He will build this winter. Such is the march of improvement. A few years more, and like the Adirondacks, the Rangeleys will be lined with beautiful cottages and camps, costing up into the thousands of dollars.

SPECIAL.

WAYS OF THE RUFFED GROUSE.

ONE day while out shooting among the Glenville Hills, I was walking in a path a short distance from the top of one of the sides of a deep gorge that ran among them. After going some distance I had stopped at a point where the path wound abruptly round the hill, and I stood looking down into the gulf below. From this point I had a magnificent view of the varied foliage, and caught glimpses of the pebbly stream that flowed through its whole length. Behind me the tall pines and hemlocks threw a sombre shade over the scene. Their tops swaying and roaring with the wind brought to my mind the words of Bulwer Lytton:

"The dim forests awful with the roar of pines."

Finally I turned to resume my walk, and as I did so I cast my eyes upward and there upon a plateau covered with moss, that projected nearly over me, stood a ruffed grouse looking intently down upon me. He was 12 ft. from me, as I afterward measured it. He was partly turned sideways, with his neck arched and head bent down, and made a beautiful picture with a background of evergreen.

He remained motionless, as I did also for above a half minute, when he slowly turned and was quickly lost to

told me something which will be of interest to a great many owning duck preserves.

"I can tell you something about wild rice," said Mr. Howe, "something just the contrary of what you would expect. You would naturally think, wouldn't you, that, as the rice gets ripe and naturally falls off into the water during the fall, the fall would be the natural season for planting wild rice if you wanted it to grow to the best advantage? Well, it isn't. I know it has always been thought to be, but our experience at Tolleston Club this year doesn't show that to be true.

"We got twenty-five bushels of wild rice last fall and sowed twenty bushels of it the best we knew how. It did poorly; indeed the experiment was practically a failure. This spring we took our remaining five bushels and sowed it, and the result is simply amazing. I believe we have 200 acres of wild rice now, and I never saw a heavier growth. The stalks are 8 ft. high and as wide as your two fingers in some instances. We blundered into it, but we now have wild rice in abundance on Tolleston marsh, and it was this spring's sowing that did it. When the marsh was dry the cattle killed off the original marsh growth. We now have a dam which holds the water at proper stage, and I think we have solved the question of wild rice feed for our ducks."

E. HOUGH.

AN APPEAL TO COLORADO SPORTSMEN.—Denver, Aug. 21.—To Members of the Rocky Mountain Sportsmen's Association and All True Sportsmen: As you are aware, our Association secured through the Eighth General Assembly the appointment of a game and fish commissioner, three district game wardens and six deputy wardens. Our State Auditor now informs us that there are no funds for the payment of salaries or expenses of the fish and game wardens, in prosecuting violators of the game laws. It is thought that by the last of October there will be an abundance of money to cover these expenses; but now is the critical period; giant powder is being freely used; hundreds upon hundreds of deer and elk are being wantonly slaughtered for their hides, and these violations are only suffered to go unpunished by reason of the temporary scarcity of State funds. In this exigency I believe it incumbent upon us as sportsmen, to fill in the gap. Between \$200 and \$300 are necessary at once. The money will be turned over to Commissioner Land, accompanied by the name of each subscriber. The assessment which I now make is fifty cents per capita, for each member of the Association; this is a very trifling amount compared with the immense good which I promise you will be done with the money. Respond promptly and generously. Remit to me post office order, or postal note, to 1227 17th street, Denver. Yours truly, C. M. HAMPSON, President R. M. S. A.

KENTUCKY.—Shelbyville, Aug. 18.—Although the season has been rather wet, quail appear to be plentiful in the stubble and similar cover, and had I the time I could have rare sport. It would be somewhat marred, though, by having to lug around the 9 lbs. of my 12-gauge. Who will trade me a feather-weight small-bore for it? Quail is about the only game to be found here. Rabbits are plentiful, but no bird hunter will shoot rabbits, because too heavy to carry and not of much value to the table; but they are eagerly hunted by the negroes, who often depend on them as their only meat supply.—J. S. M.

find. Some savage sportsmen even shoot grouse several days before the law is out, thus getting in their cowardly work ahead of sportsmen who observe the law. I think the law is very imperfect as to date. On Aug. 15 in this latitude these birds are about two-thirds grown, and fall easy victims to wholesale shooters. Let the open season begin with December and end about Feb 15. This will give those birds a chance to regain their numbers and to continue with us.—JASPER BLINES.

THE STORM OF LAST WEEK brought the shore birds out in force along the Long Island and New Jersey coast shooting grounds.

Sea and River Fishing.

"ON THE NORTH SHORE."

COMMENTING on Mr. Starbuck's series of North Shore trout experiences, "Podgers" writes: I want to express my thanks to your valuable correspondent Mr. Alex. Starbuck for setting at rest a long-cherished idea that I could some day indulge in an outing on the shores of Lake Superior. I have read very attentively that gentleman's interesting articles on his experiences in that region, and have come to the conclusion that I shall not undertake any similar expedition in that direction. I confess to a great disappointment in its resources, to say nothing of its climatic features, and especially as regards its fishing inducements. I am no tenderfoot, and can endure much that is disagreeable if there is a reasonable compensation in the way of sport for rod and reel. From Mr. Starbuck's relation he appears to have enjoyed a maximum of storms, bad weather and discomforts with a minimum of good fishing, and after the facilities and grand sport the waters of Canada afford, a trip to the shores of the western lakes seems to be going much further and faring a great deal worse. In fact there is seldom any worse at all in Canada fishing. Mr. Starbuck has dispelled the cherished illusions I have had of the field for fishermen in the Far West. I know of fishing grounds to be reached in a palace car within twenty-five hours of New York, where more trout and larger ones can be landed in one, or say two days' fishing than Mr. Starbuck claims in his whole trip, to say nothing of his discomforts and the expense.

There is ever a great charm in roughing it and encountering a certain amount of hardship in such an expedition, and also a charm in wild scenery, all of which I fully appreciate; but I want something else; I want fish, and plenty of them, without which adjunct it is like a dish without seasoning. Beautiful lakes, waterfalls, rushing rivers, fill the sentimental part, but I want to fill the creel as well. Sentiment and love of nature plays its part, but however beautiful the sparkling waters of a lake, the clear rushing torrent of a river, if there are no fish I want to move on. In Canada the lakes are beautiful, the rivers rush and foam, the scenery is fine and so is the fishing. We get cart loads of sentiment and a basketful of big fish at the same time. Sentiment and fish harmonize when the fish are in it. I am not in it when the fish are omitted.

It is quite likely that Mr. Starbuck won't thank me for my sympathy, and no doubt he enjoyed his trip and is well satisfied with it; but to my mind there was too much discomfort, too much rain, too much rough water, and too much "ingin" in it, and too few fish for real right down enjoyment. Such an accomplished sportsman deserves better luck. I hope Mr. Starbuck will come east some day and try Canada, where he will find a great field for exploration, where the foot of white man has never trod, lakes and streams galore that have never known a fly upon their bosoms. He can, too, indulge in his penchant for Indians, but they are all good Indians, sufficiently civilized to recognize a fair quantity of fire water, but not given to "ways that are dark and tricks that are vain," as those he has had his experience with; and in canoe and camp they are valuable men, of course the less civilization the better the man.

PODGERS.

ANGLING NOTES.

ONE of the members of the Cascapedia Salmon Club who recently returned from that river confirms the report of poor salmon fishing this season. So that a scarcity of salmon it not confined to the Restigouche. But as an off-set Mr. Patterson says that he never had such trout fishing in his life, both for sea trout and the true speckled trout. He made one trip far up the river with his Indians, beyond where white men usually go, and captured some magnificent specimens of brook trout, one of which weighed 9lbs. and several over 5lbs. each. He found that for 20 miles up from the mouth of the Cascapedia, the sea trout were the only kind to be found, then beyond that point the brook trout and thesea trout were both found, but in the upper waters he caught no sea trout at all. Whether these fish gradually lose their brilliant silvery color and become the ordinary speckled trout or not I cannot tell.

Doctor Hawes's son had the great good luck to kill a big speckled trout in Preston Pond, Adirondack Club. It lacked just 1oz. of being a 6lb. fish. This is probably the largest speckled trout ever killed in that section of the woods, if not in the whole Adirondack region. A few years ago Mr. Cromwell caught a 4½lb. speckled trout on a back cast. His fly touched the water behind him and he exclaimed, "I am fast! must have caught a log or stump," but the guide told him there was 60ft. of water there and it could not be a stump. Just then the trout started and Mr. Cromwell soon found out it was no stump, but a big fish.

Large bluefish are being caught outside of Fire Island in fair numbers. The best place is on the outer bank, some 5 miles from shore. It is only safe to go out when the wind is "off shore." Mr. C. E. W. Chambers and two sons caught 53 bluefish running from 2 to 4lbs. in half a day's fishing off Rockaway Inlet last Thursday, and every boat in sight seemed to be taking their share. A few big weakfish were also taken on the equid.

The New York, Maine and New Brunswick S. S. Co. offer to give a two weeks' excursion to St. John, N. B., Campobello Island, etc., for \$30; this includes everything. Not a bad idea to introduce that magnificent country to the people, and I have no doubt that one could have quite a little fishing on such a trip, as they allow about a week on shore. And they visit an excellent section for both sweet and salt-water fishing.

Striped bass fishing is improving rapidly. A number have been caught in Hell Gate waters by trolling and they are now running in the salt-water creeks on the south side of Long Island. Not long ago an angler took a fine speckled trout while fishing for striped bass. Delicate tackle is necessary for this style of bass fishing.

On July 13 Silas Newell, John Swim, Frank Dunderberger, and George Goldsmith exploded dynamite cartridges in the Hudson River near Iona Island. A few days ago they settled by paying fifty dollars fine and promising never to do so again. State Fish and Game Protector Kidd, of Newburgh, accomplished this result.

SCARLET-IBIS.

THE BLUE PIKE.

A SMALL relative of the pike-perch, or wall-eyed pike, is rather widely known in the Great Lakes and the Ohio River as blue pike and blue pickerel. In Lake Erie this is one of the most abundant fishes, ranking next to lake herring, as may be realized from the catch of 1885, which amounted to 8,000,000lbs. In Lake Ontario the species is not so common; but recent advices from the Oswego River tell of an unusual run during August. It has been recorded that Oswego fishermen sometimes apply the name gray pike to the blue variety; but this term is generally used for the sauger, which is a very distinct fish. The blue pike is shorter and deeper than the pike-perch; has a larger eye; is bluish or greenish on the upper parts and with little trace of the brassy lustre characteristic of the pike-perch; the spinous dorsal has a dark band and on the posterior part is the usual black blotch. In size the blue pike is usually much smaller than the pike-perch, about 1 to 2lbs. in weight, according to locality, and 15in. in length; but specimens weighing 15lbs. have been recorded.

In Ohio the fish is said to occur only in bayous and inlets, while the pike-perch is found in deep parts of lakes and in large rivers. The pike-perch spawn in the spring, April and May being the months of the greatest activity in this operation. The eggs are now artificially hatched yearly by hundreds of millions and the fish has become one of the general favorites wherever it has been introduced, and especially in the Delaware and Susquehanna rivers. In the Susquehanna the pike-perch lives in eddies and deep pools in the vicinity of rapids and has a fondness for the shelter of rocks and sunken logs, where it lies in wait for the minnows on which it feeds. The eye of the living pike-perch is one of the most beautiful things in nature, combining the blue of the sky and the green of the sea. The movements of the fish when seizing its prey are extremely pike-like.

Blue pike is the fish principally taken by the Buffalo fishermen who follow ice-fishing from December until March; but the most approved modes of capture are by trolling and fly-fishing. Anglers will be glad to hear of the following good report from the Oswego River, New

York, especially as the fish appear to be increasing in numbers:

During July and August there has been a greater abundance of blue pike in the Oswego River, at Oswego, than for many years. For a period of about four weeks the run of this species was phenomenally large, and the number of fish taken may be counted by the thousands. Some days in July as many as 500 people were fishing from the wharves and docks and from rowboats. At the present time comparatively few fish are caught, although perhaps a hundred anglers visit the river for a few hours' sport. The current in the stream is quite rapid, and the most usual method is to allow the line to drift, while the fisherman, pole in hand, walks along the shore. There is also some trolling. Spoon hooks, baited or naked, are most generally employed, although not a few fish have been taken with plain angle-worms. The fish have weighed from a few ounces to more than four pounds, individuals of the latter size not being at all uncommon. The daily catches have ranged from 10 to over 100 fish, and a reliable fisherman places the number landed since the beginning of the season at over 150,000, which appears to be a low estimate.

A PUBLIC-SPIRITED ANGLER.

THE fisherman who takes California trout from Onondaga creek has good reason to be grateful to Mr. Henry Loftie. This not necessarily because the fisherman may happen to use tackle made by Mr. Loftie, but because it is altogether due to that gentleman's public-spirited enterprise that the fish are now to be found in the stream. Indeed many waters in the vicinity owe their

HENRY LOFTIE.

fish supply to the same activity. Fish planting and fish protection are two themes on which Mr. Loftie is ever ready to talk, and what is better, he is equally as ready to give time and work and money to advance the cause. For the past ten years he has been actively engaged in stocking and protecting the waters of central New York. He is one of the most active members of the Onondaga Anglers' Association. Mr. Loftie is an angler through and through, and it was long ago accepted as a foregone conclusion that he would eventually find his way into the manufacture of angling goods. As the head of the Syracuse Bamboo Furniture Co. he is widely known to the fishing tackle trade and to fishermen, who will welcome the very faithful portrait here given.

FISHING RIGHTS.

FROM Mr. F. M. Ward, of Newton, N. J., Fish Commissioner, we have received the following exposition of fishing rights:

A short time since a discussion arose among some gentlemen of this township, relative to the rights of land owners along the Wallkill, and what rights these land owners have in relation to fishing in the Wallkill, either legally or illegally.

It was contended by many of them that parties owning land along its shores could fish with nets or set lines or any other contrivance as long as it was done on their own premises, and that no law of the State could interfere for so doing. They also contended that they could authorize whomsoever they saw proper to fish in the same manner.

In order to settle the matter definitely and to have a final understanding in regard to the question at issue, a representative of the Newton Independent interviewed several of the county lawyers, State Fish Commissioner Ward, Judge Martin, and Mr. John Linn, of Hamburg, President of the Game and Fish Protective Association. At the request of Fish Commissioner Ward, Lawyer Henry Huston, of Newton, wrote the following opinion which was substantially as follows:

"The Wallkill, within this State, is subject to the laws of New Jersey regulating fishing. The State has the right and authority to regulate and protect fish in private waters in rivers where the tide does not ebb or flow, in streams not navigable, and in lakes and ponds, and to impose fines, forfeitures and penalties for violation of laws enacted for such purpose. Weller v. Snover, 13 Vroom, 341. Dougherty v. Conover, 13 Vroom, 198. VanAulin v. Decker, 1 Penn. 108. Champion v. Pierce, 6 Halst. 186. Shoemaker v.

State, Spencer, 153, and numerous cases in other States and in the Supreme Court of the United States.

"Where a stream of water flows through a farm, the owner of such farm has no right to take fish from such stream except according to the laws of the State. And if such owner catch fish from such stream out of season, or with nets, fikes or seines, or in any other way prohibited by the laws of the State, he violates the law and is liable to conviction and subject to the penalties provided by law. He has no more right to catch fish from such stream out of season, or contrary to law, than any other person. If such owner use nets he may be fined and the nets may be confiscated.

"Any person may catch trout between April 1 and July 15, and then only with hook and line; he may catch pickerel at any time except March and April, but only with hook and line; he may catch bass between May 30 and December 1, and then only with hook and line. The trout caught and kept must be at least six inches long, and black bass seven inches long. He may not fish on Sunday. The hauling of nets in fresh water or ponds is a violation of law, whether any fish are caught or not.

"No one has a right to trespass on the lands of another for the purpose of catching fish without permission of the owner, and if the owner, or occupant, shall post a notice adjacent to any stream or pond, the person so trespassing shall be deemed guilty of trespass, and in addition to damages recoverable by law, shall be liable to the owner, lessee or occupant, in a penalty of \$100 for every such offense. See act approved March 27, 1874, section 18.

"Generally, for any violation of the laws relating to the protection of fish, the offender may be arrested, brought before a justice of the peace, tried summarily and without a jury, and upon conviction must pay the penalty prescribed by the statutes, with costs of suit, or be sent to the county jail for not less than ten nor more than thirty days." Very truly yours, HENRY HUSTON.

BIG CATCHES.

Editor Forest and Stream:

Here's more of it. In a recent issue of FOREST AND STREAM a correspondent, writing from Minnesota, says that he and a friend went to a lake and in just "five hours caught 115 fish, nearly all black bass," and that it was "nothing out of the common to take twenty or more bass, weighing from 2½ to 5lbs. apiece, any morning or evening." Well, I should say that it was considerably "out of the common." It seems to me it was uncommonly gluttonous.

In the same paper another man writes of going to Reed's Bay, New York, and with a friend "catching in two days 188 as fine small-mouth bass as one would wish to see." What for? Great Caesar's ghost, what for?

And further on he says, "What we call our record day was," etc., etc. So it was a fish for record, eh? Of course, so that he could boast of it. And he says the weather was so bad they could fish but four or five hours each day. It must have been a heart-breaking regret that they couldn't fish ten hours a day at the rate of thirty-five fine black bass per hour. That would have been a much bigger string to swell over. Shame!

Again, in the same paper, "Scores of 42, 50 and 70 in a day have been reported"—black bass at Greenwood Lake. Praise-worthy and eminently gratifying it must have been.

In a Philadelphia paper I read, a day or two ago, that "between Tacony and Bridesburg (in the Delaware) two men caught 31 dozen and 3 perch, and two reverend gentlemen and a layman caught—murdered in cold blood—24 dozen and—" That's all; 660 fish in four hours. Isn't that nice! Wasn't that fine work! Isn't that a job to be proud of! One hundred and ten fish apiece in four hours! Ye gods and little fishes! What kind of humanity is this? What did they do with them all? There is no record in any of these stories that a single fish was thrown back. If there were there would not be so much shame, by some shame for each fish returned. And fishermen complain that fishing is not as good as it used to be in many waters. What will it be in the near future in the waters named if such things be? These men did not go for food alone, they went for sport. What is their idea of sport? To kill just as much as possible in a given time? I'm sorry for them. When will the custom obtain for sportsmen to catch only what they need, and if they must catch more, return to the water promptly the surplus? I know it is the custom with many to catch what they individually need, and then all their friends and neighbors need or can get away with, and so excuse their greed; but I think the needs of all hands might be greatly curtailed with a little thoughtful self-denial, with largely resultant benefit to themselves and other fishermen. Why not let this idea soak in, and act upon it you, and you, and you? O. O. S.

TROUT FISHING AT THE "SOO."

SAULT STE. MARIE, Ont., Aug. 12.—*Editor Forest and Stream:* Mr. Beard and myself have been about here fishing and outing since the middle of June, and have had various luck in the streams, lakes and rapids in this vicinity, and very enjoyable this summer, especially on account of the almost entire absence of flies and mosquitoes. About two weeks ago we struck some reef fishing, within two and three miles of the "Soo," that has surpassed any of the fishing that has been reported from the North Shore.

One day we brought in 19 trout, caught in say two hours' morning fishing and three hours in the afternoon. They weighed 25lbs.; and a few days after we caught 12 trout that weighed 20lbs. in almost the same length of time fishing; and other days not so many, but always some weighing from 1 to 5lbs.; and this all within easy rowing distance of the hotels. These strings of fish were all weighed at Mr. Plummer's store and in the presence of a number of people.

The fishing in the streams back of here and all about is very good; and it is no trouble at all to bring in a basket of from 50 upward; but these are all small brook trout, and of course do not compare in sport with the larger ones. I write this letter in the hope that the attention of your angling readers may be attracted to this place and vicinity, for I am fully of the opinion that better fishing for speckled trout can be had here than at most of the more noted places, and at far less expense.

And though an American in every sense, born and raised in the States and now living in Memphis, Tenn., let me suggest as far preferably, to stop on the Canadian side at either of two most excellent hotels.

C. T. BROOKS.

CHICAGO AND THE WEST.

CHICAGO, Aug. 29.—As stated earlier, Mr. W. P. Mussey has been down at Mak-saw-ba Club fishing this week. At his invitation I joined him to try some of that interesting Kankakee River fishing, of which I have lately said so much. We had a simply terrible day. It rained almost continuously, and we were drenched, cold and shivering long before evening, but we got 10 fish, weighing 24lbs., all bass but one, a wall-eye, and all the bass small-mouths but two. I never saw fish strike more viciously or fight harder, and must pronounce this river fishing the most exciting of any I had so close to the city. The stream is swift, but very deep in the bends, with occasional snags, where Mr. Mussey's 40z. brass ring, which he calls his "hook eraser," comes very handy in getting tangled tackle loose. The quality of rod and other gear must be of the best, for the stream is so narrow that often a bass will go directly under the boat in spite of everything. I found in using the long 12ft. push-paddle that the bottom of all this river along there is solid gravel or gravel or sand. This accounts for the small-mouths. Yet the stream flows through a regular marsh, and its low banks are black and mucky to a degree. There is a substratum of sand and gravel, and into this the stream has cut. In the deep bends I could not find bottom with the paddle. The Kankakee is a remarkable stream, a superb angling stream, even as it is now. With proper protection and with the dams all open what magnificent fishing it would offer. The club men along that river certainly ought to join heartily and aid financially the Kankakee Association. They do not know their privileges. The stream is simply grand for fishing purposes. The duck shooting is gone there and everywhere in this section, but the fishing is not gone, and can be kept.

E. HOUGH.

PICKEREL AND GOLD WATCH.—A North Lyme, Conn., special reports that "Joshua Halford went fishing in Hog Pond and caught a pickerel weighing over 6lbs. When he cut the fish open in its stomach he found a gold watch and chain. Upon the inside of the back case of the watch was engraved the name 'Charles Whaley.' The discovery of the watch clears up a mystery which has puzzled the people in this vicinity for two years. On the morning of July 2, 1889, Whaley informed the foreman of his farm that he was going to Hartford on a business trip and might not return for two days. Since that morning no trace of the man has been found until to-day, when the watch was discovered in the belly of the fish." Is it something new for a pickerel to become a ground-feeding fish in order to possess itself of the above mentioned watch and chain? or did the fish go ashore and rob the man and carry the evidence of its crime in its own bosom for two solid years to be caught with the full evidence of his guilt at last? The story is very "Whaley." Where's the golden fishhook?—FRED.

ANGLING WITH A RIFLE.—Alexandria, Mo.—The companionship of a good gun affords much true pleasure. One day in spring, when the air was pure and the sunshine clear, a friend and I took my Winchester rifle and visited the shores of one of our Mississippi River inland ponds. Several kinds of fish were sporting about in the clear waters. There were sunfish, bass, catfish, and occasionally the waters would indicate the presence of a pike, which seemed to possess a socially repellant atmosphere, for all the other fish would hurry away on very urgent business in other localities. A 2lb. bass received attention from the Winchester, and a very pretty shot was made, the ball having passed through the lower part of the fish's gills. A shot at a pike 2ft. in length sent it wildly tearing through the water at a sweepstake rate. The bass was about 6in. below the surface. Shooting fish with a rifle requires skill, and a person can have hours of pleasure in this line of sport.—JASPER BLINES.

CAPE COD NOTES.—Bluefish are very scarce at present in Cape Cod Bay. Dogfish have driven these and nearly all other kinds off the coast. Lobsters are so scarce that they seldom are to be found in the market. At Woods Holl about 100 bluefish were caught with hook and line during last week, and a few striped bass, usually of small or moderate size, were taken in the same waters. Tautog, sea bass, squeteague and scup are scarce. A remora in the Fish Commission aquarium has become so tame that it will take food from the hand; the rudderfish and orange fish will feed in the same way, and the appetites of all these fishes is astonishing. A male pipefish has its marsupium filled with young fish, of which it takes diligent care. Young lobsters, hatched three months ago, are still living and doing well, but their number is very small.—B. (Woods Holl, Aug. 24).

ALEXANDRIA BAY FISHING.—New York, Aug. 25.—I have just returned from a three weeks' stay at Alexandria Bay, and my own experience coincides with nearly every one else there that the fishing this year has been a very great improvement over any other during the last ten years. I had no difficulty in getting all the pike, black bass and perch I wanted without going out of sight or call of my island. My island is directly opposite Alexandria Bay and is passed by a great many steamers daily, but there have been a large number of pike (pickerel) taken all about it, which makes me think that a little disturbance of passing steamers doesn't disturb them.—C.

WOUNDED BY A SKATE.—Port Monmouth, N. J. Aug. 28.—Wm. Oberman, a fisherman, while draining a pond into Raritan Bay this morning, hauled up an immense skate or stingaree, a fish whose tail is like a saw. As he threw the fish in the boat it made a leap and struck him on the leg, near the knee, nearly severing it. As the teeth or points on the fish are poisonous, Dr. John H. Van Mater was summoned. Oberman is in a dangerous condition, having become unconscious from loss of blood.

THE BERKSHIRE TROUT CLUB, of Berkshire, Mass., expects to increase the capacity of its hatchery at Great Barrington by adding a new spawning race. The hatchery produced 120,000 trout last spring, and is expected to furnish 200,000 next season.

ST. MARQUERITE SALMON CLUB.—A share in the St. Marguerite has been purchased by Mr. E. R. Wharton, of Boston, for \$2,650.

STATE GAME PROTECTOR NORTHRUP and a party of Alexandria Bay men captured fish nets near Cape Vincent last week, in one of which they found nearly 500lbs. of game fish. The owner of the nets could not be found. The nets were burned at Alexandria Bay amid great rejoicing.

THE MUSCALONGE RECORD for ladies on the St. Lawrence this season is held by Mrs. Gardiner M. Skinner, who is "high hook" with a 40-pounder, measuring 4ft. 11in. in length. We have received in evidence a photograph of the fish and its captor.

HUNTING AND FISHING IN THE NORTHWEST.—Are you planning for an outing this summer? Have you ever looked up the famous resorts of the Northwest? It is not an exaggeration to say that the best hunting and fishing grounds in North America are found in the territory tributary to the Northern Pacific Railroad. The lake park region in Minnesota affords pickerel, pike, bass and muscalonge; rock bass are found in numerous streams, and deer, elk and bear abound in the forest regions; antelope are found in North Dakota. The Snowy, Bitter Root, Garry, Rocky and Cascade Mountains are the home of moose, elk, caribou, cougars, Rocky Mountain sheep and goat and other large game, while all of the Northwestern States abound in feathered game. Rocky Mountain trout and grayling are caught in the Yellowstone, Gallatin, Madison, Jefferson, Clark's Fork and Green rivers, affording unrivaled sport. An interesting pamphlet, "Game Preserves of North America," can be obtained free on application to CHAS. S. FEE, G. P. & T. A. of the Northern Pacific R. R. at St. Paul, Minn. Descriptive publications concerning Yellowstone Park, Pacific coast and Alaska will also be mailed on receipt of application, referring to FOREST AND STREAM.—Adv.

Fishculture.

AMERICAN FISH IN ENGLAND.

"ICHTHYOLOGIST" writes from London, England, as follows: Previous to the existence of establishments devoted to the breeding of salmon, trout and other freshwater species, little was known as to their rate of growth, but now we are able to ascertain definitely what it is. Commencing with the egg itself, the pisciculturist watches from day to day, from month to month and from year to year their development and the wonderful transformations which they undergo during every period of their existence. Therefore the longer the establishment has been formed the more interesting are the sights it reveals, and the more instructive are its lessons, for as it grows in years the stock fish necessarily develop till they reach maturity, yielding each season vast quantities of offspring after their kind. I was particularly struck with this the other day upon visiting the large piscicultural establishment founded by Mr. William Burgess at Malvern Wells, Worcestershire, and known as the Midland Counties Fish Culture Establishment. Here every kind of British fresh-water fish is propagated, together with certain foreign forms. The ponds are now replete with salmonide and coarse fish in all stages of development, and it is this which adds such a charm to the piscatorial spectacle. In one series of ponds may be observed millions of fry batched out last winter; in another section, yearlings appear; in another three-year-old fish, and so on. Some of them are as much as 5lbs. in weight, while many are as small as 1oz. It is not given to us to gaze upon the lusty trout at will, and when we do catch a glimpse of it in a wild state it is only for a second, for they come and go like flashes of lightning. But at Mr. Burgess's establishment one may at all times observe them moving about in the ponds, especially at the feeding hour, when a handful of food will bring them together from all parts of their habitat, causing them to display themselves to the best advantage.

Not only are British trout fully represented in the throng, but those of American origin as well, having similar proportions and almost similar habits. The rainbow trout, the brook trout and the lake trout are among the latter, scaling 4lbs. and upward. All of these were hatched from ova kindly sent by the United States Fish Commissioner. There is another transatlantic fish which the Commissioner has enabled Mr. Burgess to cultivate, viz., the whitefish. For some years past this fish has been subjected to experiments, with a view to its acclimatization, and although Mr. Burgess was successful in rearing them from babyhood to the age of nine months, he found great difficulty in doing so during the winter. This year he has been more successful, as was shown presently, when he drew off the water in the habitat in which he placed the fry last autumn. To his joy and astonishment he beheld a considerable number of the fish quite 10in. long, which is a considerable growth considering that they are only eighteen months old. During last summer and autumn he kept them in shallow ponds, and on the approach of winter turned them into large ponds having a depth of 10ft. Here they evidently prospered remarkably well, notwithstanding unusual severity of the winter and spring. The fact of their surviving clearly shows that our winter climate is not prejudicial to them, and the extraordinary variety of weather which they have experienced during the past year and borne satisfactorily is a proof of their capacity to endure the variability of our climatic conditions. There is ample room in some of our lakes for this valuable food fish, and Mr. Burgess intends to do his utmost to establish them, being of opinion that they would be a valuable addition to the commercial fishes of our inland waters. Of coarse fish, such as perch, roach, chub, etc., there are a large number in the ponds, especially perch, a fish that is in great need of cultivation. Every angler should do his utmost to promote the welfare of this fish, which is a great favorite among all classes, and one, moreover, that affords excellent sport and food. It is falling off in numbers, and has been doing so for some years past; but with the aid of fishculture much can be done to reëstate it. Mr. Burgess says it is a fish easily dealt with under the piscicultural system, and it is to be hoped that it will, ere long, take its place in the hatchery with the trout, and be subjected to the same care and attention which is bestowed upon the latter.

The Kennel.

FIXTURES.

DOG SHOWS.

Sept. 1 to 4.—Second Annual Dog Show of the Kingston Kennel Club, at Kingston, Ont. H. C. Corbett, Secretary.
Sept. 8 to 11.—First Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Ont.
Sept. 14 to 18.—Toronto Industrial Exhibition Association Third International Dog Show, at Toronto. C. A. Stone, Sec'y and Supt.
Sept. 22 to 25.—Inaugural International Dog Show of the Montreal Exposition Company, at Montreal, Canada. Entries close Sept. 8. J. S. Robertson, Secretary.
Sept. 23 to 26.—Inaugural Show of the Blue Grass Kennel Club, at Lexington, Ky. Rogers Williams, Sec'y.
Sept. 24 to Oct. 1.—Third Annual Dog Show, in connection with the Central Canada Fair, at Ottawa, Ont. Alfred Geddes, Supt.
Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.
Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.
Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.

1892.

Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInness, Sec'y.
Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. F. Capers, Secretary, Greenville, S. C.
Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.
Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.
March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.
March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Littell, Sec'y.
April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.
April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.
Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.
Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. G. Davis, Secretary, Philadelphia, Pa.
Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.
Nov. 23.—Second Annual Trials of the National Beagle Club, at Nanter, Rockland county, N. Y. H. W. Chapman, Sec'y.
Nov. 30.—Central Field Trial Club's Third Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y, 44 and 46 Wall street, New York city.
Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1892.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.
Jan. 13.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgariff, Sec'y.
—, Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

NOTED IRISH SETTERS CHANGE OWNERS.

Editor Forest and Stream:

Mr. F. C. Fowler, the owner of the Oak Grove Kennels, and who is better known as the owner of one of the largest and finest breeding farms and stables of trotting horses in New England, has purchased my Irish setter challenge winner Kildare, a litter brother of Beau Brummell and a son of the peerless Elcho, Jr., and who has the further distinction of being the youngest Irish setter that has ever entered the challenge class in America.

Kildare is the winner of forty first and special prizes, and is but a few months over three years of age. He has had the misfortune of never having been shown in proper condition, but has nevertheless done considerable winning, as is shown by his record, and he has improved wonderfully since he has last been exhibited, having deepened in chest and added more substance, and I consider him to-day one of the best Irish setters that has been seen in this country. Mr. Fowler informs me that he will show him the coming season, and I predict that he will make it hot for the balance of the dogs in his class.

Mr. Fowler also purchased from me the prize-winning bitch Norah Blyth, who is a daughter of champion Tim and a niece of champion Ruby Glenmore, whom she resembles in formation very closely. She also gives promise to make a crack fielder, and I trust Mr. Fowler will have her prepared to run in the trials this fall. Another of Mr. Fowler's purchases from my kennels is a very promising bitch, Kildare Joan, sired by the prize winning Darby II. ex Bess P., a prize-winning daughter of Sarsfield.

During the past year this gentleman has bought seven of my finest young Irish setters, among which is a dog sired by champion Elcho, Jr. out of champion Ruby Glenmore, which gives promise of making a crack of the highest order; and I look for the Oak Grove Kennels to cut an important part in the Irish setter affairs of America in the very near future.

I have seen it mentioned in the sporting papers that it was reported that \$575 was the price paid by Mr. Fowler for Kildare. I wish to correct this statement, as the price paid was \$500 for Kildare only.

I am now about out of Irish setters with the exception of a few youngsters that I am having raised, and which, should they mature according to promise, will give me a nucleus for another kennel. My only regret is that I shall not be able to take a part in the trials this fall.

W. L. WASHINGTON.

PITTSBURGH, Pa., Aug. 29.

THE IRISH SETTER FIELD TRIALS.

Editor Forest and Stream:

A meeting of the Executive Committee of the Irish Setter Club has been called for Sept. 9, at 14 South Broad street, Philadelphia. At this meeting the amount of the Derby Stakes will probably be decided on and announced. I have received word from Dr. Jarvis that he will offer a silver cup, to be known as "The Elcho Cup," to become the absolute property of the winner of the All-Aged Stakes; he says, "I will give one worth winning."

We have also received a most liberal donation from Mr. E. B. Bishop, the proprietor of the Glenmore Kennels. He forwarded me first \$10 and then his check for \$100 additional. One-half of this latter is to go to the winner of the Derby and one-half to the handler. This is not the only \$100 contribution that has been received. I have succeeded in getting the \$200 I promised from our city and may, perhaps, get some more; \$25 of it came from the gun editor of the Philadelphia Item.

I am still on the hunt (or on the still-hunt?). We have not, as yet, heard from the rank and file in a proper manner. I would like to have more \$5 and \$10 subscriptions coming in, so as to show that we have the sympathy and support of the smaller breeders and owners of single dogs. It is the duty of every one to do something, and as has been said before, if they cannot run a dog they can at least send \$5.

Another thing that I particularly wish to call attention to is the fact that the Derby entries will not be so numerous as the All-Aged and therefore the chances of winning will be greater. The prizes, judging from our probable income, will be nearly or quite as large as those offered by the other trials, and this should encourage owners to make their Derby nominations promptly. The entries for the Derby close Sept. 15. If any have not received entry blanks, etc., let them write to 1,335 Walnut street and I will forward them.

G. G. DAVIS, Sec'y-Treas.

BULL-TERRIER STREATHAM MONARCH.—Pittsburgh, Aug. 31.—Editor Forest and Stream: I had thought to make a surprise but find the dog papers too quick for me. I bought Streatham Monarch last month and thought to keep it quiet until he arrived, anyhow, but, as I said before, was not able to do so. I think I have the best bull-terrier in the country, the only one coming near him being Attraction, a bitch I am very fond of and one I came near buying last spring. Attraction, by the way (formerly called Miss Glendyne), is the dam of Trentham Baroness, who in turn is the dam of my Streatham Monarch. The sire of Streatham Monarch is Streatham Flyer, by Gully the Great out of Daisy.—JOHN MOORHEAD, JR.

DOG CHAT.

THE kennel interests of this country are increasing all the time. Agricultural shows are devoting space and premiums to the different breeds of dogs where a few years since they would never have dreamed of such a thing. New papers are coming out which are thought not to be complete without some sort of a kennel department, and this all serves to keep alive an interest in dogs among the general public. Mr. Eugene Glass, of Battle Creek, Mich., has the latest venture in view. This is to be *The Dog Fancier*, a monthly journal devoted to dogs alone, and will be issued in the course of the next month.

We are indebted to Mr. Eberhart for a very lifelike picture of Mr. Hawkes' young collie Sir Walter Scott II, which he imported recently. This dog is a grandson of champion Metchley Wonder, and will be shown along with Mr. Eberhart's team at Hamilton and Toronto.

We have received a very acceptable addition to our gallery of canine celebrities from the Glenmore Kennels, in four excellent photographs of the Irish setters champion Mollie Bawn, champion Winnie II., champion Ruby Glenmore, and the challenge prize winner Beau Brummel.

All the arrangements are completed for the Industrial Exhibition Association's dog show, to be held at Toronto from Sept. 14 to 18. There will be four judging rings, two down and two up-stairs. The dogs will be fed with Spratts' biscuits. From present indications the show will be the largest ever held in Canada, and the largest fall show ever held in America. In fact, with a couple of exceptions, the Toronto show of 1891 will be as large, in regard to the number of entries, as any of the shows in the spring circuit. The following specials have been donated: \$5 for the best progeny of Eberhart's Cashier; \$5 for the pug with the best tail.

Indications, we are told, seem very promising for an excellent show at Montreal Sept. 22 to 25. It has been decided to offer the following specials in addition to those published in the premium list: For the best bulldog a prize value \$10, and the same for the best bitch; for the best kennel of four or more bull-terriers a prize value \$10; for the best kennel of three or more Russian wolfhounds a prize value \$15 will be given. For the special encouragement of Canadian breeding of high-class dogs the following special prizes are offered: For the best St. Bernard dog owned in Canada a prize value \$10; for the best pointer or setter dog owned in Canada a prize value \$10, and the same for the best bitch; for the best kennel of four or more collies owned in Canada a prize value \$10; for the best Irish setter dog owned in Canada a prize value \$20, and for the best bitch a prize value \$15. Entries close Sept. 8. Exhibitors are requested to be careful to state on entry blank where tags, etc., are to be sent.

All admirers of the Irish setter, among whom we wish to be counted, will be gratified to read Mr. Davies' letter in another column, as to the satisfactory state of the prize fund for the coming trials owing to the liberal donations of several enthusiasts. There is therefore no reason that the rank and file of Irish setter breeders should not enter one or more dogs in the several stakes, as well as donate their mites toward the general fund. There will be money amply sufficient to clear expenses for the winners. Of course they cannot all win, still the man who enters and runs his dog will feel happy in that he has at least contributed something toward the future improvement of the Irish setter in the field, so that next year owners may become so interested in field trials that separate trials will not be necessary and the red setter will take its proper place among the other breeds, asking no favors of any one, man or beast. Attention is especially drawn to the fact that the Derby entries close Sept. 15.

We regret to hear that Mr. Rowland P. Keasbey, secretary of the Spaniel Club, has sustained a severe loss in the death of his field spaniel Saybrook Lass. She was by Beverly Comet out of Gypsy Maiden, and was imported by Mr. Keasbey last winter. She won at several shows last spring, and her owner thought she had a bright future before her as a show and brood bitch. It is supposed she was poisoned, as she was perfectly well the day before she died.

We know that our beagle-owning friends have been nibbling at some new blood from the other side, but as it was to be kept secret, we dared not let it be known. From *Canine World* we gather that they have been in communication with Mr. Johnson, of Whitechurch, about a hound or two, but nothing has come of it yet. Bids were made on Monarch and Marvel, but without result, though Matchless, a litter sister to Monarch, was offered but not accepted. Speaking of beagles reminds us that Friend Chapman, the energetic secretary of the N. B. C., is now up in Vermont picking out some youngsters that he has had up there to be broken in for the trials; the best will be brought home to underdo the finishing touches in their education. The Glenrose Kennel evidently intends to make a strong bid for trial honors at Nanuet.

"Uncle Dick," despite all his troubles—and, by the way, we echo our Philadelphia contemporary's kind remark about that litter of cocker spaniels, for if any one needs a cocker spaniel with all-round work bred in the bone, he will find it in Mr. Fellows's kennels—well, as we were saying, "Uncle Dick" is still after Mr. Farrow's scalp, and will not be pooh-poohed out of his desire to know how it is the Obo stock continually throws a buff or red spaniel. He says Mr. Farrow has never answered the many inquiries made to him as to their original breeding. Concluding his letter, "Uncle Dick" writes, "I do not know that I blame Mr. Farrow, because if he dug at the graves of the pillars of the kennel he would be sure to find something he would not like, probably the bones of a Basset, or the bones or skin of a red dachshund, just as they found a collie's bones when digging for Gordon setter pedigrees. Mr. Laverack explained how Pride of the Border got his lion color, but Mr. Farrow cannot, or will not, explain the red color."

We see by the English papers that Mr. Panmure Gordon, the president of the Scottish Kennel Club, intends visiting this country in the course of a few weeks. Mr. Gordon's many acts of kindness and generosity in furthering the interests of dogdom in the Land of O'akes will, we are sure, entitle him to such a hearty welcome from the fanciers that he will return with nothing but pleasant memories of his visit.

We have received several handbills from Professor Parker, whose troupe of performing dogs is the salvation of many of our shows over here, and who is personally a favorite with the boys. These bills show that he has been performing at the "Trocadero, Crystal Palace and the Canterbury, and from what "Cheerful Horn" says he is doing good business and especially compliments his high-jumping greyhounds. Prof. Parker will go to Paris shortly.

Friend Mercer does really seem to be one of the unluckiest of mortals, for now we hear that he fell, the other day, a distance of 20ft., and striking on his head was terribly bruised, lying unconscious for seven hours. He is confined to his bed, but expects to be round again in time for the big show at Toronto. Our sympathy is extended to "Clumber."

The Blue Grass Kennel Club have secured the services of

Major J. M. Taylor for sporting and Mr. Frank C. Wheeler, of Canada, for non-sporting classes. They have added the following classes and specials since issuing their premium lists: Separate classes for dog and bitch puppies in the following breeds: Mastiffs, St. Bernards, greyhounds, pointers, English, Irish and Gordon setters, foxhounds and pugs. There are also separate classes for English foxhounds and \$25 in cash for best pack of ten foxhounds. For best kennel of four owned by one exhibitor in the following breeds: Mastiffs, St. Bernards, greyhounds, Great Danes, pointers, English and Irish setters and pugs, \$10 is promised. To the handler having the largest number of entries, \$10. D. D. Bell, Lexington, offers \$5 for the best dog or bitch irrespective of breed. A. F. German, of Louisville, Ky., offers \$5 for best dog or bitch the get of Eberhart's Cashier. Mrs. Herbert Hammonds of Cincinnati, offers \$5 for pug with the best curled tail. Mr. Geo. Heinbuck, of Cincinnati, offers \$5 for the best pug bitch puppy. Eberhart Pug Kennels, Cincinnati, offers a silver cup for the best collie under 18mos. old. J. E. Pepper & Co. offer a case of their oldest whisky, value \$25, for the best pointer in the show; also the same for the best setter. The secretary is Mr. Roger Williams, to whom all communications should be addressed.

The following list of the entries in the different breeds at the coming Hamilton, Ont., show has been forwarded to us, and demonstrates a very satisfactory state of things: Mastiffs 11, St. Bernards 17, great Danes 7, Newfoundlanders 1, Irish wolfhounds 1, greyhounds 12, foxhounds 2, beagles 13, pointers 8, English setters 24, Irish setters 10, Gordon setters 9, water spaniels 1, Clumber spaniels 5, cocker spaniels 33, collies 23, bulldogs 2, fox-terriers (smooth) 25, fox-terriers (wire) 11, Irish terriers 2, black and tan terriers 8, Scotch, Skye and Dandie Dinmont terriers 10, Bedlington terriers 3, Yorkshire terriers 7, pug 23, toys and pets 3, dachshunde 5, miscellaneous 14; total 309.

It is becoming monotonous to read all the bosh written about these big prices for St. Bernards. One would think American breeders had no other aim in life but to send barrels of dollars over to the other side in exchange for Albion's best dogs. "Cheerful Horn" says that it was rumored in Fleet street that Prince Regent and Scottish Prince cost "close on to four thousand pounds," or \$20,000. His informant offered to back what he said with money. It would have been a safe bet for "Cheerful Horn," as we know

positively the dogs did not cost half that sum, \$8,000 was the figure, and we do not believe, from what we can gather, that any such sums will be paid again for dogs. There is no need of it, we have now the dogs that can beat anything on the other side, rough or smooth, and what is the use of paying such prices to play second fiddle and run the risk of their dying before becoming properly acclimated.

Owing, we presume, to the fast-increasing duties of the office which takes up too much of his time, Mr. S. F. Glass, secretary of the Canadian Kennel Club, will resign at the coming annual meeting and the office of secretary may be made a salaried one, as the kennel interests of Canada have increased so rapidly lately that it will soon require a man to devote his entire time to it.

Our contemporaries have got things mixed up a bit about the crack bull-terrier ch. Streatham Monarch. He will not go to Mr. Dole's kennel, as asserted, though as we stated last week, Cherub has been purchased by that gentleman. To Mr. Boggs, of Pittsburgh, belongs the credit of importing this grand terrier, and as we stated last week, he was purchased through Mr. Toon, of Sheffield, and will come over with Geo. Thomas, along with the rest of his team. Mr. Boggs has now sold Streatham Monarch to Mr. John Moorhead, Jr., a prominent member of the Duquesne Kennel Club and an enthusiastic bull-terrier fancier, owning Queen Bendigo and others. At Cleveland show Mr. Moorhead informed us it was his intention to secure something that would place him well in the front, and he has kept his word. Mr. Boggs writes us that dog matters are booming in that neck of the woods—Pittsburgh. He will show quite a team at the Canadian shows, among them some of his new purchases in England.

Among the contemplated additions and alterations in the English Kennel Club rules are several important ones. One relating to names says that when a dog's name has once appeared in the K.C.S.B. it shall not be permissible to change it. Another rule says a dog which has in any way been improperly tampered with shall be incapable of winning a prize. Rule 10 provides that "a duly-qualified veterinary surgeon shall be appointed as veterinary inspector at all shows held under Kennel Club rules. In another new rule the Kennel Club constitutes itself a court of final appeal or umpire in all disputes or questions arising from the competing of any dog at any shows or field trials held under Kennel Club rules.

Last week we printed Mr. Sewell's affidavit as to the perfect health of a dog that bit a Mr. Russell, who is said to have died of hydrophobia afterward. His widow is suing Mrs. Bourignon, the owner of the dog, for \$2,500 as compensation for her loss. The owner sees no reason why her dog, to which she is much attached, should be destroyed and is being almost harassed to death herself by different authorities, one of which forbids her to let the dog out of the house under a penalty of \$100. The lately-formed National Canine Defense League has the matter in hand and is looking after the fair owner's interests. Mr. Russell was bitten by the dog in endeavoring to take a stick away from it which it had just retrieved out of a pond. This case seems about on a par with that of Mr. Bartow, who some time since died with every symptom of hydrophobia, through studying the complaint in books after being nipped by a cat.

The Ohio Humane Society of Cincinnati, which had laws passed lately turning over to them the dog-catching business, which now will be conducted in a proper manner, will give a grand fair in this city in October, at Chester Park. The proceeds will go toward putting up a fine building on their property, lately purchased. The fair will consist of a horse and pet animal show, bicycle tournament and bench show of dogs. The dog show has been entrusted to Mr. Herbert, of pug dog fame, to manage. Exact dates will soon be published and premium lists issued. Mr. Frank C. Wheeler (late of Canada, and well known as a fancier and popular judge) will judge all classes. The show will be fed with

Austin's dog bread, furnished by the Eberhart Pug Kennels. Mr. Eberhart writes: "I hope my fellow breeders and doggy friends will send in their dogs, as the cause is a most worthy one, and also help to stimulate the dog interests in Cincinnati, so that we can give a show each year under A. K. C. rules."

We referred recently to a spaniel sale whereby a Mr. Wooland, of London, England, became the owner of Bridford Perfection, giving an unprecedented price for her. He now says over his own signature that he paid \$1,900 for her. Mr. Cowell, the judge at Darlington show, says in his *Kennel Gazette* report, that "in Bridford Perfection I found a bitch which I can safely say is the best in the world to-day. Since the days of Zulu and Squaw we have not seen such a spaniel." He admits he could not find a fault. Eureka! Here's a field spaniel standard ready made.

One of the leading Boston papers gravely tells us that Pop, Mrs. Miner's St. Bernard dog that was killed after running amuck at Red Bank, N. J., the other day, stood 39in. high and weighed 350lbs. Such a dog as that needs no "stuffing."

Mr. A. C. Wilmerding, feeling that a change of air would do him good, took a trip a couple of weeks since to Boston, "did" the kennels there and then journeyed on to Salmon Falls to drop in on the noted cocker spaniel breeder, Mr. J. P. Willey. Mr. Wilmerding tells us that he never saw so many cockers in a one day's drive as the father of spaniel-dom in this country can show. He must have over 100 puppies out at walk at different farm houses. Mr. Wilmerding saw 48 of them during the day. A little attraction that they found on their return in Mr. Willey's front yard has given rise to many false rumors and no end of a smell. A crowd of villagers was seen round the front gate looking admiringly at a skunk, which, in acknowledgment of the rocks that were being thrown at him, very unkindly resented such treatment in his usual effective manner. We are sorry to hear the aroma of the incident has gone forth among all "ye spaniellie men," and they fancy they have now accounted for Mr. Willey's very "strong" kennel.

Mr. D. F. Loveland has resigned his position as kennel manager of the Dutchess Kennels, Poughkeepsie, and will return to Melrose, Mass.

The N. Y. *Herald* of Saturday last has the following about the Westchester Fair dog show: "The bench show of dogs will be entrusted to Messrs. Tom Terry and A. D. Lewis, proprietors of the famous Hempstead Farm Kennels; Messrs. Frank Hitchcock and Winthrop Rutherford. The principal money will be given for St. Bernards, fox-terriers, collies, pointers and setters, and the judge will probably be Mr. James Mortimer, the well known superintendent of the Westminster Kennel Club."

Visitors and handlers at the field trials last fall were much interested in the "Surprise" whistle which the popular handler "Billy" Tallman carried with him. Its far-reaching tones were calculated to strike terror into the most heedless long-distance ranger, and at the same time, under friend Tallman's skillful manipulation, the dulcet call of the quail was accurately imitated. It was rumored at the trials that some handlers carried several different sized whistles so as to imitate the tone of an opponent's whistle. No one need do this now, for on the "Surprise" whistle one can run the whole gamut of ear-piercing sounds. On turning to our business columns the sportsman can learn all about it.

Mr. J. M. Avent, one of our best known field sportsmen and one who has done so much to bring the English setter to the very front rank in field trials, is suing the Illinois Central Railroad for what seems an unpardonable piece of cruelty on the part of one of the engineers in running at a prohibited rate of speed in the city limits and without any warning running down one of Mr. Avent's dogs which happened to be on the track. The dog was crushed to pieces, and Mr. Avent intends to make the company pay for it. He asks his fellow sportsmen to help him with any information that may be of service to him in his case. His address is Hickory Valley, Tennessee.

Dr. Perry writes us he is traveling a different route during his trip to Europe this time, and this accounts for no mention of his visit to London in the kennel papers. He hurried over to Paris and from there is taking in the principal cities of Italy. He will then proceed through Switzerland and up the Rhine, and will come home in September.

Mr. A. P. Heywood Lonsdale has contributed \$25 toward a special to be competed for at the International Field Trials, to be held at Chatham, Ont. We remind sportsmen who intend to enter their dogs that entries for the Derby close Oct. 1, and for the All-Aged Stake Oct. 15. Birds are reported as plentiful, and there is every prospect of keen competition, incited by the recent importations which Mr. Davey has made.

The annual meeting of the Canadian Kennel Club takes place this year at the Rossin House, Sept. 16, at 7:30 P. M. Under the amended constitution, members who are unable to attend the annual meeting are entitled to vote by proxy. As some very important matters are to be introduced for discussion, it is very desirable that the representation of members should be as large as possible. Among other notices of motion given are the following: 1. That in future no puppy classes shall be given at any show held under the rules of the C.K.C. 2. That no show held under the rules of the C.K.C. shall last more than four days, inclusive of the opening and closing days of the show. 3. That the offices of secretary and treasurer of the C.K.C. shall be separate and distinct and not held by one and the same person. 4. That at no show held under the C.K.C. rules shall dogs and bitches be shown against each other in the same classes. 5. That dogs and bitches shall not be shown against each other in challenge classes. 6. That at shows held under the rules of the C.K.C., entries shall close positively not less than fourteen days before the opening day of the show. 7. That in future no addition or alteration shall be made to any prize list issued by any bench show committee after it is once printed and distributed.

From Philadelphia we learn that nearly all the foxhounds of the packs of former years of the Radnor Hunt Club have been disposed of, and been replaced by forty-three young and nineteen old hounds of imported stock. These latter were secured from the kennels of the Duke of Rutland, Bglvoir Castle, Leicestershire, England. In their journey to this country the hounds were accompanied by the huntsman, Frank Gillard, and his two assistants. These men will reside on the grounds, a house being about to be erected for the accommodation of the former. Workmen are now engaged in the work of erecting a two-story building to answer all the requirements of the increased family—human and animal. One of the new features is a 12-foot bath for the use of the dogs. When all the intended improvements are completed the Radnor Hunt will have quarters second to none in that section.

A letter from Mr. H. C. Corbett, secretary of the Kingston show, tell us that they are delighted with their entry this year. They have secured 220 as against 130 in the inaugural show last year. Judging does not commence till Wednes-

day morning, so it is doubtful if we can get any of the awards in this week's issue. Still, our readers may depend upon it that we shall do our best to supply them with the latest particulars.

We have received very neat stud cards issued by the Chestnut Hill Kennels, detailing the merits of their noted dogs Christopher, Wellesbourne Charlie, and the Irish terrier Breda Bill. Mr. Jarrett will not attend the Canadian shows this year in pursuance of their decision not to show till the fall of 1892.

There will be a banquet at the Rossin House, Tuesday evening, Sept. 15, given jointly by the Canadian and Toronto Kennel Clubs. Mr. J. Lorne Campbell, president of the C. K. C., has appointed the following representative committee to cooperate with the T. K. C. in arranging the details. As the annual meeting of the Canadian Kennel Club is to be held the following evening at the same place, it is thought that by this means a very representative lot of dog men can be brought together in social intercourse, for, from what we hear, nearly every one who can find time to get away will attend this big show.

Owing to the Helvetia, on which Mr. Hacke's Barzois came from London, not being able to be docked before last Sunday, the proposed trip to Spratts Kennels, at Northvale, N. J., which we spoke of last week, had to be postponed till to-day. We are very sorry not to be able to avail ourselves of the opportunity to see them at that time, as Kingston show will have to be attended to.

The Irish setter Balfour, imported by Mr. James W. Whitney, and by him recently presented to Mr. H. F. Atwood, of this city, met his death on the R. W. & O. R. R. tracks near this city last week. Through the kindness of Mr. Whitney Mr. O. Stewart Bamber has come into possession of a dog pup of Balfour's get, out of Mr. Fred T. Mowood's bitch Kate II., she by Count out of Kate, combining the bloods of champion Chief, Elcho, Jr., Rory O'Moore, Noreen, etc.

KINGSTON SHOW.

[Special to Forest and Stream.]

KINGSTON, Ont., Sept. 2.—The Kingston show opened Tuesday. Attendance not very large; but the building admirably adapted for show purposes and nicely arranged. Messrs. Lewis, Naylor, Prescott, Discorn and others are here with good strings. Dr. Mills began judging at 10 o'clock to-day with English setters, awarding first, open class, dogs, to Brown's Edgemark; 2d, Northwood Benzine; 3d, Kingston Kennels' Kent's Rex; reserve, Hair's Sir Edward. Bitches: 1st, Kingston Kennels' Liberty; 2d, Kent's Ruby K.; 3d, Switzer's Mado. Novice class: 1st, Kingston Kennels' Kent's Rex.

Irish Setters, open dogs, first, Seminole; second, Flynn's Glen Jarvis. Bitches, first, Kingston Kennels' Josie D.; second, Seminole Kennels' Aurora. Gordons, challenge, first and second, Dixon's Band and Ivanhoe. Bitches, first, Dixon's Duchess of Waverly. Open dogs, second, Platt's Victoria. Bitches, first, Dixon's Lady Waverly; second, Platt's Bloom, and this was all up to recess for dinner.

NOTES AND NOTIONS.

It is not commonly known how dangerous it is to go swimming with a powerful dog in the company. The dog will constantly endeavor to climb up on the head and shoulders of the human swimmer, just as he will attempt to climb on every floating log or piece of wood. If the dog is small a few powerful blows will discourage it, but these are not so easy to give effectually if the dog is a large one, and at all events, a swimmer under such circumstances is in danger of receiving some severe scratches as the least penalty for the company he has.

An English correspondent of one of our papers makes the very sensible remark that many dog handlers are better judges of dogs than the recognized corps of judges. This is not only correct, but obvious. It is the constant province of the handlers to judge the judges, a more comprehensive task than judging the dogs. It is part of their business to note every defect or merit of their dog's, and hide or bring them forward under the judge, and to carefully scan their dangerous competitors. I cannot think of any process better calculated to educate a man as judge than the work of a careful handler. I often take lessons of the handlers at shows, and, as a rule, find their opinions much more critical than those of the judges, who, unfortunately, are too often more ornamental than useful.

There is a great deal to be said on the side of dog catching, but I think, as a rule, very little extenuation for the dog catchers. That effective measures are absolutely demanded for the suppression of the hordes of worthless curs that infest our cities would seem unquestioned, and that discrimination should be used that only vagrant curs, running entirely at large, are to be exterminated, is equally obvious. The source of the evils of dog catching as commonly practiced is that the catcher is paid per head, and as brutes of very low caste are most likely to take to the work, the pecuniary inducement overshadows all other things with him. The remedy is easy; pay the catcher by the day, as we do the agents for every other nuisance suppression. It is as much the duty of the municipality to protect us from the nuisance of vagrant dogs as to protect us from foul streets, and why should not the municipality pay for this work as well as any other? I notice that in cities where the per head catcher prevails we have the stories of brutality of forcibly wrenching dogs from ladies' arms, etc., while in those where regular salaried men catch dogs by the day, as they would clean the streets, the complaints come only from the maudlinly sentimental class who seem incapable of reason on any subject, making emotion their rule of action.

It is quite common to see, in references to terriers, a use of the name of the breed and the derivation thereof, which is all well enough in itself, but it is quite possible to attach too much weight to this derivation and to make its application altogether too sweeping. It is true that a "terrier" means a dog to go to earth, and it is also true that for the work of the breed this is sometimes a necessary qualification, but this necessity by no means involves that the vermin dog is to approach a burrowing animal. In isolated cases it may be important that the dog really shall be a burrower, but for general uses, as a vermin-killing animal, this is no prime requisite, intense activity, tremendous power of jaw and strength to overturn stones and drag away obstacles are more essential to the vermin-killer than ability to follow the game under ground. Our most destructive vermin, rats, weasels, skunks, etc., cannot be classed as burrowers, and piles of stones, logs, etc., are more their natural retreats, and in such places burrowing is of course quite out of the question. After all the great point in a vermin dog is his devotion to the work of hunting vermin, his killing of them is rather a secondary consideration, for if vermin are constantly harassed, barked at, scratched for, and their lives generally made miserable, they desert the scene of their disturbances and emigrate to quieter quarters.

There is a great deal of mistake about the common app-

position that dogs are poisoned. Unquestionably poisoning does occur sometimes, and the contempt visited on the head of so base an animal as a dog poisoner is most just, but the trouble is this: A dog is in perfect health in the evening and dead the next morning, and the conclusion is jumped at that death resulted from poisoning; while every old hand at dogs can recall instances of dogs dying thus suddenly from many natural causes, inflammation of the bowels being one of the commonest. If an owner attaches any value to a dog that dies under suspicious circumstances, he would do well to have a post mortem held for his own satisfaction, and surely to know that a canine friend died from natural causes and not from the cowardly devilishness of a poisoner, must give satisfaction.

THE ON-LOOKER.

CANKER OF THE EAR.

All those who have had much experience with dogs must have frequently noticed that they occasionally show signs of great irritation in the ear by constantly shaking the head, holding it on one side, and rubbing the side of the face along the ground, and now and then scratching the back of the ear with the hind foot; and yet, in some cases, on casually examining the ear, there is nothing much to be seen to account for these symptoms. A little dried brown excretion may be noticed, in fact, the ears look just slightly dirty. The conclusion often comes to is that if the parts were cleaned the irritation would cease, but such is frequently not the case, as I daresay many of your readers have observed, for, in spite of ever so much washing, the dog continues to shake his head, showing that he is still uncomfortable. If, instead of giving a hurried look into the ear in these cases, the parts are well examined and the canal leading into the ear is carefully watched, tiny white specks, oval in shape, and about the size of the eye of an ordinary small sewing needle, will be observed. These are parasites, and are, in my opinion, the cause of that disease called canker of the ear.

I do not mean to imply that all diseases affecting the ear, and which are generally all called canker, are due to this parasite; on the contrary, there are many cases due to an eczematous diathesis when there is a free discharge, and the bare part of the internal surface of the flap of the ear is also affected. Then there is another form of the so-called canker characterized by a free, offensive, purulent discharge coming from the lower part of the canal, and which is often due to ulceration of the skin lining the external meatus. Sometimes the ulceration extends to the cartilage, and it may, and does, occasionally extend to the bones under the cartilage, and then the discharge is particularly offensive, and there is great pain. It is quite easy and proper to divide canker of the ear into three distinct and separate diseases, each requiring different treatment. Then there are those disorders affecting the flap of the ear generally due to injury or eczema, and called external canker.

PSOROPTES AURICULARIS CANIS.

Magnified about 70 times.

A—Larval forms. B—Young Acarus. C—Male. D—Female.

However, it is not my intention here to go into details with regard to the several forms of disease affecting the ear, but to confine myself to that particular kind first mentioned and due to a parasite.

These parasites, which I have called the Psoroptes Auricularis Canis, are extremely active in their movements, and, if the ear be carefully watched for a few moments, they may be seen running about the skin and along the hairs in the ear at a fairly rapid rate, considering their minute size; and the irritation which they cause is due in a measure, I believe, to the tickling sensation caused by their movement, and partly the result of their biting.

I have had these parasites under observation for the last twelve months, but it is only just recently that I have been able to get some specimens to examine under the microscope, and these I have had drawn by an artist, and I must say in passing that he has done justice to his work, for the acari, when seen with the microscope, looks exactly like the illustrations given herewith.

In one specimen of the larval form it will be noticed that the shell or covering has become partly removed, and the legs of the parasite are seen still lying curled round the body. This is exactly how it appeared in the specimen I examined. B—is a young acarus not yet fully grown, and from the number of its legs it is probably a female.

C—a specimen of the male. There are several distinctive differences between the male and female. In the first place the former has eight legs, it is smaller and they are far less numerous, there only being about one male to every 20 females. The female (D) is thicker set, and has only six legs, and in the center of the trunk is a small oval body which I take to be an egg. In both cases the front legs are provided with suckers, which are somewhat triangular in shape and situated at the point of the toes. In walking the fore legs are only used, the hind ones not moving, but are dragged along with the body.

The Psoroptes Auricularis Canis does not burrow under the skin (epidermis) like the mange parasites, but lives on the surface to which it attaches itself by its suckers.

To prove this I kept a number placed under a watch-glass upon my arm for a day and though they caused slight irritation, and raised small points by biting they did not attempt to burrow. I also placed a number under a watch-glass upon the body of a hairless dog, and they did not attempt to burrow here, but they were very restless, for they could be seen with a strong magnifying glass to be constantly traveling about, which looked, I thought, as if they did feel at home in their new situation. They did not seem to have bitten the dog's skin, as after they were removed there were no signs of small blisters or papules; besides, the dog did not seem to take the least notice of them, which would not have been the case if they had punctured the skin, as they did on my arm. Of course, the skin lining the passage into the ear is much thinner and softer, and here, I believe, the mites do bite, and as there is an exudation which, I consider, accounts for that brown and somewhat dry discharge so often seen in some ordinary cases of canker.

I have never been able to find the acarus anywhere else about the dog but in the ear, in fact, they do not seem to

wander outside the canal and crevices formed by the cartilage, nor even upon the flap of the ear, either inside or out. They vary in numbers—sometimes one can only find a few, about twenty; in other cases they are present in hundreds, lying in clusters like a heap of fine white powder. I have also frequently found these same parasites in cats' ears, and in some cases they induce rather extraordinary symptoms, the cat being almost unable to walk; in fact, when it attempts to do so, the animal rolls about as if intoxicated, frequently falling over on its side. I have never seen the acarus cause the same symptoms in the dog.

The treatment and cure of canker of the ear when caused by the Psoroptes Auricularis Canis is a very simple matter, for, by applying some agent which will destroy these acari, the irritation at once ceases. I have found the following lotion to answer the purpose admirably in all cases, both in dogs and cats:

THE LOTION.	
℞ Ung. Hydrarg. Nit	3 i
Ol. Amygd.	3 i
	Well mix.

It should be applied all over the internal surface of the ear daily with a camel's hair brush, or a few drops may be poured into the ear. After a week the ear should be syringed out with tepid water and methylated spirits, about one in ten.

I have heard it more than once stated by men who have had large experience with dogs, that they believed canker of the ear contagious, and no doubt it is, considering that it is due to a parasite which can be easily transferred from one dog's ear to another.

There is a somewhat similar acarus called the symbiotes spathiferus, which causes a certain form of mange in the horse, but I cannot find that this parasite described in the present article has ever been noticed in the dog's ear or mentioned before.—A. J. SEWELL, M.R.C.V.S., in *English Kennel Gazette*.

"IMPORTATION OF A NOTED FIELD DOG."

Editor Forest and Stream:

Old Sarsfield has been retired from the stud and presented to a friend, who is not a sportsman and will keep him as a pet.

As an evidence of good faith in regard to my intention of breeding field dogs as expressed in my catalogue, I will mention my recent purchase of Coleraine from the Rev. Robt. O'Callaghan, Borstal House, Rochester, England, the most experienced, successful and careful breeder of the Irish dog in the world.

This purchase was entirely unexpected by me, as I thought if he would part with her at all, it would be at a prohibitory price. I quote the substance of his letter: "Coleraine is the best field trial Irish bitch in England or Ireland to-day of any breed; has the best nose, and is the best game finder I ever saw; also very good looking and is sure to win on the bench."

It is doubtful if either Coleraine or Finglas (my recent purchase from Mr. Boggs) will start in the coming Irish setter trials, as neither are acclimated, and must be rebroken on our birds. By the time this reaches you my trainer, Mr. W. T. Irwin, will be in southern Kansas. Stud dogs, brood bitches, and puppies will receive daily work on quail and prairie chickens during the hunting season.

It has been stated in the sporting press that my kennels would be located in southern Kansas, and a few reasons for this change will not appear out of place.

I must consider my dogs as well as patrons. Southern Kansas is in the central part of the United States, equidistant to all points of the compass, and has an abundance of game birds, with as many varieties as can be found in any State in the Union. Shipping facilities are as good as in any of the large Eastern cities. Couple with this the easy access to 30 or 40 bench shows, and many field trials, and the advantages are very apparent.

Mr. Rimanoczy, the celebrated artist of this city, has sent me from his studio magnificent crayons of challenge Beau Brummel, champion Ruby Glenmore and Winnie II. They are so full of artistic merit I cannot refrain from mentioning them.

E. B. BISHOP.

CINCINNATI, Ohio.

THE BEAGLE CHAMPION LONELY.—Editor Forest and Stream: Permit me to correct a statement which appears in your last week's issue in connection with the bench career of the English beagle bitch Lonely. You erroneously affirm that "she has only been defeated once in competition, and that by her kennel companion Primrose (not Princess) Countess." On Lonely's first appearance, at the Southampton show in 1888, she was awarded second to the Blue Belle II., and though she (Lonely) was subsequently disqualified, this does not alter the fact that she was beaten by my little hound in competition. Furthermore, unless my memory betrays me, my husband's mother was awarded the special for the best brace, under Mr. Geo. Lowe, over Lonely and a kennel companion, and unless I am greatly mistaken, she also defeated her with Bungle for a special under Mr. Geo. Raper. Lonely's head is by no means snipy; in fact, it is extremely square and well chiseled, and Primrose Countess excels in head, character and expression. The pictures in no way do them justice.—MRS. R. F. MAYHEW.

AT THE DOG DOCTOR'S.—The dog doctor is a metropolitan institution. You will see the swiftest carriage at his office door in winter. You will meet the nattiest of French maids and the surliest of English grooms on his stairs. There will be all sorts of common riffraff on foot at all hours of the day in summer. With these callers are his patients, the dogs. A ten cent mongrel will be preceded by a big St. Bernard worth a hundred, and perhaps succeeded by a fleecy little French poodle, estimated by its aristocratic mistress as above price. One day an express wagon drove up, and from the rear of this improved ambulance a couple of servants lifted out a grand old Newfoundland. Poor, dizzy fellow! His pathetic look of illness was almost human. And the way some of these intelligent four-legged patients walk up the dog doctor's stairs shows conclusively that they can read the glaring signs in front. The uneasy, reluctant, whimpering, wry-faced look is the same as that which connects the knowing child with the castor oil bottle.—New York Herald.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

Prepared Blanks sent free on application.

Sir Jack, Count Bob, Hawlet, Lord Clifton, Blue Jeans and Duke Orlando. B. Eberhart Pug Kennels, Cincinnati, O., for pug dogs, whelped Aug. 20, 1891, by their Bradford Ruby II. out of Lady Thelma.

BRED.

Prepared Blanks sent free on application.

Skip H.—Sport K. Ringwood Beagle Kennels (Brockton, Mass.) beagle bitch Skip H. (Flute M.—Haida) to their Sport K. (Sport H.—Beauty H.), Aug. 30.

Zenette—Kingston Regent. New York St. Bernard Kennels' (New York city) St. Bernard bitch Zenette to their Kingston Regent (Prince Regent—Lady St. Gothard), Aug. 28.

Rustic Katie—Lord Balto. G. W. Wambach's (Baltimore, Md.) pug bitch Rustic Katie (Rustic King—Tra-la-la) to his Lord Balto (champion Kash—Nun Nicor), June 2.

ARMY SHOTS.—Lockport, N. Y., Aug. 29.—The annual shoot-

ARMY SHOT.—Lockport, N. Y., Aug. 29.—The annual shooting competition of the Division of the Atlantic, United States Army, comprising teams from all the posts east of the Mississippi River, has just closed at Fort Niagara, at the mouth of the famous old river. The shooting has been exceptionally good and has continued incessantly for the last two weeks, with the excep-

tion of two days when the wind and rain storm interfered. The distinguished marksmen who go to the army shoot at Chicago, with their final scores, are: Private Thomas Feeny, Co. D, Fifth Infantry, 568; Sergt. William A. Boyle, Co. C, Battalion of Engineers, 509; Sergt. William F. Shipp, Co. E, Fifth Infantry, 495; Private Albert W. James, Co. D, Fifth Infantry, 488; Private John

Kelly, Co. A, Battalion of Engineers, 482. Of the best scores among the other marksmen the following have led the list, and will represent the division also at the shoot: Sergt. Charles Woodcock, Co. C, Eleventh Infantry, 565; Sergt. Charles Hobler, Co. E, Eleventh Infantry, 534; Private William Decker, Co. E, Battalion of Engineers, 518; Corp. John Desmond, Co. H, Fifth Infantry,

501; Corp. James Caver, Co. H, Sixth Infantry, 487; Sergt. Frederick E. Ginder, Co. D, Eleventh Infantry, 485.

AMERICAN RIFLES WIN AT BISLEY.—In the Martini-Smith competition for single-barrel rifles the scores below were made:

Single rifles, 7 shots:

1st prize.....Mr W R Joynt.....Ballard.....	6767777—47	(5 cartons.)
2d prize.....Capt Dutton Hunt, Rigby.....	45	
3d prize.....Mr Meysick.....	44	

Three-barrel, 24-grain, 2 in. diameter, .44, counts 72. A bullseye

of 3in. diameter is used (counting 6), that being the smallest object that can be conveniently aimed at at 100yds. It is only the last few years the English shooters have found out the accuracy of the American rifles; in former years hardly anyone except Mr. Meyrick used American rifles. Mr. Joynst shot from a sitting posture.

BOSTON, Aug. 29.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range to-day, with a large attendance of riflemen. The shooting conditions were good, and

several good scores were made. Francis, Myerle, fellows and Brackett, heading the list. With 71 points, Francis, E. Hos-

SCHÜTZENFEST OF 1892.—A meeting of the Central Committee of the Universal Schützenfest of 1892, which is to be held somewhere about the middle of July, was held Saturday evening at 12 St. Mark's place, New York. A. Ludwig, president, Bernhard Schütz, secretary, and second secretary, K. W. Schütz, and K. W. Schütz, secretary, to fill vacancies. The sub-committee on the Schützenfest suggested three localities: Ridgewood Park, in Brooklyn, Wendel's Park, at Fort George, and Union Hill, N. J. Each locality had its adherents, and debate over their relative merits was animated and prolonged. Union Hill was finally selected and the choice was made unanimous. Entries to the festival are assured from every center of German population in the United States and

NEW ORLEANS, Aug. 23.—The second shoot of the rifle contest between local clubs for the championship of the State took place to-day at the range of the Lawson Club, under the auspices of which the tournament is being conducted. The standing of the clubs is as follows. The first column represents the result of to-day's shoot and the second the total scores made in the two

6. Defaults.....	5,227	10,471	7. Algiers.....	4,508	8,956

CREEDMOOR, Sept. 1—With the range in capital order, a windless ideal day for shooting, and with a too sparse attend-

ance, the nineteenth annual fall meeting opened here to-day. There was plenty of work done, however, and good scoring mainly in the continuous matches. The Wimbledon cup match, which calls for 30 shots at 1,000 yds., was completed and again taken by Major C. H. Gaus, of Albany, on a score of 132 in a possible 150. The full record of the meeting will appear in next week's issue of FOREST AND STREAM.

RIFLEMEN ON CYCLES.—The Connecticut National Guard has made an experiment in military bicycling. The men rode safety machines and carried Colt's lightning magazine .44cal. carbines and Colt's regulation army revolver. When mounted each man carries his carbine slung across his back by means of a

strap. The carbine has a capacity of 12 shots and the revolver of 6 shots, giving to the 9 wheelmen a total of 102 shots to be fired without pausing to reload. The weight of the carbine is 5lbs.

Tucker second, A. L. Gilman, Dean and M. D. Gilman third, Forehand and Kenney fourth.
Eight standards, 22 entries: Root and Dickey first, Perry second, A. L. Gilman third, Bowditch and M. D. Gilman fourth.
Seven standards, 12 entries: Stierly first, Dean second, Crompton third, Kenney fourth.
Seven classes: Stierly and Willey first, Dickey and Root second, Crompton, Cady and Forehand third, Sprague and Howe fourth.

DEATH AT THE TRAP.

BROOKLYN, Aug. 26.—The regular monthly meeting of the Atlantic Rod and Gun Club at the grounds just outside the Brighton Beach race track this afternoon ended tragically. Joseph O'Brien was killed by the accidental discharge of a shotgun.

The Atlantic Rod and Gun Club is composed mostly of the officials and business men of Gravesend. It meets on the last Wednesday of every month. Twenty members assembled at the grounds to-day. Among those who participated were Justice of the Peace Kenneth F. Sutherland, ex-Assemblyman Charles J. Kurth, Richard Dwyer, and Under Sheriff Hugh McLaughlin.

The men passed nearly all the afternoon at the regular club match for the Encomium badge and Blonidin medal. The sport was good, and everybody enjoyed it. Mr. O'Brien was especially cheerful.

After the club match a sweetstake was arranged. There were terrible men entered, Mr. O'Brien among them.

Jim W. Croysey, S. Stryker Williamson, William Weber, Joseph O'Brien and Dr. Hill fell back some distance at the conclusion of the medal match.

O'Brien and Williamson sat down. Weber stood behind their chairs. Under-Sheriff McLaughlin was practicing, preparatory to entering for the sweetstakes. He fired at two birds, both of which he wound, and O'Brien fell forward with the roan dead. The front and the right side of his face was torn away.

Croysey walked up and stood in front of O'Brien and Williamson with his gun under his arm and holding two cartridges in his hand. He joined in the conversation. Noticing the cartridges, Williamson said:

"Those cartridges away, Jim; you don't need them for anything."

"Oh, yes, I do; it is my turn to shoot next," answered Croysey. Williamson leaned back and turned his head to look at the pigeons on the club house roof. The movement saved his life, for at that moment Croysey's gun was discharged. The charge whizzed by Williamson and lodged in O'Brien's face. It made a terrible wound, and O'Brien fell forward with the roan dead. The front and the right side of his face was torn away.

Croysey, in his statement after the mishap, said that he had slipped two cartridges into the barrels of his gun, but they did not fit. He finally got them in and closed the gun. It was then that one barrel was discharged. The cartridge must have caught and exploded, as Croysey felt sure he had not touched the trigger.

Editor Forest and Stream:

The deplorable accident which occurred at the shoot of the Atlantic Rod and Gun Club a few days ago, whereby a most estimable young man lost his life, furnishes, if the newspaper account of it be correct, an excellent reason for pigeon shooters to avoid that club. In well-regulated shooting clubs three rules are rigidly enforced during shoots. First, no authorizer shall not load his gun until he takes his place at the score—that is, not until he stands with his back to the spectators and with the muzzle of the gun pointing in the direction of the traps at which he is to shoot. Second, the shooter before he leaves the score must unload his gun—that is, still standing with his back to the spectators, and without turning around and with the muzzle of the gun still in the direction of the traps, he must "break" his gun and remove the shells. Third, no scouting shall be allowed. These rules, if enforced, leave scarcely any chance of accident in pigeon-shooting. It does no harm on this occasion to repeat them in your columns.

I have no doubt such rules written or unwritten are supposed to govern the pigeon matches of the Atlantic Gun Club and that some one duly authorized to enforce them is always present. If in any matches should not be shot, and the person so authorized is in duty bound to note the behavior of each shooter; to correct him if he errs in the handling of his gun and to quote and insist upon compliance with the rules. I will venture to say that at this Atlantic Gun Club shoot watchful eyes saw every kill and detected every no bird snap shot on the ground by mistake; but where was he whose duty it was to protect the spectators? Where was the man who should be shot, and the person so authorized as a thoughtless man due at the score? The unfortunate person who held the fatal gun is to be pitied, perhaps excused; but what can excuse the gross—the almost criminal—carelessness of those who, by neglecting the duties with which they were charged, made possible the killing of O'Brien!

Such an event as this involves more than the reputation of the Atlantic Gun Club. It reflects unpleasantly upon the entire shooting-club world. It will add to the public's estimation of pigeon-shooting, for the public, slow to analyze causes, is wonderfully quick in grasping results. And it seems to me that so excellent a sport as pigeon-shooting ought not to be brought into trouble or disrepute by such badly-governed associations as the Atlantic Rod and Gun Club. These organizations should practice no sport more dangerous than bean-bag pitching. CROTON.

TRAP SHOOTING IN THE FATHERLAND.

[From a Special Correspondent.]

BERLIN, Aug. 18.—Editor Forest and Stream: The first great prize shooting tournament at clay pigeons in this country took place near this city last week. The rules laid down for the shoot were those of the Deutsche Schiessverein (German Shooting Association), and are closely related to the standard English rules. Seventy-six valuable prizes were offered by this association and shot for.

The first prize, which gives its owner the right to the title of champion wing shot of Germany, was won by a young man, Mr. Preuss, with a 12-bore Winchester repeating gun. Preuss scored 92 birds out of 100.

Mr. George Ligowsky, of Cincinnati, who acted as referee, pronounced Mr. Preuss's shooting as fine as he had ever witnessed in the United States. Fully nine-tenths of all the prizes offered were carried off by shooters using the Walsrode smokeless powder.

In connection with the clay pigeon shoot a shooting match with hunting rifles was arranged at a moving wild boar. Here, too, the Walsrode smokeless powder sustained its reputation. The first prize was won by Dr. Goettinger, a native-born American, who uses smokeless powder exclusively.

The tournament has stirred up German gunners. Wing-shooting clubs are being organized all over the country, and clay pigeon shooting will soon be a popular sport in the Fatherland. Clay pigeons are offered here to the individual shooter at about a cent apiece. Heretofore, and as long as they had to be imported from America, they retailed at 8 cents apiece, a price far beyond the reach of the great mass of shooters. ARMIN TENNER.

AUBURN GUN CLUB.—Auburn, N. Y., Aug. 26.—To-day our club held a very interesting meet at the club grounds. The day was very hot and the afternoon, though the weather was smaller than common, was full of enthusiasm. The race was 5 kingbirds, 15 singles, Keystone rules, and 10 singles, 5 traps, unknown angles, expert rules, the most difficult known trap-shooting. Aside from the regular contest, which score is given below, we had a number of sweepstakes and other shoots:

A Class.	
Carr	11111111111111111111—24
Brinkerhoff	11111111111111111111—24
Tuttle	11111111111111111111—23
Ties, 10 singles, Keystone rules, 5 singles, expert rules:

BOILING SPRINGS GUN CLUB.—Rutherford, Aug. 29.—Sweepstake shooting all day. Main event 50 bluebirds, three money, entrance \$5: Post 46, Hollister 44, E. William 43, Collins 42, Outwater 42, Heritage 40, Lane 39, Hathaway 36, Paul 34.

CONEY ISLAND. O.

CINCINNATI, O., Aug. 25.—On Thursday, Aug. 20, at Coney Island, a popular resort up the Ohio River, 14 miles from the public landing in this city, was a trap-shooting match that was notable not only for the number of entries in the shoots, but for the rapidity with which the several events were disposed of in one afternoon. The Penrose system of rapid firing was employed, and the American Association rules were followed. Birds were cheap and entrance fees were low. Moreover the money was divided into numerous prizes, so as to preclude wolfish pooling and encourage shooting for the acquirement of skill and for amusement. The result was very satisfactory, and the plan will probably take a firm hold here and revive the interest in shooting which has been languishing for the past two or three years.

No. 1, 108 entries; 10 single bluebirds, entrance 50 cents:

Six other events were shot, entries ranging from 20 to 30, with \$1.00 entrance, four money.

HONEOYE FALLS, N. Y., Aug. 29.—I send you scores of our sixth monthly shoot. The weather was fine and our shoot went off in good shape. We had some shooters from Avon and Lima. Mr. Maxwell, of Lima, with his gun held below the hip until he called pull, shot a roan race and is a jolly fellow. Mr. Gregg made a good score of 15 straight birds with his new Levever gun. The Boss Wood Pecker of the Lima Gun Club shot a good race with Mr. Wilkinson and pecked very well till he struck Mr. Benham on the ties, and then his gentle voice was silent. Mr. Martin won the solid gun medal for the first shoot with 15 straight birds, shooting in fine form.

Monthly medal shoot, 15 kingbirds, 5 traps, American Association rules, 3 medal prizes:

A D Martin	11111111111111111111—13	Benham	11111111111111111111—12
Nesbitt	11111111111111111111—15	Gregg	11111111111111111111—15
Maxwell	11111111111111111111—12	Goodrich	11111111111111111111—14
Wilkinson	11111111111111111111—14	Hyde	11111111111111111111—14
Weller	11111111111111111111—12	Rounds	11111111111111111111—11
Starr	11111111111111111111—11		

First contest for solid 14 karat gold medal, 15 kingbirds, 18yds. rise; won by A. D. Martin with 15.

Second contest, merchants' prize; first prize, California hunting coat; second prize, 5lbs. powder; third prize, 25lbs. shot; fourth prize, 50 loaded shells; 7 kingbirds, 5 kingbird traps, 18yds. rise: Wilkinson 111111—7 Gates 111111—3 Weller 111111—4 Hyde 111111—5 Nesbitt 111111—6 Benham 111111—6 Starr 111111—5 Rounds 111111—4 Goodrich 111111—6 Gregg 111111—7 Maxwell 111111—6

Shoot-off: Gregg first, Martin and Benham div. second, Starr third, Nesbitt fourth.

Third contest, \$1 entrance, 7 kingbirds, 5 traps, 18yds. rise:

A D Martin	111111—3	Weller	111111—4
Vincent	111111—5	Rounds	111111—4
Nesbitt	111111—4	Hyde	111111—5
Benham	111111—5	Starr	111111—6
Gregg	111111—6	Maxwell	111111—3

On shoot-off: Wilkinson first, Benham second, Weller third, Maxwell fourth.

WALNUT HILL, Mass., Aug. 26.—The regular fortnightly shotgun meeting of the Massachusetts Rifle Association was held at this range to-day. The attendance was not large, but any lack there may have been in numbers was amply made up by the quality and good nature of those present, all having been put in the best of humor by the very agreeable weather conditions which prevailed all day. The main interest of the day centered in the struggle for first place in the gold coin match, which was secured by Mr. Bush with a straight score of 20, closely followed by Mr. Bowker with 19, and Mr. Rocky with 18. The excellent score of 21 by Bush entitles him to hold the championship badge of the Association until the next shoot. Gold coin match, 20 standard Keystone targets, squad firing, high competition: Bush 20, Bowker 19, Rocky 18, Barrett 16, Parham 15, Stone 14, Hosmer 14, Snow 13, Nichols 13.

PENNSYLVANIA ASSOCIATION.—The first annual tournament of the Pennsylvania State Sportsman Association will be held at Williamsport, Pa., Sept. 29 to Oct. 2, under the management of the Williamsport Rifle and Gun Club. The management desire to say that special railroad and hotel rates will be furnished all sportsmen and their friends, and everything done to make the event pleasant to all who may come. Two sets of traps will be in constant operation for sweepstake shooting, which will be conducted under the expert handicap rules. The prospects are that the shoot will eclipse any heretofore held. Come and bring your gun, and help swell the squads. Programmes can be had by addressing N. A. Hughes, 343 Pine street. Ammunition of all kinds and plenty of it can be had on the grounds at reasonable prices or on hire. We will shoot rain or shine. The grounds will be open for sweeps Monday, Sept. 28. Last day, live birds.

FLEMINGTON, N. J., Aug. 29.—Geo. E. Reading's first fall trap-shooting tournament will take place at Flemington, N. J., on Oct. 21, 22 and 23. Shooting will be at standard keystone targets from five traps, rapid firing; the two first days open to all, experts to shoot at unknown angles, amateurs known angles; the last day open only to amateurs; American Shooting Association rules except 12-gauge guns allowed 14oz. shot, and any one in a tie can draw his share. All moneys will be paid the winner at the close of each event.—L.V.

KYLE'S SCORING DIAGRAMS.—E. T. Allen, of San Francisco, dealer in sportsmen's goods, issues a book of diagrams of C. W. Kyle's graphic method of noting the results of each shot at trap work on live birds. The field is represented by several circles and the course of the bird noted in a rough tracing on the diagram, and by a simple system of marks the result of each shot and the whifor of each miss is noted for future reference.

NORTH CLARENDON, Pa.—In May the Mead Gun Club, of North Clarendon, and the Tionu Gun Club consolidated, and on the fourth of July held their initial shoot. They are shooting weekly for a badge presented by the Standard Keystone Target Co., whose traps and targets they use.

THE SPRING HILL GUN CLUB, of Blauveltville, N. Y., will hold a holiday shoot Sept. 7, shooting all day, 200 live birds, targets, lunch.—C. A. KITTLE, Sec'y.

Yachting.

Model Yachts and Boats. Their design, making and sailing, with designs and working drawings. Postpaid, \$2.

KNOTTY QUESTIONS.—The racing rules of the leading yacht clubs of the world are so nearly uniform and have stood for so long in practically their present form, that it may safely be assumed that they are about as nearly perfect as one could expect. At the same time questions are constantly arising which are not covered by them, and which must be decided solely according to the judgment of the committees to whom they are submitted. A curious case will be found in another column, in which a yacht, having no competitor in her own class, goes up into the next class for a single race, and wins a challenge cup given for and previously held exclusively by the larger class. A protest against the award of the cup to her has been disallowed by the regatta committee, who hold that she entered the class under a rule of the club and so becomes entitled to all the privileges of the other yachts in the class. Without attempting to discuss the merits of this particular case, the details of which are better known to the committee than to us, it seems that as a matter of equity a prize given for a series of races in one particular class should be open only to yachts permanently enrolled in that class; and that a yacht cannot at the same time be enrolled in two classes. The necessity for allowing a yacht having no competitor to enter for the time

the two yachts in question for the last place over the line; each accepting a handicap on the first day in the effort to be last.

The question whether a yacht, having once crossed and her time being taken, can cross again, was practically decided in the affirmative by the committee in recording officially the time of the second crossing; but this principle we believe to be wrong, as, if fully carried out, it must lead to serious complications. To consider an extreme case: An interval of five, and sometimes ten, minutes in which the yachts may cross the line is quite the custom in American racing, though we are glad to say that the interval is being gradually shortened, and of late is frequently dispensed with in favor of the one-gun start. In certain weather it is considered good judgment to start last, and yachts are not infrequently handicapped in the effort to put another boat over the line ahead of them. Supposing now that a yacht has crossed the line with a little wind about gun-fire and finds after several minutes have gone that she is becalmed near the line, the time being counted against her, while a more favored rival who has not yet crossed is preparing to shoot out her spinnaker and go over with a rush before a coming breeze. It would certainly be unfair to let the first yacht, after throwing away her chance and losing, have another trial by working back and crossing the line a second time astern of her rival. Such an extreme case is seldom likely to occur, though we have seen conditions under which it might be possible; but if it is an understood thing that a yacht shall be timed finally the first time that she crosses the line after the starting signal, there will be no chance for such maneuvers.

A yacht is always at liberty to start as long after the others as she chooses, and under most conditions she can injure no one but herself in so doing, but a peculiar case in which this privilege was abused has lately occurred in a canoe race. The course was six rounds of a triangle with half-mile sides, making nine miles in all. A canoe which was duly entered was temporarily disabled at the start, and after making repairs waited until the leaders had completed the first round and began the second, when she started with them to begin her first round. Though without the faintest show of winning from the field of 13 fast boats, she was no doubt legally entitled to start when she pleased, and she availed herself of the privilege, making a race with one of the leaders, claiming right of way in tacking, and sailing in all respects as though she had started with the rest. Although this action practically amounted to the interference of an outside boat in the race, there is no rule of a yacht or canoe club which prohibits it; at the same time a regatta committee would be justified in exercising the discretion accorded to it by most rules and ordering the offending boat off the course.

A RACE WASTED.—Though prizes and races have been plenty this year it seems rather a perversion of the end for which prizes are given to offer several for the result of one race. The Cherry Diamond Y. C., after sailing two races for its 46ft. cup, has just thrown a third race away entirely by giving a leg for the cup to the winner of a race held by another club, for which two prizes were already offered. The object of prize giving is not merely to endow yachtsmen with silverware but to promote yacht racing.

THE NEW YORK Y. R. A.—The annual regatta of the New York Y. R. A. on Labor Day promises to be a great success, a large number of entries having been received.

EASTERN Y. C. CRUISE, 1891.

THE annual cruise of the Eastern Y. C. took place considerably later than usual this year, but it did not suffer any on that account, and, as club cruises go, must be counted a very successful one. Fog and light winds were found in plenty, and the racing amounted to very little save for the amusement of those immediately interested; but all who took part report the trip as a most enjoyable one. The program of the cruise was a novel one; a series of racing runs for good prizes were arranged, while the Doane, was chartered to accompany the fleet, taking times, start and finish and doing such other service as was required, besides carrying the representatives of several papers, to which is due the fact that the details of the cruise were not entirely lost to the outside world.

The racing division was in two classes, schooners and singlestickers, with three prizes for each, the score being made up as follows: Each yacht is placed according to her position at the finish, the first receiving one point, the second two points, etc. Yachts which start but do not finish will be given one point more than the greatest number of finishing yachts; while those who do not start in any run will be given one point more than the greatest number of starters in that run. The smallest number of points wins the first prize, the next the second, and so on for the third prize. The singlestickers were to start 15 minutes ahead of the schooners, the preparatory interval being 15 minutes for each, with 5 minutes to cross. The fleet included the following yachts, those entering for the races being marked with a *:

Schooners.—Sea Fox, Com. Alanson Tucker; *Fortuna, Ex-Com. Henry S. Hovey; *Volunteer, Gen. Chas. J. Paine; *Mayflower, W. Amory Gardner; Foam, Vice-Com. F. Gordon Dexter; *Eneone, Col. Hugh Cochran; *Peerless, J. V. Lewis; Yesta, A. L. Lawrence; Wanderer, Capt. Blair; Dantless, C. H. Colt; Miranda, G. H. B. Hill; Priscilla, Edgar Harding; Alice, Capt. Andrews. Cutters and Sloops.—Wayward, David Sears; Mystery, H. W. Lamb; *Sayonara, Bayard Thayer; Alga, C. W. Longfellow; Bayadere, T. Watson; Merrill, Chicquita, Rear Com. Augustus Hemmingsway; *Thelma, McQuesten; *Bar, V. R. Richards; *Cinderella, W. B. Hopkins; *Gossoon, Adams Bros.

First Run, Marblehead to Eastern Point, Aug. 22.—The start was set for Saturday, the destination being the Isle of Shoals, but the weather was so bad, with fog and light winds, that the signal was set for Eastern Point, Gloucester, from the flagship Sea Fox when the start was finally made at 1:30. The race was very unsatisfactory, the course being run in the evening; the weather bad, while the leading schooners, Peerless and Fortuna, were known to have finished was to be timed as a race, went inside of Half Way Rock and Gossoon parted a turnbuckle and put back. The official times were:

	SLOOPS.		
	Start.	Finish.	Elapsed.
Sayonara.....	2 03 00	3 01 32	0 58 32
Cinderella.....	2 05 00	3 03 27	0 58 27
Thelma.....	2 03 56	3 03 40	0 59 05

	SCHOONERS.		
	Start.	Finish.	Elapsed.
Volunteer.....	2 20 00	3 17 26	0 57 26
Mayflower.....	2 20 00	3 19 54	0 59 54
Sea Fox.....	2 20 00	3 23 17	1 03 17

Owing to lack of official measurements, no corrected times were made up. At a meeting of the committee the evening it was decided to run to Boothbay next day, a distance of 80 miles.

Second Run, Eastern Point to Isle of Shoals, Aug. 23.—Early in the morning the signals were set for a run to Portland and at 9:30 the fleet started with a light northerly wind. This soon fell, the breeze coming for a time from the east, and a fog finally hiding everything. Signals were set for the Isle of Shoals, most of the fleet finally abandoning the port, the only chance of a race was abandoned early in the morning. Thelma did not start the signal and kept on alone for Portland. Volunteer struck a rocky ledge off White Island, but came off alone without injury. Monday was but little better than Sunday, the fleet lying at anchor all day.

Third Run, Isle of Shoals to Boothbay, Aug. 25.—Tuesday was a fair, bright day, with a fresh southerly wind, and an early start was made for Boothbay, 60 miles distant. The schooner in port had a fine race, over such a course with wind and sea suiting; Volunteer winning easily. Hera lost her topmast and put in to Rockland, joining the fleet at Camden. The full times were:

	Start.			Elapsed.	Corrected.
	Start.	Finish.	Elapsed.		
Volunteer.....	9 09 49	3 06 21	5 56 32	5 56 20	
Eneone.....	9 10 46	3 27 19	6 18 33	5 53 16	
Mayflower.....	9 10 46	3 27 19	6 18 33	5 53 16	
Peerless.....	9 03 22	3 59 48	6 51 34	6 08 28	
Sea Fox.....	9 08 23	3 26 53	6 18 35	6 14 18	
Fortuna.....	9 06 42	3 23 38	6 10 56	6 16 59	
Cinderella.....	9 01 25	4 03 21	7 02 06	7 02 06	
Sayonara.....	9 02 28	4 19 28	7 17 00	7 17 00	
Gossoon.....	9 01 45				Not timed.

Fourth Run, Boothbay to Camden, Aug. 26.—Wednesday's race was a short one, the light breeze blowing from the north, the wind was light, first N.E. and later S.E. The times being:

	Start.	Finish.	Elapsed.	Corrected.
Volunteer.....	9 54 01	2 59 04	5 05 03	5 05 03
Mayflower.....	9 55 00	3 16 09	5 21 09	5 19 04
Eneone.....	9 53 02	3 22 50	5 29 48	5 22 46
Sea Fox.....	9 55 00	3 31 39	5 36 39	5 35 31
Peerless.....	9 55 00	3 31 39	5 36 39	5 35 31
Gossoon.....	9 49 27	3 21 54	5 35 27	5 36 27
Cinderella.....	9 50 00	3 25 10	5 35 10	
Sayonara.....	9 49 23	3 28 00	5 38 37	

Sayonara went on the wrong side of Old Man Ledge, being obliged to return and pass it on the proper side, thus losing a good lead. The wind fell so light after the race that the fleet only made Owl's Head, anchoring there at night. The 10 miles to Camden were run on Thursday morning in a light breeze, the weather being unpleasant.

Fifth Run, Camden to Bar Harbor, Aug. 29.—The last run of 60 miles, from Camden to Bar Harbor, was made under racing conditions, with a strong N.W. wind, but none of the schooners raced, by mutual agreement. The race was proper, from Camden to Bass Harbor, 35 miles, had but three starters, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Cinderella.....	8 32 15	12 53 36	4 21 21	4 21 21
Sayonara.....	8 31 19	12 58 13	4 26 54	4 24 41
Gossoon.....	8 32 21	1 11 12	4 38 51	5 25 49

Volunteer was first prize, \$250; Mayflower second, \$150; and Gossoon third, \$50, while of the singlestickers Cinderella won \$150, Sayonara second and Gossoon third, the amounts being \$250, \$150 and \$50.

THE CORINTHIAN MIDSUMMER SERIES—1891.

ALTHOUGH this year for the first time a Goelet cup has been won by a yacht under the 70ft. class, such an event is altogether exceptional, and the victory was won by the Corinthian Y. C. Goelet cups, being by right only to yachts of the larger class. With the increase of racing in the classes under 53ft. two other annual events have come in to provide races for them; both of which, like the Goelet cup contests, are generally rated as far ahead of the usual matches and club regattas. The annual sweepstakes of the Corinthian Y. C. of New York, sailed each year off Newport at the termination of the New York Y. C. cruise, has in the three years since it was established become one of the leading racing events of the year; while the similar races of the Corinthian Y. C. of Marblehead, following a week or two later, rank beside it in importance. Coming as they do at the end of the season, when the entire fleet is at its best and the rivalry is most keen; sailed over good courses and offering a permanent record from year to year, they are the most popular of the summer events, and are to a great extent looked to for a final summing up of the season.

While the Corinthian Y. C. of New York holds but one race, the Marblehead club has adopted a series of three as being even more interesting to the contestants, and giving a more conclusive result. This year the principal prize was a \$200 cup, but in addition a \$100 cup was offered to the individual winner in each race. The dates finally set were Aug. 27, 28 and 29, the course being the 24-mile triangle off Marblehead, with Marblehead Rock, the Graves Whistling Buoy and the Eastern Y. C. seamark for its angles, each leg being 8 miles; the course to be sailed one way or the other according to the wind; yachts in no case passing to the westward of Tom Moore's Rocks, Hinker's Island or the buoy on the Outer Breaker off Pie Rock, and the race to be sailed under the management of the regatta committee of the Corinthian Y. C. Messrs. Geo. C. Adams, Geo. A. Stewart, W. P. Fowle, Geo. W. Mansfield and W. Keith, with Messrs. Daniel Appleton, W. N. Merriam, Geo. W. Mansfield and L. Whitcomb as judges.

For two years the races have been open to the 40ft. class, but this year as a matter of course the 46ft. was chosen, all yachts of the class being eligible. Every effort was made by the committee to secure a full entry of the whole class, and in particular to get Gloria in, but without success. Mr. Morgan positively declined, as he has determined to race the yacht no more this season. Nautilus, Jessica and Uvira did not go round the Cape, Sayonara sailed off with the Eastern Y. C. fleet on its cruise, and but five yachts started. These were Oweene, with some repairs and alterations after racing at Newport; Beatrix with a larger mainsail, Barbara, Mineola and Alborak. The latter boat had recently had a new sternpost put in, the keel being lengthened 8ft. on the after end, thus decreasing the rake of post, while the rudder had been altered and her lead has been changed, the result on the whole being a decided improvement.

First Race, Aug. 27.

Thursday morning was cold, rainy and foggy, with no wind, but by 9 A. M. a light breeze sprang up, and shortly after the steam yacht Melita, loaned by Mr. C. S. Eaton to the regatta committee, summoned the yachts and ran out to Marblehead Rock. It was decided to sail the off-shore leg first, thus making a reach to the sea mark, a second reach to the Graves and a beat home. Three minutes were allowed for crossing the line, the preparatory intervals being 15m. The first whistle sounded at 10:45, the actual preparatory at 11:05 and the start at 11:15. All the yachts carried clubtopsails and had balloonjibtopsails in stops. Alborak, however, having her No. 1 jibtop sail. She was sailed by Com. Fowles, while Mr. Foster steered Barbara, Capt. Barr, Oweene, Capt. Harry Haff, Mineola and Capt. Crocker, Beatrix. Alborak broke out her jibtop sail with the gun and went over in the lead on port tack, Mineola following close and at once starting a luffing match. Barbara was a minute later, while Oweene and Beatrix, each trying to start last, were handicapped, the one 9 and the other 55s.

The times were:

	Start.	Finish.	Elapsed.	Corrected.
Alborak.....	11 00 14	1 00 35	1 00 21	1 03 00
Mineola.....	11 00 14	1 00 35	1 00 21	1 03 00
Barbara.....	11 01 12			

There was wind enough to drive the boats at a fair pace against the tide, and Barbara at once laid her course straight for the mark, leaving the other two couples to bother each other. Her jib was set in stops, as on Mineola and Oweene, but Beatrix and Alborak had jibs drawing. The fog soon thickened, but Barbara still held a straight course, Mineola, Alborak and Beatrix all overstanding. The first mark was timed:

	Start.	Finish.	Elapsed.	Corrected.
Barbara.....	12 00 28			
Alborak.....	12 00 47			
Mineola.....	12 01 23			
Oweene.....	12 02 09			
Beatrix.....	12 03 27			

Barbara made a blunder at the turn in lowering her ballometer and setting her No. 1 after jib, losing time in shifting to the big sail again when she realized the error. Alborak shifted her No. 1 for a ballometer, while the other three merely jibed their ballometers for the second leg. When Barbara was finally in shape, Alborak was on her weather, but she began to work away from the big boat. Just astern were Mineola and Oweene, the latter being to leeward. As she worked out from under Mineola to cross, Capt. Haff began to luff, and for a time the two had it hot and heavy. This gave Beatrix a chance to catch them, and she, too, was busy with Oweene trying to pass her; Mineola in the meanwhile leaving the pair. Barbara was steered as well on the second leg as on the first, hitting the mark to a nicety and rounding with a lead of over 2m. on Alborak, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Barbara.....	1 09 13	1 08 45		
Alborak.....	1 11 30	1 10 43		
Oweene.....	1 12 47	1 10 38		
Mineola.....	1 13 04	1 11 41		
Beatrix.....	1 17 03	1 13 36		

The windward leg was sailed with rather more wind, especially inshore, where Barbara, Oweene and Alborak looked for it. On this leg Oweene pulled up on Barbara, but was unable to catch her; the finish being timed:

	Start.	Finish.	Elapsed.	Corrected.
Barbara.....	3 11 14	3 12 01	2 02 01	
Oweene.....	3 13 53	3 12 06	2 02 06	
Alborak.....	3 19 31	3 12 09	2 02 49	
Beatrix.....	3 19 52	3 12 08	2 02 01	
Mineola.....	3 22 26	3 12 09	2 09 22	

The full times were:

	Start.	Finish.	Elapsed.	Corrected.
Barbara.....	11 01 12	3 11 14	4 10 02	4 06 30
Oweene.....	11 03 00	3 13 53	4 10 53	4 08 24
Beatrix.....	11 03 00	3 19 52	4 16 52	4 12 21
Alborak.....	11 01 14	3 19 31	4 18 17	4 15 19
Mineola.....	11 00 35	3 22 26	4 21 51	4 18 22

Although the conditions were unsatisfactory, the race was a fair one, Barbara winning on her own merits, but for a course of the lot, while she moved very fast. The wind and smooth water favored Alborak, but she made a very poor showing beside the leaders. Mineola did very poorly, besides losing time in the frequent luffing matches.

Barbara wins \$100 and one leg for the cup.

Second Race, Aug. 28.

On Friday morning the wind was shifting about from the south, and the inshore leg, to the Graves, was finally selected as the first one. The yachts carried clubtopsails, the wind being moderate. The start was given at 11:15, Alborak was just at the weather end of the line, crossing within 5 seconds on port tack, but tacking offshore at once. Mineola was on the lee end of the line in company with Beatrix and Oweene, Beatrix on port and Oweene on starboard tack. Mineola crossed at 11:25:25, and Beatrix came close astern, nipping to get by the mark, when Oweene's bowsprit struck the boom of Beatrix, the latter boat crossing the line, wearing and making a circle around the mark; recrossing the line. Oweene, with a protest flag flying, continued her course. Barbara was minding her own business, crossing the line alone. The start was timed:

	Start.	Finish.	Elapsed.	Corrected.
Alborak.....	11 15 05	11 16 44		
Mineola.....	11 15 26	11 17 36		
Oweene.....	11 15 41			

Alborak held well off shore, the rest working close to Marblehead Neck and along by Swampscott. Barbara parted her bowsprit when off Lynn Harbor, and a few minutes later Mineola met with the same mishap. Barbara lost some time in repairing damages, but finally proceeded, Mineola giving up. Alborak had done well thus far, leading the inshore boats when they came together, but Beatrix gradually passed her, taking the lead, while Oweene marked the second place before the mark was reached. The times at the Graves were:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	12 37 19	1 19 43	12 48 33	1 31 49
Oweene.....	12 38 02	1 22 21	12 50 19	Withdraw.
Alborak.....	12 39 40	1 24 35		

Running out to windward and making a wide turn, Beatrix started sheets for a reach to the second mark, setting a No. 2 jibtop sail. Oweene doing the same, while Alborak carried only the clubtopsail and lower sails. With more wind in the middle of the leg, jibtopsails came in, Oweene setting hers again as the wind fell near the second mark, while Beatrix set a baby. The times at the E. Y. C. buoy were:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	1 33 11	2 55 32	1 32 26	0 56 46
Oweene.....	1 34 05	2 58 03	1 49 43	0 55 32

After jibing, spinnakers were set to port and the last leg was nearly covered under a moderate breeze, when a very severe rain-squall struck the fleet. The wind was less severe than it promised to be, the yachts carrying topsails through the squall and another still harder one, after which came a calm with fluky airs now and again. The finish was timed:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	2 58 40			
Oweene.....	2 58 50			
Alborak.....	3 02 17			
Barbara.....	3 02 17			

Barbara had held on well for two legs but finally went to leeward of the finish line and was not timed. The times were:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	11 17 36	2 58 40	11 54 31	3 39 31
Oweene.....	11 15 41	2 58 50	11 49 09	3 41 35
Alborak.....	11 15 05	3 02 17	11 47 12	3 47 12
Barbara.....	11 16 44			
Mineola.....	11 15 26			

The Cherry Diamond Y. C. gives one leg for its cup to the winner of this race, Beatrix, she also taking the \$100 prize for first boat, with a leg for the Corinthian cup.

Third Race, Aug. 29.

Saturday was the finest day of the three, being clear with a strong and puffy N.W. wind. All carried clubtopsails as they came for the line at 11 A. M., the course being the same as on the preceding day, to the Graves first. Alborak made another fine start, while Mr. John B. Paine, the starter, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Alborak.....	11 00 16	1 00 40	11 01 36	1 01 36
Mineola.....	11 00 40	1 01 00	11 01 50	1 01 50
Barbara.....	11 01 21			

The wind was abate the beam on the first leg, with all on starboard tack, all but Alborak carrying balloon foresails, she having working foresail set. Jibtopsails were carried, Oweene and Mineola setting intermediate sails, while the other two carried the smaller ones. Beatrix passed Barbara and Mineola on the reach, and turned almost even with Alborak at the Graves, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Alborak.....	11 54 17	1 54 01		
Beatrix.....	11 54 31	1 54 01		
Mineola.....	11 54 46	1 54 06		
Oweene.....	11 55 17	1 53 27		
Barbara.....	11 56 00	1 54 43		

Although spinnakers were set to port after the jibe this did not prevent a hard luffing match between Alborak and Beatrix, the latter easing in her spinnaker and luffing out to the north of her course. Alborak, Mineola and Oweene were together for a time after this, but Alborak finally dropped the two, and took the northerly course after Beatrix, where both found more wind, the other three getting it very light for a time. When the E. Y. C. buoy was reached the leaders had pulled off a long piece on the other three, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	1 10 00	1 15 29		
Alborak.....	1 10 31	1 16 14		
Mineola.....	1 15 50	1 20 13		
Oweene.....	1 16 09	1 20 52		
Barbara.....	1 16 17	1 21 04		

The last eight miles were to windward in a light breeze. Beatrix started away from the fleet and soon left them minutes astern. Alborak had trouble with her jibtop sail, which suddenly grew too long for her in the N.W. wind, and finally she let it out in, finishing under lower sails only, the wind being quite fresh inshore. The last leg was timed:

	Start.	Finish.	Elapsed.	Corrected.
Beatrix.....	2 34 39	1 24 39	2 49 37	1 33 20
Alborak.....	2 44 50	1 34 39	2 49 35	1 33 45
Oweene.....	2 47 45	1 31 39

SIPPICAN Y. C.—Fifteenth open regatta, at Marion, Aug. 26. Courses—First and second classes, from judges' yacht, leaving S. E. ledge and Nye's ledge buoy on starboard, to judges' yacht

CLASS CHALLENGE CUPS.

The regatta committee of the New Haven Y. C. has lately decided a very interesting case arising from a protest made in the annual regatta of July 8. The following letters give all the details of the question:

NEW HAVEN, Conn., Aug. 7, 1891.

To the Regatta Committee of the New Haven Y. C.:

GENTLEMEN—I hereby protest the decision awarding the Warner cup to the yacht Stranger.

First, As the yacht was placed in the class only for the day and race, and therefore cannot win a prize that the yacht winning it must hold subject to challenge from yachts in her class for a year.

Second, The Wanda cannot challenge for the cup as by your decision it is held by the Stranger, a yacht in a lower class and under the rules of the New Haven Y. C. a yacht cannot go down in a lower class.

Respectfully yours, CHARLES R. WATERHOUSE.

The decision is as follows:

At the annual regatta of the New Haven Y. C., sailed July 8, 1891, in division C, class 4, the Warner challenge cup was awarded by the judges to the yacht Stranger. From the decision of the judges, Charles R. Waterhouse, owner of the yacht Wanda, appealed to the regatta committee, alleging as his reason for the same that as the Stranger was placed in class 3 only for the day and race, therefore the yacht could not win a prize that she must hold, subject to challenge, from yachts in her class for one year; and claiming that the Wanda cannot challenge for the cup because, by the decision of the judges, the Wanda cannot go down in a lower class for that purpose.

On the morning of the regatta, no yacht having appeared in division C, class 4, to compete with the Stranger, her owner, Mr. J. W. Macauley, gave due notice to the regatta committee and judges that he would enter his yacht in class 3 of that division, under the provisions of the regatta and sailing regulations, and in the first page of the book of 1890, under the heading of "Challenge," he entered a race of a larger class by assuming the time allowance and minimum measurement of the larger class. In accordance with this notice the Stranger sailed in class 3, her time was taken, her allowance figured, and she was declared by the judges winner in that class, and entitled to the first prize in that class, from which decision no appeal has been entered.

The judges in accordance with the rules and regulations governing challenge cups, class 1, page 18, of the book of 1890, provided that the yacht making the best standard time in her class at the annual regatta shall be the winner in the class, further awarded to the Stranger the Warner challenge cup. From this decision Mr. Waterhouse appealed for the reasons above stated.

The regatta committee, after due consideration, affirm the decision of the judges. The Stranger entered class 3 in accordance with the regatta and sailing regulations of this club, and fairly and regularly won the first prize in that class. No one questions this fact. The rules and regulations governing challenge cups, rule 7, provide that the regatta and sailing regulations of this club shall apply in challenge regattas, cup regattas, matches and races, except as otherwise provided in those special rules and regulations. This rule, we believe, clearly provides that the Stranger, having regularly entered class 3 for one purpose, regularly entered for all purposes, and that having won the first prize in the class she entered, she is also entitled to the challenge cup awarded to that class.

The Stranger having regularly entered class 3, and having won the challenge cup awarded in that class, she now holds the cup and must defend it against all challenges of yachts in class 3 in accordance with the provisions of the rules and regulations governing challenge cups.

The Wanda and other yachts of class 3 will not be obliged, as Mr. Waterhouse alleges, to go down into a lower class to compete with the Stranger for the cup, but the Stranger upon challenge will be obliged to accept the minimum time allowance of class 3, just as she did at the annual regatta.

The regatta committee have caused this decision to be entered upon its records, and have forwarded a copy to Charles R. Waterhouse.

Dated at New Haven, Conn., Aug. 10, 1891.

WM. A. FOSKETT, JR., } Regatta Committee.
L. A. ELLIOTT, }
FRANK P. TYLER, }

YACHTS AS DUTIABLE MERCHANDISE.

WHEN the cutter Madge, brought from Scotland to New York on the deck of a steamer in 1881, was finally sold to American owners, she was appraised as a manufacture of wood, and duty was paid on her, we believe 35 per cent on her nominal value, she being an old boat. In the case of other small yachts imported by steamer afterward, Uldia, Delynn, Circe and Siona, the same course was followed, and in default of any specific tariff, total exclusion by the Treasury Department with cargoes. Until the past year there has been no thought of interference with the larger yachts which have sailed over on their own bottoms, and no duties of any kind have been imposed upon them.

The first intimation of a change of policy on the part of the Government was given in the report of the Commissioner of Navigation for last year, in which a correspondence was had with the collector of all yachts of foreign build, as well as for the imposition of onerous charges and restrictions on yachts of American build and ownership, was outlined and warmly recommended. Though the proposed bills presented in this report were not passed last year, a very strong opposition being met from yachtmen, the same influence has been at work, compelling the documenting of American yachts hitherto exempt and striving in every way to prevent the use of foreign built craft. The effort to collect light dues, which if successful would have loaded the yachts with prohibitive charges at every port, proved a failure, the tax being declared illegal in the recent decision of Judge Benedict. Undeterred by this failure, Commissioner Bates and Assistant Secretary Nettleton have started on a new tack, the nature of which is shown by the following letter:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY.
COLLECTOR OF CUSTOMS, NEW YORK, N. Y.

SIR—The question as to whether the yacht Conqueror which was purchased in England by Mr. F. W. Vanderbilt and brought into the port of New York, shall be regarded as a dutiable importation having been referred to the Solicitor of the Treasury, that officer, under date of 14th inst., advises this department that said yacht is, in his opinion, liable to duty under the fair intendment of the Tariff act.

You will accordingly take the necessary steps for the appraisement of said vessel for duty and the assessment and collection of duty thereupon according to law.

The question as to the liability of said yacht for tonnage tax should be referred by you to the Commissioner of Navigation, under synopsis 6,466.

Respectfully yours, A. B. NETTLETON, Assistant Secretary.

As yachts are not included in the tariff schedule of the new McKinley bill, the Conqueror has been classed as a "manufacture composed wholly or in part of iron and steel," the duty on this class being 45 per cent. Her cost in England was \$77,750, which would make the duty \$35,387.50.

Mr. Vanderbilt learned of the above letter through the daily papers last week, and on Aug. 26 sailed from Newport to New York in order to bring the matter to a settlement. On Thursday morning he visited the offices of his lawyers, Messrs. Root & Clarke and in company with Mr. S. B. Clarke called upon Collector Fassett at the Custom House. The Collector requested Mr. Vanderbilt to make a voluntary declaration of the entry of the yacht as dutiable merchandise, which he declined to do, on which he was informed that if such entry was not made by 2 P. M. the yacht would be seized by the Custom officers. No entry being received by that hour, two inspectors were despatched to Stapleton, Staten Island, where they boarded the yacht and took possession without opposition.

Mr. Vanderbilt on Sept. 1 filed a libel against Collector Fassett, and began suit to recover the yacht, with damages for her seizure and detention.

LAKE CHAMPLAIN Y. C.

THOUGH but four years old, the Lake Champlain Y. C., of Burlington, Vermont, will rank in point of numbers with many of the older clubs, its roll including no less than 237 active members. The club house, situated on the harbor at the foot of one of the principal streets, is a very large and well-arranged building, with meeting room, toilet room and a large boat room on the first floor, where the members and guests are for dancing, ladies' rooms, kitchen, and outside a wide balcony on the fourth floor, from which a beautiful view of the lake may be had. The fleet numbers 52 yachts, 33 being steamers, from Com. W. Seward Webb's fine steel yacht Elfrida, of 112 ft., down to the smaller sizes of launches. The annual regatta was held on Aug. 21, and in spite of bad weather was a most complete success, so far as the entertainment of the large number of members and guests was concerned. The day was rainy, with half a gale blowing, so that some of the competitors were unable to reach Burlington, decreasing the starters. A great feature of the occasion was the canoe racing, the club very generously inviting the entire camp of the American Canoe Association, at Willsborough Point, opposite Burlington. A special steambot was sent over in the morning at the club's expense, bringing the canoeists to the club house and returning them late at night. During the day the house was thronged with ladies, a lunch being served at noon; and in the evening a grand ball was given.

The two sailing races came off in the afternoon for classes 1 and 3. In the former but two yachts started, Nautilus, a handsome Burgess 40-footer, built on the Lake, and Burlington, a 37 ft. sharpie. Nautilus, owned by Mr. Horton Hickok, won by over 40 m., the course being 10 miles. The third class race, over a 6-mile course, resulted as follows:

	Elapsed.
Alpha, J. C. Witherbee	34 20
Eleanor, J. G. Whiteside	30 04
Beetle, W. Seward Webb	38 50
Madge, W. S. Phelps	39 02

The third race was for steam yachts, with 4 starters, as follows:

Missisquoi, Dr. W. S. Webb, Shelburne	1 04 21
May, Capt. Longstreet, New Jersey	1 04 54
Growler, F. H. Wells, Burlington	1 04 54
Startled Fawn, Ed. Hatch, New York	1 04 54

The prizes were all very elegant, but the ladies' challenge cup, won by Nautilus this year for the third time, is a specially handsome trophy, a large silver punch bowl, costing \$500, presented by the ladies of the club.

After the yacht and canoe races several rowing races were held. The officers of the club for 1891 are: Com., W. Seward Webb; Vice-Com., W. A. Crombie; Pres., J. Gregory Smith; Fleet Captain, D. W. Robinson.

THE BANGOR CORINTHIAN Y. C.

Editor Forest and Stream:

I see that you have published the lines of Iota, built by Fife for Mr. A. S. Matier, of the Bangor Corinthian Club. I was over there during the summer of 1889, and right pretty racing there was. Fife built four boats, and for sail, stiff cut, side by side, and every Saturday through the season they were manned by Corinthians, and it was nip and tuck all the time and the crews were smart. According to my recollection the boats were rigged as sloops and not cutters. I know they had no topmasts, I believe only one head sail. They were very narrow, and to one who was used to the broad boats of American waters, the only thing when aboard was just to sit still and hold on tight. I see that some measurements, but I do not think you are right; my recollection is that Iota was 30 ft. over all, and though by the plans she has 6 ft. of beam, I never would have thought it. They were three pretty boats, finished to perfection and well sailed.

The Bangor Corinthian Y. C. has made some good sailors. Everybody who comes in, be it he or she, is rated as "boy" until hot this camp makes a long splice, as they say, and they know the rules of the road at sea and various elementary bits of seamanship. Then, having passed a formal examination by duly appointed officers of the club, he or she, as the case may be, is ranked as "ordinary seaman," and on further qualification in a boat under way, got a red "star" imprinted on his or her certificate.

Water came the degree of "able seaman," and then that of "mate." Only able seamen could vote and mates were alone eligible to office.

You say that Fife built four boats for the club this year, and that they are sailed with "simple lug mainsails and jibs." You may be correct, but I think that they are rigged with a jib, a balance lug, trimmed down flat with a downhaul to the keelson, and a favorite with the member of this club. The fishermen in that part of the world are very fond of a dipping lug, with a loose foot on a mast raking away forward—but the Corinthians never took to it.

By the way, I am glad to see how the yawl rig is growing in favor. In 1882 I spent the summer at Sheephead Bay, and I there sailed about the first yawl in these waters, with a good big main, and a favorite with the member of this club. This morning when I went down for my usual vetting, there were two fair-sized yawls, and also a cat yawl. I've always had an idea that the latter is about right—that is with a heavy gooseneck that can be set up forward to carry a spinaker boom, which could be used as a bowsprit as well.

PORT JEFFERSON, N. Y.

[Our measurements and descriptions were correct in both cases. The new boats have but two sails, jib and ordinary lug mainsail.]

THE MOSHER LAUNCH NORWOOD.

BUT little has been heard of the new launch Norwood, designed by C. D. Mosher for Norman L. Munro and built by W. K. Pryor, of Boston, in 1889, since she came to New York last summer and was docked at Wintringham's to prepare for a trial trip. This trial, as it happened, was by no means satisfactory, and the yacht has since been overhauled and somewhat altered, the engine, by Rixey & Cowley, of Brooklyn, and the hull, by W. A. Seaman, of Branchport, N. Y., the concrete run having been filled in. On Aug. 19 the Norwood made another trial trip, meeting the twin screw steamer Monmouth, of the Sandy Hook Line, off Bay Ridge, and beating her easily to the dock at the Horsehoe, on the Hook. The Monmouth is probably the fastest steamer on the Bay, being good for over 20 knots, and she was quickly left astern by the little launch, but no accurate times of the latter were taken, though it is claimed that she made over 27 knots.

The Norwood was designed to make thirty miles an hour, and to that end her construction was made as light as possible, while she was provided with very powerful engines. Though built in Boston the work was carried on with the utmost secrecy, the shop being hermetically sealed, with every crack and knot hole caulked tight, the only keys being in the possession of the designer and the builder. The hull is 63 ft. long, 7 ft. 3 in. beam, 1 ft. 6 in. draft, and displaces nearly 8 tons. The keel is made of steel girder, the frames are of steamed oak, 1 1/4 in. square and spaced 8 in.; the planking is of mahogany, the inner skin of 3/16 in. and the outer one of 1/8 in., with a layer of canvas between. The plank fastenings are phosphor bronze screws. The engine is a triple compound, cylinders 9, 14 1/2 and 22 by 9 in., designed by Mr. Mosher. The shaft and also the connecting rods are hollow, the bore of the latter containing sticks of lubricant. The boiler is a modification of the Thornycroft type, with two steam drums in place of one. It is 7 ft. 3 in. long, 6 ft. wide and 3 ft. 6 in. high. The grate surface is 29 sq. ft.; the weight is 2 1/2 tons, while the engines weigh 1 ton. A Sturtevant blower is used for the draft, operated by a small independent engine. Mr. Mosher is now at work in connection with Mr. M. R. Gardner on the designs for a larger and faster steam yacht.

SAVIN HILL Y. C.—The regatta of the Savin Hill Y. C. on Aug. 23, for cash prizes, was sailed in a fresh and variable N. W. wind, on Dorchester Bay, the times being:

MASSACHUSETTS Y. C. CRUISE.—The Massachusetts Y. C. fleet will rendezvous off Thompson's Island Buoy Sept. 5 for a three days' cruise. First and second prizes will be given for sloops and schooners for each day's run. The runs will be: First day, Thompson's Island to Marblehead Rock; second day, Marblehead, out and around Half-way Rock, to Gloucester; third day, Gloucester to Boston. A meeting of the club will be held at Rowe's Wharf on Friday at 8 P. M.

PROVINCETOWN Y. C.—On Aug. 29 an open race was sailed off Provincetown in a fresh N. W. breeze, the winners being Ariel in first class and Alice in second.

OUT OF COMMISSION.—The schooners Palmer and Cavalier have already laid up.

FALL RIVER Y. C. OPEN REGATTA.—The annual open regatta of the Fall River Y. C. was sailed on Aug. 15 in a strong N. E. breeze, the times being as follows:

Hector was leading in her class when she was disabled and withdrew.

CORINTHIAN MOSQUITO FLEET, FIFTH REGATTA, AUG. 22.—The fifth regatta of the Corinthian Mosquito Fleet was sailed on Aug. 22 off Larchmont, the courses being: For classes 1, 2 and 4, from buoy anchored opposite Larchmont Club house, around spar buoy on west end of Execution Light, around Matinecock Buoy, leaving all buoys on port hand, to finish, 13 miles. The course for all other classes was from the same starting line, around Execution Reef and black spar buoy on Constable Reef, leaving buoys on port hand, thence to finish, 7 miles. The chief feature of the day was the race in the first class for the club's subscription trophy between the two 25-footers, Needle and the Wetmore boat, and the Clapham boat Chippewa. The wind was moderate from the S. W., the first leg being to windward, Chippewa gaining 39 sec. on the Wetmore boat. From this out the two sailed very evenly, but Chippewa was finally disqualified for going inside the Hen and Chickens Buoy, giving the Wetmore boat the second leg for the cup, which must be won three times. The full times were:

	Start.	Finish.	Elapsed.	Corrected.
Chippewa	1 40 00	4 45 12	Disqualified.	...
Needle	1 40 00	4 49 01	3 09 01	3 09 01
Nameless	1 40 00	4 45 21	3 05 21	3 05 21

QUINCY Y. C. CLUB RACE, AUG. 22-23.—The club race of the Quincy Y. C. on Aug. 22 was also made a race for the championship in the third class, in place of a previous race in which all the yachts sailed the wrong course. The wind was strong from S. W. The times were as follows:

	Length.	Elapsed.	Corrected.
Posy, R. G. Hunt	22.02	2 00 36	1 32 16
Erin, John Cavanagh	26.11	2 03 32	1 39 28
Adolph, Henry Moebis	22.07	2 15 25	1 47 30

	Length.	Elapsed.	Corrected.
Vision, George Crane	19.06	1 52 45	1 25 20
Helen, R. W. Sawtell	19.11	1 56 41	1 29 43

	Length.	Elapsed.	Corrected.
Freak, G. F. Marbury	15.07	1 56 02	1 23 47
Flora Lee, C. D. Lanning	16.10	1 56 35	1 26 03
Bess, W. C. Cherrington	17.03	1 56 12	1 26 11
Mab, John Shaw	16.00	1 59 34	1 27 54

Freack wins the cash prize and the leg for championship, subject to protest. Mr. W. H. Shaw acted as judge. Flora Lee parted her peak ballards when she was in the lead and fell to second place. In Aug. 25 the sail off for first and second classes took place, the result being:

	Length.	Elapsed.	Corrected.
White Fawn, A. E. Jones	25.00	1 44 09	1 18 30
Posy, R. G. Hunt	22.02	1 55 00	1 26 40
Erin, John Cavanagh	26.11	1 53 47	1 29 43

	Length.	Elapsed.	Corrected.
Idler, F. L. Dunn	20.06	1 38 32	1 12 10
Madge, Thayer & Poor	19.11	1 39 37	1 12 39
Erin had a good lead when she broke a peak ballard block, the delay making her last boat. The judges were W. H. Shaw and George Paffman.

CORINTHIAN Y. C. 53D REGATTA, AUG. 22.—The 53d regatta of the Corinthian Y. C. of Marblehead was sailed in a light S. E. wind on Aug. 22, the times being:

Memento	23.01	1 45 25	1 45 25
Warrior	22.09	1 58 30	1 57 02
Tomcat	...	4 48 25	...
Nerena	...	2 09 00	...
Delphine	...	2 25 00	2 22 45

Mildred, Susie, Hornet and Madge take first prizes and legs in the championship; Triad wins first prize in special class, Countess second and Lorita third; Memento wins second prize in fourth class.

YORKVILLE Y. C., Aug. 23.—The club regatta of the Yorkville Y. C. was sailed in a moderate S. E. breeze, the times being:

	Length.
--	---------

NEWARK Y. C. ANNUAL REGATTA, AUG. 24.—The Newark Y. C. is one of several suburban clubs which have taken rapid growth within a very short time and have attained an enviable degree of prosperity. The club has now a large and handsome house on Newark Bay at Bayonne, with wharf, floats and a good anchorage for its large and growing fleet. The club course is on Newark Bay, while a sail of a few miles brings the yachts to New York Bay or by Staten Island Sound to Raritan Bay and Sandy Hook. The ninth annual sweepstakes regatta of the club was sailed on Aug. 24 in a strong but variable wind with heavy squalls, bringing disaster to a number of the yachts. The course was from off the club house, around the red spar buoy off Passaic Light, then around a stakeout off the Central Railroad draw-bridge, and home; two rounds making 10 miles. The start was made at 12:30, with 18 starters, but the violent squalls caused a number to withdraw. Galawater and Essex capsized, Our Own lost her mast, and Lizzie B. damaged her centerboard. The times were:

CLASS 2—CABIN SLOOPS, 27FT. AND UNDER 32FT.				
Length.	Start.	Finish.	Elapsed.	Corrected.
Seybolt.....	31.03	12 35 40	2 22 30	1 46 34

Maggie, H. G. Orlis.....	19.00	2 29 25	1 41 30	
Egeria, Francis Ware.....	19.11	Withdrew.		

Albatross lost her topmast. Swordfish won the special cup in her class. The visitors were very hospitably entertained by the Corinthian Y. C., sailing next day for Hull.

STATEN ISLAND Y. C., AUG. 22.—The regatta of the Staten Island Y. C., sailed off Stapleton on Aug. 22, was quite a success for the new club. The courses were from a line between the club house and a stakeout anchored to the eastward in the Bay, then to and around Swash Channel bell buoy, thence to Buoy 14, off Bay Ridge, and finishing over the starting line; 15 miles. For sloops between 20 and 25ft. and the catboats of the same length, to and around Quickstep bell buoy, thence to Buoy No. 14, and then to finish; 12 miles. The wind was moderate, and from the south. Mamie G. fouled the Quickstep buoy and was nearly capsized. The times were:

CLASS A—SLOOPS 25FT. AND UNDER 32FT.

LAUNCH OF THE HALF MOON.—On Aug. 22 the new auxiliary yacht built by the Gas Engine and Power Co. from designs by Mr. A. Cary Smith for Mr. James A. Roosevelt, of the Seawanhaka Corinthian Y. C., was launched from the company's yard at Morris Dock, on the Harlem River. The Half Moon is a comfortable

LACHINE BOATING AND CANOE CLUB.

THE annual regatta of the Lachine Boating and Canoe Club, formed this spring from the Lake St. Louis Canoe Club and the Lachine Boating Club, was held on Aug. 22, at Lachine, near Montreal, the entries being numerous and the races very well contested. The paddling was done with single blades entirely. A number of the Canadian canoe men went down from the A. C. A. meet to witness or take part in the races. Mr. Archibald won the open canoe sailing race, while Mr. Muntz came in second in the single blade paddling. Mr. Ross paddled this race standing on the gunwales of his canoe. Messrs. Duggan and Shearwood again won the championship tandem cup, in a canoe designed by the former. The summary of the races is as follows:

Open canoe sailing race, championship cup, three miles:	
C. E. Archibald.....	1
H. Routh.....	2
C. Robin.....	0
C. Routh.....	0
Boys' single scull, 17 years and under, half mile with turn:	
Elliott.....	1
Baby.....	0
Tandem canoe race, green, one mile with turn:	
Coopers' crew.....	1
Sewells' crew.....	2
Davidson's crew.....	0
Holland's crew.....	0
Amos's crew.....	0
Barlow's crew.....	0
Morris's crew.....	0
Single scull race, one-half mile with turn:	
J. Higginson, Pointe Claire.....	1
T. Stewart, Lachine.....	2
Tandem canoe race, championship cups, to be won three times by the same crew, one mile with turn:	
G. H. Duggan and F. Shearwood, Lachine.....	1
C. Routh and H. Routh, Lachine.....	2
A. Morris and A. Irving, St. Lambert.....	0
J. G. Ross and G. S. Lowe, Valois.....	0
Boys' double scull, 15 years and under, half-mile and turn:	
Baby and Rawlings, Lachine.....	1
Saunderson and Kirby, Beaconsfield.....	2
Double race, one mile with turn:	
Paradis and Elliott, Longueuil.....	1
Higginson and Claxton, Pointe Claire.....	2
Fisher and Thompson, St. Lambert.....	0
Irving brothers, St. Lambert.....	0
Canoe race, single paddle, championship cup, to be won twice, half-mile with turn:	
Percy Taylor, Lachine.....	1
W. Muntz, Toronto.....	2
W. G. Ross, Valois.....	0
Punt race, boys 13 and under, 200 yds. with turn:	
C. Davidson.....	1
F. Shackell.....	2
P. Rawlings.....	0
C. Lemesurier.....	0

Canoe race, four paddles, half-mile with turn:	
H. Routh, C. Routh, F. Fairbanks and Davidson.....	1
P. Taylor, H. Baby and Mussen brothers.....	2
G. S. Lowe, A. Ross, J. G. Ross and Paten.....	0
Boys' tandem canoe race, 17 years and under, half-mile with turn:	
S. Davidson and Munson.....	1
C. Stewart and A. Small.....	2
W. Levin and H. Baird.....	0
R. Baby and H. Baby.....	0

War canoe race, 15 paddles, half mile, with turn:	
Lachine crew, black—G. H. Duggan, F. Shearwood, A. Shearwood, J. Routh, C. Routh, H. Routh, T. Stewart, F. Stewart, T. Howard, P. Taylor, F. Fairbanks, W. Shackell, P. Davidson, C. E. Howard.....	1
Irving crew, red—Geo. Auldjo, Mussen Brothers, Morris Brothers, Irving Brothers, McCallum, S. White, P. Rawlings, Shaw and Donnelly.....	2
Single canoe, standing on gunwale, 200 yds. with turn:	

FIRST HEAT.	
W. G. Ross.....	1
P. Taylor.....	2
L. Davidson.....	0
A. F. Ross.....	0
Mussen.....	0

SECOND HEAT.	
S. Davidson.....	1
L. Levin.....	2
P. Rawlings.....	0
A. Routh.....	0
W. Levin.....	0
Amos.....	0

FINAL HEAT.	
W. G. Ross.....	1
L. Levin.....	0
P. Taylor.....	0
S. Davidson.....	0

Four-oared race, club, Dixie vs. Lachine, half mile straight-away:	
Dixie crew—J. W. Routh, A. W. Sherrwood, —Nash, L. B. De Vebe (stroke).....	1
Lachine crew—F. Fairbanks, T. Howard, A. Dawes, T. Stewart (stroke).....	2
The officers of the day were: Judges—Judge Davidson, A. J. Dawes, J. W. Grier, A. W. Morris, J. G. Monks and R. F. Meredith. Starter—S. P. Howard. Timekeepers—R. J. Ross and C. H. Gwill. Clerks of the Course—S. Jackson, T. Stewart and J. H. Stewart.	

ONE FOR THE CANOE.—"The mystery of the missing yacht, which capsized in the lake opposite Bronte, as reported in the Star, on Sunday evening, in sight of several persons, has been explained by the crew, who are Torontonians and had reached land in a canoe."—Toronto Star, Aug. 22.

THE PASSAIC RIVER RACES.

THE three leading canoe clubs of the Passaic River, the Orange, Arlington and Ianthé, whose houses are close together at Woodside and Arlington, have arranged a series of three regattas to be held on Saturday and Monday next. The first will be that of the Orange C. C. at West Arlington, on Saturday at 2 P. M., the programme being as follows: Paddling, any canoe; sailing, senior; sailing, juniors; club four; sailing and paddling combined; sailing, maneuvering and upset; paddling, senior; paddling, juniors; paddling tandem, canoes 20m. beam or over; hurry-scurry and upset; Passaic River trophy cup. The regatta committee includes Messrs. G. Manley, A. Crawford and J. M. Lowden.

The regatta of the Arlington C. C. will be held on Monday at 9 A. M., the programme being: Paddling; paddling tandem, decked; paddling tandem, open; paddling, club; paddling and sailing combined; hurry-scurry and upset; sailing upset; sailing, Tournament. Swimming.

In the afternoon, starting at 2 P. M., the regatta of the Ianthé C. C. will be held with the following programme: Sailing, record event. Sailing, juniors, record event. Sailing, man overboard. Sailing, upset. Paddling, open canoes, single blades. Paddling, juniors, decked sailing canoes. Paddling, decked sailing canoes. Paddling tandem, open canoes, single blades. Paddling tandem, decked sailing canoes. Club fours, open canoes, single blades. Club fours, decked sailing canoes. Paddling, any canoe. Hurry, scurry. Paddling, upset. Tournament. Swimming.

The regatta committee includes Messrs. H. S. Farmer, G. P. Douglas and P. W. Hart. All of the races will be under the A. C. A. rules, and open to members of other canoe clubs.

ANSWERS TO CORRESPONDENTS.

O. W., Victoria, B. C.—An argument has arisen between two gun clubs as to the proper reading of the following rule: "Position at the score.—After the shooter has taken his stand at the score, he shall not level his gun or raise the butt above his elbow until he calls 'pull.' Should he infringe on this rule the bird or birds shall be scored as lost, whether killed or not." Now the question is this, must the whole butt of the gun be below the elbow? Ans. Yes, the entire butt must be below.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Naniti," "Glean," "Dick Swiveller," "Sybilene" and other competent authorities to be the best treatise on the subject extant.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price \$2.50. For sale by FOREST AND STREAM.

MILLER'S PREPARATIONS.—Wide popularity is an infallible test of merit. For years the harness dressing made by Frank Miller has been a favorite preparation.—Advt.

SYRACUSE BAMBOO FURNITURE CO.

Successors to SYRACUSE FISH ROD CO.

MANUFACTURERS OF

Fine Split Bamboo Fishing Rods,
WITH CORK AND CELLULOID HAND GRASP. (Patent applied for.)

It is light, fits and will not blister the hands. Recommended by the most experienced anglers in the U. S. Order one through your dealer for inspection, and if not satisfactory can be returned. The U. S. Net and Twine Co. are agents for New York City.

The glittering gang trolling baits which we are manufacturing are the coming bait. It takes the place of the phantom minnow, and is warranted to take two fish to one on any other bait. For sale by all principal dealers in New York.

We are also manufacturing all the popular spoons, such as fluted, kidney and hammered. For sale by all dealers. Send for catalogue.

Syracuse, N. Y. HENRY LOFTIE, Manager.

Fly-Fishing & Fly-Making
FOR TROUT, BASS, SALMON, Etc.

By J. HARRINGTON KEENE.

With plates of the actual material for making flies of forty-eight varieties. Illustrated, second edition. Revised and enlarged. Price, \$1.50.

This is a new edition of a work that has already proved a great success. It is first of all practical; the instructions are plain and full. Numerous illustrations make every step clear. The actual specimens of materials show precisely what the fly-tyer requires.

BOOK OF THE GAME LAWS:

A COMPENDIUM OF THE LAWS RELATING TO GAME AND GAME FISH. REVISED

TO DATE, AND EDITED BY
CHARLES B. REYNOLDS, OF
THE FOREST AND STREAM.

The scope of the work embraces all the laws relating to game and game fish of every State and Territory in the Union and the British Provinces. The better to insure accuracy, all the important sections are given in their full text, as they appear on the statute books. Errors which might arise from abstracting or paraphrasing are thus avoided. The preparation of the work has involved an examination of more than 800 distinct original and amendatory acts, scattered through multitudinous volumes of the compiled statutes and session laws of the fifty-nine States, Territories and Provinces here represented. The labor of compilation has been largely increased by the often careless and sometimes seemingly contradictory nature of the legislation. The BOOK OF THE GAME LAWS is the result of a painstaking and conscientious endeavor to furnish an accurate and reliable compendium. Price 50 cents. For sale by

ALEWIVES IN LAKE ONTARIO.

PROF. CHAS. S. DOLLEY, of the University of Pennsylvania, who is at the head of the Marine Biological Laboratory, Sea Isle City, N. J., to which we referred in our issue of Aug. 20, has expressed the opinion that the excessive mortality among alewives in Lake Ontario, is probably due to their habit of abstaining from food during the spawning season, combined with the long journey from the sea against the current of the St. Lawrence. This involves the assumption that the alewives migrate annually through the whole course of the St. Lawrence river—an assumption which lacks satisfactory proof. Through correspondence with Mr. J. F. Whiteaves of Montreal, and the late Prof. J. W. Dawson, who wrote from Little Metis, Quebec, we learned that the alewife is rarely found in the lower river, and Prof. Whiteaves stated that he had never seen living or recently caught specimens from the Province of Quebec. Even at Metis the fish appeared only as stragglers and very rarely. Prof. Dawson also had never heard of the occurrence of the alewife at Montreal. This correspondence was received long after the first appearance of the alewife in Lake Ontario. The alewives disappear from their usual haunts in Lake Ontario in the fall, it is true, but it is believed by many persons that they go into the deeper water of the lake. The small size of these alewives would strengthen the theory that they are permanently landlocked, few of the individuals reported and examined by us exceeding 8 or 9 inches in length. In Cayuga and Seneca lakes, New York, the alewife has made its way naturally, and is now landlocked and dwarfed in size. Great mortality occurs among them in both of these lakes. We do not state positively that the alewife does not ascend the St. Lawrence from the sea, but merely say that the evidence so far received is opposed to such a theory. It seems to us more likely

that the rapid and alarming decrease of lake trout, pike, muscalonge and other predaceous fishes, which feed upon the alewife and similar helpless species, will better explain the comparatively sudden and enormous increase in the number of alewives.

CREEDMOOR, 1891.

THE annual meeting of the National Rifle Association just closed was not one of the popular gatherings which in past years made the fall meetings on the Long Island range such notable occasions. There was a good list of matches with most meagre prize list, yet fully as much as the Association officers feel warranted in offering. There were enough enthusiastic riflemen present to make it no easy task to get into the winning line, and the scores run high enough to show that those who shot were riflemen of no mean caliber. None of the matches went begging entirely, though all along the column it would have been more encouraging had large fields of contestants appeared.

Not a single protest was entered at any stage of the meeting, and this most telling indorsement of good management deserves to count in favor of the directors who had the meeting in charge.

There was only one incident of the meeting which one might wish erased from the record. This misfortune was the seeming inability of the Washington team to take defeat gracefully. That the visitors from the National Capital were beaten clearly and distinctly upon their merits, and that the New Yorkers won the Hilton and Inter-State matches by sheer ability as shots admits of no possible doubt.

The matches were conducted entirely according to the programme, and every possible chance was accorded the men from the South to carry back the honors of victory with them. They did not do so simply because they were "not in it" as shooters with the New Yorkers. They came to the range in anything but good form. The campaign of the preceding few days at the New Jersey range of Sea Girt had used them up in a shooting sense to such an extent that close observers as early as Tuesday were positive in their opinion that the New Yorkers would win the important team matches. The visitors shot vigorously during the several matches, but did not display any great winning powers.

On the range they made loud complaint that the New York State team were using special arms. There was no secret about this. For years these barrels have been in the hands of the better shots of the New York State Guard. In fact the Iliion armory makes no other at present. They have a quick twist and consequently require a harder bullet, enabling a higher initial velocity, with a larger charge of powder. The arm has been authorized by the State authorities and so comes within the regulation; and as for ammunition, there was no requirement of factory-loaded ammunition to be used in the match shoot. All these facts were within reach of the Washington men, also the fact that there is a special Springfield arm of the 6-groove variety which they might have used if they did not. On this point we are not informed, but will be surprised to learn that they did not use the officers' Springfield arm. As for the ammunition, if the team used the Frankford Arsenal output, they had very good stock, much better than the usual grade of factory-filled loads. If now they lay the blame on the ammunition, it only goes to show that there was neglect to have special loads ready for so important a match. The New York State loading was done in the regimental armories, the bullets seated as usual, and the ammunition shipped to Creedmoor and knocked about the range. If not crimped up to the machine-loaded cartridges from the official U. S. arsenal, they were crimped entirely within the requirement as to seating of bullet and transportability. Finally the growl of irritation over defeat comes down to abuse of the poor markers in the pits, who like drowned rats in a hole were not having a very pleasant time of it. They did, however, raise the colored disks enough for the score to be properly kept, and they did mark the shot holes. With glasses noting each shot, the team men did not depend upon the pit marker, so whether he was quick or slow in his movements did not affect the matter at all. If there was an error in the scores the time for correction was at once, before another shot was fired. If no such protest was made and proved, it comes with bad grace to criticise the scores now.

When a team or any contestant goes into a test of ability or strength with a proper spirit, a victory should be greeted with modesty and defeat accepted without complaint. Without this spirit it is better to remain out of competition. Particularly in a military match should this spirit of fair play prevail, and it is specially unfortunate that the Washington men do not show it at this time. They were out of trim somewhat themselves, and below their usual form as excellent marksmen. They met a team particularly strong with such a large contingent of the now victorious Twenty-third shooters in its make-up. To sulk now and talk about refusing future competition is nonsense. The National Rifle Association is still the leading organization of the country, and it should be the proud aim of every local organization to keep it so.

We have no doubt the officers of the N. R. A. would prefer to see visiting teams go away as victors, however much they might strive as New York Guardsmen to keep the honors here. The very fact that New York State can and does put such strong teams in the field ought to make other marksmen anxious to come here and try conclusions, and when a team talks of cutting Creedmoor from its visiting list it simply crawls into a very small burrow and pulls the hole in after it.

GAME PROTECTOR POND.

WHEN the New York Fish Commissioners last October removed Chief Game and Fish Protector Drew, and put into his place Maj. J. Warren Pond, there was a great hue and cry by many well intentioned people who affected to believe—and they may have been honest enough about it—that the cause of fish and game protection in this State had been thrown to the dogs. Inquiry into the reasons for the change convinced us that the Commissioners' action was a wise one, and we expressed the belief that time would demonstrate the wisdom of the step.

Our prediction has already been amply fulfilled. During the first year of service, which will close with the current month, Major Pond has made an excellent record. The year is shown by the records to have been the best in the history of the service with respect to enforcement of the laws, arrests of offenders, successful prosecution of suits, and the amount of fines collected. The work of the entire year is reflected in the record of the last three months—June, July and August—during which period there have been 115 arrests, 51 convictions, \$1,685 collected as fines, and 137 illegal nets destroyed.

The Commissioners report that Maj. Pond has shown himself to be an intelligent, conscientious, vigilant and hard-working official; and under his direction the efficiency of the entire force has been greatly improved.

In one respect it is true Maj. Pond has failed to make a record; that is as a blusterer. He has refrained from beating the bass-drum and blowing the sax-horn. There are good folks who gauge a public officer as they do a calliope, by the concussion produced on the tympanums of their ears. By such people, doubtless, had the protector done less work and made more noise, he would have been esteemed more highly; but the interests of fish and game protection in this State would not have been in the promising condition of to-day.

SNAP SHOTS.

The netters of the St. Lawrence River are having a thorny time. Reports of seizure and destruction of nets set illegally are coming to be almost weekly items of news. The State Game and Fish Protector of the district is ably seconded by the Anglers' Association of the St. Lawrence River, a society well deserving the support of summer visitors to that region.

Capt. Anderson, Superintendent of the Yellowstone National Park, has sent in to the Secretary of the Interior his annual report, stating that very few fires have been started in the reservation during the past year, and these were extinguished before serious damage had been done. Game and fish are reported manifestly to be on the increase.

ANY subscriber may supply a friend with a copy of the current issue of the FOREST AND STREAM by sending us on a postal card the name of that friend.

THE early bird catches the worm; but the man who shoots prairie chickens before the law is up sometimes comes to grief.

The Sportsman Tourist.

AT DAWN.

I STAND alone ere yet the sun has risen,
Within the circle of fair Bedford's park;
The many buildings, sombre as a prison,
Loom through the shadows silent still, and dark.
A single star above the western mountain,
A glittering jewel from the crown of night,
Gleams through the foliage, upon the fountain,
Whose waters sparkle to its silver light.
A soft haze fills the valley, like a veil
To shroud the lustre of the coming morn;
And faint and mellowed, from the southward trail,
A distant clarion, sounds the house-wife's horn.

The robin, earliest of the caroling throng,
Rings out, from swaying maple's lofty crest,
To list'ning mate, his flute-like matin song;
The orchard oriole twitters in its nest;
From yonder deep ravine where hickories grow,
Is heard the gray squirrels' chattering bark;
And the deep murmur of the streamlet's flow
Breathes lulling music, faintly, through the dark.
The small brown hackey from his snug retreat
Beneath the old oak's roots, peers softly out,
And soon are heard his swiftly pattering feet,
And the quick splash of leaping, frightened trout.

From the rich meadows now the risen kine
Begin to low: the frogs sing loud and clear;
The watchman's dog comes close with cringe and whine,
And cheerily crows the distant chanticleer.
A rosy flush lights up the eastern sky;
The bright star fades within the arching dome;
The shadows of the night dissolve and fly:
On noiseless wing the night-hawk seeks his home.
And soon beyond the eastern mountain's side,
Where still the shadows faintly strive to linger,
Up the dark pine the bright sun seems to glide,
Like jewel drawn slowly from an Ethiop's finger.

And as I meditate alone, and far
From those around whose lives my heart-strings twine,
It seems that darkness, shadows, sun and star,
The fast dissolving night, the morn, serene, divine,
Are emblems of that fateful, mighty day
When earthly shadows, doubts, despair,
Shall like this morning's mist be swept away
By the sweet zephyrs of the heavenly air;
When clothed in radiant white, his trump in hand,
Whose golden tones shall sound o'er land and sea,
The Messenger of God by the great Throne shall stand;
Earth's night forever lost in Heaven's eternity.

BEDFORD SPRINGS, July 17.

P.

NO-MAN'S LAND AND BEYOND.

A MAN who has business to do in a live Western town cannot go on a long hunt often; but one November, not long ago, when the nights were getting cold and the geese were flying south, I could withstand the migratory instinct no longer, and made preparations for a trip, into the Neutral Strip for sure, and further if we should not find good hunting.

To go on a long excursion into a region where you can get no food nor horse feed for a month at a time requires some preparation, if you wish to go in comfort. I first fired old man Price (an old buffalo hunter) with enthusiasm and got him to go with me with his wagon and mule team, on condition that I should buy all the supplies and give him \$10 in addition. He promised to go where I wanted to and stay as long as I pleased. I invited two young men, Hanny and Noah, to go, each to bear a third of the expenses for food and horse feed. So we loaded up and pulled for the south from Cimarron, Kan., where I usually live. Hanny and I were in my heavy buggy with my two hunting horses, Price and Noah in the baggage wagon, loaded up to the bows. I had loaded grain and food into both wagons until the boys declared that I intended to stay away a year; and then put in some more on my own account. Tent and camp stove, lantern, blankets and guns completed the outfit. Nov. 15 we rolled away to the south, with Nigger, my black greyhound, curled up at my feet. He was three years old, half stag, half greyhound, and as fast and good a dog as I ever owned. I had my rifle and also my 10-bore shotgun. The other boys didn't want to kill anything smaller than an antelope, and so took only their rifles. I had also a bad cough which I expected to freeze out on the road.

Starting at noon, we reached a small town named Montezuma by dark, twenty-three miles south. The next day a drive of thirty-five miles landed us at West Plains. The next night we struck Fargo Springs, a town on the Cimarron River, and then we cut loose from towns and started southwest for Dudley's ranch on the Beaver. We drove all day through a desolate country that was at that time still infested by the claim holder, whose dugout appeared at intervals. Toward dark we took possession of a vacant claim house that had a good well and a big stable. There was a stove in the house and we soon had supper. There was no table, and just as we sat down to eat, with the plates on a wagon sheet spread on the floor, in walked a man with a scowl and a big six-shooter buckled on.

"What are you doing here?"

"Eating supper, won't you have some?"

"No, I ain't hungry. What are you doing in this house?"

"Is it yours?"

"No, but I am living about a mile from here and looking out for it."

We finally mollified him and he ate more than any two of us. After he had filled up I asked him if he liked apples.

"Do you mean canned apples, or real honest-to-God apples?"

"I mean green apples."

"You bet!"

I produced the apples, and after remarking that he had not seen any for two years he ate a few, and I made him fill his pockets for his children. He told us to stop when we came back, and said that he was paid for watching the place, but that he knew no one could do any damage

unless they stole the well, but that he had to make a talk for his money.

At daybreak we started, and I decided to strike the Beaver at a three-house town named Optima, as a man named Carter lived there whom I knew well, and I hoped to get information from him in regard to game. About noon we came to two frame houses and a store. This town was in Kansas, on the Neutral Strip line, and the store keeper informed us that we were in the city of Lafayette. He then tried to sell me a corner lot in town, and offered me a block cheap. He had a beautiful map of Lafayette as it would be, with lots reserved for churches, opera house and town hall. He offered me three lots between his store and the opera house for \$325, one-third cash, the balance in six and twelve months. The store was erected and was 12x16. The land was there ready to put the opera house on. It must require a vivid imagination, great faith and some gall to live in such a town and try to sell lots. We got some water at Lafayette and promised to call if we came back that way.

We drove to Pony Creek by dark and camped; had the tent up and everything in good shape inside of fifteen minutes and sat down to a good supper. At daybreak we saw a band of about twenty antelope, and decided to camp a day and try them. The antelope were about two miles away on level prairie feeding. They seemed to be uneasy and watchful and would move around. I tried crawling up to them on two sides, and could not get within a half-mile of them, and finally went back to camp to get something to eat and try another plan. I left Harry in a buffalo wallow as near them as I could get him, with strict injunctions not to move or shoot unless they came within 125 yds. After a cup of coffee I took my gentlest pony, and put on a bridle without the reins, which I put in my pocket. I tied my wooden cleaning-rod to the bit at one end, and took the other end in my hand. I could thus make him walk along with his head up, and I walked in a stooping position on his off side, so as to keep him between me and the antelope. When I found a buffalo wallow I could lie down out of sight of the game and rest a little, for it was very tiring to walk in a stooping position and keep the pony in just the right place. I would tack up a little closer by going diagonally the other way. The wind was from the south. Harry told me afterward that the pony and I looked precisely like a six-legged horse.

I had got within 300 yds., when spang! came a bullet whistling past me; and my horse twitched the rod from my hand and ran to camp. I dropped down, so as to take less chances of getting hit by Harry, and shot three or four times at an old buck that led the gang as they ran toward the south. At the last shot he crumpled up and went down in a heap; and the rest ran over a knoll and disappeared. Harry had one with his hip broken, and in five minutes here came Price and Noah in my buggy, the mules at a dead run, with Price whipping and Noah holding the dog to prevent him jumping out too quick. They drove within 300 yds. of the wounded antelope: Nig jumped up and landed on his head, rolled over and went to work. After a run of half a mile Nig caught him and had him killed before the mules and men got there. I had hit my buck right behind the eye; I meant to hit him in the body, but shooting at a running mark at 300 or 400 yds. one does well to hit it anywhere. Well, we had fried liver and bacon for supper. Every one seemed satisfied, and Noah and Harry made a calculation that if we killed two antelope a day for twenty days, we should have to pull over to the railroad in Texas and ship a ton or so of venison to Kansas City. Mr. Price grunted like an Indian and smoked vigorously, but made no remarks; and we went to bed at 10 o'clock, after several games of seven-up, and slept the sleep of the just. My cough showed no signs of weakening, and Noah made a rude remark to me when I got up in the night to take some medicine, just because I stepped on his foot; but we forgave each other in the morning. Nig was prospecting around in the night away from camp and something ran him into camp just before we went to bed. He seemed scared and stayed in the tent the rest of the night. It was a wolf probably. Big wolves are rather savage and don't fear one dog much. Coyotes are cowards and will run from a dog night or day.

We noticed a big prairie fire north of us in the afternoon, but it was twenty miles away and the wind came from the south, so we did not pay much attention to it when we went to bed; but the wind changed to the north in the night, and when we got up we could smell the smoke and the fire was coming toward us. There was no danger, for we were camped in short grass and could have set another fire and then gone on the burnt ground long before the fire could possibly reach us; but it was easier to hitch up and pull out on the road. We crossed Pony Creek and had not gone far when we saw a band of about 20 mustangs feeding a mile away from the road. They soon saw us and ran to the top of a knoll, with heads up and manes and tails floating in the breeze. They looked as if they were worth \$200 apiece. Mustangs are deceiving things. Get those same ponies in a corral and almost every one is poorly built and scrubby, all the stallions scared up by fighting and the mares cat-hammed, with their manes and tails full of burs. The band finally ran off west and the last we saw of them they were still going.

We came across nothing of interest from there to Optima, except a jack rabbit chase in which Nig carried off the honors and the rabbit too. It was on a level plain and the rabbit ran in a half circle around the wagons. Nig "wrenched" three times and then picked the game up, and never let go till he killed him and fetched him up to the wagon. Harry cut off the ears and put them on his hat, and I think I threw them and his pipe away twenty times during the next month. I found them in the bread box, in our bed, in my cartridge sack. He always seemed to select a place for those cursed ears where hair would get into the grub. And I can almost smell that old briarwood pipe yet.

We landed at the city of Optima, on the Beaver, during the afternoon. It is, or was, in the Beaver Valley, seventy miles west of Beaver City, for which see a good map of Indian Territory. It consisted of two sod stores and two sod houses. The stores did not keep much of anything. Since then they have been run as saloons and I have heard of some interesting fights that the Neutral Strippers and others have had there.

John Carter kept one store, and we camped near and visited with him that night. He did not know much about the game south or west of Optima, but gave me a

good deal of indefinite direction, and I decided to go west about 80 miles to Company M water holes for buffalo. We heard of two hunters that had come down Beaver two days before loaded with buffalo meat and three hides. We reasoned that we stood a chance to find buffalo if they had, and started next morning late.

We saw two heavy teams and four men pass about two hours before we started, and I learned at the store in Optima a few minutes before starting that they were hunters from Springfield, Kansas, and that they said they were going to Company M. So we hitched up and pulled fast to overtake them. We made about 25 miles that day and got to the other hunters' camp that evening and camped with them. We soon became acquainted and passed a pleasant evening. They were well armed with both rifles and shotguns, had several greyhounds, and seemed to be good fellows. They seemed to be disinclined to tell where they were going, and I suppose that they thought the same of us; but to tell the truth, we didn't know and didn't care much. We camped side by side and all ate supper together. One of their number made night hideouts with an old battered French horn. I thought he was an awful fool and was "no good" for a hunter; but he afterward proved to be a nice fellow and a first-class hunter.

We all pulled out at daybreak and drove past Dudley's ranch and had a splendid jack rabbit chase a few miles further on. My dog beat theirs out and out and caught both rabbits.

We got to Lee Harlan's ranch about 3 P. M., and I drove up to the house to ask permission to camp inside his fence so we might turn our horses loose. There was no one at the house and no dogs around. Nig, who went with me, ate a piece of poisoned meat and died in fifteen minutes in spite of all I could do. I almost cried.

The Mexican ranch keeper just then returned, and gave us permission to camp inside the fence. Lee Harlan and his partner came in that night with an outfit of four fine horses, a wagon and three water barrels, camp kit, saddles, field glass and guns. They had been out seven days and had not seen a buffalo.

They had a ranch full of meat, hides and heads, however, that they had killed in the last month. Harlan knew who I was and gave me all the information he could. The men that came down the creek with meat had bought it off him at 9 cents per pound; hides \$6 each, raw hides of course. Buffalo were scarce and wild. There was but little water in the county and he made a practice of filling his barrels and going into a big waterless scope of country south of the Beaver and southwest from his ranch, making a camp, saddling his fast, strong horses and riding the country for miles around. When they found buffalo they ran up to them and killed what they could before their horses ran down; and then one watched the carcasses, while the other moved camp up to the carcasses; and they cut them up next day. They saved meat, hides and heads. A good cow or bull netted them about \$40.

Price and I held a council and decided that, as we had only my horses that were fit to ride, but one saddle (mine), and no water barrels, we had better not try for buffalo. We concluded to pull south for Palo Duro Creek in Texas, hunting on the way, and then decide where to go from there.

It was snowing when we woke up next morning, and we did not move that day. We all hunted on foot in the afternoon, all but Price, who lay and grumbled when he was strong enough. I saw some antelope and managed to kill a small doe after a long crawl that wore the skin pretty thin on my knees; and then went to camp, took the buggy and brought the meat in by dark. W. J. D.

[TO BE CONCLUDED.]

A RECEPTION TO MR. HALLOCK.

IT was a notable tribute which was given by the sportsmen and city officials of Northampton, Mass., on Sept. 5, to the life-work of Mr. Charles Hallock, the founder of FOREST AND STREAM, and the author of at least a dozen sporting books and kindred publications, in which we feel to share, as it were, by a sort of reflected light. Plates were laid for thirty at Barr's popular café, and sea food in great variety was served. An immense salmon stretched its full length across the head of the table, at which Dr. Fay presided, and all along the vista which extended to the lower end, legends were displayed in guide-board fashion among the oysters and soft-shell crabs and bouquets of celery, setting forth some incident of the author's work. "Fishing Tourist" and "Salmon Fisher" were conspicuous. Satin souvenirs, embellished with an appropriate vignette of fish, game and sporting equipments, and inscribed with a list of titles of the author's books, were laid before each guest. The Mayor and chief city officials, and the representative professional and chief business men of Northampton were present, all of them interested or identified with various lines of *al fresco* sport. Mr. Hallock gave them a cursory review of sport and sporting literature during the past twenty years, showing how a taste for these things had developed until the climax had now apparently been reached; deprecating the absorption of extensive areas by a few favored persons of wealth to the exclusion of the old habitués of the streams and woods; and alluding very pointedly to the rivalry which fifteen years ago had divided sentiment on the subject of game protection and conservation of species until the result was a heterogeneous and unintelligible code of laws with little game to hunt or preserve; so that as a matter of feral economy we were not now a whit in advance of 1876, with a good deal of irreparable mischief done in the interval. An informal chat and pipes followed this address, and the party broke up at 11 o'clock after three hours of solid enjoyment. The whole menu and entertainment was happily conceived and put in motion by Mr. Coll H. Gere, editor of the Hampshire Gazette, assisted by Mr. Harris, chief of the Gazette Publishing Company. The Gazette is a journal which has been running considerably more than a century without once getting out of gear, having been transmitted through three generations of that name.

The Pine Tree Club of Northampton is one of the oldest in New England, having a life-history of more than a quarter of a century. Chief of Police Maynard is its president. It is the nucleus of sport in Hampshire county. It has a trout preserve of the most suitable water and environment, and is likely to attain a high degree of success in trout culture under the best approved methods which it employs.

THE BIG BUCK WE DIDN'T SHOOT.

In June, 1886, it was my privilege to recount to your readers the story of the big buck that we killed in Carberry Swamp. In my journal for April, 1890, I find an additional chapter with the above heading. I must request that the drawing herewith be received as an historical document compiled from the latest and best authorities and therefore quite the most reliable extant representation of the creature.—ERNEST E. THOMPSON.

WE all know him well; his existence is established now as surely as that of the sea serpent or the big fish that got off the hook. Even better, for many of us have seen him in broad daylight and had a fair open view of his noble form. And what a creature he is, what a paragon of size and development. One observer that had an exceptionally good look at him, counted twenty-seven times on each antler, and such antlers! sculptured bronze with gleaming ivory points, absolutely symmetrical and perfect, in every way befitting his immense stature and noble beauty. I am sure it cannot be that he shed them above once in twenty years, if at all. Another equally reliable historian asserts that this Woodland Kraken has three antlers, the third a spike in the center. So far all is abundantly attested, but I must say that I place but little faith in that story of a chaplet of pearls about his brow; it was simply the knotted bead-like antler-burrs, white and polished, and glistening perhaps with the morning dew; while the crucifix in the middle, that has been reported, is nothing more than the spikehorn above referred to.

I expect to learn some day that he casts no shadow, for this I certainly know, that oftentimes he leaves no track behind him in the snow. His speed, too, is marvelous, it is as the wind; he seems—nay, he actually is ubiquitous. Why! I first met him in the woods of Ontario, then shortly afterward I encountered his scornful gaze amid the sandhills of Manitoba. I have heard for certain of his having been seen in the canebrakes of Kentucky and amid the valleys of California. Even in England he was well known till quite lately and bore the name of "The White Hart Royal," and in Scotland he is still famous as "The Muckle Hart of Benmore." Nay, more than all this, Saint Hubert himself was blessed with a sight of the tri-cerate head in the forests of Germany, and he in fact is responsible for that story of the central crucifix. The great Münchhausen, too, has much to say about this noblest of deer, and what need have we of further witness?

But it matters little where he dwells, no human hand has ever touched his glossy coat; he seems endowed with a charmed life, no bullet cast of lead can ever reach him. Or course a ball of silver might; I have never tried that, and I do not remember that any Croesus ever went about riddling innumerable bushes with costly projectiles in hopes of securing the Great Stag. I doubt, too, that he would have succeeded, indeed I feel sure that no hunter armed with such infallible missiles will ever meet with St. Hubert's Hart. He is too sagacious to allow it, or, if he did, he would not long remain in sight, he would simply show himself and snort and stamp—I know it, for I have watched him—then fade away, like the Cat in Wonderland, the scornful gaze being the last thing to vanish into thin air. He leaves a good track for a little while, but this, too, fades away completely. Once I followed it for miles, but it disappeared at last in a thickly-grown bottomland, and no doubt the phantom buck himself had vanished at the self same place. An Indian who was hunting with me thought otherwise, and persisted in circling off in another direction, so that we parted, but he was a fool, and when after two or three hours he came again to camp, bringing with him an ordinary buck, I could not but smile to see how completely he had been baffled.

It has never been decided even of what species he is, some testimony points one way and some in another, for my own part I do not believe that he is a species at all, but a genus—genus *Cervus*, nothing more. One recent writer, however, claims that he was an elk, and was known for long in Pennsylvania as "The Lone Elk of the Sinnemahoning," in which valley he was killed in 1867. But that, of course, is all nonsense. No, no! I know too much about him to believe any such tale, you cannot wreck the Flying Dutchman, he still will sail under great billowy clouds of canvas, till the last trump blows and the Kraken lashes all the sea to foam, and belly upward floats to show the end he's come.

No, no! Still he roams and bounds from hill to hill as I have seen and yet may see again. Yea, even now do see in fancy's eye along my glistening rifle barrel—again I see that glorious head against the sky, as often I did—more often in early days than now, for he appears most often to the tyro in the woods—see him give one great bound when cracks the ready rifle, and know from the miraculous way in which the unerring ball was turned

aside that this was indeed the Mighty Stag again, the Spirit of the Race, and that no bullet cast of lead can ever graze his hide—and again he fades away.

Long may he roam and spurn the hilltops with his flying feet and dash the dew drops from the highest pine tops as he clears the valley at a bound; long may he live and tempt a perfect hail of harmless lead. But the rattle of repeaters is heard in every valley now; the wise are more and more often propounding that unfathomable riddle, "Where have all the deer gone?" And when at last the sole remainder of the common race is slain, I know too well that this the immortal, too, will die; that though he never can be touched by death he yet will perish, perish like the last surviving Cambrian bard, not by the hand of man, but by a strange engulfment so complete that not a trace of him will e'er be found again, and but a fading memory of his ever having been. E. E. T.

HER FIRST BEAR HUNT.

IN consequence of the partial failure of the berry crop in our mountains, the bears have lately grown bold

"THE BIG BUCK."

and aggressive, coming down out of the mountains into the settlements in search of food, and considerable trouble has already been given the settlers, while several of the black poachers have lost their jackets.

My daughter, Mrs. Geo. E. Wright, who lives in a somewhat isolated place separated from the Colville Valley by an intervening mountain, and whose nearest neighbor lives one and a half miles distant, was on the evening of Aug. 26 startled by the direful squeals of one of her husband's hogs in the pasture about half a mile from the house.

She was alone with her two little children (one an infant in arms), save for the presence of her little brother of twelve years, and the sun had already set, while the moonlight was darkening rapidly. Taking her absent husband's .40cal. Marlin repeater, and accompanied by her little brother, she hurried down into the pasture, leaving her two babies at the house.

Arrived at the edge of a thicket, she could still hear the dying cries of the unfortunate porker, together with the trampling of the bear in the dense bushes; but the darkness had already grown so deep that in the gloom of the thicket nothing could be distinguished.

Discharging the rifle into the thicket, she endeavored to tempt the robber into the open, but without success; and she finally, and very wisely, concluded to return to the house, leaving bruin alone with his prey.

With the first light of morning she returned alone and surprised the villain at his breakfast. Jumping up, he ran rapidly into the open about 40yds. distant from her, when he stopped, and turning round sat up facing her to get a fairer view of the brave little huntress. The mark was fair, her nerves were steady, and aiming at the butt of his ear (his head was turned slightly sideways) she took a fair off-hand shot and fired. He tumbled at the crack of the rifle, a lifeless heap.

For fear that he might be "possuming," she continued to "pump" bullets into him until five holes were punctured in his black overcoat.

He proved to be a beautiful specimen of about 300lbs. weight, with a splendid coat of jet black hair, except that on the top of his nose, which was yellowish brown in color,

Is not the little lady a true chip of the old block? And may not the proud old block record it? ORIN BELKNAP.

AN ISLAND OF THE PACIFIC.

NOWHERE in the United States can there be found a section of the country better adapted to all kinds of outdoor sport than in southern California, and not the least enjoyable, and destined to be one of the most popular of all recreations, is yachting in the southern waters, Santa Barbara to San Diego. In the land of almost perpetual sunshine outdoor life seems a necessity. Constant and steady winds, and no fear of squalls, together with the many accessible points of interest along shore and the many islands off shore, tempt the amateur sailor to make midsummer cruises in smaller boats with more canvas than would be safe to use on the Atlantic coast.

Last month four professional men of San Diego, all fond of this fascinating pastime, set sail for Santa Catalina Island, 27 miles off the coast of Los Angeles county. The boat, to be our home for a fortnight, was a 24ft. sloop-rigged centerboard yacht, large enough abeam to have a cabin for sleeping accommodations. The Daphne was built for safety and comfort as well as speed. Leaving San Diego Bay, passing the bold promontory of Point Loma that guards the harbor, a course was laid for Santa Catalina Island, 71 miles northwest. After two days' beating against a westerly wind, Santa Catalina loomed up about 30 miles dead ahead, looking like a faint white cloud high above the horizon; on our beam appeared another cloud, which gradually outlined itself into San Clement's Island, where the now famous Itata is supposed to have taken arms and munitions of war from an American schooner, for the use of the Chilean insurgents. These islands rise from the sea as if peaks of immense submerged mountains. The highest of the many peaks of Santa Catalina is over 2,000ft. above sea level.

Next morning our anchor was dropped in the little bay of Avalon, a small settlement of tents and cottages which dot the sides of the steep hills encircling the tiny harbor of the island. Boom! sounded the Daphne's salute, fired from a heavily-charged shotgun, that awoke the echoes among the surrounding cliffs like the report of a ten-pounder. Our yacht looked small, indeed, alongside the larger yachts that enlivened the scene. And when our two-hundred-pound captain crawled out on the bowsprit to furl the jibs the motion of the boat caused thereby compelled the Judge in the cockpit to overrule the motion instanter. The crew went ashore attired in the only clothes aboard—old ones, protected by pugarees, improvised from handkerchiefs sewed to our hats, and armed with the omnipresent picture-box.

The island is about 22 miles long, about 4 miles in width and extremely rocky, although one may anchor within 20yds. from shore.

The fishing season had opened and the king of the Pacific, the jewfish, was biting freely; sea bass were caught from the wharf. The difference between these fish appears to be one of size only. A photograph of the largest jewfish taken shows it to be 6ft. 4in. in length and tipping the beam at 350lbs.

Many years ago, when Santa Catalina Island was a part of Mexican territory, the Government stocked it with goats for the use of mariners. These animals have increased in number and have lost every trace of domesticity. Hunting wild goats here is rare sport if the hunter be a fair shot and willing to endure the fatigue of a day's tramp over the sugar-loaf peaks of the island. Nothing smaller than a .45 60 rifle is used and one seldom has a shot closer than 200yds.

The ground is almost entirely destitute of vegetation, except in the cañons, where cacti of every variety and thick undergrowth offer shelter for innumerable quail. Here and there a rattler gave us friendly warning of his presence. The few pleasant days were spent cruising around the island, watching the noisy seals and the timid flying fish pursued by its natural enemy the shark, or putting in at the many inviting coves to sleep ashore beneath the stars in this wonderfully dry climate, and the time seemed only too short. Can you imagine a more delectable existence than such life on an island in the blue Pacific? The slight traces of civilization compared with the handiwork of nature here seem like scratches on the side of a mountain, and when the *dolce far niente* life aboard a tight little craft with congenial companions to relieve the monotony of solitude, cares seem light as sea-foam, to be wafted away by the slightest breeze.

The run back to San Diego was made with a free sheet in less than thirty hours. Returning, the troll lines were thrown out and the sport of catching the gamy albuquo, the Spanish mackerel and the toothsome barracuda, sea bass and yellow tails was enjoyed until dark. The

smallest albuquo taken weighed 25lbs., and altogether we hooked and landed 240lbs. of fish. The kelp off the lower coast of San Diego county seemed alive with members of the finny tribe.

Thus ended a most delightful outing of four busy men. Santa Catalina is one of the largest of the group of six islands standing above the level of the Pacific Ocean like patron saints of the southern California coast line. Their names recall the days of the Mexican occupancy of this State, Santa Cruz, Santa Rosa, Santa Catalina, San Nicholas, San Miguel and San Clemente. J. Z. T.
SAN DIEGO, Cal., August.

Natural History.

ENGLISH PHEASANTS IN AMERICA.

Editor *Forest and Stream*:

Having reared English pheasants during this summer on a sufficiently extensive scale to be able to form a fair opinion, I unhesitatingly assert that there are no more difficulties to be encountered in their management here than in Europe. I have now over 1,000 as fine young birds from 2 to 3 months old running about in my pens as one could wish to see, which have been reared with no more than the ordinary trouble and expense. I know that the winters here are not too severe for them, as I imported 300 birds last November which had no further protection than an open barn, in which only half the birds used to seek shelter. After all, it is but natural, as their original habitat is just under the snow line on the bleak mountain slopes that stretch across Asia. In fact, I believe they suffer far more from great heat than great cold.

My management of them in no wise differed from the way it is conducted in England, and the birds have prospered well in every respect. Pheasant poulters are certainly delicate for the first two months, but afterward are far more hardy than any fowl. The rearing was carried out under my supervision by men who had never seen a pheasant before, which proves my belief, that with a little general practical instruction, intelligence is far more necessary than experience. I have been most agreeably surprised to see how extremely well the late hatchings have come on, that is to say of eggs put down late in June.

I hope that this most splendid of all game birds will soon be common in our coverts, which a little time and patience will easily effect, for everything is suitable here for their installation. I have heard of efforts in that direction having been made formerly with a lavish expenditure of money and a minute outlay of common sense. Result, general dissatisfaction and despair. I was assured this time last year that the establishment of pheasants in America was a mere chimera. That when imported they would not be able to withstand the rigor of our winters; that when spring returned they would not lay; if they did lay, the eggs would not be fertile; and, finally, if these hatched the broods would quickly die off. I have effectually and conclusively proved the contrary in every particular.

Another remark I have frequently heard made is, that shooting at hand-raised pheasants is pretty much as exciting as potting at fowls in a farmyard. This is a great mistake, for it is impossible, even after generations of confinement, to eradicate the wild nature of the pheasant. With every week their innate desire for liberty grows stronger, till at two and a half months old they are fully as quick on the wing and as chary of intrusion as their wild-reared companions. I feel sure that it only requires the fact to be well known that pheasants can be as easily reared for shooting here as in the old country, to make every lover of sport eager to add them to the list of the natural game birds of his State. I shall be always happy to give all the information in my power to any inquirer.

VERNER DE GUISE.

MAHWAH, N. J.

CHEN ROSSII IN MONTANA.—In October, 1890, Mr. John Sinclair, of Great Falls, Montana, killed a specimen of this rare goose, which he preserved and still has. Mr. Sinclair was out shooting with some friends near Benton Lake, about 10 miles north of Great Falls, and saw seven of these little geese resting on the beach of the lake. He attempted to approach them but they rose before he had come near enough to shoot with any prospect of doing much execution. However, he fired at them with heavy shot and succeeded in knocking down one of the birds, which he secured.—GEORGE BIRD GRINNELL (Great Falls, Montana, Aug. 29).

HUNTING AND FISHING IN THE NORTHWEST.—Are you planning for an outing this summer? Have you ever looked up the famous resorts of the Northwest? It is not an exaggeration to say that the best hunting and fishing grounds in North America are found in the territory tributary to the Northern Pacific Railroad. The lake park region in Minnesota affords pickerel, pike, bass and muscalonge; rock bass are found in numerous streams, and deer, elk and bear abound in the forest regions; antelope are found in North Dakota. The Snowy, Bitter Root, Grazy, Rocky and Cascade Mountains are the home of moose, elk, caribou, cougars, Rocky Mountain sheep and goat and other large game, while all of the Northwestern States abound in feathered game. Rocky Mountain trout and grayling are caught in the Yellowstone, Gallatin, Madison, Jefferson, Clark's Fork and Green rivers, affording unrivaled sport. An interesting pamphlet, "Game Preserves of North America," can be obtained free on application to CHAS. S. FEE, G. P. & T. A. of the Northern Pacific R. R., at St. Paul, Minn. Descriptive publications concerning Yellowstone Park, Pacific coast and Alaska will also be mailed on receipt of application, referring to FOREST AND STREAM.—*Adv.*

SPORTSMEN ATTENTION!—If you want fine sport and plenty of feathered game, go to northern Iowa. The shooting is excellent and you cannot fail to enjoy the trip. Or if you desire to go a little further, the prairie and lake region of Minnesota is equally good for both fish and game, and the distance not much greater. Both are reached by the Chicago, St. Paul & Kansas City Railway, the leading line for sportsmen and tourists between Chicago and the Northwest, as well as the West and Southwest, and a favorite route with all who have traveled over it. Tourist tickets now on sale. For any further information call on or address F. H. LORD, General Passenger and Ticket Agent, Phenix Building, Chicago, Ill.—*Adv.*

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

TWO WEEKS OUT OF PURGATORY.—II.

FRIDAY, Nov. 7.—Ice water and a creosoted towel preceded a 6:30 o'clock breakfast. Having set a trap at the caribou relics, we went over west of ridge, then along on south side through an open grove of spruce planted in mossy ground and filled with wild sweet air. Rounding east end of the ridge, we came back on the north side to the boat. Walked only 10 miles, but were going pretty steadily from 8 A. M. to 4 P. M. Saw but one fresh track, which was on the north side of the hill. Shot a partridge, but the bullet carried with it everything but the feathers. Mac went to Beaver Bog, and on the way over, just beyond Maple Hill, they heard a deer, hidden by some fallen tops, slowly walk away from them. Later, while watching at the bog, a deer came out across the pond from Will, who, having no rifle, fired two shots with a revolver and snapped it seven times before the animal decided to move on.

Saturday, Nov. 8.—By the time we were dressed rain began falling and it was decided to keep camp for the day. The rain, however, stopped by 11 o'clock and the guides went off to spot the caribou trail, returning in time for lunch. In the afternoon Mac went up the hill from the south side of Mud Pond, while I traveled over the southwest spur of Black Mountain. Both parties had the same luck and returned by half past four empty handed and empty stomachs. Had a chance to observe more closely the peculiar vices of the moose wood, which surpasses in pure cussedness every growth of the forest. The striped moose wood, a straight growing tree, has bark a little lighter in color than the mountain ash, with white streakings in it. But the moose wood shrub of commendable memory, has gray bark, resembling the moose maple. The wood is tough and flexible and the branches spread after the manner of a candelabra in a Jewish synagogue. Owing to its peculiar habit of growth a single shrub will cover more than its fair space of the footstool, and when they cluster thickly, as is usually the case on the top and upper slopes of hills, they administer a continual flogging to the face, hands and legs of the passer through. At this season of the year the full leaf buds of a reddish buckskin color point every twig and serve as snappers. In the economy of nature they seem to fulfill no better purpose than the mosquito and black fly, though perhaps the evil spirits of these little pests winter in the moose wood twig and so keep their cruel instincts alive all the year around. Still-hunting without a soft and quiet footway of snow is a constant tax on every energy and faculty, and in its practice several additional senses could be made use of, not to mention of direction, which a stranger in the Maine woods had better get the loan of if he attempts it without a guide. Beyond the physical labor of carrying a gun over miles of the roughest sort of side hill and swamp there is the added exertion of doing it all without noise. The walking must be on the toes, so far as possible, and every dry stick on the ground must be avoided by the feet, every snapping twig by the legs, and every dead branch by the head and body. Furthermore, the eyes must be always ranging the circle of the woods, and the ears kept alert for any unusual sound, and no time can be wasted in listening to the cracklings due to the wind or to the groanings and squeakings of interlocked trees. An odd sight at noon time when the wind was strongest was the heaving of the forest floor. The spruces and balsams appear to have shallow, wide-spreading roots, and when the trees rock the mossy earth about them rises and falls like low rolling waves.

Sunday, Nov. 9.—Just after daylight the eastern half of the clouded sky showed broad bands of deep rose color, and the top of the hill at the north shone in red-dish illumination, a mixture of golden sunlight and rosy cloud reflection laid thick upon the cedar green of the spruces. At 7 o'clock the sky was still overcast and the west wind brought with it a snowy feeling. The temperature must have been about 28° Fabr., but a mendacious toy thermometer registered over 30°. At 8:30 I started for Black Mountain, while Mac took the buckboard road toward Seven Pond. When we got in the woods the rain and sleet began falling, the wind had stopped, and the flat, frozen leaves made such noisy traveling that we returned to camp. That enemy of every moving thing, the moose wood, was peculiarly discomfiting, and the twigs, snapping against cold ears and fingers, stung as sharp and deep, but luckily not so lastingly, as a guilty conscience. Bundled up with jackets and rubber coats we went out on the pond. The rain froze on the rubber coats, and every motion scurfed off little scales of white ice, giving us the appearance of leprous Hottentots. While exercising it was delicious to breathe the tonic air, but later sitting still in the boat, a minim of alcohol would have been more welcome than the whole valley full of tonic air. By 11 o'clock we were back in camp and guessing how much longer the rest of the party would forego obtainable warmth and comfort. While on the pond it was pleasant to hear the small waves breaking up the edging ice with a metallic swish, and the miniature hailstones which, falling in the water, copied the quiet gurgle of a summer brook.

Now, at noon the wind is blowing gusty and hard, driving the sleet at a thin angle with the earth and rapidly weight to mail-covered hut roofs, trees and everything exposed. Later the sleet changed more into fine hail which, impelled by the still rising wind, cut the face like little splinters of broken glass. By 2 o'clock the weather moderated, and the downfall changed back to sleet and then to driving rain. An hour later Mack returned, having gone south from the one-mile tree and crossed back of Maple Hill. They followed what was called by courtesy an old buckboard road, but a hard experience proved it to be lengthened hagus, long drawn out. The barricaded streets of Paris, during the Commune, were still the streets of Paris, so was this a buckboard road. From the Seven Pond road to the swamp is said to be 14 marine miles, this unit of distance is defined by the natives as being what a well-fed hound will cover before starving to death. From the swamp they came over Maple Hill, stopping for lunch in a grove of mammoth cedars and then followed the Beaver Bog trail to Tim Pond. The boat having blown down the shore Mac

shivered on the bank for half an hour till Will fetched it to him, and then they both rowed, or rather drifted, to camp through a dangerously high sea. After a final drenching as the skiff beached broadside they got to the drying cabin fire. As Mac appeared in the doorway, with slushy leather coat, wet leggings and ice-covered gun, he was the picture of water-soaked happiness. His red face was wreathed in smiles and around the smiles was a brown halo of knitted worsted, the back of the halo being drawn down over the tops of baby-pink ears.

Monday, Nov. 10.—By 8 o'clock I had started on the spotted line for Beaver Bog. The day was clear and cool and the leaves, wet with yesterday's rain, were frozen into a thin, icy flooring that put still-hunting out of the question. As we neared the bog the hard wood disappeared, and in place of leaves the ground was carpeted with soft moss, overlaid in spots with the delicate evergreen vine of the snow berry (so G. called it), and the rabbit paths, holding frozen slush, showed white lines running in every direction. The forests consisted of small black spruces, with an occasional white one, draped with the hanging moss on which the caribou feed. In the open places the sunlight silvered this thready moss, and among the surrounding greens and grays were seen spots of rich red, the fruit of the mountain ash. The trail ends at a winding stream of dead water, a narrow pond three-quarters of a mile long, near the shore of which we found fresh caribou tracks that looked like horseshoe prints. In the neighborhood of Maple Hill we had also noticed a number of deer tracks made in the early morning. Just after reaching this lagoon and while watching on the shore a deer, hidden by the thick growth, appeared within a few rods, but, the wind blowing toward him, the only satisfaction I had was listening to three short whistles of alarm before he took his back track on the full run. Though the ice was too thin and rotten to tempt the caribou we decided to watch a little while, and went south a little distance along the bank and sat down on a hummock till we were saturated with the warm November sun. So comfortable was the couch among the brown-leaved brush and so quiet was the prospect that I soon knew slumber was sitting near waiting the chance to share my hummock. Perhaps the sun frightened him away.

After lunch we started back, waited and watched at Maple Hill without seeing anything, and reached camp before dark. Mac, who had got in at the same time, had spent the day on Black Mountain. All that he brought with him was one partridge and the memory of a mossy watch ground, squirrels and falling mountain brook. One squirrel in particular hugely pleased his fancy. The small bit of curiosity on the further end of the log bench, and sitting on his haunches with one tiny paw across his breast, made Mac an obeisance of welcome. Realizing that the hunter was after large game, and scenting the odor of benevolence that emanated from his neighbor, the squirrel proceeded with his study of human nature. Having filed his little brain with all the knowledge mere observation could compass, he turned to the lighter task of eating cone seed. But soon the distant call of the matured squirrel warned him that he had other and less congenial work to do; and so, with an unuttered sigh and an "All right, old lady; I'll be there in a minute," he grabbed some twigs for the winter house building and trotted off.

Tuesday, Nov. 11.—To-day was a rubricated one and Mac is now sitting before the fire almost hidden in a cloud of glory and well-fed content. The pond being but thinly frozen, the quartette started for the bog, via the buckboard road; and after a hard and rapid tramp reached Beaver Pond a little after ten o'clock. I turned to the right and having just sat down on an inviting hummock, was watching G. at a little distance extemporizing a bridge when both were agreeably startled by two rifle shots from the other end of the pond; a little interval and then three or more shots in close succession, followed soon by two more shots. Of course we decided to investigate, and hurrying toward Mac and Will found them standing beside a magnificent four pronged buck that lay convulsed and kicking on the margin of a narrow stream. A final shot in the neck stopped his pitiful struggles, which would have ended sooner had not the creature been of such uncommon size and strength. The eyes, as the life left them, shone with a pale-green light more delicate and pure than any color I have ever seen. After the body had been hauled up upon dry ground there followed the customary process of dividing into hide, meat, etc., and this disagreeable work gave opportunity to visit the shore of the stream and wonder at all the still beauty round about. The forest was roofed with gray clouds, the spruces were of a dull green, quite different from the day before, and the dead trees, with their hanging moss, were devoid of all silver lustre, only the ground moss and brown bushes being unaffected by the lack of light. A multitude of pitcher plants were also noticed, their magenta chalice all filled with ice.

After the deer was dressed we had luncheon about a fire and discussed the shooting, the shooter and the shot. Mac had already reached the watch ground when he saw the deer walking slowly across the outlet, thirty or forty rods away. In the hope of a better shot he quit a beating heart and watched the deer pass into the woods to reappear a few moments (though Mac says hours) later, within easy shooting distance, on the opposite side of a stream. At the first shot the deer humped his back as if wounded, and started to run up along the stream, a second shot made him stand and gave opportunity for a third shot that brought him down, the remaining shots were fired as he lay on the ground, and would not have been needed had the creature possessed less vitality. The estimated weight of the deer was over 200 lbs., and dressed was all two men cared to carry home. The antlers, spreading 18 in., were thick and evenly bent and looked almost artificial in their symmetry. We went to the bog for caribou, and the getting of the buck, and such a buck, was a piece of most extraordinary luck. We started back about 2 o'clock, and before the end of the journey each man believed he had the hardest load to carry. The guides were heavily weighted with the meat. Mac carried the head and hide and sometimes the gun, while I had only three rifles to take care of. I was just as certain that Mac had the easiest load as he was that I had it, but it is worthy of note that neither of us comforted the other by saying so. At one resting place a little weasel, pure white in color, came up to sniff at the packs of meat. The three mile walk was tiring in the extreme, and having loosed a good deal on the first part of the journey, besides stopping to corral a big owl

for stuffing, the rapid lowering of the sun made it necessary to travel the latter half of the way at the limit of speed. As it was we left the packs at the further end of the pond and got to the cabin just at dark. On the second day we were here half the distance to Beaver Bog completely stumped one of the party, who to-day easily made the round trip and carried on the return a heavy and unwieldy burden. It is a conclusion reached by reason and experience, that a one-mile walk across country carrying the usual hunting equipment is the equivalent to two and one-half on a level country road.

Wednesday, Nov. 12.—The day passed without important event, but was many marine miles from being an unenjoyable one. We began with the luxury of a late breakfast, and while Mac stayed at home to sketch the caribou head and exult over the four hides artistically hung up to dry, the rest of us skirted the shore of the road on the thin ice to fetch the venison left the night before at the further end. Will lugged one pack to camp, and I took the caribou trail to a trap which we found unsprung and frozen fast to the ground. On the return raised a flock of partridges and brought home two of them. In the afternoon Mac visited a lumber camp that was building a mile or two down the buck board road, where he saw them twitching in logs, chinking the cabin, and performing many other peculiar feats between interludes of extraordinary profanity. G. and I in the meantime attempted ice boating with

afloat, but though we walked and watched for several hours nothing came in sight. Once or twice, however, a breaking of twigs in the woods gave evidence that large game was moving thereabouts. The bog, in spite of its name, is a fascinating spot, and whether illuminated by bright sunshine or dully lighted by a cloudy sky one cannot but feel the charm of its fair tranquillity. To-day the clouds hung low and as a result the scene displayed quite a different set of colors. The spruces were rusty looking, the tree-moss had lost its luster and the dry leaves of the bushes by the shore of the pond were of a chocolate brown, unmixed with any warming red. Perhaps this was due to the shrinking and twisting of the leaves by cold, which made them expose their dull under surfaces more generally. The caribou we were after, but did not get, is an incomprehensible creature and one that enjoys the distinction of being the stupidest beast that ranges the woods. He has a strange fondness for ice and when the cold weather comes on will lurk about the ponds as a small boy does waiting for the ice to hold him, and, like his little brother in folly, not infrequently starts the weather with a frigid bath. When the ice is strong enough the caribou, number from one to a herd, begin their insane freaks. If snow has fallen they will often travel the entire length of a pond and then turning slowly around return as they went, studying and sniffing their own footsteps, or else they may follow the hobnail tracks of a hunter till their curiosity leads them to the muzzle

himself in a field, and while the fox's back is turned, or head bent to the ground, moves slowly toward him, stopping instantly and remaining in however uncomfortable a position whenever the fox raises his eyes. Intermittent progress is made in this manner until the animal comes within range, and if the first shot misses sometimes a second and even a third shot is obtainable before the fox takes final leave. The practice does not seem credible, when the wary fox nature is considered, nevertheless it is a fact that many are bagged in the way described, and it is said the expert enjoys the sport as much as hunting larger game.

Hec olim meminisse juvabit.

STILL-HUNTING DEER WITH BIRD DOGS

NOTHING that has recently appeared in FOREST AND STREAM has so much pleased and interested me as the article of "H. L." on this subject. It is a new use for our favorite dogs. It ought to serve as consolation to the hounders. It to me is a new way of circumventing the timid deer, and one which has everything to recommend it. There are sections where still-hunting as commonly practiced has many difficulties but where hounding is well-nigh impossible. I think hounding is generally prejudicial to the hunting in any place—often destructive of it. Still-hunting is by all odds the best and most decent way to kill deer, but the truth is that very few of us are such adepts at it that we need not welcome

W. TOWNSEND
1891.

AMONG THE WILDFOWL.—II.

JUST ARRIVED—BROADBILLS AND SPRIGTAILS.

a flat-bottomed skiff, in the hope of bringing in the remaining pack of venison with minimum exertion. Grant's maxim of life taught him by his father is: "There's more in calculation than there is in hard labor," but in this instance the figures he used in this calculation must have got mixed, for after a laborious hour or more we were many hundred yards from the pack, and finally returned to camp with but a lively sense of our own foolishness. The voyage, however, was unique. The pushing was done with spikes, sticks, and the paddling with a pitchfork, which drove the boat over, through, and any way but under the ice. This piece of folly was expiated by a shove, the first and last of the trip.

The penitential work ended, Mac called me to the pond to see the sunset. The autumn beauty of the day was ending in a glorious burst of color; for the sun, unwilling to leave the pond at once to the faint lighting of stars, tempered his going with a broad auroral band of pale, luminous yellow. Above the color changed imperceptibly to pink, and higher up in the heavens it merged into the clear blue of space. A single star near the western horizon shone white as a diamond, while over toward the north the pink and yellow were crossed by two white lines of azure. A few moments later a tinge of green was noticeable in the yellow, then it changed to orange, and finally died away in a red haze. Against this glowing field the trees on Maple Hill and in the swamp at the left stood out in clear black lines, while a narrow ribbon of light laid along the softer outlines of one of the boundary mountains, showed that the sun was only then leaving its distant crest. The smooth ice of the pond between us and the west served as a mirror to the colored sky and saved the light from wasting, as it did in the surrounding woods.

Thursday, Nov. 13.—This morning we all went to Beaver Bog and as the new black ice on Tim Pond was strong around the shore the first part of the journey was comparatively easy. The three miles through the woods took one hour, ten minutes. The Bog Pond was frozen solid, so we could travel up and down its entire length

of a rifle. They exhibit several other odd tricks on the ice, and also have several peculiar ways of their own in the woods, but though an inordinate curiosity may be at the bottom of much of their behavior, there must be some other spring of action in their dull brains which we know nothing of.

At Tim Pond tried unsuccessfully to time the flight of a bullet by firing vertically. The bullets either fell in the woods or else we could not hear them strike the ice. The evening was spent in bawling the flight of time and making far future plans by way of relief to present sorrow. The packing, hatefully suggestive of a more artificial life, is ended, but one blissful night's rest is waiting to wipe out all unhappiness till to-morrow.

Friday, Nov. 14.—The day of our leaving opened as I had hoped it would, dark, cheerless and moist, with no streak of sunshine or breath of stimulating air. The buckboard and baggage had left early, and two sad individuals sat down to an ill-cooked breakfast which was followed by the usual morning smoke in an unusually bare cabin. The fire, too, was going out, but a few sticks of well-seasoned birch brought back at once the lively flames which rose as merrily up the chimney as on the day of our coming, and for the moment quite banishing the thought of approaching care and work. This transitory pleasure ended, we drenched the glowing coals that nothing joyous might remain and turned our backs upon the blackened hearth, the empty hut, the icy pond with dark surrounding hills and lowering western sky, and in utter desolation of spirit we left the deserted place and its dreary scenery. A quick walk to Smith's farm (one and three-quarter hours) brought us there in time for an early midday dinner, and soon after we were on our way to Stratton, where we took a rig and got to Kingfield a little before six P. M.

On the drive out saw a fox running across a field near a farmhouse. These animals are very plentiful about Stratton, and the hunting of them is done in a way that to the uninitiated would seem altogether impracticable. When the foxes come out in the morning or evening in search of mice and other small game, the hunter stations

a little help from our four-footed friend. Somebody said not very long ago that still-hunting was the most destructive way of killing large game. I can understand how it is rather destructive in sections where the game has not become shy. But it is simply absurd to talk about the evils of still-hunting in a section where the deer bury themselves in dense thickets during the day and only come out to feed in the friendly darkness of night.

But what I started out to do was to ask your correspondent to give us a little more of the benefit of his experience. Perhaps he will kindly answer some questions. I will not deny that I think his idea a specially valuable one here in Mexico, but although there is a good deal of self-interest in my drawing him out I am sure other readers will be both interested and profited.

Will "H. L." kindly give us a brief account of his method of training dogs for this kind of hunting? I should like to know, too, whether he finds the pointer or setter best, whether this kind of work unfits a dog for bird hunting, whether a bird dog will catch and hold a wounded deer—in short, all he is willing to tell us, and should be glad if he would throw in some more of his interesting experiences.

SAN LUIS POTOSI, Mexico.

AZTEC.

ANOTHER FOREST PRESERVE.—Sherwood, Bullard & Co. have sold 1,000 acres of Adirondack land, known as Long Pond tract, embracing Long Pond, Round Pond, Rock Pond, west branch of the Oswegatchie River, a part of Fish Creek and other streams, to a company to be known as the Long Pond Fish and Game Association. The purchase, it is understood, was made by gentlemen residing at New Bremen and Croghan for Syracuse parties. The capital stock of the company is placed at \$10,000, divided into shares of \$2 each. It is said that as soon as the organization is perfected, work will be commenced upon a large hotel of modern style, and on several camps at desirable points. The purchase includes some of the best hunting and fishing territory in the Adirondacks.—*Boonville Herald.*

CHICAGO AND THE WEST.

CHICAGO, Ill.—The wild rice on the Kankakee this year is phenomenal. It fairly fills the river bed in places. We saw a great many ducks, bred on the marsh, mostly woodducks, and in a short trip in the morning started seven woodcock, of which we did not accumulate any, as our dog was of a bashful and retiring disposition, and moreover too polite to walk in front of us, so we had to find our own birds, which always happened in cover too thick to see your hand before your face. The prospects for a pleasant season of sport at Mak-saw-ba this fall are very good indeed.

Aug. 28.—"I suppose you wanted to offer me the key of your freezer, didn't you, Colonel?" I asked of the senior partner of Bond & Whitcomb, commission merchants, when I called in response to his invitation.

"Our freezer is open to inspection," said the Colonel. "Come with me." He led the way to the back part of the store and opened a No. 1 store box filled with "excelsior." "You see, we have no ice in our freezer, and no game, either," said he.

I have a strong suspicion that this is not Bond & Whitcomb's everyday freezer, but one kept only for holiday purposes; but this was the only one I could get into.

"You fellows aren't doing any good with your restaurant cases," said the worthy Colonel. "All you are doing is keeping people from eating chicken in Chicago during September. The game goes to Boston. I have sent a lot of it there, which came consigned to me. I am advising my country customers to freeze their game and hold it till October, when we can receive it. We do not invite shipments of illegal game, though I get plenty of letters like the one I sent you, asking whether we can receive it."

Col. Bond showed me his regular trade circulars, in which is the usual clause, a sort of holiday clause for everyday purposes, which all South Water street uses—"There is no demand for illegal game." This circular does not state what the illegal game is. It is merely a formality in effect, for though it would not do to go into the U. S. mails with an open invitation to commit a crime, it is still known to be a fact that illegal game is received by firms using practically this same clause in their circular quotations. I do not say that Bond & Whitcomb receive any such game, though the letters offering to send it show the lack of efficiency of that forbidding clause which is so triumphantly shown to newspaper men and other innocent gentry.

Col. Bond and I had a long talk, in which much of our old ground was covered again. He thought the sportsmen would never be able to get a case against a South Water street firm, and said that all this attempted protection was worthless, so long as it was not undertaken under uniform game laws. He said that the sportsmen could pass no laws in Illinois except as the game dealers allowed them to do so, as the game dealers controlled all legislation on that head.

"That means that you have bought the Legislature, which is a pretty assertion to make, isn't it?" I said to him.

"No, no, not in the least," said the Colonel; "but I had friends in that Legislature who would do anything I asked. We were going to repeal the present game warden law, but sickness laid that over until too late. I let your ice bill go through because there is no money in ice-fishing for us."

I have heard it said several times now by the dealers that they controlled the last Legislature. Now I wonder how they did it, or thought they did, or thought they could. I reason that they must have "owned" one or two men only, and that these must have been high in power. Adding this to a faint breath of a rumor which I have heard elsewhere, and one has the suggestion for a few quiet inquiries which I hope will result in enough developments to induce the game dealers not to talk so loud about "controlling" things. The "controlled" parties may object. I believe they will object.

The talk with the urbane Colonel covered a wide field, and was interesting to me, for that gentleman is exceedingly well posted on all matters pertaining to the game supply. Of course the Kern case was touched upon.

"Charlie Kern will never tell where he got his prairie chickens," said Col. Bond. "You'll never find that out." "You can lead a horse to water, but you can't make him drink," said Mr. Whitcomb, sententiously. I can readily see the difficulty which would involve any restaurant man who would inform on the game dealer of whom he bought. The dealer might retaliate! Suppose Mr. Kern's steward has bought other birds of which Mr. Kern knows nothing. Mr. Kern as a sportsman informs. The dealer rakes all these other birds up out of the archives, and Mr. Kern's restaurant, and Mr. Kern, and the dealer, and Mr. Kern's steward all get mixed up together. I merely suppose this case, because Mr. Kern's condition would then be that of any other restaurant whose steward had served illegal game without orders to do so from the owner. I have no right to suppose that Mr. Kern's steward ever served any illegal game but these prairie chickens, though I do know that he tried to buy illegal woodcock at Bond & Whitcomb's, for Col. Bond, in the presence of two witnesses, told me so, and said he was the only buyer who had so approached him.

"Did he get the woodcock, Colonel?" I asked.

"I don't remember," said the Colonel, thoughtfully.

My old friend Col. Bond, albeit smooth and educated in the ways of South Water street, is perfectly courteous and kindly, and can tell a good many of us a lot of things we don't know about game. I wish I could say more of the pleasant talk we had. The Colonel concluded by inviting me out to dinner at his house some evening. I don't see how I could go, for then I couldn't tell what the Colonel said.

Go to South Water street if you want to know where the game is most abundant. Those who are in search of shooting grounds for chickens may very well keep the following list of towns. I got the names from Bond & Whitcomb's letter files. From every one of these towns there is game to ship, and so I suppose the shooting there must be fair at least. I saw letters of this kind from Randolph, Neb., and was told the shooting was good all the way from Fairmount to Long Pine, Neb., also at Niobrara, Neb.; Ravenna, Neb.; Mullin, Neb.; Taylor, Neb.; Whitney, Neb.; Osakis, Minn., and Lake Mills, Ia. Albion, Boone county, Neb., was mentioned as being good up to this season, though it is not heard from this season. All the other points have game ready to ship right now, and presumably plenty of it.

At Bond & Whitcomb's I met a man who is a character,

Bill Griggs, of Browning, Ill., perhaps the most widely traveled and successful market-hunter there is in the country to-day. Though apparently a young man still, Griggs told me that the coming month of September would complete his twentieth year of hunting for the market. He contemplates going either to India or South America this winter to shoot plumage birds for the market. He was for years the outlooker for the millionaire sportsman, Wirt Dexter, traveling the country over for new shooting territory. Griggs is an old shooting partner of the redoubtable Abe Kleinman. I wish I had time to tell more of what all he told me.

"Three years ago I was shooting at Preston, South Dakota," said he, "and I killed and shipped into Bond & Whitcomb, here, from Sept. 1 to Nov. 11, not shooting on Sundays, 8,200 ducks; mostly teal. For 27 days straight, I never got less than 100 ducks a day."

"At Alma, Boone county, Neb., I killed 2,600 prairie chickens in 34 days. That is a bad locality. The local shooters begin to shoot when the birds are big as quails, and they never do stop."

"Five years ago Mr. Dexter, and Gen. Strong and I, went to Cedar Rapids, Neb., to shoot chicken. We found that we could not shoot. The natives kicked. They told us that the week before we got there, some fellows from the East had gone in there and shot all they could, just piling the birds up and leaving them to rot. They piled up 900 chickens in one pile on the prairie."

"Twelve years ago I was in the New Madrid marsh of Arkansas, shooting for the market. There was an Englishman there, Lord George Gordon, with 12 men and a lot of tents. That was in the muzzle loading days. This Englishman had 4 men to load and pass his guns up to him. He stood on a piece of corduroy road that ran near his camp, and shot from morning till night, day after day. He killed thousands and thousands of birds, often over 300 in a day, and never picked them up. I saw I could make money by picking up his birds, and I asked for the privilege. 'No,' he growled, 'there wouldn't be sport in that, ye know.' I never was much hotter at any man in my life. To-day, in that country, you can't get ducks enough to eat, unless you strike it just right, but in those days they flew in endless streams. It was as bad as you ever saw wild pigeons."

"Twelve years ago men shot chickens all over Minnesota, and piled them up and left them. To-day they're hustling to get places to do a little shooting where they can bring their birds home and brag about it."

"Where do I think is a good place for chickens this fall? Well, I don't hardly know. I should think Preston, South Dakota, would be good. I know when I shot there two or three years ago, I could have killed forty to sixty chickens a day there, but I was making more killing ducks. I killed ninety-seven robin snipe at one shot once on a sandbar in Preston Lake."

"I don't like Nebraska shooting so well, for that is a hard country to hunt. The chickens are mostly in the sandhills, and you can't mark the coveys down so well."

"I don't think it at all necessary to go west of Devil's Lake, North Dakota, to get good duck and goose shooting, though I wouldn't think anything but sharp tailed grouse would be that far north. Col. Bond tells me there is good shooting at sharp-tailed grouse in the Turtle Mountains country."

So much for a chance visit on South Water street. I saw further at Bond & Whitcomb's a barrel level full of black bass, from Minocqua, Wis., said to be the heaviest in average of any lot ever received. There were numbers that weighed over 4lbs., some over 5lbs., and less than 3lbs. was the exception. They were all big-mouths. Market-fishing in these magnificent lakes about Minocqua, it seems. So it goes.

During this brief visit also I saw a request from a Boston (Mass.) firm, to Bond & Whitcomb, to furnish them by Jan. 1 100,000 grouse, 250,000 quail and 150,000 partridge. The firm added that they had a market for this game in Europe, and that it was to be shipped across the Atlantic. "We stand ready, in view of the importance of this order," the firm stated, "to advance £1,000 (nearly \$5,000) at once."

"I cannot give you the name of this firm," said Col. Bond, "for much of the game they want would be illegal."

"You don't need to," said I, "for I've got it already."

I had seen it over his shoulder as he read the letter, for he had folded down the letter head so that I could not see it, and left the signature exposed. The Colonel was startled.

"Oh, you ought not to publish that; I must ask you not to do that. This is my private business correspondence."

Under the circumstances it would not be journalistic honor to give the name and address of the Boston firm who want 500,000 head of our Western game.

A year ago this summer, when the famous solid train took several hundred general passenger agents and other distinguished railway men on the excursion to Old Mexico, it bore away from Chicago 250 dozen quail as one item. Every one of those quail was illegal, and every one of them was purchased of one game dealer of Chicago whose name is perfectly well known. I dare not give it, for I cannot prove that he sold 250 dozen quail, but one of the party who went on the train told me this was so, and he knew.

Such are some of the rather stupendous facts picked up on South Water street in a few minutes. Now tell us, where does the game go? Who kills it, the sportsman or the market-hunter? Why is it killed? How long will it last? When will our law come forbidding its sale? Where will the end be?

"If I had the last pair of game birds on earth, I'd ring their necks," said Col. Bond. "I foresee too much trouble and litigation about this game business that is so much mixed up with our other business."

He would wring their necks.

I believe South Water street, in spite of its professed scorn of sportsmen and their efforts, is a little bit uneasy on account of the recent outlook. We can make them more trouble. A very good thing to remember in this business, and one which may spur some lagging brother, is the utterance, half in jest, but still significant, of the man who is easily king of the Chicago game dealers. The last pair of game birds, what would he do with them? He would wring their necks.

E. HOUGH.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—Adv.

MAINE BEARS IN THE FORTIES.

THE Cranberry Bog Basin, two miles south from Molly-chunkamunk Lake, in 1840 to 1850, was a great rendezvous for bears. They wintered in the mountains near by (Ariscobos and Observatory), and in early spring made their way down the brooks, which led into the bog pond, feeding upon frogs and fish as they came forth from their winter quarters. Thus after their long fast through the cold Northern winter, they gradually adapted themselves to their normal summer condition and a full stomach. There were very few hunters in that region in those days, and the bears had the woods, and in fact the entire country, to themselves. Matalluk—the lone Indian of the Magalloway—had retired, or been laid up by blindness and old age; Old Philip had frozen his feet, so they had to be amputated, leaving his traps in the woods to be searched for by the hunters that came after; Annanee, the educated Indian, had joined the tribes in Canada; and there only remained George Soule and Old Kimball, who were professional hunters in the Rangeleys, and one or two hunters who came across from Colebrook, N. H., occasionally to kill moose and trap families of bears in the autumn. None of these hunters disturbed the bears, unless by accident they routed one from his den in winter, or caught one swimming the lake in summer, on which occasion there was generally a scrimmage and then they had roast bear steaks for several days after. Thus when I found this lonely, mountain-encircled basin in the wilderness, it was full of bears. They tore the bark from the trees in early summer, made hard-beaten paths along the brooks and beside the ponds, tore rotten logs in pieces to secure the ants and worms in them, and were prime owners and free rangers through all this secluded valley in the mountains.

For three years I trapped ten bears every year within a radius of one mile, besides shooting one on the tramp and from the traps occasionally. I had several narrow escapes from injury or perhaps death, while hunting these thirty black monsters in those three years.

On one of my hunting trips to this bear eldorado I came near being hunted myself, and only for a small rope which I carried in my coat pocket to tie together and on to my shoulders any game I might chance to secure, I should not be here writing up the adventure. On this occasion, as I approached the valley of the bog I noticed unusually fresh signs of bears. Large tracks in the mud, new diggings among the old logs, and tearings on the bark of trees all tended to excite my nerves and cause me to proceed with the utmost caution. I could not keep back the thought that I was probably fifty miles from human beings and alone, and in the center of a valley full of savage wild beasts, and in case of an attack, strategy and pluck would both be needed. As my mind was digesting these realities, there suddenly rose up before me one of the largest bears I had ever seen. With an ominous growl and clamping of teeth together with a squealing noise, she jumped toward me on her hind feet. As luck would have it I had shot away my last bullet in securing two bears in my traps on the shore of the lake. My first thought was to fire a charge of shot which was in my gun into the creature's face, but I knew it would only enrage her. Just then looking ahead I saw a leaning hackmatack tree for which I ran, climbing into it with my gun in my hands, followed closely by the bear. Up I climbed from limb to limb high up into the foliage, when just above my head, almost within my reach, were three large cubs. I stopped, and glancing downward beheld the bear nearly up to me. Involuntarily I swung my gun around and fired full into her face, then dropped my gun. She dropped to the ground—gun and bear reaching there together; but the bear recovering, at once commenced ascending the tree with loud screeches and raging mad. The cubs at the same time began to descend into my face. Quick as lightning the thought struck me to hitch my rope around a limb in front of me and lower myself down past the bear who was fast approaching me. It was but the work of an instant and I was swinging in the air out of reach of the old mother bear, who still kept climbing to see if her babies were all right, and by the time she reached them in the very top of the tree, I had reached the ground, grabbed my gun and got well started toward the lake. That small rope and the leaning of the tree saved me. The next week I got that bear in my trap and shot all three of the cubs.

BETHEL, Maine.

J. G. R.

GLOUCESTER, Mass., Sept. 1.—The first flight of coots came along Aug. 29 and 30. They probably will not stop more than 3 or 4 days. It is time for plover, but only a few scattering ones have arrived. The next easterly storm will doubtless bring them along. I have seen a few gulls during the past few days, chiefly the gray ones, although I noticed one minister and one mackerel gull. A large blue heron was reported shot on a marsh in Squam River.—E. F. L.

"Forest and Stream" Nursery Rhymes.

VI.
Underneath the harvest moon
Man a-huntin' for a coon:
Dog a-barkin' up a tree,
Man a-squintin' for to see;
Keeps a-lookin'; putty soon
Sartain sees a monst'ous coon.
Arter wastin' all his shot,
Coon still sittin' where he sot.
'I never see a tougher one,
'Less the's suthin' ails the gun;
Sho! 'Taint nothin' but a fly
Roostin' jist above my eye!
Man an' dog with nary coon
Pinten hum beneath the moon.
'Coons ain't ripe in harvest time,
November frosts 'll make 'em prime."

AWAHOOSE.

VII.
In Canada over the line
They say sporting is very fine,
But they tax rod and gun,
Maybe in fun,
'Ba gosh! Ah! 's so."

ANTOINE.

NAMES AND PORTRAITS OF BIRDS, by Gordon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price \$2.50. For sale by FOREST AND STREAM.

Camp-Fire Flickerings.

"That reminds me."

A CONTRIBUTOR writes of one of the characters encountered on the way:

But the driver baffles description. He was Yankee, stage driver, Young America, and professor of modern profanity, compressed into 5ft. of sturdy independence. Finally, with a view to his moral culture, we offered him fifty cents to omit further profanity till we reached the end of the route. He accepted the offer with accompanying weight of self-control and went bravely along a few miles in unaccustomed silence, broken only by a few hesitating remarks about the weather and such subjects as could be touched upon without the aid of superlative English. The story of a hound running so fast that he split and passed through a sapling with only the loss of his tail, was, however, too much for the boy's credulity, and under the excitement of intense scepticism he said: "The hound must have been d—thin." This *lapsus lingue* cost him fifty cents, and made him so careful that we owed him thirty-five cents at our destination, where we arrived late in the afternoon. On the ride this irrepressible took great delight in a borrowed pipe, and frankly asked that it be given to him; a tobacco pouch much valued for its age he also courted, and when told that the owner had it twelve years, said, "You must be tired of it now."

Ever see a grizzly? I guess I did.

In the spring of '55 I left Coloma after nightfall, bound for Frisco. I had a couple of pounds or so of yellow stuff in a slim buckskin bag fastened round my waist next the skin. My plan was to walk as far as Folsom that night and take the morning stage. I started at that unseemly hour because I wanted to get away unnoticed.

It was a clear starlit night. Starlight in California usually does not mean much. But I was familiar with the way. As usual a stiff breeze was blowing coastward from the snow-capped Sierras behind me. The country—I kept some distance back from the river—is decidedly rolling, not to say hilly, covered for the most part with tall grass, and thickly decked with yellow flowers. Clumps of chaparral abounded, and here and there a live oak or pecan tree studded the landscape. It was early in the season, but already the grass was dry enough to rustle under foot.

I had completed fully three-fourths of the journey. In passing out from under a live oak, where the trail led through a sort of grove, I found my path disputed by a huge animal, that, with a horrible roar, rose on its forelegs a few paces in front. The sight and sound fairly paralyzed me, but as soon as I could move I wheeled and made for the tree. Catching sight of a limb outlined against the sky, I threw away my gun and sprang for it. To my after astonishment I reached my mark, and lost no time in getting among the branches.

No Jack put in an appearance, so I concluded the animal was badly wounded. I tried to locate my gun, but failed. There was nothing for it but to wait till morning, when I hoped to be able to fish up my gun and settle with the mountaineer. I found a tolerably comfortable position and—woke up on the ground. Day had broken. I was considerably dazed. Nevertheless, I distinguished an unforgettable sound in my ears. I scrambled to my feet, and, hastily entertaining the notion that I wanted to get up a tree, I dashed for a young pecan close at hand. In the act of climbing I glanced over my shoulder, and about 50yds. off I discovered the familiar form of an old wind-broken mule that had been turned out to die. The joke was immense. I grimly sought my gun and leveled it at the brute's head. His innocent gaze disconcerted me. After a moment's reflection, I threw the gun on my shoulder and went my way.

Yes, I once saw a grizzly. Two hunters killed him up in the mountains near Lake Tahoe. I saw his body on a wagon at Coloma. H.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

THE BLUEFISH.

FROM Nova Scotia to New Jersey the well established name of a popular and abundant fish is the one given as the title of this paper. Bluefish is now the accepted designation of the same species in the Gulf of Mexico, by transfer from New England. An old American name for the fish is skipjack, which has found its way into European books on fishes, and is paraphrased in scientific literature under the guise of the Latin *saltator* or *saltatrix*, a leaper. Rhode Island folk of the olden times called the bluefish a horse mackerel, doubtless on account of a superficial resemblance to certain members of the mackerel family. In some other portions of New England it is the snapping mackerel or snapper, a term adopted also in New Jersey, and often abbreviated into snap mackerel and even mackerel. At New Bedford, Mass., the fish is sometimes called blue snapper. An old New York name is skip mackerel, and on the Hudson the misnomer whitefish is sometimes heard. Maryland, Virginia and North Carolina use the name greenfish. A correspondent last fall wrote me that "the name greenfish is universally applied to the bluefish in the fishing centers on Herring Bay, below Annapolis, Ind." Another term applied to the species in Chesapeake Bay and generally known in the markets of Baltimore and Washington, is tailor, or salt-water tailor, the latter to distinguish it from the fresh-water tailor, which is the hickory shad (*Clupea mediodors*). The old name skipjack is now best rooted in the region south of Cape Hatteras, but the overpowering influence of an aggressive fishery is rapidly establishing the term bluefish from Nova Scotia to Florida.

Relationships.—The bluefish is not one of the mackerels, but is the sole representative of a family which is now placed near to that containing the pilot fishes, crevalles, pompanos, amber fishes, etc. The butterfish, or harvestfish, and the rudderfish are relatives of the blue-

fish, although much smaller. *Pomatomus saltatrix* is the only species recognized at present over the wide range of this piratical voyager; but a casual examination of a specimen of the South African form gives the impression that it is shorter and stouter than the average American fish. We must, however, expect considerable variation in a species of such extensive range.

Distribution.—On the North American coast the bluefish ranges from Nova Scotia, where it is not a regular visitor, to central Brazil. In the Mediterranean the fish is well known, especially on the shores of Morocco. A series of interesting articles on the Morocco bluefish, written by "Sorelle," was published in 1888 and 1889 by the London Field. In South Africa the species is abundant and thrifty, as well as in the seas of India and Australia. A singular fact in its distribution, noted by Dr. Goode, is its absence from the Bermudas and the Western Islands: it is unknown on the Atlantic coast of Europe also. Temperature is one of the chief factors in the distribution of the bluefish. The scarcity of the species in Buzzard's Bay about the middle of July caused anglers great uneasiness, and it made the fishing season so far a very short one. The reason of this was to be found in the condition of the water, which was too cold to suit the fastidious taste of the bluefish, although one of their favorite food species—the sea herring—was abundant. Last year the water was favorable and bluefish swarmed along the coast from Long Island Sound to Monhegan in Maine. Buzzard's Bay was full of them. In Cape Cod Bay, at the close of July, 1890, the fish were more abundant than for many years before. A summer temperature of 60° to 75° is grateful to the bluefish, and it is believed that 40° is about the limit of cold which it will endure.

Size.—It is recorded that in the last century this fish sometimes reached a weight of 40 or 50lbs. in Vineyard Sound; perhaps this is true, but our ancestors were good fishermen and left none of the big ones for their children. The largest specimen of recent times was mentioned in FOREST AND STREAM, June, 1874: it weighed 25lbs., and was captured with rod and reel by L. Hathaway, Esq., from the bridge at Cohasset Narrows, Mass. A friend of the writer is authority for the statement that 25-pounders were not uncommon on the North Carolina coast in 1888. This, however, is far above the average size of the fall run of fish. In the fall of 1889 a considerable number of bluefish weighing 15lbs. were noted on the New Jersey coast, but it was the first run of the size for many years. Last year the number of large fish from the Capes of Virginia to Rhode Island was remarkable. In the Lower Chesapeake big bluefish were extremely and unusually abundant during June. During the present summer my observations have been confined mainly to Vineyard Sound and the waters southward to the Chesapeake: in this area I have not heard of a bluefish above 10lbs. in weight, and the usual run includes chiefly fish of 4 to 6lbs.; later in the season we will again learn of larger individuals, fattened upon the herring and silversides which swarm in all our shallow bays.

Abundance.—The early history of the bluefish on our coast is somewhat obscure. Josselyn (1672) mentioned a "blew fish" or "horse" among the food fishes of New England; but he catalogued two kinds of bluefish, one of which was speckled. This may as well have been one of the seafishes of Maine (*Anarrhichas minor*) as any other species, and to this the name hound would be more appropriate than to the bluefish. The "blew houndfish" of Maine waters might have been *Anarrhichas lupus*, which is now present and is by some persons "esteemed the best sort of fish next to rock cod." From 1659 to 1763 the fish were recorded as plentiful about Nantucket during the summer, but in 1764 they disappeared suddenly. About 1791 the species was abundant in Florida and apparently absent from New York. DeKay states that it was unknown on that coast until about 1810, when a few appeared. In 1815, according to Dr. Mitchell, the young were taken plentifully from New York wharves in August; the largest one mentioned by that author was 12in. long and weighed about 14oz. In 1825 the abundance of bluefish in the region was noteworthy and in 1841 Vineyard Sound became the center of a great fishery. In 1837 the fish advanced northward to Cape Cod and ten years later to Cape Ann. From that time until recent years the species has fluctuated greatly in numbers and varied in the time of its arrival in a given locality. Off the northern coast of North Carolina for many years prior to 1877 there was a great fall and winter fishery for bluefish averaging over 10lbs. in weight. Gradually the fish came later and later until in 1876 they appeared at Christmas and in 1877 they failed to come and were not seen again until March of 1888, when they reappeared in vast numbers. For the last five years there has been no lack of bluefish, but the centers of abundance have varied. In 1886 the fish were more abundant at Sableight, N. J., than anywhere to the southward. In 1887 a very active fishery was located off Block Island. In 1888 Chesapeake Bay contained such an abundance of the fish that hauls of 17,000 and 25,000 were reported. Last year was a year of plenty and the distribution extended from the Chesapeake to Maine. Buzzard's Bay was another favorite locality for bluefish in 1890 and the number around Cape Cod was greater than for many years; schools estimated to contain 1,000 barrels of fish were noted off the coast.

Habits.—The bluefish is a pelagic species and migratory in its habits. It comes along the coast apparently from the southward, arriving off New Jersey usually about the middle of May, but sometimes a month later, and reaches Cape Cod sometimes in July. Its time of leaving the coast depends upon the temperature of the water and the supply of food. The date on the New Jersey coast in 1885 was Sept. 15, and in 1886 a month later. Further south the time of arrival is, of course, much earlier. Last year the species appeared opposite Roanoke Island in vast numbers in March.

This is one of the most destructive of all fish. It follows schools of alewives, weakfish, mullet, mackerel, scup, butterfish, and other valuable food fishes along the coast in summer, and in our shallow bays and sounds the young feed upon silversides, young herring, anchovies and other small fishes. The menhaden, alewife and shad have been driven far up the rivers to escape from the ferocity of this ocean pirate, and in many cases the helpless victims have been stranded on the beach in their efforts to avoid capture. The young bluefish ascend the rivers into fresh water; they may be seen under schools of small fishes, which they have driven

into some place favorable for the attack, and frequently darting up from below to seize their luckless prey.

Reproduction.—About the spawning habits of this fish nothing is known. Even the date of depositing the eggs is uncertain, although it probably takes place late in the winter and very early in the spring on our Southern coast. The very young fish have never been seen so far as we can learn. The smallest individuals known were found floating at the surface off the Virginia coast by vessels of the U. S. Fish Commission. The writer has secured examples about an inch long in Great Egg Harbor Bay on the last of August. Hon. Robert B. Roosevelt has recorded his discovery of fry of less than an inch in length in the Inlet of Far Rockaway, New York, on July 10, and the late Mr. Silas Stearns published his belief that the species spawns in the Gulf of Mexico in the spring. At Edgartown, Martha's Vineyard, it is supposed that the bluefish spawns about the end of July, on sandy bottom, east of the Vineyard, toward Muskeget.

Growth.—It is generally believed that the average length of the bluefish by the middle of August is about 5in.; by the end of September the length is 7 to 8in. A fish measuring 12 to 14in. is considered to be one year old. It is believed that the species grows very rapidly after it has reached the weight of 4 or 5lbs., sometimes almost doubling its weight during the summer. Dr. Goode gives the following relations of weight to length: A 1lb. fish measures about 14in.; 2lbs., 17in.; 3lbs., 21in.; 4lbs., 24in.; 5lbs., 25in.; 6lbs., 26 to 27in.; and 8lbs., 29in.

Capture.—One of the best known and most exhilarating methods of taking the bluefish is by trolling from a sailboat with a piece of wood, bone of metal, usually accompanied by a quid of white rag or eel skin by way of additional decoy. At Woods Hole a strong cotton line about 100yds. long, to which are attached on wire two large-sized sea bass hooks baited with a live eel, was the favorite rig until recently, when the caprice of the fish seemed to call for menhaden or some other bait. In fastening the eel one hook was passed through the lips and the other pierced the tail. The same outfit was used from a boat at anchor near rapid currents which floated the line at or near the surface, and also for heaving out into the surf and pulling in the line rapidly. A very popular style of fishing, now extensively followed, is known as chumming. For this purpose many anglers use an 18-thread Cuttyhunk line 200yds. long on a large reel and provided with a strong hook attached to about 1ft. of piano wire.

Two things are to be especially guarded against in handling a big fish—his mad rushes when first hooked and his propensity to run up faster than the reel will take in the slack line. A powerful fish with the tide in his favor will make a stubborn fight and a doubtful issue unless great skill is exercised by the angler. In chumming a favorite bait is a piece from the back of a menhaden containing the dorsal fin, the rest of the fish being ground or chopped up and thrown overboard to attract the fish. An artificial minnow is often used from a stationary boat instead of the squid or other surface lure, and the young are caught in shallow water near the shores with shrimp or pieces of fish. One of the most successful all around anglers of my acquaintance, Mr. Willard Nye, Jr., who is known to many of the readers of FOREST AND STREAM, gives the following timely hint from his own experience in trolling: "The value of knowing that bluefish are feeding on the smaller fish does not seem to be fully understood by the fishermen, for with few exceptions they stick to the eel skin drail or squid, whereas if they would use an imitation fish, not over 5in. long, made of block tin, at least three fish would be hooked to one with the eel skin drail. To meet with the greatest success the tin squid should have indentations cut or pressed to represent the head, scales and eyes; it should be rubbed bright with the back of a knife, and have a piece of eel skin 1½ or 2in. long hooked through the middle to make a suitable tail for the minnow. When trolling let the boat sail very slowly, so that the drail may sink into the school of bait, as most fish prefer to take their food under water rather than come to the surface to strike it and get their mouths full of air."

T. H. BEAN.

THE BIG FISH EAT THE LITTLE ONES.

Editor Forest and Stream:

I am in receipt of a letter from Mr. Henry Wright, the commissioner of the Duke of Sutherland, dated at Trentham Hall, July 10. As you probably know, Mr. Wright is an enthusiastic sportsman. Believing that an extract would interest your readers, I send it herewith:

"I am glad to hear from your son that the deer are continuing all right, and hope they will breed the next season. You know the lake here is full of fish. I have been amusing myself by putting out a hand net—just a rabbit net used ordinarily in catching rabbits, about 50ft. long and 2ft. 6in. deep, with corks along the top. We put it out in the lake, tying one end to the weeds, and the fish swim against it, entangling themselves by floundering about. I go and examine it night and morning, and generally get three or four fish each time—pike and tench."

"To-day we emptied one of the ponds in the park. There were thousands of fish—pike, perch and roach, one pike weighing 10½lbs. It pleases one's curiosity to see what there is, and is useful in transferring some from one pond to another, but it is murderous work; so many get smothered in the mud. If ponds were properly constructed, so that the water could be run off quickly and not too much mud allowed, I am sure one might breed and sell tons of fish for the market, treating the business as a food farm. You must have weeds, as they form a harbor for the small fry to escape from the big ones, or else they would soon all be gobbled up, and besides I see that on the weeds are innumerable snails, which serve as food for the whitefish (roach), and they in their turn form the food for the pike and perch. It is wonderful how nature works—all in turn preying upon one another, up to man, who selects the biggest and best creatures to feed his body and brain, and so on up to higher nature, but I am rambling now, so I write to say good-night and kind remembrance to all."

The deer referred to by Mr. Wright are three fallow deer received from the Duke last spring and placed in my park at Stanley, N. J. Since then one of the does has given birth to a beautiful male fawn, which is doing remarkably well. GEO. SHEPARD PAGE.

POTOMAC RIVER FISHING.

LAST week the Potomac was in good condition and some fair catches of black bass were made. Messrs. Coburn and Otterbach spent several days at the club house near the Great Falls and took thirty bass. Most of these were fine ones. The boss bass of this excursion was captured by Master Harry Coburn. It weighed 3½ lbs., and hooked itself while the party were in Difficult Run collecting bait, the rods having been left in the boat with lines in the water. Harry worked hard for his biggest fish and landed him without assistance from the other members of the party. The boy had taken off his breeches while wading in catching bait, and when the Kentuckian on the rod clicked out a merry warning that something had started off with the hook Harry grabbed his trousers and ran to the scene of action. He seemed to think that it was necessary for him to have his knickerbocks on while landing a fish, and after picking up the rod he succeeded in getting one leg out of the way when wh-r-r went the reel, and our young friend had to give his whole attention to Mr. Bass. The fish was landed after a good fight, during the progress of which Harry is said to have presented a very striking picture.

Washington anglers are finding very good fishing in the lower Potomac, near its mouth, where croakers and silver perch (not white perch) are being taken in large numbers. "Trout" (weakfish) are biting well at Point Lookout. A friend caught six on the first tide he fished, aggregating 12 lbs. That was two weeks ago, and fishing has been good since.

Several anglers from here are just about breaking a very successful camp on the Susquehanna near Havre de Grace, Md.

We all look forward with great expectations to September and October. Next month is rockfish month here, and October, if the weather be favorable, is one of the best black bass months.

Mr. John Hyer relates some pleasant recollections of excursions to the Little Falls of the Potomac with Uncle Thad Norris in quest of rockfish and striped bass. A short time before Mr. Norris's death he came on to Washington and in company with Mr. Hyer spent a very successful day at the Little Falls. So delighted was Mr. Norris with the fine fish taken and his surroundings that, after having partaken of a luncheon and settled back for a rest, he exclaimed, "Now I am ready to die." At this point Daniel Webster, and many other noted anglers, have been successful in fishing for "rock," and even in these later years the fishing is occasionally good.

BONART.

WASHINGTON, D. C., Aug. 29.

JUNEBUG AND RAINBOW TROUT.

Editor Forest and Stream:

I write this in a spirit of vengeance—my object being to get even with some of your unmannerly correspondents who so love to tantalize hard-working citizens with accounts of phenomenal sport in regions to which they alone seem privileged to penetrate. I am ungenerous enough to hope that these unprincipled fellows of the backwoods will turn green with envy when they read of the unsurpassed fishing, and when I say unsurpassed I mean nothing else, that may be enjoyed at no great distance from San Francisco.

Even as the fishing was a revelation to me, I hope its description may be a source of envy to them. To those who have the good sense never to indulge in extravagant accounts of marvelous catches, I feel that I ought to apologize, and perhaps the best apology will be to state that this narrative is not intended for them, and that they read it at their own risk.

But before I begin I should like to interpolate a word of advice. There may be some who, reading this account of a remarkably successful outing, will erroneously fancy that California is the long-sought Angler's El Dorado. Such a belief would be a mistake. Undoubtedly the fishing in some parts of our State is superb, and so, on many occasions, I have found it to be; but on the other hand, there are streams enough in California which, owing to persistent and reckless fishing, contain about as many trout as the Charles River, flowing through Boston. The reader of any angling or sporting paper should ever bear in mind this fact, that the experiences are almost invariably exceptional, depending either on unusual luck or marked skill. In the present instance our success on the Klamath River was mainly the result of luck, depending (as will be seen) absolutely on the co-operation of the Junebug. Therefore let not the eager angler, who seeks the Klamath in August, when the Junebugs have all folded their tents and silently stolen away, denounce me as an unfeeling impostor. With an apology for this perhaps unnecessary preface, I begin my truthful narrative.

Last week my father asked me to join him on a fishing trip to the Klamath River. My father has an odd habit of asking me to go fishing with him; and I, strange to say, have an equally odd habit of accepting every time he asks. So we decided to leave San Francisco for the north that very evening. In the meantime I consulted a map of our State, and discovered that the Klamath is a stream of considerable size which, rising in southern Oregon, flows southward into the heart of the North California Sierras and thence westerly into the Pacific.

When I joined my father on the train, I found him supplied with a storeful of angling requisites, (half for me, half for himself) embracing everything from tiny boxes full of shot to monstrous wading stockings and awkward landing nets. Everything seemed on such a vast scale, and so thoroughly out of harmony with my ideas of trout fishing—gained somewhat inadequately from stray casts over Massachusetts waters—that I could not refrain from asking my paternal whether he had not inadvertently procured the equipment of a whaling fleet; whereupon he informed me that, unless his friends had deceived him, we should need our strongest tackle, as the trout of the Klamath were fierce, gamy fellows of the "rainbow" variety, averaging no less than 2½ lbs. While the train struggled up the Sacramento Valley, we discussed the probability of the correctness of this information. Neither of us was disposed to rely upon it, inasmuch as just such reliance in the reputed excellence of a stream had more than once caused us bitter disappointment. Agreeing for safety's sake, to lower the average provisionally to 1 lb. per fish, we retired for the night.

By three in the afternoon of the following day we reached the station called Ager, a tiny speck in the wilderness of the Sierras. Here we and the paraphernalia left the train

and were put upon the stage-coach which runs daily between Ager and Klamath Hot Springs, our destination. The jolting drive over the hills was conventional enough, until a sudden bend in the road disclosed the beautiful valley of the Klamath and the river itself, fully 30 yds. broad, tumbled and seethed through it in a most stirring way, at least from the angler's standpoint. Elated by the sight before us, my father and I shook hands, and I dare say each of us thought the prospect warranted raising the average to a pound and a half. Before suggesting such a risky move, however, I determined to consult our driver, and accordingly tapped him on the shoulder.

"Daniel," I inquired, "is that the Klamath?"
"Yes, that's the river," answered Dan kindly.
"How's the fishing?"

"Oh," said Daniel, "I reckon you will soon get tired of fishing that stream." My father and I exchanged a painful glance, and then I asked: "Is the fishing so very poor, then?"

"Oh, bless you, no," Dan answered quickly, "the trouble lies the other way. There's too many rainbows in that stream; why the river is loaded to the banks. Only the other day a man from town"—and here Daniel told us a trout tale, that I could scarcely restrain the impulse to stop the stage and rig up then and there. Only my father's better judgment served to keep us in our seats; and as Dan ended his story, my father recommenced the pumping process where I had left off.

"Are the fish large, Dan?" he asked.

"Not so very, this season," returned the driver, "I haven't seen any so far over six pounds, but then on the other hand I don't remember any that went under two."

At this point I again threatened to stampede, but the pater's grip was upon me, and with a little coaxing I consented to stay with the stage. The scenery failed to interest us after that, we were too expectant even to appreciate a good supper after a trip of twenty-four hours, but almost as soon as we were lodged in a cosy cottage at the springs, we retired in order to be up with the dawn.

To tell the truth the dawn was up and about a little before us; but, considering that we had to adjust our cumbersome tackle and apparel, we made a very fair second. Together we trudged to the side of the river whose rushing had played a part in our dreams during the night. We had been advised to waste no time with artificial flies, and now we were convinced of the soundness of that advice. The river was far too deep and swift and turbulent for the gayest professor or grizzly-king. So my father decorated his line with shrimps, I festooned my own with worms, and the fishing began. I had taken my position upon a wooden platform which had been thrown out (evidently for the accommodation of ladies whose casting powers are not equal to the demands of the Klamath) across the stream. It terminated abruptly some thirty feet out. Here, at the end, I stood casting my line up stream, watching it as it floated past, and withdrawing it as the swift current carried it to the surface some distance below. After five or six casts of this nature, I began to wonder why one of the innumerable monsters failed to connect. My father too, wore an anxious expression, and as he drew in his line for the fifth time, I saw the shrimps upon it dangling intact. Just then a guest from the hotel, a stalwart young fellow, emerged from the brush and, rod in hand, joined me on the platform. With a cheery "Good morning" to both of us, he cast his line into the stream. He was fast to something in an instant; something that seemed to be the embodiment of life, for in spite of a protesting shriek of the reel, the captive shot like a flash into midstream and then jumped, for all the world like a big black bass, 4 ft. into the air. While I trembled with excitement, and my father yelled like an Indian, that young man handled his frantic fish with about as much interest as if he were fast to a fingerling. Evidently the fishing had lost the charm of novelty for him. Five minutes passed, and then I had the pleasure of netting a magnificent prize. The trout, utterly exhausted, (for while a "rainbow" has sufficient strength to move a fin, he defies capture) was unhooked, killed, and tossed to the bank, where my father picked him up and hung him to his pocket scales. "Three pounds full," he said to the indifferent young man, who was preparing for another cast. But I checked the latter with a question.

"Will you tell me," I asked "what bait you use? We seem to have no luck with shrimp or worm."

"Neither is worth anything," he answered. "Even salmon-roe is useless at present while the trout-fly hangs on every bush."

When I told him that I had never seen a trout-fly, except an artificial one, he offered to show me millions, and led the way to the bank. Directly in front of us was a small oak shrub and, sure enough, it was alive with the brownish, crawling insects which I instantly made out to be June bugs. Not only that bush, but every bush along either bank of the Klamath, was laden with these so called "trout flies." So plentiful were they, that often eight or ten of them clung to one tiny branch. I emptied my bait box of the shrimps, and prepared to take in a supply of bugs, which made not the least effort to avoid capture; but the young man advised me not to go to any useless trouble, as it was much easier to pick up a handful anywhere whenever needed. Nature, in fact, had put a gigantic bait box (in the shape of her woods) entirely at our disposal.

We immediately took the young man's hint, and after clearing our tackle of shrimps and worms, we substituted "trout flies" and returned to our respective stations.

Apparently the Junebug was irresistible. Within a minute my father, the young man and I were busy with strained rods and hissing lines. The young man was the first to yield, his fish having by a sudden rush snapped his lancewood tip. With a few emphatic remarks the young man returned to the house, seemingly without the least desire to see what became of us and our fish.

Playing a fish in the Klamath is the hardest kind of work, owing to the remarkable swiftness of the current. With a fairly light rod, the angler has decidedly the worst of the contest during the first five minutes, as a heavy rainbow trout, merely by setting his fins against the stream, effectually resists any attempt to draw him up stream or to guide him in shore. All that can be done at first is to keep a steady strain on the fish; to attempt any more would mean either a break in the rod or the loss of a valuable casting line. But gradually, as the fish begins to tire, the current sweeps him to the surface, when he is sure to leap into the air. On falling, he either repeats the leap or rushes wildly to and fro, exhausting

himself in a desperate attempt to carry the sagging line against the current. The careful angler will at this point retrieve his line sharply, and force his captive to turn toward the bank, where the water is comparatively dead. Once coaxed into this situation, the capture of the fish is but a question of time. It took me six or seven minutes to induce my first rainbow to leave the middle of the stream, and only three more after that to land him. When I triumphantly held my fish up for my father's inspection, the latter was already fast to his second, having landed his first of 2½ lbs. in 5 minutes. My own weighed exactly a pound more.

I have never before seen fish take bait as the Klamath rainbows took those "trout flies." Although the surface of the stream was covered with bunches of the struggling insects, attesting the superabundance of food in the water, the fish were either so plentiful or so voracious that bites were never at a premium. All that was required to insure five minutes entertainment was to pick a "trout fly" from a bush, put it on a hook and drop the latter into the Klamath.

Fortunately such fishing is very tiresome; and as, moreover, the fish are so large and strong that fully half of those hooked get away, there is little danger of an unsport-manlike slaughter. At the close of my first day's fishing I carefully examined my catch. I had twenty-one fish weighing in the aggregate 51 lbs. Ten of these, including my largest trout weighing 4½ lbs., I had left alive in a large net provided by the proprietor of the Springs for this purpose. These I turned in the stream as I did not care to ship more than 25 lbs. to the city.

On the following day my father and I made an agreement which, to the average sportsmen of the East, may appear ridiculous. We decided to return to the water every fish that failed to weigh 2½ lbs.; and yet, when the day was over, we claimed almost a sackful. Fortunately we were again able to return a number of these to the stream.

In this way we fished on, until the fierce pull of a three-pounder became as familiar to us as the nibble of the darting fontinalis. Then, as was natural, we tired of the sport, and took to the neighboring brooks in search of smaller fish. We returned to San Francisco in a fairly exhausted state, but not too weary to regale every angler of our acquaintance with accounts of the denizens of the Klamath.

We shall remember that rushing stream until the day we fish no more, not because of its wild, romantic beauty, not because of its splendid fish, but rather because Dame Nature, ever generous toward her chief admirer, the angler, has caused to thrive there a curious living bait which the rainbow trout (as if in deference to her foresight) have pledged themselves to swallow on sight.

SUMMIT L. HECHT.

SAN FRANCISCO, CAL.

RAINBOW TROUT IN VERMONT.

THE following letter is so clear an exhibit of the results of artificial introduction of a choice trout, even though the undertaking was experimental and the conditions apparently unfavorable, that we have obtained permission from Commissioner McDonald to make it public. On the question of the six inch trout law we hope to have the views of the Commissioner ere long:

RUTLAND, VT., Aug. 18.—Col. Marshall McDonald, Woods Hole, Mass.: I am happy to be able to reply to your inquiry how the rainbow trout of California introduced into the waters of this vicinity some years ago have bred and what measure of success has attended that venture.

In the late autumn of 1883 a package containing 5,000 eggs from that variety of trout was received at the express office at this place consigned to some person who could not, or would not, pay the charges on them. The express agent offered them to the late Judge Martin Y. Everts, who took them, paid the charges and placed them in the ponds of Dr. C. H. Barber, who was then in charge of a small hatchery near Rutland. The eggs hatched very successfully, the loss being not over 3 per cent. At the proper time the fry were taken from the hatching trough and placed in a series of tanks, three in number, fed by a spring of pure cold water discharging probably 200 gallons per minute. The tanks were each about 8 ft. by 4 ft., and in them the water stood at a depth of about 4 ft. The sides were of wood and the bottom the natural earth found at the bottom of the excavation. There was very little natural food in the water for the trout, and they were not regularly or judiciously fed. In these tanks they remained until about August, 1885, when they were placed in a stream which had formerly been a noted trout stream, but which had been nearly ruined by sawdust and over fishing. In the meantime a very large number had died from lack of proper food and other causes, and it is not believed that over 2,500 ever got into the free water. The next year a few were taken in that stream, and one at least in another stream 10 miles distant, but with a free water way connecting the two. Those taken that year were of the average length of 5 in. In each succeeding year since then the catches of this variety have been more numerous, until, at this time, it is estimated that one-third of all the trout taken in what we may call the parent stream are of the new variety, and almost all the very large ones are rainbows. This year many have been killed from 1½ lbs. to 3½ lbs. in weight. That not all the fish taken are of the original stock is well proven by the fact that fingerlings are taken also, showing that they have bred and that they increase rapidly in waters in which our native trout no longer thrives. The result of this venture has been such as to convince me that this is the trout to breed for restocking streams that have been run out by such causes as sawdust, over fishing, decreased water supply by reason of the destruction of forests, drainage of swamps, etc.

They have certainly increased here very rapidly under what are disadvantageous circumstances for the native trout; they grow more rapidly than the natives, and to a larger size: they are bold risers to the fly, take ground bait freely, and are vigorous fighters. On the other hand they are not so handsome as the native trout, nor are they quite so delicate in flavor. I have seen reports from various places unfavorable to this variety of trout, the effort to plant them not having been successful. There are at least three varieties of trout on the Pacific Slope all of which are classed as "California trout" by those who are not close observers. It may be that this particular trout has not been tried elsewhere; here they have certainly been a success, and I can see no reason why they should not give equally good results in other waters equally favorable. It should be borne in mind that these are not the black-spotted trout of the Rocky Mountains, nor are they the so-called Dolly Varden trout, but they are the true rainbow trout. I very much regret that it is not now possible to learn from what section of the Pacific Coast these eggs came.

I wish you would give me your opinion as to the value of trout just 6 in. in length as breeders. Many States, including Vermont, have the so called 6 in. law. I am unable to see any logical reason for the enactment of any law limiting the size of a trout which may be basketed except this: every

trout should have at least one opportunity to reproduce its species; if the trout of 6 in. in length which is thrown back on the last day of the season is incapable of breeding during the succeeding autumn, he might as well be killed at that time as the next summer, when he will be of legal length, but still has had no opportunity to breed. If the limit were fixed at 8, or better, 9 in., the fish of that size put back in the last week of the season would breed that fall and could be taken during the succeeding summer properly, having had one season in which to do their share toward keeping up the supply. Am I right or wrong in my theory? If you will reply to this theory through FOREST AND STREAM I am sure your opinion will be eagerly read by many people who wish to see sound laws on this subject enacted and enforced.

W. M. Y. W. RIPLEY.

UPPER DELAWARE RIVER FISHING.

FISH Commissioner Henry C. Ford wrote from Egypt Mills, Pa., on Aug. 27 as follows:

"I have been here since June 10 and have found the bass fishing poor, although the river has been in good condition owing to the dryness of the summer. I have taken only two large fish this summer—one 4½ and the other 4½ lbs. Last summer my catch of large fish here was 16, running from 4 lbs. to 5½ lbs. There is the largest number of young bass in the river that I have ever seen. You cannot run your boat ashore without seeing from five to ten young bass of this season's spawning in the shallow water. The conditions this year have been excellent for spawning fish—there has been no high water to wash away the helpless fry.

"The number of young shad returning to sea is marvelous; I have seen more this season than for fifteen years. Toward nightfall the river has been full of them, leaping after the small flies that seem to constitute their food supply. The annual restocking of the headwaters of the Delaware River with shad fry, the destruction of all fish weirs and the abolition of net-fishing after the close of the shad season have made this the best shad river in the United States."

SET LINES IN HEMLOCK LAKE.—The water supply of Rochester, N. Y., is being polluted by dead fish caught on set lines, which are illegally used, and people are naturally indignant over the double outrage. Mr. George D. Reed, of Rochester, has spent the month of August at the lake and in the course of his trolling has taken up five miles of lines at the risk of bodily harm from their owners. Mr. Reed will give the two Willeys who threatened him an opportunity to appear before the grand jury of Ontario county. When hook and line fishermen discover set lines they usually cut them and they sink to the bottom baited; fish take the bait and rot on the hooks. Such lines have frequently been hauled up to the surface, but were not removed on account of the offensive smell of the decayed fish. The good people of Rochester will rally to the aid of Mr. Schwartz in his efforts to prosecute these destroyers of fish and of the public health. The boldness of the law-breakers, who add seining to other illegal fishing, requires swift and ample punishment.

NORTH CAROLINA TROUT STREAMS.—Florence, S. C.—I have just returned from a two months angling expedition through the mountains of Western North Carolina. The trip was in all points a success, as I got 30 days fishing in spite of heavy, washing rains, interfering occasionally with fly-fishing. I killed 1,007 trout, all of better size than in former years. Many individual fish weighed from ½ to 1 lb. and several of the rainbow species weighed from 2 to 3½ lbs. With a delightful climate, tempered by an altitude of from 3,500 to 4,000 ft., this is one of the finest places in the South for the lover of fly fishing. In the streams near the town of Highlands much poaching has been done by the native mountaineers, for the purpose of selling trout of any size to the hotels, the result of which is a large falling off of the catches by fly-fishers in these streams. Such conduct on the part of the hotel-keepers is reprehensible and will ultimately result in their own damage, as sportsmen will shun that particular point.—B.

WOODS HOLL, Mass., Aug. 26.—Bonitos have just made their appearance in the harbor to-day, they are feeding on silversides and young herring. A number of them were caught in Vineyard Sound at Menemsha Bight. The beautiful fish leap out of water almost as freely as bluefish, and are nearly equal to that species in food and game qualities. They can be readily taken by trolling with squid or minnow. About dark last evening the little harbor was said to be full of large squeteague. Bluefish are decreasing and striped bass increasing.—T. H. B.

HENDERSON HARBOR, N. Y., Aug. 31.—Arriving here I find devotees of the rod and reel having the grandest kind of fun catching black bass and pickerel, some of which weigh among the teens. I believe Mr. Burtis, of New York carries home the banner record of last week, having reached the top weight of a 14 lb. pickerel and 4 lb. bass.—SID BROMLEY.

GLOUCESTER, Mass., Sept. 1.—Bluefish struck into Ipswich Bay and Essex River about a fortnight ago; but I have not heard that any were taken. The harbor is full of small mackerel 6 or 7 in. long. I have seen the boys catching smelts from the wharves recently.—E. F. L.

Fishculture.

NEW YORK FISH COMMISSION.—At the monthly meeting last Tuesday the Commissioners appointed John Huink's protector in the Sixth District. The annual appropriation was distributed among the hatcheries as follows: Caledonia \$12,000, Cold Spring \$5,500, Adirondack \$4,500, Sacandaga \$3,000, Fulton Chain \$2,500; contingent expenses \$1,500, and for last year's deficit and a car house for the new fish car \$1,000; total of \$30,000 allowed. Commissioner Bowman will be absent six months on a trip around the world. During his absence Mr. Burden will have charge of Caledonia.

RESULT OF PLANTING COD.—On June 20, 1891, Chas. Perry was on a wharf at Gloucester, Mass., and saw a very large school of small fish which, he thought, resembled cod, but the number was so great that he could not believe it possible that they were cod. He dipped into the school with a bucket and caught three of the fish, and they proved to be cod from an inch to 1½ in. long. These are doubtless the result of planting fry in the harbor by the Fish Commission.

The Kennel.

FIXTURES.

DOG SHOWS.

Sept. 8 to 11.—First Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Ont.
Sept. 14 to 18.—Toronto Industrial Exhibition Association Third International Dog Show, at Toronto. C. A. Stone, Sec'y and Supt.
Sept. 22 to 25.—Inaugural International Dog Show of the Montreal Exposition Company, at Montreal, Canada. Entries close Sept. 8. J. S. Robertson, Secretary.
Sept. 23 to 26.—Inaugural Show of the Blue Grass Kennel Club, at Lexington, Ky. Rogers Williams, Sec'y.
Sept. 29 to Oct. 1.—Third Annual Dog Show, in connection with the Central Canada Fair, at Ottawa, Ont. Alfred Geddes, Supt.
Dec. 4 to 8.—Fourth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.
Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.
Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.

1892.

Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInnes, Sec'y.
Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. E. Capers, Secretary, Greenville, S. C.
Feb. 3 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.
Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.
March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.
March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Little, Sec'y.
April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.
April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.
Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.
Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. Davis, Secretary, Philadelphia, Pa.
Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.
Nov. 23.—Second Annual Trials of the National Beagle Club, at Nanuet, Rockland county, N. Y. F. W. Chapman, Sec'y.
Nov. 30.—Central Field Trial Club's Thirteenth Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y, 44 and 46 Wall street, New York city.
Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1892.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.
Jan. 18.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgariff, Sec'y.
—Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

"IS IT NOT WORTH CONSIDERING?"

UNDER this query we had something to say, in our issue of Aug. 27, respecting the American Kennel Club and the libel suits instituted against its officers and some of the associate members. We pointed out that this litigation was working decided injury to kennel interests, and suggested that it might be worth the while of those competent to do so to devise some means of averting the consequences which threaten. What we had to say appears to have excited much interest, if we may judge from the numerous printed comments. Among these comments we note only one of a dissenting tenor, and the mode of dissent therein chosen is to hint that in making our suggestion of Aug. 27 we were not acting primarily of our own accord, but that some one else had pressed the button and we were doing the rest. The identity of this hypothetical personage was not disclosed, but it was supposed to have been a forger (possibly a servant girl), who had signed Mr. J. Otto Donner's name (*Clarum et venerabile nomen*) to a fraudulent night telegram. To this we have only to say (and in saying it we are robbing no one, male or female, of any credit due them), that the article in question was written wholly and exclusively of our own accord, at our own instance, and without any previous hint, suggestion or request of anybody. It embodied our own deliberate, sincere convictions. We believe that it reflected the earnest feeling of many thoughtful men solicitous for American kennel interests. And whatever of truthful presentation of facts and whatever of sensible suggestion of expediency were embodied in that article are not likely to be weakened by ascribing it to a grotesque origin.

KINGSTON DOG SHOW.

ONE of the best arranged shows I ever attended was held at Kingston, Ont., Canada, from Sept. 1 to 4. Their first venture was held last year in connection with the fair, and so much local interest was created in dogs thereby that it was deemed advisable to increase it, if possible, by repeating the experiment this year, although the fair would not be held. Under the able and energetic management of Mr. H. C. Corbett, the idea became something tangible, and last week's show was the result. Held in the skating rink, than which no better building could be built for the purpose, the show was well ventilated, light and clean. The benches were arranged down each side, the end and the middle with very wide alleys between. A very good plan was pursued in having the smaller dogs benched on a stand in the middle of the rink, allowing about a yard's breadth of boarding between the spectators and the cages, so that no one could touch or tease the dogs. The stalls were very roomy, and altogether the show was well arranged. At no time was there any smell, Sanitas sawdust being used, though hardly needed. The floor being of earth, was admirably adapted to show the dogs off naturally. Mr. H. C. Corbett proved himself an efficient manager, and we heard no complaints. A room was set aside for exhibitors, and this is something that will be appreciated at every show. Mr. Oldrewe, Mr. Bates and Mr. Higgs all worked hard to make the show a success. Judging did not commence till Wednesday night, to the time stated in the premium lists. Dr. Wesley Mills judged pointers, setters and all spaniels excepting Clumbers, which were taken by Mr. Alfred Geddes, of Ottawa, and Mr. H. W. Lacy took the remainder of the classes; judging being completed by Wednesday night, with the exception of two or three specials.

Some good dogs were shown, notably in the pointer, setter, fox-terrier, St. Bernard, mastiff and pug classes. The attendance, owing no doubt to the distance from the center

of the town, was not as it should have been, although the club will hardly lose very much, as expenses were not very heavy. Dr. Mills and Mr. Geddes commenced the judging, but I will give the breeds by the catalogue.

MASTIFFS.

The entry of mastiffs numbered nine, three only of which had much pretension to form. The challenge class did not fill. In open dogs it did not take the judge long to decide on the winner as Mode, shown in tip top shape, was points in front of Munting Minor in skull, muzzle, ear, eye, bone and body; at the same time the latter has his noticeable points and shows his good breeding. Eufrid, third, loses to both the others in head, a bit dishd face and body. The others in this class were too racy built to command notice. The open bitch class was poor, Bess, out of shape, met a superior one in Zilda, who is deeper and squarer in muzzle, has more girth of skull, better body and coat, and carries her ears much better. Neither are good ones and first was withheld. The other in the class was even worse still and was sent out. Mastiffs are not improving in Canada as they should do; the custom laws may have something to do with the lack of improvement in some breeds, and when the present restrictions are removed no doubt there will be a greater demand for well bred stock from American kennels.

ST. BERNARDS.

The same applies in part to St. Bernards, the New York St. Bernard Kennels having things all their own way. In the challenge class our old friend Hector, looking as young and vigorous as ever, was alone. In the open dog class Mr. Reick's new dog Kingston Regent made his first appearance under his new ownership. This dog will stand a good deal of critical examination, and requires it to gain a proper appreciation of his good points. His lack of blaze and dark coloring on head, of course, detract from his appearance to the casual observer, but there is no gainsaying his depth and squareness of muzzle, massive skull, good ear, straight, heavily boned leg, depth of chest and rich color: he might be a bit longer in body, better in pasterns and feet, and could easily carry twenty pounds more flesh. He is a good mover. This son of the late Prince Regent had no competition. In bitches the turnout, though limited to three, was of good quality. Mr. Reick's Republican Belle and Zenith had a close fight, the former winning in head, depth of chest and bone; the third prize winner, Nun Nicer, shows a good deal of quality, but was smaller than the others and out of coat.

GREYHOUNDS.

Several well-known dogs showed up in these classes. The challenge division brought champion Harmony into the ring, she carries her six years very well, is well muscled and as spry as a two-year-old. In open dogs there was a very close competition between Hazlehurst and Ranger, and it was Hazlehurst's superior front and hind legs from thigh down, being much better in feet and more let down in stifles, that gained him the ribbon, as Ranger's nice ribs, excellent loin and well-developed quarters made it difficult to pass him over. He afterward divided the condition prize with the pointer King Bow's Bow. The third prize fell to Elcho, who this time could not be made to raise his ears at all, having evidently, like every well-informed dog, read the FOREST AND STREAM; he was in nice shape, and is a well-formed little one from the head back; it was a close thing for him, however, with Chester, reserve, who, though only five months old, was as big as any greyhound in the class, with immense straight bone, good head and body; if he does not grow too coarse, which appears very likely, he will be heard from again. Open bitches was a poor show. The winner, Clio, is just a fair blue-colored greyhound, she is a bit long-cast, and while one cannot say she has really any bad points, still she hardly shows herself as a bitch of much quality; lack of rib-development is her worst feature. Second and third prizes were withheld, and two letters given to Bess, more as a sop to Cerberus than anything else, for I could find little merit in her when I saw her again after judging.

BEAGLES.

These merry little hounds showed up in goodly numbers and competition was keen. In challenge dogs Royal Krueger and Racer, Jr., fought their battle over again, with the result that Royal Krueger showed superior in head and body; Racer carries his brush better, "Roy" turns one foot out a bit now. Una, looking well, had the ladies' division to herself. In open dogs the competition was very close and took some time to decide, for when one dog beat the other in one point he himself was deficient in some that his competitors possessed. Tricotrin's excellent front and good body eventually pulled him through a winner over Ranger, who loses in head, coat and body, but beats Tricotrin in carriage of stern, and also is better in body and front than Roy K., who did not look so well as when shown at Baltimore. The bitch class was another good one, with lots of work for the judge. Elf, hardly herself, beats Fanny K. in front, body and coat. Baby W., third, is well known. Music, reserve, has a nice skull, but muzzle is not square enough, is deficient in bone, has a fair feel of coat. Emeline, vhc., is a bit too long in body and coat, not quite up to the mark, muzzle not short or square enough. A class was made for under 12 in., and in this Ava W. had little difficulty in adding another to her score, for though Dot has a nice cobby body she is beaten in head, front and carriage of brush by the other.

ENGLISH SETTERS—(DR. MILLS).

The gathering in this breed was nothing very startling. The challenge class did not fill. Edgemark was well ahead of anything else in the open class. He is well known; is a nicely formed dog and won easily. Benzine, second, was at Cleveland in the spring; he could be improved in stop; his legs and feet are his best points. Kent's Rex, third, owned by the secretary, is a trifle out in front, is a bit cloddy in body but has a nice-shaped head. Sir Edward, vhc., might be better in pasterns and loin, and is out of coat. Grouse, vhc., is only a fair one, and was described in our Ottawa report. Glen II. is coarse in head, leggy and not very good in feet. In bitches, a Kingston bitch, Liberty, won nicely over Ruby K. in head, the latter being pinched in muzzle and not so good in front, showing also signs of her recent maternal duties. Mado, third, has a firm over one eye, is open in feet and snipy muzzled. Albert's Nellie, a noted winner, was marked absent. The novice class was filled with Kingston dogs, and Kent's Rex, already described, had no difficulty in pulling to the front, though the seven-months-old pup Sir Harold is quite promising, having good bone and front. Young London, third, is coarse in head and has wretched feet. Glen II., vhc., I did not see in his stall. Altogether the exhibit of these setters was better than one often meets with at shows of this size.

IRISH SETTERS.

With the Seminole and Glendyne Kennels represented the show of Irish setters, though limited, was entitled to some respect as to quality. No challenge dogs were entered, and in the open the struggle for honors was easily between Seminole and Glen Jarvis, and the judge following out his theory gave them plenty of exercise for that day at any rate. Seminole eventually gained the verdict, beating Glen Jarvis in head and color; Jack, third, is more on the English type of head, especially in skull, is nice and straight in front as far as his feet, which however turn out a bit; in color he is hardly rich enough. In bitches Josie D. won easily, being better in muzzle, body, color and having good serviceable legs and feet; she shows white on chest and muzzle. Aureore, second, is a poor one, slack in back, snipy muzzle and light in color. The other entry was of no account, but had a nice St. Bernard blaze.

GORDON SETTERS.

In challenge dogs the Doctor rather put the cart before the horse, as Ivanhoe is a better Gordon all around than his kennel mate, Leo B., in head and coloring. A class was made for Duchess of Waverly; she is well known. In the open dogs first was withheld and second given to a black and tan dog with little pretensions to type. In bitches, a young daughter of champion Little Boy, Lady Waverly, was given the only prize and that first. She is throaty, has a poor muzzle and will hardly come up to the mark generally. Com. was given to Bloom, why one can hardly tell, as she had a front as wide and of the shape of a barrel, with no redeeming point. This gathering of Gordons is not by any means as good as we shall very likely see later on.

POINTERS.

Several well-known animals were seen on the benches in this breed, and until the judge divided the dogs into their respective classes, according to weight, it was hard to separate them. In heavy challenge class the well known Belle Randolph had things to herself; she was looking in nice condition. In light weights Pommeroy Sec took the dog prize, and his new kennel companion that for bitches. As only diploma cards were given in the challenge class this liberal division did not affect the club financially. A similar division was made in the open dogs, where the struggle in heavy-weight dogs proved to be between Tempest and King Bow's Bow, and the judge, being unable to decide, placed them equal, whereas Tempest can, barring head, give away a few points and win. Ossining and Dash fought it out in the light weight dogs, and the well-known Ossining's defeat of the others was never in doubt, as Dash, given second, is lathy, poor in pasterns and feet. The sweet-headed Lady Graphic won easily in bitches over Floss, the former has many prizes to her credit; Floss should not have had a card, as her miserable hindlegs, like clothes props, should have put her out, not to mention her poor feet. With the exception, therefore, of several well-known American dogs, and Mr. Corbett's dogs, the pointer classes were a failure.

GREAT DANES.

There was only one shown, and it created considerable local interest, as the Kingstons are not accustomed to the breed. Minerva's Fawn is nicely made in body and legs but her head has not strength or character enough, and is snipy in muzzle, but she is a pretty animal withal, and is a daughter of Don Caesar, the cream-colored dog that won so many prizes some few years since.

CLUMBER SPANIELS.—(A. GEDDES.)

There were seven Clumbers entered, and Mr. Geddes had not much trouble in placing them. In challenge class Boss III. was alone. In open dogs a nice typical dog, Darby, won somewhat easily from Johnny, Jr., that will be remembered as winning so often in the spring circuit, he is beaten in head, front and body by the winner. La Grippe was absent. In bitches Lucy II. was properly placed at the head of affairs; is better in head and body than Vic, second, who might have given way to Lady Joan, as she is long in head, weak in pastern, and body should be deeper.

FIELD AND COCKER SPANIELS.—(DR. MILLS.)

Saybrook Dolly, the only entry, was absent. In open dogs first was withheld and second given to a bad fronted dog called Jack, faulty in muzzle and eyes, but possessing a fair body; the others were just ordinary long-legged specimens. The field spaniels in Canada are not by any means on a par with the cockers in regard to merit. In cocker spaniel challenge class, Ch. Rabbi was placed over King of Obos. Both are well known and the decision was right. In open dogs Oban should have given way to Obadiah, as he is very bad in front, and loses to the other in loin and quarters. Rex Obo, third, is too long in body, knuckles over, turns her feet out, and is too long in muzzle, nice coat. Tim Obo, vhc., has a too domy skull, a dachshund front, and is undershot, body, quarters and coat good. Major is too big; will be a field spaniel very shortly, is wavy coated and muzzle is not square enough. In the bitch class, I Say, though out of coat and light in body, shows a great deal of cocker type. She is a trifle long in head, good straight front; just recovering from a bad attack of distemper. She is hardly fit to show yet. Dot Smile, second, turns her feet out a bit, has a nice head, although a trifle long; is faulty in loin and quarters. Vic, third, is a bit on the leg, narrow fronted, and too large sized. Corinne, reserve, has light eyes, is flat sided, but fairly good otherwise. Busy, vhc., ought to have run. Dot Smile close for second money, as she is more of a cocker, her skull is a bit domy, but she has a nice front and body. Floss Obo, he., is a bit sharp muzzled, nice body, legs and feet; might have been placed higher up. In other than black dogs, Rufus, the red one, had an easy win over Jacco, who was given vhc., a miserable specimen, undershot at eighth of an inch, with little type about it. In bitches, Lady of Learning was transferred to challenge class, and we are told, not being counted good enough, was given only second. This bitch is a typical little cocker, and beats the others all to pieces. Tottie, first in the regular class, has a poor head, but is well off on the leg, and is a good specimen of the rough and ready working type. Lou R. is young yet, 6 months, long in head, needs time in body. In the novice class, I Say took another ribbon, Tottie coming next. Major, third, has a bit undershot, has not depth of body enough, and has a film on one eye. The cocker spaniels made a good showing considering the distance from the headquarters of the breed in Canada.

COLLIES.

One cannot feel complimented on the class of collies shown, and but for the Seminole Kennels, which had a sort of third string here, there would have been little quality. In challenge dogs Roslyn Dandy, looking in good coat, was alone, and Rowdy, from the same kennels, despite his lack of coat and indifferent body and relying on his long clean head, was nicely ahead of the local dog, Bob, who is a bit coarse in head, lacks undercoat, but is fair otherwise: Ross has a better head than the second prize winner but ears are carried flat to skull, à la fox-terrier, he also lacks undercoat, and coat is very open. In bitches Cora II. had an easy win, though she herself is not a good one; second was withheld and one or two very bad ones turned out; Sadie took third, she is a blue merl, carries her ears well, though they are too big, head is a little coarse, but she has a nice coat and looks a worker all over; Fan and Rita, two puppies, too short-faced but boasting nice limbs and coat, were given two cards.

BULLDOGS.

Mr. Woodward's Bo'swain was the only entry, and of course tripped out with the blue ribbon; he was shown in excellent condition.

BULL-TERRIERS.

There were seven entries in the bull-terrier class and considerable weeding was required, some of them might have been mentioned in the bulldog class. Eventually the prize fell to Watchful Wagtail, of the three left in, his nice head and well-turned body is marred somewhat by his indifferent front; a puppy, Duke of Wellington, ran the winner close, and is by Bendigo out of a bitch that Mr. Dole lost in Toronto last year, so we hear, anyhow he is a good puppy, excellent bone and head, and only needs time; Baron II. turns his feet out, is cheeky and could be improved in body.

FOX-TERRIERS.

These were the best filled classes in the show, and though there were no flyers present, they gave one considerable work

to weigh all points. A class of moderate dogs is notoriously a difficult one to judge unless one withholds all the prizes and sends them all out. In open dogs the struggle was between Blemton Trump and the new dog Painter. Neither is very good in head; Trump carried his ears truer and I like his front better; he also gains a trifle in coat and body; Painter's brindle markings are objectionable. Nobody's Child, third, had the best head in the class, but loses in front; loin and quarters seem a bit weak; needs a little kitchen physic when he will show up much better. I take this opportunity to refer to a letter I received before the Kingston show, calling my attention to this dog, that it had been under treatment and to look out for a weakness in loin, etc., which perhaps might not be noticeable in the ring. The letter was signed C. J. R., and postmarked Toronto. These are the petty acts of narrow-minded individuals, who are the very people who bring dogs and dog dealing into dispute. Whether the dog had been bought for \$1 or \$1,000 mattered nothing to me when in the ring. Tupper, he., has a fairish head to recommend it, too light and lathy in body though. Punch, c., has grown far too big and coarse; Zig Zag, Jr., carries his ears poorly, legs and feet fair, and John Peel, with a commended card over it when I took my notes, gave me quite a cold shiver, evidently had not its company manners on, for it showed him a bad one. Our advice to the Arden Kennels is to clear out their stock and get something with more bone, substance and terrier character. Winning specials with such stock is a parody on dog shows. The bitch class was a better one, the struggle lying between Fussie and Dudley Slave. The former is a well-made bitch, nice long head, well carried ears, good neck and straight front, feet might be a little more compact though they are not open, nicely turned body and jaunty action, coat could be improved, is soft at present; she is, I believe, a granddaughter of old Fennel's. Dudley Slave was heavy in whelp, which made her look slack in back; her front is not good, and ears are not carried close enough to head; she beats in coat and terrier character. Fly came next. She is coarsish in head and carries her ears too high. Judy, vhc., ears wrong, front not a terrier's front, nice body, fair head. Dot, vhc., is bad in front, ears poorly carried. Lady Zig Zag, he., is light and weedy. Most of the commended cards should have been withheld. In novice class Fussie beat Nobody's Child, and Jacko, third, is a rare terrier from the head back, but head and neck entirely too coarse and thick.

DANDIE DINMONTS, ETC.

In the challenge class the Skye terrier Sir Stafford, in nice condition, added another prize to his string. We are rather uncertain about the Dandy open class, the winner beats the other in head, coat and body, the yellow one being too woolly-coated and cloddy. In Bedlington, first was withheld and second given to Nettle, out of shape and faulty in head and front.

BLACK AND TAN TERRIERS.

First went to Grace, a nice little-bodied bitch, cleaner in head and markings than Rochelle Scot, second, who is a bit coarse.

TOY SPANIELS.

The noted winner Calumet Alice, in the absence of her kennel mate, Cromwell, in the challenge class, was alone. She has been described before. In open class, Calumet's Ben d'Or, the only entry, was absent.

PUGS.

In challenge class Bob Ivy had little trouble in beating old Treasure, who shows too many signs of age to hold his own as in days of yore. Pretty little Bessie, in tiptop shape, was alone in her class. In open dogs, Curtis, the novice winner at New York this spring, though very dark in head, beat Kash, Jr., in head and coat. Fritz Emmett, big in ears and a bit coarse all over, came close up next. Bradford Rowdy, reserve, loses in head and curl. Nigger showed too much white on chest, but is a well-formed pug. In bitches, Lady Victoria and Cribbage were placed in the order named; they have been described before. Pearl de Jardin, third, is a puppy that needs time to let down in body, nicish head and ears. Peggie is too fat and skull flat, nice body.

FOXHOUNDS, ETC.

A good show of these hounds, the well-known Dan taking first over Bell, who loses in head and front. Toner, third, is too bloodhoundy but is a strongly-made hound. Bell, vhc., is well whelp but is a nice-headed hound, with good coat. Grailer, vhc., is good in body, legs and coat, but head is faulty. Valdemir, the Russian wolfhound, looking well, was the only entry in his breed. Newfoundlanders had two entries: one had the foundations of a Newfoundland, fair head, coat straight on back but gone curly at sides, though it is just the right texture; he took first and the other curly, woolly-coated specimen had to be content with very barren honors.

MISCELLANEOUS CLASS.

This class should have been divided in weights. Not being able to do so I gave Jack Shepard, the bloodhound, first, Gill, the well-known dachshund, second, and Frank Dole's poodle Friday third, a shaved Esquimaux dog vhc. and the toy terrier Kathleen he.; a very good dachshund with a bushy tail got some letters too. This brought the judging to a close. H. W. L.

PRIZE LIST.

MASTIFFS.—Dogs: 1st, Hugh Falconer's Mode; 2d, John Massey's Misting Minor; 3d, Clumber Kennels' Eufroid. Bitches: 1st, withheld; 2d, Henry Folger's Zilda; 3d, Hugh Falconer's Bess.

ST. BERNARDS.—SMOOTH—CHALLENGE—1st, New York St. Bernard Kennels' Hector. —OPEN—Dogs: 1st, New York St. Bernard Kennels' Kingston Regent. Bitches: 1st and 2d, New York St. Bernard Kennels' Republican Belle and Zenith; 3d, F. E. Lamb's Nun Nicer.

GREYHOUNDS.—CHALLENGE—1st, Hornell-Harmony Kennels' champion Harmon. —OPEN—Dogs: 1st, Hornell-Harmony Kennels' Hazelhurst; 2d, Seaton Kennels' Ranger; 3d, Mount Royal Kennels' Elcho. Reserve, E. H. Pense's Chester. Bitches: 1st, C. L. Curtis's Ohio; 2d and 3d, withheld. High com., A. G. H. Lutton's Bess.

BEAGLES.—CHALLENGE—Equal 1st, Hornell-Harmony Kennels' champion Royal Krueger and champion Uua; 2d, H. L. Kreuder's champion Racer, Jr.—OPEN—Dogs: 1st, Hornell-Harmony Kennels' Tricotrin; 2d, C. L. Curtis's Ranger; 3d, H. L. Kreuder's Roy K. Bitches: 1st, Hornell-Harmony Kennels' Elf; 2d, H. L. Kreuder's Fanny K.; 3d, Hornell-Harmony Kennels' Baby W. Reserve, C. L. Curtis's Music. Very high com., H. L. Kreuder's Emeline.—UNDER 12½.—1st, Hornell-Harmony Kennels' Ava W.; 2d, F. P. Robson's Dot.

ENGLISH SETTERS.—Dogs: 1st, F. S. Brown's Edgemark; 2d, H. Northwood's Benzine; 3d, Kingston and Bancroft Kennels' Kent's Rex. Very high com., Kingston and Bancroft Kennels' Grouse, and Dr. E. Hair's Sir Edward. High com., G. H. Allen's Glen II. Bitches: 1st, Kingston and Bancroft Kennels' Liberty II.; 2d, R. E. Kent's Ruby K.; 3d, M. Switzer's Mado.—NOVICE—1st, Kingston and Bancroft Kennels' Kent's Rex; 2d, E. Sears's Sir Harold; 3d, John Theobald's Young London. Very high com., G. H. Allen's Glen II.

IRISH SETTERS.—Dogs: 1st, Seminole Kennels' Seminole; 2d, M. Flynn, Jr.'s Glen Jarvis; 3d, J. B. Walkem's Jock. Bitches: 1st, Kingston and Bancroft Kennels' Josie D.; 2d, Seminole Kennels' Aureole.

GORDON SETTERS.—CHALLENGE—Dogs: 1st and 2d, S. G. Dixon's Leo B. and Ivanhoe. Bitches: 1st, S. G. Dixon's Duchess of Waverly.

—OPEN—Dogs: 1st, withheld; 2d, Geo. Fleet's Victor. Bitches: 1st, Dr. L. G. Dixon's Lady Waverly. Com., Geo. Fleet's Bloom.

POINTERS.—CHALLENGE—UNDER 55LBS.—Dogs: 1st, W. H. Hyland's Pommeroy Sec. Bitches: 1st, W. H. Hyland's Fan N.—OVER 55LBS.—1st, Robert Leslie's champion Belle Randolph.—OPEN—55LBS. AND OVER—Dogs: Equal 1st, Kingston and Bancroft Kennels' King Bow's Boy and W. Ledyard's Tempest.—UNDER 55LBS.—1st, W. H. Hyland's Ossining; 2d, Thos. Brigg's Dash. Bitches: 1st, W. H. Hyland's Lady Graphic; 2d, Tim Rigby's Floss.

GREAT DANES.—1st, Mount Royal Kennels' Minerva's Fawn. CLUMBER SPANIELS.—CHALLENGE—1st, Clumber Kennels'

champion Boss III.—OPEN—Dogs: 1st, G. B. Smart's Darby; 2d, Clumber Kennels' Lucy II. and Vic; 3d, Clumber Kennels' Lady Joan.

FIELD SPANIELS.—CHALLENGE—Absent.—OPEN—1st, withheld; 2d, Col. John Campbell's Jack.

COCKER SPANIELS.—CHALLENGE—1st, Andrew Laidlaw's champion Rabbi; 2d, Geo. Bell's King of Obos. —OPEN—Dogs: 1st, Andrew Laidlaw's Oban; 2d, Ancient and Modern Spaniel Kennels' Obadiah; 3d, T. McK. Robertson's Rex. Very high com., Cortown Cocker Kennels' Tim Obo. High com., F. H. Cunningham's M for Bitches: 1st, Ancient and Modern Spaniel Kennels' I Say; 2d, Cortown Cocker Kennels' Dot Smile; 3d, W. G. McCulloch's Vic. Reserve, T. H. Cunningham's Corinne. Very high com., Alfred Gaddes's Obo G. and S. D. G. Shaw's Busy. High com., T. McK. Robertson's Moss Obo.—OTHER THAN BLACK—Dogs: 1st, F. J. Leigh's Rufus. Very high com., D. S. Robertson's Jacco. Bitches: 1st, John Orm's Tottie; 2d, Ancient and Modern Kennels' Low R.—NOVICE—ANY COLOR—1st, Ancient and Modern Kennels' I Say; 2d, John Orm's Tottie; 3d, Wm. Gibb's Major. Reserve, F. H. Cunningham's Corinne. Very high com., T. McK. Robertson's Rex Obo. High com., S. S. Robertson's Jacco, Cortown Cocker Kennels' Wanda, and F. H. Cunningham's Major.

COLLIES.—CHALLENGE—1st, Seminole Kennels' Roslyn Dandy. —OPEN—Dogs: 1st, Seminole Kennels' Rowdy; 2d, Carl Y. Ford's Bob; 3d, A. G. H. Lutton's Ross. Bitches: 1st, Seminole Kennels' Cora II.; 2d, withheld; 3d, G. M. Oldrieve's Sadie. High com., William Nickle's Bonnie Jean and A. G. H. Lutton's Rosa.

BULLDOGS.—1st, Edwin A. Woodward's Bo'swain.

BULL-TERRIERS.—1st, W. C. Sneden's Watchful Wagtail; 2d, R. Wright's Duke of Wellington; 3d, A. Ingle's Baron II.

FOX-TERRIERS.—Dogs: 1st, J. K. Macdonald's Plumpton Trump; 2d, Henry Northwood's Painter; 3d, Ancient and Modern Kennels' Nobody's Child. High com., John J. Bennett's Tupper. Com., Geo. Hansen's John Peel and Arden Kennels' Punch and Zig Zag. Bitches: 1st, V. G. Hooper's Fussie; 2d, G. S. Oldrieve's Dudley Slave; 3d, A. W. Garrett's Fly. Very high com., Arden Kennels' Judy and Dot. High com., Arden Kennels' Lady Zig Zag. Com., Arden Kennels' Arden Belle. W. G. McCulloch's Sadie, and Wm. Leigh's Vic.—NOVICE—1st, V. G. Hooper's Fussie; 2d, Ancient and Modern Kennels' Nobody's Child; 3d, Wm. Hopkins' Jacko. Reserve, John J. Biggs' Jennie Grey. Very high com., Arden Kennels' Dot. High com., Arden Kennels' Arden Belle and John J. Bennett's Pepper. Com., A. M. Oldrieve's Burlington Buz, and Arden Kennels' Zig Zag, Jr. and Lady Zig Zag.

SKYE, DANDIE DINMONTS, ETC.—CHALLENGE—1st, C. A. Shiner's champion Sir Stafford. —OPEN—1st and 2d, C. J. Daniel's Valentine and Faw (Dandie Dinmonts).

BEDLINGTON TERRIERS.—1st, withheld; 2d, Allan Treblecock's Nettle.

BLACK AND TAN TERRIERS.—1st, A. E. Elmer's Grace; 2d, Miss Lizzie Wright's Rochelle Scot.

KING CHARLES AND BLENHEIM SPANIELS.—CHALLENGE—1st, A. M. Goldsmith's Calumet Alice.—OPEN—Absent.

PUGS.—CHALLENGE—Dogs: 1st, W. H. Crver's Bob Ivy. Reserve, Seminole Kennels' champion Treasure. Bitches: 1st, W. H. Crver's Bessie.—OPEN—Dogs: 1st, Miss M. Ballentine's Curtis; 2d, Seminole Kennels' Kash, Jr.; 3d, W. H. Crver's Fritz. Reserve, J. Brownell's Bradford Rowdy. Very high com., A. G. H. Lutton's Nigger. Bitches: 1st and 2d, W. H. Crver's Lady Victoria and Cribbage; 3d, Seminole Kennels' Pearl de Jardin. Com., J. T. Catlin's Peggie.

FOXHOUNDS.—1st, Hornell-Harmony Kennels' Dan I; 2d, N. Switzer's Bell; 3d, A. H. Milne's Toner. Reserve, R. Milne's Bell. Very high com., M. Switzer's Grailer.

RUSSIAN WOLFHOUNDS.—1st, Hornell-Harmony Kennels' Valdemir.

NEWFOUNDLANDS.—1st, J. A. Minnes's Czar.

MISCELLANEOUS.—1st, R. G. Huntingdon's Jack Shepherd; 2d, B. F. Lewis's Gill; 3d, F. D. F. Dole's Friday. Very high com., G. E. Rose's Dweller (Esquimaux). High com., A. R. Milne's Kathleen (Yorkshire Toy).

SPECIALS.

Best mastiff in open class, Mode; best St. Bernard in open class, Kingston Regent; best foxhound, Dan; best greyhound, champion Harmon; best English setter in open class, Edgemark; best in novice class, King's Rex; best Irish setter dog in open class, Seminole; best Gordon in challenge class, Leo B.; best pointer in open class, King Bow's Bow (2); best Clumber dog in open class, Darby; best bitch, Lucy II.; best field spaniel in open class, Jack; best cocker in challenge class, champion Rabbi; best cocker in open class, Oban; best bitch, I Say (2); best collie bitch in open class, Cora II. (2); best dog in open class, Roslyn Rowdy; best fox-terrier in open class, Blemton Tricket; best fox-terrier in novice class, Fussie; best Irish, Bedlington or Airedale terrier, Nellie; best black and tan terrier in show, Grace; best toy spaniel, Calumet Alice; best pug in open class, Lady Victoria; best great Dane in the show, Minerva's Fawn; best in miscellaneous class, Jack Shepard (bloodhound); best kind of fox-terrier, Arden Kennels' largest entry of open class, Arden Kennels; best pair of English setters, King's Rex and Liberty II.; best conditioned dog, divided between greyhound Ranger and pointer King's Rex.

THE HAMILTON SHOW.

[Special to Forest and Stream.]

HAMILTON, Ont., Sept. 8.—The Hamilton show opened this morning with as fine a class of dogs present as one could wish. There are very few poor ones. The building is excellently adapted for show, and Spratts new benching is very effective. The arrangements and the management of the show excel anything I ever saw. Everything goes like clockwork, to the minute dial. There is a very representative lot of old fanciers present, among them Messrs. Wells, Laidlaw, Nelles, Bell, Boggs, the two Lewises, Pritchard, Mann, Naylor, Thomas, Ludwell, McDonald, Kirk, Mercer, Haldeman, Waters and many others.

Judging commenced at 2 P. M. in two rings. A nice crowd attended all day, and to-night the building is crammed. Mr. Stewart and his lieutenants deserve great praise for their intelligent hard work. The awards made to-day follow:

Mastiffs.—Challenge, first, second and third, Whitney's Ilford Chancellor, Caution's Own Daughter and Lady Coleus. Open class, first, Whitney's Miss Caution; second, Falconer's Mode; third, Massey's Misting Minor. Vhc., Forbes's Grimsby.

St. Bernards.—Challenge, Reick's Hector. Open dogs, first, Reick's Kingston Regent; second, Guillot's Othello; third, Peninsular Kennels' Caspar. Reserve, Petersburg Don Phyllis. Bitches, first and second, Reick's Republican Belle and Zenith; third, Petersburg Glenisla. Reserve, Lamb's Nun Nicer. Vhc., Thompson's Lady Amber.

Great Danes.—Challenge, Wolverine Kennels' Favor. Open class, first, Wolverine's Brutus; second, Mills's Minodora's Fawn; third, Wolverine's Pascha. Vhc., Sanford's Gele.

Newfoundlands.—Second, Clobbery's Jumbo.

Wolfhounds.—Hendrie's Squachan.

Greyhounds.—Challenge, Purbeck's Gem of the Season, Page Maud Torrington. Open dogs, Purbeck's Ornatus and Pion's Pembroke, Seaton Kennels' Ranger. Bitches, Purbeck's Lilly of Gainsboro and Bestwood Daisy. Others on account.

Foxhounds.—Proper's Ranger and Stormer; first withheld. Beagles.—Challenge, Rockland Kennels' Racer. Open dogs, Rockland's Roy K., Campion's True Boy and Banjo. Bitches, Brey's June, Rockland's Emmeline, Maybee's Dainty. Reserve, Fanny K.

Pointers.—Challenge, Hyland's Pommeroy Sec and Fan N., Leslie's Belle Randolph. Open dogs, Hyland's Ossining, Ledyard's Tempest. Bitches, Hyland's Lady Graphic, Shaw's Phantom.

English Setters.—Challenge, Wells' Cambrano. Open dogs, Brown's Edgemark, Wells' Romney, Boggs's Viscount. Reserve, Boggs's Tony Gladstone. Vhc., Wells' Matane, Northwood's Benzine. Bitches, Boggs's Victress Lewellin, Hartman's Albert's Nellie, Lewis's Nia. Vhc., Wells' Dinah C. Hc., Wells' Daphne.

Irish Setters.—Open dogs, first, Seminole Kennels' Seminole; second, Glendyane Kennels' Glen Jarvis; third, Seminole Kennels' Eleo. Bitches, first, Buttersby Kennels' Goldsmith Maid; second, Campion's Bell. Vhc., Seminole Kennels' Rose Palmerston.

Gordon Setters.—Challenge, Dixon's Ivanhoe, Leo B. and Duchess of Waverley. Open, dogs, Plett's Victor, Evans's Gordon; first withheld. Bitches, Dixon's Lady Waverley; others withheld.

Irish Water Spaniels.—Second, Knox's Jack.

Clumbers—Challenge, Mercer's Lady Brownie and Boss III. Open, dogs, Mercer's Johnny, Jr. Bitches, Mercer's Lady Joan.

Field Spaniels.—Challenge, Laidlaw's Bridford Gladys. Open, dogs, first, Laidlaw's Sampson; second, Nelles's Brantford Mohawk; third, Toby.

Cockers.—Challenge dogs, Luckwell's Black Duke, Nelles's Brantford Red Jacket, Bell's King of Obos. Vhc., Laidlaw's Rabbi. Bitches, Laidlaw's Miss Obo II. and Bessie, D. Luckwell's Pharaoh's Sister. Open, black dogs, Luckwell's Black Dufferin, Laidlaw's Obo, Bell's Obadiab. Vhc., O'Neill's Sport. Hc., Laidlaw's Brock. Bitches, Bell's I Say, Nelles's Flirt, Luckwell's Jealousy. Reserve, Nelles's Topsy. Vhc., Laidlaw's Clio, Searle's Topsy, Luckwell's Woodland Susie. Other color dogs, Laidlaw's Bambino, Nelles's Brantford Red Man. Bitches, Nelles's Red Ridinghood, MacDonald's Gypsy Queen, Laidlaw's Lady of Learning. Vhc., Brantford Dolly Varden.

Pugs.—Challenge, Crier's Bob Ivy and Bessie, Seminole's Cassino. Open dogs, Eberhart's Cashier, Ballentine's Curtis, Lee's Fritz. Reserve, Luxton's Barney. Vhc., Seminole's Kasli, Jr. Bitches, Howard Bros.' Satan, Eberhart's Mable E. and Fanny K. Reserve, Eberhart's Peggy Pride. Vhc., Crier's Cribbage and Lady Victoria. Awards are in order named.

DOG CHAT.

SINCE the prize list was issued the committee of the Ottawa bench show have received a number of special prizes ranging from \$5 to \$10 for the best in the principal breeds. The Association offers a cup, value \$20, for the best collection of sporting dogs. Several valuable pictures are also offered. A class has also been made for harriers, and more specials are expected. Entries close Sept. 22. We have not space to enumerate all the particulars of the specials, but they will be found in the catalogues at the proper time.

A letter from Mr. Ross A. Smith informs us that Mr. H. W. Lacy has been chosen to judge all classes at Charleston, S. C., in January next. Mr. Geo. O. Brown will judge the poultry for the seventh year in succession. We might as well take this opportunity to state that this will be Mr. Lacy's last appearance in a judicial capacity for the present at any American shows, as he finds that judging interferes more or less with his position as kennel editor of the *FOREST AND STREAM*, handicapping him in his reports to an extent that for the best interests of the paper is not deemed advisable. The position of judge is not one that has any charms for us, though we thank all exhibitors for the uniform kindness and courtesy we have received even though we did make mistakes now and then.

Mr. Geo. Thomas arrived in Boston at last, on the Bostonian, Sept. 1, after a rough passage of ten days, but under this experienced dogman's care his team of dogs landed in fairly good shape, although they have been rattled around too many of the English shows this summer. We have kept our readers posted as to the names of Mr. Purbeck's and Mr. Symonds's new purchases, their winnings, and those of the dogs Mr. Thomas took over with him, so it is useless to recapitulate. The bull-terrier Streatham Monarch was among the new arrivals.

One of our best collie bitches, Roslyn Dolly, owned by the Chestnut Hill Kennels, and which did so well at New York show, has returned from her visit to England and Gladdie.

Mr. Krehl's report in the English *Stock-Keeper* of the Belgium show, is admirable as a piece of descriptive writing, and must prove very interesting to English readers. The way the German judge Herr Brandt went about his duties would please even our exacting friend Dr. Mills. Herr Brandt had a table in the ring on which he deposited his writing materials, etc. He judged sitting, and by his side sat his ring steward, whom he for the occasion transformed into a secretary or reporter. Each dog in his class had to enter singly, and to walk up and down in front of the judge, who spoke his mind aloud (à la Wise), which the ring steward had to write down. To an Englishman's quick methods, L. P. C. Astley for instance, this must have seemed very amusing.

Stock-Keeper says: "We thought we had learned most of the 'fakements' of the show ring, but we learned a new wrinkle at Jersey. The rules declared for plain collars. A big dog, with an engraved plate on his collar, appeared in the ring with the plate entirely covered with a strip of postage stamp margin. Live and learn."

Napoleon Jack, one of the most noted "business" dogs in this country, and a dog with an international reputation, died in San Francisco, Aug. 27. He was whelped in 1878. His having won numerous prizes at bench shows is our excuse for mentioning the death of a dog which gained his honors outside the pale of the law. He won at the big show at New Orleans in 1883, at Pittsburgh in 1887, and five specials at San Francisco in 1891. He is to be stuffed, and \$500 has been paid by a New York museum for his "set up."

Dr. Gray, of Rochester, N. Y., who has virtually retired from exhibiting collies, says he has a collie called Hake which is entirely white, with the exception of the tip of one ear. He will show it at the next New York show.

Dr. Quinn, of Utica, N. Y., who has owned one or two good winning collies, is doing good work in the interest of the pure bred collies among the farmers about Utica by distributing pups, giving away five to ten every year. This is a good idea and is bound to improve the farmer's dog.

It was the first time little Bessie had ever seen a snake, and as it writhed along she ran into the house breathless with her discovery. "Oh, mamma, come quick!" she cried. "Here's a tail out here wagging without any dog."—*Baltimore American*.

From all accounts the Hamilton show will be a busy one, as many well known dogmen will be there, and its close proximity to Toronto will interest the fanciers of the Queen City as well. The classes have filled splendidly considering the comparatively limited amount of prize money offered, for the latter tells in a dog show, say what one will about judges, and brings the good dogs in the care of those who are intent on the nimble dollar. Mr. Stewart has worked hard in the interest of the club and show and deserves success.

Mr. Frank Dole's "South African poodle," according to Canadian papers, was an object of interest to the Kingstonians. All the same, it struck us as being remarkably like the usual sort of black poodle.

If, in picking out a dog, you select one that barks, under the impression that "Barking dogs do not bite," you are liable to be deceived. Of course, a barking dog does not bite, because he cannot bite while he barks; but he may bite after or before he barks. Remember this in picking out a dog.

It is a peculiar coincidence that the two breeders of Irish setters who have the last year or so been most active in extolling the merits of their dogs, and have been, as it were, at daggers drawn in consequence, should fall out of the Irish setter ranks about the same time. The news comes to us that Mr. Covert, who had succeeded in getting together a good kennel of this breed, notably in his purchases of Elcho, Jr., Blue Rock, Tearaway, etc., has made an assignment. Mr. Naylor, our informant, should have taken the Killarney Kennel dogs to Kingston, and all arrangements were made, and he, understanding they were entered, made his arrangements with others accordingly, but found to his cost that the dogs were securely tied up by the law when he wanted them for Kingston. This left Mr. Naylor with rather a weak string. It is to be hoped that Mr. Covert's embarrassment is only temporary, but it is an ill wind that blows no one any good, and the dispersal of this kennel will afford fanciers an opportunity to secure some good breeding and field stock.

The editor of our Philadelphia contemporary should read the rules in the premium list of the Kingston show before calling us over the coals for arriving on Wednesday at the show. It says distinctly "Judging will commence promptly Wednesday morning at 10 o'clock." There was no need for friend Haldeman to take that anxious journey across the troubled waters in such a hurry.

The dog show at Toronto bids fair to excel every effort so far made by the Queen City in this direction. Through the energy and ability of Mr. Stone as an organizer, aided by the liberal prizes offered, a splendid entry has been secured. The entries closed on the 29th with 571, an increase of 100 over that of last year. The number in each class is as follows: Mastiffs 18, rough-coated St. Bernards 54, smooth-coated St. Bernards 8, bloodhounds 2, Newfoundlanders 2, great Danes 17, Russian wolfhounds (or Barzois) 3, deerhounds 4, greyhounds 32, English foxhounds 4, American foxhounds 7, harriers 5, pointers 23, English setters 39, Irish setters 29, black and tan or Gordon setters 30, collies 41, bulldogs 3, bull-terriers 21, poodles 2, Clumbers 6, field spaniels 13, cockers 70, dachshunds 7, beagles 15, fox-terriers 47, Irish terriers 5, Dandie Dinmonts 7, Bedlingtons 7, Skye terriers 1, black and tan terriers 16, Yorkshires 6, toy terriers 2, pugs 20, King Charles spaniels 6, Blenheim and Prince Charles 2, toy spaniels 5, miscellaneous class 4.

Secretary F. R. Carswell writes of the Wilmington Fair Dog Show: Our entries closed with a list of 127, a very large number considering the small amount of the premiums, the small number of classes and the fact that our premium lists were out only eight days before closing the entries. Mr. E. Barde Elliott will judge all classes. I think our entries are equal to, if not above, the average in quality.

After a brief rest another circuit of bench shows is upon us. Only he who is compelled to follow up each one knows how wearisome they become towards the end. Canada, however, affords in the fall a pleasant change, for there we meet a different class of dogs and another set of men, the latter on the whole more doggily inbred, if we may use such a term, than their American cousins. Nearly every young business man has a dog and this is generally allowed to follow wherever he may go, into his place of business be it bank or office, and the dog seems as joyful as his master when lunch or closing hour comes.

The journey to Kingston show, which was the first on the roll of Canadian shows, was a most enjoyable one. A night's run from New York to Cape Vincent, with plenty of time for breakfast, found us landed at the station wharf where we bid adieu to American soil and taking the steamer Maud, a delightful sail from Lake Ontario across the mouth of the great St. Lawrence afforded ample opportunities to get a few snap shots with the "Hawkeye." Skirting along past Wolfe Island and the "lone fisherman" intent on making a record with the giant mascalonge that seldom hooks himself, the Bay of Quinte is reached, on the further side of which the beautifully situated city of Kingston is seen flashing in the morning sun. At first sight it seems like some foreign city with its old-fashioned homes, red roofs, domes and towers. Old Fort Henry, long outlived its usefulness, is an object of interest as we move slowly up to the dock, and the waiting cabbies with their "Washingonian" looking old carriages somehow give an old world flavor to the morning air. We have not time to moralize, however, and are soon shaking hands with Mr. Corbett, the secretary of the Kingston show, and the rest of the boys, among whom we find several well-known fans, Messrs. Wixom, Naylor, Haldeman, Lewis, Connor, Mann, etc., of the Americans; Prescott, Oldrieve, Bell, Geddes, Dr. Mills, of the Canadians. This means that there will be some dogs known to fame at any rate. Judging had commenced in the setter and pointer classes as we wired in last week's issue. At 2 P. M. Mr. Lacy took hold of his classes and finished that evening, excepting a few specials which were left till next morning. The number of dogs benched was 192, but as there were several novice classes with numbers carried on, the total was 220. We are very sorry the show was not better attended by the townspeople, but those we did see represented some of the best people in the town, and had the building been nearer the city the show would no doubt have been better patronized, as the admission was only a quarter.

Dr. Mills had his first turn at judging, and if he did not always get the best dog first it was from no lack of conscientious and painstaking endeavor, as the way he made the dogs move and the length of time he kept it up was a revelation to some of the old rounders who think a toddle once up and down the ring quite enough to show whether the dog can move or not. This delays the judging considerably, and does not serve any practical purpose that we can perceive, still every man is entitled to his own way of arriving at his conclusions. There is little more to say about the show excepting that the *FOREST AND STREAM* made many pleasant acquaintances and we must thank Messrs. Corbett, Kent and friend Shaw for their kind courtesies during our visit.

The special prize given by Dr. Mills for the dog "showing the best muscular development and in the best condition" is not one that is calculated to become popular among judges. It is a troublesome thing to judge, for there is muscle and muscle, and what may be condition in one dog may not be sufficient in another, and to define the status makes the difficulty. A terrier all nerves and excitement may show a degree of hardness and condition that to the inexperienced will surpass that of a greyhound in comparison, a dog naturally, unless aroused, of a placid and, if we may use the term, a relaxed condition. This we took into consideration in judging between the Skye Sir Stafford and the greyhound Ranger, whose muscular development was admirable.

Mr. A. E. Elmer, of Kingston, purchased the black and tan terrier Rochelle Scot, by Dick out of Meersbrook Maiden, that took second prize at the Kingston show, from his owner, Miss Wright, of Toronto.

Toronto papers say that the Toronto Kennel Club has abandoned the idea of giving a banquet at the coming show.

If it were not a serious matter for Mr. Mercer, his continued ill luck almost makes one smile. Now we hear that just as he was getting better of his bad fall, it was thought a drive would do him good. He started with a friend, when

some of the harness came loose and startled the horse. It ran away. First the fore wheels, then the hind ones left the body of the wagon; still they held on and eventually came to a standstill. Naturally the excitement and the walk the accident entailed, has laid "Clumber" up again, but Toronto show looms up in the distance as an incentive to a hasty recovery.

Lord Bute, the Menthon Kennels' new St. Bernard, arrived in this port last Tuesday. With him came Geraldine.

Mr. Reick has sold the St. Bernard champion Hector to Mr. Peters, of Shelby, Ohio.

To Mr. Hubert G. Nichols we are indebted for a picture of his noted Great Dane Melac, one of the best Great Danes yet seen in America. The picture, however, hardly does this grand dog justice, giving no intimation of his grand size and excellent symmetry.

We draw the attention of those interested in the field trials to the advertisement of the Eastern Field Trials Club in this issue. Good money is offered and we trust the entry list will fill accordingly. All signs point to very successful field trials this year, judging from what we hear and the increased interest taken by sportsmen in the different events.

"Discipulus" writes interestingly on collies in the *Illustrated Sporting and Dramatic News*. In speaking of the uncertainty of some collies' tempers, he says, "Perhaps the blood of the Highland freebooter mingles with that of the Highland collie, and springs out at intervals in sudden gusts of wild paroxysms." On Scottish drovers, who are said to be so devoted to their sheepdogs, he says: "If these men will not part for untold sums with their favorite sheepdogs (which I misdo not in these days of perpetual trafficking), they nevertheless are exceeding hard on any animal that comes to harm. I have in my mind a splendid dog, and one which survived for years afterward, found in a quarry where it had been thrown by its relentless master. It had met with an accident and broken its leg, being at that time far from home; so its owner threw it down the pit, hoping to kill it in its fall. But the collie was not killed, and was found and rescued by its discoverers, and survived, lame, but still beautiful, for many a year." In another part, "As a comrade human in sympathy, marvelous in beauty and mental intelligence, commend me, in the recesses of a wild country home, to the companionship of the collie."

A touching story is related in *Fanciers' Gazette* of a boatman living at Gateshead who was brought into the Newcastle Infirmary suffering from injuries caused by being run over by a wagon. The unfortunate man died an hour and a half after admission to the institution. He was followed to the infirmary by a St. Bernard dog, presumably his own. The animal followed the man into the room where patients are received, and looked on anxiously while the doctors were attending to the poor fellow's injuries. On the removal of the man to one of the wards the animal persisted in following. He waited by his master till his death, and then followed the body as it was being removed to the deadhouse, where the men had some difficulty in keeping the animal out till the door was closed.

MR. HACKE'S BARZOIS.—It is the custom to speak of "the good ship" Helvetia, but I can hardly do it, since after a long voyage she lay out in the harbor for over a week unable to get to the wharf, thereby causing Mr. Hacke's dogs to be delivered to Messrs. Spratts in a most undesirable condition. Three of them died en route from St. Petersburg, and one or two more look as if they would soon leave for the land where little hunting is done as a rule. It would be hardly worth while to go into a detailed description of them now, as they will soon be before the public, I hope, and then the papers will have full reports of them. In this kennel, which was bought from the titled chap called by those who not long since were serfs "His Imperial Highness the Grand Duke George Michaelovitch of Michalofka," I saw one or two specimens that struck me as being very fair, and when they get well conditioned they should do some winning on the bench. I greatly regretted to see quite a prevalence of "out at the elbow" sort, but hope they will straighten their "pins" as they grow stronger, and so improve their "standing." Mr. Hacke has some fourteen other Barzois soon coming over, and I cannot but admire the man who has the pluck to send 6,000 miles for his dogs, which fact has earned for him the widespread name of the greatest enthusiast of the breed in America. I was more than pleased at the cleanliness that was everywhere to be noticed at the kennels and the health of the 70 dogs now being boarded there; and being fed on Spratts biscuits speaks volumes for the value of Mr. John Brett's services and the biscuits as feed. "The proof of the pudding is in chewing the string," which fully convinces me that a better place to send one's dogs does not exist than down at Messrs. Spratts' at Northvale, N. J., and in the care of John Brett.—H.

MR. KEASBEY'S SPANIELS.—New York, Sept. 5.—*Editor Forest and Stream*: Only a week ago I wrote you of the death of Saybrook Lass. I now have word of the death of two more of my field spaniel bitches, champion Lady (winner of silver cup in Boston, '91) and Saybrook Dolly (seven firsts last spring). These were my best, in fact about all I had, as I did not succeed in getting any puppies. I now have Beverly Nigus. I only hope he will not be attacked in the same way. I have no idea what the trouble was, as the dogs had the best of care and were only sick a short time. It is needless to say that Beverly will be taken away from my place at New London at once.—ROWLAND P. KEASBEY.

CINCINNATI SHOW.—The dates selected for the dog show given by the Ohio Humane Society, of Cincinnati, are Oct. 14 to 17. It will be a success as prospects are flattering. Entries close Oct. 3. Entry fee is \$1 for first and 50 cents for each additional dog. Our list of special prizes is very large, and many of them valuable prizes. For premium lists, etc., address, AL. G. EBERHART, superintendent, 3 East 4th street, Cincinnati, Ohio.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

Prepared Blanks sent free on application.

Berkeley Trap. By M. A. Viti, Philadelphia, Pa., for white, black ear, fox-terrier dog, whelped July 14, 1891, by Tack out of Lady Berkeley.

Tackler and Victoria. By M. A. Viti, Philadelphia, Pa., for white, black and tan head, small black spot on stern and tail, fox-terrier dog and bitch, whelped July 14, 1891, by Tack out of Lady Berkeley.

BRED.

Prepared Blanks sent free on application.

Baldina II—Viscount. J. B. Duff's (Washington, D. C.) English setter bitch Baldina II. (Dan Bangor—Baldina) to Mt. Washington Kennels' Viscount, Aug. 15.

THE CANADIAN RIFLE MEETING

OTTAWA, Aug. 31.—At 25 minutes past 8 o'clock this morning a shot from the signal cannon on Rideau ranges, which marks the beginning of each day's shooting, was fired, and the annual matches of the Dominion Rifle Association began. A few minutes afterward rifles were cracking merrily all along the lines, and

little puffs of smoke floated away before the east wind that was blowing in gusts that were rather puzzling to the marksmen. The sky was overcast, but the light, however, for the first hour or two was good, being dull but steady. A slight shower fell just before noon, but did not interfere materially with the shooting.

The result of the good weather conditions was that in the open-

ing match, the Bakers' Nursery, the leading young snors showed up well and Pvt. Laug, of the 21st, made a possible. The lower scores were not so good, as ten 16s got in against the same number of 18s counted out last year. In the MacDougal Challenge Cup match Tom Mitchel, of the 10th, made 47, and was followed by five 46s. Last year 45 won and 36s were counted out, while twenty-wo

199s were counted out of the list this year. This shows the style of the shooting. Lieut. Elliot, of the 12th was the victor in the Manufacturers' with a possible, and the Queen's Own and Montreal contingents more than held up their end in the prize list. A score of 34 by Staff-Sergt. Crowe, 1st B.F.A., won this last year, and 29s were counted out of the race.

The layout of the camp is slightly different from that of last year. The row, of eight oblong marquees facing Theodore street, and pitched to the north of it, comprise the quarters of Col. Bacon, Secretary; Col. John Macpherson, Treasurer; the statistical branch, Armorer Sergt. Smallwood, the telephone, telegraph and press, and the general competitors. Back of this row

is the stores marquee, with flag flying opposite, and flanked by the president's tent. Over to the left is the general dining marquee, the executive and the officers dining daily in the council tent. Caterer James Dunlop and his large staff occupy quarters in the rear of the big marquee, and the kitchen, is court guard. There are besides over one hundred bell tents for sleeping pur-

Royal Schools of Cavalry, gunnery, mounted infantry and infantry and cadets of the Royal Military College, Kingston. To the sections making the highest aggregate scores in the following order: 200 yds. from a 200 yds. to 100 yds. 5 rounds (advancing and retiring), any military position; 5 yds. firing, 5 rounds at 300 yds. (kneeling); independent firing 5 rounds at 15 yds. (standing), at targets exposed to view for limited periods: 300 and 500 Gov-Gen F.G. 523 24 QOR 470 34 Vn Rifles..... 430 12 h 445 434 Bn 436 5th Royal Scots..... 453 The British Challenge Rifle Club..... 453 The British forces of Great Britain to the active militia of Canada; with 100 added by the D. R. A. open to teams of 4 efficient men; any corps may enter two teams; skirmishing; distance varying from about 100 yds. to 450 yds.; position, standing, kneeling or prone, at the discretion of the firer; number of rounds, 20 per man, fired advancing and retiring under the order of the officer appointed to the command of all the sections: Staff and 430 Gov-Gen 634 Bn 75 300 F.G. 77 440 34 Vn Rifles..... 65 203 13th Batt, 1st team..... 73 307

T is the fourth time the Gov-Gen's Foot Guards have won the British Challenge Shield, which has been held for the last two years by the Royal Grenadiers of T. Ontario. The competitors meeting of the Dominion Rifle Association was held last night in the drill hall, C. White in the chair. Considerable discussion took place in regard to the arrangements for the scoring in the Gzowski and the British Challenge Shield matches.

Major McSpadden, of the 12th Battalion York Rangers, said that there should be a declaration made by the members on the question of the desirability of the purchase of Martini rifles by the Government. Col. White showed that the record of the Rifle League showed a good average with the Martini rifle. He announced that he had received a donation of \$50 from a gentleman in Ottawa as a contribution toward a prize for the nursery aggregate, and a donation of \$100 from a gentleman in Montreal as prizes for the highest scorers in the Bisley team, provided they averaged 90 each.

Bore the meeting adjourned Major McSpadden advised that the executive should compel Senators and members of the House of Commons in their match next Thursday afternoon to use the Snider rifles of one of the country battalions. The result, he was confident, would be that the militia would be furnished immediately with Martini.

OTTAWA, Sept. 3.—That Rideau ranges offer at times a remarkable puzzling combination of perplexities to rifle men was well illustrated by the shooting in to-day's matches. The constant expression among the competitors was that they are the most difficult ranges in the Dominion. Even the crack shots of the local corps, the Governor-General's Foot Guards, and 434 Battalion, O-tawa and Carleton Rifles, who know every inch of the Rideau ranges by heart, were perplexed today. The light was not so bad, though at times during the day it was trying. It was the wind which made havoc of the nice calculations of the rifle men. Between the butts and the long row of targets lies a valley some 500 yds wide, into which, at the east end of the targets, the Rideau River furiously makes its way, and continues eastward to the Rideau Falls. Along this valley to-day the winds veered and shifted most capriciously. At times the breeze, set at it by the force of a hundred yards between the butts and the targets to show the direction of the wind, were fluttering no two in the same direction. Under these conditions the high scoring made is immensely to the credit of to-day's competitors.

The event of the day was the Dominion of Canada match, which was begun at half-past eight o'clock, and was not ended until four o'clock. Following are the results: Prizes, Dominion of Canada Match, for teams, \$200; individuals, \$713; total value, \$913; open to all efficient members of the active militia, members of the staff, and officers of the active force who have retired retaining rank, and to all officers, non-commissioned officers, and men of Her Majesty's regular army and navy stationed in Canada, who are also members of the Association. Ranges, 200, 500 and 600 yds., 7 rounds at each range. Snider rifles, position, standing or kneeling at 500 yds., any, with head to target at 600 yds. any. First team prize, badge to each member and \$50 second prize, third \$40, fourth \$30, fifth \$20. First individual prize \$40 second \$35, third \$30, fourth \$25. Ten of \$15 each, eight of \$10 each, six of \$8 each, thirty of \$6 each, twenty-five of \$5 each.

Royal Grenadiers, Toronto, 409 Queen's Own Rifles, Toronto 380 13th Batt, Hamilton, 397 6th Fusiliers, Montreal, 380 G F G, Ottawa, 396 7th Batt, 379 12th Batt, York Rangers, 397 8th Batt, O and C R. fies, 379 Halifax Garrison Artillery, 387 33d Batt, 379 45th Batt, Lindsay, 386 31st Batt, 379 British Columbia Gar Art., 381

Individual Prizes, 92 Pvt Smith, 88 Staff-Sergt Rolston, 91 Staff-Sergt Ogg, 88 Lieut Margetts, 40 Capt Elliot, 88 Serge Horsey, 89 Corp McVittie, 87

The winners in the Snider aggregate, for which the first prize is a graphoscope, presented by J. H. Stewart, optician, London, Eng., with additional prizes to the extent of \$250 given by the Dominion Rifle Association, were as follows, the prizes being awarded to competitors who made the highest aggregate scores in the Macdougall, Manufacturers', Minister of Militia's, Dominion and stranding matches:

Staff-Sergt Rolston, 233 Staff-Sergt C N Mitchell, 233 Staff-Sergt D Mitchell, 240 Lieut Elliot, 233 Lieut Wilson, 233 Staff-Sergt Dent, 232 Corp McVittie, 232 Staff-Sergt Armstrong, 232 Corp Russell, 237 Priv D Smith, 231 Capt M. McKicking, 236 Priv Scott, 231 Sergt Morris, 235 Priv Andrews, 231 Lieut Revel, 235 Sergt Blair, 231 Staff-Sergt Rolston, 234 Priv Windatt, 231 Capt O'Grady, 234 Staff-Sergt McVittie, 230 Major Sherwood, 233

The last match of the day was the Rideau match, open to all members of the association, the range being 500 yds. Martini-Henry rifles were used, 7 rounds being fired, and any position allowed with head to target. The prize winners were as follows: Staff-Sergt Logie, 33 Pvt Peverill, 33 Lieut Dover, 33 Corp McCrean, 34 Lieut Elliot, 33 B. H. Hammond, 33 Sergt Swain, 33 Staff-Sergt Mitchell, 33 C. P. Rogers, 33 Sergt Armstrong, 33 Sergt Morris, 33 Staff-Sergt Simpson, 33 Lieut McFarland, 34 Sergt Moffatt, 33 Lieut Pat'n, 33 Mr Brown, 34 Pvt Taylor, 33 Lieut Davidson, 33 Corp Carroll, 34 Capt Robson, 33 Pvt Norton, 33 Staff-Sergt Ogg, 34

In the President's marquee, this afternoon, Mrs. Kirkpatrick held a home for half-past six o'clock until 6 P. M. There was a large and fashionable throng of visitors at the ranges during the afternoon. The band of the Governor-General's Foot Guards played.

OTTAWA, Sept. 3.—The rifle men to-day had as fine weather as could be desired for the last day's shooting, except that the wind was rather puzzling. It was the busiest day in camp, and the matches were most important and interesting, inasmuch as to-day determined the fortunate hundred whose names come first in the grand aggregate, and who thereby won the right to compete for the Governor-General's prize, as also the chance of being selected for the next Bisley team.

The first of to-day's matches was the Outmet match at 600 yds, range, with Martini-Henry rifles, ten rounds; seventy-four prizes, amounting in all to \$515. Following were the principal winners: Pvt C T Shurman, 46 Capt W. A. Jamieson, 43 Pvt J. H. Ellis, 46 Capt W. A. Milligan, 43 Col-Sergt G. A. Mulheu, 45 Mr H. McKicking, 43 Staff-Sergt J. H. Simpson, 43 Sergt R. Graham, 44 Pvt T. Hollins, 43 Trump C Crowe, 44

The next match was the Lansdowne aggregate, open to teams made up of five members of and affiliated rifle association for the challenge cup presented by Lord Lansdowne, with \$150 added by the association:

15th Batt, Hamilton, 878 Royal Grenadiers, Toronto, 854 Gov-Gen's F. G., Ottawa, 865 Victoria County Rifle Ass'n, 847 St John Rifle Association, 860

The next match was the Grand Aggregate. This match is set down in the official record as the Bankers' prize match. Seventy-six prizes of the value of \$600 in all are awarded to the competitors who made the highest aggregate scores in the Macdougall, Manufacturers', Minister of Militia's, Dominion, Standing, Rideau and Outmet matches. Principal winners:

In the afternoon the Lords and Commons' match, between teams representing the Senate and House of Commons, was an innovation which attracted while it lasted all the curiosity and interest of the spectators at the ranges. Senator McKay was captain of the Senators' team and Dr. Sproule of the Commons'. The match was shot at 200 and 200 yds, ranges, 5 rounds at each range, possible score at each range being 25:

Senators' Team.				House of Commons' Team.			
	200	500	Tot		200	500	Tot
Lieut-Col Boulton,	19	20	39	Robt Watson,	15	18	33
Sen McKay,	18	13	31	Geo Casey,	19	13	32
Sergeant,	18	13	31	Dr Barville of the Commons',	14	14	28
Sen Power,	22	8	30	John McLean,	19	11	30
Sen Poirier,	21	13	34	John Marshall,	18	14	32
Sen McInnes,	18	16	34	Dr Sproule,	18	17	35
	117	86	203		103	92	195

House of Commons' extra team, 167. A half-past three o'clock this afternoon was begun the crowning event of the whole series of matches, namely, the competition for the Governor-General's prize, which is offered yearly to be competed for by the hundred highest score in the grand aggregate match. First prize, a special badge and \$250; second prize, a badge and \$150; third prize, a badge and \$100. Each of the seven next highest competitors to receive badge. Ranges, 200, 500 and 600 yds; 7 rounds at each range; position, standing or kneeling at 500 yds; any, with head to target, and at 600 yds. any. The firing in this match was continued until dark.

Following are the figures prepared this evening by the statistical officers. They show the winners and half a dozen of the leading scores:

Lieut Smith, 94 Sergt Short, 90 Staff-Sergt Rolston, 93 Capt McRobbie, 89 Lieut Dover, 89 Capt Hart, 89 (tie), Lieut McAdams, 91 Lieut Revel, 89 Staff-Sergt M. V. V. 89 Sergt Douglas, 89

The match for the London Merchants' Cup, with \$180 in prizes offered by the association, was shot next. This match is open to teams of 8 members of any affiliated rifle association, and is shot with Martini-Henry rifles at 200, 500 and 600 yds, ranges, 7 rounds at each range.

First prize, London cup and \$180; Ontario team, 673. Second prize, Quebec team, 611. Manitoba team, 637 Nova Scotia team, 618 New Brunswick team, 632 British Columbia team, 582

Following are the results of the extra matches: Canon Sharpshooters' trophy, presented by Sir George Cayley, Minister of Militia, open to those belonging to a battalion or association who have had a team or teams entered in the league of 1891, and to be won by the highest individual score in the Snider aggregate: Staff-Sergt D Mitchell, 214 Capt Russell, 212 Corp W McVittie, 212 Capt O'Grady, 211 Staff-Sergt Dent, 212 Lieut B. Hol, 210

The president of the league, open to teams of 10 men from any battalion having teams entered in the league of 1891; to be won by the aggregate score of the highest ten men from any battalion or association in the Snider aggregate, was won by the 431 battalion by a score of 2011.

OTTAWA, Sept. 4.—The Bisley team were announced to-day and shot that Sergt. Rolston led by 31 points the great Capt. McKicking, and with the score of 54 out of a possible 500, a wonderful score, being 42 points over an average of former winners and by far the best shooting ever done on the range. Last year Private Hutchison, 43d, led with 480. The team is composed of the 30 men who are members of the active militia having made the highest scores in the grand aggregate match and Governor-General's match. Should any of these refuse to go their places will fill up from the list of 70 in the grand aggregate and Governor-General's matches, 100 being eligible. The following are the names of the first 33:

Staff-Sergt Rolston, 514 Capt McRobbie, 465 Capt. McKicking, 493 Staff-Sergt Rolston, 465 Staff-Sergt Mitchell, 480 Lieut. Wilson, 463 Staff-Sergt Ogg, 476 Lieut. Williamson, 462 Sergt. M. Rogers, 474 Lieut. Macnam, 460 Sergt. Short, 474 Lieut. Smith, 450 Pete Ellis, 472 Capt. Milligan, 459 Staff-Sergt Mitchell, 469 Sergt. Horsey, 459 Capt. Jamieson, 469 Lieut. Pope, 459 Staff-Sergt Armstrong, 469 Col-Sergt. Fowler, 458 Staff-Sergt Mitchell, 469 Capt. Russell, 458 Staff-Sergt McVittie, 468 Capt. Macnam, 457 Pete Windatt, 468 Staff-Sergt. Wiman, 457 Staff-Sergt Simpson, 468 Sergt. Fairbairn, 457 Lieut Revel, 467 Lieut. Davidson, 456 Lieut. Andrews, 466 Sergt. Graham, 456 Pete Gamble, 469

ZETTLER VS. CALIFORNIA.—During the latter part of 1890 the California Schk z Club, of San Francisco, issued an open challenge for a team match by telegraph. The Zettler Rifle Club, of this city, promptly accepted the challenge, and all the preliminaries having been settled, the contest took place Saturday, Sept. 5. The conditions called for: Teams of 15 men each, 50 consecutive shots on the German ring target, 35 min. time, which a rifle club, or a single shooter, in 61 minutes, position, off-hand, but the usual palm rest permitted, any rifle, telescopic sights being barred, distance 200 yds, stakes \$100 a side. The California Shooting Club appointed W. Hayes, of Newark, to be their judge. Hayes accepted the appointment, but also shot on the Zettler team. Phil Jacoby was to have been the Zettler Club's judge but declined, as he acts as captain and coacher for the San Francisco team. The California team consisted of the Second Brigade, C. N. G., was then asked to look after the interests of the Zettler Rifle Club. The judges received the stakes before the contest. They were charged to collect and forward the 15 targets uged by the contestants, together with a certificate, signed by the judge and the president respectively of each club, verifying the validity of the targets, and at the same time a tabulated detail of each man's score. The California team includes such well known marksmen as Jacoby, Utchiz, S. Elker, who made the remarkable score of 500 points on the point target in 300 shots during the recent shooting festival at San Francisco. Helm, Kolbweiler and F. O. Young. The team shot on their new range near San Francisco. The Zettler team used the 200 yds. range in Wisconsin's Park at Cypress Hill. The Zettlers were handicapped by the weather, as competition started at 10 A. M., and the wind was a rather strong easterly wind blowing across the range. Still all hands shot steadily, Hayes only missing the black twice. The shooting of Dorrier was first-class, he making a score of 1115, the best of the day. H. Holz was second with 1085. J. A. Boyken and the veteran Barney Walther tied with a score of 1078. M. B. Eagle shot in a poor light and made the inferior score of 1071. The long and arduous day was closed by J. A. Boyken, 1081, John Cooper, 1050, George Joiner 1027, B. Zettler 881, F. Ross 1055, F. C. Watts 1042, A. B. Neale 947, G. Zimmerman 1052, M. Dorrier 1115, F. Artzbrus 1019, George Plaisted 1005, C. G. Zettler 1028, H. Holges 1085, B. Walther 1038. Total, 15,503. California, 15,491.

CREEDMOOR, L. I., Sept. 7.—Labor Day was utilized by the National Rifle Association for the contesting of the fifth of the marksmen's matches arranged for the qualification of members of the National Guard to receive the State decoration awarded to all those showing themselves competent to score 80 points or better with the regular military rifle at 200 and 300 yds., 5 shots at each distance. The facilities of the range at Creedmoor were taxed to the fullest extent, more than 250 men, in uniform, being in attendance. With the exception of an uncertain wind the conditions were favorable to fair shooting; and, as a consequence, 146 of the competitors pulled out at the end with qualifying scores. The Seventh Regiment had 65 marksmen, the Eighth 3, the Ninth 1, the Twelfth 11, the Thirteenth 7, the Twenty-second 9, the Twenty-third 33, the Thirty-second 2, the Forty-seventh 1, the Sixty-ninth 5, the Seventy-first 3, the First Brigade Staff 1, and Troop A (cavalry) 5. The shooting was done under the supervision of Brig. Gen. Charles F. Robbins, general inspector of rifle practice, State of New York.

BOSTON, Sept. 5.—The weekly shoot of the Massachusetts Rifle Association was held at its range to-day with a large number of rifle men present. Following are the scores, distance 300 yds., Standard American target, re-entry mat' used: All-comer's off-hand match: J. B. Fellows 81, Dr. Bishop 66, W. P. Stevens 60. All-comer's rest match: J. Francis 115, F. Dant 114, S. Wilder 111, W. P. Thompson 111, A. H. Ballard 103, F. W. Chester 107, D. Martin 105, R. E. Twine 99, M. T. Day 97, Dr. B. Bishop 98, W. B. Morton 83, B. Hastings 89. Military match: W. F. Buek 42, W. L. Swan 41, G. Pierce 41, C. G. Paul 40, H. W. Sweet 39, H. D. Sears 38, A. S. Hunt 37, E. W. Chester 36, J. V. Huntley 35.

NEWARK.—At the annual King shoot of the Newark Shooting Society on Monday Oct. 6, W. Hayes won first prize, and George Joiner and F. C. Ross tied for second and third prizes on the open ring target.

MT. GRETN, Pa., Sept. 5.—The regular annual State competition in rifle shooting opened on the State range Sept. 1. The day was rather cloudy in the forenoon and a severe thunder storm in afternoon. There was a general complaint from all the old shooters about the ammunition; it is the regulation U. S. make and is not as good as it might be in several respects. It is easy to distinguish the difference in the reports of the rifles when fired off; one will give a dull thud and another like a fire-cracker. None of it seems to have the ring like the U. M. C. Co. manufacture. Hence the unaccountably low scores uncertain shots and misses are attributed to the defective ammunition. If the authorities of the State of Pennsylvania wish good scores in the annual competition they must supply good ammunition. The shooting was mostly at 200, 500 and 600 yds., and the first two days were taken up with practice scores. The important matches ran: State Regimental Match shot Sept. 3.—C conditions, four enlisted men, 7 shots each at 200, 500 and 600 yds., was won again by the Thirteenth regiment, with the S cond regiment a close second with a score of 333, followed by the sixteenth regiment with a score of 332. Private W. W. Youngs, of the Thirteenth regiment, again putting up a brilliant score in the match of 96. Below is the scores of the three first teams: 15th Regt., 334; 2d Regt., 333; 16th Regt., 333. 9th Regt. 330, 12th Regt. 328; 1st Regt. 325, 5th Regt. 324, 10th Regt. 312, 14th Regt. 311, 8th Regt. 307, 18th Regt. 301. Cavalry 298, 15th R. G. 295, 6th R. Gt. 284, 4th Regt. 277, State Fencibles 275, 2d Regt. 274, 3rd Regt. 232.

Colman Regimental Prizes were won by the rifle teams from the following regiments, and Hons as follows: Five men, 7 shots each at 200, 500 and 600 yds., 4 entries allowed, highest score to count: 16 h Regt., first prize, 437, 9th Regt. 429, 13th Regt. 423, 5th Regt. 408, 1st Regt. 408, 15 h Regt. 407, 8th Regt. 406, 10th Regt. 400, 12th Regt. 399, 6th Regt. 399, 14th R. Gt. 397, 2d Regt. 388. The competition on the 5th day of the Thirteenth regiment with a score of 333, followed by the sixteenth regiment with a score of 332, followed by the Thirteenth regiment with a score of 332. Private W. W. Youngs, of the Thirteenth regiment, again putting up a brilliant score in the match of 96. Below is the scores of the three first teams: 15th Regt., 334; 2d Regt., 333; 16th Regt., 333. 9th Regt. 330, 12th Regt. 328; 1st Regt. 325, 5th Regt. 324, 10th Regt. 312, 14th Regt. 311, 8th Regt. 307, 18th Regt. 301. Cavalry 298, 15th R. G. 295, 6th R. Gt. 284, 4th Regt. 277, State Fencibles 275, 2d Regt. 274, 3rd Regt. 232.

SYRACUSE, Sept. 3.—The Syracuse Rifle Club will hold a supper shoot at the new range at Maple Bay to-day. The new bulls are giving perfect satisfaction and the little club house is a model in its way. Following are the scores made on Wednesday: Koehler 67, Smith 55, Robotham 47, Ward (rest) 105, Acker 49, Gray (rest) 58, Knapp 73, Dallow 73, Knison 68, Dlay 85, Eggen 74, McConick (rest) 75, Smith (rest) 50, Robotham (rest) 83, Stillman (rest) 87, Perkins 27, Barnum (rest) 95, Lighton (rest) 95, Robotham (rest) 81.

MINNEAPOLIS, Sept. 1.—The Minnesota State Rifle Association at their meeting last week elected Dr. E. H. Whitcomb, of St. Paul, president; Lieut. Lee, of Stillwater, vice-president; Lieut. Loye, of Minneapolis, secretary-treasurer. During the practice work on the Lake City Range last week Whitcomb, Darrow and Falk made the possible 20 hits on the lying-down figure in a skirmish run of 50 shots, thus tying the score of Capt. Atkins, at Springfield, Ill., a few days ago, about which so much was said at the time.

CREEDMOOR MATCHES.—For the remainder of the present shooting season the following military matches are on the Creedmoor programme: Qualification and marksmen's badge, Sept. 26, Oct. 10 and 24, and Nov. 8. The sharpshooters' match, Sept. 19, Oct. 17 and 31.

SPRINGFIELD, Mass.—The Bullard Repeating Arms works at this place has been rented to the Elektrik Mfg. Co. The company makes electrical supplies. Leon J. E. Riley, into department superintendent of the Smith & Wesson works, goes into the new plant as general mechanical superintendent.

RENSSELAERWYCK.—Albany, N. Y., Sept. 7.—The fall meeting of the Rensselaer Rifle Association, held at the Rensselaer Hotel, between Albany and T. y. Thursday and Friday, Oct. 1 and 2. The programme, which is the most attractive ever offered by the Association, will be issued Thursday, Sept. 10.—BUEL C. ANDREWS, Sec.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 8-11.—Grand International Tournament at Detroit. Live birds at 4 standard keys one target. Sept. 11-12.—Harvard Rifle Association, new club house, two days opening shoot, targets and live birds; also six-men team shoots for central Pennsylvania, Harrisburg Shooting Association trophy, valued at \$100. H. M. F. Worden, Sec'y. Sept. 15-17.—Knoxville, Tenn., Inter-State Manufacturers' and Dealers' Association. Sept. 15-17.—Dayton, O., Second Annual Tournament. Open to the world. First two days, manna targets, third day sparrows. Address W. Scott McDonald, Fifth and Ludlow streets, Dayton, O. Sept. 23-Oct. 2.—First Annual Tournament of the Pennsylvania State Sportsmen's Association, Williamsport, Pa. Targets and live birds. N. A. Hughes, Sec'y. Oct. 13-15.—S-aunton (Va.) Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association. Oct. 21-23.—Reading's Tournament, Flemington, N. J. Key-stones. Open to all. Oct. 27-29.—Savannah, Ga., Chatham Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association.

BOILING SPRINGS.

[illegible]

of the doctrines of protection offer no grounds for the present attitude of the Government toward citizens who are spending money liberally, and with no hope of return, in the development of the science of naval design.

CAPTAIN NORTON AND HIS SYSTEM.—At the time when we investigated and condemned the system of air tanks and water ballast patented by Capt. Francis L. Norton, we confined our comments solely to the technical features of the case, examining closely the models, plans, specifications and the completed vessels with a view to determining the practical value of Capt. Norton's claims. As we announced at the time, the result of our investigations was to prove that the peculiar advantages claimed were purely mythical, the principles on which they were based being directly at variance with the simpler and most firmly established laws of physics. Such good points as the Norton boats possessed were shared in common by similar craft, lifeboats in particular, of ordinary construction, with none of the patented pipes, valves and openings that complicated the Norton patent.

It is often the case that the inventor of a worthless article is perfectly honest in his belief in its merits, and in publicly condemning his claims and machinery we gave Capt. Norton the benefit of the doubt. At the same time we found much in the statements of himself and his coadjutors which was totally false, together with many statements which were entirely unsupported by evidence. The statement that the invention had been endorsed by the Navy Department was emphatically denied in a letter to us by Secretary Whitney. The statement was made to us, in the office of the company, that Mr. G. L. Watson had written to secure the right to apply the system to yachts designed by him (the letter was unfortunately mislaid at the time and could not be found for our inspection). Mr. Watson denied any knowledge of the matter to us a little later, and a similar statement, concerning Mr. Burgess, with an alleged endorsement of the system by him, was flatly repudiated by that gentleman in conversation with us.

The model which was on exhibition for a long time to "promoters" and inquiring capitalists, was nothing but a trick and sham devised to fool the ignorant and unwary, who were permitted to press down on one side of the machine and feel for themselves the actual pressure before subscribing to the stock. This model was a simple arrangement of valves, pipes and a pressure gauge in a tank of water, and in no possible way represented the conditions of a floating vessel, a fact which Capt. Norton could not have been ignorant of.

The recent history of the company and its head is well known; the company has secured a large amount of money during the past four years, and has built several craft which have been conspicuous only as failures, the last venture being the departure of one of them, a small steamer, which had on board Capt. Norton, his wife and niece, with a crew of seven men, bound for Toulon, France. The F. L. Norton, as she was named, sailed from New York in the middle of last November, since which time nothing has been heard from her, and she has been given up for lost.

The usual legal routine has been carried out in regard to Capt. Norton's estate, and the published reports state that this has resulted in the discovery that there was nothing left save a deficit of about \$150,000, partly borrowed in various ways and partly contributed by the credulous dupes who had been permitted to feel the pressure in the trick model. No less than \$10,000 was borrowed from the Washington National Bank which lately went to pieces. Within the past two weeks a rumor has been current that the voyage of the F. L. Norton was undertaken for financial and not scientific ends, and that Capt. Norton left New York at a very convenient time, and is now safe ashore and out of reach of his creditors. The boat was so flimsy and so utterly unfitted for a winter voyage on the Atlantic that it would be a miracle if she reached port; but it may be that, together with his known skill as a seaman and navigator, Capt. Norton's luck, which has certainly followed him for a long time, has stuck to him and landed him in some out-of-the-way nook, leaving the stockholders, officers and lenders to mourn his loss. It is rather amusing to read that the company still retains the patents for this worthless invention, and has reorganized under the laws of the State of New Jersey.

AN AMUSING DILEMMA.—It is no unusual thing for an aspiring amateur to be carried away by the details of designing and building that he gives no thought to the launching until it is too late. We have known several authentic cases, besides the rather mythical one of McFluffy's canoe, in which various small craft have been constructed in garrets and cellars from which it has been impossible to move them, but if report be true the same blunder has lately been carried out on a far more magnificent scale than ever before attempted. The new steam launch, the Vamose, built by the Herreshoffs for Mr. Wm. R. Hearst, of San Francisco, is now completed, and has made her trial trip and is ready for delivery. Unfortunately she was built at Bristol, R. I., and her owner wishes to use her about San Francisco, Cal., and the question has arisen as to how he is to get her there. Certainly a highly built high speed launch, 122 ft. over all, is not the sort of craft for steaming around the Horn, nor could she be towed that distance. It is impossible to carry so long and delicate a craft on any steamer or sailing vessel, while the overland journey by rail is of course out of the question. It is stated that an attempt will be made to steam around, failing which but three courses are open; to leave her on the Atlantic coast, to wait for the completion of the Nicaragua or Panama Canal, or to steam to the Isthmus and take her across it in a specially constructed carriage on the Panama R. R. The yacht has already cost \$65,000 with \$4,000 bonus for each mile over 25, and she is likely to cost much more before she steams in through the Golden Gate.

CANOE-YAWLS AND CANOE-YACHTS.—The two types of "canoe-yawls" which we have lately commented on, the shoal centerboard type and the miniature cutter which we proposed to name "canoe-yacht," have recently raced together in English waters, the result being summed as follows in the *Field*: "Some weeks back we ventured to predict, having seen the Solent Y. Raters in the building yards, that a good canoe-yawl of 1/2-rate would, in average weather, have a rosy time among the new junior fleet. Shortly afterward a new canoe-yawl of Snake model, and, we believe, built by Smith of Oxford—the Spruce—turned up at Southampton, and competed with the finny tribe of 1/2-raters. Spruce, even though not always sailed in faultless manner either as to pilotage or handling, went fast enough to win easily. Torpedo, another Thames canoe-yawl, followed, and also took the lead of the 1/2-raters and of the Spruce. This being so time after time, there can be no doubt that the canoe type has already planted an ugly sting on the *quasi* model yacht class of fin-keel boats, and therefore, in the ordinary course of nature, either one type must go to the wall or the other must be sent there. Possibly an unreasoning local majority may succeed in ousting the canoe type of craft from racing on account of local toes trodden on; but the question should be tried on its merits, and general utility of craft should obtain public favor."

THEY WERE NOT THERE.—"The annual meet of the American Canoe Association commenced on Aug. 6, on the Lake Champlain, and will end on the 27th. A considerable number of the new 'C' class, i. e., wider canoes, appear to be expected at the meet, and they undoubtedly are growing in favor generally in America. Once a man has satisfied himself that he can win fairly and speed paddle a canoe of 33in. or 36in. beam, he only wonders how it is he has so long quietly in a 30in. groove; possibly the deck seat is responsible for this."—*Field*. The "Class C" is still as much in the air as ever so far as racing and the A. C. A. meet are concerned. This is the fifth meet since a larger class of canoes was first recognized by the Association, but the result was the same as in former years. There were three canoes present that were over the limits, Kwonoshe, Neola and another; none of them expressing a desire to race. The canoe-yawl, Class C canoe, and small craft outside of the regular canoe limits, are constantly growing in favor in America, but they do not turn up in sufficient numbers at any regattas save the Western C. A. meet, to make a good racing class.

RACE PROGRAMMES.—For some unexplained reason the blunder of last season, by which the race programmes were overlooked, and only printed at the last minute, was repeated this year, the programmes being received in camp after the races were over. The racing programme should be printed not only in the A. C. A. book, but in the usual camp circular, with camp rules, railroad routes, etc., unless the entire matter can be prepared in time to appear in the book. In either case a special list of races should be struck off for the use of those in camp, and it would be well if it could include the racing numbers of the men, as no list was available this year. If the racing men could be induced to send their entries to the regatta committee two weeks or so before camp opens, a fairly complete list might be printed, blank spaces being left for additional entries. This list would be most useful in making up the blanks which should be provided for the clerk of the course, a gentleman who has in any case a great deal to attend to, and whose labors might be lessened by providing him with proper blanks for recording the various races.

NEW YORK YACHT RACING ASSOCIATION. ANNUAL REGATTA, SEPT. 7.

THE third annual regatta of the N. Y. Y. R. A., sailed on Labor Day, was a great success, no less than 75 yachts competing. The wind was strong nor'west, with the tide a quarter ebb, when the start was made. The courses were:

Course 1.—Classes A, B, C, D, E and F. From starting line around Red Nun Buoy No. 14 (Perch and Ball), on port hand, and return; 24 nautical miles.

Course 2.—Classes G, 1, 2, 4, 6 and 7. From starting line around Swash Channel Bell Buoy, on port hand, and return; 19 nautical miles.

Course 3.—Classes 3, 5, 8 and 9. From starting line around Black Buoy No. 9, on port hand, and return; 14 nautical miles.

Course 4.—Class 10. From starting line around Black Buoy No. 11, on port hand, and return; 11 nautical miles.

The regatta was very well managed by the regatta committee, Messrs. George E. Gartland, Charles E. Simms, Jr., and William Cagger.

Considering the number of starters and the weather, the mishaps were very few. The times were:

CLASS D—SLOOPS 45 FT. AND OVER 38 FT.				
Start.	Finish.	Elapsed.	Corrected.	
Notus.....	12 30 00	4 44 02	4 14 02	2 37 40

CONSTELLATION, scho'r., has been sold by Vice-Com. Morgan to Mr. Bayard Thayer, owner of Sayonara. The price is reported as \$40,000.

ST. LAWRENCE Y. C.

ON Aug. 29 a special unclassified race was sailed over a special course under the auspices of the St. Lawrence Y. C. The start was as follows:

Start.	Length.	Start.
Thora, W. J. Wallace.....	19.04	4 17 30
Mollie Bawn, W. Kavanaugh.....	25.09	4 17 37
Valda, G. H. Duggan.....	24.01	4 17 45
Frolie, E. K. Greene.....	28.47	4 17 50
Viking, L. J. Smith.....	35.00	4 18 00
Chaparron, E. S. Clouston.....	29.08	4 18 20
Black Eagle, C. H. Levin.....	37.07	4 19 15

There was a fine lower-sail breeze from the westward at the start, the relic of a strong gale that was blowing itself out, and during the race the wind and sea steadily diminished until at the finish it was quite light. It was a reach to the first mark, and Viking ran through the fleet and secured a lead which she kept during the windward mark, although Valda was close upon her when the turning buoy was reached. On the run home Valda secured a good lead, Viking carried away her goose-neck and had to give up, but not before she had been collared by Chaparron, and Thora took third place. The boats finished in this order, but Valda and Chaparron had not lead enough to save their time from Thora. The time summary was as follows:

Start.	Elapsed.	Corrected.
Thora.....	4 17 20	2 07 35
Valda.....	4 17 45	2 02 45
Chaparron.....	4 18 20	2 05 43
Frolie.....	4 19 50	2 14 28
Black Eagle.....	4 19 15	2 09 55

This is the second time this season that the Thora has beaten the St. L. Y. C. fleet. She is simply a Lawrence River skiff, with 380 ft. of cotton in the two battened bowsails, and she does not carry a pound of ballast beyond her crew of four men who "sit her up" by hiking to windward canoe fashion.

After the race, the finish of which was off the club's house, a club dinner was held, at which the trophies won during the season were presented, and which was a great success.

YACHTS IN TWO CLASSES.

Editor Forest and Stream:

I noticed in the last issue of the *FOREST AND STREAM* your article under the head of "Knotty Questions," and as you seem to criticize the decision of the committee in the matter of owner of the sloop, Valda's appeal from the judges' decision, allow me to say that the writer of the article in question undoubtedly forgot that this committee had to govern their decision by matter of fact rules and not by sentiment. Sentiment is all very well, but is not always in accordance with common law. In the opinion of this committee the rules and regulations adopted by this club govern or at least should govern all races, and no matter what the sentimental feeling may be individually, all decisions should be arrived at after a careful consideration of the club laws relating to the same.

A MEMBER OF THE REGATTA COMMITTEE, N. H. Y. C.
[In commenting on the decision in question we simply pointed out the practical, not sentimental, fact that it places a yacht in two classes at the same time, apparently giving her the option of racing in either at will; something that is contrary to common usage at least.]

BEVERLY Y. C., AUG. 29.—The 177th race, second Buzzard's Bay championship, was sailed at Monument Beach, Aug. 30, in a moderate breeze, shifting to W. S. W. with occasional puffs, which rendered race somewhat fluky. Mattie has been sold out of club and no entries appeared in first class, but the other classes filled well. Summary as follows:

SECOND CLASS.				
Start.	Length.	Elapsed.	Corrected.	
Surprise, J. M. Codman.....	27.04	2 11 53	2 01 26	
Mist, G. H. Lyman, Jr.....	26.03	2 13 17	2 02 07	
Anonyma, F. L. Dabney.....	27.01	2 13 21	2 02 38	
Grampus, W. E. C. Eustis.....	27.09	2 20 19	2 10 19	
Widgeon, M. Williams, Jr.....	26.10	2 20 54	2 09 54	

THIRD CLASS.				
Start.	Length.	Elapsed.	Corrected.	
Puzzle, Wm. Amory, Jr.....	22.09	1 51 59	1 41 05	
Caruso, F. W. Sargent.....	22.09	1 53 13	1 42 19	
Buzzard, A. B. Shepley.....	22.08	1 53 31	1 43 27	
Euna, J. Parkinson.....	22.10	1 53 34	1 42 46	

FOURTH CLASS.				
Start.	Length.	Elapsed.	Corrected.	
Edith, L. Van Kessellaer.....	19.04	2 01 37	1 47 11	
Cat, Bruce Clark.....	19.03	2 07 20	1 52 54	
Squall, J. G. Bailey.....	19.11	2 17 34	2 05 48	
Charmion, J. Crane, Jr.....	19.05	Withdraw.		
Kitten, H. S. Ockton.....	20.00	Withdraw.		
Duckling, R. S. Hardy.....	17.09	Withdraw.		

Courses, 11 miles for second class and 7½ for the others. Judge, A. H. Hardy.

BROOKLYN Y. C. ANNUAL REGATTA, SEPT. 7.—The annual fall regatta of the Brooklyn Y. C. was sailed on Labor Day in a very strong northwest wind, the courses being on the Lower Bay. The times were:

CLASS 1—MAINSAIL BOATS, 21 TO 25 FT.				
Start.	Length.	Elapsed.	Corrected.	
Seminole, B. Brown, Jr.....	23.10	3 28 10	3 28 10	
Iroquois, E. H. Chandler.....	23.10	Did not finish.		

CLASS A—MAINSAIL BOATS, 16 TO 18 FT.				
Start.	Length.	Elapsed.	Corrected.	
Dell, Salt & Fitzgerald.....	23.46	2 13 46	2 18 41	

CLASS 3—SLOOPS, CUTTERS AND YAWLS, 30 TO 36 FT.				
Start.	Length.	Elapsed.	Corrected.	
Mull, B. F. Fulton.....	33.16	3 38 16	3 39 33	
Fair Wind, F. R. Rogers.....	34.20	3 40 20	3 40 20	
Rosie, Dr. Latham.....	34.20	Did not finish.		

Mull lost her topmast but won in her class.

LARCHMONT Y. C. FALL REGATTA.—The weather of Saturday sadly interfered with the regatta of the Larchmont Y. C. for which every preparation had been made by the committee. Storm and mist caused a postponement, which virtually amounted to an abandonment, though the match race was sailed on Monday between Valda and Clara. Under the latter circumstances the cabin cat class also sailed on Monday, the times being:

ELAPSED. CORRECTED.				
---------------------	--	--	--	--

A NEW ERA IN CANOEING.—If we may judge from the latest event in canoe racing, the introduction of cutter principles into canoeing was hinted at last year is likely to come in a very different way from the one then under discussion. Instead of an alteration of model, giving a craft with great draft, the latest development is in the method of sailing. In place of the careful handling of sheets which is commonly essential in all shoal and unballasted craft, the crew of the Toltec belays both main and mizen sheets, as in a cutter, and then climbs far out on his 5ft., "piazza," all his attention being given to balancing there. At times on Monday he laid out on the seat, both feet braced against the outside of the canoe, both hands grasping the seat as he rapidly slid in and out in the puffs, with one foot on the tiller when needed. If we are not mistaken, Mr. Barrington's strength, skill and daring, with his 5ft. seat, are likely to inaugurate a new era in canoe sailing, the departure being as important as the introduction of the deck position and old deck tiller by Mr. Vaux in 1879, and of the sliding seat and thwartship tiller by Mr. Butler in 1880. What the effect will be on canoe designing is too long a question to discuss now, but it will be a very important one.

proved her for racing, and she turned out a stiff and powerful craft, with easy lines, but with a long floor, and very stiff with some ballast in her. Aztec, designed this year by Mr. Stephens, also for Commodore William Willard Howard, was based to a certain extent on Bat and Toltec, but being designed solely for racing, the displacement was reduced and the deadwood in the ends was carefully shaped to give easy lines. The design was very carefully faired to full size, and we believe the moulds were not altered after they left the designer's hands. So far as model goes, Aztec is superior in every way to Toltec; but that model has little to do with canoe racing is shown by the fact that Mr. Barrington has taken Aztec and beaten Toltec, the long seat and skill being the great factors. As for Bat, she was designed for another purpose than match sailing, and it is hardly fair to condemn her as a failure from a racing standpoint only.

THE PASSAIC RIVER REGATTAS.—The late date and lack of space this week interfere with a fitting report of the very successful regattas of the Passaic clubs, the Orange, Arlington and Lanthe, on Saturday and Monday, but we shall give a full account next week.

NEW YORK C. C. CHALLENGE CUP.

THE fourth series of races for the international challenge cup established by the New York C. C. in 1888 was sailed on Sept. 7, both races being won by the representative of the New York C. C., Mr. T. E. H. Barrington, a new member of the club. The trial races were sailed on Sept. 5, but owing to the uncertainty as to the date and to several other causes the competition was limited almost entirely to the New York C. C. The morning was very stormy, a N.E. gale sweeping over the Bay, and it was not until 2:45 that the first race was started over the regular club triangle off Stapleton and Clifton, two rounds, making 6 miles, the wind being then quite strong, with the tide on the last quarter of the ebb. The starters were:

After the first race Mr. H. C. Ward of the Brooklyn C. C. sailed over in the handsome Ruggies canoe Torment, owned by Mr. Smythe. Torment had only two small sails, but she was fitted out at the club house with a mainsail and mizen, each of 40ft., and started in the second race at 4:39 with the other four. Toltec had shipped her 140ft. rig, though there was more wind than before. In starting to windward, the tide now having turned flood inshore, Aztec stood far up on standard back and catch. Toltec, while the others worked straight out in shorter tacks. When the leaders came together, Aztec had headed Toltec as they rounded the first mark, Torment being a close third, while Kismet withdrew. Toltec soon ran ahead in the reaching, leading on the first round. The second windward leg was sailed in the same way, Toltec making the buoy just ahead of Aztec, with Torment close to them. Though under-canvased, Torment sailed very fast, but could not catch Toltec, she finishing first, Torment second, Aztec third and Bonnie fourth. As a matter of course, Mr. Barrington was chosen as the club's representative on the various merits of his work.

The weather on Sunday was no better than Saturday, rainy with a strong N.E. wind, and Monday morning promised but little better, being dark and cloudy; but to the gratification of hundreds of yachtsmen and canoeists the wind went round to N.W., and a sharp, bracing breeze, free from all fog or damp, sent the whitecaps racing over the Upper and Lower Bay. All previous races for the cup in 1888, '89 and '90 have been sailed over the club course off Stapleton and Clifton, a course which by reason of its strong tides and currents, heavy winds and serious obstructions in the form of anchored and passing vessels and floating debris, is most trying to strangers who are used only to clear waters. The fact that it was the club course, and so convenient to the clubhouse, has caused the club to retain it, but the position is not to the liking of the younger set, who have so strong, both in the trial and cup races, that they have favored and more neutral course was imperative. In the trial races this was not so easily done, as there was no place available where a number of canoes could be housed, but for the cup races the difficulty was settled by the very generous offer of the Bensonhurst Club, on Gravesend Bay. This young but flourishing club is a social rather than athletic organization, but it occupies the clubhouse and pier at Bensonhurst, originally built by the Brooklyn Y. C. at the place once known as Locust Grove. The house, pier and boats practically belonged to the canoeists for the day and evening, the members of the home club devoted all their time to the entertainment of their guests. A fine lunch was served between the races, while a dance and clam bake followed in the evening. The clubhouse balcony and long pier afforded to all a very fine view of the course, the triangle having one mark off the pier, another half a mile off shore and a third in front of the first, while the third was located directly up shore, in front of the Marine and Field clubhouse. As the wind was all day, the first leg, directly off shore, was a reach, with booms to port, the second was dead to windward, and the third was a tree reach with booms to starboard, the wind being so far off that in the second race a slight shift sent the boats under wing and down. The course was sailed three times, making a distance of 8 miles (estimated), the wind all day was very strong, and being N.W. was puffy and squally, while there was sea enough in the Narrows to trouble a 40ft. steam launch, making heavy water over the course for canoe racing.

Mr. Ford Jones, of the Brooklyn Boating Association, the challenger, sailed his canoe Canuck, whose lines appeared in the *FOREST AND STREAM* of Sept. 18, Oct. 1, and Dec. 2, 1890, a smooth outboard canoe, built by Sawyer, of Brooklyn, and she was sailed for three successive years won the A. C. A. Sailing Trophy, besides other important prizes. She used a 30in. slide to the deck seat, and carried in both races the same sail, Nos. 3 and 5, of 50ft. mainsail and 35ft. mizen, 5ft. in all, the smallest rig he has. Both were standing sails and could not be reefed.

Mr. Barrington, the defender of the cup, is a new member of the New York C. C., formerly a member of the Washington C. C. He is a young man and a comparative novice at canoe racing, but he is fast, well out and muscular, a gymnast, an old shell oarman, and has had a great deal of experience as a canoe cruiser. On joining the club this spring he at once bought the Toltec from Commodore William Willard Howard, and after a trial had her entirely re-built and strengthened. He not only put aboard 100lbs. of lead, against the advice of Commodore Howard, but had two new sliding seats built one 4ft. and one 5ft. long. He also had standing water with two revolving ballast. As now sailed the canoe is watertight throughout, with a small bucket well, and everything is very strong, at the expense of extreme light weight, thus avoiding the many breakdowns

of last year. Her mizen traveler is of 1/4in. round brass rod. The sails carried in both races were a mainsail of 30ft. and a mizen of 40ft., the largest sail being at, while the total area was 15ft. 1/2 ss than on Canuck.

Early in the morning a launch came over from the New York C. C. house with a number of canoeists and ladies, while Mr. R. W. Gibson brought a party in his new boat, a 35ft. cabin naphtha launch, the Steamer, and guests arrived by land, until a large number, including many ladies, had assembled.

The chief feature of the day, the exhibit of commodores, must be set down as a great success, commodores of all degrees and variety being present, the only disappointment being the absence of Com. K. J. Wilkin, who combines in one person more kinds of commodores than any other living canoeist. He had the very poor taste to venture out in Jersey among the mosquitoes, leaving vacant his place in the "Galaxy." Mr. Walker U. Lawson, commodore of the A. C., was present, but *in cog.*, so to speak, not having been invited by the club to serve as judge. Later in the day, he and Vice-Com. Winné left to attend the Lanthe C. C. regatta.

In canoeing the unwritten but universally recognized rules of yacht etiquette in the matter of titles is strictly observed; every man who holds the office of commodore, vice-commodore, rear-commodore or even acting rear-commodore, on going out of office drops everything but the main part of the title, he simply commodore for the rest of his life. This simple plan is chiefly esteemed by those who have never risen higher than the rank of vice or rear, as they always rate as full commodores. Its weak point, and one that should be remedied, is that it does grave injustice to the man who has been several times commodore. This whole subject was very fully discussed by Com. Alden, the "Father of American Canoeists," and himself a former commodore, a few years since. The danger he then foresaw, of the A. C. A. being in time composed entirely of commodores, is even more imminent at the present time.

There was a good deal of delay in getting the boats over and the course buoyed, and it was noon before all the arrangements for a start were completed. The timers were on hand, Com. Quick having a pistol and watch, while commodores Vaux, Blake and Stephens were ready to take down the flags. At this juncture a fat boy appeared with a small yacht cannon, which he was most anxious should be put for starting. Some delay ensued while the question was being argued by the fat boy and the starters, but the matter was finally decided by Com. William Willard Howard, adversely to the cause of the fat boy and the gun. The boy withdrew with tears in his eyes and the cannon grasped tenderly in his arms; but he had his vengeance. He slipped behind a pile at the end of the pier and waited until everyone was eagerly looking on each pace when he shot simply and soundly, "Commodore," bringing up at least a hundred heads in answer to the familiar sound.

When the shot was fired, both of the canoes lay to windward of the pier and line, but at the 4th signal Canuck ran down, crossing 15s. too soon, she luffed around the flag for a second start, Toltec meanwhile coming with a rush and fairly flying as her sheets were trimmed for the start, she was timed 31s. after the gun, and Canuck 10s. later; but later, after luffing round the flag and re-crossing, she caught a puff on the line which luffed her up, causing her to lose headway. Mr. Jones held the boom over and paid her off, but she had lost at least 40s., finally gathering way slowly. On this leg each time it was sailed, Toltec steered the straighter course, Canuck luffing considerably. The story of the race is mainly told by the following table, Toltec showing a gain at each mark on the first round. Off the wind on the second round she was again ahead, but was overtaken by Canuck.

She jibed and started on the second round with a safe lead, which was made still safer by a mishap to Canuck. Mr. Jones has been peculiarly fortunate in having few or no mishaps, his canoe being very strongly built and fitted. One weak point there was, however, which had never been suspected; the heavy, steel shod sliding seat was held in place as it slid to and fro by a lanyard attached to two rings on the sides of the seat. As the seat was thrown round in jibing, its impetus snapped off the rings, so that the slide went into the water. Mr. Jones at once sat on the deck, but was unable to hold his boat up, as she had been over-canvased before. By the instructions of Com. William Willard Howard, Junior Staples took the seat and rowed out to Mr. Jones, overtaking him on the windward leg, but he declined to take it. By this time Canuck was full of water, her open cockpit and long well being unfitted for such use, while the water was so high that she was unable to hold her own. Mr. Jones held on bravely through the whole second round, lying flat on the water at times in the effort to hold up his boat. He sailed one leg and a part of the second on the final round, only giving up when he saw Toltec at the finish. Both contestants were loudly cheered as they came in and were helped from their boats, while willing hands at once set to work to make repairs on Canuck's seat and coming. The times of the first race were:

First Race—ROUND 1.				
	Start.	1st Mark.	2d Mark.	3d Mark.
Toltec.....	12 15 30	12 18 50	12 32 15	12 38 00
Canuck.....	12 15 40	12 18 50	12 35 25	12 40 30
ROUND 2.				
Toltec.....	12 40 30	12 45 54	1 01 30	
Canuck.....	12 44 30	1 07 02	1 13 03	
ROUND 3.				
Toltec.....	1 05 15	1 19 58	1 25 30	1 30 30
Canuck.....		Withdraw.		

While all hands were at dinner the wind apparently fell a little, and Mr. Barrington went out with a larger rig, but soon returned for his former sails. Canuck was in good shape again when the second race was called, the conditions being the same as in the morning. This time Canuck was beautifully well sailed, going over within 14s. of Toltec being but 6s. astern. Hardly was she over the line when Mr. Barrington luffed out, and after a short brush passed to windward and across Canuck's bows. Mr. Jones had hard work to hold up the 85ft. of sail, Canuck being over pressed; while on Toltec Mr. Barrington had delayed both sheets, and was far out on his 5ft. slide, holding and constantly sliding in and out as the waves struck him. Against such work as this, a use of the deck seat that has thus far been deemed impracticable, Canuck had no chance, and Toltec showed a gain, varying a little from time to time, but increasing on each round. Down wind both had too much sail, Toltec's mainsail jibing a couple of times and rolling her badly as she ran wing and wing. When Canuck passed the pier it was seen that she had shipped a great deal of water, and she sailed a great part of the race with the water up to her centerboard trunk. Toltec took some knockdowns, but with the small bucket well and the long seat to right her by, she came out with little water aboard. At times she dragged one end of the seat to leeward.

It was just 4:59:09 when Commodore William Willard Howard sprang on a pile and waved his cap aloft to lead the cheering for Mr. Barrington, who heaved the line, the successful defender of the New York C. C. International Challenge Cup. The times of the second race were:

Second Race—ROUND 1.				
	Start.	1st Mark.	2d Mark.	3d Mark.
Toltec.....	3 57 20	4 01 00	4 10 50	4 17 32
Canuck.....	3 57 14	4 01 05	4 11 50	4 18 17
ROUND 2.				
Toltec.....	4 21 30	4 29 50	4 36 21	
Canuck.....	4 23 31	4 33 00	4 38 39	
ROUND 3.				
Toltec.....	4 40 30	4 49 53	4 56 00	Elapsed
Canuck.....	4 43 13	4 54 15	5 01 10	1 04 10

Toltec wins by 5m. 1s.

When Mr. Jones came in the cheering was still more hearty and enthusiastic, as in the course of his long racing at the meets and his visit last year to New York, he has won the esteem and friendship of all who have come in contact with him.

His defeat was in a great measure due to too large sails for such water, and a comparatively large open well, the other canoe being plainly superior to Canuck in every particular, which cannot be denied. It is safe to say that in Mr. Barrington he has met a far more dangerous rival in such weather than any yet encountered at the meets, possibly excepting Mr. Butler and one or two more. Before returning to Canada Mr. Jones was entertained by a number of New York canoeists, all of whom are anxious to see him here again to challenge for the cup, which he promises to do next year in a new canoe.

TRANSPORTATION TO CAMP.

THOUGH the transportation problem this year was just as wide, the chief characteristics of the service being, as usual, delay and uncertainty, there are indications that sufficient experience has been gained to lead to a solution of the troublesome problem. While there are a number of things to be considered in transporting the men and their canoes from home to the camp, a great deal of the work, that of rail and transportation to the vicinity of the meet, must follow a regular routine, which cannot be altered by the transportation committee. Still another part of the work is also local and must be done by the various clubs, or by the division officers; such details as the arrangements for special carloads of canoes, as was done this year, mainly by Vice-Com. Dorland, for the canoeists of New York and Newark. The principal work of the A. C. A. transportation committee, outside of the mere formal routine of the Trunk Line committee, is to transport the

men and boats over a distance of 5 to 8 miles, from the railroad terminus, to the camp.

The main cause of last year's failure was plainly evident when it was too late for remedy; the attempt was made to bring men to camp in three ways: from New York by steamer direct, from the terminus of the Long Island R.R. at Greenport, and also from other points in the harbor. Each of these methods was a separate and distinct failure; men arrived at one place or the other only to wait for hours and perhaps in the end were obliged to charter private boats or conveyances. This year a similar attempt was made to bring men by water from two points, Port Kent and Burlington, while there was a third route by land from Willsborough. A suitable steamer is often difficult to obtain, and expensive as well, and the best that could be had without too great expense this year was entirely unfitted for the service. The boat was too small to carry the required load, being licensed for but 20 persons, she was unfitted for the route in any but fair weather, and her captain was old and timid, his eyesight being very defective. Under these conditions it is no wonder that the two trips to Port Kent were not made on time in all weather, or that there was no certainty about getting to or from the camp at any given time.

Worst of all, in order to connect with the steamer of the Lake Champlain Transportation Co., which met the train from the north at Port Kent, there was a dreary wait of nearly five hours for all who came from New York, Albany or the west, both by the morning and afternoon trains. The service to Burlington was little if any better, the Lake Champlain Transportation Co. in order to save time, which was a great relief to the passengers, were of course able to carry all canoes and duffle, but the launch was hardly able to carry the personal luggage of the Port Kent arrivals, the canoes and trunks being lighted down in a flat scow, either sailed or towed by the launch.

The essential features of the transportation problem, so far as the committee are concerned, are three: Certain and quick transportation of the camp and principal express trains; convenient transportation of canoes and duffle, and a camp and railroad terminus; reasonable facilities for visiting the nearest city and returning the same day. The first point is by far the most important, in fact it is absolutely essential to a full attendance at camp. It is safe to say that a large number have been kept away from recent meets by such annoyance, delay and expense as was necessary to get to Bow Arrow point from Plattsburgh to St. Lawrence County, Clifton, and then to Sag Harbor. If the committee can guarantee, early in the season when men are planning their vacations, that a suitable steamer will meet the two principal trains each day, and run direct to a dock at the camp, and that canoes and duffle will be carried on her or promptly sent in some other way, the greatest obstacle to a large attendance will be removed.

Other things are necessary to charter a good boat, and to concentrate the service on one point, to the exclusion of all others. If the meet is to be held at Willsborough next year, then the depot should be Burlington, canoeists being instructed by the committee to come there from all quarters, and not to Willsborough or Port Kent. This would be perfectly practicable both from Albany and Montreal. If the meet is held at Grindstone, the service must be arranged at Clayton, five miles distant on the New York side, and Gananoque, seven miles on the Canadian side. We believe that there has been no trouble in the past in arranging with the regular boats between Gananoque and Grindstone, several small steamers plying among the islands. Between Clayton and the camp a special launch or steamer would be needed, to meet the morning train at about 6 o'clock, bringing men to camp in the forenoon, and an exclusive contract of a launch or steamer to come to the camp with the train for New York at about 7 P. M., lying over night at Clayton. If another meet should be held at Jupp's Neck, which is by no means improbable, there will be a daily steamer between New York and the camp, instead of on alternate days, and with a stronger wharf a cheap and satisfactory means of reaching camp could be had. In addition, however, it would be necessary to run a good launch to connect the rail with the camp, and to charter a steamer from New London, leaving Sag Harbor entirely out of the question. There might be some reason for choosing Sag Harbor in place of Greenport, but in any event the camp launch should attempt to run to one place only.

Unless specially favorable arrangements can be made with the local steamers, which is seldom the case, the committee should charter a launch or steamer to connect the rail with the camp, and a captain who is both sober and competent. An ordinary launch of 60ft. length, with a cabin or good awning, should be able to make the regular trips on the St. Lawrence or Lake Champlain in any weather, and to carry as many as would be required, as well as most of the trunks and duffle. With such a boat ready within 30yds. of the incoming train, as would be possible at Burlington or Clayton, the camp would be more than well served, instead of hard work and worry.

The financial aspect of such a venture is a most important one, and the Association cannot afford to run a boat at a loss; but from the experience of past years there is every reason to believe that with ordinary good management the work could be done at a very low rate of fares. If the travel can be concentrated on the camp boat, the average attendance will afford some basis for figures. Even this year, with a very small launch, and with the names on the register—it is safe to say that there were 250 people who made the round trip to camp and back from Port Kent, Burlington or Willsborough, not including the many who made extra trips for pleasure or business. Could all of these have been carried on one good boat at a fare of 50 cents each, there would have been an absolute certainty of sufficient receipts to pay for two weeks of the service, about 1000 dollars. With a regular and reliable service, at least as many more persons might have been carried to and from camp during the three weeks, while a charge of 10 cents or so on trunks would have still further swelled the receipts.

It is probable that with good management the boat might be run at a profit on 25-cent fares, but in one way the rate of fare is a small detail, the average attendance of this year, the delay and risk of loss of baggage, were no worse than last year; but we would gladly have paid \$5 for the round trip from Port Kent to camp and back could it have been made in a fairly prompt and satisfactory manner. A dollar a day would be paid without complaint by all, if it were necessary, for satisfactory service. To secure the best returns from the daily travel between the camp and the city, lower rates of fare would be desirable, and there is every reason to believe, from past experience, that the facilities many passengers to and from the camp would be carried. Many in camp wish to visit the city for shopping or pleasure, while there are always friends of the campers who wish to visit camp for a part of the day if permitted.

There is certain work that in most cases a steamer or launch could do, the carrying of a large number of canoes to and from the camp, the delivery of mail, the carrying of provisions, and the cars, but if men and small baggage are to be carried, this other service may be slower. The big car loads may be taken over in the first and last days of camp, when the passenger travel is smallest; a scow may be towed over at times by the launch; and in most cases there is a large steamer once a day which will serve for all heavy or bulky freight.

As a general scheme for the transportation we would recommend the selection of one point to which all members and visitors are instructed to come; the chartering of a steamer that can carry fifty persons and is sufficiently seaworthy, to connect closely with two trains per day from the first day of the meet until the camp breaks up; and the advertisement early in the season that this steamer will positively run as per schedule at a stated fare, in suitable boats could be had for certainly \$300 for two weeks, or better yet, for one week, and then canoes and duffle could be paid for at 25-cent fares, but for the first experiment the fare might be made 50 cents. It might be a good plan for the executive committee this fall to set aside the sum of say \$300 for a steamboat fund, the profit, if any, being reserved to defray any possible losses in a future year. It is probable that with good management a fair return would be realized, thus enabling the Association to meet the following year, and two reasonably successful seasons would turn in a surplus which would secure the Association from danger of loss in the future so long as the necessary standard of the service was maintained.

ANSWERS TO CORRESPONDENTS.

E. H.—For description of Asiatic pheasants, with illustration of the ring-necked pheasant, see our issue of July 31, 1890.

IROQUOIS, Potsdam, N. Y.—Will you inform me how to polish a turtle shell? Ans. If land tortoise is meant, we would varnish the surface. Commercial tortoise has been polished by Mr. S. F. Denton in the following manner: First boil the slabs of shell in water till they become pliable; then place them between two pieces of board and screw them tightly in a vice. When cold they may be taken out, and will remain flat; scrape off all the rough outside of the shell with a knife or file. Next, sandpaper on and smooth; then use emery and oil till the surface shows no scratches. Finally, polish with a piece of oshamo and talc powder. This will give the plates a very high polish and bring out the colors very nicely.

A pure Virginia plug cut smoking tobacco that does not bite the tongue, and is free from any foreign mixture. More solid comfort in one package of Mastiff than you can get out of a dozen others. Packed in canvas pouches.

Fly-Fishing & Fly-Making

FOR TROUT, BASS, SALMON, Etc.

By J. HARRINGTON KEENE.

With plates of the actual material for making flies of forty-eight varieties. Illustrated, second edition. Revised and enlarged. Price, \$1.50.

This is a new edition of a work that has already proved a great success. It is first of all practical; the instructions are plain and full. Numerous illustrations make every step clear. The actual specimens of materials show precisely what the fly-tyer requires.

FOREST AND STREAM PUBLISHING COMPANY,
318 Broadway, New York.

Canoe and Camp Cookery.

By "SENECA."

A practical cook book for canoeists, Corinthian sailors and outers. Practical because the author gives explicit and intelligible directions for preparing such dishes as he has himself actually tested in camp and on a cruise. This is just where the recipes differ from the absurdly impracticable dishes given in some so-called camp cookery books. The cooking outfit is described, and numerous hints on camp economy add to the value of the work. Cloth, 98 pages. Price \$1.00.

NEW YORK: FOREST AND STREAM PUBLISHING CO., 318 Broadway.

SEPTEMBER DAYS.

SEPTEMBER days have the warmth of summer in their briefer hours, but in their lengthening evenings a prophetic breath of autumn.

The cricket chirps in the noontide, making the most of what remains of his brief life; the bumblebee is busy among the clover blossoms of the aftermath; and their shrill cry and dreamy hum hold the outdoor world above the voices of the song birds, now silent or departed.

What a little while ago they were our familiars—not in more than occasional song, but noted all about us in their accustomed haunts—sparrow, robin and oriole, each trying now and then, as if to keep it in memory, a strain of his springtime love song; and the cuckoo fluted a fare-well prophecy of rain. The bobolinks, in sober sameness of traveling gear, still held the meadowside thickets of weeds; and the swallows sat in sedate conclave on the barn ridge. Then, looking and listening for them, we suddenly become aware they are gone; the adobe city of the eave-dwellers silent and deserted; the whilom choristers of the sunny summer meadows departed to a less inhospitable welcome in more genial climes. How unobtrusive was their exodus. We awake and miss them, or we think of them and see them not, and then we realize that with them, too, summer has gone.

This also the waited thistledown and the blooming asters tell us, and though the woods are dark with their latest greenness, in the lowlands the gaudy standard of autumn is already displayed. In its shadow the muskrat is thatching his winter home, and on his new-shorn watery lawn the full-fledged wild duck broods disport in fullness of feather and strength of pinion. Evil days are these of September that now befall them. Alack, for the callow days of peaceful summer, when no honest gunner was abroad and the law held the murderous gun in abeyance, and only the keel of the unarmed angler rippled the still channel. Continual unrest and abiding fear are

now their lot, and henceforth till spring brings the truce of close time to their persecuted race.

More silently than the fisher's craft the skiff of the sportsman now invades the rush-paled thoroughfares. Noiseless as ghosts paddler and shooter glide along the even path, till alarmed by some keener sense than is given us, up rise wood duck, dusky duck and teal from their reedy cover. Then the ready gun belches its thunder, and suddenly consternation pervades the marshes. All the world has burst forth in a burning of powder. From end to end, from border to border, the fenny expanse roars with discharge and echo, and nowhere within it is there peace or rest for the sole of a webbed foot. Even the poor bittern and herons, harmless and worthless, flap to and fro from one to another now unsafe retreat, in constant danger of death from every booby gunner who can cover their slow flight.

The upland woods, too, are awakened from the slumber of their late summer days. How silent they had grown when their songsters had departed, rarely stirred but by the woodpecker's busy hammer, the chatter and bark of squirrels and the crows making vociferous proclamation against some winged or furred enemy. The grouse have waxed fat among the border patches of berry bushes, rarely disturbed in the seclusion of the thickets but by the soft foot-fall of the fox, the fleeting shadow of a cruising hawk and the halloo of the cowboy driving home his herd from the hillside pasture. But now come enemies more relentless than beast or bird of prey, a sound more alarming than the cowboys distant call—man and his companion the dog, the terrible thunder of the gun. A new terror is revealed to the young birds, a half-forgotten one brought afresh to the old. The crows have found fresh cause for clamor, and the squirrels lapse into a silence of fear.

Peace and the quietness of peace have departed from the realm of the woods, and henceforth while the green leaves grow bright as blossoms with the touch of frost, then brown and sere, and till long after they lie under the white shroud of winter, its wild denizens shall abide in constant fear and unrest.

So fare with the wood-folk, these days of September, wherein the sportsman rejoiceth with exceeding gladness.

FOOLISH HOTEL MEN.

TO observe that proprietors of sportsmen's resorts are extremely foolish, who encourage or permit their guides and other employees to kill fish and game for market, would be perhaps only stating an axiomatic platitude. And yet it is a curious fact that scores of these proprietors have not found out their folly until too late to repair it. We can name more than one water and more than one game district where the landlord's patronage has fallen away for no other reason in the world than that his boatmen have caught for market more bass than his guests have caught for fun, and his guides have killed deer for themselves and for greenhorns, until decent sportsmen have left in disgust.

It might be thought that when a hotel keeper builds a house on the shore of a lake noted for its black bass, and derives a generous revenue from the fishermen who register with him, drawn thither solely by the fishing, he would observe carefully every precaution to keep up the supply of fish, to curb the silly greed of the count-fisher, and to forbid entirely the shipping of fish caught by his boatmen to market. And yet, in spite of the certainty that with the ruin of good fishing must come empty hotel rooms and lessened receipts, we often see that landlord bathing his hands in imaginary water and smiling blandly over the competitive fishing of his guests, and fatuously sharing the paltry profits of the fish his servants catch and send to market. By and by the report goes abroad that the famous bass fishing at his house has "played out," and his former patrons study up other routes, and their money finds its way into other tills.

The governments of the world have been actively competing in the invention and development of smokeless powders; and now a report comes from Washington that the naval officers of the torpedo station at Newport, who have been conducting a series of experiments upon various formulas, have found an ideal powder for small-arms. The new composition is declared to be safe, convenient and cheap, and it has given a rifle ball a velocity of 2,180ft. per second, with a low pressure in the powder chamber. Gun-cotton is said to be the base.

SNAP SHOTS.

IT is reported, but we hope without authority, that the Codification Commission appointed to revise the New York game law will submit to the next Legislature precisely the same bill that was rejected last winter. To do this would be to court for it a similar fate. The game and fish interests of this State are far too important to be made a vehicle of personal interest by those charged with the duty of law amendment. The obnoxious provisions should be stricken from the bill.

In these days returning tourists bring out of the North Woods heads and antlers of deer and regale their friends with long stories of skill and luck in the chase. The average deer slayer is not averse to dilating on the sport; but now and then a man who kills a deer not only makes no show of trophies, but maintains a gloomy silence about the entire proceeding. Blank was out on an Adirondack lake and the "guide" was rowing him with stout strokes in pursuit of a deer which had been driven into the water by the hounds. "Now you're near enough; shoot!" exhorted the guide. Blank was near-sighted; he had never seen a live deer outside of a menagerie, and to him the object appeared very dim and very small. But the guide insisted that it was a tremendous buck with phenomenal horns, and Blank blazed away, the first shot of his life. The guide pulled the game out of the water, a tiny fawn, as yet unweaned; and then Blank and the guide went ashore and buried the carcass in the woods, and went back to the hotel and Blank added any another "hunter's yarn" to the thousands that have been told, but his story was not an exaggeration like the rest, for he protested that he had killed no deer at all.

The Bangor News prints a letter from Edgar E. Harlow, of Greenville, Moosehead Lake, and the News appears to think the statements in the letter worthy of credence. It recounts the following list of game animals recently discovered by Kineo guides, and says that not a single offender has yet been brought to justice: "One dead cow moose at Thoroughfare Brook, Eagle Lake; one dead moose on Russell Stream; one dead caribou on Russell Stream; one dead deer on Russell Stream; one dead moose at Duck Pond; one dead moose at Eagle Lake camp ground; one dead moose at Caucomgomoc Lake; one dead caribou at Black Pond; one dead deer at Horse Race, Caucomgomoc Stream; one dead moose at Spencer Pond; three dead deer at Spencer Pond; two dead moose at Soper Brook, Eagle Lake."

We would beglad to learn that this report is an exaggeration, for if the facts are actually as given they indicate in the Moosehead region a demoralization worse than that already described in the FOREST AND STREAM as existing in other sections. It must be remembered that the open season for moose, deer and caribou will not begin before the first of next month.

Here is an incident of bird life that may afford an interesting theme of speculation. Mr. E. R. Wilbur brings us from Sayville, L. I., a robin's nest containing two eggs, which was abandoned so late as Sept. 1. Did the belated mother bird's robin wisdom tell her that it was too late in the season to bring her fledglings into the world, or did the spirit of wildness, which takes possession of the robin tribe, triumph over the maternal instinct and compel her abandoning the nest in the grape arbor to join her squawking mates in the woods?

The conventional Indian orator declaims with many a fervid figure of speech against the white man who has usurped his ancient hunting grounds; but here comes the Sioux with figures of another style altogether. Young-Man-Afraid-of-His-Horses and 792 others have sent to Washington a claim against the Government of \$10,000,000 for the destruction of the large game that abounded in the West and furnished their subsistence.

Colorado's bounty on bears and mountain lions is said to be working most disastrously to her supply of elk and deer, large numbers of which have been killed for use as bait in the bear traps.

Dr. J. A. Henshall is now in this city in the interest of the Angling Exhibit at the World's Fair, which he reports to be in capital condition.

The Sportsman Tourist.

NO-MAN'S LAND AND BEYOND.—II.

WE were all invited to supper at Harlan's camp, and had an excellent meal of buffalo steak. It was very good, and Lee told me to take what meat I wanted. I took a 10lb. chunk, and would have taken more but we had plenty of antelope meat, and I hate to rob a man of meat worth 9 cents a pound.

The next morning it was very cold, but we started south and left the Springfield men still camped. We made a dry camp on San Francisco Creek, 35 miles south, that night; and only had some water for coffee and half a bucket each for the horses. We had plenty of wood and some coal in the wagon, and were reasonably comfortable, though I can't feel good when the horses are suffering for water.

With an early start, we reached Cold Water Creek, Texas, at noon. Found good water, good grass, and enough cone chips for a dozen camps. Saw wild horses and antelope just before we made camp, and I shot some mallard ducks in the afternoon, while the rest hunted antelope. The ducks were big and fat and I potted them sitting. There were nice little springy ponds with high banks and open water. We had stewed duck for supper; and parboiled and roasted a dozen. I wanted to stay there and hunt a few days, but Price, who was somewhat of an old granny, was afraid we would get caught in a storm away from wood; and so we pulled for Palo Duro Creek in the morning. I left my cough about here—wore it out or froze it out.

Reached Palo Duro Creek at noon. A Texas cowman's ranch every five miles; plenty of wood, good water, lots of cattle and no game. Price concluded that the Canadian was too far, and wanted to edge toward home, so he said he wanted to go down Palo Duro and in east of Beaver City on the Beaver. The other boys didn't care, so we went down Palo Duro 20 miles, and overtook three hunters with two wagons loaded down with deer and turkey, straight from Moore Creek on the Canadian River. We camped with them, and the next morning went back up Palo Duro, heading for Moore Creek. Camped at a post office called Zulu, at Cater's ranch, where I could not make Cater believe but what I was a land hunter seeking a ranch. He could not understand why a man with good teams should be strolling around the country if he was not a market-hunter or hunting a ranch. Hanny said, "Curse the ranches. I would not take the whole Panhandle of Texas if you would give it to me." To tell the truth, I felt the same way, for I had a wife, four young ones and a home 200 miles north, and I sometimes wished that I was home a little, when the bed felt hard at night and I could not sleep.

We went twenty miles south next day, and struck broken ground; ten miles down a slope and we landed on Moose Creek. It was a beauty—a valley a mile wide and about six miles long, with beautiful groves of big timber on both sides of the creek at intervals, with fine clear water and good grass. Oh, what a camp we made under a big cottonwood on a lawn as level as a billiard table, with a spring close behind the tent in a little hollow; deadwood lying around wanting to be broke up for the fire; and the north wind that had followed us for many a day blowing harmlessly over our heads through the tops of the giant trees that sung all night like Æolian harps, while the Texas owls—big fellows that looked as large as turkeys—sat around after dark and said *who, who, who*.

There were deer tracks all over the bottom, and turkey tracks on the bank of the creek behind camp. I went down the creek a mile and found our Springfield hunters who didn't seem much pleased to see me, but didn't say much. They had a fine camp; had arrived there two days before us and had a deer hung up, three turkeys and ducks till you couldn't rest. Trout told me that the deer were all scared away, and that they were going to move next day. I told him that I had plenty of meat and should stay a week anyhow, deer or no deer.

Hanny got up first next morning, and began getting breakfast. When he came back from the spring with the waterpail he told me that there were a flock of quail in front of the door. I jumped up and had pants and boots on in a minute, grabbed the 10-bore and stepped out bareheaded. The quail were just starting into some brush about 40yds. from the tent. I let go the right at them on the ground, and got one more as they rose; picked up an even dozen (there were about forty in the flock); and was back in the tent getting warm in about five minutes.

After breakfast, when I went to drive up the horses to feed them, I heard a rifle crack twice about a mile up the creek, and shortly Trout came past and said he had killed a deer. I saw he must have gone past our camp before day, and now I began to see why they wanted us to leave. We were camped between them and the best hunting ground.

The boys all struck out after breakfast, Hanny with my shotgun, which he tried to appropriate from that time. I took it away from him occasionally, but he grumbled awful when I did. He said that I could shoot a rifle and he couldn't; that I had better kill big game and let him kill the little birds. When the little birds are 16lb. turkeys, big fat mallard and spoonbill ducks, great flocks of quail and a few prairie chickens for a change, I kick. It is more fun to loaf along Moose Creek with a shotgun than to walk over slippery sandhills hunting deer for hours with a rifle.

Price went east about four miles on foot to another creek called Carson Creek. Noah went off no one knows where, and I saddled a pony and tried to get the lay of the country up and down the creek and around. I rode about forty miles that day and saw a few turkeys and two flocks of quail, but lots of deer tracks. I found a place two miles up the creek where deer bedded every night, and I could see Trout's tracks where he had jumped them before he got near them every morning. That was what I was after, and I went to camp early. Hanny had a quail supper about ready.

Price came in packing a big fawn on his back. He had found a bunch of deer; a few had jumped up at 50yds. and he had killed it. The shell stuck in his Sharps, and while he hammered and dug at it, a big buck got up and looked at him a while. Then several does got up from the tall grass, and all of them scooted, leaving Price fooling away with the empty shell. Then pretty soon it came

out easily. Before Price had done talking about that buck one would have thought it must have been the biggest deer in Texas.

When we sat down to supper we had a treat. Hanny had skinned the quail, cleaned them out and boiled them as you would potatoes. Poor little fellows; they looked lonesome and shriveled. They tasted just the same as some boiled chips. I guess it was because I had acted so mean to them when I shot them on the ground.

Noah came in while we were eating and looked sour. He did not kill a deer or antelope the whole trip, and he set out intending to make money hunting. He hunted faithfully every day. He could make as much noise going up a creek through the brush as a four-year-old steer, and I often came in at the head of the timber when I knew he was going to hunt up a creek, and would catch a deer sneaking out occasionally before Noah got within half a mile of it. Price asked Noah if he had seen anything. "Yes, I have seen lots of fresh tracks. What did you get, Hanny?" "I got a string of ducks, and got them all out of two little spring ponds down below Trout's camp."

After eating a lot of meat cooked by myself, and trying some of Hanny's experiments he and I washed the dishes, and then the youngsters, Noah, Hanny and I, went down to Trout's camp visiting, leaving Dad Price seated by the fire reading an old newspaper. The Trout party consisted of four—Trout, a man of about twenty-five, 6ft. tall and very slim; a Scotchman who was as tough as a mule, and who hunted all the time but didn't kill much; a man named James who said he was Jesse James's cousin, and who occasionally told us how desperate he was himself (he was, in fact, a mild-mannered, little old bald-headed, pop-eyed man of about forty-five); and a real nice young fellow of twenty-five whose name I forgot. They hunted so steady that they couldn't help getting game, and Trout was a dandy in spite of the French horn and his long tongue. We played seven-up a while and then went home. Price was abed and grumbled when we came in, "You boys stayed out late." I am forty, rather an old boy. We set the alarm for 4 o'clock and it seemed as if I hadn't slept five minutes when the thing went off, and I crawled out and got breakfast, ate it and struck out up the creek well out on the hills. I was above Trout's deer bed before a person could see through his sights, and lay down on the bank where I could see all over the bottom. Just after it got light I caught glimpses of a man slipping through the groves away down the creek, and in a few minutes here came five whitetail deer, slipping along a long way ahead of him and looking back as cunning as a man.

Nearer and nearer they came to me until they stood in full view about 100yds. away. They had got to decamp soon, for Trout was coming, and so I shot at the buck, aiming behind the shoulder, and broke his backbone. He was below me and my gun is sighted for 125yds. anyhow. Two or three shots at the others did not hit anything, and I went down and was dressing my deer (a pretty fair buck) when Trout came up. He grinned and said he hated to play dog, but he guessed he had. We went on up the creek together.

We saw nothing more and went back. Reached my camp by nine, ate another big breakfast and went to shooting at mark. Trout beat me out of \$3 at a dollar a shot, and then gave me back the money and advised me to buy cartridges with it and practice before I shot against a man! He put all three shots into a 3in. ring at 100yds. off-hand.

By some real nice talk I got Noah and Hanny to go up and get my deer, and I sneaked off down the creek with my shotgun and went to sleep in the sun near a nice spring pond. I woke up at last very chilly and saw as beautiful a sight as it often falls to the lot of man to look at. A doe and two big fawns had drank at the further edge of the pond, and the fawns were playing around on a flat not over 150yds. distant like two little kids as they were. The old doe seemed to be watching their gambols proudly. A flock of mallards were quacking and eating at the spring not over 50yds. from me. The sun was going down. I lay still and watched the deer, hardly daring to breathe, the air was so still, until finally I heard some one coming down the creek; the deer ran away into the sandhills as silently as shadows; I got up and threw a stick at the ducks, and they flew with whistling wings in a circle and then went straight as arrows down Moore Creek for the Canadian. Price came up with his rifle and I met him in the dim trail that runs down the creek. I told him about the deer and how I let the ducks go (for we had plenty of them in camp), and he said, "I suppose I could get one of those deer if I followed them up, but I really left camp only for a walk, let us go back." So we went home to camp in a very contented frame of mind.

Noah and Hanny were cooking supper when we got there; and after we had eaten Hanny and I played seven-up to see who should wash the dishes; he lost, but I compromised and wiped them.

After supper Trout's gang dropped in, and said that they were going to start for home in the morning. They said that the game was too scarce and wild. They asked when we were going; and we looked at each other and laughed. "I dunno," said Price, "it's as Dick says." I said, "If I only had my wife and young ones here, I don't believe I'd ever go back." Hanny remarked cheerfully, "We are doing pretty well here;" and Trout sighed and said that he had a great mind to stay another week. So we played some seven-up and had some more supper at about 10 o'clock. The Trout gang went off to their camp by moonlight; and the owls said *who!* all around us as we went to sleep 200 miles from nowhere.

When the Trouts passed our camp at daybreak next morning I sent a letter to my wife, to be put in the first post office they struck. I inclosed the tip of a turkey's neck feather in it, also a lock of deer hair, and promised to be home some time. I was a little homesick when I saw them disappear; but there was only one twinge and it was gone.

Trout had said that there was a ranch near the mouth of the creek; and Hanny and I decided to go down and see if any one was there. So when breakfast was done we took the buggy and drove down. Found a good house and three men. It was the D. B. L. ranch. I asked the foreman what D. B. L. meant. He said that formerly it meant *Damn Big Luck*, but that for the last three years he had concluded it stood for *Damn Bad Luck*. They seemed a little stiff at first; but finally thawed out and proved nice fellows. They occasionally have trouble

with hunters who kill cattle or set fire to timber or prairie carelessly. They said that they had heard us shoot, and knew we were camped up the creek. I promised to be careful about fire; and we drove on down to the Canadian River, and forded it with the buggy to try it. It was shallow, but with a very soft bottom of quicksand. So we forded back and went to camp.

Price came in with a deer on his mule at sunset, and we decided to cross the river the next day and go on to Bear Creek, which the D. B. L. foreman had told us about. He said there were lots of turkeys over there. We started early the next morning and forded the river, after storing some of our supplies and most of our meat at the D. B. L. ranch.

The ford was better than when I crossed the day before, and we soon pulled up the bed of Bear Creek—sand six inches deep and no water for seven miles; and then I found a spring in a side cañon, made camp and Hanny and I hunted for a turkey roost for several miles up the creek by moonlight. Didn't find anything. Next day hunted all day. I saw three deer tracks and a little turkey sign. When I came in I saw where a panther had followed Hanny and me around the night before. He must have been quite close to us. His tracks were 4in. in diameter. Noah said that night that we had better go back across the river, for the water might get up and then we couldn't get back. Hanny meowed like a cat, and Price grinned a little; but we went back.

We got our meat and corn and went on to Carson Creek, where Price had had the fight with his shell in the gun and had killed the fawn. He had talked every day about that big buck and I wanted a crack at it badly. We camped near the creek on a little sandy bank of grass, sheltered by a big sand hill. The grass was full of sand burrs and we sat on them some for the next two days. Hanny found a flock of quail before we got the tent up, and was off after them with my shotgun. He came back to supper with about twenty quail and twelve prairie chickens, mostly killed sitting; but they were fat and tasted as good as if they had been killed over a dog on the wing. I remarked just for fun that I thought that I should use the shotgun next day and Hanny fairly begged, "Now, Dick, you know I can't shoot a rifle and I want to try to kill a deer with buckshot." I made him promise to get up and build fire in the morning every time it was my turn and then told him that I was only joking about the gun. I asked Price the lay of the creek and he said that he thought that the best hunting was up the bottom through the timber; so we all went out at daylight after a good breakfast. The creek had about a mile of scattering scrubby timber on one side of it in the bottom, interspersed with a little brush. We went up the creek abreast with Noah where he would make the least noise, but I know I could have heard him half a mile if I had been listening. There were several deer ahead of us, but they got out before we got a shot; I saw one running like a ghost and tried to get a sight for a running shot, but he was gone too quick. There was some more timber up the creek, but Price decided to go over where he killed his fawn the time before; and Noah followed him, to my relief, and Hanny and I went up the creek. We soon came to good deer ground—more brush, low trees, little corners, where there were hollows setting back forty yards or so from the creek, full of brush. I was standing on a little ridge that ran down to the edge of the creek (which was 100yds. wide here and with no water but just a sand bed), where Hanny, who was hunting on the head of the hollow behind me, shot off both barrels of the shotgun, and a fine buck ran out of the brush a little above me. I sighted about five inches ahead of his breast as he trotted across the sand, and at the crack of the rifle he came down, just as he gained the grass on the other side. "Did you hit him?" yelled Hanny, who could see me but not the deer. "Yes." "I don't believe it. I killed mine though," said he. "Go quick and bleed it and then come to me," I said; and I stood with my gun cocked so that if my deer got up I could knock him down again, till Hanny came up with his hands bloody, and then we walked cautiously up to mine. He was a good five-prong buck, and stone dead, shot through the heart at 125 paces. As I looked at him I felt good. "That's better than hitting a four-inch ring at 100yds.," said Hanny; and I, well, I just loved myself. We hung him in a tree and then went to Hanny's doe. He had hit her all over with buckshot, but he had her, and Hanny smiled unutterable contentment after we had her hung up. We went to camp, got the buggy, and returned for the deer. Coming back with the deer, we saw a big flock of mallards on a spring pond, and Hanny shot three at two shots. They were in the middle of the pond and I encouraged Hanny until he stripped off everything but his little short undershirt and waded in after them. It was awfully cold water with some ice in it. There was a tree lying with its butt on the bank and the trunk under water. He walked out on that till the water came above his knees, then his feet slipped off the log and he went in up to his waist. Oh, how he yelled, but I howled, "Go on! go on! they are only ten feet further;" and he went for them reluctantly, but got them. When he came out I rubbed him down till he was as red as a lobster all over, and then he put on his clothes and ran to camp on foot behind the buggy. I produced the whisky: he took a big drink and the wetting didn't hurt him a bit.

We hung the deer in front of the tent on a tree before Price and Noah got in, and got a late dinner or an early supper of fried liver and bacon, fried potatoes and fried onions. The coffee was strong, and when the other boys got in we had a second instalment ready for them. They had seen two bunches of deer, but had not killed a thing; and old man Price actually almost cried when he told how his rifle snapped twice when he had a dead aim. It was tough. Noah's feelings were almost too deep for utterance, and I will not repeat his remarks.

Hanny went down the creek after dinner, and came back at sundown with several ducks and a sora rail. He said that there was a swamp full of rail a mile down the creek. After dark we had a little supper, and soon after, while we were smoking, and it was pitch dark (for the moon had not risen), we heard a coarse *meaw, meaw*, down near the trees in the bottom, not over 100yds. from camp. The horses and mules were picketed between us and the trees. I grabbed the shotgun, loaded with buckshot, the rest their rifles, and stepped out of the tent. The thing kept yowling, and I told Hanny to get the lantern and come down and get the horses and mules up to camp, for any minute I expected it would jump on one of them and kill it. I said, "I will carry the shotgun,

you the lantern, and I won't shoot unless he is going to jump." I was sure it was a panther or mountain lion. Just as Harry came out again with the lantern, the thing said *meaw, meaw, chukaroo, chukaroo, chukaroo*. It was a little screech owl about as large as a pigeon, that had been attracted by the smell of the meat. We went into the tent relieved, but a little ashamed to have been so fooled.

That same night the big wolves killed a steer about a mile from camp, on the other side of the creek. They howled and snapped and yelled while they were doing it, and every once in a while we could hear the deep, hoarse, despairing bellow of the steer ending in a smothered groan. The lobo or buffalo wolf has a voice the most savage and despairing of anything I ever heard. At last all was still and we slept.

In the morning Price wanted to go home, and though I wanted to stay longer we started.

We reached the D. B. L. ranch that night and camped. The foreman said he was going to send a man to Zulu for his mail, and I wrote a letter to send home, so that if we stopped on the road my wife would feel easy. Hanny went down to the ranch and Price and Noah went to bed. I went down at about 8 o'clock to see the boys and leave my letter. When I got near the house I heard a sound of reveling by night, and when I opened the door of the big log cabin I saw the foreman, the three cowboys, two strangers and Hanny seated around a big table drinking "whisky stews," as the Texans call them, and singing. One long-haired Texan was finishing the "Cowboy's Lament" as I came in. It is a mournful song when howled by a Texan. I can remember one stanza:

"Bury me not on the lone prairie
Where the coyotes will howl o'er my dead bodd-e-e."

After the song had been duly complimented, Hanny arose. He has seen a somewhat checkered career since he left the paternal roof and came to Kansas. At one time he ran what is called a drug store, more properly a "joint." He braced himself, and I knew something new was coming, for Hanny is at times afflicted with poetical mania. He threw back his head, and in a loud, clear voice sung "The Kansas Refugee," the first two verses running:

"I came from sunny Kansas,
Where the howling blizzards blow,
And where the temperance sisters
They persecute one so.

"Three times I have been cycloned,
And been arrested some,
So now I've come down here
Where 'tis legal to sell rum."

"That's pretty good," said the long-haired Texan. "I was up in Blank City, Kan., once, and Bat Smitherson, who is the president of the Temperance Union, got me drunk, and then Bob Gill Smitherson, his father, arrested me and had me fined \$20."

We sat and talked on various matters till late, and then went to camp. At daybreak next morning commenced the homeward march. In seven days we landed at Cimarron, with a little venison and as hearty as bears.

Natural History.

THE BEAVER'S WOODPILE.

Editor Forest and Stream:

A doubt superimposed upon a doubt sometimes leads to a certainty, and in the hope that the certainty will be attained—by some one else—I wish to contribute my bit of knowledge regarding one of the most curious tricks of the beaver, to wit, his ability to coax a stick into parting with its specific gravity.

Long years ago, nearly half a lifetime, I was taken to Lake Superior to cheat the undertaker, and succeeded so well that he has never dared to even serve a summons on me since. My father was the lordly magnate of over a hundred thousand acres of forest, and after I had changed a stiff arm into a limber and mighty useful one, he turned me over to the care of an old trapper and explorer to live an out-of-door life. It was the softest snap that old trapper ever had, as, beyond a strong desire to cheat my old enemy by drowning, I was easily controlled, and his salary must have tripled his income from trapping. Equipped with canoes, tents, traps and all the impedimenta of a hunter's life, not a lake or stream for miles escaped our ravages. Not a trout from the Montreal to Tobacco River was safe in his eddy. Not a mink slipped out of the water into a cedar swamp but what his mother told him we had a No. 1 Newhouse there. Not a fisher stole along the banks of lake or stream without being warned against us. Not a muskrat family in six lakes but had lost a member in our traps, and at least half of the survivors were toothless and legless. Decimated beaver tribes moved out of our county by night. Solitary otters fled westward, leaving the handsome pelts of their mates drying on our stretch-boards. An assorted lot of Canada lynxes came to see us, and we took them in and skinned them. No marten was safe if he came down out of a tree. A couple of bears spent a whole summer studying our deadfalls, and then reluctantly admitted that we were too many for them—and we were.

However, this devastation couldn't continue forever; and so one day my old friend and guide was put in a more domestic rôle, that of assistant helper and outside man to my mother's kitchen, while his son and myself were turned loose to rove in turn. It had been a royal progress in venery, and had left me no novice in the arts of the gentle savage. Ah, me! what a treat my grandchildren will have in the twentieth century, if I should live so long.

My youthful companion and myself fished much, hunted a great deal, studied in nature's own university some, and trapped in a desultory way. Young Jack was a rather rough savage, but of an inquiring turn of mind. His chief fault, in my eyes then, was his infernal hunger for company. He wanted to hunt with a brass band and trap with a picnic party. As a fisherman, his laziness made him nearly perfect. In talkativeness he was in marked contrast to his father, who had seldom spoken, except when he swore.

But to return to our muttons. About a mile from my father's house on Lac la Belle, the Gratiot River, one of

the most beautiful of streams, flowed out into the lake, as we fondly called it, bringing down the dark waters of Gratiot and Deer lakes, and incidentally containing more 3lb. brook trout than I have read of since. Its outlet was a curiosity, in that it was a projecting delta, discharging through three mouths, two navigable by canoes, one by large sailboats. For a quarter mile up stream there were no rapids or logs, and at the end of navigation was a red bluff about 20ft. high. Just opposite this, and nestling down in a clump of swamp ash, was an old beaver house, the largest I ever saw, reported to have been there in '55. Some seasons it would be deserted. The next year some wandering beavers would hunt it up, probably having heard of it through tribal tradition. They would cut a few fresh sticks, pile them on the outside, just as people hurry to hang shades in rented houses, to let the neighbors know that the premises are occupied, and would then go into the wood-cutting business. All up and down the stream we soon saw the marks of their axes, and at once proceeded to get our traps. Once or twice I caught a half-grown fellow, perhaps their most promising scion, and the rest of the family would promptly leave. This went on for years, until unnumbered ghosts with gleaming eyes and huge red teeth gave the place a bad reputation, and the non-resident landlord, whoever he was, could not rent it. Popular belief had hoodooed it as a "haunted house." Still, I fancy, at this distant date, belated travelers joyfully welcome it, and congratulate themselves upon its shelter and protection, only to hurry away the following morning haunted by visions of spooks and bogies, their ears still ringing with the noise of clanking chains.

Usually the fresh sticks placed on the house were denuded of their bark, but not always so. My companion and I used to throw them into the water occasionally, and I remember that some of them would sink and others float. At the time I do not think we attached any significance to this, and I am totally unable to explain it now. But sometimes, while prodding the bed of the stream, either in wanton idleness or to select a place for our traps, we would disturb Mr. Beaver's woodpile, and some of it would come floating to the surface, *but not all*. I forget what theory my old guide had taught me in explanation of this phenomenon, but that he had one I am sure, though while in the woods with him I did not take the time to test it that I did afterward around the particular house of which I am writing.

Again, we would fish up pieces of wood, and some of them would slowly sink back when released from the hand. Thus my testimony throws doubt on all the theories advanced in your columns. Hence the first sentence in this article. Hence, also, my uselessness as an observer. Looking back upon what was a familiar sight to me, I find my mind absolutely without conclusion as to the cause, and if my evidence has accomplished anything, it is to leave a mysterious matter still more enshrouded in mystery. I fear I neglected my studies more than I did my fishing. *Hinc ille lacrimæ.*

Having written this screed without a sequence I might as well add that one night last February, the thermometer 20° below zero, two Indians and myself alternately froze and slept before an open fire in the semi-polar region north of the Great Lakes. Before daylight in the morning we had our tea and frozen bread, made up our packs and smoked the pipe of impatience for the day that was to bring us to the Canadian Pacific Railroad. At last the first few gray streaks in the east made it light enough to start, and putting on our snowshoes we began the last march for the "home camp." In dark ravines we stumbled and fell, over brightening billtops we scrambled in awkward haste; our breaths formed clouds of vapor in the frosty air, and we hurried on, buoyed up with the happy thoughts of the "homeward bound."

Just as the sun showed its red rim over the horizon we were crossing a half open valley, and one of my men stopped and pointed, uttering the customary Indian "ugh!" Following the direction of his hand I saw a dome-like structure six or seven feet high standing near us in the mist, partially surrounded by a low wall of three or four feet. Going nearer I found it was a large beaver house, with the dam cut by some marauding hand. Was it the spirit of the old house on the Gratiot come back to haunt me? It looked unearthly enough, not to say ghastly, in the early light. Had the Matche Monito of the Odjibways done this in revenge? I looked at my red men. Their gaze was stolid and wandering. Evidently they hungered after the flesh pots of Egypt. Silently I gave the signal for moving, and rapidly we left the ghostly reminder of my boyhood days behind us. There also must I leave the habits of my race, once given, now only understood, by Wassemigoyan, our Universal Father.

Sadly and degenerately I sign myself
BUFFALO, N. Y. AHMEEK.

WAYS OF THE RUFFED GROUSE.

IN the fall during the shooting season young grouse occasionally leave their home and wander away, and are found in strange and out of the way places, such as vacant buildings, covered bridges, villages, and even in cities. There seems to be a wayward and yet natural tendency in this bird at times to roam, to leave the woods, the hills, the gullies, and to seek the plains, the islands and the shores of small streams and rivers. This tendency is encouraged somewhat by a desire on the part of the bird to find such food as it loves, as well as being chased and fired at to too great an extent on its native ground.

I remember once while walking along the street of seeing a grouse dusting in the roadway. I supposed at first it was a hen, but as I approached it it rose and flew straight down the street and in at the opening of the large covered bridge that spanned the Mohawk. The bird lit on a beam near the roof. Getting up to the beam I took the bird off. He remained perfectly motionless, as is their habit when approached by man. This grouse when he rose in the roadway made comparatively little noise, their habit being to make the greatest noise when unseen in the densest cover. This bird knew it would be useless to attempt to frighten me when I saw him. On two occasions grouse have been found in vacant buildings on the farm, both having flown in at the door. Once, also a grouse flew into my residence in the city, the circumstances of which I have related.

I know also of several cases where grouse have flown through windows, and against doors and sides of houses; sometimes with fatal effect, but not always. I recollect an incident that occurred in our city not long ago where

a grouse flew into a small barn and perched on a beam. The owner of the premises having invited a gentleman into the barn on some business, the guest said to the owner, "I see you keep poultry." "No," said the owner, "I keep no poultry, but my neighbors do, and I wish they would come and take that pullet away, she has been here now three or four days, and I am tired of feeding her. I guess I'll have to notify him." The gentleman looking a little more sharply said, "Why, that's not pullet, that's a partridge." And so it was, to the great surprise of the other, who had a fine dinner the next day, and invited his friend to it.

SCHENECTADY, N. Y.

RECENT ARRIVALS AT THE PHILADELPHIA ZOOLOGICAL GARDEN.—Purchased—4 mandrills (*Cynocephalus mormon*), 2 thetus monkeys (*Macacus erythreus*), 2 ruffed lemurs (*Lemur varius*), 4 squirrel-like phalangers (*Belides sciurus*), 1 red lory (*Eos rudra*), 2 West African love birds (*Agapornis pullaria*), 1 blue-throated warbler (*Erdiachus cyanellus*), 10 tuberculated iguanas (*Iguana tuberculata*), 1 carpet snake (*Morone variegata*), 1 diamond rattlesnake (*Crotalus horridus*), 3 ground rattlesnakes (*Crotaphophis miliarius*), 3 common black snakes (*Bascanium constrictor*), 5 common hog-nosed snakes (*Heterodon platyrhinus*), 1 black hog-nosed snake (*Heterodon platyrhinus niger*), 1 king snake (*Ophibolus getulus*), one chicken snake (*Coluber quadrivittatus*), 2 pine snakes (*Pityophis melanoleucus*), 4 coach-whip snakes (*Bascanium flagelliforme*), 2 glass snakes (*Ophisaurus ventralis*), 1 green snake (*Cyclophis vernatus*), 1 indigo snake (*Splotes erubescens*), 1 corn snake (*Coluber guttatus*), 1 scarlet snake (*Cemophora coccinea*), 1 spotted monitor (*Varanus varius*), and 1 White's cyclopus (*Tilapia scincoides*). Presented—1 Eskimo dog from Alaska, 1 gray squirrel (*Sciurus carolinensis*), 2 twilight bats (*Atalapha crepuscularis*), 3 raccoons (*Procyon lotor*), 8 opossums (*Didelphis virginiana*), 1 sparrow hawk (*Falco sparverius*), 2 night hawks (*Chordeiles virginianus*), 1 great-horned owl (*Bubo virginianus*), 2 canaries (*Serinus canarius*), 2 St. Thomas conures (*Conurus zanthochelone*), 2 aligators (*Adiga tor mississippiensis*), 2 garter snakes (*Eutania macrotis*), 9 garter snakes (*Eutania sirtalis*), 2 banded rattlesnakes (*Crotalus horridus*), 1 DeKay's snake (*Storeria deKayi*), 3 common water snakes (*Tropidonotus sipedon*) and 1 pine snake (*Pityophis melanoleucus*). Bora—4 pumas (*Felis concolor*), 15 earter snakes (*Eutania sirtalis*), 2 Marey's garter snakes (*Eutania maculata*) and 4 banded water snakes (*Tropidonotus fasciatus*).

Game Bag and Gun.

THE HUNTER'S BADGE.

Editor Forest and Stream:

There is an old custom in Scotland, according to which any one who has killed a stag, a salmon, a seal and an eagle, has a right to wear (if he pays for it) the hunter's badge, which consists of a small gold watch charm in the form of a shield with the heads of the above embossed in the four corners.

This is all very well as far as the stag and salmon are concerned and perhaps also the seal, although it seems rather a shame the seals, which are growing rare in Scotland. But inasmuch as the badge calls for the destruction of eagles it is a great mistake, as eagles are almost extinct in Scotland, owing to the senseless practice of killing them down on all possible occasions; and why it should be an honor to shoot with a shotgun a big slow-flying bird does not seem very clear, the usual way being to watch the eagle's nest and shoot it as it comes to feed its young.

The eagle ought to be omitted, and a list of all the game birds in Scotland substituted, so as to make the holder of the badge an all-round hunter.

There is a more recent badge called the "stalker's badge," which is for any one who has "stalked" (still-hunted) a stag over a certain size of horns, entirely by himself. This requires some doing. The usual Scotch and English deer shooters have a man to guide them, which, of course, is not allowed when qualifying for the badge.

If there was a "hunter's badge" started for America, given to any one who has killed certain of the big game of America in a sportsmanlike way it might educate men up to taking care of the game, spare females, etc., as any one who shoots big game in a sportsmanlike manner would be able to wear the badge (which need not be expensive, as it could be of bronze), and if he met any member of a shooting club who had not got a badge on he would know what class of shooter he was and might shame the unsportsmanlike shooter into mending his ways.

W.

NOVA SCOTIA LICENSES.

Editor Forest and Stream:

As the time is approaching when your people come here to hunt, I send a list of the names and residences of the persons authorized to sell licenses. If published in your paper it may help to save a recurrence of the unpleasantness of last year. If the government should appoint any others I shall send their names also. There are no important amendments to our laws. At last session, with a view of protecting red deer, which we contemplate importing from the West, a close season was made for them of ten years, during which none shall be shot.

Below is a list of officers authorized to sell licenses in the several counties of Nova Scotia:

Annapolis—J. M. Owen, Annapolis Royal. O. T. Daniels, Bridgetown.
Antigonishe—D. McDonald, Antigonishe.
Cape Breton—John McDougall, Sydney.
Colchester—Hugh McKenzie, Truro.
Cumberland—D. J. McLeod, Amherst. Robt. Gibson, Parrsboro.
Digby—W. B. Stewart, Digby. A. M. Comeau, Comeauville, Clare.
Guysborough—A. H. McGillivray, Guysborough. Thos. Campbell, Sherbrooke.
Halifax—W. H. Wiswell, Halifax. Provincial secretary's office, Halifax.
Hants—Jas. O'Brien, Windsor. Nelson Wier, Nine Mile River.
Inverness—J. H. Jamieson, Port Hood.
Kings—L. De V. Chipman, Kentville.
Lunenburg—Ed. H. Solomon, Lunenburg. Chas. Lordly, Chester.
Pictou—Jas. McG. Stewart, Pictou.
Queens—Wm. Ford, Milton.
Richmond—Thos. J. Jean, Arichat.
Shelburne—William S. Taylor, Shelburne. Rufus H. Crowell, Barrington.
Victoria—John McDonald, Baddeck.
Yarmouth—Hiram Goudey, Yarmouth. Enos Gardner, Argyle. C. S. HARRINGTON, HALIFAX.

THE SAGINAW CROWD.

WE have been somewhere every year; while not always the same old crowd, still a good many of the old hands have been along. Last year we left for our old stamping ground in Dakota, Oct. 13, taking the good car City of Saginaw, over the C. S. & N., Wisconsin Central and Northern Pacific. The party was small. Bob Schultz and I were the only ones of the old crowd, and two tenderfeet in the shape of A. H. Morley, of this city, and A. P. Bigelow, of New York, with George, the porter, and old John to look after the kitchen, constituted the party.

We arrived on Thursday, the 16th, and were met by our guide and the livery stable man with the cheering news that the birds had not come down yet, that the shooting was poor and the sloughs all dry. However, we were comforted by the remark that on a barley field about ten miles north a number of birds had been seen the last few days and possibly we could get a shot there. It proved to be a very good day. We started at once and arrived on the ground about 10 o'clock.

As soon as we came in sight of the stubble we saw that we were going to have some fun. It was situated on the side of a hill, about half a mile distant was a little lake and there was a continual stream of geese and mallards coming from the water to the barley field and back into the lake. The day was dark, and by the time we had our decoys out and pits dug it began to snow, and seemed as if the air suddenly became filled with geese and mallards. We did not wait for lunch. The shooting was good for about two hours; 37 ducks, mostly greenheads, 35 geese and two great white whooping cranes that Bob had the good fortune to get, was the tally as we put them in the wagon. The cannonading at last drove the birds away

out our list of supplies, and getting the old car in order, and, in fact, beginning to have as much fun out of it as we will have after we get there. Lots of wheat this year and plenty of water ought to make the shooting good, but whether it is or not we will have a grand time and possibly may write you about it later. W. B. M.

TEXAS GAME GALORE.

Editor Forest and Stream:

I have just been glancing over the different excellent articles in your issue of Aug. 27, and among them the article "Hints on Handling Guns" especially attracted my attention. I agree with the writer on all his points but one, and that is that "hammerless guns are a constant danger to persons boating." I fail to see how the hammerless gun is more dangerous under any circumstances than the hammer gun and would be glad to have "Reynolds" explain his position.

For the information of our Northern brethren, and to gratify a little self-pride, I will state that on Saturday evening last in company with a couple of friends and their families we drove out at 5:30 o'clock P.M. six miles in the country and took supper, after which we three gentlemen took a little round with our jack lamps and I killed a fine old doe about 9 o'clock. I rode up on them bedded in the tall sedge grass, probably for the night or until moon-up. A long row of eyes flashed across my course on the side hill to my left. Quickly dismounting I singled out a pair of eyes to my extreme left, which had arisen, and pulled the trigger, which brought her to earth, shot in the head, shoulder and body. Now some of the critics will cry out murder! But down here where

CHICAGO AND THE WEST.

CHICAGO, Ill., Sept. 9.—All about Mr. William R. Boyle, the bloody-minded fighter from Wartower, commonly known as Billy Boyle, who runs an eating joint on a Dearborn street alley, and serves, or rather used to serve, illegal game. It will be borne in mind that Mr. Boyle was the only one of all the guilty restaurant men whose voice was still for war. "I will fight to the knife, likewise to the last ditch," said Mr. Boyle. "These d—d sportsmen shan't make me quit. I'll carry this case into all the upper courts, into the supreme court and higher yet if need be, no matter what it costs. I'm not going to plead guilty for the satisfaction of a lot of fellows who would only be too glad to sneak out and shoot game out of season the first chance they got. I'll fight, I will!"

Well, we all hoped he would fight. In an earlier issue I told how he couldn't get any more continuances, and so forfeited his \$200 appearance bond. It was hoped that Mr. Boyle, the grim warrior of the alley, would find some way of getting into the upper courts, because the sportsmen wanted some to make a test case on, and this was an easy one. But Mr. Boyle's valor cooled. Yesterday he meekly walked into Justice Randall White's court and anted up his little \$25 and costs, like the rest of them. Mr. Boyle is a great fighter, but he went out in the first round. In the language common about his resort he was a "mark."

Only one thing remains to be said for Mr. Boyle, and that is that no self-respecting sportsman will patronize him again, for his absurd bitterness at not being allowed to violate the law led him into general abuse of men who had formerly been good patrons of his, and this abuse carried to an extent more than ridiculous. Let the grim-

AMONG THE WILDFOWL.—III.

"WHERE IGNORANCE IS BLISS."

and although we waited for their return flight in the evening, they did not come and we drove back to town, exceedingly well satisfied with the day's sport.

We did not get as many birds any day after that, though the bag was fair, getting a few plover and quite a number of sharp-tailed grouse. I also killed a prairie wolf with my rifle at, I should judge, fully 300 yds., most likely a lucky shot. We were driving over the prairie and went through a very rough patch all grown up to weeds, and right in front of the horses out sprang this wolf and a badger. The badger went into a hole, but the wolf, after running about 300 yds., stopped to look back. In the meantime I had shoved a cartridge into my .38 Marlin, and taking careful aim, fired, and as good fortune would have it, struck him right back of the ear. When we counted up that night we did have a pretty good bag; 68 geese, one white crane, the wolf and two sharp-tailed grouse.

We were preparing to take a trip about 35 miles northwest after deer. In a strip of rough country cut up by hills and gullies, a good many blacktails had been seen the week before. We were making all preparations and were to start on Thursday the 23d. Wednesday, Bigelow, the guide and myself went to the north of the car about twelve miles and located a big flight of geese, and were expecting grand sport for that night. About two o'clock in the afternoon I was taken with a severe chill and burning fever, and a congestion or knotting sensation in the left lung finally drew me all out shape, and it resulted in a severe attack of pneumonia. Temperature was up to 105½ when the doctor came in to see me the next day. To say that the long ride home that night was miserable but feebly describes it. Had to be lifted into bed and at the advice of the doctor we started for home the next day. The Chicago and Grand Trunk people put us on their fastest east bound train out of Chicago and we reached home late Saturday night. This ended my shooting for last year. It was a great disappointment to the rest of the crowd.

The birds came home in nice condition and were given to our friends. One beauty of shooting out there is that the nights are so cold that the game gets thoroughly chilled, and with even ordinary care you can save it two weeks.

We are now planning for another trip. Our party will consist of ten or twelve, the old crowd, and we are getting together now every evening and talking over loads, how many shells to take, getting decoys painted up, making

this wily game stays in the brush most all day we consider it great sport to kill them by fire-light. We returned about 12 o'clock to our respective houses and feasted on venison all day Sunday.

Deer, turkey, plover and other game are plentiful this season. More turkey than for several seasons and the shooting promises to be fine when the season opens. It is a wonder that more of the Northern sportsmen do not find their way to Texas. On our coast there is as fine fishing to be found as anywhere, and there will be no scarcity of game for a long time to come, if we can keep the pot-hunter out. It is amusing to us to read some of the articles in your valued paper from contributors, some of them covering a big space, about so small a thing as the catching of an 8lb. fish. Some write about killing of a dozen or so of quail, while others write about travels of hundreds of miles to get the glimpse of even a deer's track. In most of them good descriptive ability is displayed as well as talent in writing, and they are really interesting and are desirable matter for a sportsman's paper, but a lover of nature, the rod and the gun, if you could spend a week or two in southwest Texas on a tramp with the writer, you could write books on the subject when you go back home, and feel better for your trip.

BEEVILLE, Texas, Sept. 1.

T. J. S.

FLOATING FOR DEER.—So great a handicap is laid on the deer by those who seek to take them in the water, removed for the time from their natural element, that I fail to see where the glory or even common credit for slaying a deer under such circumstances comes in. I believe the time is not so far distant when this matter will be measured strictly by what is accepted as the standard of action in the other branches of sport. For example—for a fellow who would pot-shot a covey of quail, we feel nothing but scorn, unless it be pity; there is the element of sport only when we give the birds a fair chance against which we pit our skill. This seems to be the principle of true sportsmanship.—ONYJUTTA.

MESSRS. VON Lengerke & Antoine, of Chicago, ask us to say that pressure of business has as yet prevented their issue of a general catalogue, which, however, is in preparation.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—ADU.

visaged warrior of the alley alone until it comes time to nail him again. Meantime, if he will continue his study of FOREST AND STREAM, he will further learn how to save himself some money, as he did in this case.

The Boyle case was the last of the first crop of restaurant cases. We will soon start in on the second crop, and this time it will be more serious. We will prosecute Mr. Chas. Rector within a few days for 5 and perhaps 6 additional cases, and I hope we will be able to catch some others a second time, especially one notorious offender who is known to be at it again.

Yesterday Charlie Gammon and H. D. Nicholls got illegal prairie chicken, 2 birds, at Meyer's "Rathskeller," corner of Dearborn and Madison, Louis Hansen's old place. To-morrow Messrs. A. Price and W. H. Haskell will undertake to nail that outfit for two more birds, and \$25 and costs will presently drop coldly into Justice White's fine box. The second-crop cases will cost the offenders the limit, which is \$25 a bird. The fine of \$25 as a total does not amount to anything.

Mr. Chas. E. Kern, ex-president, etc., of the Illinois State Sportsmen's Association, has not yet told where he got those chickens. Come, Mr. Kern!

Will other sporting papers please copy? E. HOUGH.

VERMONT GROUSE AND DOGS.—Several correspondents have called attention to a statement by "Special" in our issue of Sept. 3, that "by special statute, enacted in 1890, dogs are prohibited for hunting grouse in Vermont. See Book of the Game Laws." A reference to the Book of the Game Laws, page 231, will show that "Special" is in error; the act of 1890, there quoted, was to repeal a previous prohibition of the use of dogs, and as the Book of the Game Laws points out, even that was unnecessary, for the prohibition had already been repealed by Chap. 117, Laws 1882.

WOODCHUCK IN TREE.—Minnehaha Falls, Minn. Aug. 31.—I saw the note of "H. D." in your issue of Aug. 27, in which he states he shot a woodchuck from a tree. I killed a woodchuck last spring in a large hollow basswood about fifteen feet from the ground. I noticed a hole in the basswood and thought there might be a coon in it, so I investigated, and drove out a medium-sized woodchuck. He ascended the tree about ten feet above the hole and stopped on a large limb to rest, and he rested—with a .38cal. W. C. F. through his brain.—F. A. M.

GAME WARDEN DARLING.

THE Bangor News asserts that "Maine has few more energetic or more honest game wardens than 'Jock' Darling," and prints this letter from him:

To the Editor of The News:

I have recently received letters from hunters and guides asking for an explanation as to why I have accepted an office of a game warden; and one sends me a clipping from a Bangor paper which reads: "Maine's notorious game warden. Set a thief to catch a thief, etc.," and says that Uncle Jock has long set the game laws and wardens at defiance, and openly advocated the dogging of deer in various publications over his own signature, etc.

I will give a partial explanation. I advocated dogging deer during the open season, as my long experience told me, with few exceptions, they could not be had any other way, and that my belief was the most of the deer doggers would help enforce the law in close time. I fought the law or rather the wardens when I believed that they were the law breakers, and I went to our Legislatures and did all I could to amend the game law by repealing a portion of it, and I did it alone. Not a hunter, guide or sportsman helped me to a cent or lifted a hand to help me. On the other hand, many of the guides that I had given employment that put many a dollar into their pockets, did not appreciate the favor, and worked against me in many ways.

And now they can take their turn, if they want to fight the law, they have the field, and if they want the law amended or repealed they have a chance to see what they can do.

Our judges will tell the jurors in their charge to them that the law may be wrong or obnoxious, but as long as it stands on our statutes it must be regarded as law, and that they must decide according to law and evidence.

Years ago I killed hundreds of moose and used to get every pound of meat out of the carcass, until I found that the other hunters, mostly Canada Indians, were bound to kill them all just for their hides, and to get my share I took a hand in it, at the same time believing it to be wrong.

I have given some of my reasons for accepting the office of game warden, and, as I have accepted it, I shall try to protect and preserve the game when it should be.

And I will say to the hunters, guides or poachers, that I don't want to catch them breaking the fish and game laws. I shall not try to induce any one to break the law for the purpose of catching you to get your money. I don't want you to kill game when you are not allowed to do so by law; but I do say if you keep on or do kill, as some of you have in years past, I shall catch a few or more of you.

I shall make it a point to see the hunters, guides, etc., and talk the matter over with them and try to persuade them not to kill the fish and game in close time, and if I am successful in this I shall think I have done a better work than I should if I had arrested them and put them to trouble and costs.

J. DARLING.

LOWELL, Mass., Sept. 7, 1891.

"GUIDO" reports in the Memphis, Tenn., *Public Ledger* on the game outlook as follows: "Sportsmen who have toiled through the summer, with the hope of reward, among the south-bound wildfowl are about being amply rewarded, as the growth of small acorn mast, duckweed and other feed is unprecedented. Already a few blue-winged teal, mallard, spoonbills and geese have fallen to the gunner's deadly double, while bags of 20 to 40 wood or summer ducks are frequent at Beaver Dam, Waponecka and St. Francis clubs. Yonkapins, wild rice and celery that were sown three years ago, and almost despaired of (owing to overflows), are freely growing with moss and smartweed, and pepper grass and periwinkles, of which wildfowl are greedily fond; also colts foot, nut grass, wire moss and willow acorns are abundant, and to aquatic fowl irresistible. Owing to large growths of food and cover the duck shooting especially at Beaver Dam and Waponecka has wonderfully improved within the last year, and dozens are now bagged where couples formerly were, and each club has an artist in culinary skill and new and complete outfits in boats. Homes are only more delightful than these clubs in the kind of a duck at each. Fishermen who want the gamiest trout and striped bass, and salmon and pike need go no further than Oak Donick and Blackfish, Ark., as the quantity, quality and appointment of the sport of angling are first class. For February and March shooting on deep water ducks, for extent of yonkapins and grass nut feeding grounds, and for superb fishing Oak Donick wears the diamond champion belt, 'out of sight.' Initiation fee in Waponecka is \$350 with \$20 annual dues added."

SCATTERED SHOT.—Ottawa, Kansas.—Last week another careless accident occurred at this place, though fortunately no one was severely injured. A farmer was just leaving one of the stores on Main street with a load of wheat in his wagon. He had placed his loaded shotgun on top of the wheat and as the wagon started the gun rolled off and was exploded. The load scattered about 25ft. over the buildings across the street, but only one man was hit. The shot went through his clothes but did not hurt him very badly. A horse was also plentifully sprinkled, though not seriously injured. This was not all, however, as most of the load struck the front of Elder's hardware store and filled the plate glass window full of holes; it also broke some glass for the Ottawa Printing Company. The man who caused this havoc will probably be more careful after he has gone down into his pocket for the amount of the damages.—F. B.

ENGLISH PHEASANTS IN VERMONT.—At Shelburne Farm, Shelburne, Vt., nearly 1,000 English pheasants have been hatched and turned out into the woods on the farm.

HUNTING AND FISHING IN THE NORTHWEST.—Are you planning for an outing this summer? Have you ever looked up the numerous resorts of the Northwest? It is not an exaggeration to say that the best hunting and fishing grounds in North America are found in the territory tributary to the Northern Pacific Railroad. The lake park region in Minnesota affords pickerel, pike, bass and muscalonge; rock bass are found in numerous streams, and deer, elk and bear abound in the forest regions; antelope are found in North Dakota. The Snowy, Bitter Root, Grazy, Rocky and Cascade Mountains are the home of moose, elk, caribou, cougars, Rocky Mountain sheep and goat and other large game, while all of the Northwestern States abound in feathered game. Rocky Mountain trout and grayling are caught in the Yellowstone, Gallatin, Madison, Jefferson, Clark's Fork and Green rivers, affording unrivaled sport. An interesting pamphlet, "Game Preserves of North America," can be obtained free on application to GRASS, S. F. B., G. P. & T. A. of the Northern Pacific R. R. at St. Paul, Minn. Descriptive publications concerning Yellowstone Park, Pacific coast and Alaska will also be mailed on receipt of application, referring to FOREST AND STREAM.—Adv.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price \$2.50. For sale by FOREST AND STREAM.

Camp-Fire Glickerings.

"That reminds me."

THE Doctor, Willis and I were spending our vacation at Sugar Loaf Hotel, on the South Fork of the American River. One day while seeking a suitable bathing place we came upon the camp of B., of Sacramento, a friend of the Doctor. In making our retreat, as we did not wish to visit the camp just then, we espied B. on the stream below vainly endeavoring to secure a rise to his most enticing flies. We decided to help him. Willis and the Doctor cast small pebbles so deftly as to imitate the splash of a fish jumping for the gnats that fairly covered the surface. As poor B. would notice each successive splash in a different place he was kept busy casting his line, but without success. Finally giving up in despair, he left the place; so did we—in a different direction. We learned afterward through a mutual friend who visited Brunner's camp the wonderful stories of how the stream was fairly living with fish (big ones, too) and of their perversity in refusing to take his most tempting offers. When B. learned of the deceit practiced upon him, he was ready to go gunning if it were not for the law, grouse, elk, deer and men being protected.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

CRUISE OF THE PLAYFUL.

AUGUST, 1891.

CRYSTALLIZATION requires a good nucleus and the right material. The material existed in twelve busy men. The nucleus, well, Estelle was the right kind of one. He had but to place himself in contact with eleven of his ilk, tell about "a ten days' cruise along the Jersey coast, a schooner yacht, the open ocean, Barnegat Bay, good company, a trusty skipper, skillful cook," and all that sort of things, and if he had dropped a Montreal fly on some creamy swirl of mountain water above a hungry brook trout his lure could not have met a quicker response.

Go? Of course! Let business, churches, stores and offices go to Estelle, we're with you!

A hurry-scurry quick package and expressage of great stores of groceries, fruits, varied delicacies, fishing tackle and everything even to Gospel hymn books; and on Wednesday, at 7 A. M., Aug. 5, twelve disciples of Isaack Walton and three boys for spice were at Market street station, Newark, loaded with luggage to take the train for New York, thence to Rockaway, whence the cruise was to begin. Rockaway was reached in two hours after numerous separations of passengers and baggage, Estelle concluding his company was about as cohesive as a bag of fleas.

Yacht, captain, crew, cook, and almost everything ready. But crabs and clams for bait must be had, and barrels and salt. No parsimony was shown in getting any of these indispensables, least of all in regard to salt. Then that score of watermelons hadn't come. Hence another delay, yet every day out as we sucked the ruby treasures we blessed ourselves for waiting till they came.

All aboard by 11:30 A. M., and just at noon the shore loungers and the guests of the hotels gathered on the pier; sails were set, hawsers cast off, the crowd cheered, and before a good breeze we glided out through Rockaway Inlet into the bounding sea. We were as follows: J. A. Estelle, merchant (and Isaac Saul, manufacturer,

his son Alfie). G. W. Beeson, merchant. Lewis B. Cleveland, retired. G. H. Bailey, insurance broker. Geo. Roubaud, merchant. F. M. Hummel, superintendent. H. S. Faulkner, merchant (and son Harry). Rev. C. H. Jones, clergyman. Isaiah Peckham, insurance broker. Rev. H. F. Barnes, clergyman (and son Robert). Wm. Kilpatrick, merchant.

Our yacht was the Playful, of New York, 54ft. long, 16ft. beam, schooner-rigged, with ample cabin accommodations, and a staunch and seaworthy craft, good in any sea and all weathers, and carrying two small rowboats. Either the Volunteer or the Gloriana could beat her for speed it is but fair to say. Captain, John Sedelmeyer; crew, Billy and Ben; cook, John Africanus. So we mustered nineteen souls on board at the start, though later we claimed to have three females also, to wit, the wind-llass, the rud-her and the penn-ant.

Wednesday, Aug. 5.—Passing out of Rockaway Inlet before 1 o'clock P. M., we laid our course for Sandy Hook, at once heaving over the trolling lines for bluefish. And that was the least we have over after reaching the great rollers off Rockaway. Little Alfie Estelle placed first offering on the shrine of Neptune. The Chaplain, as became his office, next rendered a very hearty tribute to the ruler of the sea. A strange pallor quickly spread over the others, and one after another they kept back nothing as they worshipped at Neptune's altars and sank back exhausted on the deck, so proxiomally had been their devotion. The Chaplain declared he had seldom seen a congregation so deeply moved. A slack wind, and the long and glassy ground swells would have kept the entire company on their backs on deck, had it not been for Peckham, Jones and Hummel, whose tireless brains and witty tongues made "animated busts" of the sickest cruisers. At 5 P. M. rounded Sandy Hook and dropped anchor in the Horseshoe for the night. At once Cleveland and the boys were beginning to pull in dogfish, skate and hammer-headed sharks, which seem to be the chief piscatorial treasures of the Horseshoe.

Supper over, that placid bay, the fleet of yachts and fishing craft at anchorage close by, the low emerald shores of the Hook, the sunset with its lane of golden sheen westward across the waters, the flash of the Highland lights, the bold headlands to the south, the night lanterns hung out one after another on the vessels at anchor, all wove a magic spell of restfulness and joy over every voyager on the Playful, and spontaneously the

whole company broke out into song which rang out within hearing of the neighboring fleet, securing appreciative applause.

Thursday, Aug. 6.—Sailed from the Horseshoe at 5 A. M. with contrary wind and tide. Four hours rounding the hook. The light wind and the long rollers outside the hook began to create again the nausea of the previous day. Every effort was made to counteract it. Stories, jokes and puns were hurled so fast around the cockpit that it seemed as if wind would triumph over matter, but Neptune captured two victims. Of course, all the stories were strictly true, for as yet no fish had been caught, and the world knows it is not until they have been caught that a man begins to clothe himself with lies as with a garment. The Playful passed Asbury Park at noon, and the chaplain was just beginning to sigh for a hallelujah camp meeting time on shore when there was a sharp jerk on his trolley, quick retrieving of 200ft. of line, and the first bluefish of the cruise was whirled over the taffrail into the cockpit. At once all were convalescent and the sea had no further terrors, though it yielded no similar returns that day. Passed Barnegat Light at 5 P. M., wind S.E. Came to anchor opposite Wearetown at 6 P. M., the skipper deserving great credit for pilotage through the roaring breakers of Barnegat Inlet, and then along the labyrinthine channels of Barnegat Bay at ebb tide without hanging up the Playful but once on bar or flat. Before dark enough weakfish were caught for supper and breakfast.

Friday, Aug. 7.—Weighed anchor for Wearetown at 5 A. M. Anchored near the shore. Capt. L. G. Mitchell, of Barnegat, whom we had hoped to secure as pilot to fishing grounds in the bay, came off to see us, but could not go with us owing to engagement with another party. Got hung up on a ledge of rocks, where we had anchored, and were compelled to drop anchors shoreward and pull ourselves off. At 9 A. M., were off, and followed boats to fishing grounds to the south in the bay.

After fishing two hours, tide compelled us to sail back for Wearetown, having caught only one weakfish from the yacht. Peckham, Scull and Beeson, who had rowed over to Harvey's Cedars in one of the small boats, were compelled to leave behind to overtake us at their leisure. They caught some large weakfish, sea bass, and a large sea turtle, not returning to the yacht until late in the afternoon, after rowing 10 miles.

Estelle and Kilpatrick, from the other small boat near the yacht, caught three weakfish.

Without a local skipper we did not allow Barnegat Bay to do herself justice on the weakfish, consoling ourselves that we saw few fish being caught from the other boats, and that bluefish tasted better.

At anchor off Wearetown at night again, Cleveland and the boys kept fishing up all sorts of strange marine curiosities.

Saturday, Aug. 8.—All were sorry this morning that Peckham, Jones, Scull and Bailey had to leave the party and return to Newark.

The only consolation of the company as they were put ashore, Bailey at Wearetown and the others at Barnegat City, was that we should probably need their storage and tonnage capacity to accommodate the great catch of bluefish expected that day. Nevertheless, their flashing wit and ceaseless stories and merry songs were greatly missed. The next cruise should have all under ironclad pledge to stick to the boat till she ties up to the home dock.

Under a light W.N.W. wind at 8 1/2 o'clock A. M. the Playful glided out of Barnegat Inlet; not, however, till Roubaud had taken a fine bluefish from the breakers. It was not a bluefish day outside. The breeze ran up and down the mast and spilled out of the sails until 2 o'clock, when enough came to let us catch two bluefish and to bring us to Tucker's Inlet, the entrance to Little Egg Harbor, at 5:30, where we came to anchor. After supper the party, except Cleveland, went ashore in two boats and had their Saturday evening bath with athletic sports *en déshabille*, impossible in a less secluded resort. The return to the Playful in the darkness and fog, and the mill-race tide, the separation of the boats, the search with the ship's lantern, the terrific strain at the oars, the fortunate finding of the slack shore current, the swift plunge of the small boat against the Playful's side, Faulkner's gigantic grasp of the outrigger, the whole two hours' fight to make the yacht, though but a few rods away will never be effaced from the memory of any participant. That was a sincere Te Deum sang by us all that night in the cabin of the Playful.

Nothing but excitement over unspeakable peril just escaped by a hair's breadth could have kept the party on deck till midnight recounting that evening's adventures, oblivious of the swarms of mosquitoes infesting the place.

If we cruise along the Jersey shore again a prime stipulation will be, "Any harbor at night but Little Egg and Tucker's Inlet!"

The school of porpoises which played around the yacht and the glorious bath were small compensation for that fight in the darkness and fog with the rapids and later with myriads of sharp-billed sleep-destroyers.

Sunday, Aug. 9.—Is it right to sail on Sunday? Well, all moral considerations go by the board if Sunday morning finds you in Tucker's Inlet. Get right out of that Stygian stream if you wish to honor the day of rest. It is Sabbath-breaking to stay there a moment. At 5 A. M. we were away, leaving only our anathemas. Our course was laid for Atlantic City. Two hours of calm, coming on when we were well off shore, were not unwelcome. Being headed for a popular watering place, and all having fish-bone beards of four days growth, the calm enabled us to use our razors without sundering our jugulars. At 2 P. M. we dropped anchor among the yachts off Atlantic City, in the Inlet. At once the party went ashore. After strolling along the great trestle board walk, partaking refreshments, looking up and down the broad avenues, getting and sending mails, we gladly took the electric car for our dock and went aboard ship after a couple of hours, pitying the hot and sweating crowds that were seeking a day's respite from care on the burning sands, all ignorant of the cool and free life we were having on the open sea. As to fishing on Sunday—well, only our unregenerate crew did that, and many a fat bluefish got served right for helping them break the Sabbath.

Monday, Aug. 10.—At 6 A. M. we sailed from Atlantic City, breeze and tide in our favor. For two hours we swung lazily on the long ground swells just outside the

bay, not a little concerned as to our record for bluefish. But at length the deep blue strip betokening a breeze on the sea far to the southwest, began to widen, then spread out toward us, the sails filled, trolling lines stiffened, and quickly we were all busy hauling in large bluefish. Didn't Cleveland look like a windmill in a gale as he stood at the rail working in that monster? Off Beach Haven, seven miles off shore, we caught forty-six bluefish, averaging about 10lbs. apiece, and several large bonitos. We could tell which we had on soon after they struck, for the bluefish made their fight on the surface, while the bonitos never broke water, but swam as deep as possible. We made Barnegat Inlet at 4:30 P. M., and came to anchor just inside the north hook, close to the steep shore. All the party went ashore, some to cast for bass in the Inlet, the boys in search of curiosities, and all to be photographed by Roubaud on an old wreck whose storm-battered ribs, projecting from the sand, offered a picturesque setting for the group of cruisers and their display of fresh-caught fish. Our artist immediately afterward took a picture of the Playful as she lay at anchor near the shore. On board again the party held a meeting on deck and formed themselves into the Newark Cruising Club, with Estelle as commodore, and with the plan of making a cruise eastward next year. At night we were regaled by a brilliant meteoric display, and many a bright ball with its long train of glimmering haze seemed headed for Barnegat Bay.

Tuesday, Aug. 11.—At daylight, with S. W. wind and outgoing tide, we worked our way slowly out of Barnegat Inlet, somewhat annoyed by being thrown up on the shore for half an hour. The temperance element in our company were particularly scandalized by the yacht's tendency to tarry at bars, but what more natural place for a "schooner" than at a bar! We have discovered that yachts have a positively immoral tendency, for while our skipper would be lying about her never stopping at bars, suddenly the yacht would lie to! Once outside the inlet, a strong breeze and a boiling sea furnished the requisites for bluefishing. From Barnegat to Sandy Hook the Playful bounded like a racer over the high blue waves. Our course was laid 7 miles off shore where the fish were plentiful and very large, and were being pulled in steadily, sometimes three at once. But this was bonito day. A dozen of these beautiful and gamy fish were caught on our way to the Hook. Among these large bluefish and bonitos the boys who had hitherto caught their share gave up fishing, as they could not pull in the big fellows on 200ft. of line, with the boat flying at such a pace through the tumbling surges.

Reaching Sandy Hook at night the Playful again dropped anchor in the Horseshoe, and the boys again began their sport with the dogfish, sharks and skates infesting these waters.

Wednesday, Aug. 12.—At daybreak the Playful sailed from the Horseshoe and her course was laid for the Fishing Banks, off Seabright, about ten miles S.W. of the Hook, that we might try the flukes, sea bass and also bluefish chumming. Half a dozen large flukes were the only reward of this trip. Chumming is fine sport, especially if you have no nose for macerated bunkers, no eyes to view the remains as ground out of the chumming mill, and don't have to lie at anchor at midday on a glassy ground swell. We had all these things, and came near losing our sea legs again on account of them; so got away soon and gladly from Seabright and headed for Rockaway.

Again a calm, tugs ran up one after another to offer us a tow, the empty barrels we threw overboard seemed to be gaining on us, and it looked as if our last leg was to be the most tedious of the voyage, when suddenly clouds gathered in the north, a strong breeze set in, the skipper was busy as a hornet in hay time taking in sail, batten-hatches and generally getting ready for a blow.

The gale struck us just as we were off Rockaway Inlet, forcing the Playful ahead at a merry pace; then came a heavy rain and a thunder storm that flashed and reverberated all around us, compelling us to heave anchor and lie-to, playing skipjack and souse bucket on deck for half an hour, for none could stay in the cabin. One bolt struck so near us that those who had their hands on the wet masts or spars felt a sharp shock. At length the western sky grew brighter, the wind quickly slackened, anchors were weighed, and on a light breeze we made Hummel's dock at Rockaway at 7 o'clock.

In eight days we had sailed, log measurement, between three and four hundred miles, mostly from five to eight miles off shore, been on land but two hours, caught over a quarter of a ton of bluefish, bonitos and weakfish, had favorable winds, tides and weather most of the time, and picked up vigor enough to brace us through another winter, eagerly expecting the day when we may duplicate the rugged pleasures of our first shore cruise.

From the start to the parting not a word or act had marred the good fellowship of our company. Good oarsmen, good swimmers, good anglers, with jokers, jolly fellows all. The expense was only \$15.50 per man and one-third the amount for each boy, and those boys must be praised as of rarely good stuff. They picked up material enough for a year's composition at school. In bluefishing we found that the red-cedar squids, fish-shaped, did the best execution, and a bit of scarlet flannel as big as a half-dollar on the hook added to their efficiency. The tarred, close-wound cotton lines we found the best for trolling.

NEWARK, N. J.

H. F. B.

A SHEEPSHEAD BONANZA.—On her last cruise to the southward the U. S. S. Yantic blew up the remains of a wreck that lay on the bottom in about eight fathoms of water, with spar attached and reaching above water. Just after the explosion of the dynamite used by Lieut. Richman, who had charge of the work, there were picked up dead floating on the surface of the water by the boat's crew, 109 sheephead that would average 6lbs. each, while the surface of the water was literally covered with sea bass. This took place near Five Fathom Bank, between the bank and Cape May.—*Ec.*

SPORTSMEN ATTENTION!—If you want fine sport and plenty of feathered game, go to northern Iowa. The shooting is excellent and you cannot fail to enjoy the trip. Or if you desire to go a little further, the prairie and lake region of Minnesota is equally good for both fish and game, and the distance not much greater. Both are reached by the Chicago, St. Paul & Kansas City Railway, the leading line for sportsmen and tourists between Chicago and the Northwest, as well as the West and Southwest, and a favorite route with all who have traveled over it. Tourist tickets now on sale. For any further information call on or address F. H. LORD, General Passenger and Ticket Agent, Phenix Building, Chicago, Ill.—*Adv.*

ILLINOIS RIVER WORK.

Editor Forest and Stream:

Considerable work has been done here in the interests of fishing, which now is becoming the only sport to be had. In former years the sloughs and bayous along the Illinois River, and they are very numerous, were, together with the river, the homes and nesting places for thousands of ducks, geese and other water fowl, and the sportsmen found but little enjoyment in spending a whole day in hunting, owing to the large number of birds they could kill and find no market for. Now this is all changed, and game of all kinds is very scarce, and especially the ducks and geese, and it is seldom that more than a few dozen of these birds can be brought down during the open season by the large number of hunters who go in search of them. As the country becomes more densely populated the less the amount of game of this kind—and in fact all kinds—there is, and the more people there are who hunt them. This is true in any country. Take for instance the Beaver Lake section in Indiana, through which the Kankakee River runs for many miles. Ten or twelve years ago wild game of all kinds could be killed by the thousands each fall and spring, but now a few hundred at such times are the result of weeks' hard hunting.

Now the sport which is more than ever thought of is that of fishing, and from the recent work done along this river to bring illegal netters to justice, or to repent their acts of indiscretion in breaking the law, there is a considerable amount of fishing done and the sport is daily becoming greater. The people have awakened to the fact that some means must be adopted to check the wholesale slaughter of fish, which has been going on for the past few years.

No one seemed willing to place themselves in the lead to form an association, and to accept the responsibility of incurring the displeasure of the fishermen, more especially the netters, who will stop at nothing when one meddles with them in fishing.

Mr. O. M. Harlan, one of those gentlemen who are always ready for the furtherance of anything that is for the best interests of the public, took the matter into his own hands and secured the names of thirty gentlemen of good standing and irreproachable character, in fact the foremost citizens of La Salle, Peru, Utica and Princeton, to become members of an association.

A meeting was called in this city Wednesday evening, Aug. 12, to form the Illinois Valley Game and Fish Protective Association. The following gentlemen were chosen as directors: Messrs. J. V. Coughlin, N. W. Duncan, T. Donoghue, N. S. Ridgen, W. E. Birkenbeuel, Bedford Fisher, H. L. Watlington, O. M. Harlan, H. Linnig, Sr., J. D. Cahill, J. W. Henshaw, W. G. Reeve and Geo. S. Skinner. A committee, consisting of Messrs. H. L. Corwin, O. M. Harlan and M. D. Green, was appointed to secure the appointment of a deputy State game warden in this city. The needs of a deputy is greatly felt here, as the game is quite scarce and is being indiscriminately killed a month or two before the season. This game is smuggled into the Chicago and St. Louis markets, and there disposed of at a handsome profit. But the formation of this association will, in a great measure, stop much open killing of birds out of season.

There is little doubt that a strong association will be the result, and that the territory covered will reach from Morris to the Copperas Creek dam, a distance by the river of about 200 miles. Seining and netting have been allowed above this Copperas Creek dam with meshes of 2in. square; but the fishermen persist in using smaller meshes, and it is the intention of this association now to stop all fishing with nets or seines above that dam, regardless of the mesh. The parties who own the land adjoining the river are becoming disgusted with the fishermen, who tie their boats to the shore and claim their rights to be the same as the property owners. They are a floating population, owning nothing except probably a cabin boat and nets; therefore, they cannot be termed citizens in the true meaning of the word.

Another raid has been made on the illegal fishermen, this time at De Pue. The Henry George party of two were caught seining with a 14in. mesh on Sunday, Aug. 9. They were brought to Spring Valley, where they were given a hearing on Aug. 12, before Esquire Larmouth, who, not according to the evidence presented, but to the influence of the roughs and toughs who formed the crowd that represented the fishermen and others who swarmed into the court room, and to whom justice should be dealt out, gave his decision in favor of the defendants. Some of the justice's rulings were good, but he seemed to ignore the prosecuting evidence, and gave way to the thought of a reappointment to some petty office at a near future. This is the first snag I have met with, and the proof, clear to any man of justice, was for the State. Upon the conclusion of the trial the State took an appeal, and the men will be given another hearing in the circuit court at Princeton soon.

The association work now being done is that of securing membership, and Messrs. Reeve, Linnig, Duncan and Harlan, of the association, are a committee to accomplish it. The following officers were elected: President, W. G. Reeve, Peru; Vice-President, W. E. Birkenbeuel, La Salle; Secretary, H. L. Watlington, La Salle; Treasurer, H. Ream, Peru. The annual meeting will be held on the fourth Monday in August of each year.

The association will be governed by by-laws similar to those of the Fox and Kankakee River associations. It will work on the same lines and to the same ends. A membership certificate for one year will be issued upon payment of \$3. The membership is as yet small, but the secretary and myself are in receipt of letters from many of the gun and rod clubs along the river and from private individuals in the cities of adjoining counties who wish to have their names placed on the list. The committee are doing well, and in a short time the list will contain over a hundred names.

Information reaches me to the effect that several of the larger fishermen at De Pue are selling out their effects and will soon go out of the business. Several of these parties have recently been to see me in regard to the proposed stopping of netting and seining above the Copperas Creek Dam. I have informed them that such is the intention of the new association, and that it was my intention to carry out the wishes of that body. The fishermen are considerably worked up over the turn of affairs, and say if the law is to the effect that no seining or netting is allowed above that point they must either quit altogether or go below the dam. Such is just what is wanted. These fishermen are of no use to any com-

munity, and the sooner the river is rid of them the sooner their illegal acts will be over and good fishing with rod and line the result.

One of the letters received reads: "I want to thank you for your promptness in enforcing the fish laws of our State. The lawlessness in that direction has been a surprise to me for years. I have talked to the citizens of Henry about it often, but they seemed afraid to do anything for fear of depredations by these lawless fishermen. They had threatened to shoot the former warden, who lived at Lacon, if he came up, and he never came. Now, since you have prosecuted them they seem to respect you. I am very glad you intend stopping all seining and netting above Copperas Creek. There is a great deal of work to be done in the way of prosecutions for violations of the game laws. Chickens are now being shot in many places, hunters claiming that the season commences Aug. 15—some jack-leg lawyer has told them so—when the law explicitly says Sept. 15. I understand the better class of citizens of La Salle are arranging an organization to enforce the law. I do hope they will extent their territory over this way. I am with them."

This is the spirit in which all write, and shows that the better class of citizens, even in the towns remote from the rivers, are taking a deep interest in the enforcement of the so long neglected fish and game laws.

One of the main purposes of the association is to protect song birds. The source of trouble lies in the small boys, who, armed with rifles, invade fields and woods, killing the birds and endangering the lives of man and beast. One of the most prosperous farmers of this vicinity recently called upon me to ascertain what could be done to keep these youthful sportsmen (?) from his premises. They have already shot two of his cows, so badly wounding them as to render them unfit for use, and the owner was obliged to kill them to put them out of their misery and end their suffering. Thinking his last resource was to prohibit trespassing by posting notices to that effect, he did so, with the usual result. The true hunter is compelled to suffer the consequences for the indiscretion of the boys by being kept out, while they are in no way at fault for the shooting of animals.

Report having reached the ears of Fish Warden Schaulin, of Morris, Ill., that certain parties were illegally hunting near Mazon, that gentleman started for that place on Thursday, Aug. 27, and succeeded in arresting Frank Hewitt, of Mazon, who has been entertaining a hunting party of four persons from Chicago. They had been out all day and succeeded in bagging one lone prairie chicken, when Warden Schaulin pounced upon them. Hewitt was brought before Justice Dewey, of Morris, and pleaded guilty, whereupon he was fined \$5 and costs, amounting in all to \$7.60. This was rather an expensive chicken, but not quite so expensive as the duck that was shot a few days before near Morris, when the same gentleman had the offender arrested and fined \$15.50. A few like arrests will have a tendency toward stopping illegal shooting in that vicinity.

Hewitt was at one time a member of the Momence Gun and Rod Club, and is now a member of the Shabbona Gun and Rod Club, of Seneca, Ill.

M. D. GREEN, Fish Warden.

LA SALLE, ILL., Aug. 31.

CHICAGO AND THE WEST.

CHICAGO, Sept. 9.—State Warden Buck has made his trip through the Fox Lake country, warning the natives against ice fishing next winter and posting all the prominent localities about the lakes. He reports small opposition, except from the man Geo. E. Clark, who was visited last winter by the little party of four who started the protest which ended in the law being passed prohibiting this ice fishing. Clark says he will fish "all he d—n pleases." I sincerely hope he will. A good example is needed, and he is just the man who ought to furnish it. Let him fish. We will have him fined as surely as he cuts a hole in the ice. The ice law is a beauty. You can enforce it.

At La Salle, on the Illinois River, a most active and flattering interest is manifesting itself in protective matters. We had the Fox River Association, and then the Kankakee, and now, thanks be to the spirit of the times, we have another, whose field is still larger, and though more difficult, all the better for a few decisive battles. All three of these associations can work together, as well as independently, and will be of the utmost service to each other. Mr. Watlington, secretary, writes to Mr. Mussey, secretary of the Kankakee Association, under date of Aug. 26, as follows:

"It is with much pleasure I inform you that our organization, the Illinois Valley Fish and Game Protective Association, was fully organized on last Monday evening. We intend and trust that we shall form a link in the organizations formed for the preservation of game and fish, prosecution of offenders and amendment of the laws so as to enable fish and game wardens to enforce the laws without doubt of danger or suit for damages. We expect to have that section of the law enforced relative to illegal seining or netting above corporate and private dams. This would entirely shut out seining or netting above Copperas Creek Dam and in this vicinity. On behalf of our association, I ask the cooperation of your association as well as of those kindred in the State.—H. L. WATLINGTON."

That "corporate dam" clause in the law is the one on which the market seiners hang their hopes. The law intended to cut off all seining above Copperas Creek Dam on the Illinois River, and in all the bayous and streams above that dam, thus giving the market fishers a right to all of the Illinois River below the dam, certainly all they ought to claim. They take advantage of the looseness of Section 6 of the law, which permits seining with 2-inch mesh "in navigable rivers wholly in the State," and "not above or beyond any private or corporate dams on said rivers and streams, and also in the navigable bays or lakes connected with such navigable streams, wholly within the State and not extending beyond the overflowed bottoms of such rivers and streams." Such language conceals thought, and is a specimen of legislative English. The construction all hangs on that word "also." The fishermen try to force the construction that, while they cannot seine the Illinois River above a dam, they can seine all the bayous above and below the dam. This is an absurd construction. It permits them to cut off in the bayous the whole run of the spawning fish. The law never intended that, no matter how puny or asinine the man who framed the seining compromise for it.

It will be remembered that M. D. Green, the La Salle warden, raided the Woods boys' outfit on Lake Seneca.

wine for using illegal seines. These notorious market men went to their attorney, a Mr. Porter, of Henry, for an opinion. He advised them they could seine all they liked with a 2in. mesh in Lake Senachwine, one of the most noted Illinois Valley bottom lakes. Porter so advised Mr. Watlington, of the Illinois Valley Association, and the latter referred the matter to State Commissioner, who in turn has sent a statement of the case in to Attorney-General Hunt for an opinion. Soon we shall have this opinion, and soon probably, too, a case carried to the Supreme Court for a decision. Then we shall see whether common sense ever does enter at all, a little bit, in the smallest way, into matters of the law.

Now, we will drop down this Illinois River a little bit further. Supposing the Fox and Kankakee rivers pretty well able to take care of themselves now, the Illinois River is next in line and more important because it feeds both these streams. Away below La Salle and below Senachwine is Beardstown, a hotbed of market fishers. Some time ago I duly reported the organization there of the protective society, with Mr. A. A. Greene as president. A great deal of good has been done there, so much so that the market men have organized a counter-association, which they call the "Illinois River Fishermen's Protective Association." This body was organized simply to fight the sportsmen. In order to enlist popular sympathy this sweet-scented outfit lately gave a free "fish fry" at Beardstown, in which about 1,500lbs. of fish were used. The head of this gang is a fellow by name of Smith. A letter to Mr. Cole from Mr. A. A. Greene may throw some light on this:

BEARDSTOWN, Ill., Sept. 3.—Yours duly at hand. Many thanks for your kind cooperation. I have not as yet been summoned as a witness, but Sheriff Beattie has the papers, and I understand Smith has brought suit against Mr. Bartlett in Schuyler county, and myself and the two other men employed are summoned as his witnesses. Case to be called, I think, first Monday in October, at Rushville. Just what Smith expects to prove by us is a puzzle, but we have or will demand witness fees before moving a step, as it is out of the county. I mailed you a Beardstown paper with notice of a fish fry here last week. It was engineered by the Illinois River Fishermen's Protective Association, organized to fight us, and is composed of market fishermen, and Smith is the grand mogul of it, although other members of this association tell me they are not backing Smith in his suit against Mr. Bartlett. Be that as it may, this fish fry was given in our city park, and for the purpose of getting the sympathy of the people, being free of charge. Everything is quiet so far here, and about six to twelve barrels of fish being shipped every night to St. Louis and Chicago, mostly buffalo, but a mixture of all kinds. I wish we could wipe out the law entirely, allowing seining or catching of fish in any way except with hook and line for all time, or at least five years. I am afraid that is the only thing that will help us. As long as there is a market the slaughter will continue night and day until all are gone. I hope the sportsmen all over the State will wake up soon and make a move. An association for protecting fish and game has been organized at Astoria. I sent them our by-laws and other information. I would like to assist others to organize. Will keep you posted soon again of any news. Fraternally yours, A. A. GREENE. E. HOUGH.

ANGLING NOTES.

THE trout fishing in New York State is now at an end. It has been a very good season, and never before have so many large trout been taken. While there is yet much to be done in the way of educating people not to waste the supply of fish, there is a noticeable improvement in the general feeling on that subject, and big scores of small fish do not bring out a round of applause, but rather an expression of contempt and a request from the listener to know what was done with them and perhaps even a little wholesome advice. To the eager beginner, of course, a trout is a trout, even if only a few inches long, but after he has had a good lively tussle with a "big one" he will come to appreciate the fact that there is more fun in killing two or three 12 or 15in. trout than a hundred poor little fingerlings.

Mr. Wm. H. Beemer, of Monticello, N. Y., has just returned from an extended angling trip in Nova Scotia. Though an old fisherman, he says he never dreamed of such trout fishing in his life as he enjoyed on this trip. He was fortunate enough to get hold of an excellent Indian guide, who piloted him to an out of the way salmon river, where he killed eight salmon. The only trouble with the trout fishing was that he had to return the fish to the water, as it was impossible to make any use of so many, the sea trout were also running, and fish of 2 and 3lbs. weight were very plentiful. The new line of steamers from Boston to Yarmouth, and the Red Cross steamers from New York to Halifax make it very easy now for sportsmen to reach excellent sporting grounds for trout, wildfowl, woodcock, and moose and caribou. For particulars apply to Mr. M. Stanley Tweedie, No. 18 Broadway, N. Y.

Ms. F. P. Nye writes from Arcata, California, that Capt. Brier, in charge of the U. S. Fish Hatchery, at Fort Gaston, is hatching out an abundance of salmon fry with which to stock the Klamath and Trinity Rivers next spring. He intends to send some spawn East this year to exchange for some Eastern brook trout. He states that the anglers in his section of the country are very anxious to introduce them into their waters, and look eagerly forward to the time when they can have fly fishing for the genuine speckled trout.

The striped-bass fishing is improving daily, and weakfish and bluefish are very plenty. Small weakfish fairly swarm in Barnegat Bay, and the big channel fish are fairly plenty. The fishing at the mouth of Shrewsbury is particularly good at present. SCARLET-IBIS.

SARANAC LAKE TROUT.—Tuesday, Sept. 1, was a red-letter day for Dr. J. R. Romeyn, of Keeseville, and his skilled oarsman, Mr. Fred Sheldon. Seven miles down stream from the lake, Cold Brook enters Saranac River, at a bit of rough water. Reaching that point in a rain-storm, the doctor, with a 6oz. fly-rod, cast across the rapids, and was soon engaged in a half-hour's struggle with a trout which weighed, when brought to the basket, very nearly 3lbs. Five others followed almost as large as the first. Two very large ones broke away, one taking fly and snell—then came three others weighing nearly 1lb. each, being the first trout that have been captured by guests of Saranac Lake House since July.

GALLATIN RIVER GRAYLING.

Editor Forest and Stream:

I inclose you the dorsal fin of a grayling caught in the Gallatin River, near Central Park. The fish from which it was taken was about 13in. in length. Your recent contributor "H. L." states that I seem to doubt there being grayling in the Rocky Mountains. How he came to such a conclusion after I had stated that I have caught them in the Gallatin River, I cannot imagine. He certainly knew the Gallatin is in the Rocky Mountains.

It has been my pleasure to catch grayling in the Madison, from the Park down to the cañon, and all of them in shape of body resembled the whitelish very much. Many people mistake grayling for whitefish, but I never knew of one being mistaken for a trout. LIVINGSTON.

LIVINGSTON, Mont., Aug. 25.

Editor Forest and Stream:

In the last issue of your paper you state that "grayling are said to occur in the Gallatin River." In the autumn of 1889 I had some splendid sport with grayling while camped on the Gallatin near Hellroaring Creek—pretty name that. Out of one large pool I took grayling, black-spotted trout and whitefish in about equal numbers. The grayling did not come at the fly quite as sharp as the trout, but required careful handling when hooked and afforded fully as good sport. If I remember correctly I thought their flavor when cooked a trifle more delicate than that of the trout. H. N. MUNN.

New York City, Aug. 29.

[The statement about the Gallatin was made on the authority of Dr. Jordan, who recently visited the Yellowstone National Park in the interest of the U. S. Fish Commission, and has published a valuable illustrated report on the fishes in the Bulletin of the Commission. The whitefish is so often called grayling in the region that we thought it might be the fish in this case; but we are glad to have reliable information to the contrary. The dorsal fin and tail of a Gallatin River grayling, sent with the above communication from "Livingston," remove all suspicion of a possible confusion of names. It is a cause of rejoicing for anglers to learn that the beautiful grayling, which has been almost exterminated by milling operations in Michigan, still thrives and multiplies in its Rocky Mountain retreats, and is also being protected and distributed by the Government.]

FISHING IN THE ST. LAWRENCE.

THE ECHO LODGE ISLANDS—FINE SPORT IN THE LAST LAKE.

THE fishing in the St. Lawrence River this summer has, on the average, been about as usual. Those who could content themselves with a good catch of rock bass and perchance an occasional pickerel, have found enjoyment enough among the islands within a couple of miles of Alexandria Bay. Three or four hours at Goose Bay, Chippewa Bay, Stave Island or the group of islands near Echo Lodge in the upper part of the Canada Narrows, generally resulted in a good catch of pickerel, the success depending almost entirely upon the skill of the oarsman.

Last Tuesday noon, Sept. 1, myself and H. W. Power, of Cleveland, O., set out for Echo Lodge, rowed by Newell Paige, a young oarsman who possesses an intuitive knowledge of the whereabouts and the habits of the fish. In two hours' fishing that night and two hours the next morning before breakfast we landed ten pickerel weighing from 3 to 6lbs. each. Most of them were caught in two small bays located in the center of four islands. From the woody shores the grass ran down and mingled with the tangled weeds. These grew out into the water, receding from the surface as it deepened, changing from the bright green hue above to a dark velvet, and falling in gradual terraces with a beauty of symmetry and grace that man might try in vain to imitate. These weed banks sloped down in that manner from the four islands some twenty feet, leaving in the middle a clear space for our lines. Here Paige rowed us around and around, our spoons just clearing the weeds and in convenient distance from a fish that might be ready for his morning meal. After a catch of ten pickerel in the evening and morning we went into new grounds out about La Rue's and Ash Island and the Fiddler's Elbow, having but two strikes during the remainder of the day.

That evening on returning to Echo Lodge the proprietor, Mr. Potter, informed us that we must be ready for a jaunt across the country to Lost Lake by 4 o'clock the next morning. At that hour we had breakfasted, our skiff was hoisted into a wagon, and seated in our boat chairs the horses pulled us over 12 miles of rough road to the lake. Here we fished until dark, only pausing in the fine sport to dine upon a rugged island in the shade of tall pines and hemlocks. The fish were plenty. Paige used all his skill to keep us near and not on the weed beds. We saw no one else fishing, and were informed by neighboring farmers that there were hardly two boats in the lake in a year. We landed 32 good pickerel inside of six hours. Some of them weighed 8lbs., most of them 4 and 5. They are much gamier than the pickerel of the St. Lawrence, why I know not, unless that they are in colder water, are never disturbed by the sound of a steam yacht and are less removed from the savagery of nature. Every one fought for his liberty long and hard, first diving into the weeds, whirling and wrapping the line around the head and fins, and often coming to the surface enveloped in heavy layers of sub-marine vegetation. They were all brought in with the landing net. Some, when drawn near the surface of the water, darted like an arrow 3 or 4ft. into the air. Of course some of these lively fish got away. Two strikes at a time were common, and one of the struggling captives often succeeded in breaking from the hook; one regained his birthright by a savage break after he was in the boat. We fished entirely with spoons; having the most success with a large copper spoon.

Lost Lake is situated about 12 miles northwest of Echo Lodge and 7 miles from the town of Landsdown, which is easily reached by the Grand Trunk Railroad. It is a highly picturesque place. The banks are rocky and precipitous, covered with pine, hemlock and birch. The water winds about into numerous bays and coves, only a few of which we had time to explore. With the exception of two or three cattle paths down to the water, we saw no traces of the presence of the innovating hand of man. Flocks of ducks now and then flew over our heads,

and squirrels, porcupines and snipe were seen in the woods. But the chief feature of the lake was, of course, the fish. I have told only a little about that, and I hold my reputation in too high regard to hazard it by even telling the whole truth of what we saw and did during nine hours in the Lost Lake. J. C. C.

SHADY COVERT, Sept. 6.

SOUTH JERSEY SEA FISHING.

Editor Forest and Stream:

There has been a surprising scarcity of weakfish or sea trout this season at Cape May. The catch entire would not average a dozen a day. It is barely possible that they may come in abundantly during this month, as two or three heavy catches have been made near the Cape May Lighthouse. Those that are caught run large. The red drum have arrived on their summer outing and came to the Cape in the middle of August. A dozen have been caught from the Iron Pier, where the ladies as well as the men fish all day and till "night sinks upon the dusky beach and on the purple sea." The water is 30ft. below the fishing point and it is fun alive to see a woman hook a 30lb. drum. She is generally more frightened than the big fish, which is sure to get away unless some gallant gentleman climbs down the ladder to the sea, gaffs the fish and bears in triumph the captive up-stairs to the delighted captor.

The fishing at Anglesea, that paradise of fishermen, has been simply extraordinary. Weakfish are scarce, flounders are not often found, but the supply of bass is simply inexhaustible.

Mr. R. Shimp, the railroad agent, gives me the following figures, which he vouches for, as the number of pounds of fish, chiefly sea bass, sent away during the last three months. Here are his figures, dated Sept. 2, 1891: Month of June, 487,000lbs.; July, 263,340lbs.; Aug., 281,380; total, 1,031,720lbs.

Fifty vessels can be seen at the Banks any fine morning when the wind don't blow, and till the cold of November the sea bass will still furnish fun for the market-fisher and for the amateur who does not specially desire to bag a game fish.

But anybody who desires heroic fishing can make his soul serene with ample fun after the red drum. The best man to get, if you can, is Kit Ludlam, whose praises I have herein sung before, and as brave a man as ever stood upon a quarter-deck. He will take you out in the Government boat, and if the sea is smooth as glass and the wind is south or west then look out for sport. Not yet have I wet a line in the September seas. But the drum are there and I hope to tell you next week that Captain Ludlam and J. M. S. have had one rare day's sport, for I think there is not any game fish (not even the lordly salmon in the Marguerite) which afford more fight and more delicate sport than the gamy channel bass, or red drum.

There are plenty of bullheads and calico-backs on the grassy flats and many are killed on Five-mile and Seven-mile Beach. J. M. S.

CAPE MAY, N. J.

FISHING ON THE BROAD RIPPLE.

INDIANAPOLIS, Ind., Aug. 26.—The palmy days of Broad Ripple as a fishing ground for the few sportsmen who existed in the past have now fled, and the patient angler, be he a fly-fisherman or a live-bait man, is seldom rewarded with a rise or a catch. I have known as many as twenty bass of 2lbs. weight—fine looking fellows they were—which were caught at that once favorite spot in less than one hour's time; but that was in "the long ago." The magnificent and rich scenery adjacent to the Ripple is not sufficiently appreciated, and by the frequent and delighted visitor never described. It is frequented by many from this city daily, and by many who cannot tell the difference between a miserable shiner or a "stone roller." The fly-fishermen and those who use the minnow are both frequent visitors at this far-famed spot. The former will be very active by moving about from place to place with his seat, for want of a more convenient spot, all festooned with flies of different colors and styles, casting every moment and looking anxiously for a rise. His efforts are not rewarded, and the piscator near him will be quietly watching his minnow the while, and taking his fish every now and then. His success is not doubted. I laughed once immoderately at a fly-fisherman who was whipping the stream, his creel upon his back, heavy rubber boots on, up to his hips in water, with an umbrella over his head, protecting him or his face from the sun, which was unmercifully hot. If you tire of fishing at the dam you can follow the river down to the road bridge, where you will find most excellent sport, and in addition a gurgling spring of the coolest and purest water that ever blessed the earth. Immediately below the bridge you begin to find a broad expanse of water, containing a great variety of fine fish, and among them some very large catfish. One was caught at this place recently that weighed over 50lbs. Directly you perceive the Monon Bridge, which spans the river near here, and just above a small stream called Williams's Creek, here the fishing is also good. The citizens of Broad Ripple have projected an electric line of road leading to the city, but this is yet to be built. My friend W. and I frequently take a boat and row up the river, our intent being chiefly to catch "blue gills," or striped perch. We catch goodly strings of the same, and the appetite is appeased quite as fully as though we had partaken freely of bass. Bass are often taken in these waters, but trot-lines, dynamite and seining have nearly destroyed this game fish. The scenery is grand and beautiful to behold. Great trees overhang the water, and are draped with the wild grape and other vines. The dogwood and black thorn exist unmolested, forming often an impenetrable shade and protection to the weary angler. The wild rose peeps out of the heavy undergrowth and shady nooks, and later in the season the golden rod blooms in all its beauty, forming a scene that is rarely beheld. B. F. R.

BURLINGTON ROUTE.—But one night Chicago to Denver. "The Burlington's Number One" daily vestibule express leaves Chicago at 1 P. M. and arrives at Denver at 6:15 P. M. the next day. Quicker time than by any other route. Direct connection with this train from Peoria. Additional express trains, making as quick time as those of any other road, from Chicago, St. Louis and Peoria to St. Paul, Minneapolis, Council Bluffs, Omaha, Cheyenne, Denver, Atchison, Kansas City, Houston and all points West, Northwest and Southwest.—Adm.

OUR TRIP TO THE LITTLE JO MARY.

"BROWNVILLE! Brownville!" The train came to a standstill before the little railroad station Down East, in the State of Maine—the El Dorado of Eastern sportsmen. All was hurry and bustle, as passengers with bundles alighted from and entered the train, the hearty and cordial greeting of reunited friends on the one hand making strange contrast with the tearful, tender good-byes and sad farewells on the other. So it ever is, extremes meet, but the pilgrims from the old Bay State have no time to indulge sentiment as the morning is well advanced and they are many miles from their destination.

L. M. Gerrish, our head guide and *chef*, is on hand to receive us; and quickly changing our habiliments of civilization for those of the woods at the little country hotel, where all superfluities are left until our return, our party, consisting of Harry S. Seely, wife and little boy; Nat, the writer and his wife and three guides, together with generous supplies for the inner man and necessary camp duffle, are on their way with two teams to Schoodic Lake, some six miles distant.

There we board a rowboat and a canoe. Z. B. Knight, the stalwart veteran boatman, whose residence is near the lake shore, had been engaged to row the party to the upper end of the lake, and right well did he perform the task, rowing the eight miles in something less than two hours. When we pushed off from the shore we left civilization behind, but what a panorama opens out before us on every hand! Bold headlands jutting out into the lake covered with rainbow-tinted foliage, white birches like belated ghosts in broad contrast with the sombre pines, whose extended branches seemed like outstretched arms as if to give us welcome; hilltop and mountain vying with hilltop and mountain until in the dim distance their outlines look like steel engravings, suggesting such

"A pomp of scene,
The noblest sure that nature in her play
Of power e'er shaped."

An element of danger is the enormous rocky cliffs and boulders whose dangerous heads lie concealed beneath the surface of the water. We came very near to paying sad tribute to their presence by the bow of our heavily laden boat running upon one, which, but for the presence of mind and skill of our boatman, might have resulted in serious consequences. "Keep still! don't move an inch!" were his words of caution as he put forth his best effort to keep the boat from drifting around with the wind and capsizing. But the stiff breeze and heavy freight were too much for his strength; and the writer who was sitting in the bow cautiously stepped out upon the boulder, and lift and push, the craft was afloat again. A sharp look-out thereafter prevented a repetition of the thrilling experience. Landing was made soon after midday, a hearty lunch partaken of, and the procession moved onward on its march of a dozen miles along an old tote road, through an unbroken wilderness—a journey we were informed that no lady had ever undertaken before.

A staunch team had been provided over which Steve Thomas, a backwoods character if not a genius, held the reins. Words would make but a poor showing, were they used as they best might be, in an attempt to give an adequate description of the voyage, for certainly the vehicle in its ups and downs over stump and boulder, over hillock and slough and rickety corduroy, more nearly resembled a craft on a turbulent and tempest-tossed ocean than any organization on wheels on *terra firma*. But our jehu was a character; and in addition to his exceeding care in the management of his team, his keen wit, droll humor and skillful repartee kept the ladies in a roar of laughter, which, combined with the novelty of the experience, rendered this not among the least enjoyable features of the trip. On going through an unusually bad piece of road, if there was any that would justify such characterization, one of the horses cast a shoe, which was lost in the mire; but the backwoodsman let no such small things disturb his equanimity. The horse liberated from his fellow, the utility box is brought out, and before the lapse of many minutes another shoe has replaced the lost one.

The afternoon rapidly wears away, and the lengthened shadows warn us that we cannot reach our destination that night, and hurry along as best we may in the gloaming we do not reach "Ebene Lodge," a log camp by the wayside, until

"Night had let its curtain down
And pinned it with a star."

Here we camped for the night, and after the fatigue of the day we have no inclination to prolong the evening hour, but are soon lost in refreshing sleep. We had not the forethought to propitiate the weather clerk before retiring, and so awoke in the morning only to find ourselves in a dreary, dismal downpour of rain, that promised a bar to further progress that day. Our party was made up of those with whom, when on an outing in the woods, "everything goes;" and hence no grumbling or fault-finding was openly indulged in, whatever might have been the inner sentiments.

Toward midday the rain ceased falling, and loading the ladies and dunnage upon a jumper, as a wagon could go no further, we take our leave of the friendly roof that had furnished us such welcome shelter. The skill and care of the reinsman at all times, and the strength of two guides were many times, called in requisition to keep the craft from capsizing, as it rolled, pitched and tumbled about over knoll and crag; but everything went well until one runner became so firmly wedged in between three boulders that snap went the great cable to which the team was attached, and yet not a part of the jumper broke or gave way, so well was it constructed of green hornbeam, and there was not an iron bolt or brace in the structure. Hastily cutting a sapling for a lever and prying up the runner, the draw chain meanwhile being toggled, we are again on our way with but a few minutes delay. We reach camp in the early evening and find everything neat and tidy, dispose of a generous supper and are soon lost in pleasant dreams on our beds of fragrant spruce and hemlock, while a roaring camp-fire blazes high without.

The fatigues of the previous days contributed to a lengthy morning nap, and we were aroused from our slumbers by the presence of strangers in camp. Turning out and making a hasty toilet, we find the genial Dr. George F. Emerson, of Boston, and guide, in waiting to tender the compliments of their camp on the Middle Jo Mary, some six miles distant, where some half dozen professional and business men for many years have fol-

lowed Thoreau's example and made their camp on its romantic shores. With kindly forethought, knowing that we would be fatigued after the journey, they brought with them numbers of beautiful trout, that our feasting and enjoyment of life in the woods might begin with the first morning. Courtesies that were highly enjoyed by us were frequently exchanged between the camps, and the writer indulges the hope that he may again grasp the friendly hands and share the boundless hospitality of the jolly campers on the Little Jo Mary.

Going down to the water's edge, we find an oblong lake some four by five miles in extent, surrounded by dense forest growth, with tier upon tier of mountains in the distance, now looming up in the morning sunshine from the summit of Kathadin in the background some twenty miles away. As we look out upon the scene we realize that—

"High mountains are a feeling, but the hum
Of human cities torture."

What a quiet, restful scene! How we expand our lungs and drink in the health-giving ozone! There in the cove yonder are a mother doe and her full-grown young sporting himself in the water, here within a few rods saunter about a black duck and her brood of ducklings as proud and unconcerned as if no enemy were near, there a break in the water as some monster trout completes his morning meal.

Our reverie is disturbed by the advent of a canoe and a cheery voice sings out: "Get aboard, and let us at them." We are soon enjoying the pleasures of the sport, and provide an ample supply for the larder, returning to the water all that could not be used, as it is our rule never to waste.

The declining sun found us at the water's edge in wonderment at the play of colors in cloud and on mountain top. Streamers of green and gold shot up to the zenith until it seemed as if the dome of heaven was decorated by angel hands, and the mountain tops were clothed in a living, brilliant purple that shaded into darkness with the setting sun. The day ended, we gather around the campfire, with trees hoary with age for companions all around us.

"Tis eve, 'tis night; a holy quiet broods
O'er the mute world; winds, waters are at peace;
The beasts lie couched amid unstirring woods,
The fishes slumber in the sounds and seas,
No twit'ring bird sings farewell from the trees."

The evening wind sings a crescendo through the surrounding forest, and swings its censer of incense breathing balsam and pine; and we drop off in blissful, restful slumber until again

"The vapors round the mountains curled
Melt into morn and light awakes the world."

And so go days and weeks; and who shall say that we did not regret when the hour of parting came? But stern duty calls, and as if from a gentle reverie aroused we return to the treadmill of every day life, looking forward in fond anticipation to the time when we will again make our camp on the Little Jo Mary. GEO. McALEER.
WORCESTER, MASS.

BLACK BASS IN WHITE OAK.

WHITE OAK CREEK is a beautiful stream of water, clear and cold. It is fed by many fine springs; it is very rocky, and in places narrow and swift, thus opening out into deep, dark pools, the ideal hiding for the wary bass. White Oak rises in Dickson county, Tenn., runs through Houston county and flows into the Tennessee River.

It has long been noted for its fine game fish. I don't believe we have a better fishing stream in this State; fish ranging from 1 to 7½ lbs. are caught, and they are good fighters, too. White Oak is reached by the L. & N. R. R., Memphis Division. Stewart Station is the place to get off, then overland four or five miles puts you at White Oak. Teams at Stewart's can be had at reasonable rates.

White Oak, like a great many of our fine streams, will in a short time be depleted, if it is not protected. Only a few days ago I heard that some parties had been killing great quantities of fish, of all kinds and sizes, by liming the deep holes; they would throw a quantity of unslacked lime in the water, and it would soon kill every fish in the hole. They secured all they wanted, and hundreds of dead fish floated down the stream, causing a sickening, disgusting sight. I think the parties are known, and will be made an example of. I thought I had heard of all the illegal ways of killing fish, but the lime was a new one to us. Taking fish with hook and line is the only legal way in this State. What we need is the enforcement of the law.

With seines, nets, traps, gigs, poison and dynamite, in the hands of men who respect neither the laws of God nor man, it is a wonder that our streams have any fish at all. Give the fish a chance, and there will be plenty of sport for all sportsmen. B.

A MORNING ON THE CASCAPEDIA.

I MUST tell you about my luck this year on the Cascapedia. The same as the rest of the anglers, I found the salmon fishing very poor; only killed two fish in the 10 days fishing. But I celebrated the Fourth of July morning in great shape. Had my wife in the boat with me and she was as much excited as I was. I found a spot where I had taken a great many large trout, several weighing from 2 to 3 lbs., and had a rise, the fish not showing himself, and could not make out what I was fast to. After a long struggle I succeeded in landing two trout, one weighing 3½ and the other 4 lbs.—7½ lbs. at one cast. I never heard of this being equalled; that is, two fish as large as these at the same time. Went back and in a little while had a grand fellow; came clear out of water for the fly and after a fight of nearly half an hour I landed him, a trout that weighed 5½ lbs. plump. He made the greatest fight of any fish that I ever had hold of, not excepting a salmon. I had 50 yds. of line on my reel and he took it all out twice; would come at full speed and jump out of the water higher than your head and start off again in the instant he would strike the water. My guides thought I had a grise but I knew better. My arm ached when I got through and my little rod was sorely taxed, I can assure you. I got 36 trout that morning. This was the last fish I had, for afterward it rained very hard and the water became so discolored that the remaining few days of my stay there was no fishing.

W. B. MERSHON.

CAPE COD NOTES.—Scup and sea bass made their appearance at Woods Holl in large numbers Sept. 1. A party of four caught 50 scup and 22 sea bass in about two hours, using cut menhaden for bait. On the following day three lines took 125 fish, chiefly scup, with soft clam (*Mya arenaria*). On Sept. 2 Will Goffin caught a bluefish weighing 7½ lbs., and on the third the largest of the season, a beautiful 11-pound fish, was taken on a trailing line with menhaden bait. Several smaller ones were captured in the "hole" on the 4th. The first Spanish mackerel seen here by us during the summer came in from Buzzard's Bay Sept. 3; the largest weighed about 6½ lbs.—all of the half dozen were prime and beautiful fish. A young dolphin (*Coryphæna hippurus*) strayed into one of the pools at the Fish Commission laboratory, and was captured alive after a long chase. It swam at the surface, frequently darting under the shelter of a patch of floating sea weed, and eluded all efforts until a long seine was set around it. The fish is now living in one of the aquaria and has begun to take food. This is the famous dolphin whose changes of color in dying have excited the imagination and stimulated the word painting of the poets. A blue-striped trigger fish (*Balistes vetula*), like the one described and figured in FOREST AND STREAM of Jan. 29, 1891, was received from Buzzard's Bay on Sept. 3 as a present from Capt. I. Spindel. This is extremely rare in the locality and attracted a great deal of notice. It was found to contain the remains of spider crabs.—T. H. B. (Woods Holl, Mass., Sept. 7).

A BIG BRULE BROOK TROUT.—East Saginaw, Mich., Sept. 12.—A brook trout weighing 4½ lbs. was sent to me the other day, caught by a fellow townsman, C. W. Wells, fishing on the Brulé River near Duluth.—W. B. M.

BLUEFISHING off Fire Island Inlet is now in full swing with the fall run of big fish. Some large strings have been taken. Boats go out from Babylon and Islip. There is no fishing in Great South Bay.

Fishculture.

MYSTERIOUS STOCKING.—Editor Forest and Stream: Except the big catch of suckers noted in my last, I have heard of little fishing of any kind about here. I have a pond, fed by a spring, made three years ago and never stocked with any fish so far as we knew. We were therefore much surprised when some children recently made a large catch of small perch from this pond. "Where got the apple in?" [The fish may have been placed in the pond by some one unknown to the owner, or the eggs, which are adhesive, might have been carried on the legs of wading birds. Fish are often transported long distances by wind storms and conveyed by underground water courses. Birds sometimes drop living fish into bodies of water.]

FIXTURES.

DOG SHOWS.

Sept. 11 to 18.—Toronto Industrial Exhibition Association Third International Dog Show, at Toronto. C. A. Stone, Sec'y and Supt.
Sept. 22 to 25.—Inaugural International Dog Show of the Montreal Exposition Company, at Montreal, Canada. Entries close Sept. 8. J. S. Robertson, Secretary.
Sept. 23 to 26.—Inaugural Show of the Blue Grass Kennel Club, at Lexington, Ky. Rogers Williams, Sec'y.
Sept. 25 to Oct. 1.—Third Annual Dog Show, in connection with the Central Canada Fair, at Ottawa, Ont. Alfred Geddes, Supt.
Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.
Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.
Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.
1892.
Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInness, Sec'y.
Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. F. Capers, Secretary, Greenville, S. C.
Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.
Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.
March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.
March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Little, Sec'y.
April 10 to 16.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.
April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.
Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.
Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. G. Davis, Secretary, Philadelphia, Pa.
Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.
Nov. 23.—Second Annual Trials of the National Beagle Club, at Nauvoo, Rockland county, N. Y. F. W. Chapman, Sec'y.
Nov. 30.—Central Field Trial Club's Third Annual Trials, at Livingston, N. C. C. H. Odell, Sec'y, 44 and 46 Wall street, New York city.
Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1893.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.
Jan. 18.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgair, Sec'y.
—, Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

HAMILTON DOG SHOW.

THE inaugural show of this enterprising kennel club which, during the past year, has shown itself well in the lead as far as an endeavor to promote the interests of dog breeding in Hamilton is concerned, was brought to a successful close last Friday. The entries were of excellent quality and numbered 308, which, considering puppies were barred out, brings it on the level of a 400 dog exhibition. The first thing that struck one when entering the Thistle Rink, where the show was held, was the excellent arrangement of the benching and two rings. Everything seemed to have been provided for, even to stretching wires over

each row of benching and therefrom hanging large cards with the name of the breed under it and the numbers the class included. The arrangements for the judging were first-class, tables provided, messenger boys in each ring to take the awards to the committee room as soon as made, blackboards, and what was most appreciated by the spectators, each handler was compelled to wear conspicuously a neat card giving the number of the dog he was showing, and in no instance was this allowed to relapse throughout the judging. Committee rooms were provided and an excellent room was set apart for the exhibitors, to which only admission was had by badge, with which each exhibitor was provided. A side entrance was also set apart for their benefit. In fact there seemed to be no detail that escaped the watchful eye and executive ability of the president and superintendent, Mr. A. D. Stewart. There was no running away after the first day, as is often the case, all the officials staying to the end, and ever willing and anxious to do a courteous action. Naturally exhibitors and visitors were loud in praise, for it was certainly the best managed dog show I ever saw. Spratts' newly galvanized and painted benching was used, so all was sweet and clean, and with Messrs. Ehrmann and Murphy looking after things everything went well. The only alteration I could recommend would be in having one book for each judge with his classes written in in rotation, instead of a separate book for each class. While this plan caused no delay, still the book is handier, and not so liable to be lost. The exercising arrangements outside the building were also much appreciated, and it is safe to say, should the Hamilton Kennel Club hold another show, they will get a bumping entry, and they deserve it. Judging commenced at 2 P. M. on Tuesday, and it was well into the afternoon on Wednesday before it was finished, specials and local prizes taking up a good deal of time. With these few words I may as well pass on to a review of the awards.

MASTIFFS—(H. W. LACY).

The mastiffs present, although small in numbers, showed on the average superlative quality. In the challenge class for instance, one seldom sees such a trio as Ilford Chancellor, Caution's Own Daughter and Lady Coleus, and they were placed in the order named, for in spite of C.O.D.'s superb quality and beautiful head there is hardly enough of the latter, her skull not filling out as it might do. Lady Coleus still had that unsightly sore on her back, although otherwise in excellent condition. The open class was a mixed one and quality and truer type was responsible for the award, Miss Caution getting the verdict over the good headed Mode, who here showed his forelegs just about as bad as he well could, turning them in and out to great disadvantage. Miss Caution has made excellent improvement since the spring, and is quite a good mastiff. Minting Minor, described last week at Kingston, came next to Mode again and the former in turn beats Grimsby Caution, vhc., in head, chest and loin, Ilford Bess, taking hc., loses in muzzle, bone and body, and is very light in eye. Caesar, c., has a good body to recommend him. One or two local dogs were sent out for lack of type.

ST. BERNARDS—(MISS ANNA H. WHITNEY).

We fully expected to find larger classes in this breed, but somehow St. Bernards are not making the progress they should do in Canada and the principal kennels in the States, as usual, do not patronize the fall shows. In the challenge class for both types champion Hector had a bloodless victory; he is improving in condition all the time and is still a young old dog, and Mr. Peters must be congratulated on his purchase. It is a peculiar coincidence that he should again be owned by a kennel named the Hospice. In the open division for dogs of both types Kingstoun Regent, putting on flesh rapidly, smothered his competitors in type, head, bone etc., though Othello, barring head, is a good second; a nicely-formed dog with one of the best fronts I ever saw, and though his head is well marked there is not enough of it, he was also shown too fat. The long-headed Caspar made a fair third; this dog has not improved with age, although still a good-bodied, active, well-formed dog, though his long, plain head will always be against him in close company; he was removed from the show after the first day, forfeiting prize money, etc. Don Phyllis, reserve, is straight behind, has enormous bone and is well fronted, head long and no depth about it, but nicely marked. Benmore, Jr., and Bruno II. were hc. Bruno II. is a nice big dog, wrong in color, almost a cream, no shadings and loses in depth of muzzle, poor expression. Benmore, Jr., has a front too much like a fox terrier, not foot enough, his head is small and a bit long, and coat could also be improved. In bitches the order was the same as at Kingston, Republican Belle just beating Zenith, as stated last week. Glenisla does not come up to either in head, ears or forelegs. Nun Nicer, as stated, was out of coat and was rightly placed. Mary Jones, vhc., has a small, snipy head, feet turn out a bit, her body, however, is a redeeming feature.

GREAT DANES—(W. H. LACY).

Quite a fair lot of dogs, and should have been judged by Miss Whitney, but by mistake were brought into Mr. Lacy's ring and judged before the *compte-rendu* was discovered. Miss Whitney looked them over afterward in her own ring, and without knowing how they had been placed, put them in the same order. Fawn was brought into the challenge class and awarded first, but it was afterward found she was not entitled to challenge honors and was disqualified; she should have been transferred. She has faulty quarters and does not move freely. In open class Brutus had some difficulty in scoring; he beats the second winner in head, that is, muzzle, but Minerva Fawn's well turned body and excellent legs and feet cannot be overlooked, and under Ben Lewis's skillful manipulation she was quite a gallery favorite. Pascha II., third, has a nice head, but his feet turn out and he is straight behind. Goleit, vhc., is faulty in loin, too flat, and is not up to the mark in front. Ultima Plavia, c., is faulty in front and too throaty. We are glad to see the old Wolverine Kennel and Dr. Nicolai to the front again, this gentleman having imported several from the Fatherland.

Newfoundlands had one entry, a nice-coated dog, but too light in body, long headed but heavily boned; second was all he deserved and received.

GREYHOUNDS—(H. W. LACY).

A splendid showing. Gem of the Season and Maud Torington meeting again, Gem beating in ribs, loin and quarters. Maud not looking so well as when we saw her in the summer. The open dog class was a hot one, Mr. Purbeck's new dogs making their debut, and it is little more than a toss up between Ornatus, first, and Pious Pembroke, the former just beating in head, better in stop and muzzle, neck cleaner and better placed, a little better in loin and front feet especially. Pious in turn beating Ranger, who does not show so much quality in neck, legs and feet, back and action. Prince was outclassed and could not be commended in such company. In bitches there was also something nice, Bestwood Daisy beating her kennel companion, Lily of Gainsboro, in head, ribs, loin, quarters and let down of stifles; in front they are about equal. Grimsby Jess was complimented with c; too light throughout. An excellent showing, and Mr. Purbeck has a team he can well be proud of.

FOXHOUNDS—(H. W. LACY).

Two entries and neither up to form. First was withheld, and second and third given to Stormer and Ranger, the former being better in legs, feet and head, but loses to the other in coat and body.

BEAGLES—(H. W. LACY).

Another fineshowing, Racer, Jr., upholding the breed in

the challenge class. In open dogs, Roy K., improving a bit, beats True Boy in head, shoulders and body, True Boy being cloddy and snipy-headed. Banjo, third, is too coarse and big. The others in the class were too big and coarse to receive recognition. In bitches a nice new one turned up in June, a bitch of good type, cobbily built, and with a well-shaped head; hardly straight enough in front, but a nice mover and carries her brush to perfection; Emmeline, second, losing in head, bone and depth of body, and she in turn beats Dainty, third, in head and movement, though the latter is better in front. Fanny K., reserve, stood out in front this time, and is too long cast. A class was made for harriers, but none turned up.

POINTERS—(H. W. LACY).

The challenge class was nicely filled with Pommy Sec, Fan N. and Bell Randolph, which were placed in that order as I thought Pommy beats Fan N. in loin and quarters. It is a tight squeeze, however, and their movement in the ring decided the point, as Fan hardly did herself justice. I have frequently spoken well of her. Belle is too loaded in shoulders, fat and was in whelp. She is well known. In open dogs, seeing them together in the ring, I put Ossining over Tempest, Ossining winning in shoulders, forelegs and hind, and his action in the ring was better. In bitches Lady Graphic just managed to get the verdict over Phantom, beating her in style and body, head and front equal. Although the entries were few in this breed, they were all dogs of well-known merit.

ENGLISH SETTERS—(H. W. LACY).

A splendid showing, no less than twenty-four being benched. The writer may as well say a word about these classes. While having a general idea and a knowledge of what is accepted as a proper type, or what used to be, he did not feel altogether competent to judge a hot class, knowing the keen rivalry in these breeds, and therefore endeavored to have them assigned to some one else in whom the breeders might have more confidence, but as the management wrote him that the exhibitors had expressed themselves satisfied, and this the entry bears out, the writer was persuaded to accept the thankless task, and if any mistakes were made it was not from lack of conscientious endeavor to be consistent. With this little explanation I will return to the dogs.

Cambriana, well known, was alone in challenge class. The open dog class crowded up the ring and was a particularly difficult one to judge, for while there was nothing of superlative merit there were several very good serviceable-looking dogs, and condition played a prominent part in dividing the position of several, especially the new English dogs, so that when they have gained their true form no doubt they will be placed higher. Edgemark's superior condition, head and quality soon made it apparent he should win, his strong back and loin also being noticeable over the second, Romney, a new one bred by Mr. Wells, who is a bit better in front than the winner and equally as good in head; Viscount, third, is a well-made dog, faulty in quarters, head a bit too narrow and long, good bone and front, is out of shape but will do better. Tony Gladstone, reserve, was well up, is not so good in head and was also wanting in condition. Matane, vhc., loses in head, not stop enough, and was hardly good enough in front; Benzine was also vhc. All these dogs are pretty nearly one as good as the other, but a difference must be made and one little point was apt to turn the scale. Oscar, hc., loses in shoulder and neck; Jack is too coarse, but well formed. Sir Edward, c., was described at Kingston, and Mount Royal Birch got all he deserved with one letter. The bitch class was another keen competition, the new bitch Victress Lewellin, by her better size, roomy body, heavier bone and better head, was placed over Albert's Nellie, who, though well formed, was out of coat and is too small, and might have changed places with Nia, another new one, who loses in head and showed very narrow in front in the ring, and perhaps had her owner handled her she would have been higher up, she is a fairly good bitch and nothing more and needs conditioning. Norah III. is a bit short in neck and throaty, boasts a nice head. Dinah, c., is short and thick in neck, nice head and forelegs, but hardly has liberty enough in action. There were several others given hc. who well deserved their cards.

IRISH SETTERS—(H. W. LACY).

Here the competition was by no means so keen. In dogs Seminole's superior body, legs and color placed him nicely over Glen Jarvis, who is going off his head, is of good type, however, he is too leggy and carries a bad tail. Eleo is too much on the English setter type, nice color and well formed. Other dogs in this class were sent out for coarseness, lack of type, etc. In bitches a nicely made one turned up in Goldsmith Maid, winner of third at New York, she beats Belle, second, in head, front, ribs and color. Aureole we spoke of at Kingston; she is hardly up to form, though when we saw them better than Rose Palmerston, vhc. This was a poor class.

BLACK AND TAN SETTERS—(H. W. LACY).

With Ivanhoe, Leo B., Duchess of Waverly to show up in the challenge class, competition was keen. Ivanhoe's superior head and tan getting him the verdict. Becky Sharp was absent. In open dogs first was withheld and second given to a weedy animal, light in tan, not square nor deep enough in muzzle. Victor was lucky to get c. The only one in the bitch class deserving recognition was Lady Waverly, who won, and the others were sent out. A poor showing for Canada.

SPANIELS—(J. F. KIRK).

As might be expected, spaniel men turned out in force, and the show was as good as can be brought together in the Dominion, and when we know what that means Mr. Kirk must be pleased with his reception. Some of the classes in the cocker division must have tried him pretty hard, and it is no secret judging spaniels here, there is so much keen rivalry between the different kennels, the owners of which are all personally well known to the judge. There was only one Irish water spaniel, and he not much good either, as he was only given second, first withheld, faulty in head, coat and front. "Clumber" had his kennel of that breed, but we must say he was ill-advised in showing Boss III. and Bromine in their present condition, these dogs attract so much attention from the public that they ought to be as usual in splendid shape. Mr. Mercer's illness no doubt is the cause of the slip. Lady Bromine beat Boss III. as usual, and Johnny, Jr., had the dog class to himself, and so had Lady Joan; these two were in nice shape, and they are all so well known it is needless to say more of them. Field spaniels did not fill well. In the absence of Stybrook Dolly champion Bridford Gladys had the challenge class to herself; she was in fair shape. In open dogs Samson was picked out for the winner, beating Brantford Mohawk in head; Toby, third, entered by the unknown exhibitor, is a good stamp of leggy, working spaniels. The challenge class in cocker dogs was a red hot one, and were correctly placed. Black Duke improves, though coat is wavy and he is a bit too full in eye; little fault can be found with Red Jacket, he is well known, and so is King of Onos, third, who loses in muzzle and front. Champion Rabbi had to be content with vhc., a novel experience. Old Miss Obo II., showing gray nowdays, and rough in coat, took her usual position at the head of affairs, though she was out of coat and looked tucked up in loin; Bessie W., second, is beaten in skull, muzzle and ears. Open black dogs had a good one in Black Dufferin, who won in open and novice at New York, a greatly improved dog, excellent head, front and body, he is well ahead of the well-known Obar, who was wrongly placed over Obadiab, we have described these both before. Sport, vhc., is out in front, wide in skull, but gains recognition for

his nicely made body. Brock, hc., is a bit large, weak in pasterns, and long-faced. King Raven, c., is a bit too much on the legs and of field spaniel type. In the ladies division there was no gainsaying I Say's quality, despite her lack of coat. Another nice one came second. Flirt, a new face, is only beaten in head, muzzle faulty. Third went to Jealousy, a bit large and not clean enough round the head; too much hair on skull. Topsy, reserve, is a bit blunt in muzzle and skull too round, is also a trifle out in front. Another Topsy, owned by Mr. Searies, won vhc., but is too wide in front and too high in skull. Chio II., also vhc., is not straight enough in front, faulty in muzzle and hardly ribbed up enough, otherwise all right. Lady Aberdeen, hc., is out at elbow. Cora is a bit high in skull, but her other good points entitled her to another letter. Woodland Susie, also in the same division, is faulty in quarters, muzzle and forelegs, nice body. This, as may be surmised, was an excellent class, and took some time for decision. In other than black dogs, Bambo, on the improve, won, and Brantford Red Man, a bit broad in skull and hardly true in front, scored second. Garry, c., is a bit on the leg. In bitches, Red Riding Hood, plain in muzzle and a little long cast, won with very little to spare over Gipsy Queen, which stands a little wide and is faulty in expression, otherwise a nice one. Lady of Learning, pushing up close, was third. Brantford Dolly Yarden, vhc., is a bit leggy, and muzzle could be improved. Little Red Riding Hood is a trifle bowed. Blushing Rose, bad in disposition, would perhaps have been better placed could any one get near her.

COLLIES—(H. W. LACY).

The collie classes had a fairly good entry, some good Canadian dogs being on hand. In challenge class Roslyn Dandy, in Metchley Surprise's faulty condition, won nicely, is better in front and bone; Roslyn Wilkes was reserved for specials. In the dogs, the second novice winner at New York, quite a nice one, beat Sir Walter Scott III. in head and coat; the latter is a promising youngster, though a trifle short-faced, and ears a bit big. Rowdy was a little behind in this class, though he was as good as any in head, he is not right in body. Moonstone, reserve, is too cloddy, though he had the best coat in the class, his head is coarse and he stands a little wider in front, evidently a collie gone off from his puppy form; the others call for no very particular mention, though Ballantine is a fair dog. In open bitches May Flower and Vanity, from the same kennel, won the money, the former beating Vanity in head, coat and front, and is a nice little bitch; Vanity beats Cora II. in head and body, the latter being too fat and cloddy, and coat needs straightening. Nancy, reserve, is beaten in head, front and ears. Parton Ella, vhc., is beaten in coat and front, is a little out at elbow.

BULLDOGS—(H. W. LACY).

Only one entry in each class, but those were two good ones, Bo'swain and Bloater Girl. The latter should not have been shown as she had scabs on her and her skin was bare in places.

BULL-TERRIERS—(H. W. LACY).

An excellent display, especially for such a show. Starlight, looking quite herself, was alone in the challenge class. The open dog class was a hot one, several new importations appearing. First prize went to Prince Bendigo, who beats the second, Common, in condition and body, the latter is a little long in coat, but has an excellent long head and good eye; he beats Watchful Wagtail in front, the latter bowing out. Mister Dick is too coarse and short-headed. Duke of Wellington and Baron II., vhc., both deserved their letter, as they show a good deal of quality, but are not true in forelegs. Top Sparkle perhaps deserved another letter, but he is faulty in head. King of Hearts is well known. This was a warm class, but was graded according to merit and condition. The bitch class was not so large nor so good. Queen of the Dale, another new one, is better in head, front and body than Edgewood Fancy, who in turn beats Grove Duchess, who is a bit cloddy and snipy muzzled. Belle of Edgewood is young, 6 mos. old, is bad in front and light in muzzle. Bull-terriers are evidently taking a new lease on popular favor.

FOX-TERRIERS—(H. W. LACY).

Here was some of the hottest competition in the show, many new English dogs appearing, and these when filled out and in condition will do better. No challengers. In open dogs the Kingston winner, Blemton Trump, again came to the front, beating Painter, as before; and Endcliffe Spice, third, is beaten in body, head and front, and he in turn beats Diver III. in head, forelegs and feel of coat, though beaten himself in loin and ribs. Nobody's Child could do no better than vhc. in this company, though his head was the best. Bob, vhc., is out at elbow and light in muzzle. Jack is beaten in head, carriage of ears and front. Several other entries had no business with the terriers mentioned and were sent out early. The winner in bitches turned up in a Thayer-bred one, Hillside Baroness, nice front, head and carriage of ears, coat of good feel. Venus, another new one from the other side, is hardly up to the winner in head or the above named points, but beats Rowton Safety, a black-headed, taking little bitch, young yet and not let down, front pretty good, ears carried too high, skull round and full, muzzle bit pinched, good eye and, no doubt, will make up into something better than the average. Suffolk Riot is small, loses in head, coat, front and body, not filled out enough yet. Vic, vhc., beats Dot, hc., in head, carriage of ears and forelegs and feet. Wire-hairs were exceedingly well represented, for it is not often we find eight in the dog class. The small ring and the exceeding pugnacity of the competitors made this a bad class to judge, but I liked Adswood Jim II. for premium honors, thinking him better in head, not too wide in front and harder in coat. Stanley second. Eskdale Bloom I did not like so well in head, too thick and wide in front and coat not so wiry. Barton Sting is better in head but loses to Bloom in most of the points. Green Gale Patch, vhc., is a fairly good one, but loses in front and head. Jack is too wide in front, otherwise a fairly good terrier. Wentworth Wonder is well known, but did not like its head, nor is it so good in body. In bitches a nice-shaped one, Repero Rosanna, short of coat and a trifle long cast, has an excellent front and nice long head, with ears well carried. She is also an emigrant. Sally, second, is a pretty little terrier, better in head, body and front than the third one, Miss Taylor.

BLACK AND TAN TERRIERS—(H. W. LACY).

The winners in these classes are well known. Champion Meersbrook Maiden had her class to herself. She is not in good coat and was not feeling in her usual active condition the first day or two of the show. Broomfield Sultan had an easy win in dogs over Rochelle Scot, who had, though coarse himself, an easy defeat of J. M. Gibson, who is too thick in head and cloddy in body, markings too light. Prince Regent did not compete, was out of condition, and Prince Raglan was absent. In bitches Matchless, well known, had the class to herself, Meersbrook Empress not turning up.

SCOTCH, SKYE AND DANDIE DINMONTS—(H. W. LACY).

Here was a troublesome class and not quite a fair one, three good dogs of different breeds standing out before the rest. Eventually the Skye, Sir Stafford's superior condition told over the typical Scotch terrier Kilston, who was out of shape; the Dandie, King of the Heather, is wide and out in front; Mena, a nice stamp of Dandie, hardly up to King in body and head, was reserve. Fan loses in texture of coat and front, too bowed; Valentine, hc., loses in head and front, no difference between the hair on head and body. This was a splendid show of Dandies for this country, and most of them are owned in Toronto and Milton, Ont.

BEDLINGTON TERRIERS.—(H. W. LACY).

Sentinel II. won easily in this class of three, beating Nettle in head and coat, though beaten in arch of loin. Phoebe, too short-faced and not straight in front, was third.

YORKSHIRE TERRIERS.—(H. W. LACY).

Champion Toon's Royal had an easy win over Venus from the same kennel in the challenge class. Toon's Royal George was given the only prize in the open dogs, and a silver, Tot, from the same kennels, took the prize in the ladies' division.

PUGS.—(MISS ANNA H. WHITNEY).

Miss Whitney was honored with quite a good string of entries in this breed, the challenge class mustering four. Bessie had to lower her colors to Bob Ivy, Cassina, the black-headed one, coming third. Eberhart's Cashier had a clever win in open dogs. This dog, though he might be shorter in muzzle, improves with age, and his curl is a byword. Curtis, showing too much black, was second, and described last week. Fritz, third, has a nice head and body. Barney is leggy and ears carried too high, but has a nice head. Kash, Jr., though his coat is too thick, might have done a bit better. Fritz Emmett, h.c., was here outclassed. Sateen won again in bitches, beating Mabel E. in head and body. Fanny K., third, is a bit tucked up and her ears are not well carried. Peggy Pride, reserve, we did not see, but will describe her at Toronto. Lady Victoria and Cribbage had to be content with vhc. each; this time they are well known. Fanny, also vhc., is a nice stamp and will improve in head.

TOYS AND PETS.—(MISS ANNA H. WHITNEY).

Minnie, with fawn-colored ears, a sort of Maltese terrier, won, with Daisy, a Mexican poodle, second. Beauty, a toy black and tan, should have won easily, for she was quite a fair toy as they go.

MISCELLANEOUS.—(MISS ANNA H. WHITNEY).

Miss Whitney very kindly relieved Mr. Lacy of the toys and this class after the dachshunde had had a separate class made for them. The bloodhound Jack Shepherd had a close win over the King Charles spaniel Calumet Alice, third going to Floss, a Barbet (?). Daisy, a supposed King Charles, should have been left out, for she is too long in head, like a snipy cocker. Worry, Mr. Rickett's clever-looking Airedale, short in head and body, stands on excellent legs and feet, and has a good feel of coat. Two sort of heavy harriers, misnamed Bassets, were judged separately; they were of no account as show dogs, but are no doubt excellent deer trailers, as the owner informed us.

DACHSHUNDE.—(H. W. LACY).

Windrush Rioter, faulty in hind action, but of excellent type, won over Lena L., well known, better in length, nearer to the ground, and better in crook and texture of coat. Felmark should have been second, though he is not so long in body, but is stronger in front. With the judging of the specials for Hamilton dogs and the kennel prizes, this brought the judging to a close.

AWARDS.

MASTIFFS.—CHALLENGE—1st, 2d and 3d, Flour City Kennels' Hford Chancellor, Lady Coleus, and Caution's Own Daughter. OPEN—1st, Flour City Kennels' Miss Caution; 2d, Hugh Falconer's Mabel; 3d, Flour City Kennels' Mina Minting. Very high com., and high com. W. D. Forbes's Grimsby Caution and Hford Bess. Com., M. C. Beasley's Caesar.

ST. BERNARDS.—ROUGH OR SMOOTH-COATED.—CHALLENGE—1st, Wm. C. Reick's champion Hector. OPEN—Dogs: 1st, Wm. C. Reick's Kingston Regent; 2d, J. C. Guillot's Othele; 3d, Peninsular Kennels' Caspar. Reserve, Pottersburg Kennels' Don Phyllis. High com., V. L. Francis's Renmore, Jr., and Horan & Sweetman's Bruno H. Bitches: 1st and 2d, Wm. C. Reick's Republican Belle and Zenith; 3d, Pottersburg Kennels' Glenisla. Reserve, F. E. Lamb's Nun Nicer. Very high com., H. P. Brea's Mary Jones.

GREAT DANES.—CHALLENGE—1st, Woolverine Kennels' Favor. OPEN—1st and 2d, Woolverine Kennels' Brutus and Pascha II.; 2d, Dr. Wesley Mills' Minerva's Fawn. Very high com., Senator Sanford's Gelett.

NEWFOUNDLANDS.—2d, Chas. Cloheey's Jumbo.

BARZOIS AND IRISH WOLFHOOUNDS.—1st, Miss Hendrie's Leprihaun.

GREYHOUNDS.—CHALLENGE—1st, A. W. Purbeck's Gem of the Season; 2d, A. C. Page's Maud Torrington. OPEN—Dogs: 1st, and 2d, A. W. Purbeck's Ornatus and Pious Pembroke; 3d, Seaton Kennels' Ranger. Com., Ernest Farret's Jute. Bitches: 1st and 2d, A. W. Purbeck's Lilly of Gainsboro and Bestwood Daisy. Com., W. F. Randall's Grimsby Jess.

FOXHOOUNDS.—1st, withheld; 2d and 3d, Wm. Proper's Stormer and Ranger.

BEAGLES.—CHALLENGE—1st, Rockland Kennels' Racer, Jr. OPEN—Dogs: 1st, Rockland Kennels' Roy K.; 2d and 3d, Chas. Campion's True Boy and Banjo. Bitches: 1st, H. P. Brea's Judo; 2d and 3d, Rockland Kennels' Emmeline and Fanny K.; 3d, Col. Maybee's Dainty. Com., Chas. Campion's Stella.

POINTERS.—CHALLENGE—1st and 2d, Wm. H. Hyland's Pomeroy Sec and Fan N.; 3d, Robert Leslie's Belle Randolph. OPEN—Dogs: 1st, Wm. H. Hyland's Ossington; 2d, Wm. Ledyard's Tempest. Bitches: 1st, Wm. H. Hyland's Lady Graphic; 2d, Fred W. Shaw's Phantom.

ENGLISH SETTERS.—CHALLENGE—1st, W. B. Wells's Cambrana. OPEN—Dogs: 1st, F. S. Brown's Edgemark; 2d and reserve, Mount Washington Kennels Viscount and Tony Gladstone. Very high com. and com., W. B. Wells's Matiae and Romney. High com., G. C. Thomas's Oscar. H. Hamilton's Jack H. Northwood's Benzie. Com., C. G. McIntyre's Mount Royal Birch, Jas. E. Hair's Sir Edward. Bitches: 1st, 3d and reserve, Mount Washington Kennels' Victress Llewellyn, Nia and Norah III.; 2d, A. J. Hartman's Albert's Nettle. Very high com. and high com., W. B. Wells's Dinah C. and Daphne. High com., John Smith's May. Geo. C. Hore's Blue Dora. Com., Geo. C. Hore's Queen Dawn.

IRISH SETTERS.—CHALLENGE—No entries. OPEN—Dogs: 1st and 3d, Seminole Kennels' Seminole and Eleo; 2d, Glen Doyle Kennels' Glen Javel. Bitches: 1st, Battersby Kennels' Goldsmith Maid; 2d, Chas. Campion's Belle; 3d and very high com., Seminole Kennels' Aureo and Rose Palmerston.

BLACK AND TAN SETTERS.—CHALLENGE—1st, 2d and 3d, Dr. S. G. Dixon's Ivanhoe, Leo B. and Duchess of Waverly. OPEN—Dogs: 2d, R. Evan's Gordon. Com., G. Flett's Victor. Bitches: 1st, Dr. S. G. Dixon's Lady Waverly.

WATER SPANIELS.—2d, G. Knox's Jack.

CLUMBER SPANIELS.—CHALLENGE—1st and 2d, Mercer & Middleton's champion Lady Bromine and champion Boss III. OPEN—Dogs: 1st, Mercer & Middleton's Johnny, Jr. Bitches: 1st, Mercer & Middleton's Lady Joan.

FIELD SPANIELS.—CHALLENGE—1st, Andrew Laidlaw's champion Briford Gladys. OPEN—Dogs: 1st, Andrew Laidlaw's Samson; 2d, Brant Cocker Kennels' Brantford Mobawk; 3d, unknown's Toby C. Bitches: No entries.

COCKER SPANIELS.—CHALLENGE—Dogs: 1st, Luckwell & Douglas's Black Duke; 2d, Brant Cocker Kennels' Brantford Red Jacket; 3d, Ancient and Modern Spaniel Kennels' King of Oboe. Very high com., Andrew Laidlaw's champion Rabbie. Bitches: 1st and 2d, Andrew Laidlaw's champion Miss Obo II. and Bessie W.; 3d, Luckwell & Douglas's King Pharah's Sister. OPEN—Black Dogs: 1st, Luckwell & Douglas's Black Lufferin; 2d, Andrew Laidlaw's Obo; 3d, Ancient and Modern Cocker Spaniel Kennels' Obaufan. Very high com., Marjory O'Neill's Sport; high com., Andrew Laidlaw's Brant Cocker Kennels' Bessie. Bitches: 1st, Ancient and Modern Spaniel Kennels' I Say; 2d, Brant Cocker Kennels' Flirt; 3d, Luckwell & Douglas's Jealousy. Very high com., Charles Seale's Topsy. Andrew Laidlaw's Obo II., and Luckwell & Douglas's Woodland Susie; high com., Henry Tyson's Lady Aberdeen, and J. A. Spradlin's Cora and Topsy II. Reserve, Brant Cocker Kennels' Topsy. Dogs other than Black: 1st, Andrew Laidlaw's Bambie; 2d, Brant Cocker Kennels' Brantford Red Man. Com., Hon. Senator Sanford's Garry. Bitches other than Black: 1st, Brant Cocker Kennels' Red Riding Hood; 2d, Wm. McDonald's Gipsy Queen; 3d, Andrew Laidlaw's Lady of Learning. Very high com., Brant Cocker Kennels' Brantford Dolly Varlen; high com., Wm. McDonald's Queenie and Ancient and Modern Spaniel Kennels' Little Red Riding Hood; com., Ancient and Modern Spaniel Kennels' Blushing Rose.

COLLIES.—CHALLENGE—1st and 2d, Seminole Kennels' Roslyn Dandy and Metchley Surprise. OPEN—Dogs: 1st, McEwen & Gibson's Metchley Wonder II.; 2d, John Hawkes's Sir Walter Scott III.; Seminole Kennels' Rowdy. Reserve, A. Burland's Moonstone. Com., McEwen & Gibson's Ballentine, H. P. Harrison's Toronto Wonder. Bitches: 1st and 2d, McEwen & Gibson's Mayflower and Vanity; 3d, Seminole Kennels' Cora II. Reserve, H. P. Harrison's Nancy. Very high com., T. R. Billett's Parton Ella. Com., Geo. Webster's Lassie.

BULLDOGS.—Dogs: 1st, E. A. Woodward's Bo'swain. Bitches: 1st, A. J. Hatch's Blotter Girl.

BULL-TERRIERS.—CHALLENGE—1st, F. F. Dole's champion Starlight. OPEN—Dogs: 1st, Fred Church's Prince Bendigo; 2d, Anglo-American Terrier Kennels' Commor; 3d, Dr. W. C. Sneed's Watchful Wagtail. Reserve, John Moorhead, Jr.'s Mister Dick. Very high com., R. Wright's Duke of Wellington, Arch. Inglis's Baron II. High com., F. F. Dole's Topsparkle. Anglo-American Terrier Kennels' King of Hearts. Bitches: 1st, Anglo-American Terrier Kennels' Queen of the Dale; 2d and very high com., F. F. Dole's Edgewood Fancy and Belle of Edgewood; 3d, A. T. Wilgress's Grove Duchess.

FOX-TERRIERS.—SMOOTH-COATED.—Dogs: 1st, J. K. Macdonald's Blemton Trump; 2d, Harry Northwood's Painter; 3d, Anglo-American Kennels' Endcliffe Spice, Mount Washington Kennels' Rowton Safety. Reserve, Mount Washington Kennels' Diver I. Very high com., Ancient and Modern Spaniel Kennels' Noboddy's Child. J. A. Spradlin's Bob. High com., Adelaide Dewar's Jack. Com., Geo. W. Prescott's Punch. Bitches: 1st, Mrs. A. D. Stewart's Hillside Baroness; 2d, Anglo-American Terrier Kennels' Venus I. Reserve, A. D. Stewart's Suffolk Riot. Very high com., J. A. Spradlin's Vic. High com., G. W. Prescott's Dot. Com., J. A. Spradlin's Tricksey, G. W. Prescott's Arden Belle. BRE-HAIRED.—Dogs: 1st, Battersby Kennels' Adswood Jiu Li; 2d, Robert Junior's Stanley; 3d, Hendrie & Muir's Eskdale Bloom. Reserve, Anglo-American Terrier Kennels' Barton Sting. Very high com., Hendrie & Muir's Wentworth Wonder, Battersby Kennels' Green Gale Patch, Miss May McGivern's Jack. Bitches: 1st, Battersby Kennels' Repero Rosanna; 2d, Miss May McGivern's Sally; 3d, P. J. Smyth's Miss Taylor.

IRISH TERRIERS.—1st, Anglo-American Terrier Kennels' Exlie; 2d, Anglo-American Terrier Kennels' Jack Briggs.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, Rochelle Kennel's champion Meersbrook Maiden. OPEN—Dogs: 1st, Rochelle Kennels' Broadfield Sultan; 2d, Miss L. Wright's Rochelle Scot; 3d, James Crook's J. M. Gilson. Bitches: 1st, Anglo-American Terrier Kennels' Matchless.

SCOTCH SKYE AND DANDIE DINMONT TERRIERS.—1st, Clifford A. Shinn's Sir Stafford; 2d, Anglo-American Terrier Kennels' Klinton; 3d, Ed. Brooks's King of the Heather. Reserve, J. Butterfield's Mena. Very high com., G. J. Daniels's Fan. High com., C. J. Daniels's Valentine and J. Butterfield's Gayoa.

BEDLINGTON TERRIERS.—1st, H. Bedlington's Sentinel; 2d, Allen Trebilcock's Nettle; 3d, H. B. dington's Phoebe.

YORKSHIRE TERRIERS.—CHALLENGE—1st and 2d, Anglo-American Terrier Kennels' champion Toon's Royal and Venus. OPEN—Dogs: 1st, Anglo-American Terrier Kennels' Toon's Royal George. Bitches: 1st, Anglo-American Terrier Kennels' Tot.

PUGS.—CHALLENGE—1st and 3d, Dr. M. H. Cryer's Bob Ivy and Bessie; 2d, Seminole Kennels' Cassina. OPEN—Dogs: 1st, Eberhart Pug Kennels' Eberhart's Cashier; 2d, Mrs. M. M. Ballentine's Curtis; 3d, C. H. A. Lee's Friz. Reserve, A. G. H. Luxton's Barney. Very high com., Seminole Kennels' Kash, Jr. High com., Dr. M. H. Cryer's Fritz Emmet. Bitches: 1st, Howard Bros. Sateen; 2d and 3d, Eberhart Pug Kennels' Mabel and Fanny K. Very high com., Dr. M. H. Cryer's Lady Victoria and Cribbage. G. H. Luxton's Fanny. High com., Seminole Kennels' Pearl de Jadin. Wm. Elliott's Floss.

TOYS AND PETS.—1st, M. E. Bessey's Minnie; 2d, W. Halling's Daisy; 3d, T. H. Church's Beauty.

DACHSHUNDE.—1st, E. A. Manice's Windrush Rioter.

MISCELLANEOUS.—1st, R. G. H. Huntington's Jack Shepherd (bloodhound).

SPECIAL PRIZES.

Kennel Specials.—English setters, Mount Washington Kennels; collies, Seminole Kennels; mastiffs, Flour City Kennels; St. Bernards, Wm. R. Beach; Great Danes, Wolverine Kennels; Clumber spaniels, Mercer & Middleton; cocker spaniels, Luckwell & Douglas; pugs, Eberhart Kennels; fox-terriers, smooth, J. A. Spradlin; black and tan setters, Dr. S. G. Dixon; beagles, Rockland Kennels; Yorkshire terriers, Anglo-American Terrier Kennels; Irish setters, Seminole Kennels; special of \$5 for best of each breed, competition confined to Hamilton dogs only; wire-haired fox-terrier, Miss May McGivern; setter, George C. Thompson; beagle, H. P. Brea; Yorkshire terrier, Jack F. R. Close; cocker, dog, Martin O'Neil; pug, A. G. H. Luxton; St. Bernard, Horan & Sweetman; Great Dane, Hon. W. E. Sanford; Newfoundland, Chas. Cloheey; collie, T. R. Billett; toy, under 7lbs., M. E. Bessey; mastiff, M. C. Bessey; wolfhound, Miss Hendrie; greyhound, Ernest Jarrett; water spaniel, George Knox; Bedlington, H. Bedlington; Airedale, E. R. Ricketts; foxhound, Wm. Proper; black and tan terriers, James Crook; fox-terrier bitch, smooth, Mrs. A. D. Stewart; fox-terrier dog, smooth, Miss Adelaide Dewar; cocker bitch, Wm. McDonald. Largest entry made by a member of the Hamilton Kennel Club, A. G. H. Luxton.

DOG CHAT.

THE following railroads have agreed to sell round trip tickets to the Blue Grass Kennel Club's bench show at Lexington for one and one-third fare and pass all dogs free in baggage cars when accompanied by owners: Cincinnati, New Orleans and Texas Pacific, Louisville and Nashville, Kentucky Central, Newport News & Miss. Valley, and Kentucky Union and Chesapeake & Ohio. Entries close Sept. 13.

Mr. W. T. Irwin has resigned his management of the Moorefield Kennels to accept a similar position with the Glenmoore Kennels. He reports all the dogs doing well upon chickens, the whole kennel of reds now in Kansas being worked upon game daily.

A word of praise must be given to Messrs. Tuckett, Mole, McDonald, Becay and several others whose names we did not catch, for their untiring labor, which contributed no little to the Hamilton show's success.

The black and tan Prince Regent was missing for some time during the show. Having broke loose from an attendant, he ran round the streets for some hours. He was eventually found and brought back to the building. The cocker Black Duke also gave the show people a scare by slipping his collar and hiding himself behind a collie in the latrine stall. Half the keepers were running round the streets and building after it, and it was given up as lost, when his black coat was just seen from under the collie's mane.

"No," said the young lady competently, "I don't like them coolies, and the bugle dogs is horrid; but them cookie spaniels is too sweet for anything."—*Hamilton (Ont.) Spectator*.

The largest emigrant in the way of dog flesh arrived in New York Sept. 10 on the White Star liner Normandie. This is Lord Bute, of whose purchase by the Menthon Kennels we spoke some time since. The price paid to Mr. Shillecock, we understand, was about \$3,750. That Lord Bute is a large dog there is little doubt, but we question whether he can overtop Lord Melrose, which we measured at 17mos. old as 35½ in. Lord Bute has an enviable record as a getter of good stock, and we trust that the enterprise of Menthon Kennels will receive its due reward and that before long some of the prototypes of the cracks on the other side of the water by this sire may be produced and raised from him.

Dr. Foote's black and tans were protested for late arrival at the Hamilton show. The dogs, however, were shown under protest and won. It was then found that the train they came on from New York was three hours late in arriving at Hamilton Tuesday morning, and the protest was overruled. Broomfield Sultan was catalogued at \$30, and

several made tracks to the secretary to lay claim to him. Ben Lewis getting it first paid ten dollars to bind it. Of course it was a mistake, as Dr. Foote had placed no price at all on his entry form. It is a noticeable feature of our shows that so few dogs are claimed through the secretary, for we scarcely ever hear of a case. The cause may be found in the fact that there are few good dogs running around loose, and again that owners of dogs they think fit to show have an inordinate idea of their dog's value, and fill in the price accordingly.

This reminds us that at Hamilton we dropped across a capital fox-terrier pup, by Mr. Mortimer's old dog Suffolk Coronet, that he sold to Mr. J. W. Morden, of Hamilton, out of Bacchante, by Bacchanal—Venatrix; Suffolk Coronet by champion Result—Diadem. This is excellent breeding, and if Suffolk Coronet is going to breed such pups as this one he will do a lot of good for Canadian fox-terrier breeders. A tempting offer of the coin of the realm persuaded Mr. Morden to part with the pup, and FOREST AND STREAM now has an office dog.

It is astonishing to see the number of H. K. C. members' badges in walking along the streets of Hamilton during the dog show. Nearly every other man seemed to be a member, and this is not astonishing when one finds that this club counts 298 names on its roll, making it, without doubt, the largest kennel club in the world. Some \$2,400 was placed in bank as a guarantee fund, and before the doors of the show were opened they were quite able to pay off every indebtedness that might be incurred. As an instance, the very first morning of the show Spratts' agent was paid their bill of over \$400. There was no lack of attendants, and they were made to do their work, too. The catalogues were printed and ready for sale on the Saturday before the show, nearly three days ahead, very few mistakes could be found in it, and those only of a typographical nature. The catalogue was well arranged with breed index and list of exhibitors' addresses. We mention these little things to show that all these items go to make a well-managed show and that others can take a wrinkle from the H. K. C.

On the evening of the closing day Mr. Stewart, the superintendent of the Hamilton dog show, was the recipient of a handsome testimonial from the exhibitors and handlers, in the shape of gold locket, as a token of their appreciation of his uniform courtesy and kindness to them. On the face was engraved his monogram "A. D. S.," and on the reverse, "Presented to A. D. Stewart by the exhibitors and handlers at the H. K. C. show, 1891." Mr. S. L. Boggs, president of the Mascoutah Kennel Club, made the presentation, and in the course of a neat speech said: "It is my pleasing duty to present you with this small token of our esteem and good will, and may you live long to wear it in remembrance of the happy and enjoyable time we have spent here in Hamilton. I have been appointed by the exhibitors and principal handlers to show that they appreciate the efforts that you have made in their behalf. Most of us had no idea that there was such a glorious place as Hamilton, and no such reception has ever been offered us as by the committee of the Hamilton bench show. I feel satisfied that we shall all return with twice the number of dogs next year. That is, I am sure, the sentiment that actuates all of the men." Mr. A. D. Stewart, in his happiest style, thanked the whole of the exhibitors for the very hearty manner in which they had contributed to the success of the first Hamilton bench show, and he felt great pleasure in accepting the very handsome locket, not for its intrinsic value, but as a memento of the first attempt to hold a dog show in the city. He would wear the locket on his watch chain and ever remember the surprise. He required no thanks. The satisfaction that he had in the work which is now over, was the greatest reward that he could receive. The locket he should treasure as a pleasing reminder from all of those present of their esteem and good will, and for that, and that alone, he would wear it for the rest of his life.

"Captain" Murphy, Spratts' well-known and energetic bench erector and biscuit caterer, will receive a gold medal from the Hamilton Club. As usual he gave entire satisfaction by the manner in which he attended to the feeding and disinfecting. The caretaker of the rink in which the show was held was not forgotten, the exhibitors and handlers presenting him with a handsome purse which had been subscribed for the purpose.

We learn that there are less than 800 entries at the Montreal show. It seems strange that the liberal prize list given there should not have induced a larger number of exhibitors to enter. We think the early date of closing must be in a great measure to blame.

These is likely to be an exciting and interesting meeting of the Canadian Kennel Club on Wednesday during Toronto show. The important office of secretary-treasurer will be contested by Messrs. A. D. Stewart, of Hamilton, and H. B. Donovan, of Toronto. Since witnessing the former gentleman's executive ability and energy we are inclined, without any prejudice to Mr. Donovan, to think no better man could be found for the position. As we intimated recently it is proposed to make the office a salaried one for the future, so that a clerk may be employed to do the heavy work. We also learn that Mr. F. H. Mercer proposes to offer to publish the stud book for the club annually free of charge, and to supply every member with a copy gratis. As a large number of dogs are already registered and there is no publication in which they appear, the benefit of this step to the Canadian canine interests will readily be perceived.

We understand, on no less authority than a letter from Mr. Mortimer that puppy classes will still be offered at New York. It is needless to express our regrets at this intelligence, as we fully expected that the abolition of this useless, not to say cruel, adjunct of dog shows would receive its death blow when discontinued by the powerful W. K. C. What club in the United States will have the pluck to follow the lead of our Northern friends?

It is more than probable that a magazine of the highest class will shortly be published in Canada, which is to be entirely devoted to dogs.

They say that judging dogs is not quite so easy in practice as it seems to be to the uninitiated.

At length it would seem that Airedale terriers are to receive some attention. Mr. Ricketts, an Englishman resident in Canada, has become infected with the fever, and intends visiting England shortly with a view to founding a kennel of the breed. We have often said that this breed deserves attention, as there is no terrier better suited to a rough country than the native dog of the Vale of the Aire. Since boyhood we have known these dogs intimately, and certainly no more game and harder dog exists than this rough and tumble type. No one can call them handsome animals, still many breeds even more destitute of beauty have their thick and thin supporters, and no breed better befits the saying, "handsome is as handsome does," than this giant of the terrier tribe.

There is a most remarkable dog in Hamilton, Canada. He is a rough-haired mongrel terrier and rejoices in the name of "Jack, the policeman's dog." Fifteen years ago his master, a night watchman, was shot while on duty.

The dog, who was with him, ran home and by whining at the door and scratching attracted the attention of the inmates, whom he at once guided to his dying master. For the three days that the man lingered between life and death the dog lay at the foot of his bed and never stirred until the body was removed to the cemetery, when he followed in the funeral procession to the grave. Thence he went to the police station, and every night since then he has attended the men while on duty. At six A. M., when the men are lined up for dismissal, the dog takes up his post at the head of the line. On the command, "Dismiss," being given he barks and immediately disappears down the street, running at his utmost speed. No one knows where he goes nor what he lives on. All but his "public" life is a mystery. In the miscellaneous class at the Hamilton show his entry reads: "805. Hamilton Police Force. Jack, the policeman's dog (rough terrier), 15 years old. Not for sale." Miss Whitney awarded him vhc., doubtless more in recognition of his unique reputation than anything else.

Next week we shall have a portrait of Mr. A. D. Stewart, the popular president of the Hamilton Kennel Club.

We have received from President August Belmont, too late for insertion this week, a communication in reference to our article in issue of Aug. 27, "Is It Not Worth Considering?" This will be printed next week.

UNITED STATES FIELD TRIALS CLUB.

INDIANAPOLIS, Ind., Sept. 13.—*Editor Forest and Stream*: Seventy-four Derby entries remain in at the close of our second forfeit. The list is as follows:

POINTERS.

J. H. & J. A. Hunter's Black Wonder (Ike—Bang Bang's Pride).
Frederick Joy's Abbess of Kent (King of Kent—Louise Bejan).
Oug & Shuttleworth's Dude N. (Ossian—Fancy).
R. A. Baker's Sarah (Black Joe, Jr.—Scudder's Queen).
W. B. Sheldon's Shot S. (Springbok—Flush).
Thos. W. McManus's McManus's Hero, McManus's Alone, McManus's Countess Wanda and McManus's Wishbone (Black Joe—Dianora) and McManus's Ace of Spades (Black Joe—Scudder's Queen).
Horace F. Wood's My Lady and Forest Lassie (Shot—Forest Queen).
Jas. M. Vaughn's Don (Crup—Peach).
Dr. J. G. F. Holston's Fannie Kirk (Kirk—Croxeth Nellie), and Doc Fauster (Count Fauster—Croxeth Nellie).
Scudder & Munson's Black Chloe (Black Joe—Scudder's Queen, and Manitou (Luck of the Goat—Clary).
Dr. John R. Daniels's Promotion (Lord Graphic—Belle).
St. Mark M. Mundy's Phantom (Krup—Zeka).
Ossian Pointer Kennels' Hops II. (King of Kent—Hops).
U. A. Fisher's Little Oue (Nicomemus—Fannie V. Croxteth).
Geo. J. Gleason's (Agent) Roxiana (Cornerstone—Guenn).
Geo. A. McLin's (Agent) Don of Ossian (Ossian—Cherry-stone).

IRISH SETTERS.

Gas Leisy's Kildare Carmen (Elcho, Jr.—Ruby Glenmore).
B. F. Kramer's Eric Elcho (Lee Grouse—Della).
Tom Taggart's Fannie (Dick Swiveler—Frankie).

ENGLISH SETTERS.

J. H. & J. A. Hunter's Sandboru (Ben Hill—Daisy Hunter), Dad's Mark and Hoosier Girl (Dad Wilson—Daisy Hunter).
H. J. Smith's Firenze (Gath's Mark—Flame Gladstone), Ruby Gladstone (Gladstone's Boy—Diamond) and Prince Pongo (Gath's Mark—Flame Gladstone).
J. E. Robert's Race Noble, Jr. (Race Noble—Fannie S.).
Blue Ridge Kennels' Bob Cooper (Roi D'Or—Miss Nellie Y.).
Lady Eveline (Gath's Mark—Flame Gladstone), Reel (Rodrigo—Lufra), Dad's Girl (Dad Wilson—Bohemian Girl) and Lucy (Rodrigo—Lu Gladstone).
Paul H. Gatzion's Hildegard (Monk of Furness—Countess Amelia).

T. J. Widrig's Tough and Boy (Ben W.—Nellie W.).
G. T. Kerr's Nellie Noble (Race Noble—Fannie S.).
B. Ridgway's Booth (King Noble—Queen Vasthi).
Bert Crane's Liger, Cazador and Piel (Rodrigo—Maud).
J. M. Aven's Sappho, Iza, Robespierre and Chas. Kean (Rodrigo—Ollie S.).
Chas. W. Travis's Doc Quinn (Monk of Furness—Merry Girl).

A. J. Gleason's (Agent) Maid of Alma, Belle of Alma, Queen of Alma and Gloria (Dan Foreman—Don's Nellie).
U. T. Harris's Flyaway (Gath's Hope—Dimple).
Thos. Johnson's Manitoba Pet (Dick Bondhu—Manitoba Belle).
J. I. Case, Jr.'s Mounie and Lady Elgin (King Noble—Queen Vasthi).
W. J. Hutchinson's Pembroke's Blue Don (Pembroke's Don—Blue Cubas).
R. B. Morgan's Bruce M. (Richard IV.—Rural Neva) and May Girl (Rodrigo—May M.).
Mrs. S. A. Elliott's Mark T. (Ben W.—Cybella Lea).
D. E. Rose's (Agent) Hope's Mark (Gath's Hope—Lady May), and Wun Lung (Capt. Bethel—Enid).
A. M. Hildebrandt's Bessie L. (Noble Tat—Tennessee).
P. T. MADISON, Sec'y.

IRISH SETTER CLUB.

Editor Forest and Stream:

At a meeting of the executive committee of the Irish Setter Club, held in Philadelphia, Sept. 9, there were present Messrs. Child, Thompson and Davis, and N. Rowe and F. L. Cheney by proxy.

Mr. E. P. Bishop, of Cincinnati, Ohio, and Mr. Boyd D. Rothrock, of Williamsport, Pa., were elected members.

Mr. E. P. Bishop was elected a member of the executive committee, to fill the vacancy caused by the withdrawal of Mr. Moore.

The secretary announced that Dr. William Jarvis had promised a valuable cup to be known as the Elcho cup, to become the property of the winner of the All-Aged Stakes; also that the gun editor of the Philadelphia Item had promised a handsome cup or trophy for the winner of the Derby.

A contribution was received from Mr. E. P. Bishop of \$50 to the winner of the Derby, and \$50 to the handler of same.

It was decided that the stakes of the approaching trials will be as follows: For the Derby, to the winner of first \$150, donated by the club, \$100 donated by Mr. Bishop (one-half to go to the handler), and the Philadelphia Item cup; to the winner of second, \$100; to the winner of third, \$50. For the All-Aged Stake, \$200, and the Elcho cup, to the winner of first; \$125 to the winner of second, and \$75 to the winner of third. The cash prizes in the All-Aged Stake will probably be increased later.

The treasurer announced \$149 contributions to the field trial fund. We have Dr. Jarvis's and the Philadelphia Item cups, \$145 in the treasury from dues besides, and will have the entrance fees in addition. G. G. DAVIS, Sec.-Treas.

TORONTO DOG SHOW.

[Special to Forest and Stream.]

TORONTO, Ont., Monday evening, Sept. 14.—The Toronto show opened at noon to-day with an excellent entry of dogs including most of the principal ones shown at Hamilton. The building is the same as last year and is well adapted for the purpose. A number of well-known dog men and visitors are here, among them Dr. Foote and Mrs. Foote, Mr. and Mrs. N. Q. Pope, C. S. Wixom, E. Hagans, R. Gibson, L. L. Boggs, Andrew Laidlaw, C. M. Nelles, Luckwell and Douglas, F. W. Morden, T. G. Davey, John H. Naylor, F. H. F. Mercer, Alf Eberhart, Dr. Kimball, and others, besides the regular handlers with their usual strings. Judging commenced in three rings, two downstairs and one for Mr. Wilmerding up in the gallery. Miss Anna H. Whitney and Messrs. John Davidson, C. H. Mason and A. C. Wilmerding are the judges. The work has progressed fairly well and will be well finished to-morrow afternoon. The fair is in full blast and to-morrow some of the greyhound races will come off. Some of the classes are strong, notably spaniels, pugs, greyhounds, one of the best seen yet out of New York, setters and pointers, etc. The following is a list of awards made to this evening:

MASTIFFS.—CHALLENGE—Dogs: 1st, Flour City Kennels' Iford Chancellor. *Bitches:* 1st and 2d, Flour City Kennels' Lady Coleus and Caution's Own Daughter. *Open—Dogs:* 1st, Dr. Kimball's Elson; 2d, Hugh Falconer's Mode. *Bitches:* 1st and 2d, Flour City Kennels' Miss Caution and Minna Minting. *Puppies:* 1st, Dr. E. L. Kimball's Elson.

ST. BERNARDS.—ROUGH-COATED—Dogs: 1st, W. C. Reick's Kingston Regent; 2d, F. Stettenborn's Hesper's Son; 3d and 4th, J. S. Williams's Monk and Madam. *Open—Dogs:* 1st, G. S. Williams's Don Phyllis. *Very high com., G. A. McGillivray's Sir Leonard.* *High com., S. F. Glass's Bruce, Geo. Wright's Oscar.* *Com., V. L. Francis's Benmore, Jr.* *Bitches:* 1st and 2d, W. C. Reick's Republic Belle and Zenith; 3d and reserve, Pottersburg Kennels' Glensia and Phyllis; 4th and high com., J. S. Williams's Beulah and Norah. *Very high com., Vanbladiem & Ferguson's Daisy May.* *Com., G. A. McGillivray's Nellie Maud.* *Puppies:* 1st, G. S. Williams's Sir John; 2d, F. Stettenborn's Hesper's Son; 3d and reserve, Pottersburg Kennels' Don Phyllis and Lidoan. *Very high com., J. S. Williams's Elveto and Dictator.* *High com., V. L. Francis's Benmore, Jr.* *G. A. McGillivray's Kenmore.* *Com., A. J. Groves's The Premier, Jas. Miller's.* *Bitches:* 1st, Pottersburg Kennels' Glensia; 2d, C. Hanschild's Theben; 3d, J. S. Williams's Lady Maud. *SMOOTH-COATED—CHALLENGE—1st, W. C. Reick's Hector.* *Open—Bitches:* 1st, R. W. Tucker's Swiss; 2d, Vanbladiem & Ferguson's Daisy; 3d, Hanschild's Gemma; 4th, F. E. Lamb's Nan Nicer. *Novice—Dogs:* 1st, G. Bell's Sir John; 2d, F. Stettenborn's Hesper's Son; 3d, Pottersburg Kennels' Don Phyllis. *Reserve, J. S. Williams's Monarch.* *Very high com., Geo. Wright's Oscar.* *Bitches:* 1st, J. S. Williams's Beulah; 2d, Vanbladiem & Ferguson's Daisy.

GREYHOUNDS.—CHALLENGE—Dogs: 1st, A. W. Purbeck's G-m of the Season. *Bitches:* 1st, N. Q. Pope's champion Cassandra; 2d, Woodhaven Kennels' Spinaway. *Open—Dogs:* 1st and 2d, A. W. Purbeck's Olympia and Ruby. *Open—Bitches:* 1st and 2d, Q. Pope's Old Stone and Highland Donald. *Very high com., Seaton Kennels' Ranger.* *High com., P. Dixon's Dick.* *Com., Harry Habart's Blucher.* *Bitches:* 1st and 2d, A. W. Purbeck's Daisy and Lady of Gainsboro.

FOXHOUNDS.—ENGLISH—Dogs: 1st, J. Gibbs's Genius; 2d, J. Johnston's Rouser; 3d, F. W. Gray's Preacher. *Bitches:* 1st, J. Gibbs's Vexation. *AMERICAN—Dogs:* 1st and 2d, Dan O'Shea's Ranger and Ringwood; 3d, H. B. Nicol's Bingo. *Very high com., H. Hulse, Jr.'s Bruce.* *Bitches:* 1st and 2d, Dan O'Shea's Hasty and Countess.

HARRIERS.—Dogs: 1st, F. L. Mayben's Racer; 2d, D. O'Shea's Dandy. *Bitches:* 1st, withheld; 2d, D. O'Shea's Molly.

POINTERS.—CHALLENGE—Bitches: 60lbs. and over, 1st, Robert Leach's Cleopatra; 2d, Belle Randolph. *Open—Dogs: 1st, W. G. Davey's Westminister Drake. *Bitches:* 60lbs. and over, 1st and 2d, T. G. Davey's Revelation and Lighted Madge. *CHALLENGE—Dogs:* (under 55lbs.) 1st, Wm. H. Hyland's Pommeri Sec. *Bitches:* (under 50lbs.) 1st, Wm. H. Hyland's Fan N. *OPEN—Dogs:* (under 55lbs.) 1st, Wm. H. Hyland's Ossining; 2d, J. & Y. Mackie's Shot; 3d, T. G. Davey's Arlet King. *Very high com., V. L. Francis's Nellie Maud.* *High com., W. G. Cassell's Sally.* *Bitches:* (under 50lbs.) 1st and 2d, T. G. Davey's Lady Gay Sparker and Miss Rumer; 3d, F. W. Shaw's Phantom. *Reserve, W. H. Hyland's Lady Graphic.* *Very high com., S. Holmes's Dodo.* *NOVICE—1st, T. G. Davey's Lighted Madge; 2d, S. Holmes's Dodo.* *PUPPIES—Dogs:* 1st, S. Holmes's Sting. *Bitches:* 1st, T. G. Davey's Bessie Girl; 2d, S. Holmes's Pepper.*

ENGLISH SETTERS.—Dogs: 1st, F. S. Brown's Edge Mark; 2d, T. G. Davey's Lighted Rhinias; 3d, Mount Washington Kennels' Viscount; 4th, H. Northwood's Benzine. *Reserve, Mount Washington Kennels' Tony Gladstone.* *Very high com., G. A. McGillivray's Kennels' Mount Royal Sire and J. E. Hair's Sir Edward.* *High com., A. E. Davis's Forest Tartan.* *Bitches:* 1st and very high com., Mount Washington Kennels' Nia and Nora III; 2d, reserve and very high com., T. G. Davey's Forest Healer, Canadian Lillie and Monk's Fan; 3d, Dr. J. A. Hartman's Nellie; 4th, Mount Washington Kennels' Victress Llewellyn. *Very high com., Sam Holmes's Vic.* *High com., H. Northwood's Forest Gem and 2d, J. Walsh's Scottie Belle.* *Com., D. J. Keely's D-I and M. V. S. Daisy.* *PUPPIES—Dogs:* 1st, R. W. Boyle's Field Marshal; 2d, E. J. Walsh's The Sultan; 3d and very high com., Forest Gem and Forest Prince. *Bitches:* 1st, A. E. Davies's Queen of Fashion.

CUMBERS.—CHALLENGE—Dogs: 1st, Mercer & Middleton's Boss III. *Bitches:* 1st, Mercer & Middleton's Lady Bromine. *OPEN—Dogs:* 1st, Mercer & Middleton's Johnny Junior; 2d, George Bogue Smart's Darby. *Bitches:* 1st, Mercer & Middleton's Lady Jo.

FIELD SPANIELS.—CHALLENGE (over 28lbs.)—Dogs: 1st, Rosedale Kennels' champion Newton Abbott Laddie. *Bitches:* 1st, Rosedale Kennels' Bridford Ruby. *OPEN—Dogs:* 1st, Andrew Laidlaw's Samson; 2d, Brant Cocker Kennels' Brantford Mohawk. *Bitches:* 1st and 2d, Rosedale Kennels' Rosedale Bess and Rosedale Belle. *LIVER—1st, Rosedale Kennels' Beau.* *ANY OTHER COLOR—1st, Andrew Laidlaw's Fancy; 2d, M. H. Douglas's Billy; 3d, T. J. Fitzsimons' Toby.* *Puppies:* 1st, P. J. Keating's Bob; 2d, Rosedale Kennels' Rosedale Scamp.

COCKERS.—NOT OVER 28LBS.—CHALLENGE—BLACK—Dogs: 1st, Andrew Laidlaw's champion Rabbi; 2d, Luckwell & Douglas's Black Duke. *Reserve, Brant Cocker Kennels' Champion Brant.* *Bitches:* 1st, Andrew Laidlaw's champion Miss Obo II; 2d, Andrew Laidlaw's Bessie. *CHALLENGE—ANY OTHER COLOR—1st, Brant Cocker Kennels' Brantford Red Jacket.* *Bitches:* 1st, Luckwell & Douglas's King Pharaoh's Sister. *OPEN—BLACK—Dogs: 1st, Luckwell & Douglas's Black Dufferin; 2d, Andrew Laidlaw's Oboan; 3d, Mitchener & Farwell's Don; 4th, Mitchener & Farwell's Black Brant. *Reserve, Ancient and Modern Spaniel Kennels' Obadiab.* *Very high com., Andrew Laidlaw's Brock.* *High com., F. H. Cunningham's Major Woodstock Cora; 3d, Ancient and Modern Spaniel Kennels' I Say; 4th, Andrew Laidlaw's Cleo II.* *Reserve, Brant Cocker Kennels' Brantford Flirt.* *Very high com., Brant Cocker Kennels' Brantford Topsy.* *High com., Luckwell & Douglas's Woodland Susie and Jealousy.* *OPEN—ANY OTHER COLOR—Dogs:* 1st, Brant Cocker Kennels' Brantford Redman; 2d, H. G. Charlesworth's Nugget; 3d, Andrew Laidlaw's Bessie; 4th, J. E. Leight's Ruby. *Bitches:* 1st, P. J. Fitzsimons' Mollie; 2d, Andrew Laidlaw's Lady of Learning; 3d, Brant Cocker Kennels' Brantford Red Ridinghood; 4th, Brant Cocker Kennels' Brantford Dolly Varden. *Very high com., Edward Richard Marks's Northern Queen, Ancient and Modern Spaniel Kennels' Blushing Rose.* *NOVICE—ANY COLOR—Dogs:* 1st, Brant Cocker Kennels' Brantford Redman; 2d, Mitchener & Farwell's Topsy. *High com., Dr. Henry B. Nicol's Mirza.* *PUPPIES—1st, Mitchener & Farwell's Black Brant; 3d, Geo. H. Alward's Black Robbie.* *Reserve, W. B. Palmer's Ontario.* *Very high com., Jeff Word's Wood Hood.* *High com., H. B. Cooper's Cheevey.* *Bitches:* 1st, Herbert P. Mullins's I Guess; 2d, Andrew Laidlaw's Woodstock Cora; 3d, Ancient and Modern Spaniel Kennels' I Say. *Reserve, Brant Cocker Kennels' Red Ridinghood.* *Very high com., Mitchener & Farwell's Topsy.* *High com., Dr. Henry B. Nicol's Mirza.* *PUPPIES—1st, Mitchener & Farwell's Black Brant; 3d, Geo. H. Alward's Black Robbie.* *Reserve, W. B. Palmer's Ontario.* *Very high com., Jeff Word's Wood Hood.* *High com., H. B. Cooper's Cheevey.* *Bitches:* 1st, Herbert P. Mullins's I Guess; 2d, Andrew Laidlaw's Woodstock Cora; 3d, Ancient and Modern Spaniel Kennels' I Say; 3d, Brant Cocker Kennels' Brantford Red Ridinghood. *Reserve, Andrew Laidlaw's Beatrice.* *Very high com., P. J. Keating's Jennie, Harry Nicol's Jill II.* *High com., Robt. Clark's Yoho.**

PUGS.—CHALLENGE—Dogs: 1st, M. H. Cryer's Bob Ivy. *Bitches:* 1st, M. H. Cryer's Bessie; 2d, Seminole Kennels' Cassia. *OPEN—Dogs:* 1st, Eberhart Pug Kennels' Eberhart's Cashie; 2d, M. M. M. Bantline's Curtis; 3d, J. Broomback's Rowdy. *Reserve, Dr. M.*

H. Cryer's Fritz Emmett. *Very high com., Seminole Kennels' Kash, Jr.* *Bitches:* 1st, Howard Bros.' Satin; 2d and very high com., Eberhart Pug Kennels' Mabel F. and Fannie K.; 3d, M. H. Cryer's Cribbage. *High com., Seminole Kennels' Princess Nellie.* *PUPPIES—Bitches:* 1st, Eberhart Pug Kennels' Peggy Pryde; 2d, Mrs. Webster's Topsy.

TORONTO, Sept. 15.—Judging went on again this morning and the following are the awards made to-day:

BLOODHOUNDS.—1st, Huntington's Jack Shepard; 2d, Mathew's Beauty.

GREAT DANES.—Dogs: 1st, Imperial Kennels' Imperial; 2d, 3d, and 4th, Wolverine Kennels' Favor, Brutus and Pascha II. *Bitches:* 1st, Mount Royal Kennels' Minerva's Fawn; 2d, Wolverine Kennels' Ultima. *Puppies:* 1st, Minerva's Fawn; 2d, Ultima. *Very high com. and com., White's Seigrelda and Pollux.*

IRISH SETTERS.—Dogs: 1st, Seminole Kennels' Seminole; 2d, Douglas's Parnell; 3d, Glenlyne Kennels' Glen Jarvis; 4th, Dunlignan's dog. *Very high com., Pearsall's Erin Lad and Douglas's Larry.* *High com., Seminole Kennels' Elcho and Farmer's Hlawatha.* *Bitches:* 1st, Douglas's Parnell; 2d, Dunlignan's Duchess of Arundale; 3d, Munroe's Goldsmith Maid; 4th, Seminole Kennels' Palmerston. *Reserve, Douglas's Nellie D.* *Very high com., Rex Farmer's Minnehaha.* *High com., Seminole Kennels' Aurora and Pearsall's Lady Alice.* *NOVICE—Dogs:* 1st, Conlon's Rufus; 2d, Pearsall's Erin Lad. *Bitches:* 1st, Seminole Kennels' Rex Palmerston; 2d, Pearsall's Lady Alice. *PUPPIES:* 1st, Douglas's Parnell; 2d, Glenlyne Kennels' Glen Jarvis; 3d, Dunlignan's dog. *Reserve, Boulton's Rufus.* *Bitches:* 1st, Pearsall's Lady Alice; 2d, Campton's Belle; 3d, Quill's Rose Elcho.

BLACK AND TAN OR GORDON SETTERS.—CHALLENGE—Dogs: 1st and 2d, S. G. Dixon's Ivanhoe and Leo B. *Bitches:* 1st, S. G. Dixon's Duchess of Waverly; 2d, L. Campbell's Beauty. *OPEN—Dogs:* 1st, S. G. Dixon's Ivanhoe; 2d, J. L. Campbell's Penderis. *Bitches:* 1st, J. L. Campbell's Dorothea; 2d, C. A. Gibbs's Annie Gordon. *NOVICE—2d and 3d, J. L. Campbell's Penderis and Cherry Ripe.* *Puppies:* 1st, C. A. Gibbs's Annie Gordon; 2d, S. G. Dixon's Lady Waverly; 3d, J. L. Campbell's Penderis.

COLLIES.—CHALLENGE—Dogs: 1st, Seminole Kennels' Roslyn Dandy. *Bitches:* 1st, S. G. Dixon's Metchley Surprise. *OPEN—Dogs:* 1st, McEwen & Gibson's Downy; 2d, A. Burland's Moonstone; 3d, J. Hawkes's Sir Walter Scott III. *Reserve and very high com., Seminole Kennels' Roslyn Conway and Rovedy.* *High com., H. P. Harrison's Toronto Wonder and M. Walker's Walt a Wee.* *Bitches:* 1st, H. P. Harrison's Nancy; 2d, Seminole Kennels' Dot; 3d, W. Rolph's Belle; 4th, A. G. H. Luxton's Reta. *Very high com., T. McNally's Maid of Dundee.* *NOVICE—Dogs:* 1st, John Hawkes's Sir Walter Scott III; 2d, McEwen & Gibson's Eslington; 3d, H. P. Harrison's Toronto Wonder. *Very high com., T. Jackson's Napoleon.* *Com., A. G. H. Luxton's Ross.* *Bitches:* 1st, McEwen & Gibson's Fury; 2d, W. Robertson's Heather Belle; 3d, A. G. H. Luxton's Reta. *Very high com., M. Walker's Beauty.* *PUPPIES—Dogs:* 1st, Seminole Kennels' Scilla IV; 2d, McEwen & Gibson's Eslington; 3d, H. P. Harrison's Toronto Wonder. *Bitches:* 1st, McEwen & Gibson's Fury; 2d, W. Robertson's Heather Belle; 3d, A. G. H. Luxton's Reta.

BULL-TERRIERS.—CHALLENGE—Dogs: 1st, W. Bryson's Dufferin. *Bitches:* F. F. Dole's Starlight. *OPEN—Dogs:* 1st, F. F. Dole's Starlight; 2d, Henry Wright's Ben Battle. *Reserve, H. F. Church's Prince Bendigo.* *Very high com., Toon & Symonds' Common and King of Hearts.* *High com., Dan O'Shea's Royal, John Moorhead, Jr.'s Mister Dick and Arch, Inglis's Buxton Baron.* *Bitches:* 1st, A. T. Wilgess's Grove Duchess; 2d, F. F. Dole's Edgewood Fan; 3d, Toon & Symonds' Queen of the Dale. *High com., G. Jordan's Heb.* *Puppies:* 1st, R. Right's Duke; 2d, F. F. Dole's Belle of Edgewood.

DACHSHUNDS.—Dogs: 1st, E. A. Mammie's Windrush Rioter; 2d, J. Lewis's Fidelity. *Very high com., T. F. Fitch's Beauty.* *What's That?* *High com., W. E. Mackay's Bismarck.* *Bitches:* 1st, B. F. Lewis's Gilt; 2d, J. Lewis's Lina L. *Very high com., J. H. Ames's Nellie.*

BEAGLES.—CHALLENGE—Dogs: 1st, Hornell-Harmony Kennels' champion Royal Krueger. *Bitches:* 1st, Hornell-Harmony Kennels' Tricotrin; 2d, H. L. Kreuder's Roy K.; 3d, John Sam-llie's Rose; 4th, A. B. Cooper's Tallyho. *Bitches:* 1st, Hornell-Harmony Kennels' Eli; 2d, Dan O'Shea's Ruby; 3d, John Smellie's Periwinkles. *Puppies:* 1st, Henry B. Nichol's King Krueger; 2d, Hornell-Harmony Kennels' Guy.

Best beagle under 12lb., Hornell-Harmony Kennels' Ava W.

FOX-TERRIERS.—Dogs: 1st and 3d, D. Munro's Dobbin and Starden's Jack; 2d, J. K. Macdonald's Blemton Trump. *Reserve, Mt. Washington Kennels' Diver Third.* *Very high com., Toon & Symonds' End of the Spire.* *H. N. Wood's Painter.* *D. Munro's Woodland Riva.* *High com., Ancient and Modern Spaniel Kennels' Nobody's Child.* *Bitches:* 1st, D. Munro's Ebor Nellie; 2d, Mount Washington Kennels' Rowton Safety; 3d, Toon & Symonds' Venus. *Reserve and very high com., D. Munro's Woodale Radiant and Woodale Refusal.* *PUPPIES—Dogs:* Prizes withheld. *Bitches:* 1st, Mt. Washington Kennels' Rowton Safety; 2d, D. Munro's Woodale Radiant. *Wren-Harmon—Dogs:* 1st, withheld; 2d, Toon & Symonds's Barton Sine. *Very high com., R. Munro's Stanley.* *High com., P. J. Smyth's Sly Boots, Battersby Kennels' Adswold Jim II.* *Bitches:* Prizes withheld. *NOVICE (smooth and wire-haired)—Dogs:* 1st, Ancient and Modern Spaniel Kennels' Nobody's Child; 2d, J. Bryce's Live Boathan Spice; 3d, P. J. Smyth's Sly Boots. *Very high com., C. F. Wagner's Gen. Grant II.* *Bitches:* 1st, Mt. Washington Kennels' Rowton Safety; 2d, A. D. Stewart's Suffolk Riot. *Reserve, G. W. Prescott's Lady Zig-Zag.* *High com., P. J. Smyth's Lady Belle, G. W. Prescott's Dot.*

IRISH TERRIERS.—Dogs: 1st, Toon & Symonds's Jack Briggs; 2d, E. L. Lally's 3d, Scott's Boy or Girl. *Bitches:* 1st, Toon & Symonds's Exile; 2d, E. Lever's Kathleen.

DANDIE DINMONTS.—Dogs: 1st, E. Brooks's King o' the Heather; 2d, C. J. Daniels's Valentine; 3d, J. Butterfield's Goyon. *Bitches:* 1st, C. J. Daniels's Fan.

BEDLINGTONS.—Dogs: 1st, Norman Baldwin's Plea; 2d, David Pockess's dog; 3d, Dan O'Shea's Sir George. *Bitches:* 1st, William Morris's Jerry; 2d, Dan O'Shea's Zulu; 3d, Allen Treblecock's Nettie.

BLACK AND TAN TERRIERS.—CHALLENGE.—Bitches: 1st, Rochelle Kennels' Meersbrook Maiden. *OPEN—Dogs:* 1st, Rochelle Kennels' Broomfield Sultan; equal 3d, G. R. Howard's Buffalo Rex and Miss Lizzie Wright's Rochelle Scott. *Bitches:* 1st, Anglo-American Terrier Kennels' Matchless; 2d, Rochelle Kennels' Ench Lady; 3d, A. F. Elmer's Gino. *Very high com., Dan O'Shea's Merry.* *Puppies:* 1st, Rochelle Kennels' Rochelle Carmichael; 2d, Geo. Jack's Rex.

YORKSHIRES.—CHALLENGE—1st and 2d, Anglo-American Terrier Kennels' Toon's Royal and Venus. *OPEN—Dogs:* 1st, Anglo-American Terrier Kennels' Toon's Royal Gem. *Bitches:* 1st, A. G. White's Miss Halifax. *High com., Anglo-American Terrier Kennels' Tot.*

SPECIALS.—Spaniel Club Cup, Luckwell & Douglas's Black Dufferin. Kennel of Clumbers, Clumber Kennels; cockers, Laidlaw; field, J. F. Kirk. Money awards follow in rotation.

GREENVILLESHOW ABANDONED.—Greenville, S.C., Sept. 9.—*Editor Forest and Stream:* Please announce through your columns that the South Carolina Kennel Association will not hold a bench show in January as previously intended.—F. F. CAPERS, Sec'y.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

A. J. M., Waterville, Me.—1. The address of the A. K. C. is 44 Broadway, New York. 2. For particulars about Chief address Mr. Max Wenzel, Hoboken, N. J.

F. A., Brockton, Mass.—A, B and C engage pups of me in the order named. Am I obliged to give A his pick, or can I sell to B and C, who come first, as long as I reserve a pup for A? Ans. A is entitled to pick of litter, and if he does not choose it when ready to wean, you should pick out what you consider the best and notify him of the fact, then sell to the others in their order.

W. G. C., Reno, Nevada.—I have an English water spaniel dog, about 14 months old, subject to fits. About the first of May I let him go in swimming in the Truckee River before he had his breakfast. After swimming around for about ten minutes he came out and the day being very warm we walked slowly away. In about five minutes he was taken with a severe fit, and after recovering he seemed to be all right, although quite so minutes. To-day he had the second fit, although quite so severe and under exactly similar circumstances. Occasionally his breath smells horribly, but it don't seem to last but a few minutes at a time. He is fat, not corpulent, and is well taken care of. He also has very red eyelids and part of the eyes are in a similar condition. He is very active, affectionate and bright, and if you can suggest any remedy to fit his case would be greatly obliged. These fits do not seem to leave any apparent bad effects, his scenting powers do not seem to be affected in the least. Ans. Give an aperient (say two compound colic pills) once a week and the following mixture: Pot. bromid., 2 drachms; liq. arsenicalis, 48 minims; water, 3 ounces. One dessertspoonful three times a day. Keep the dog as quiet as possible, do not take him out for exercise and do not let him get excited in any way. Feed on sloppy foods as much as possible.

Rifle and Trap Shooting.

RANGE AND GALLERY.

BROOKLYN VS. WASHINGTON.

WASHINGTON, D. C., Sept. 12.—The Twenty-third regiment rifle team accomplished two things to-day. They walked the brigade team of the District national guard and made the next highest score that was ever made on a rifle range. In 1885 the Massachusetts rifle team made the score of 1,091. To-day the Brooklyn boys made 1,089, beating the national capital pets by 104 points, the latter making 985. The contest took place on the United States arsenal grounds this afternoon and was witnessed by 5,000 people, many regular army and navy officials being present. Captain Lancaster of the Third United States artillery acted as range officer. Colonel Partridge was present and looked after the interests of the Brooklynites, while Brigadier General Albert Ordway was on hand to cheer the Washington soldiers. The Brooklyn team was composed of Captain John S. Shepherd, Private S. C. Pirie, Sergeant H. D. Hamilton, Sergeant R. Findlay, Lieut. F. A. Wells, Sergeant George T. Musson, Corporal George Ball, Lieut. Joseph T. Hull, Captain E. De Forest, Lieut. G. F. Hamilton, Corporal H. McField and Lieut. Wm. P. Pickett. Major Haywood O. Brown was team captain and Ordnance Sergeant Chas. E. Bryant was busy in assisting him.

The Washington team was made up of Major Pollard, Captain W. L. Cash, Captain James F. Bell, Lieut. Geo. H. Harries, Lieut. J. M. Stevens, Lieut. F. L. Graham, Commissary Sergeant Chas. H. Laide, Sergeant A. O. Hutterly, Private Himebaugh, Private Walter S. Cash, Sergeant R. B. Smythe, Private C. W. Dickey, Colonel Clay and Lieut. Vale were alternates. The following is the score:

Brooklyn Team.	200 yds.	300 yds.	600 yds.
Shepherd.....	544435-28	445555-33	451555-33
Pirie.....	445435-29	043545-20	545435-29

335.....	334.....	296-985	

The Brooklyn team used the Remington rifle, and the Washington team the Springfield. In the evening the Brooklyn boys enjoyed a banquet at the Everett House. M. B. F.

RENSSELAERWYCK.

The annual meeting of the Third Brigade will be held at Rensselaerwyck, between Albany and Troy, Oct. 1 and 2. The programme will include:

Match No. 1. Short Range Continuous Military Match.—Open to all comers, except as to the first prize, which can only be won by a member of the Third Brigade, 200 yds., 5 shots, re-entries unlimited, the aggregate of the best two scores to count, standing and off-hand, any military rifle.

Match No. 2. Standard American Target Re-entry Match.—This match will be shot from the house and on the 11-inch blank center, open to all comers, 200 yds., 5 shots, standing and off-hand, any rifle.

Match No. 3. Mid-Range Continuous Military Match.—Open to all comers, 500 yds., at second class target, 5 shots, unlimited re-entries allowed, the aggregate of the best three scores to count for three places, best two scores for all below, any position, any military rifle.

Match No. 4. Carton Match.—Open to all comers, 500 yds., on second class target, 11-inch carton to count 6, 15 shots, unlimited re-entries, one score only to count, any position, any rifle.

Match No. 5. Colt's Target Revolver Match.—Open to all comers and to revolvers only. Distance—30 yds. on the standard American target reduced. Number of shots 5, unlimited re-entries allowed, aggregate of the best three scores to count, each score to be completed before counted. Position standing, off-hand, use of one arm only allowed, revolver not to exceed 8 lbs. in weight, maximum length of barrel (exclusive of chamber) 3 in., open sights. Ammunition, any. Cleaning allowed between scores only. Revolvers must not be loaded until the competitor has taken his position at the firing point; the muzzle must always be kept in a vertical position or pointed toward the target.

Second Day.—Match No. 6. Third Brigade Team Match.—Open to teams of 8 commissioned officers or regularly enlisted soldiers from any battalion or separate company of infantry in the Third Brigade N. G. S. N. Y., 200 and 500 yds., 5 rounds at each distance, standing at 200 yds., any position with head to the target at 500 yds., Remington rifle, New York State model.

The fall meetings of the Third Brigade Rifle Association have for years been the most successful meeting of riflemen held in this State. The Rensselaerwyck range is very accessible and well equipped; it is intended that the fourteenth annual meeting will maintain the reputation of the range.

The rules of the National Rifle Association, so far as applicable, will govern.

Communications may be addressed to Buel C. Andrews, Secretary, Third Brigade Rifle Association, 14 North Pearl street, Albany, N. Y.

NEWARK, Sept. 8.—An interesting team match took place to-day on the range of the Newark Shooting Society at Schützen Park, the team representing the Empire City defeating the Jersey team. Two years ago B. Walther and M. Dorrier, of New York, beat W. Hayes and E. C. Watts, of this city, with 85 points to spare. The conditions of yesterday's match were 50 shots each man, the New York team firing the Newark shooters an allowance of 85, position off-hand, distance 200 yds., German ring target. M. Dorrier, of the Zettler Rifle Club, shot in fine style, although he did not do as well as on Saturday in the California telegraph match. B. Walther also did well, while W. Hayes was only one point behind Dorrier's score. The result in strings of 10 shots was: Zettler Rifle Club, 219, 218, 219, 218, 219, 218, 219, 218, 219, 218; average 20.74. M. Dorrier, 219, 218, 219, 218, 219, 218, 219, 218, 219, 218; average 20.74. Grand total, 2,126. Newark Shooting Society, W. Hayes, 220, 226, 224, 217, 201; total, 1,088; allowance 21.76. F. C. Watts, 170, 180, 188, 175, 167; total, 880; average 17.60; allowance 35 points; grand total, including allowance, 2,053.

ZETTLER VS. SAN FRANCISCO.—New York, Sept. 13.—*Editor Forest and Stream:* The following are the scores of the teams of 15 men each in the telegraphic match between the San Francisco Rifle Club and Zettler Rifle Club, of New York. Fifty shots each, on German ring target, distance 300 yds.:

Zettler Team.	1054	California Team.	950
F. C. Ross.....	1054	J. E. Klein.....	950
C. G. Zettler.....	1026	J. Dombier.....	985
F. C. Watts.....	1041	Dr. Rogers.....	989
W. Hayes.....	1069	Rohrli.....	1007
B. J. Coppersmith.....	1007	A. Strecker.....	1020
F. Ambrust.....	1001	J. Meyer.....	1033
R. Zettler.....	982	E. Hovey.....	1038
M. B. Engel.....	935	F. O. Young.....	1043
J. A. Boyken.....	1017	Kuhls.....	1044
G. Zimmerman.....	1046	J. Utschig.....	1049
R. Walther.....	1118	A. Johnson.....	1048
G. W. Plaisted.....	1063	George Helm.....	1051
H. Holges.....	1060	Kühne.....	1070
		H. E. Brown.....	1072
		W. McLoughlin.....	1082

The Zettler Club shot under the most miserable weather conditions, while the California team had a fine day. The former club's representative was Major A. F. Klose, of San Francisco. The Western team was represented by W. Hayes, of Newark.—F. HECKING, Cor. Sec'y, Zettler Rifle Club.

A NEW STEVENS RIFLE.—After much consideration the J. Stevens Arms & Tool Co. has decided to place on the market a new rifle, which has been produced to meet the demand for a very cheap but thoroughly accurate, well-made rifle in extremely light weight, intended chiefly for boys. Although this rifle has been styled a boy's rifle it is particularly adapted to the use of ladies desiring a very light weight arm, as well as for anglers, bicyclists, tourists and those who wish a rifle of the lightest weight, greatest compactness and portability, possessing accuracy equal to any rifle and at an astonishingly low price. The

rifle will be stamped and known as "Sure Shot." It weighs about 3½ lbs., has a 20 in. barrel, is 22 cal., and takes a 22 cal. rim-fire cartridge; either a long rifle, short, conical, or BB Flobert cartridge. The barrel can be easily detached and the rifle packed in a very small space. The stock is of black walnut. The action outside is nickel-plated, the hammer and barrel are blued. The shooting of the "Sure Shot" rifle will be found to be of the highest order; in fact one of the objects is to produce a rifle equal to the best in accuracy, but less elaborately finished than the finest rifles in order to bring the new rifle within the limited means of the boy.

BIG GUNS.—Uncle Sam's rifled cannon cost a pretty penny. The contract prices for guns are as follows: Twenty-five 8 in. guns of the above mentioned character at a cost of \$17,246.55 each; 50 10 in. guns of same character at a cost of \$35,747.58 each, 25 12 in. of same character at a cost of \$54,473.22 each. The first of the 8 in. guns is to be delivered in two years, the summer of 1893, the remaining 24 to be delivered at regular intervals, the last being delivered within seven years of the acceptance of the first sample gun. The first of the 10 in. guns is to be delivered in two years and two months, the remaining 49 to be delivered at regular intervals within nine years and six months of the acceptance of the first sample gun. The first of the 12 in. guns is to be delivered within three years and the remaining 24 to be delivered at regular intervals within nine years from the acceptance of the first sample gun. The whole contract therefor will not be completed till the expiration of 12 years, or about 1903.

THE PITCHER RIFLE.—Chicago, Sept. 11.—The officers and soldiers at the Fort Sheridan Range witnessed the testing of an automatic repeating rifle yesterday that bids fair to revolutionize both naval and land warfare. The gun is the invention of Dr. H. A. Pitcher, of Neillville, Wis. It becomes automatic by the utilization of the gas produced by the combustion of the first cartridge fired. The gas escapes into a chamber and acts on a piston that is set against a spiral spring, the recoil of which propels the piston back against a rod that sets the mechanism of the gun in motion, the empty cartridge being removed and replaced by a loaded one, also cocking the gun. The best record yesterday was eight shots in five seconds. It is intended to apply the principle to heavy guns for use in naval warfare in propelling torpedoes, and as a machine gun. The Army Board will investigate the merits of the gun at their meeting at New York next month.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 15-17.—Knoxville, Tenn., Inter-State Manufacturers' and Dealers' Association.

Sept. 15-17.—Dayton, O., Second Annual Tournament. Open to the world. First two days inanimate targets. Last day spar-shooting. Address W. Scott McDonald, Fifth and Ludlow streets, Dayton, O.

Sept. 23-24.—Baltimore Gun Club Tournament, at Acton's Park, Baltimore. For particulars address W. H. Linthicum, No. 15, St. Paul street.

Sept. 29-Oct. 2.—First Annual Tournament of the Pennsylvania State Sportsmen's Association, Williamsport, Pa. Targets and live birds. N. A. Hughes, Sec'y.

Oct. 1.—Rochester Rod and Gun Club Open Tournament. There will be at least two guaranteed prizes, all surplus added; one or two merchandise shoots, and sweetestake shooting all day. Rapid firing system. Address H. D. McVean.

Oct. 5-6.—Washington (D. C.) Rod and Gun Club Tournament. A. McCormick, 1015 Pennsylvania avenue, N.W.

Oct. 13-15.—Staunton (Va.) Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association.

Oct. 21-23.—Reading's Tournament, Flemington, N. J. Key-stones. Open to all.

Oct. 27-29.—Savannah, Ga., Chatham Gun Club, assisted by the Inter-State Manufacturers' and Dealers' Association.

CENTRAL ILLINOIS.

FOLLOWING is the record of the meeting of the Central Illinois Sportsmen's Association, at Jacksonville, Aug. 25-27. Matches shot at blue-locks, 16 and 18 yds. Weather good, and meeting in general a successful one. Ties div. unless noted.

DETROIT INTERNATIONAL TOURNAMENT.

The tournament held near Detroit last week was far from being the success it deserved, the attendance being very slim. The fair was in complete hands, and the managers, Messrs. Penrose, Parker, Gillman and Barnes deserved better patronage. The island of Des-chu-shos-ka, on which the tournament was held, is a lovely spot in the river eight miles below Detroit. It comprises something like 2,500 acres, 1,900 of which is ducking marsh, the balance farm and orchards. The hotel upon the island is managed by Gilman and Barnes, both thorough sportsmen, and they treated the visiting sportsmen in a right royal manner.

The badge presented by them for the international contest was a handsome trophy and cost \$150. The attendance on the day of the badge contest numbered upward of 600, and a more enthusiastic audience never was seen at a pigeon contest. The winner, Louis T. Duryea, is one of the most popular sportsmen in the East, and his friends throughout the country will be heartily pleased to hear of his success. Messrs. Gilman and Barnes are not at all put out at the non-success of their first annual, and declare that next year they will offer such a programme that will draw the largest gathering of sportsmen ever known, and they deserve to.

No. 1, 10 single Keystones, entrance \$1: D. Smith 10, Waruf 9, Sanford 8, W. W. Essig 7, Parker 8, Penrose 8, Donaldson 8, D. Leitch 8, Walton 10, Davenport 7, Butler 10, Small 10, Hastings 8, Wendt 9.

INTERNATIONAL YACHT RACING.—Those who are acquainted with the spirit and pluck of Mr. Bayard Thayer will readily believe the rumor that he intends to cross the Atlantic next season in his new purchase, Constellation, and challenge for the two American cups now held by British yachts. One of these the Brenton's Reef cup, is now held by Genesta, 81ft.-l.w.l., 15ft.

most certainly did, and a day of unequaled sport was enjoyed under the favorable conditions of wind and light. Gold coin match, 20 Keystone targets, squad system of firing, 5 traps, sixth competition: Bowker 19, Black 17, Adams 16, Hosmer 16, Rule 16, Warren 16, Bennett 15, Gore 15, Stone 15, Snow 14, Brown 13, Nichols 11, Perham 9.

THE RIGHT OF WAY AT A MARK.

THE following comments of the *Field* on the recent Volunteer-Gracie collision are so extraordinary, and betray such an ignorance of the Y. R. A. rules, that only one conclusion can be drawn: the editor was enjoying a vacation, and that his pen had fallen into less competent hands, which, in their haste to find fault with the New York Y. C. have made most inexcusable blunders. Mr. Dixon Kemp has long been recognized as an authority on all questions of the interpretation and construction of racing rules, and the long chapter on the subject in his *Yacht and Boat Sailing* is the best, in fact the only guide, outside the bare codes of racing rules of the various clubs. The *Field* says: "The American rule on this point is as follows: 'If an overlap exists between two yachts when both of them, without tacking, are about to pass a mark on the required side, then the outside yacht must give the inside yacht room to pass the mark,' by luffing up (short of tacking)." The contention of the Volunteer is, we understand, that the Gracie could not have weathered the mark by luffing and shooting round it, as she was heading too far to leeward of it; the Gracie people, on the other hand, allege they could have done so. Some months ago we called attention to this rule, and pointed out the difficulty there would be in determining which yacht was in the right if it came to a close thing at a mark. It seems to us clear, however, that the rule would be strained if it is interpreted to mean that a yacht is in a position to pass a mark without tacking if she cannot do so without luffing nearly head to wind and shooting past it. When a vessel close under the lee quarter of another is heading down and downwind, and the latter puts the weather yacht in a very awkward position, as most likely, if the weather yacht luffs also, she will, instead of avoiding a collision, bring one about; and supposing the yachts are abeam, the situation even then is very awkward for the windward yacht, if the one to leeward finds, after all, that she is obliged to tack. The Y. R. A. rule allows a leeward yacht to hall the one to windward to go about to enable her to clear the mark, which is not a mark in the proper sense, although this plain and easily complied with rule may in some cases create an injustice, we infinitely prefer it to the amateurish, hair splitting rule of the New York Y. C.

The meaning of the final sentence is very hard to fathom, but in so far as it infers that there is any practical difference between the Y. R. A. rule and the "very amateurish and hair splitting" rule of the New York Y. C., the writer is entirely at sea. Although these two sets of rules are somewhat different in arrangement and in certain details, in the wording, they are so nearly identical in application that the case might as easily be judged under one as the other. The New York Y. C. rules, which are identical with the very careful revision made in 1887 by the Seawanhaka Corinthian Y. C., the most thorough and complete work of the kind ever done by any club, are more explicit on certain points than the Y. R. A., and the divisions of the various rules are more clearly defined. The rule is the same. Two important points explicitly mentioned in them and not in the Y. R. A. rules are that a yacht is not entitled to the rights of a new tack until she has actually filled away on it; and that a mark of the course is never an obstruction to sea room such as is mentioned in the rules.

Section 14 of rule XVII., quoted above, appears in the Y. R. A. rules as rule 19, "When rounding any buoy or vessel used to mark out the course, if two yachts are not clear of each other at the time the leading yacht is close to an actually rounding the mark, the outside yacht must give the other room to pass clear of it, whether it be lee or weather yacht which is in danger of fouling the mark." Read in connection with the definitions of an overlap which form part of both rules, section XVII. in the former; but this important point, that a yacht cannot compel another to tack in order to give room at a mark, is fully covered elsewhere in the Y. R. A. rules, as is clearly stated in *Yacht and Boat Sailing*, at the head of page 192 and again on page 200, while a decision of the council of the Y. R. A. to the same effect is quoted on page 214.

The actual position of the two yachts is shown in the diagram on page 191 save that the tacks are reversed and the pier in the figure would represent the Block Island markboat, A being Gracie and B Volunteer, and A being far enough to windward to leave at least a doubt as to whether she could squeeze by.

The question of the right of the inner and leeward vessel to get by the mark by means of a "pilot's luff" or an "Albany luff," is as likely to arise under one set of rules as the other; and unfortunately is as far from an official settlement as before the collision in question. While there may be grounds for an argument, we believe that the right exists in each case.

It is generally admitted that no vessel may compel another to give her room to tack by a mark of the course; but inferentially the right to extend up to the point of tacking. Under the New York rules, a yacht is not considered as having tacked until she has actually filled away on the new tack, and under no rules would a yacht be considered as having tacked when she could still fill away on her original course, as in a "pilot's luff."

In order to apply a rule, it is absolutely necessary that there shall be some fixed point; and in the present case the only tangible mark would be that between the two tacks. If the rule read that the weather yacht should luff as high as she could, it would be worthless in a case like the present one, as the limit of luffing is not capable of proof. It may be urged that the same difficulty exists as to tacking, but the case is by no means as bad. In the present instance, had Volunteer given ample room in answer to Gracie's hail, and had the latter gone by the mark without touching it on the one tack or tacking on the other, it would have been a plain case of foul play on the part of the latter, and to get it. Had Gracie, however, fouled the mark in the endeavor to squeeze by, she would have been disqualified; and further, had she tacked in order to avoid fouling the mark, she would or certainly should, have been disqualified for wrongly compelling another vessel to tack. The most difficult case which could arise would be as in the present one, where the windward yacht tacks, and the leeward yacht, however, the case is much the same as in the right of way of tacking, and other hard cases which may come up under various rules, in which it is often a most difficult matter to say who is right unless ample evidence from impartial spectators is available. The inner vessel in hailing for room assumes the same risk and responsibility which she does in hailing for room to tack, and an obstruction to sea room; or in extending on port or starboard across another's bow.

The objection urged by the *Field*, that awkward positions might result, carries no weight of itself, as it applies equally well to such established rules as that of port and starboard tack, in which a little crowding of the rule or an error in judgment may bring about serious results; and in fact a foul may result at a mark under any rule.

While the combination of circumstances is one that does not arise very often, still it has come up twice in twelve months, and once in connection with the most important prize of the year. As we pointed out last winter, the matter should be settled at once beyond any further question; and though yacht clubs and committees are not given to deciding imaginary or hypothetical cases, it would be much easier to reach a conclusion in such a case now than when it may come up in earnest with a valuable prize at stake and more or less feeling on each side.

All racing rules recognize the right of an overlapping yacht to room at a mark so long as she is off the wind, reaching, or even closehauling; and at the same time deny the right of a yacht to call for room to tack by a mark, though granting it in the case of an obstruction to sea room. The only point that is not clearly stated, or at least is not undisputed, is where this right ends; and this question should be settled beyond all doubt before another season opens.

The following letters, which have a very important bearing on the Volunteer-Gracie case, were not made public until after the decision which we published some weeks since was announced; we give them now in order to make our history of the case as complete as possible.

YACHT VOLUNTEER, Aug. 7, 1891.

To the Regatta Committee, N. Y. Y. C.

GENTLEMEN:—I beg to make the following statement for my reason for protesting the Gracie in to-day's race. When the Volunteer was approaching the Block Island mark on the starboard tack, the Gracie was on our lee. The Gracie found she could not weather the mark and hailed us saying she must tack. I instantly replied she had no right to tack and force us around. The Gracie commenced to tack, I directed the sailing master to luff and he did not until the head sails of the Gracie were beginning to fill on the port tack. The boats were of necessity close together and were in contact. Yours respectfully,

CHARLES J. PAINE.

ON BOARD YACHT GRACIE.

NEWPORT HARBOR, Aug. 7, 1891.

To the Regatta Committee, New York Y. C. on board *Electra*.

SIR:—I beg to submit my protest against the action of the yacht Volunteer in fouling my yacht Gracie as she attempted to round the Block Island buoy on her port tack on this 7th day of August, during the race for the Golet cup. I base my protest on paragraphs 7, 14 and 16 of rule 17 of the racing rules of the New York Y. C., having already in compliance with rule 19 of said racing rules displayed flag B of the club signal code, known as the "protest flag," and having kept such flag flying till answered by the flag of the answering pennant. I will submit a statement of the facts constituting the protest and I would ask a statement of the facts constituting the protest not to interfere in any way with the Volunteer winning the cup for schooners in this race but merely to establish the right of my conduct and to protect my legal position. I am respectfully,

JOS. P. EARLE.

PHILADELPHIA MODEL Y. C.—The fall season of the Philadelphia Model Y. C. opened on Labor Day, with a second class match for the Bates cup, which must be won three times before it becomes private property. Five models were entered, but only four started: Viking, Dr. George A. Koenig; Acme, Wm. Porter; Phantom, Capt. T. E. Biddle; La Valgiene, Ed. W. Fowler. Each model was sailed by its owner. The course lay east and west, with the wind blowing from west by north, strong breeze. The length of course was one-eighth of a mile to windward and return. The P. M. Y. C. divide the races into rounds, with five minute intervals between each round, the round ending when the second boat crosses the line. Both first and second boats score, the first boat scoring two points and the second one point. The sailing is continued for two hours, and the boat having the largest score at the expiration of that time is declared the winner. The race was started at 3 P. M. Score as follows:

First Round.			
Viking.	Min.	Score.	La Valgiene.
.....	7	210
Second Round.			
Phantom10	2	La Valgiene.....11
.....	10	2	Viking.....11
Fourth Round.			
Viking12	2	La Valgiene.....12½
Fifth Round.			
Viking9	2	La Valgiene.....10
Sixth Round.			
La Valgiene13	2	Viking.....13½
Seventh Round.			
La Valgiene10	2	Viking.....10½
Eighth Round.			
La Valgiene13	2	Viking.....14½

La Valgiene scored three firsts and four seconds, making ten points; Viking scored three firsts and three seconds, making nine points; Phantom and Acme made two and three points respectively. Phantom sustained a severe fall on her way to the lake, starting her keel and opening one seam; she withdrew after the fifth round. The models were all 30in. in length over all, 27½ to 28in. on waterline. The race was very exciting from start to finish, and was enjoyed by a large number of people. There were but three fouls during the day. There will be a race each Saturday and Thanksgiving Day, each class racing in its proper turn, first Saturday, first class; second Saturday, second class, etc.

MOSQUITO FLEET Y. C. REGATTA, SEPT. 7.—The open regatta of the Mosquito Fleet Y. C. of South Boston was sailed on Labor Day in a N.E. storm, with rain in plenty and a two-reef breeze, a number of the twenty-five starters coming to grief. Wapiti carried away her mast, Gracie also lost hers, Annie lost her rudder and was steered through the race with an oar. Tantom sprung her bowsprit, and several capsized. White Fawn was disqualified for fouling a mark. The times were:

FIRST CLASS—21 AND NOT OVER 25FT.

Grace, D. Smith12.11	dismasted.	

The judges were Messrs. W. T. Fisher, T. A. Maguire, J. F. Barry, M. W. Ransom, W. O. Elliott.

SIPICAN Y. C.—The 16th open sweepstake regatta of the Sipican Y. C. was sailed at Marion, Sept. 5. The courses were: Second Class—From Judges' yacht, leaving Nye's Ledge and South East Ledge buoys on port, to Judges' yacht, 15 miles. Third and fourth classes—From Judges' yacht, leaving Bow Bells and South East Ledge buoys on port, to Judges' yacht, 3 miles. Fifth class—From Judges' yacht, leaving Seal Rock Buoy, stakeboat off Phantom Island, Judges' yacht, Seal Rock Buoy and stakeboat on port, to Judges' yacht, 7 miles. The weather was cloudy, but there was a fresh N.E. breeze. Anonyma sailed a wonderfully good race in the second class. In the third class Tycoon did well. Daisy, in the small class, was the fleet going to windward, but was overrun. Purple was disabled by carrying away her mast. In the fourth class Edith and Charmion ran best, but Charmion was not in it in the windward work, in which Cat and Squall did best. Worry sailed well in the fifth. The summary:

SECOND CLASS—CATS.			
Anonyma, F. L. Dabney	Length.	Elapsed.	Corrected.

Judges' Dr. J. S. Whiting, J. H. Clark, Jr., W. A. Andrews.			

BEVERLY Y. C. 178TH REGATTA.—A Marblehead, Sept. 5.—Course No. 1, distance 10½ miles, weather thick, wind good S.E. at start, lighter at finish.

FIRST CLASS.

Fancy, C. F. Lyman, Jr.	Length.	Elapsed.	Corrected.
Hawk, Gordon Dexter38.00	2 15 50	2 14 37
.....	38.07	2 21 21	2 20 31

One hundred and seventy-ninth regatta, open race, Monument Beach, Sept. 7.—Courses: Second class, No. 2, 10½ miles; third class, No. 7, 8½ miles; weather very thick, blinding rain; wind N.E., very strong.

SECOND CLASS.			
Anonyma, F. L. Dabney, B. Y. C.	Length.	Elapsed.	Corrected.
Defiance, H. E. Perry, Mon. Beach23.04	2 03 45	1 53 07
Surprise, Thos. Codman, B. Y. C.27.04	2 06 31	1 55 47
Widgeon, M. Williams, Jr., B. Y. C.26.10	Withdrew.	
THIRD CLASS.			
Parole, W. H. Davis, B. Y. C.22.08	2 04 17	1 52 13
Puzzle, Wm. Amory, Jr., B. Y. C.22.00	2 07 05	1 55 06
Daisy, H. S. Horton, B. Y. C.22.00	2 12 11	1 58 12
Elna, J. Parkinson, B. Y. C.22.10	Withdrew.	

Boats from a distance were unable to get up owing to the calm of the morning, and the exceedingly nasty weather and blinding rain reduced the starters from twenty-five to eight. All the boats came home reefed, most of them with every reef tied in, but Parole gave a wonderful exhibition of lugging sail by getting over the course under a single reef. Anonyma had race well in hand, but lost it by over confidence at finish. Winners: First prize, class two, Defiance; class three, Parole; second prize, class two, Anonyma; class three, Puzzle. Judge: W. Lloyd Jeffries.

ROYAL CANADIAN Y. C. PRINCE OF WALES CUP.—The annual race for the Prince of Wales cup, open to yachts of the Royal Canadian Y. C., was sailed on Sept. 8 over a 15-mile triangle, two rounds, off Toronto. Only two yachts started, the 70ft. schooner Oriole and the 46ft. cutter Vreda, the cutter receiving an allowance of 17m. 23in. in the 30 miles. The wind was moderate, freshening at times, but rather favoring the smaller boat. The times were:

Vreda	Elapsed.	Corrected.
.....	5 41 00	5 23 46
Oriole5 37 32	5 37 32

JEFFRIES Y. C. OPEN REGATTA, SEPT. 12.—The annual open regatta of the Jeffries Y. C. was sailed on Saturday off the club house, East Boston, in a fresh S.W. wind. The times were:

Pilgrim, A. Bartlett.....	16.27	Withdrew.	

OWEENE AND ALBORAK.—On Sept. 10 a private match was sailed off Marblehead between Owenee, Mr. A. B. Turner, and Alborak, Mr. J. B. Palmer, in order to test times in the new boats made in the latter boat. The course was from off Marblehead Rock, around Harding's bell buoy, 12½ miles to windward and return. The start was given at 11:45. Owenee sailed by Capt. Chas. Barr, going over at 11:46:26, while Alborak, steered by Capt. Hank Haft, crossed at 11:47:34. On the first tack off shore a slight shift of wind helped Owenee a little, but she was gaining steadily all the way, both in pointing and footing, the weather mark being Owenee 2:00:00, Alborak 2:08:30. Owenee had gained 7m. 2s., which lead she held in running home, the full times being:

	Start.	Finish.	Elapsed.	Corrected.
Owenee.....	11 46 26	3 21 34	3 35 08	3 34 08
Alborak.....	11 47 34	3 30 00	3 42 26	3 42 26

Mr. Geo. A. Stewart acted as judge.

HULL CORINTHIAN Y. C.—The sail-off for the championship of the Hull Corinthian Y. C. took place on Sept. 10 in a S.E. breeze, the times being:

	Length.	Elapsed.	Corrected.
Madge, W. H. Thayer.....	19.11	1 41 39	1 18 82
Egeria, R. D. Ware.....	19.11	1 42 58	1 19 51

The judges were C. V. Souther and F. H. Smith.

VIATOR AND REBECCA.—On Sept. 12 a match race was sailed between the keel schooner Viator, W. G. Brokaw, and the centerboard schooner Rebecca, F. M. Hansling, over the Captains Island course of the Larchmont Y. C., with Messrs. Scott and Sarony as judges. The wind was light from S.W. The times at Captain's Island were:

	Start.	Finish.	Elapsed.	Corrected.
Viator.....	3 36 37	6 13 16	3 36 39	3 33 39
Rebecca.....	3 35 37	6 13 36	3 37 59	3 37 59

"WHO WON?"—The 1891 edition of Capt. Summers's standard book differs from that of last season mainly in the added accuracy and more compact form of the immense amount of information which it contains. The reputation of the book has been so firmly established by the previous volumes that we need only say that the last is the best of all.

EDWARD BURGESS AND HIS WORK.—The September number of the *New England Magazine* contains a very able and interesting article under the above heading by Mr. A. G. McVey, yachting editor of the *Boston Herald*. The illustrations, including a portrait of Mr. Burgess, are very good.

Canoeing.

Secretaries of canoe clubs are requested to send to *FOREST AND STREAM* their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to *FOREST AND STREAM* their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

ADDRESS WANTED.—We have heard a number of pressing inquiries lately as to the identity of the writer of the following comments on the meet, which appeared in the *Tribune* a short time since: "Too many of the races were called to suit the pleasure of the ladies' camp and not to serve the convenience of the canoeists. The fact is that the ladies' camp has grown to be an altogether too important factor in the meets. Apparently it often dictates the policy of the camp; certain it takes the attention of many from their canoeing duties and requires more attention to the dress than should be required. Either the ladies' camp must be made of less importance or else the active canoeists will withdraw from the American Canoeists' (?) Association and form a new association, without any such appendage as 'Squaw Point.' Such a threat was heard frequently in the course of the meet, but

it is not likely to be carried out unless the situation as to the ladies' camp grows worse." We venture the opinion that without the influence of the ladies' camp the meet would lose the attendance of many of the older and staid members of the A. C. A., non-girling men at that, who are never seen at Squaw Point.

THE PASSAIC RIVER REGATTA.

THE canoeists of the Passaic River held a very successful meet on Sept. 5, 6 and 7 in the neighborhood of the Lanthe, Arlington and Orange Canoe Clubs. No tents were pitched, the canoeists preferring to sleep in the club houses. Members of the Bayonne, Hoboken and Crescent Canoe Clubs cruised up the river several days before the date of the meet, and canoeists from Rutherford, Passaic and other points arrived on Friday night.

Saturday afternoon at 2 P. M. the first event on the programme of the Orange C. C. was called. It was the junior sailing race, and was won by W. H. Smiley, of the Orange C. C., in canoe Scout, the other contestants being unable to finish the race on account of lack of wind. The paddling races were called next, and resulted as follows:

Senior Paddling Race—L. B. Palmer, Lanthe.

Junior Paddling Race—L. J. Stewart, Lanthe.

Paddling Tandem Race—Pockman, Crescent, and Simpson, Yonkers.

Paddling, any class—Geo. Metze, Lanthe.

Hurry Scurry Race—Metze.

Record Paddling for Passaic River Record Cup—L. B. Palmer first, G. P. Douglas second, F. B. Collins third, Pockman fourth.

Club Four Paddling—Douglas, Palmer, W. Stewart and Duguid, Lanthe.

The hurry scurry race was the most interesting of all. Edinger followed Palmer's canoe last year and ran up the river bank, and then swam with the tide to his canoe, which he reached long before Metze, the only other contestant, could cover the distance swimming against the tide. Edinger upset at the signal, and would have won by a long lead, but by upsetting again by request before crossing the finish line, he was passed by Metze before he could regain his canoe. During the evening the visitors were entertained by the Orange Club.

On Sunday many of the canoeists paddled up the river as far as Passaic, where dinner was served.

On Monday morning the canoeists were astir at an early hour and the first race of the Arlington regatta was started promptly at nine o'clock, and proved to be as good a race as has been sailed on the river. Seven of the canoes were upset by the strong N.W. breeze. Douglas finished first, Palmer second.

Louis Simpson, of Yonkers, won single paddling race, with Duguid second.

Paddling Tandem, Decker Canoes—Douglas and Duguid first, Pockman and Simpson second.

Paddling Tandem, Open Canoes—Palmer and Hart first, Stewart and Archibald second.

Paddling club four, won by Lanthe crew.

Paddling and Sailing Combined for the Passaic River Record—Palmer first, Douglas second.

Hurry Scurry and Upset—Edinger, Crescent C. C., first, Dudley, Knickerbocker C. C., second.

After the regatta lunch was served and handsome prizes presented.

The principal event, the regatta of the Lanthe C. C. on Monday afternoon, was very well managed, the full programme, a long one, being promptly run off before dark. The winners were:

First event—Sailing, seniors, record event; first, G. P. Douglas; second, L. B. Palmer.

Second event—Sailing juniors, record event; H. S. Des, Brisay.

Third event—Sailing, man overboard; first, G. P. Douglas; second, G. Baxter.

Fourth event—Sailing, upset, G. P. Douglas.

Fifth event—Paddling open canoe, single blades; first, W. J. Stewart; second, F. McClees.

Sixth event—Seniors, decked sailing canoes; first, L. B. Palmer; second, James Duguid.

Seventh event, paddling, juniors, decked sailing canoes; first, H. Kretzmer; second, Joseph Stewart.

Eighth event, paddling tandem, open canoes, single blades; first Duguid and Archibald; second, Farmer and Fredericks.

Ninth event, paddling tandem, decked canoes; first, Palmer and Douglas; second, Pockman and Simpson.

Tenth event, club fours, open canoes, single blades; first, Lanthe; second, Arlington.

Eleventh event, club fours, decked sailing canoes; first, Lanthe.

Twelfth event, paddling, any canoe; first, F. McClees.

Thirteenth event, hurry-scurry; first, Edward Edinger; second, Palmer.

Robert J. Wilkin acted as judge and starter. The 16 events on the programme were started promptly, and the last race called at 6:20 P. M.

This was the most successful regatta ever held by the Lanthe C. C., and the guests of the club were continually interested. During the evening there was a large number present at the supper of salad, coffee, sandwiches, etc.; Vice-Com. Winné, Sec'y-elect Wackerhagen, and other Mohicans; W. L. Dudley, J. K. Hand, of the Knickerbockers; R. J. Wilkin, H. H. Smythe, and others, spent the evening with the club.

The Passaic River Record trophy, a handsome silver mug, was won by Palmer, in canoe Cricket, who scored four points; Douglas was second with two points.

HOLYOKE C. C., SEPT. 7.—The second annual regatta of the Holyoke C. C. was held on Labor Day, the first race being the half-mile sailing for the Sans Souci prize cup. The starters were Emil Knappe, W. E. Parsons, F. H. Metcalf, Louis Lamb, C. F. Schuster, and Will Ladd. Knappe won, with Metcalf a close second; Schuster upset. The canoe, single blade paddling race, ¼ mile, was won by Knappe and Hodgen; standing paddling race, 100yds., by Ladd; single paddling race, ¼ mile, by Hodgen and Metcalf; sailing race, ¼ mile, declared off; hand paddling race, 100yds., was won by Galbraith; upset race, by Metcalf and Banks; the tandem paddling by Enson and Sardner; the hurry scurry by Metcalf, Schuster and Banks; the single paddling, ¼ mile, by L. E. Towne; the championship race, ¼ mile, by Metcalf, Solen and Brown; umbrella race, declared off. The special one mile sailing race was won by Knappe. The officers were: Regatta committee, Capt. F. B. Towne, First Lieut. F. H. Metcalf, Second Lieut. H. E. McEwain. Judges, William Reed, H. L. Russell, W. M. Reynolds. Starters, R. T. Wyckoff, E. S. Towne, B. L. Syms and T. J. Morrow.

VESPER BOAT CLUB REGATTA.—A regatta will be held by the Vesper Boat Club on Sept. 26, open to members of the club and to members of the American Canoe Association. The events will be: Single canoe—one mile, with turn. Tandem paddling—half mile, straightaway. Single scull—two miles, with turn. Four-oared working boats—two miles. Double working boats—two miles. Sailing canoes—four miles, unlimited. A. C. A. rules to govern canoe races. Rules of National Association of American Oarsmen to govern rowing races. Entries close on Sept. 23, to be made to Paul Butler, chairman of regatta committee. Address, Lowell, Mass. Our prizes, while creditable, will not be of great intrinsic value, but we will try and have some sport. No postponement on account of weather.

A. C. A. MEMBERSHIP.—Central Division: Ebert C. Everest, Chas. Russell, Albany, N. Y.; Rev. Chas. H. Snedeker, Poughkeepsie, N. Y. Eastern Division: Chas. O. Murray, Horatio Hickok, L. E. Woodhouse and W. M. Crombie, Burlington, Vt.; H. M. Mott-Smith and J. L. Dean, Boston, Mass.; John B. Richards, Fall River, Mass.; Albert E. Copeland, A. N. Knight and H. Frost, Worcester, Mass. Atlantic Division: William T. Demarest, New York City.

MANHATTAN ATHLETIC CLUB.—The first "carnival of sports" of the Manhattan Athletic Club, on Sept. 19, at the grounds, 155th street and 8th avenue, New York, will include a series of canoe races, under the direction of Mr. W. S. Elliott, the director of canoeing of the M. A. C.

KNICKERBOCKER C. C.—The fall regatta of the Knickerbocker C. C. set for Sept. 12, was postponed to a future date. A notice of the postponement was sent but reached us after we had gone to press.

ANSWERS TO CORRESPONDENTS.

T. K.—The gun has not been tested by us.

F. S. L., Mandan, N. D.—Can you give me any information as to fishing in southern California? Are there any fish? There are trout in the mountain streams, and in salt water are redfish, kelpfish, rock cod, barracuda, Spanish mackerel, flounders and others.

ONYJTUTA.—1. Should not fish be killed at once on taking, and what is the neatest and most humane way of dispatching? 2. Are both the large and small-mouth black bass found in the Juniata and Susquehanna rivers? Ans. 1. Yes; cut the throat. 2. Small-mouth only, as far as we know.

J. E. D., Brooklyn.—What is the direction of the trajectory of a ball? Is it a straight line from muzzle to object, or is it a curved line? If a curved line, is it above the center line or below it? Ans. If it is a curved line, it is above the center line, and must necessarily rise above the center line, if by that is meant a straight line from muzzle to target.

J. D. B.—Can any deer or large game be taken out of Maine? And will you give the Maine game law for this season? Ans. The law permits hunting for moose, deer and caribou between Oct. 1 and Jan. 1. It is forbidden to use dogs or to kill cow moose at any time. One person may kill only one moose, two caribou and three deer in a season. Transportation and exportation permitted (within foregoing limit) if game carcasses are plainly tagged with owner's name and accompanied by him.

H. E. A., Lancaster, Pa.—Please give the names of the trapshooters who have been placed in the expert class. At the shoot of the Haysburg Association there were shooters whom it was desired to handicap, but they claimed they were not liable under the rules, as their record of 90 per cent. was not made at an Association shoot. Ans. This list is given in the Association programme of the Knoxville shoot, which closes to-day: "The following list of experts will have to shoot at unknown angles: H. McMurphy, C. W. Budd, R. O. Helkes, J. R. Stice, W. Crosby, W. H. Wolstencroft, John Ruble, F. D. Kelsey, H. B. Whitney, E. S. B. H. H. Miller, W. S. McDonald, A. L. Bandle, M. F. Lindley, F. Parmelee, J. Winston, A. G. Courtney, W. E. O. R. Dickey, H. G. Wheeler, Mr. Stanton, J. A. Sherman, H. A. Penrose, W. C. Cady (Brooks), N. Apper, Ed. Collins, E. A. Andrews, C. E. Barrett, B. F. Schumeler (Hamline), Dr. "Bond," Chas. S. Sanborn, Fred Bennet (White), S. Bowker, S. A. Tucker, Geo. Osborne, J. A. R. Elliott and all others whom we know to be better than 90 per cent. as soon as an amateur proves to be shooting strong enough he will be advanced to the expert class and be compelled to shoot in the higher class."

STEVENS SPECIAL FIRE ARMS.

Wherever shooting is done, in all parts of the world, the Stevens Rifles and Pistols are being introduced, and on account of their superior accuracy are preferred.

STEVENS PISTOLS have made more brilliant records and have done finer work than any other pistol ever made.

STEVENS RIFLES have made records which were considered impossible.

STEVENS POCKET RIFLES are carried by ladies, anglers, tourists and hunters. They are marvels of accuracy, compactness and beauty.

STEVENS LADIES' RIFLE is the proper rifle for ladies. It is wonderfully accurate and has no recoil.

The .22 long rifle and the .25 rim-fire cartridges, the most accurate small-bore cartridges made, were originated by this company. These celebrated rifles and pistols are manufactured by

IRISH SETTERS.

SEMINOLE.	ELEO,
(A. 20,088). Fee \$20.	(A. 11,450). Fee \$15.

Extended pedigrees of any of the above on application. Bitches entrusted to us receive the best of care. Fine specimens of the above breeds for sale at reasonable prices, including several good stud dogs and brood bitches in whelp.

Young Stock Always on Hand.

WYOMING KENNELS.

The LARGEST and BEST kennel of ROUGH-COATED SAINT BERNARDS in the world, comprising the following noted STUD DOGS:

Champ. **SIR BEDIVERE** (19451).
Acknowledged by the best Judges to be the most typical and perfect St. Bernard living. Winner of 33 first and special prizes, all in the best of company. Prizes include The One Hundred Guinea Challenge Cup four times, the Halsey Trophy twice, and the Deacon Challenge Cup twice. Stud fee.....\$150.00

Champ. **PLINLIMMON, JR.** (6864).
This grand young dog is a son of the world-renowned Ch. PLINLIMMON, and although only a little over three years old, is the winner of 27 first and special prizes, and sire of some good stock. Stud fee.....\$50.00

LOTHARIO (18271).
This grand headed young dog is by the famous Ch. VALENTINE out of that well known bitch SAFFRON. He is the only son of Ch. Valentine at stud in America, and from his breeding, and low stud fee, should be much sought after by St. Bernard breeders. Stud fee.....\$25.00

St. Bernard Puppies For Sale.

A select stock most always on hand, sired by the above dogs out of prize-winning bitches, at reasonable prices.

WYOMING KENNELS, Melrose, Mass
JAS. E. GREEN, Manager.

AT STUD. FEE \$50.

KING OF KENT
(A.K.C.S.B. 6264).
Sire of the phenomenal field trial winners, Rip Rap, Zig-Zag, Tapster and Maid of Kent. Pointer Puppies for sale. Apply to JAS. MORTIMER, Supt. Westminster Kennel Club, Babylon, L. I.

St. Bernards at Stud.

1. Soggarth, immense rough-coat, the only son of Lord Bute at stud in America. 2. Patrol, one of our best smooths, fee \$35 each.
JOHN KEEVAN, 185 King st., Brooklyn, N. Y.

YORKSHIRE TOY TERRIER.
Champion **Bradford Harry**, described in show reports as "best Yorkshire in America." Pedigree and winnings free, photos 50cts. A limited number of his puppies for sale. P. H. COOMBS, 1 Exchange Block, Bangor, Me.

FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, \$4 A YEAR. 10 CTS. A COPY.
SIX MONTHS, \$2.

NEW YORK, SEPTEMBER 24, 1891.

VOL. XXXVII.—No. 10.
No. 318 BROADWAY, NEW YORK.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. Communications on the subject to which its pages are devoted are respectfully invited. Anonymous communications will not be regarded. No name will be published except with writer's consent. The Editors are not responsible for the views of correspondents.

ADVERTISEMENTS.

Only advertisements of an approved character inserted. Inside pages, nonpareil type, 30 cents per line. Special rates for three, six, and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money or they will not be inserted. Reading notices \$1.00 per line.

SUBSCRIPTIONS.

May begin at any time. Subscription price for single copy \$4 per year, \$2 for six months. Rates for clubs of annual subscribers:

Three Copies, \$10. Five Copies, \$16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. For sale by Davies & Co., No. 1 Finch Lane, Cornhill, and Brentano's, 430 Strand, London. General subscription agents for Great Britain, Messrs. Davies & Co., Messrs. Sampson Low, Marston, Searles and Rivington, 188 Fleet street, and Brentano's, 430 Strand, London, Eng. Brentano's, 17 Avenue de l'Opera, Paris, France, sole Paris agent for sales and subscriptions. Foreign subscription price, \$5 per year; \$2.50 for six months.

CENTERBOARDS IN INTERNATIONAL RACING.

IN nearly all the international races between American and British yachts the centerboard has played a most important and clearly defined part. It has not only been the chief weapon of the contestants, on one side, such victories as they have gained being due largely to its aid; but it has been used solely by this side, being opposed with equal obstinacy by the keel in the hands of the other party. Up to the beginning of the present season the results were plain and unmistakable; in the larger class of yacht, where absolute draft of water was so impracticable as to make necessary a comparatively shoal hull, the centerboard has thus far proved the controlling factor. In all smaller classes, probably from 70ft. 1.w.l. downward, the superiority of the keel type has been made manifest in the gradual abandonment of the centerboard, the condition being changed from one in which the whole fleet was composed of centerboard craft, as in 1878, to that in 1890, in which the centerboards had practically abandoned the racing courses in all classes where good keel boats were found, such as the 30ft., 40ft. and 53ft.

Starting with all the odds in its favor, the centerboard had year by year lost ground, and even in the most modern racing craft, such as Shark, Hawk, Ventura and Gorilla, had failed to make a fair showing against the keels.

Taking the results of years of racing on both sides, there was little to justify the adoption of the centerboard in a racing yacht of 13ft. draft or less, equivalent to 70ft. 1.w.l., and the news that Mr. Watson had decided to place a centerboard in a racing boat, and, moreover, in one which was intended from the first to top the 10-rating class on the Clyde, came as a surprise on both sides of the Atlantic. Considering the keel boats in the class, Yvonne, Encore and the rest, and the responsibility of

maintaining the prestige won in the old Doris, the experiment was a daring one. At the same time two smaller centerboards were built for the 2½-rating class, to meet half a dozen crack keel craft. While all three were in a measure allied to the compromise type, so common of late in America, they differed in one marked respect, the centerboards being of metal, instead of wood, and very heavy.

Until quite late in the winter it seemed that Americans had done with the board so far as racing is concerned, all of the new 46-footers being keels, but at the last moment Mr. Burgess and that good friend of the centerboard, Dr. Bryant, took hold in earnest and turned out one representative, a wide compromise of the general type of the 30-footers Shark and Hawk.

The results of these two experiments are now known, the season being over. On the Clyde the performance of Dora against the keel tens has been a succession of victories, backed up by similar work on the part of the 2½-raters Elfin and Ownsay. At this distance, and with incomplete data, it is impossible to gauge exactly the extent of the victory or its probable results, but it is certain that the centerboard type has made a far better showing against the keels this year on the Clyde than it has ever done in America.

On this side the result is less conclusive, but there is no ground for doubt that Beatrix, the Burgess centerboard, is inferior to Gloriana, in fact the question of second and third place is open between Beatrix and her keel sister Oweene. Beatrix is certainly a very fast boat, probably the best centerboard that has raced in the classes below the 70ft., but at the same time her performances are overlooked beside those of Gloriana, and the keel is undoubtedly still ahead in America.

The prospects of a renewal of international racing are very poor, save in the direction of Constellation, the big schooner, but should a challenge pass from either side, the positions would present a curious contrast. On the part of America, the triumph of Gloriana against such a field as the new 46ft. class, the highest achievement of a decade of hard racing and rapid evolution, would naturally suggest the propriety of adhering to the same type in any class under 80 to 90ft.

On the other side, where the effect of Volunteer's centerboard as opposed to Thistle's keel has if anything been overrated, and with the newly acquired evidence offered by Dora as opposed to Yvonne and the other keels, there exists every inducement to try the experiment of a heavy centerboard in a larger craft. A keel cutter from Bristol, R. I., opposed to a centerboard cutter from the Clyde would make a race that would give to yachting the stimulus so much needed just now, and would shed new light on questions which are apparently still wide of a final settlement.

SONG BIRDS FOR CALIFORNIA.

THE people of California are engaged in an enterprise to introduce foreign song birds. The first to propose the scheme was Mr. Horace F. Cutter, who urged it in the San Francisco *Bulletin*; then Mr. F. R. Webster, president of the Country Club, took it up; and county movements have followed in Santa Cruz, Napa, Sonoma, San Mateo and Sacramento counties. The birds, which it is proposed to import, will come for the most part from Germany, and will comprise thrushes, bullfinches, goldfinches, nightingales and sky larks. To these will be added red-breasted robins, with mockingbirds from Louisiana. Santa Cruz county has raised funds for 100 pairs of the European species named, and the Country Club will bring out 200 pairs.

Naturally in a fruit-growing country there will be a certain degree of prejudice against the new comers because they will destroy some fruit; but intelligent study of their good work as insect destroyers will certainly overcome any possible feeling against them. It is reported that a fruit grower in southern California, who introduced a colony of titmice into his orchard, has determined that while the birds destroyed 10 per cent. of his fruit, they have proved so efficient in warfare on the insect hordes that the trees are decidedly healthier and the fruit crop one-third larger than it would have been without the birds.

This song bird colonization enterprise of the people on the Pacific Coast will be watched with decided interest; and the FOREST AND STREAM hopes in future years to chronicle its full success.

LABRADOR EXPLORATION.

THE Bowdoin College expedition to Labrador, announced in our columns April 30th, has returned with collections and information of very great value. The objects of the leader, Prof. Leslie A. Lee, were the collection of natural history specimens, the study of the native tribes between Hamilton Inlet and Cape Chudleigh, and the determination of the existence and character of the wonderful Grand Falls of southern Labrador. The zoological collections include numerous shells showing the close relationship of the present molluscan fauna to that of Maine and Nova Scotia, a large series of birds, many plants hitherto not recorded from the region, and twice as many species of fishes as were known from previous explorations. A small collection of valuable minerals was also secured. Remains of an Esquimaux village were found on Grand River containing sleeping-shelves on the sides of the wooden walls and with floors made of large flat stones. Various implements and utensils of bone, iron and stone were discovered here, among them knives, spears, sled-runners and lamps. Skin clothing and ivory ornaments were obtained. A race of Montagnais Indians, hitherto unknown to white men, was met and critically studied by Prof. Lee, who made full measurements of these interesting people and notes upon their characteristics.

The falls of Grand River have a vertical descent of 200ft. and are continued by rapids to the extent of 500ft., making one of the grandest gorges of North America. Another expedition to this wonderland was led by Mr. Bryant, of Philadelphia, and as the region is accessible and will undoubtedly be fully described we may be sure that its charms will soon be known to the tourist. The proximity to superb trout and salmon streams will add to the attractions of the country.

SNAP SHOTS.

CERTAIN American fishermen who have been trouting in Nova Scotia this year, have killed such moose as came in their way, and having no special use for the carcasses have left them to rot on the shore. This has so far promoted the good will of the residents of that Province toward sportsman visitors from the United States that they are doing what they can to lighten the lot of the Americans by relieving them of their superfluous cash. In addition to the non-resident license fee of \$10 for permission to kill feathered game and \$30 to kill moose and caribou, the sportsman is now compelled to hand over an impost tax of 20 per cent. on the value of his shotgun and rifle. The lawful numbers one person may kill are two moose and four caribou. Exportation of a carcass or any portion of a deer or caribou is forbidden. There are reported to be many moose in Nova Scotia this season. Last week we printed a list of the officers authorized to issue game licenses. If there are any Americans who hold that the Nova Scotia non-resident restrictions are too lax, some more slaughter of moose in the summer time will no doubt prompt a speedy remedy.

The introduction of English pheasants on Jekyl's Island has provided a supply of choice food for the chicken snakes which have thrived and multiplied apace. The pheasants have demonstrated their adaptability to the climate and cover, but how to keep down the swarming hosts of vermin is now the problem perplexing the managers.

We begin to-day the publication of a novel series of papers on cormorant fishing. They will be found exceedingly interesting, for one thing, as showing what it is possible to accomplish in taming and training these wild feathered creatures.

Beaver hats are to be the fashion. Beaver skins will be in demand. Beaver trapping will be stimulated. Beaver colonies will be destroyed. The whims of modistes in Europe influence animal life in the wilds of America.

Admirers of Mr. Rowland E. Robinson's sketches of the Danvis folk will be glad to know that some of Uncle Lisha's friends are to appear in the forthcoming number of the *Atlantic Monthly*.

The Commissioners sent out by the Government to investigate the seal fisheries have returned to Washington, but no report has yet been made public.

The Sportsman Tourist.

MUNSON'S FALLS.

MANCHESTER, VT.

SPLASHING, dashing, clear as crystal,
Flashing back the sun's bright rays,
Runs the brook o'er time-worn boulders,
Babbling forth its liquid lays.

Racing, leaping, restless waters,
Why not be content like me?
Rest awhile along the journey—
Fain am I to talk with thee.

On it rushes, laughing, gurgling,
Ever onward to the sea;
In each drop a rainbow glistens,
While each pool reflects for me

Pictures such as no man painteth;
Ever changing, ever true;
Set in frames of moss-grown granite,
Tree and shrub of wondrous hue.

Pretty streamlet, happy water,
Free from care, restraint or guile;
Fare thee well and may God speed thee
To thy journey's end, erewhile!

NEW YORK.

ALFRED H. TOMPKINS.

STORIES OF THE SANTA LUCIAS.

THE California Coast Range goes by many names; it is so broken into groups of mountains by long narrow valleys. These local names do not always appear on any except county maps, but they are worthy of perpetuation and often more distinctive than most mountain names, preserving old Indian and Spanish terms of great beauty. The Mayacamas, the Gavilans, the Gaviotas, the Santa Lucias, are illustrations of these local names.

But one must know how to pronounce such names or their musical possibilities are lost. The rolling hill country east of Paso Robles (the "Gateway of the Oaks") goes by the name of "Huer Huero." When this name was sent to the Postmaster-General, a new settlement desiring a post-office, the horrified officials wrote back that such a collection of consonants was not to be considered for a moment. All the settlers, however, pronounce Huer-Huero "war-warro" and so give it a decidedly Australian sound.

The Santa Lucias occupy a great portion of the ocean-bordering townships of Monterey and San Luis Obispo. Cattle ranges, a few farms, timber lands and mines of quicksilver and other metals are found there. Being but thinly settled there is more game than in any other part of the southern coast range, and no finer section for summer camps can be found in California. The old settlers will tell you that there is no game left, but there is a good deal. Hardly a day passes that deer are not seen crossing the mountain highways; bears and California lions still carry off calves and sheep; the trade in skins of wildcats is still quite an industry. Of course the days that I remember, in which old "Uncle Nate Morehouse," one of the first settlers at "The Summit," could "kill a deer every week in the year" on his own 300 acres, are long ago ended. But if the temporary rest that the new game law of California commands is strictly observed, there will be great times again for every sportsman who visits the Santa Lucias.

A long time ago—I do not like to say exactly how long—I made my first visit to what then had no particular name, but is now called the Adelaide district. Twenty miles square, it lies between Paso Robles, in the valley of the upper Salinas, and the dairy farms of the coast along the Cayucos. When I first saw it, the railroad had stopped away north, near Castroville, and one staged from the terminus clear through to Los Angeles, a wild, hard and always memorable journey. A hundred towns that have since sprung up along the route were then unfenced pastures; cities of to-day were but ancient, dreaming Spanish villages of the Eighteenth century, in whose midst a few Americans were fighting and working.

In the clear gold of sunrise, as the stage-coach hastened across the Salinas plains (then a desert, now a wheat-field), the driver halted and called my attention to what was even then a very rare sight, that of a band of antelope on the mesa. When I. Ross Browne, some time in the early fifties, had ridden alone across the Salinas Valley, deer, wild cattle, grizzlies, antelope and other large game were everywhere in the beautiful oak-studded levels and slopes. Long after the antelope had been driven out of the upper Salinas, they were in the Mohave and Colorado deserts, where they held their own until the advent of the railroad.

Deer, too, still dwelt along the Salinas. The stage drivers often saw them, and travelers on the highways had come into the stage stations with deer they had shot from horseback. But the home of game was west of the valley, in the mountains. There was not a fence except a few brush walls about the corn patches of the pioneers. Nothing had been surveyed; cattle trails ran on every hillside, and made so perplexing a maze that it was often difficult to keep the bridle paths. Practically speaking, one could ride anywhere that his horse could carry him. There were mountain paths of astounding steepness, where the greenhorn and his saddle would inevitably slip over the horse's tail long before he was half way up the grade; my friend Daniel, then a plump little school-master, now a wily politician, once spent a whole afternoon in recovering his luggage from the tops of the manzanita bushes 300 yds. below one of the grades of the San Josefa trail.

One morning I went out from Uncle Buck Wright's cabin and walked up the gulch. There was a rare flower there, one of the *labiates*, that had long puzzled my slender stock of botanical information, and I wanted to find out more about it. I climbed upon a shelf of limestone projecting over the gulch, and sat down under the shadow of the live oaks, looking at the hills' blue distance, at the sunrise, still rose-purple. I sat there for perhaps half an hour resting quietly. Then I heard a sharp tinkle below, as if two pebbles had been struck together, and in a little while I caught other sounds that aroused my curiosity. By standing up I was able to look over and down upon a lower shelf overgrown with trees and shrubs—a peculiarly lovely spot, fresh with the

sparkle of water from a spring, and yet arched over with clear blue sky, and sprinkled with sunlight and shadow.

Just here, in a space like a lady's parlor, a doe and two fawns of six months age were playing in the most homelike way. They had climbed up from the bottom of the ravine, and circumstances had so greatly favored me that I was actually within 25 ft. of the unconscious creatures. The heavy boughs of the live oak hid me, but a small opening enabled me to see clearly and the wind blew from the doe, so that, as I said, it was a rare opportunity. A naturalist might have had some theory to defend or demolish, but I was well content to enjoy the scene without thinking of it as "material." I remember that I was especially pleased by the refined way in which the doe nipped off a leaf here, a small twig there, in the intervals of her play with the fawns. It was breakfast time, but when I went down to the place after they had gone, the keenest scrutiny could not have seen that anything was marred or spoiled. Nature's wild garden was the wild garden still. They tripped away as easily and gracefully as Spanish dancing girls, and the memory of their haunt in the cañon by the mountain springs was one that kept me in hopes of another such experience.

Hiram Selby was one of the mountain-bred boys, a phenomenally good mustang breaker, a fine shot and a companion you could trust. I have told many stories about him in those Santa Lucia days. Poor fellow! An oak that he was felling killed him years ago, and the Selby cabin, where he lived with his feeble old mother, is fairly rotting into a place like a burial mound, so quickly the wild clematis and blackberry have seized upon it. I rode past it a few days ago, and some of Aunt Selby's marigolds were still blooming around it. The old oak still remains on which Hiram used to nail his "skins an' varmint an' hides." "Skins" meant deer or "bar;" "hides" meant calves or cattle—the tamed, domestic element one might say; "varmint" in Hiram's mind meant coons, foxes, wildcats, coyotes and badgers.

In these days Hiram would be ranked as a cowboy. But he was more of a wood ranger on horseback. He drove cattle for the wealthy ranchers, and earned a fair living; but he preferred to be his own master and to ride all day long over the Santa Lucias, with his favorite weapon, a large army revolver, "peggin'" at things. "Ground squirrels an' jack rabbits they give a man practice," he used to remark to me. "Varmint, them's better and wuth a little. I reely like to drop a wildcat with my six-shooter."

For large game he carried an old muzzleloading rifle, as most of the boys of the district did, until a few years later Henry rifles or old model Winchester came in. Sometimes for a year or two at a time he made his living by "huntin' an' tradin' hosses," as he once told me. Once a year he went to camp-meeting, and was always mightily stirred up before its close, leading the mourners and confessing all his sins of omission and commission. Then he came home rejoicing to Aunt Selby, and for a few weeks the work he did in the garden would have done credit to any professional horticulturist. After a little the charm of the unfenced mountain wilderness again overcame him, and the giant oaks about the log cabin began to be covered once more with his "skins, hides an' varmint."

The type is old, but it is vanishing; it is already hard to find on any part of the Pacific coast: forty-acre farms occupy the valleys, and men are planting orchards by the hundred in the sunny shelters of the Santa Lucias. There is still a certain sort of pioneering to be done there, but it is a tame and tiresome sort compared with the book of the days of the beginnings, when the first trails were made, the first grizzlies shot, the first squatter fights fought out between cattlemen and cabin builders on the Nacimiento.

CHARLES H. SHINN.

BOSTON SPORTSMEN.

GOVERNOR RUSSELL, of Massachusetts, knows how to take a vacation. He was greatly pleased with his trip to Birch Lodge, at the head of Richardson Lake, Maine. In the first place, the camp is all that heart could wish in the shape of a hunting and fishing camp. It overlooks the whole length of the lake, with the wooded mountains beyond. Rustic, yet almost palatial in its fittings, the hunting and fishing home of a millionaire, Mr. Bayard Thayer, who, with his brother, Mr. John E. Thayer, of the Governor's staff, is entertaining the Governor and a few friends. The doings of a single day will picture other days of the Governor's stay in the wilderness. Clad in corduroy, with leggings and a slouch hat, Mr. Russell, with his guide, Steve Morse, a veteran in that section, embark in a skiff, morning and evening, to try the trout with a fly. The Governor is getting to be an expert with the fly-rod. Twenty-four handsome trout were the result of one morning's fishing, with half as many in the evening. But this is not all. After fishing and a rest at the lodge the Governor shoulders his gun, and half a dozen partridges are the result of a few hours' delightful tramp in an old lumber trail. All the birds are said to have been taken on the wing, for how else should a Governor hit a partridge?

Mr. R. B. Foster, of the firm of Foster & Weeks, of Boston, is not altogether unknown to the readers of FOREST AND STREAM. Mr. Foster is a sportsman from first to last, but more in love with rod and line than almost any man I know. This time, however, he has just returned from a most successful salt-water fishing excursion. Mr. Horace W. Jordan is a sportsman well known in Boston. Several years ago he met with one of those terrible gun-in-carriage accidents that deprived him of his right arm, and since that time he has had to be more contented with fishing than shooting. But he has been far more fortunate in money matters than most men with two arms, and having accumulated considerable of this world's goods, of late years he has been able to gratify his tastes. He has a fine camp on Jordan's Island, sixteen miles from Bar Harbor, and here he delights to entertain his friends.

Mr. Foster is a friend fast and true, and it is down there that Mr. Foster has been by pressing invitation. The little steamer and the help and the camp are at the service of the guests, with the genial company of Mr. Jordan into the bargain. They went one day down to Seavern's Ledges, a point some sixteen miles from camp. The captain ran the steamer on time; that is, he ran at a certain rate of speed, and measured his distance in searching for the fishing grounds by the distance he had run. About the last ten minutes of the run he commenced

sounding, and to the lead was attached a baited hook. When about seventeen fathoms of water had been reached he drew up a codfish. Then the anchor was hove and the steamer brought to a standstill. All hands went to fishing. Such fishing it is seldom in the luck of sportsmen to get. Soon a fellow drew up a big cod amid scores of smaller fish. It weighed only 50 lbs. The catcher was high line for some time. But soon another came. The captain estimated it would weigh 65 lbs., and on the scales three hours after it actually weighed 62 lbs.

For a time this gentleman was high line, and, in fact, so to this day, of that trip, though it looked for a time as though he was badly eclipsed. One of the sportsmen felt a pull at his line that was a pull, and the line was running through his hands in spite of every effort. He called for help and another man took hold. By snubbing the line over the rail of the boat they managed to hold the fish. The captain of the steamer recommended the embarking of the fishermen who had the line in hand, in a boat, in order that they might let the monster they had in charge run, and, if possible, tire him out. They did so, and after a hard fight of nearly an hour they had their fish to the surface. It was an enormous halibut, estimated to weigh between 800 and 900 lbs. They had nearly brought him to the gaff, when by a sudden turn he tore out the hook that was fast in his mouth, and the second hook, also hooked fast in his side, was straightened out like a piece of wire. The hooks were very heavy ones indeed, and considered safe for almost any fish that swims the ocean. But the great halibut was gone. When they got to camp they had 240 codfish, all taken in less than three hours' fishing.

Mr. John Ross, of Bangor, one of Maine's largest lumber operators, has been entertaining his friends at his splendid place at the head of Moosehead Lake. Among his guests have been Mr. and Mrs. Otto Greely and son, of Minneapolis; Miss Alice Gillis, of Somerville, Mass.; Mr. W. W. Case, of Rockland; Mr. Harry F. Ross, of Bangor; and Mr. and Mrs. C. V. Holman, of Boston. They are all out for a few days hunting and fishing at Moosehead.

The Lake Auburn, Me., Fish Protective Association held its annual meeting the other day. President Hanson was in the chair, with secretary Gifford at his post. The following directors were elected: Henry H. Hanson, J. W. Ricker, D. E. Parlin, George G. Gifford, J. B. Daniels, John N. Wood, Lem Baker, G. B. Bearce and Frank R. Conant. The directors immediately re-elected Henry H. Hanson, president, G. G. Gifford, secretary, and Geo. E. McCann, treasurer. An expert from the Government hatcheries at Orono told the members of the association that they had been remarkably successful in hatching trout and landlocked salmon at their works, they having succeeded in hatching over 80 per cent. of the eggs taken, while the Government hatcheries rarely do better than 85 to 90 per cent.

Mr. C. Z. Bassett, of Appleton & Bassett, fishing tackle dealers, started Sept. 19 for a 10-days' gunning outing in the vicinity of Northfield, N. H. He is accompanied by W. H. Thairwell, the owner of the celebrated fish preserves at Plymouth, and Dr. S. W. Langmaid, a celebrated physician and hospital surgeon. Dr. Langmaid is also a devoted salmon fisherman. These gentlemen are after grouse and the native woodcock on this trip, and it is expected that fine sport will fall to them. They will also go to the same section in October for the late flight of woodcock. Their dogs are on the ground already, and are in the best of training.

Mr. C. H. Johnson, of Mattapoisett, Mass., with Mrs. Johnson, will start for Richardson Lake, Maine, on the 21st, for a couple of weeks hunting and fishing. They will be quartered at Camp Stewart, in which Mr. Johnson is interested. They will be followed a couple of days later by Mr. and Mrs. W. K. Moody, of the same camp, and Mr. H. S. Kempton, sub-editor of the Boston Herald, as guest. Mr. and Mrs. George T. Freeman, of the same party, are prevented from sharing in the outing by the sickness of Mrs. Freeman. Mr. W. C. Grout, one of the assistant editors of the Boston Herald, will start for the Upper Dam, Richardson Lake, about the 23d, accompanied by a party of friends. They will remain several days for hunting and fishing.

Mr. P. H. Kelley, the well known builder of Catholic churches, of Cambridge, is at the Upper Dam, on his fall fishing trip. There is no man in the world more thoroughly devoted to fly-fishing than Mr. Kelley. It is said that he can cast with a rod in each hand, and he has promised the writer of these lines to show him the feat this fall. It is suggested that he may land doubles on each rod at the same time, and if he does the FOREST AND STREAM shall have the benefit of the story. Mr. Kelley is accompanied by his friend, Mr. Bateman, the gentleman who caught the big landlocked salmon at the Upper Dam last spring, an account of which FOREST AND STREAM has already had.

Natural History.

PENNSYLVANIA BIRD NOTES.

PROF. AUGUST KOCH, the Lycoming county naturalist, in the early part of July last secured five specimens—adults and young—of Bewick's wren near his home in South Williamsport. This bird is quite a rare summer sojourner in the eastern, central and northern portions of our State, but from reports of different observers it appears to be tolerably frequent as a summer resident in some parts of southwestern Pennsylvania.

The tree, or white-bellied, swallow is a regular and rather plentiful summer resident at Renovo, Clinton county, on the Philadelphia & Erie R.R., where it breeds usually in bird-boxes in the yards and parks.

An albino rattlesnake captured July last in Clinton county is said to be on exhibition in the city of Williamsport.

Prof. Robert Ridgway, of the Smithsonian Institution, recently examined a pair of ravens taken in the mountains of Center county, kindly sent to him for examination by Mr. Chas. Eldon, of Williamsport. Mr. Ridgway described the birds to be *Corvus corax principalis*, the only form, doubtless, occurring in our State as a resident.

The act of Assembly, approved May 14, 1889, providing for the protection of song and other birds in our State,

was amended at the last session of the State Legislature as follows:

"1st—That the birds commonly known as reed birds are not included in the list of insectivorous birds which can be taken legally in Pennsylvania only by persons who have permits for collecting birds, their nests and eggs for strictly scientific purposes. 2d—The various species of hawks, owls and crows are not included among the birds protected by this act. 3d—In all actions for recovery of penalties under the act one-half of the fine (\$10 to \$50 for illegally killing birds specified or destroying their nests or eggs) shall be paid to the informer. The act of 1889 made all the fine payable to the county treasurer of the county where the offense was committed."

Reed bird shooting is a popular pastime with large numbers of sportsmen who visit the shores and marshes of the Delaware River. The change in the act previously mentioned was made in deference especially to demands from residents of Philadelphia and Delaware counties. In northwestern Pennsylvania, particularly about Presque Isle Bay and Conneaut Lake, farmers and many sportsmen know the red-winged blackbird (*Agelaius phoeniceus*) in the fall as "reed bird." Doubtless the reed bird amendment will enable persons so disposed to shoot the red-wings without fear of legal hindrance.

Observing farmers and poultrymen very generally throughout Pennsylvania regard crows with disfavor because of the fondness they manifest for both the eggs and young of domestic fowls, and as naturalists concurred in condemning the thieving crow, and made his character as black as his sable garb, the change already indicated was deemed advisable by our lawmakers.

Until within a very few years past every member of the hawk and owl tribe was regarded with disfavor by the average farmer and poultryman, as well as by nearly all sportsmen, on account of the popular idea that all these raptorial birds—large and small—subsisted almost exclusively on poultry and game. The careful and systematic investigation conducted under the direction of the Pennsylvania State Board of Agriculture proved the real value of these much-abused birds, and to-day hawks and owls, collectively considered, are protected by many farmers and others who but a few years ago were earnest in advocating their destruction.

Although a large majority of farmers and horticulturists favor the protection of most of our hawks and owls, it was not considered wise to have in force a law (as it was believed was the case with the act of 1889) which made it a misdemeanor, punishable by fine or imprisonment, or both, at the discretion of the court, to shoot or trap predatory birds, such as the goshawk, Cooper's, sharp-shinned and duck hawks, all of which are known to be destructive of poultry and game. W.

REARING GAME BIRDS.

Editor Forest and Stream:

IN FOREST AND STREAM of Sept. 3, I see several articles on rearing game birds. My grandfather, Wappert de Mélis, an old officer of Napoleon I., was an ardent sportsman and took great delight in rearing in confinement English and Chinese pheasants, and partridges (the red partridge of the British Islands and the continent of western Europe). The pheasant eggs were obtained from other estates or from the zoological gardens. When mowing green food for the stock on the estate, the men sometimes discovered a nest of partridge eggs, and when too late to leave some grass around the nest and leave it undisturbed (as were his orders), the eggs were taken home. They were all hatched under common barn fowl. The coops were about 20x10ft., facing the south and with wire netting front and covered by a roof, the whole being called a *volière*. There was sandy, gravelly and dry bottom with a little plot of grass and a few small pines for shelter.

How well I remember, when a boy, I accompanied one of our old servants, who had been over thirty years in the family—Jantze the Stocker—to the pine forests, in search of ant eggs. We have in Flanders, in the sandy portion, a species of big black ant, which build large nests of dry pine needles, dead grass, little sticks, etc. After finding one of these nests, Jantze would shovel ants, eggs, nest and all into a large grain bag (and how he did get bitten by the infuriated ants, but he did not seem to mind it), and carried the whole thing home. There the bag was emptied into an old flour barrel, covered with a coarse woven bag well tied over the opening to keep the ants inside. The ants would then collect their eggs into the center of the barrel, where we could find them whenever needed. This was excellent food for the young pheasant and partridge chicks, but somewhat heating and must be intermixed with a diet of chopped hard boiled eggs and lettuce leaves, clover seed and seeds collected when winnowing rye or wheat. The ant eggs supplied the natural animal food of the birds, and the seeds what they would about find on the fields. After they became larger we would feed them table crumbs, grain and almost anything.

The young chicks are very sensitive to wet, and a piece of matting should be set against the inner wall for shelter. They liked to run in the little grass plot and to eat some of the leaves; and the little pine trees provided shade and comparative shelter.

Grandfather had quite a success in rearing both pheasants and partridges. The partridges would be wild in the beginning, but became gradually tame, and I remember two old birds who fed with the chickens in the yard and ran around, never attempting to escape. We fed the old birds also meal worms from the old windmill on the estate. This food they were very fond of, but it is very strong and heating diet and should be given in moderation. This we fed also to two nightingales we had in captivity.

I never found these big ant nests in the woods of central and western Pennsylvania or New York, but think they exist in the sandy portions of the New Jersey coast and the sand dunes along the Atlantic coast, or other sandy portions of the continent, where they must be easy to procure.

Young game birds in their wild state feed mostly on grubs, ants and ant's eggs, small insects, seeds, etc., and the nearer you come to their natural food and surroundings in confinement the better will be your success in rearing them. Care should be taken to keep the coop well supplied with clear drinking water, keep the grass plot green by sprinkling or put fresh grass flakes in from time to time, and keep everything clean and tidy, for

they will otherwise be bothered with lice. Rats, cats and weasels are their great enemies, and should be carefully kept out by close wire netting at least 3ft. from the ground above the larger netting.

This all reminds me of the halcyon days of my youth, and if this may be of any use to my brother sportsmen, it will be ample reward of old

JULIUS THE FOXHUNTER.

LATE BIRDS' NESTS.

Editor Forest and Stream:

On the 26th of August I found a quail nest with eleven eggs in it. It was located in the corner of a rail fence, and the old bird flew away when I jumped over. The eggs showed a decided reddish hue, and, therefore, I expect that the young ones came out a few days afterward. On the same day I also found the nest of a redbird with young ones not over four or five days old. All birds have been late this year, and I am not much surprised about the redbirds, as they always hatch two or three broods; but quail eggs I never found so late before. No doubt it was a second brood, and it shows that our law, which allows quail shooting only after the 10th of November, is not too late at all. The birds are pretty scarce in our neighborhood this year. D. W. D.

CINCINNATI, O., Sept. 3.

Editor Forest and Stream:

While out partridge hunting Sept. 8 I found a quail's nest with 11 eggs in it. The mother was on the nest, which was in a hollow between two roots of a stump. Some one had placed a screen in front of the nest so the quail could not get out. He had fed the quail but had given her no water. I did not break any of the eggs, but they were dark colored and looked as though they were about half incubated. I removed the screen and posted a notice informing him of the penalty for having quail in possession before Nov. 1. I suppose he intended to try and rear the young ones.

Going through a dry marsh on the 8d inst., I came upon a quail and young about three days old. Calling my spaniel to me, I showed him where they had been, and he trailed them up and brought me one uninjured, which I let go. A. G. B.

HOLLAND, Mich.

THE CAROLINA PAROQUET IN FLORIDA.

Editor Forest and Stream:

I noticed some inquiry made in your columns as to the Florida paroquets. I have been collecting animals, reptiles and birds for a museum in St. Augustine for four spring seasons. I find each season that the paroquet is decreasing in number. Last spring I saw about half a dozen small flocks, six to eight in number, in a mulberry grove in the eastern part of Hernando county. Two seasons ago I found large numbers of them there. It is a habit of the paroquet to visit orange groves for the oranges in January and February; and more of them have been killed for this than for any other reason in Florida. I knew one man who killed over 200 two years ago in one week in his grove. When one is wing-broken and begins to cry, the drove will go to its rescue and easily be taken in. They nest in hollow trees similar to the woodpecker holes, and have two young. JOHN M. McCRARY.

Editor Forest and Stream:

In the Aug. 6 issue of FOREST AND STREAM, Mr. Frank M. Chapman made a request concerning our only representative of the family *Psittacidae*, the Carolina paroquet. In writing this I think perhaps it may be acceptable, to add my little mite for general information and possibly help to encourage correspondence of others.

In several successive years, when hunting about the cypress swamps of West Florida in April, I put up with an old resident planter who lived within a few miles of the bank of the Apalachicola River, and who appeared to be well informed about all bird life in the vicinity and through the river swamps. My inquiry about paroquets he answered, "Very soon the nasty things will destroy all the fruit of my mulberry tree, which fruit is just about getting ripe." How I wished the birds would soon start in on their work of destruction, but I was not destined to get the few desirable specimens I wanted, on the mulberry trees.

One day, however, when I was after a gobbler in the river swamps, in company of the planter's son, we were suddenly startled by a grating and metallic sound, at which the boy hurriedly said "Parrots!" Standing still for a time, we noticed several birds suspended by their feet, head downward, feeding on the red blossoms of a species of maple. After carefully changing my cartridges I shot one bird with each barrel; when about fifteen to twenty more birds darted from the opposite side of the maple tree with the motion and appearance of wild pigeons.

The next morning we visited the same place and again were so fortunate as to hear the note of the parrots. Standing in hiding beneath some foliage, we waited at least ten minutes to hear that note again, to make it possible better to locate the birds, but all in vain. By carefully examining the leaves of all the trees near by, I came to notice large yellow flowers with orange centers, which appeared to be distributed over one of the trees. Soon after I distinguished the green bodies of birds, which were attached to the seeming flowers, and once more the parrots lost a pair of their company. Several times on succeeding days their call was noticed, though now the birds mistrusted us and further approach was useless.

On the third and last occasion, April 6, 1889, when crossing a piece of pine woods near the plantation, I noticed a small flock of rapidly flying birds, alighting on one of the more distant pines, with the fluttering motion of our mourning dove. In another instant some of the birds were suspended from corresponding limbs and three parrots were secured while a fourth, shot on the wing, dropped in a near field, whence one of the boys at work there brought the bird for me, to be added to the other valued specimens. As Dr. Allen rightly says:

"Extirpation of this interesting and beautiful bird is not only due to wantonly shooting them for their meat and feathers and by sportsmen—not to mention the few specimens for natural history specimens, but by cruel and most destructive netting by calling them down through caged companions." Like our wild pigeons,

these poor birds have been netted until further supply gave out.

One individual in particular, visited the above mentioned locality, year after year, always in July, when the young birds were collected in flocks; and netted the paroquets as well for our Northern as for the European markets. Thus I was informed by residents.

We regret to say that this beautiful and interesting bird is certainly and rapidly disappearing from our fauna. There is very little hope of just a few of them to survive many years. The most remote swamps only protect them at times; they are bound to leave the woods, to feed in river bottoms on the much coveted cockle-spur, and as stated above, will also visit such fruit as mulberry and banana. The banana appears to melt away when the paroquets go to work with their heavy bills, and have taken it into their heads to visit a plantation regularly, to appease their very voracious appetites.

AUGUST KOCH.

PENNSYLVANIA.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

NOTES FROM THE GAME FIELDS.

VERY discouraging chicken reports come in from all parts of Kansas. It seems that the birds are shot by farmer boys and market-hunters as soon as hatched. What Kansas needs is absolute protection to game birds for a period of years.

Last week it was the writer's pleasure to enjoy a hunt in the northwest corner of Iowa, near the Sioux River, as the guest of the Porter Bros., who have a large model grain and cattle ranch in that part of the State, just a few miles distant from the South Dakota and Minnesota lines.

We found the chickens scarce as compared with former years. The Porters have an elegant English setter, Buffer, who could scent a covey a mile off. As soon as flushed the birds would go to the cornfields, making the shooting quite difficult. We hunted mornings and evenings, and three of us generally succeeded in bagging a total of 20 or 30 birds each trip. The coveys were all small. This is explained by the fact that English hunters had been shooting a month before the law was up. Upon one occasion we found a remarkably tame pair of birds. We walked to within ten feet of them in stubble. The handsome birds seemed as tame as barnyard fowl, and were flushed with difficulty. It seemed a pity to slaughter such elegant and fearless birds; but the relentless 10-bored showed no mercy. A.

LEAVENWORTH, Kan., Sept. 12.

By observation and by what can be learned from land owners and local sportsmen in and around this section of southern New Jersey quail are more numerous now than at any time before during the past ten years. Owing to the dry weather during last spring and the early part of summer in the time of their nesting and the rank growth of vegetation later on affording an admirable cover for the birds, they have increased wonderfully. An observing gentleman residing near here, Mr. Nicholas Waln, tells me that he "never saw more and larger coveys of quail and of a better size at this season of the year than at the present time." And what has been said in regard to the number of quail will also apply to rabbits; the dry weather earlier and the rank vegetation during the greater part of the summer having been conditions suiting their increase and protection. Squirrels also seem to be numerous. Perhaps they show themselves more on account of nuts being so plenty this fall. In regard to partridges, from what I have seen and heard their number is about up to the average.

Taking it altogether, the quantity of game this season around here is far above the average, and the sportsmen are looking forward with high hopes to splendid shooting, especially in the line of quail, when the season comes in. A. L. L.

MONMOUTH COUNTY, N. J.

We have large numbers of quail here this fall and expect great sport. Ducks, mostly woodducks, were plentiful opening day, and a few good bags were made. A party of three bagged 23 woodducks a few miles south of here. A. G. B.

HOLLAND, Mich., Sept. 9.

Every one reports grouse very plenty this year in this section. Although I have not been after them yet I hope to go as soon as the weather gets a little cooler. I saw a number of them in the spring when trout fishing, which shows that they wintered well. E. W. R.

POST MILLS, Vermont.

Ducks are very scarce so far this fall. Hares are very plentiful, also foxes. Snipe are nearly all gone. Of plover there are few, and we expect some good flights of ducks next month. Good bags of game can be got some twenty miles east of us at any time. Deer have been seen around this past summer. HOT.

BEDFORD, Quebec.

WOODS HOLL, Mass, Sept. 14.—A bunch of white wing scoters has lived in Buzzard's Bay, near here, all summer; these are not cripples, it is said, for they fly readily when approached. The first flying scoters seen by me were eleven going to the eastward across Vineyard Sound Sept. 10. Five sheldrakes were seen in the Sound on the 11th. A wild pigeon has remained in this locality during the summer and has been seen occasionally by Mr. V. N. Edwards and others.—T. H. B.

THOSE WILDFOWL PICTURES.—A Pennsylvania reader writes: "I wish to express my personal obligation to you for illustrating your paper with woodcuts of wildfowl. They are very natural. Personally I would rather see a picture like the one in the last issue than read the most exciting gunning story."

THE FOREST AND STREAM'S BOOK CATALOGUE has been exhausted. A new edition will be ready about Oct. 1.

ON LITTLE PETE'S POINT.

IT was November and the time had come at last for starting upon our long anticipated trip. Many had been the evenings that Frank and I had talked and planned about this shoot; the discussions as to charges, sizes of shot and number of shells to take had been innumerable, for I know of no greater field for discussion than ammunition for wildfowl shooting. We had decided, however, to take some 500 shells apiece, with our heavy 10 and light 12-bores.

Eighteen hours by rail with the customary waits, nine more on the water, found us just at dark located at one of the numerous clubs on Currutuck Sound, N. C. We found the prospect for making a big bag was not very encouraging, as the weather had not been sharp enough in the north to send the fowl down in great numbers.

At 4 the next morning with our man Billy we are off in the dark, huddled up in the skiff, decoys and all, while Billy sends us along nicely. Three-quarters of an hour later finds us settled in the blind, and just discernible about 30yds. off, bobbing up and down on the water, are three swan, a dozen geese, and some sixty odd duck decoys of different kinds from canvasback to teal. It is a bit chilly sitting here in the blind, but we don't have much time to think of the cold. The dawn is just coming, and we are beginning to locate the constant swish and whistle of fowl which we have been hearing over our heads. Bang! right over my head. Splash! The fun has commenced, and Frank has scored first blood. Out goes Billy after the bird; but what is this? "Down, Billy!" Too late. Five geese, coming straight at us and seeing our man, sheer off in the dusk just too soon. It is no use to call now; they have seen too much. Our first game proves to be a sprigtail.

Frank is bemoaning our luck with the geese when Billy's quick ear has caught the sound of some honker and answers. Sure enough three geese are coming in and are not 50yds. away now. "Let them have it, Frank. Now for your first goose." His two barrels are followed a little later by mine. Never a feather touched, and with an affrighted honk the geese are off. Billy says nothing, but I can see that he is wondering whether we expect them to light on our guns. "Too big, weren't they, Frank? First ones, you know, but never—" My remark is cut short by Billy's "Mark left quick! black duck!" We each succeed in dropping one out of a flock, missing with our second, as they do not come in well and the shots are long ones.

It is getting quite light now and we can see many flocks of mallards, sprigs, black duck, teal, widgeon, and occasionally canvasback and redheads scurrying down the sound; and we hear the booming of the battery men's guns away out. Now comes a flock of sprig, well in this time, and three go down; give that wounded one another barrel: that's it; let them be; down. A couple of widgeon right and left fall to Frank and both are killed clean. We are getting quite a respectable pile now, and have all we can do for they are coming thick and fast. I just succeed in dropping a couple of teal, when a lone honker comes in and Frank redeems himself by filling him full, and right after comes a flock of a dozen with Billy just drawing them in with his goose music. Talk about your baritones, tenors and sweet-voiced sopranos. Give me Billy's goose yodel. Look at them come. That fellow leading does not suspect the reception awaiting him. Now softly, *gluck! gluck!* They are setting their wings. They look as big as houses. You take the head ones, Frank. Our first discharge is instantly followed by the second. Three are down. See that other fellow; he has separated from the flock. Is he going down? No. Yes, sir. There he goes all in a heap stone dead. How could he go so far? Four of them. This rather beats the shooting up our way with the thermometer at 10° or 15°, eh, Frank?

Numerous flocks of swan have from time to time been passing over, long gunshot off, and we have let go TT's at them backed by 5drs., with the result of having the shot bring up against them with a *thr-r-up*, and seeing them shake themselves and keep right on.

We stay till 4 o'clock with varying success, making many misses and some good shots. Counting up we find our bag for the day shows seven geese, six black ducks, ten sprigs, three shovellers, seven widgeon, four teal—a total of thirty-seven birds. Not such a big bag, you will say, but big enough, we think, and the best we have yet done in duck shooting. By dark we are at our landing again. After supper we adjourn to the room with an open fire, our pipes are lighted and we give ourselves to that comfortable sort of drowsiness which comes over one after a day's work of this kind, nodding in front of the fire with an occasional comment as to how we might

have shot this one, and why we did not get that one. Bedtime, which soon comes, and with it Billy, to find out the morrow's plans, or as he puts it, "What youse gemmens was wantin' to do to-morrer." We decide to try Little Pete's Point again in the morning, with the foremost idea of securing that beautiful and majestic bird the swan. In the afternoon we will try the Broad Creek, where we may expect some mallard and teal, and so it is arranged.

We take the sneak boat this morning, for there is a fair wind. The sail is up and we are off down the creek with its intricate turnings, grounding now and then, but making good time. Our decoys are soon out and the fun commences again. Sprigs, widgeons, shovellers, black duck and four geese, perhaps twenty birds have fallen to our guns, and we have shot some half-dozen shots at the swan with the same result as yesterday, when Billy says, "Mark south!" *Wuf-wooo-ooo-wuf-ooo* comes the plaintive call to our ears, and Billy answers with truly wonderful imitation (for he can call swan to deceive the wariest of the flock). They are coming this time, and now if they do not sheer off just out of range as they always have before we shall get a shot. Fifty yards high, straight as an arrow, they come for our decoys. Nearer

mallard, teal, widgeon and two geese. We made a mistake though in not taking our light guns, for those little greenwings would come in like bullets, take a shy at the decoys and dart off before we could swing our big guns on to them. What we did stop made it the more gratifying though, for with their erratic flight we would have to be pretty lively with our light guns.

We reached the house a little after dark, well satisfied with our second day's sport. I might go on and tell you how we spent the two remaining days after snipe and bay birds, but I have now made a long story. We shot during our stay the following varieties: Swan, geese, read-head, canvasback, mallard, teal, black duck, widgeon, sprigtail, shoveller, blue peter, shell drake, jacksnipe, beetle-head plover, yellow-leg, marsh quail, besides several varieties of shore birds, and I will venture to remark that one does not often get in four days' shooting in one place such a various collection as the above. The result of our trip was more than satisfactory, and fulfilled all our expectations.

PROVIDENCE, Rhode Island.

UTAH WAKES UP.—Last Monday Game Commissioner Barrett had J. H. Oliver and I. W. Little arrested for killing ducks out of season. The game law expired on Tuesday, but it seems that these sportsmen anticipated it by one day, with the result stated. They were taken before Commissioner Platt and pleaded guilty, and a fine of \$50 each and costs was imposed. The gentlemen thought this was pretty steep, and stood the judgment off for a few days, but finally settled up yesterday. Commissioner Barrett is no respecter of person, and says that the game law must be obeyed so long as he is commissioner. *Salt Lake Herald, Sept. 6.*

THE ADIRONDACKS LEAGUE CLUB, it is said, has commenced an action for trespass against Supervisor M. M. Mayhew, of Marcy. The club posted notices on its preserve of 150,000 acres in the wilderness some time ago warning the public against trespassing thereon, but this had only a temporary effect, and for the last two months people have been fishing or hunting on the club's lands without any apparent regard to the possible consequences. About Sept. 1, the date when the season for hunting deer began, Mr. Mayhew and party visited North Lake with a number of dogs, presumably with the intention of hunting. It is not known that they killed any deer, but the act of trespass under the existing law was evidently considered sufficient cause for action. It is understood that the club proposes to make this a test case. —*Boonville Herald.*

THIS RESCUED ROOSTER LIVED TO CROW.—A peculiar incident was described to me a few days ago by the actor Mr. Murr Brown, of Camptown, Pa. In his way I give it: "Coming home from Wyalusing with my gun, a few days ago, I came across the woods back of Elliott's. I saw a motion on the ground in a thicket, and made out that it was a hawk picking at something. I shot the hawk, and found he was picking at a large rooster. As I approached the fowl seemed to move its eye, and I found that it was warm. I concluded that it might be good to eat and took it along homeward. It soon began to revive, and by the time I got home it was right lively, and now it is out yonder with the rest of my fowls as well as any of them. It was a brown leghorn, just what I had been wanting to get." It seems to me that it would be well to call the progeny of that rooster Brown's Hawkeys. Only to bear in mind that this suggestion is counting chickens before they are hatched.—GEO. W. LUNG.

CANADA MOOSE.—On a recent trip to the Ottawa River we heard of one hunter who last spring killed forty-seven moose and used the carcasses as bear bait. There is still good moose hunting at almost any point on the Quebec side of the upper Ottawa. Steamers run from Mattawa to the head of Lake Temiscamingue, 125 miles further north. Half a day from the steamer will take the hunter into good territory for moose, and by three or four days' canoeing from the head of the lake good caribou hunting may be obtained. Ruffed grouse are plentiful everywhere. In addition to all this the scenery of the upper Ottawa, particularly of the Seven League Lake, traversed by the steamer, and of Lake Temiscamingue is very fine. Parties desiring as a trophy of skill and prowess a head of the moose will make no mistake in seeking the upper Ottawa.—S. R. CLARKE.

CONNECTICUT RAIL BIRD SHOOTING is reported to be poor this year.

AMONG THE WILDFOWL.—IV.

BLACK DUCK. SEE HIM JUMP! QUICK! HOLD ABOUT THREE FEET AHEAD AND HE IS YOURS.

they come, seven of them—80, 60, 50yds. from us, and our guns roar. The leader drops, whirls a few times and strikes the water with a tremendous splash, a confused mass of neck and wings. Our first swan. I say our, for we both singled him out in our anxiety to make a sure thing of it. It is a beautiful specimen, weighing 22lbs. He is carefully put away, for Frank is to have him mounted to grace his billiard room. We now feel satisfied with our morning's work, and conclude to pull up and get back to the house for some lunch in order to reach Broad Creek by 2:30.

We got to the blind on the creek by 3 o'clock, but on our way down I had an experience which made me anything but comfortable. Seeing some ducks drop into a slough on one of the islands we attempted to stalk them, but found the land very swampy and the reeds high. We located them at last, and saw some fifty or more mallards and black ducks bunched in a little pond-hole not 30yds. across. As I was getting into position to shoot I stepped into a soft place, and down I went full length into the mud and water. Frank was so rattled at my sudden disappearance that he succeeded in dropping only one as they rose. I did pull myself together in time to get one too, but to finish our luck we could not find either of the dead birds in the thick reeds. We were somewhat consoled, however, by our work on the creek, killing several

HINTS FOR WOODS LIFE.

Editor Forest and Stream:

As hunters are too poor to carry a hotel with them I propose to give some of the ins and outs of woods life.

If it rains in summer peel a piece of spruce bark, say 2ft. square, cut a hole in the middle for your head, stick your head through and g'long. Likewise spruce bark your shelter at night.

If you are nervous about animals remember that fire is their terror. Even a woman can easily drive any animal from her path by a piece of birch bark lit with a match. I believe any one could hold at bay a hundred wolves; if he would place his birch bark in a split stick 4ft. long, back up against a rock or tree and dexterously handle his "terror."

But in winter we have another foe to fight—Jack Frost. This requires a knowledge of camping out. A very good way (if you have no tent) is to select a large standing tree (leaning somewhat to the leeward). Build your fire on the windward side, standing your wood endwise short at first, but finally about 4½ ft. long. The heat of your fire will be at the top of your wood. There will be a little smoke, but what there is will eddy around the tree and spiral upward nicely. Now get something to your back and you are all right.

Another way is to select a sleeping chance on the leeward side of a big log (the bigger the better). Build your fire 4ft. in front, high up as possible, and provide several logs, one above the other, for back-log and chimney-back. Now then, you want your fire so hot as to drive your enemy Jack Frost well back. Then your friend, the fire, turns your enemy and drives you too. To remedy this break half a dozen evergreen boughs and stick them in front of you, thus grading the heat to a dot. Then let the fire and Jack Frost charge and recharge right over your heads, you're all right. Now you can look the fire right in the face, go to sleep and dream.

Another good way is to find a large tree turned up by the roots and select your sleeping apartment in the angle formed by the body of the tree and its turned-up root. But in winter when the snow lies 4ft. deep it is hard at the best. I generally try to find a dry stump or tree and pull it across something, if possible, to break it up and save chopping. Then I take it as best I can, in any way I can invent at the time. There is not much sleep about it, anyhow, till just before morning, when your fire has melted the snow away, when you may pick your chance and catch a little "nip-nap." We sometimes shovel down to the ground, using one of our snowshoes for a shovel, but it hardly pays for a single night's camping out. A fatigued hunter will often start a fire, eat his supper, then lay himself away for an hour or so, then chop wood by fire-light, sometimes by spells all night. Sportsmen know but little of this. I have often been surprised at some of their writings, so topheavy with scholarship but with so little ballast. D.

STILL-HUNTING DEER WITH BIRD DOGS

Editor Forest and Stream:

"Aztec" requests information in regard to my method of training bird dogs to still-hunt deer:

I have no special method of training them for that purpose. Before using them in hunting deer they were thoroughly trained for birds; that is to say, thoroughly broken according to my idea of training. When thus broken they will take to hunting deer as readily as birds. Get one deer down and the dog is fully broken thereafter. He will show more happiness over one deer than over a hundred birds.

Hunting deer in no wise injures the dog for bird hunting. In fact I believe it is a benefit, because you will be more rigid in your discipline when after deer than when after birds.

I have no choice between the pointer and setter for deer. As for courage, the setter has enough. The only trouble is a lack of discretion in attacking a wounded old buck, sometimes. A single dog cannot manage an old buck as a pack of foxhounds can, but soon learns to bring him to bay and keep him there until you are within gunshot.

In a race of a mile or two after a wounded deer that dog will outstrip any foxhound I ever saw, and I have seen many such a race.

I break my dogs when very young as far as possible before taking them into the field. I take them in walks and discipline them to walk just in advance of me, and do not allow them to leave that position without leave, by a wave of the hand. When in the field, often in hunting up wounded or dead birds, I require them to maintain the same position. Also to slow-trail in that position birds that may be recovering, having only a broken wing.

When they are thus broken, you will have no trouble in still-hunting deer. H. L.

KANKAKEE, Ill.

PARTRIDGES THAT ARE GROWING WISER.—Bedford, Quebec.—Our dogs are not fit for partridge. We use only spaniels, and the birds are so wild they won't tree as they did some few years ago, and it is my candid opinion if we used a good pointer or setter there would be good bags of partridge got in and around this place. I have seen some account in the FOREST AND STREAM that a man that would shoot a partridge on a tree was nothing but a pot-hunter. Well, I would only be too glad to have some of those fine shots up here for a week or two. You go in the woods, hear a roar, and off goes your bird; perhaps you never see a feather of her. Then talk about not taking your chances on the ground or in a tree.—HOT.

HUNTING AND FISHING IN THE NORTHWEST.—Are you planning for an outing this summer? Have you ever looked up the famous resorts of the Northwest? It is not an exaggeration to say that the best hunting and fishing grounds in North America are found in the Territory tributary to the Northern Pacific Railroad. The lake park region in Minnesota affords pickerel, pike, bass and muscalonge; rock bass are found in numerous streams, and deer, elk and bear abound in the forest regions; antelope are found in North Dakota. The Snowy, Bitter Root, Grazy, Rocky and Cascade Mountains are the home of moose, elk, caribou, cougars, Rocky Mountain sheep and goat and other large game, while all of the Northwest States abound in feathered game. Rocky Mountain trout and grayling are caught in the Yellowstone, Gallatin, Madison, Jefferson, Clark's Fork and Green rivers, affording unrivaled sport. An interesting pamphlet, "Game Preserves of North America," can be obtained free on application to CHAS. S. FEE, G. P. & T. A. of the Northern Pacific R. R. at St. Paul, Minn. Descriptive publications concerning Yellowstone Park, Pacific coast and Alaska will also be mailed on receipt of application, referring to FOREST AND STREAM.—Adp.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents, and specimen illustrations from the volume.—Adp.

THE YELLOWSTONE PARK.

EXTRACTS from the report to the Secretary of the Interior, by Capt. Geo. J. Anderson, Acting Superintendent:

PROTECTION OF FORESTS.

Thus far the season has been extremely wet and we have had very little trouble with forest fires; the few that have appeared have been extinguished by the patrols without calling out the troops for assistance. I sincerely trust the same good fortune will attend us to the end of the season, but it is scarcely probable. There are more camping parties than usual in the Park this year, and it requires ceaseless vigilance to compel them to thoroughly extinguish their fires. Other sources of fires are carelessly thrown cigars and cigarettes, lightning, and probably even the rubbing together of partially fallen dead trees as they are swayed by the wind.

The serious consequences of a fire here can only be understood by those who have observed the almost impenetrable thickness of the pine forests with their dense masses of fallen and decaying trees.

OUTPOSTS IN THE PARK.

Up to the present time there has never been an outpost near the south line of the Park. As settlements are rapidly springing up near Jackson's and Henry's Lakes, and these regions are becoming the famed resorts of hunters and hunting parties, a permanent station somewhere near the junction of the Lewis and Snake Rivers will become a necessity. I hope to send a small party there to spend the winter of 1891-92, and render needed protection to the immense herds of game in that vicinity.

TOURISTS.

The most ceaseless vigilance is needed to prevent tourists from mutilating the beautiful formations in the Park. I do not believe 10,000 men could entirely accomplish it. Ladies are the greatest specimen hunters, and often they do not carry their trophies further than the hotels. By a careful supervision of the guides I have managed to keep this form of vandalism at a minimum. Another source of great annoyance is the persistence with which men will write their unlovely names on everything that is beautiful within their reach. This form of barbarism is confined almost entirely to men, and, if we may judge from the writing, to the boorish and illiterate.

About a week ago a stage coming into the Park from Beaver Cañon was held up and robbed about 20 miles beyond Park limits. I gave immediate orders for a careful search by all the patrols in that direction, but so far have got no trace of the thieves.

There is an unusually large number of people entering the Park with guns of various kinds. From those who are simply making a tour of the Park, with the purpose of returning this way, I take the arms and restore them to the owner on their exit. A great many parties, however, come this way with intention of going out by Riverside or Jackson's Lake. For such parties I can only seal the guns, with admonitions not to break seals within Park limits. This is only a measure of security with such people as would not hunt inside the Park in any event. If others get in unfrequented localities I fear temptation would prove too much for them.

I am constrained to recommend that sufficient notice be given that from a fixed date, say June 1, all carrying of guns within the Park will be strictly prohibited. Exceptions can then be made and special permits granted by the Superintendent to people of undoubted reliability.

FISH.

For the most part the lakes and rivers of the Park are literally filled with trout; I have never seen so many fish elsewhere as there are in the shoal waters near the borders of the Yellowstone Lake. Two years ago the Fish Commission began stocking the streams that were destitute of fish and the work was continued last year. At the present time some members of the Commission are in the Park making an examination of these plants. I hope they may yet stock some of the smaller lakes with black bass and thus afford a variety of sport to the angler.

POACHERS.

So long as there is no law within the Park for the prevention of hunting and trapping, it will be a most difficult matter to break them up. Cook City, just off the northeast corner of the Park, is fed entirely on elk meat, and I doubt not a large proportion of it has been killed within the Park limits.

On my arrival here I was told that one Van Dyck was the principal hunter for that place, and that his hunting grounds were near Soda Butte. I sent out three separate expeditions for him before he was finally taken, in his camp near Lamar River, with beaver traps and other evidences of his trade in his possession. I kept him in custody for over a month awaiting the Secretary's orders, and then turned him loose after confiscating all his property. He is now in Cook City once more, but I hear that he is conducting his expeditions outside the Park. As the killing of elk in Montana is absolutely prohibited by law for a term of years, it seems strange that this traffic at Cook cannot be broken up.

I am satisfied that both hunting and trapping are carried on within the limits of the Park over the western border. I shall make an endeavor to "encourage" the majority of these trespassers by bringing a few of them to justice this fall.

Mr. Ed. M. Wilson, who has been a most invaluable man as a scout, guide and hunter, mysteriously disappeared on July 27 and left no trace behind. It will be quite impossible to replace him, for there is no man in the region who at once has the intimate knowledge of the country, and of the hunters and their methods, that he had.

I learn of three or four buffalo heads that have been mounted in Bozeman, Livingston, and other neighboring towns within the past year. I doubt not all of these were killed within the Park, or very close to the line without it. Such specimens are become very rare, and fine ones are held at \$400 to \$1,000. Such prices tempt the cupidity of the border pirates who live near, and with small equipment they can enter the Park on foot and take their chances of capture and the confiscation of their small stock in trade.

The most effectual way to break up this business would be the prosecution of the taxidermists who purchase the specimens—possession of which is prohibited by the laws of all the adjoining States. I have abundant evidence, however, that the buffalo are contented and quiet in the Park and that they are on the increase. Some tourists who went through the Park in May saw a herd of about thirty, with several small calves, near the Trout Creek lunch station. About the same time some employees of the Yellowstone Park Association saw what was probably the same herd, and I saw there an abundance of fresh signs the first week in June.

In July I sent Wilson out to observe the herd that ranges near the west line of the Park. He found two small bands of about thirty each, one with twelve or fifteen calves; in addition he saw several single ones and small bunches. I do not think it is exaggeration to say there are 200 and probably there are 400, within the Park, and that they are thriving and increasing.

The elk have increased enormously, and most conservative estimates place their numbers at 35,000, and I have no doubts of the presence of that many. Their continuance in the Park is assured, and their overflow into adjoining territory will furnish abundant sport for the hunter.

Mountain sheep, deer, and antelope are tame, numerous, and on the increase; as they are hunted but little, if at all, they are certain to be preserved. There are a few moose in the extreme southern part of the Park, whose numbers I shall endeavor to approximate during a trip that I hope to make to that country in October.

I presume trapping of the fur-bearing animals is carried on across the Park lines, but careful watching and one or two arrests have reduced it to a minimum. One or two more examples like that of Van Dyck will put an end to it.

CAPTURE OF ANIMALS.

On my arrival here I found authority to capture animals for the National Zoological Gardens, at Washington, D. C. The appointment as hunter was given to Mr. Elwood Hofer, the most competent man in the country. Owing to scarcity of funds with which to pay him he resigned his appointment after two months, but continued to collect specimens. He has caught and turned over to me, and I hold awaiting shipment, two black bear cubs, three young foxes, two elk, and a black-tailed deer.

I also had two antelope, but one night about two weeks since some carnivorous animal broke into their inclosure and killed and ate them. When the time for shipment comes I can readily trap and add to the collection a number of the smaller animals, like wolverines, wolves, lynxes, martins, badgers, porcupines, beavers, etc. All can be shipped in one car, which should go under charge of an attendant.

Bears have become very troublesome at all the hotels, camps, slaughter-houses, and other places in the Park where there is anything for them to eat. They have not proved at all dangerous, but it is impossible to keep provisions anywhere within their reach.

I authorized the capture of one at the Fountain Hotel, but he died of a rupture of the heart in his struggle to escape. I had another caught in a trap there and he is now in the Washington gardens.

I have had four small bears caught: two I have still, one broke his chain and escaped, and one was eaten up by an old bear while he was chained in front of the house at Yancey's. As winter approaches I may find it necessary to kill an occasional one, especially if they become destructive of the game, or beef and mutton herds. By another season I hope to be able to supply specimens of all the animals native to the Park; their retention here during the season has proven very interesting to the tourists.

LAW IN THE PARK.

It seems hardly necessary to call your attention to the need of laws for the government of the Park. Senate bill 491, first session Fifty-first Congress, as amended and referred to the House Calendar, has much to commend it, and with a few modifications would effect all that can be desired. For convenience the jurisdiction of the court should be on the Montana side and the railroad charter (section 11) should by all means be omitted. Otherwise the bill is as nearly perfect as may be, and I trust the passage of it, or one similar to it, may be pressed and accomplished.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

ANGLING NOTES.

MR. ALFRED C. HAND writes from Pequaming, Michigan, that the season is now over for trout fishing with them, and the anglers are regretfully putting away their tackle for the winter. He says that it has been a good season in that section for trout. His best average was 5 fish weighing 8lbs. 2oz., and the largest 2lbs. 1oz., but he landed one for a companion that weighed 4lbs. 4oz. This fish was taken on a No. 6 silver-doctor, though as a rule he thinks that the old fashioned brown-palmer is about the most killing fly in that country.

Mr. Jas. L. Livingston recently caught a 3lb. 2oz. speckled trout in Preston Pond, the last fish of the season. He had just told his guide "Here goes for the last cast!" and it was a lucky one.

Mr. Chas. F. Imbrie has returned from his trip to the Adirondack Club. He had very little fishing, but his son Andrew killed two fine bucks with his Winchester, not in the water, but running. Professor Vail dropped in to show some of his photographs taken on a trip to Nova Scotia. They are very beautiful, and some of the strings of trout are enough to make an angler wish he could try that wonderful country. Though rather late, yet there is time between now and Oct. 1 to make the trip.

One of the happiest of the army of anglers recently returned is Dr. Hasbrouck of this city, who killed 6 salmon and 16 grise on the Miramichi. It was his first trip after salmon and it is worth while to hear the Doctor describe how he lost his two first salmon the same day he arrived at the camp, and how he covered himself with glory the next day by landing two without gaff or guide. I never have caught a salmon, but I know just how he felt. The man that kills his first caribou after a successful stalk feels just that way.

In answer to inquiries as how to best preserve flies through the winter, I would advise keeping them in an empty segar box, first seeing that there are no moth or eggs among them. Wrap box up in paper, but there must be no holes, and fasten securely. Moths will not eat through paper, but I think they rather enjoy camphor.

Bluefish are running "outside" of large size and fine condition, but there do not seem to be many in the bays. The best way is to go down to Patchogue the night before and make an early start. Boats and bait are plenty there. Striped bass are being taken in fair numbers, but they require hard work and good fishing. The largest I have heard of lately was taken at Woods Holl, weight 35lbs.

Somebody is trying to boom Stamford and Greenwich, Conn., in one of the daily papers, but if the reports are true, the fishing must have improved very suddenly.

SCARLET-IBIS.

THE GRAVEL COUNTED.—Albany, Sept. 15.—Belle, nine years old, caught two pickerel one day weighing 6lbs. and 6lbs. 10oz, respectively; but George beat her record last week by taking a 7-pounder. Little Belle says if they had brushed the gravel off him he wouldn't beat her record.—DEXTER.

FISHING WITH TRAINED CORMORANTS

By CAPTAIN F. S. DUGMORE, R. N. R., Master of the Falconry Club 1878 to 1888.
APOLOGIA.

IN the Chinese Empire, the training and the serious use of the cormorant as a bread-winner constitutes an industry by itself, receiving the entire attention of a large class of professional fishermen, to whom this bird is as much a necessary implement of their calling as the gill-net is to the mullet-catchers of the Gulf of Mexico.

In Europe, on the other hand, for the last two hundred years, the cormorant has had little care bestowed upon it; unless for its destruction by the owners of valuable fishing rights. A team of fishing cormorants has seldom if ever been kept except as an adjunct, and a comparatively unimportant adjunct, to a stud of trained hawks; attended to only in the spare moments of the master or his falconers, and very rarely used except when the weather, the season or accidental circumstances made the infinitely more exciting and absorbing sport of falconry out of the question for the time being.

It is rather strange that such should be the case; since, while anything like real proficiency in the science of falconry in its numerous branches imperatively demands the study of a lifetime, the entire details connected with the training of cormorants, and their use for fishing purposes, are so simple and so easily acquired that any person of ordinary intelligence and of a nature sympathetic with the animal creation can master the whole thing in a fortnight; with a little skilled guidance he can become a proficient in less than a month.

Moreover, while the maintenance of a falconry establishment is an exceedingly costly undertaking, a team of trained cormorants is comparatively inexpensive.

So that it would appear somewhat remarkable that many lovers of sport and of animated nature whose leisure or whose means have not permitted them to indulge in the "noble art" of falconry, have not gone in for the only less pleasurable excitement so easily obtainable from the "coursing of the waters," as cormorant-fishing has been not inaptly designated.

It is more than thirty years since I began my own apprenticeship to the art of falconry; and yet—though I have lost no opportunity of picking the brains of such experts as the Maharajah Dhuleep Singh, Colonel Delmé-Radcliffe, the Rev. Gage Earle Freeman ("Peregrine" of the London *Field*), the late John Pells, falconer to the Dukes of St. Albans; the late Robert Barr, falconer to the Champagne Hawking Club, and his still more celebrated brother, the late John Barr, for some years my own head falconer; as well as of studying the methods of Greek and Turkish falconers on the shores of the Sea of Marmora; although, too, I have owned considerably over a thousand hawks and falcons of all kinds, and have myself, unaided, carried out the entire training of hundreds of them—yet, I say, to this very moment I never meet and compare notes with a brother falconer without discovering how much I have yet to learn.

It is vastly different with cormorants. John Barr and I, between us, taught the late unfortunate Crown Prince of Austria—a glorious sportsman and a very apt pupil—how to handle and use them for fishing in a couple of days; while it took less than a week to impart all requisite instruction in their management to the Count von Eltz, whom the Empress of Austria sent to Broughall Castle (my then residence in Ireland) to receive over for conveyance to Vienna a team of six trained cormorants presented by me to Prince Rudolph.

Of course a practical falconer has a great advantage over any other learner, from the habit, acquired by long experience, of reading the thoughts, divining the intentions, and thereby being able to anticipate the actions, of his feathered intimates. But I will guarantee that any sympathetic lover of nature, possessed of average intelligence and patience, and of a reasonable amount of command over his temper, can, by following the plain directions I am about to furnish for his guidance, learn the entire art of cormorant training in a fortnight, and become a thorough proficient in taking fish with these birds after less than a month's practice.

The sport is one that is preëminently well adapted to this continent.

It demands very little time and very little outlay.

There is scarcely a part of the American coast where the birds for training cannot be cheaply procured without the slightest difficulty; they are found even on most inland waters of any great extent.

There are very few places where coarse or refuse fish cannot be inexpensively obtained for their support, a great advantage over Europe, where I have had to feed my birds on beef, mutton, horseflesh, bullock's liver, or even rabbits, none of which are calculated to keep cormorants in good health for any length of time, while all of them, excepting liver, which at best is only fit for a makeshift, are rather expensive diet for birds requiring daily from 1 to 3 lbs. weight a head.

Then in America there is such an enormous extent and such infinite variety of practicable waters available for fishing with cormorants, without interfering with vested rights, or provoking fancied grievances. You have all the grand estuaries of the Atlantic seaboard, with their innumerable creeks and ramifications, fishable to their very heads wherever so much as a yard wide and two feet deep; the clear rapid rivers of Florida, where not a movement of the birds or their quarry is hidden from the sportsman; and in more mountainous States, bright rushing brooklets and trout streams, far too small for fly-fishing, but along whose banks the owner can run unobstructed, keeping up with his birds in their lightning-like dashes and sub-aquean doubles after the speckled beauties. Prejudice, and prejudice only, might for a time interfere with their use, or, at least, render it inexpedient, in preserved trout waters, which should as a rule be avoided. Unlike the Old World, with its artificialisms and conventionalities, prejudice in this great country is a very fleeting and temporary affair. People like the Americans, accustomed keenly to sift every statement that is put before them, never keep a long or a close hold on a prejudice that has not good sound reason at its back; and the cormorant-fisher would do well to respect the prejudices of his brethren of the angle until they shall have learned them to be utterly without reason or justification.

The destructive capabilities of cormorants, especially when domesticated, are not quite what they are popularly imagined to be, nor is the working capacity of a trained bird by any means unlimited.

Against the current of a mountain brook—and our course is always up stream—ten minutes' consecutive work for each bird is more than enough, and will necessitate not much under half an hour's cessation for rest and drying; for, strange to say, and paradoxical as it may appear, a cormorant cannot work under water when once wet through. He requires to dry himself thoroughly with many wing flappings in the sun and wind, after which he will carefully dress his plumage over with oil obtained from two glands just above the tail, by the pressure of his powerful beak.

Unlike the "trout hog" of the Adirondacks, trained cormorants despise fingerlings, especially when anything better is obtainable. Their sporting instincts seem to be so strong that they will always single out the largest fish within their powers—sometimes above them.

Needless to say, there are no pricked fish to be returned to the water, some to die, others to scare their fellows with the tale of their narrow escape, which fish, like ants, undoubtedly have some means of communicating in a language of their own.

All things considered, I have no hesitation in asserting that preserved waters will be no more injured by cormorant fishing, within reasonable limits, than by customary legitimate angling, also within reasonable limits; far less than by the exploits of the Adirondack trout hog, as so often chronicled in the charming pages of *FOREST AND STREAM*.

The most rapid destruction I have myself ever accomplished with cormorants was twenty-two trout taken in fifteen minutes by three birds. This was in a rough Irish mountain stream flowing into the Shannon, averaging scarcely more than 2 ft. in width, and absolutely unfishable by ordinary methods. No one had ever succeeded in rising a trout therein with a fly, and I never heard of any good being done by the use of worms. The twenty-two trout averaged about three to the pound, and there was but one unsizable fish in the basket, though I could see numbers of small fry in the water.

Fishing (by permission) a stretch of preserved water in Oxfordshire, a fine basket of trout (some of which turned the scale at 3 lbs.) caught by my birds contained not a single fish under a pound in weight, though, the pool, generally kept artificially closed at both ends, was noted as a breeding place. In fact no one had any idea that this water contained fish so large as those taken out of it by my cormorants; greatly to the advantage, I imagine, of their smaller comrades and customary prey. But in so large and variously-featured a country as America, there can be no excuse for (uninvited) encroachment by the cormorant trainer on the domain of the fly-fisher.

I am myself personally acquainted with innumerable lakes, tarns and mountain brooks in Wales, Scotland, Ireland, Switzerland and Canada on which no one within the memory of man has ever succeeded in getting a rise, and on some of which trolling tactics have been scarcely better rewarded.

Traveled Americans will doubtless remember a lovely clear blue-green river—I have often vainly flogged it—near Cannes in Provence, teeming with fish which are never caught by other means than netting; and many of the tempting looking streams of northern Italy are similarly circumstanced.

Conditions approximately identical prevail in many parts of the United States, as indeed in nearly all parts of the world. I have found them in Asia Minor, and far in the interior of Africa, north and south.

A rod and line are useless in a mountain rivulet a foot wide, and not much better in the long narrow creeks up which the gray mullet love to run in close-packed silvery shoals from the grand estuaries of the coast.

But these same foot-wide rivulets and ditch-like creeks afford the very best opportunities for the cormorant trainer without interfering in the slightest with other people's sport. (There are some splendidly stocked creeks running into Tampa Bay and Charlotte Harbor, in Florida.) Here, then, I would advise the cormorant fisher mainly to seek fresh worlds to conquer, fields wherein to exercise the prowess of his feathered friends "with a clear conscience, void of offense." I would counsel him to follow my own practice of eschewing waters, even unpreserved, that are frequented by brethren of the angle, unless on exceptional occasions when their owners desire to see an exhibition of his birds' attainments. Readers of *FOREST AND STREAM* need no reminder from me that "live and let live" should be the first maxim of every true sportsman, no matter what may be the particular branch of sport that claims his own individual sympathies.

I will not occupy my reader's time with a long disquisition on the natural history or habits of the cormorant—in a state of nature—though I shall have much to say about him in a state of grace, *i. e.*, training, which effects certain not inconsiderable changes in his entire constitution. For his natural history any good ornithological work can be consulted.

Round the British Isles we have two species of cormorant, the shag, or green and crested cormorant (*Pelecus cristatus*), a lovely little bird, and very docile, but too small to take a fish of any size; and the common black cormorant (*Pelecus carbo*), which, however, varies somewhat in form in different localities, being evidently adapted by nature to the particular waters in which its living has to be obtained.

At one time I used to draw my supplies of young cormorants for training from Lulworth, near St. Alban's Head in Dorset. In this district (the Isle of Purbeck, famed for its marbles) the cliffs for the most part go down sheer into the water, which is very deep close into the shore. Consequently the local cormorants would starve unless possessed of exceptional diving powers. I found their conformation accordingly of a rather peculiar type; long, slim, greyhound-like bodies, large feet, and very long tails; the tail and feet constituting the bird's diving apparatus, and having developed through long generations to suit its peculiar habitat.

On the other hand, round the Farn Islands off the Northumberland coast, the sea is shallow, but little diving is required, and the fish run very large. Accordingly, a cormorant I procured thence had an exceedingly short tail, was of powerful thickset build, and weighed half as much again as the Dorset birds.

I imagine a similar rule holds good along the American coast line. The cormorants I have seen about the Gulf of Mexico, on the Florida shore, appear to be rather smaller and weaker than the British black cormorant. But I have seen larger birds off Labrador; and I little

doubt that anywhere in the north, near Cape Cod for example, much stronger and better specimens could be procured; and be it remembered, that size is the most important requisite, since the larger the bird, the larger the fish he can tackle. The largest fish I have ever known one of my own cormorants to bring ashore, pouched, weighed a little under three pounds and a half. But my big Northumbrian, aided by another bird, succeeded in drowning and dragging from the Thames—for he could not lift or pouch it—a pike of over 5 lbs., after a grand battle royal, lasting fully a quarter of an hour.

A few words as to the cormorant's methods of work may not be superfluous. The pelican, gannet and booby do their hunting in the air, only plunging into the water to seize prey already found and marked. The cormorant and razorbill (*Alca torda*) and sundry other diving birds, do all their hunting under water. They plunge first, before seeing their prey, seek it under water, and pursue it under water until caught, when they bring it to the surface, and in the case of the cormorant, chuck it up into the air in order to get it head downward into the elastic neck pouch, preparatory to swallowing, or when a trained bird is concerned, bringing it ashore. But while the razorbill uses its wings and would be crippled without them, as it literally flies under water, the cormorant keeps his folded as tightly as possible to his sides, depending entirely on his feet as a propeller, twin-screw fashion, and on his tail as a quick and powerful rudder. (Vide illustration 1.)

We take advantage of our knowledge of these facts to cut one wing of a cormorant, greatly facilitating its training, especially in the case of an old-caught bird, and in no way interfering with its work: while we avoid with the utmost care breaking so much as a single feather of its tail, as the bird would thereby be heavily handicapped in twisting and doubling under water, especially after a fish that succeeded in breaking back past its pursuer when working upstream.

[TO BE CONTINUED.]

PERCH VERSUS TROUT.

THE following series of questions about the relations of predatory fishes like the perch to successful trout rearing recurs so frequently in our correspondence that we give the communication in detail with answers based upon experience, and would be glad to receive expressions of opinion and records of experiments in this direction from others.

Editor *Forest and Stream*:

I am about renting a small lake here, about 400 yds. in length and from 80 to 100 yds. in width, for the purpose of stocking it with speckled trout. Before doing so, however, I wish to obtain some reliable information on some points, and have concluded that I could not do better than make application to your paper in the form of questions, which I think it almost certain either you or some of your correspondents would be able to answer.

The lake in question has a spring of cold water at the upper end coming out of the rock, and for about 20 yds. that end of the lake is covered with stone and gravel, the rest of the lake is mostly mud bottom. Up to about nine years ago the lake was well stocked with speckled trout, but was then nearly cleaned out by netting, and about the same time some one put in perch, which have increased enormously, as the lake abounds in food. For the last four or five years not a single trout has been seen in the lake, and my object in writing is to obtain, if possible, the following information:

1. Has the introduction of perch caused the extermination of the trout, or must we conclude that the trout were exterminated either by netting or some other means before the perch were put in?
2. If the perch have exterminated the trout in what way was it brought about? Is it because the perch devour the trout, or the trout spawn, or because the large trout devour the young perch and the spines on the back of the perch kill the trout?
3. Is it possible for trout and perch to live together in the lake I have described?
4. Is it advisable to exterminate the perch before attempting to restock with trout?
5. What is the readiest and most effectual method of exterminating the perch? Is there any way of doing it?
6. Are there any other varieties of fish besides bass and pike that could live and hold their ground along with perch?
7. Would salmon trout live and increase in numbers in the lake I have described?
8. What other variety of fish would you advise me to put in along with perch in case trout will not live with them?

JAMES P. TELFORD.

The probability is that netting caused the extermination of the trout. We infer from your letter that the trout was reproducing naturally in the lake at one time and found suitable food. The spines of the perch will not injure trout, for the latter swallows sticklebacks, which have stouter spines than the perch. If the perch have diminished the trout, they may have accomplished this by taking their supply of food. Perch and trout live in the same body of water, but the general opinion is that they cannot be reared together successfully, because the former is more prolific and spawns later, so that it devours trout eggs during the whole spawning season. It is, therefore, advisable to remove the perch before introducing trout if you can; but this will be difficult, to say the least. Black bass have so thinned out the perch in Sunapee Lake, New Hampshire, that they no longer interfere with the brook trout, and the latter are increasing rapidly; but many persons object seriously to placing black bass in trout waters, because of their predatory character. Rock bass (*Ambloplites rupestris*) and calico bass (*Pomoxys sparoides*) will thrive in the company of perch, and both of these are excellent game fishes and accessible to you. Salmon trout might live in a small lake such as you describe if the water is very deep in some places and cold enough, and they would dispose of your perch in short order. Whatever fish of the salmon family is deemed suitable should be represented by well-grown individuals and not by fry, which the perch can dispose of faster than you can furnish them.

THE BEARDSTOWN ROD AND GUN CLUB sends us a kerchief invitation to their first annual fish fry, Sept. 25, which promises to be a most enjoyable affair.

ALEWIVES AS EGG-DESTROYERS.

Editor Forest and Stream:

In your issue of Sept. 10 I noticed an editorial regarding the alewives in lakes Ontario, Cayuga and Seneca. As regards their migratory habits from Lake Ontario to the sea I know nothing; but from observation of their habits in Seneca Lake I consider them the direct cause of the decrease of the game fishes in Seneca and other waters.

They feed entirely during the spawning season upon the eggs of the trout, pike, bass and perch. Of a certainty the trout and pike feed to a small extent upon the alewives; but there is so much other food that is more palatable, namely, the stone perch, swifts, shiners and sucker fry, that the fish have no necessity to rasp their throats with the serrated belly of the alewife. I have watched the alewife time and again around black bass beds. They would hector the mother bass until she became exasperated beyond measure. The moment she left the bed to drive the intruder away dozens of them would pounce upon the unprotected spawn, and in a short time there would be an empty bed. The same with the rock bass, and the beds of the trout, pike and perch being unprotected fall an easy prey.

When our Fish Commissioner stocked Seneca Lake with alewives for the purpose of feeding the fishes he caused more direct damage to the fish and fishing than all the nets and spears that were ever used.

In closing I would say stock the inland lakes with game fish and let the lice of the ocean, or the American sardine, remain in its natural elements. LANCEWOOD.

BELLONA, N. Y., Sept. 12.

[The above shows the alewife in a new rôle, and it would be well to make sure that there is no mistake about the identification of the robber. Some of the small whitefishes or ciscoes consume eggs in vast numbers, but alewives are supposed to feed at or near the surface, chiefly on small water fleas. "Lancewood" might serve the cause of science by catching one of the fish engaged in eating eggs and mailing it in salt to the office of FOREST AND STREAM for identification.]

TAMAGAMINGUE LAKE TROUT.

Editor Forest and Stream:

Referring to the trout caught in Lake Tamagamingue, of which I wrote you last June, Mr. Samuel Wilmot, superintendent of fishculture in Ottawa, writes me that they are the *Salmo namaycush*. On carefully studying the description and drawing of this trout in Richardson's work, I feel no doubt Mr. Wilmot is correct.

It is supposed that the lake in question is fed by salt springs. With the exception of the moisture from the clouds it has no other visible means of support, though it discharges a considerable quantity of water, more particularly at its southern outlet. There are none of the *Salmo fontinalis* in the lake or in the streams issuing therefrom, though the southern is for fifty miles in appearance an ideal trout stream, with water as clear as a diamond swiftly flowing over a pebbly bed.

Whitefish and black bass are also taken in this lake, the latter sea green in color, the former having a strong shade of purple beneath their shining, silvery scales.

The *namaycush* will not bite during the summer months, as they retire to the deep water. I have just returned from a second trip to this lake in company with Robert S. Lewis, of Rochester, and everything I have previously said as to the edible qualities and extraordinary beauty of the *namaycush* I feel inclined to repeat with emphasis. S. R. CLARKE.

WHERE BASS ABOUND.

Editor Forest and Stream:

"O. O. S." in the FOREST AND STREAM of Sept. 3 accuses my friend and I of being "uncommonly gluttonous" because we caught 115 fish in five hours. Well, "maybe we was," but it can't be helped at this date, and we kept no small fish, putting all such back, and I can assure him that none of the fish were wasted, and that we didn't have enough to go around even then. As for the statement that it was nothing out of the common to take twenty or more any morning during the season, and that he considers it "considerably out of the common," if he will come out here and try a few days' fishing he will forever forswear bass fishing in any other region. I can assure him that the fish are the gamiest on earth, and that he will not stop to count them when he is so engaged in catching them. I am not a market fisher or hunter, and never, to my knowledge, wasted a pound of fish, and our waters will not be depleted by the amount of fish that can be taken by legitimate fishermen. I think "O. O. S." must be somewhat cross-grained, and if he will come out here next season I will guarantee to give him a good time with plenty of fishing, and he will not begrudge the waters we fish over any of the fish we carry away. Minnesota has more bass waters than any State in the Union, and a visit to our shores will make a new man of "O. O. S." E. J. L.

WEST DULUTH, MINN.

BLACK BASS IN HEMLOCK LAKE.

ANGLERS who enjoy the fine fishing for black bass in Hemlock Lake, near Lima, N. Y., will be interested to learn that the lake was stocked more than 30 years ago by the Lima Angling Club. The Rochester *Post Express* has recently learned the history of the transaction from one of the members of the club, Mr. Geo. A. Pierce. The basis of the planting was the following agreement:

It is agreed between G. A. Pierce on one part and H. J. Kintz of the other part that Mr. Kintz will within ten days deliver at the Genesee Valley depot, in Rochester, 75 live black bass, in good live healthy condition, for the consideration of \$25, to be paid as follows: \$10 cash in hand paid, \$10 on delivery thereof at Rochester and \$5 on the said fish being put into Hemlock Lake, the expense of barrels or vat to be paid for by Pierce.

March 30, 1859. HENRY J. KINTZ, GEORGE A. PIERCE, H. J. WOOD, G. A. PIERCE, } Committee. Dr. J. RIQUA, }

Fulfilled April, 1859, and March, 1860; 10 put in April, 1859, and 40 April, 1860.

The time was extended because Mr. Kintz was unable to get the bass during the first year; but in 1860 the number of 50 was completed and the result of the stocking soon became apparent. The fish were mature and weighed from 2 to 5 lbs. each.

RAINBOW TROUT FLAVOR.—Highlands, N. C., Sept. 18. —Editor Forest and Stream: I have to differ with Mr. Ripley (FOREST AND STREAM, Sept. 10) in regard to the eating quality of the rainbow trout. It is in the cooking that this gentleman must have failed to get out the fine flavor of this splendid fish. If he will take a 2 or 3-pounder and broil it, as a shad should be, he will find that it has fat enough to broil well, and will then be a toothsome meal for the most exacting fisherman. I can corroborate his statement that this fish breeds well and grows with great rapidity. The progeny of a hundred of these fish in my water three years ago have stocked the stream for nearly 20 miles down, and they are rapidly becoming as numerous as the common trout, while they grow much more rapidly. The old fish are sometimes met with, but in my narrow and rapid stream always break the tackle at the first dart, which they make with so much vim that a long reach is necessary to hold them. The last large one was taken last year, and weighed 3½ lbs., at the age of three years. It was in the pond where the fingerlings were planted.—H. STEWART.

NANTUCKET FISHING.—Capt. A. C. Adams, of the Fish Commission, went to Nantucket early in the week and brought us some news about the fishing. The large ponds—Miacomete, Seachaca, Long and Tom Nevers—contain white perch, eels and pickerel, the last occurring in Tom Nevers only. Anglers have had fairly good success during the summer, but overfishing and winter seining have thinned out the perch considerably. The catboats employed there in fishing on the shoals during the spring and fall for cod are engaged by sailing parties in the summer. These boats, about thirty in number, are splendid craft for sailing and fishing. They take had-dock, pollock, mackerel, scup and bluefish in their season around the island. Mr. A. H. Adams is a dealer in fishing tackle and takes pride in telling visitors about the resources of the waters. Scallops are very abundant on the sandy bottom and quahaugs are obtained in moderate quantities.

TARPON AT ST. AUGUSTINE.—A tarpon weighing 170 lbs. was captured in the Matanzas River this morning by Messrs. A. J. Kolb and J. W. Traver. The fish is the largest ever landed in the waters about St. Augustine and is a beauty. The two gentlemen started out early this morning with the determination of landing a king of the finny tribe. At 7:30 Mr. Kolb had a bite and immediately the prize began to churn the water. It took just one and a half hours to land the 170-pounder, during which time the fish dragged the boat from Mr. Kolb's wharf on the Matanzas, near Moultrie, up the river several miles, notwithstanding Mr. Traver's efforts at the oars to keep the boat near home. The fish is now on exhibition in Mr. Traver's store on King street. It will probably be mounted and placed on exhibition.—St. Augustine (Fla.) News, September.

WHITE PERCH IN MAINE.—Among the beautiful fishing lakes of Maine is Matamiscotis, about 50 miles above Bangor. The Lake Megantic Railroad runs past it and carries many campers into its forests. Capt. A. C. Adams informs us that the fishing for white perch is superb, and especially in August. In company with three friends he caught 150 fine perch in an hour and a quarter, his own line taking 79. Having no other bait, they began fishing with pork until they had caught a few fish, when they used pieces of the throat and tail of the perch. The lake is surrounded by forests, and the only settlement is Whitney Ridge. Boats can be had for \$1 per day. Capt. Adams fished in about 12 ft. of water. With suitable tackle the perch of this lake would furnish rare enjoyment.

THE JUNIATA NETS.—Port Royal, Pa., Sept. 18.—Acting under orders received from the Fish Commissioners, John Mateer, warden and two assistants, all of this place, started down the Juniata River yesterday morning in a skiff; they expect to be gone some days and will remove all illegal obstructions in the river down as far as its mouth. This work should have been done long ago; this stretch of river, especially below the Millerstown dam, is notorious for the number of fish dams, baskets and other illegal contrivances.—ONYJUTTA.

A BIG MACKEREL was caught in 45 fathoms of water off Seal Island, Nova Scotia, on Aug. 6. It measured 26in. from the tip of the nose to the fork of the tail, and was 10in. in girth. This is remarkable because of the great size of the fish and the depth in which it was taken. Capt. Pothier, who caught it on a cod hook, thinks it is the largest mackerel ever seen on the coast.—CHARLES HALLOCK.

PUGET SOUND and Commencement Bay are filled to overflowing with salmon, so that many of the fish are killed by the wheels of steamers. No such run has been seen before within the memory of the oldest inhabitants; even Indian traditions contain nothing to equal the present abundance.

A LARGE CHANNEL BASS.—Mr. Charles S. Higgins, of Brooklyn, caught off Fire Island, last Saturday, a channel bass weighing 31 lbs. and measuring 4 ft. 2 in. The fish was taken with rod and reel, and only after 40 minutes of hard fighting did the angler succeed in bringing the monster to boat.

"Forest and Stream" Nursery Rhymes.

VIII.

Two Vermonters a-fishing went,
One August day
In Missisquoi Bay,
And caught some bass for the President.
But while covered with glo-
ry the anglers blow.
The bass,
Alas!
Can never know
How grand a go
They had down the throat of a President.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 280 pages, price \$2.50. For sale by FOREST AND STREAM.

FIXTURES.

DOG SHOWS.

Sept. 22 to 25.—Inaugural International Dog Show of the Montreal Exposition Company, at Montreal, Canada. Entries close Sept. 8. J. S. Robertson, Secretary.

Sept. 23 to 26.—Inaugural Show of the Blue Grass Kennel Club, at Lexington, Ky. Rogers Williams, Sec'y.

Sept. 29 to Oct. 1.—Third Annual Dog Show, in connection with the Central Canada Fair, at Ottawa, Ont. Alfred Geddes, Supt.

Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.

Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.

Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.

1892.

Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInness, Sec'y.

Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. F. Capers, Secretary, Greenville, S. C.

Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.

Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.

March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.

March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Little, Sec'y.

April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.

Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.

Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. Davis, Secretary, Philadelphia, Pa.

Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.

Nov. 23.—Second Annual Trials of the National Bangle Club, at Nanuet, Rockland county, N. Y. F. W. Chapman, Sec'y.

Nov. 30.—Central Field Trial Club's Third Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y, 44 and 46 Wall street, New York city.

Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1892.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.

Jan. 18.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgariff, Sec'y.

—Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

TORONTO DOG SHOW.

THE third annual dog show of the Industrial Exhibition Association of Toronto opened on Monday, Sept. 14, and closed Sept. 18. The account of the opening of the show and the regular awards sent by telegraph appeared in our last week's issue. The result of the show was a successful one in every sense. While the crowds that swarmed into the building last year were to some extent smaller on this occasion, still it must have been quite a financial success, as the people were on the move most of the day, and at times the aisles were uncomfortably crowded. The arrangements this year were much better than last. Aisles were kept clean, the building was well disinfected and we are doubly pleased in having to compliment Mr. C. A. Stone on his courteous treatment of exhibitors, and the indefatigable energy he displayed throughout the show. The Toronto Fair people are noted for their penchant for red tape, and a dog show manager there meets with many obstructions through the ignorance of those in power of the needs of dog men, which requires considerable tact and patience to overcome. This Mr. Stone accomplished. The obnoxious port to port customs regulations also add considerable bother and labor to his position, as papers must be made out for every kennel and individual dog before they could leave for the States or the Montreal show. The building is exceptionally well adapted for the show, in fact is built for the purpose.

The feeding was a great improvement on that of last year, and we saw very little scouring. Spratts' biscuits were used. The judging commencing on Monday at 2 P. M. dragged on till Wednesday noon. Messrs. Kirk, Massey, Junior, Mitchener, Donovan and Capt. Harston were actively engaged during judging and throughout the show in helping things along. The weather, excepting on Friday afternoon, was all that could be desired, perhaps a little warm, but the dogs in the cool, airy building did not suffer. The class of dogs was about the same as at Hamilton the previous week, but the addition of puppy and novice classes accounted for the increased entry without any improvement to the show, as we saw several litters of puppies that had been better at home. The judges' names are given with their respective breeds reported upon, and little further can be said except that Toronto has added one more most successful show to its list of past triumphs. The criticisms of the different classes follow the order of the catalogue, which was a great improvement on that of last year, and had few mistakes.

MASTIFFS.—(CHAS. H. MASON).

The exhibit in this breed this year was a great improvement on that of 1890. The presence of the Flour City Kennels showing the Canadians what really good mastiffs are like. Champion Ilford Chancellor had a bloodless victory in the dog challenge class, and was still in his good form; in the next class Caution's Own Daughter had to give way to Lady Coleus, for the reason that I pointed out last week, not skill enough, though positions were reversed at Hamilton. In open dogs, Elksan, an improving dog, and filling out nicely, though still too tucked up, was placed at the head of the class, beating Mode in size and forelegs, though I like Mode's head better, he does not show so much dewlap and skull is of better shape; third prize was withheld, and only he, cards given to Trust, who is long-faced, feet turn out and hardly bone enough; King has also not the type of head desired; Minting Minor, first last year, was absent. Miss Caution repeated her Hamilton victory in bitches; a new one, Minna Minting, coming second; she is small sized and loses in bone and body to the other, though she has a nice head; Bess occupied the same place as at Kingston in a much better class; Greenwood Juno, vhc., is fairly good, but loses in head and front; Blondie is not massive enough in head and would do with more flesh, her forelegs are very good; Ilford Fess was absent. In the puppy class Elksan smothered his only competitor, Flora, from whom second was rightly withheld. In novice class first was withheld and second given to King, who was out of shape and has a poor head. The Flour City Kennels of course took the kennel prize, and Mr. Hugh Falconer that for the best four owned in Canada.

ST. BERNARDS.—(MISS ANNA H. WHITNEY).

These classes were a marked improvement over those of last year; several very fair laced dogs being shown, and the

presence of the New York St. Bernard Kennel added considerable quality to the exhibit. Challenge rough classes proved blank. In the open dog class Kingston Regent's good quality, massive head, bone and good color could not be denied, and he was an easy winner. The more one sees of this dog the more certain it is that he will prove a very hard dog to beat in the very best company; second went to Hesper's Son, a dog of nice quality, lacking in massiveness of head and dark shadings, but well formed in body and forelegs, hindlegs a little too straight, he is only 14 months old and will very likely develop into a pretty nice dog; Monk, third, is nicely marked but long in head, good bone and shows lots of quality; Monarch, from the same kennel, lacks blaze, is light in body, weak in pasterns, and head not short enough; Don Phyllis, reserve, was at Hamilton; Bruce, h.c., is snipy-muzzled and long-faced, his head is also almost black; Oscar, also two letters, I did not see; Benmore, Jr., lost a letter in this company. The order in bitches was the same as at Hamilton, Republican Belle, Zenith and Glenisla. Beulah, fourth, loses to the others in head, a very poor one without blaze, though in body and bone she is very good; Phyllis, reserve, is long in head but good in body; Daisy May hardly deserved v.h.c., she is not much better than a coarse collie, with very little St. Bernard type. Nora, h.c., is much better, though faulty in head properties, snipy and so on, but is fairly good behind that part of her anatomy. Nell Maida, c., is of poor coloring and quality. The puppy class for dogs was a big one and some fair stock was shown, the winner turning up in Mr. Bell's "pick up" at Chicago, Sir John. He is a well made dog, but on account of his twitching from chorea, should have been put back. He will, perhaps, eventually grow out of this, as it has already left his shoulder, but as it is this infirmity should count against him at present. He has a fairly good head, excellent bone, is of good size, nice coat, and when filled out his body will be good. Hesper's Son, for the reason stated, should have been first; Don Phyllis came third, reserve going to Kildonan, showing very good bone but not straight on his pins. The other mentioned ones I did not see, they having been taken out. In bitch puppies Lady Maud, the winner, is too houndy headed. Theben, second, has only his nice body and legs to recommend; lacks type, head very poor. In challenge, smooths, Ch. Hector had another lonely victory. By a foolish mistake Othello, who could have taken second in the rough dog class, was entered in the smooths, and the mistake not being known until the smooth class was called, he was thrown out and did not compete at all. In open bitches a very fair lot turned out. Lady Swiss, the winner, lacks blaze, but is nicely found in body and legs. Dell, second, I failed to see. Gemmi, third, is faulty in head and Nun Nicer came fourth, though she deserved a higher place. Nero, in dog puppies, could do no better than second without competition; body the best part of him even now. Gemmi won without competition in her class. The winners in the novice classes have all been described above. Altogether this was the best lot of St. Bernards ever shown in Canada. Mr. J. S. Williams having four roughs, took both those kennel prizes, but the smooths did not fill.

BLOODHOUNDS—(CHAS. H. MASON).

Only two entries, and Jack Shepard completely smothered Beauty, who was far away from him in head, though nearly as good in body and legs.

NEWFOUNDLANDS—(CHAS. H. MASON).

Champion Leo added another to his score, although far from a good one. Major, second, loses in depth of muzzle, but had he had a little attention would be quite as good in coat. Neither are really true types.

GREAT DANES—(MISS ANNA H. WHITNEY).

Thanks to the Wolverine Kennels there was quite a fair showing in this breed dear to the hearts of the Germans. Considering the great number of Germans in this country it is a wonder the number of this breed shown is not larger, though perhaps the difficulty in keeping them is the chief obstacle with the majority. No entries in the challenge classes. As was the case last year another exceptionally good great Dane was shown in the open class for dogs; this was Imperial, a much improved dog since Chicago, though he can still carry many pounds more flesh. He was a great attraction at the show; in fact the chief one; he is many points ahead of Favor, this time in his right class. Brutus, third, is light in body, straight in stifles, has a fairly good head and nice bone. Pascha II. was at Hamilton. Bismarck, c., has a bad head. Minerva's Fawn, in competition with those of her own sex, here took premier honors, Ultima coming next; both were described last week. They also occupied the same position in the puppy class. Siegfrieda, faulty in head, v.h.c.

RUSSIAN WOLFHOUNDS—(CHAS. H. MASON).

Only three were entered. Valdemir had no competitor. He is not filling out as he should do in body, neither is Princess Irma, who beats her litter sister Modjeska in head, size and bone, the latter is better in loin, but loses again in pasterns.

DEERHOUNDS—(CHAS. H. MASON).

The only one present was Silver Queen, short in muzzle, heavy in shoulder, but otherwise fairly good; two other entries were absent.

GRYHOUNDS—(CHAS. H. MASON).

Though in numbers not as large as last year, still the quality shown was about the best we have, East at any rate. Gen of the Season had little difficulty in beating the slack-waisted champion Highland Chief in the dog challenge class. Champion Balkis entered not for competition. In bitches, champion Cassandra, whose six years or more of usefulness are beginning to tell on her, was well ahead of Spinaway in head and ribs. The next class was a repetition of Hamilton as far as Ornatius and Pious Pembroke were concerned. Mr. Pope's new dog, Old Stone, third, losing in feet, ribs and hindlegs. Highland Donald, gone off in front, coming next; he is well known. Ranger had to put up with three letters this time. Dick, h.c., is badly pig-jawed and long cast. Blucher, c., best parts are ribs and loin; hind parts, feet and pasterns faulty. An excellent class, showing lots of quality, and the awards were fully indorsed by the running of the dogs in the races afterward, proving that bench show form is compatible with good work in the field. The bitch class was also good as far as the top ones were concerned, Bestwood Daisy and Lilly of Gainsboro being the order for the money; the latter has the better head and is stronger in loin and better ribbed, also more let down in stifles; the names as given in Hamilton report should be transposed. Bestwood Daisy is brimful of quality. Bert of Fashion, a name dangerously near that of the noted English bitch, was third, but I did not see this one. Lady Langtry, reserve, is weak in pasterns, light in loin. Grimsby Jess is not of much account, while Elsie II., by her good front, gained two letters also. Galatea, c., is heavy in shoulders, not straight in forelegs and lacks rib development. The puppies were divided. The winner in dogs, Mistrerton, has a poor head, but is good in front; body needs time. Jack took second; he was out. The winner in bitches was Bed of Stones, Miss Glendine coming second. She has nice forelegs, but feet are open; is a bit overshot and light in eye. Though local entries were few, there was no mistake about the quality of the American dogs.

FOXHOUNDS—(JOHN DAVIDSON).

As usual in Canada, there were some fairly good English hounds shown, the winner last year, Genius, again being placed in the van, with Kouser, not so well-ribbed up or as good in head, second; both have good hound coats. Preacher, third, has splendid well-boned forelegs, but is snipy in muz-

zle and stifles are not bent enough. Vexation, second last year, was the only one in the bitch class; she is a bitch of good parts. Classes were also made for American hounds, several of those shown being weedy hounds and of the English type. The winner in the dog class belonged to the only and well-known Dan O'Shea, Ranger, better in legs and feet, winning over Ringwood. Bingo, third, is more on English type and a bit straight behind. Bruce, v.h.c., I could not find. Dan also had the two winners in the bitch class, Countess and Hasty, the latter a fair American. In harriers the winner is a fairly good one, though feet and pasterns might be better. Tomboy is a foxhound puppy of American type. In bitches Molly could do no better than second, very snipy and too long cast.

POINTERS—(JOHN DAVIDSON).

A better lot than usually seen in Canada. Mr. Davey showed a very nice team, and as their breeding is tip top there should soon be a good lot of pointers running round his bailiwick. Challenge heavy bitches had champion Belle Randolph, the winner, in Devon Nell's absence. In heavy open dogs Tempest beats Westminster Drake behind the head. Revelation was the winner in heavy-weight bitches. She is a bit straight-faced, but otherwise well formed, excepting a little weakness of pasterns. She was also too fat; Lightfield Madge, second, one of Mr. Davey's new ones, is excellent in front and bone. In challenge classes for light-weights Pomery Sec and Fan N. won the prizes for Mr. Hyland in their respective classes. Both looked well. The open light-weight dog class produced a few more entries, and to Ossining went the blue ribbon; Shot, second, losing in hindlegs and chest; Axtel King Don, whose front might be better, and expression and muzzle hardly the thing, otherwise fair, coming third; Save, v.h.c., is not a bad stamp, while Snipe, c., is too houndy-headed and throaty. In bitches, that natty piece of dog flesh, Lady Gay Spanker, true to her name, an elegant mover, was well in front; Miss Kumer, second, is nicely fronted, though at times one elbow goes out a bit, but little fault can be found with her; Phantom, third, has been spoken of before. Lady Graphic, reserve, occupied an unusual place; in v.h.c., Dodo, is a bit short in muzzle, feet open, and is a trifle long cast. In novice class the order was Lightfield Madge and Dodo. Puppies were fair, Bessie Girl being the best.

ENGLISH SETTERS—(JOHN DAVIDSON).

Mr. Davidson, as is generally the case, had a big welcome in English setters. As most of the dogs were commented on in Hamilton report it is no use going over them again in detail. Edgemark again proved himself a winner, and this must qualify him for the challenge class; second went to Lightfield Rhulias, with whom little fault can be found, might be a bit straighter in front, ears in carriage could be improved; Viscount, a little better looking as to coat than at Hamilton, was placed third; Tony Gladstone, reserve; Sir Edward, v.h.c., have been spoken of before; Mount Royal Stride is not straight in front, feet turn out a bit, but head fairly good; Forest Tatton, h.c., loses in feet and loin and is throaty. In bitches Nita was this time placed first, she looked cleaner and in better shape, though still heavy looking and moving queerly behind; Forest Heather, second, is throaty, but otherwise well formed; Albert's Nellie went still a peg lower to third place; Victress Lewellin, fourth, first at Hamilton, needs no further description; Canadian Lillie, reserve, is hardly strong enough in muzzle, but in legs, feet and body is still good; Monk's Fan, from the same kennel, is a daughter of Monk of Furness, and is much of his type; Vic is a bit wide in front and not ribbed up enough; Nora II., again captured three letters; in the h.c. lot Forest Gladys is a bit wide in front, skull too thick and eye prominent. Novice dogs had the same as above, excepting Toby, a large well-made dog, heavily marked but well formed if he is a bit coarse throughout. In novice bitches Victress Lewellin was ahead, beating Queen of Fashion in body; Vic, third, is only a moderate one. In puppy dogs Field Marshall, the winner, is long-cast, the others were fair, but most of them had been removed when I took my notes.

IRISH SETTERS—(JOHN DAVIDSON).

The dogs in these classes were fully up to the average, and many of them had been at Hamilton the previous week. Challenge classes were drawn blank. Seminole again proved the winner in the open dog class, beating Farnell in head and front, Glen Jarvis, now well known, coming next. Dr. H., fourth, is a big, coarse-looking pup, leggy and hardly showing quality enough. Erin's Lad is a promising pup, nice head, and Larry, faulty in front, well deserved his letters. Eleo, though lacking type, should have had another letter, and Hiawatha, faulty in head and forelegs, and not ribbed up enough, also took two letters. In open bitches, Irene, the winner, is a nice setter; skull is a bit broad, but otherwise she will do. Duchess of Ayondale, second, is throaty, but of fair type of head, a little long cast in body; Goldsmith Maid is too fine in muzzle, and feet turn out a bit; Rose Palmerston I have commented on before. Nellie B., v.h.c., is light throughout, lacks character in head, and is faulty in quarters. Minnehaha, in the same division, is too prominent in brow and needs more flesh. Aurora, h.c., is now well known in these columns; Lady Alice is narrow-chested, light in body and faulty behind, otherwise of fair type. Novice dogs—Rufus, the winner, beats Erin's Lad in head, and Rose Palmerston was again placed over Lady Alice in bitches. Puppies were a repetition of other classes.

GORDON SETTERS—(JOHN DAVIDSON).

The same old crowd, Dr. Dixon's team scooping in all the money in the challenge classes. Ivanhoe and Leo B. classed as at Hamilton in dogs, and Duchess of Waverley, beating Becky Sharp in head, in the bitch class. Two turned up in open dogs. Clyde, the winner, beats Pendennis in coloring and head. Dorothea, the winner in the bitch class, is light in tan, faulty in muzzle, and was shown fat; she beats Annie Gordon in head and ribs. The third one was a late entry and not named. Miss Muffit, fourth, is faulty in ribs and head, and Cherry Ripe's light body and lack of rib could get her no more than three letters. The puppy and novice classes were filled by these previously mentioned. Outside the challenge dogs there was little quality shown, most of the exhibits lacking depth of muzzle and bone.

COLLIES—(JOHN DAVIDSON).

The absence of the Chestnut Hill Kennels leaves competition in these classes more open, as though the Seminole Kennels showed some of the old winners, still they are not put on the bench as they should be. Conditioning collies and keeping their coats in show fettle is an art not learned in a day. Roslyn Wilkes not being for regular competition let Roslyn Dandy in for the challenge dog prize, and in bitches Metchley Surprise had a walkover. In open dogs many of the dogs were reviewed last week, the winner, Dowry, although well coated is very faulty in head, coarse, light-eyed and short-faced; I liked the Hamilton winner, Metchley Wonder II., fourth, for the place, he is truer to type, though out of coat; second went to the coarse Moonstone, spoken of at Hamilton; Sir Walter Scott II., barring coat, should have been above him, "Square Deal" Eberhart having trained his tail "down to the ground;" reserve went to Roslyn Conway, who, though out of coat, is better type than some of those over him; Rowdy, v.h.c., got all he deserved; Wait-a-wee, h.c., is too high in skull, faulty in ribs and front; Toronto Wonder, same division, not straight in front, lacking in ribs and soft in coat. The bitches were only a poor lot. Masilla, the winner last year, was absent, and first went to Nancy, who has a soft woolly coat, is too heavy in shoulders, and faulty in muzzle and ears; Dot, small, but typical, should have won, is out of coat, but what

there is has the right feel; Belle, third, excels in forelegs, has a fairly good top coat, but no under; Reta, fourth, is a little wastrel; Maid of Duudee, v.h.c., is light-eyed, had head, poor feet, and not deserving a card. A poor class on the whole. The novice class awards followed the open, Eglington taking second here and Sir Walter Scott first. In bitches, Fury, the winner, is nice type, might be better in front; Heather Bell, second, has a nice head but ears are too big, is light in body; Bessy's poor head was counterbalanced by her nice texture of coat. The puppy winners have been mentioned, with the exception of Scotilla IV., who won nicely in head and coat.

BULLDOGS—(CHAS. H. MASON).

This breed did not show up very well, though Bo'swain in dogs and Bloater Girl in bitches were of a good sort and the only entries. The latter was looking better than the week previous.

BULL-TERRIERS—(CHAS. H. MASON).

Nearly all the same dogs as at Hamilton, consequently, as stated, a good lot. Their positions, however, were reversed in most cases. Dufferin was the only challenge dog and the well known Starlight also had her class to herself. In dogs Mr. Mason thought Topsparkle the best, his coat, or lack of it, not to mention his head, should have put him back. Duke of Wellington, a heavily boned pup, came second; he is good in front, that is all. Ben Battle, third, has a good eye, but is short and heavy faced. Prince Bendigo, losing flesh, was reserve this time. Common, King of Hearts, Watchful Wagtail, formerly Little Donovan, were all v.h.c., and are well known, and so is Muster Dick, h.c. Royal is more of a business dog, and Buxton Baron, second. He loses in body and loin, fair head. In bitches Grave Duchess won again this year. Edgwood Fancy and Queen of the Dale were both put over her the week before; the latter is not improving in condition. Heb, h.c., was in bad shape and head is nothing extra. In puppies Duke of Wellington rightly beat Belle of Edgwood. An excellent showing and something Canada has not seen before this year.

POODLES—(CHAS. H. MASON).

Only one entry in dogs, and that the "African poodle" Friday. First withheld and second awarded and Frost, though deserving a letter, was debarred from participating in the spoils in the bitch class.

SPANIELS—(A. CLINTON WILMERDING).

Not "A. Clinton, Esq., Welmerding," as the catalogue had it. Of course Mr. Wilmerding's first appearance as a spaniel judge in Canada was a signal for a big turn out in the spaniel classes, and especially in cockers. He had a good light in the ring upstairs and rather upset some previous decisions.

An indifferent Irish water spaniel was given a second. Clumbers saw the usual faces on the bench. Boss III. had his challenge class to himself and well it was so; Lady Bromine, the same, though not recovered, they are better, but still should not be shown. In dogs it was a tight go between Johnny Junior and Darby; the latter's head is so much better type and front is so superior that Johnny's good body can hardly counteract it. Lady Jo had the bitch class to herself.

Field spaniels, with Mr. Kirk an exhibitor, were better off for quality, Newton Abbott Laddie and Birdford Ruby each taking a challenge first. In open black dogs Bidean Bob has good body, legs and feet, is faulty in skull and muzzle, not square enough. Samson, second, is well known and Brantford Mohawk I spoke of last week. In bitches Rosedale Bess, a promising youngster, beats Rosedale Belle in head and front. Liver dogs saw old Beau, the winner, looking quite himself. Any other color was a mixed lot; Fancy, first, is better in head and coat than Billy, though the latter is better in front. Toby, third, is beaten in forelegs and is a bit leggy. Bob beat Rosedale Scamp in puppies, but both went dropping in front.

The cocker black challenge dogs were a hot lot, and Rabbi moved considerably up this time, going to the top of the class, with Black Duke second, the latter beating old champion Brant in head. Miss Obo II. had an easy win over Bessie W., both from the same kennel, in challenge bitches. Any other colored challenge dogs were a gift to Brantford Red Jacket, but King Pharaoh's Sister is not up to challenge form, and a diploma would have suited her style of head better. Open black dogs saw the well known Black Dufferin a good winner, beating Oban in head and very much in body and quarters. Dono, third, is equally as good as the second winner and has improved. Black Brant, fourth, I did not see. Obadiah, reserve this time, is an off-described dog. Brook, v.h.c., is too big and long in head. In bitches I guess, a sister to I Say, was put at the head of affairs. I like her better in body than I Say, has an excellent front, but not so good in muzzle as the latter. Woodstock Cora no doubt went over I Say on account of condition, coat, etc., as she is not so good in head but has a nice body and is well fronted. Cleo II. was described last week, and so was Brantford Flirt, reserve, and Brantford Topsy, v.h.c. Woodland Susie, and Jealousy, h.c., may also be passed over with the same remark. Any other color dogs had the winners in Brantford Redman, described last week; he beats Nugget in forefeet and behind to shoulders, which dip a bit. Bambo and Rufus, third and fourth, need no further mention. Molly proved herself superior to Lady of Learning, the matron, in condition and body. Brantford Red Riding Hood, a little long cast, came third, and Dolly Varden, from the same kennel, could get no higher than fourth on account of her legs, which are slightly out of fashion. Blushing Rose, v.h.c., well known, and Northern Queen, also, v.h.c., faulty in head, too much cut out before the eye, completed the class. The novice class awards were nearly all taken by dogs previously mentioned, though Ontario, a new face, third in dogs, is too domy in skull, but has an excellent cobby body, and Van Hood, v.h.c., is a little on the leg. The puppy winners have also been described and their places can be found on referring to the prize list.

BEAGLES—(JOHN DAVIDSON).

Most of the winners are well known, champion Royal Krueger taking the challenge dog prize, and champion Una the same for her sex. Tricobrin again won in dogs, with Roy K. second. Roscoe, third, is coarse but is a good stamp of working hound, a little large sized. Hornell-Harmony Kennels also supplied the winners in bitches, with Elf; she beats Ruby in head, body and front. Periwinkle, third, is nice type, but light and a little out of shape, has a good hound coat. King Krueger won in puppies; is long in body and large even now; he wins over Guy in muzzle, feet and coat. The under 12 in. class had one entry, Ava W. well-known.

FOX-TERRIERS—(CHAS. H. MASON).

A glance through the catalogue shows the names of nearly all those at Hamilton the previous week, Dobbin being about the only new face worth mentioning. The challenge classes did not fill. In open dogs the Woodale Kennels' new dog made his first appearance. He is a nice terrier, showing lots of character, a fairly well-formed head, though a little too much stop, excellent front and good bone and coat, ears well carried; he beats Blentom Trump nicely, who in turn was placed over Starden's Jack, reserve going to Diver Third, whose faults I spoke of last week; Painter this time doing no better than v.h.c., as was Endcliffe Spice; Woodale Rival, in the same lot, is faulty in muzzle, a bit round in skull yet, trifle long in body but nice and straight in front. Nobody's Child, h.c. These are with the exception of Rival familiar names now. Pepper is pinched in muzzle but coat of good texture. In bitches first went to last year's winner, Ebor

Nettle, who beats Rowton Safety in head, ears and body. Venus, third, was commented on before. Woodale Radiant, fourth, was out of stall, a puppy. Woodale Refusal is not ribbed enough, fair head and front ears trifle thick, and just fair in coat. Dog puppies were of no account, prizes withheld, and in bitches Rowton Safety, Woodale Radiant and Arden Belle was the order.

In wire-haired dogs the judge was severe, withholding first and giving Barton Sting second; Stanley, vhc., neither as good as Adswood Jim II., h.c.; Gale Green Patch, c., all commented on before. The prizes in bitch class were withheld. In novices Nobody's Child had an easy win in dogs, and in bitches Rowton Safety and Suffolk Riot outclassed the others.

IRISH TERRIERS—(CHAS. H. MASON).

In open dogs Jack Briggs scored, having been conditioned a bit since the week before, over Nailer, the latter losing in body, legs, feet and coat; Rivictor, thick in skull, faulty in muzzle and short in coat; third. Two nice bitches turned up in the next class, Exile's superior head, coat and front gaining the verdict over Kathleen.

DANDIE DINMONTS—(CHAS. H. MASON).

Quite a show of these quaint terriers noted rather for their gameness than their good looks. King of the Heather's superior head, coat and body led him out ahead of Valentine, who in turn beats Goyoa in front and length of head and muzzle. Fan won again this year in bitches, she is out in front, has a fair head, good coat and hindquarters. A third only was crying to Saba, out of shape, having puppies at the show—a given evil.

BEDLINGTONS—(CHAS. H. MASON).

Pica won in dogs, better in front, body and feel of coat than Porkess, who also in turn beats Sir George in head; Sting, coat of poor texture, deficient in tips and topknot, was vhc. In bitches Jerry the winner in topknot and arch of loin, though Zulo is better in head; Nettle, third, was described last week.

SKYE TERRIERS—(CHAS. H. MASON).

Sir Stafford had little difficulty in beating Sir John, who loses in head, coat, length and bone.

BLACK AND TAN TERRIERS—(CHAS. H. MASON).

Meersbrook Maiden, looking a little more like herself, was alone in the challenge class. In open dogs Broomfield Sultan had little difficulty in winning over Rochelle Scot and Buffalo Rex, which two the judge could not or would not separate. Rochelle Scot has the better head and richer tan, but loses in body. Buffalo Rex was badly breeched. In bitches English Lady lost first place on account of her mouth, so it is said; she also loses to the other in head, quarters and chest, but is richer in tan. Grace, third, was not in it in this company, nor yet was Merry. Puppies with the exception of Rochelle Carmencita were poor. Somehow with all the fairly good dogs imported our black and tan breeders are showing very little result.

YORKSHIRE TERRIERS—(CHAS. H. MASON).

Toon's Royal again placed himself in front of his kennel mate Venus in challenge class, and Toon's Royal Gem was alone in dogs. In bitches the silver Tot had to succumb to Miss Halifax, true in coloring, though a poor one, getting third prize only.

PUGS—(MISS ANNA H. WHITNEY).

Same old faces again. Bob Ivy, Bessie and Cassina in the challenge classes. Pberhart's Cashier leading all again in the open dogs, Curtis coming next; same order as at Hamilton. Bradford Rowdy, third, has a nice skull, but muzzle is wrong. Fritz Emmett took reserve; his faults have already been heralded. Kash, Jr., vhc., should have been above him. In bitches, Satin won again, Mabel E. and Cribbage coming again in the same order, Fanny K. taking three letters and Princess Nellie h.c. Peggy Pride was the best of the puppies.

TOY TERRIERS—(CHAS. H. MASON).

Three fair little toys as they go over here were shown, first going to Trix, beating the other two in markings and legs.

KING CHARLES SPANIELS—(CHAS. H. MASON).

In dogs, the large-sized but well-shaped Royal Duke won, Calumet Alice held her own nicely, beating Topsy in muzzle and volume of skull; Ruby, third, too long in muzzle and flat in skull. In Blenheim's, Romeo, good in skull, but long in muzzle and large-sized, claimed the only prize in Calumet Cromwell's absence. In the toy spaniels class the prizes were withheld; more like small, snipy cockers than anything else. Miscellaneous had the Scotch terrier Kilston for the winner, other prize withheld from a moderate-looking Japanese.

H. W. L.

SPECIAL PRIZE LIST.

Best Mastiff dog, Ilford Chancellor; bitch, Lady Colens. Smooth-coated St. Bernard, dog, Hector; bitch, Lady Swiss. Great Dane, dog, Imperator; bitch, Minerva's Pawn. Greyhound, Gem of the Season. Deerhound, Silver Queen. Barzoi, Valdemir. Collie dog in open class, Downey; bred by a member of the Collie Club, Furry. Beagle, Royal Kruger. Smooth fox-terrier, dog, Dobbin; bitch, Flor Nettle. Wire-haired fox-terrier, dog, Barton Sting. Kennel prizes: Mastiffs, Flour City Kennels; owned in Canada, A. W. Falconer. Great Danes, Wolverine Kennels. Greyhounds, A. W. Purbeck. American foxhounds, Dan O'Shea. Pointers, T. G. Davey; owned in Canada, T. G. Davey. English setters, Mount Washington Kennels; owned in Canada, T. G. Davey. Irish setters, Douglas & Chambers; owned in Canada, Douglas & Chambers. Gordon setters, Dr. S. G. Dix; owned in Canada, J. Lorne Campbell. Collies, Seminole Kennels; owned in Canada, McEwen & Gibson. Bull-terriers, Frank Dale. Beagles, Hornell-Harmony Kennels. Fox-terriers, Woodale Kennels; owned in Canada, Arden Kennels. Black and tan terriers, Rochelle Kennels. Yorkshire terriers, Toon & Symond. Pugs, Dr. Cryer.

WILMINGTON DOG SHOW.

[Special Report.]

CONSIDERING that first prize was only \$4 and second \$2 and that the show was not advertised, 129 entries must be pronounced a success for the second annual dog show, held in connection with the Wilmington fair. The quality throughout was above the average, and some of the classes were well filled, the English setters numbering 20 entries and the collies 16, and there were but few absences. Mr. F. R. Carswell made a capital and persevering superintendent and had everything in good working order with good attendants to carry out his orders.

The building in which the dogs were benched is not at all a good one for a show, being dark and anything but weather proof. The weather was very bad on the first day and the judging had to be done inside. It cleared up beautifully, however, for the remainder of the week. Mr. E. B. Elliott made the awards in all the classes, and his decisions in most instances were well received. Mr. F. E. Lamb acted as ring steward, and the judging was got through without delay.

Only two mastiffs were entered, and Jefferson easily disposed of his opponent, Brandy, who was not worth a card. Jefferson is good in body, but is sadly lacking in head proportions and color.

In St. Bernard dogs King Regent, son of the defunct Prince Regent, was placed over Sir Lion. The correctness of this decision was questioned by some on account of King Regent's bad legs, but he is so much superior in size, substance, expression and character than Sir Lion, that we think the decision correct. Sir Lion is a good dog, but too low at the shoulders, and lacks length and breadth as well. In bitches Margarita, by the great Plinlimmon, secured

the blue; her superior bone, substance, girth of skull and depth of muzzle made her score decisively over her two competitors, in spite of her bad condition. Lady Castlereagh, second, has good expression and character, but her muzzle is hardly square enough cut. Dart, third, is a fine roomy bitch, but does not show the quality of the other two. Only one wretched specimen of a smooth St. Bernard put in an appearance, and the prizes were very properly withheld.

A good, new Great Dane made her debut in Miuka, a recently imported bitch; she is a dark golden brindle in color, has capital bone, a good and typical head, a little strong for a bitch, but is too straight behind; she was all out of condition, showing evidences of maternal duties, but when in good trim will be able to do a lot of winning.

Greyhounds had only one entry and that was a bad one. In heavyweight pointers the well-known Lad of Kent, of course, won easily; he is a good all-round dog, full of quality, but hardly sprung enough in ribs. His only opponent, Don, was a sorry spectacle beside him and was only awarded third, second prize being withheld. Major, a fair dog, won in lightweight dogs, the other entry, Dallas, being a rank bad one, and the prizes were consequently withheld. There were no entries in either of the pointer bitch classes.

Glendon, second in English setter dogs, showed himself very badly and was not in condition. He is a promising young dog and will doubtless do better another day. Carlton Pero, the winner, is a nice stylish dog, with a good skull and ear, but a bit short in muzzle. He won well, as he has a capital body and is a beautiful mover and shower. Third went to Dick Roy, last year's winner, shown very fat. He is too filled up and short in muzzle, otherwise a good dog, with capital coat and feather. In bitches a very typical one full of quality was placed first. She is grand in expression, formation of skull and set on of ear, and has a capital body, with the best of legs and feet. Peggie Dortch was second, a nice orange ticked bitch, but out of coat. She shows great character and style and is a good mover. Third went to Rustic Clip, a very promising puppy, with a capital head, neck, shoulders, legs and feet, with wonderful style. The winner in this class last year could get no higher than vhc., and in both the classes the competition was very strong.

In Irish setter dogs, Captain won. He has a capital coat and color and a fairly good head. Shammore, second, is more typical in head and body, but was out of condition. Dennis the Gossoon, what a name! is light in color and wanting in Irish setter character. In bitches, Bessie Glencho, in poor condition, nevertheless won easily, as she is far the most typical of the three exhibited and shows a deal of quality. Leda Glencho, second, won here last year. She is a fine roomy bitch, faulty in head and color. Lassie, third, is light of bone, pale in color, and lacking quality.

In Gordon dogs, Duke, a poor specimen, was given second, first being withheld. In bitches Viola, just a fair one, obtained the blue ribbon.

A good foxhound in Dixey was alone in his glory and carried off first prize.

In field spaniels Toady Obo, easily defeated Pascha, as he was all out of coat and condition. In cocker dogs, Snowball romped away from Banjo, who lacks quality all over. In bitches a beauty in Beauty won first. She is a smart little buff cocker and will doubtless do some winning in good company. Lady Gay, second, a red, is full of life and shows plenty of character. She carries her tail too high. Brownie, a good liver, and Busy Bee, a nice little black, completed the class.

In collies, Major Jun, a smart black, white and tan, with profuse coat and nice expression, was first; Dell Wilkes, small and out of condition, but a promising puppy, came second. Boskie, third, lacks quality and pricks his ears, but is well made, with good legs and feet. Prince Wilkes, reserve, is a large, unfurnished, promising puppy, showing a lot of quality. The Scamp, vhc., might have been higher, but has bad ears. In bitches, a very sweet and typical bitch in Nancy Hawks won; she was quite out of coat. Collie B., a smart youngster, came second; nice coat and ears, but a little domed in skull. Fridena, third, is weak in face and somewhat weedy, but good in coat. The collie classes were good, the coarse-headed, bad-expressed, common specimens so often seen being conspicuous by their absence.

In bulldogs first was withheld, second going to a poor specimen in Young Tiger.

Duchess of York, a good bull-terrier bitch, shown very fat, was awarded first.

Two good and promising Basset hound puppies comprised the next class. There was not much to choose between them.

In beagles, Tony Weller, in poor form, won from Pete, a promising puppy. Lady, a pretty little one, was first in bitches.

Regent Brisk, a smart terrier, was first in fox-terrier dogs. He has a capital body and is a nice size, with fair head and neat ears. Regent Domo, second, is large in ears and lacks expression and character, but is better in muzzle than the winner. Dandy B., third, is common in head and heavy in ears, with a good front, legs, feet and coat. Rosalind, the winner in bitch's, is a terrier all over, but short and weak in head. Positive, second, is better in head, but in all other respects she is inferior to the winner.

Irish terriers had only one good one in Breda Jim. Lady Ire, second, was the best of the remainder. Pedro, a good Skye terrier, won in the class. In black and tan terriers the prizes were withheld. In black and tan toys first was awarded to Dot, a moderate one, and second withheld. Pugs were poor, all lacking color and head properties. Two fair King Charles were in the toy spaniel class, Philadelphia Charlie winning easily from Manchester Teddy. In the miscellaneous class Beauty, a good smooth-coated collie, easily won from a moderate black poodle. Two poor Italian greyhounds and some smart Yorkshires complete the list.

THE BARD.

BRUNSWICK FUR CLUB TRIALS.—Princeton, Mass.—*Editor Forest and Stream:* The Brunswick (Maine) Fur Club have arranged to visit this place in November for their annual foxhound field trials. They will be here by Nov. 9, and it is believed it will bring together the largest number of fox hunters ever seen in the United States. The hillsides of this town, Wachusetts, and Little Wachusetts Mountain are excellent hunting grounds.

Having stated explicitly in our issue of Sept. 10 that the article of Aug. 27 was written without suggestion of anybody, we are at a loss to understand how one can "sincerely" or otherwise than with an ulterior purpose repeat the insinuation (then disposed of) that we had been prompted to an action by a supposititious forger of telegrams. This forged telegram story by the way is fishy. The telegram was published the week after our article of Aug. 27, but with an explanation that it had been received a month before in July. Now comes Mr. Belmont, who tells us that the telegram was sent on the day our articles were published. Who sent it? Why was it sent? Why the eager endeavor to connect it with a somebody who has been influencing the FOREST AND STREAM? The whole thing, weak at the best, appears to us to have been clumsily conceived and executed bunglingly.

A LIBERAL REWARD WILL BE PAID for the current number of any journal with a Kennel Department as newsy and up-to-the-times as that of the FOREST AND STREAM. Address the DOG NEWS DEPARTMENT, care of Forest and Stream Publishing Co., No. 318 Broadway, New York.

THE AMERICAN KENNEL CLUB.

OFFICE OF THE AMERICAN KENNEL CLUB, }
44 BROADWAY, NEW YORK, Sept. —. }

Editor Forest and Stream:

I have just read the editorial article concerning the American Kennel Club, published in the issue of your journal dated Aug. 27 (at which time I was absent from the city), and entitled "Is it Not Worth Considering?" and also the article under the heading "Dog Chat."

I must believe these articles to have been written with the intention of promoting the best interests of the American Kennel Club, as otherwise you would hardly consider it your duty or privilege to advise the individual defendants in the litigation referred to, who are acting under advice of their chosen counsel as to the course that should be pursued by them, or to advise the officers of that club as to the course to be pursued by them, so long as their present action has not been questioned by the membership of the club, to whom they owe their official position and duty.

It may be conceded that were the situation such as it is stated in those articles to be, the advice given might be pertinent and sound. But the situation stated to exist does not exist, and as it is always well before treating a case to have a correct diagnosis of it I will take leave to review the actual situation and contrast it with that portrayed in your journal. It is first said:

Certain men whose names have been published among the disqualified and suspended list in the American Kennel Club (*Gazette*), feeling themselves aggrieved, are bringing suits for heavy damages.

From this it might be inferred that numerous suits of this character had been brought. There are in fact only two such suits now pending, one brought by Mr. Geo. B. Gallup, of Albany, N. Y., and the other by Mr. Charles J. Peshall, of Jersey City, N. J. Again you state:

The overruling of the defendants' demurrer in one of these suits at Albany has determined that the publication of the names in the *Gazette* is a libel, and the cause must, therefore, go to a jury. The rendering of this decision has been a signal for numerous other suits of like character. The American Kennel Club officers and various associate members have been made defendants.

It is true that the defendants' demurrer to the complaint in the Gallup case was overruled by the Special Term of the Supreme Court, but it is not true that such decision "has determined that the publication of the names in the *Gazette* is a libel," nor is it true that "the rendering of this decision has been a signal for numerous other suits of like character." No action has been brought by any person since that decision.

As to the Gallup case and the effect of the decision rendered, I am glad to have an opportunity to make a statement of the facts for the information of all your readers who are interested in kennel matters. Mr. Gallup in his complaint alleges that he was personally libeled by the publication of an article in the *Kennel Gazette*, in which it was stated (1) that on Sept. 9, 1889, the advisory committee of the American Kennel Club ordered the suspension of the Albany Kennel Club for the non-payment of its prizes at the show held in March, 1889, and passed a resolution that if the prizes were not paid within thirty days the penalty under Rule 28 should be enforced; (2) that on Dec. 18, 1889, the thirty days having expired and no official notification of the payment of the prizes having reached the office of the American Kennel Club, the president of the American Kennel Club suspended the officers of the Albany Club under Rule 28, of which suspension notice was given to Mr. Gallup and the other officers; and (3) that subsequently the executive committee of the American Kennel Club, acting under the provisions of the by-laws, "disqualified" the officers of the Albany Club until the awards given by the club were paid. He also complains because of the publication of his name in the list of "disqualified" members in the *Kennel Gazette*.

These two articles were truthful statements of fact; that is to say (1) the advisory committee, the president and the executive committee of the American Kennel Club did take the action with reference to the Albany Club which is stated to have been taken; and (2) Mr. Gallup, with others, was disqualified by the resolution quoted in the publication, because he was an officer. No one, so far as I know, has ever imputed any personal misconduct to Mr. Gallup or any other person.

Now, Mr. Gallup's complaint does not, when strictly considered, admit that the action was taken by the Kennel Club, or that he had been disqualified, as stated by the *Kennel Gazette*, and then claim that the *Kennel Gazette* libeled him by printing those true statements; but, on the contrary, the complaint alleges that the articles were untrue and the statements contained in them were false, thus asserting that the American Kennel Club did not, in fact, take the action which was stated to have been taken by it, and that he was not in fact disqualified. At the same time it does not assert that the awarded prizes were in fact paid.

To this complaint the defendants demurred, upon the grounds that even if the statements contained in the article were false and untrue, the publications were not libels upon Mr. Gallup. This is the question which was passed upon by the court, and in overruling the demurrer the court decided merely that if the statements of the articles were untrue and the suspension and disqualification therein stated to have been visited upon Mr. Gallup were not, in fact, imposed as stated, then the articles are libels, and Mr. Gallup is entitled to recover damages. The defendants have appealed from this decision, and that appeal was argued last week. They expect to secure a reversal of the decision. But even if the decision of the Special Term should be affirmed, the defendants will still have a right to defend the action and show that the statements of the articles were true. In view of all the facts the extreme improbability, and I may say impropriety, of Mr. Gallup recovering a verdict in the action, will be appreciated by all those who feel any interest in the controversy. For, I suppose it to be common knowledge that it is not a libel to print of a man anything which is true concerning him. Again your article says:

Other suits are apprehended in which other associate members will be sued before the affair is settled. If allowed to go on in this way every associate member who has any property that can be attached will probably be sued. The juries may award no more than nominal damages, but even in this event there will be costs and interminable annoyance.

As to this statement I beg to say that the officers and members of the American Kennel Club have no reason to apprehend that any other like actions will be brought. Mr. Vredenburg has one letter forwarded to him in which the gentleman addressed is solicited by Mr. Peshall to bring such an action. That gentleman has declined to do so. Whether others were similarly importuned I do not know; but if so they have not as yet complied. I may also be said that even were the American Kennel Club or its officers privately liable to be suable in damages because of the publications complained of (and we are advised by counsel that there is no such liability), there would still be no liability resting on the associate members of the organization, and the actions would have to be dismissed as to them.

As to your statement that the liabilities of the club and associate members are daily being added to by the sending out of new copies of the libelous publication, I beg to say that the *Kennel Gazette* did, as long as the beach show season lasted, continue to publish the names of persons who had been regularly disqualified by the American Kennel Club, but with the end of the show season the publication

was discontinued. This course was pursued for the manifest reason that subordinate clubs and their officers might be kept advised as to who was and who was not on the list of disqualified persons and thus avoid disappointment and embarrassment in doing business through agents at the respective bench shows. This was done under advice of counsel, that such publication in the official organ of the American Kennel Club is a publication privileged and protected in law. Again you say:

There are frequent notices in newspapers regarding these libel suits. The American Kennel Club is acquiring an unpleasant notoriety in which the associate members are sharing, since their names are published as defendants for suits for libel, etc.

It is true that there have been frequent notices in the public press as to the actions brought by Mr. Charles J. Peshall. For example, by serving the summons and the complaint at different times, instead of at the same time, as is the general custom, opportunity has been given for repeated press notices of the same action; and whether intentionally or not, the impression may have been conveyed that the suits were twice as numerous as they were. As to the "unpleasant notoriety" referred to, I understand that Mr. Peshall has repeatedly stated his intention to be to drive every associate member out of the club, and if this is true I presume that in making them defendants in his action he has been actuated more by this intention than by any expectation of finally enforcing a liability against them. You add:

In a word, the American Kennel Club is being plunged deeper and deeper into expensive lawsuits. There is every prospect that the end of the litigation will be disastrous. If these things continue as they have begun, suits will be piled on suits until the expenses of defending them will be more than the club or the members can spend.

Of this prophesy as to the end of things, I will not speak, having no disposition to enter into competitive prophesying; but, as I have shown above, it is not true that "the American Kennel Club is being plunged deeper and deeper into expensive lawsuits;" nor is it true that "there is every prospect that the end of the litigation will be disastrous." So far from the prospect being that the end of the litigation will be disastrous, I feel, as do the officers and such of the associate members of the club as have talked with me upon the subject, that the end of the suits will result in such a clearing up that thereafter every one having a genuine interest in kennel matters can feel that the day has passed for virulent criticism, which, having no foundation of good motive, springs from a desire for newspaper notoriety and an intention to harass and annoy all those who cannot be controlled. I do not know to whom you refer by the expression "many of our best dog men," but I do know that the prospect is that the "best dog men" will stay, and that those who go will probably be of those who can be spared with a gain of credit.

Now as to the remedy proposed, namely, a compromise. The officers of the American Kennel Club are discharging their duty toward the club as they see that duty. Their judgment may be bad, but they are honest in their pursuit of a course of action which they think best, and there has never been any time when their action was not subject to full inquiry and consideration by the American Kennel Club, and subject to reversal at the desire of the membership of that club.

There is a broad view to be taken of the *portée* of the Peshall and Gallup suits. It seems to me that, as a sporting paper, you would hail a decisive result as widely beneficial, inasmuch as it will establish for the benefit of all sporting organizations the question whether they have a right or not to publish in an official paper or even any paper the punishments which they may have inflicted upon their members for breach of their rules, and which publications are intended for the general protection of all interested in the sport over which each organization may be presiding. On this account, every one having the interests of the American Kennel Club at heart, should want to see this matter through. As far as the expense is concerned, I shall be careful to guard the American Kennel Club against incurring any. As far as the associate members are concerned, they cannot suffer any annoyance, inasmuch as their interests will be taken care of without expense to them and without any personal inconvenience.

Outside of the two libel actions above referred to, which are the only actions in which any associate members are defendants, there are but three other actions pending, in one only of which has the American Kennel Club any interest. That is a proceeding in which Mr. Peshall is plaintiff and the club is defendant, and in which he asks that the club be compelled to restore him to membership. Of the other two, one is in action for malicious prosecution brought by Mr. Peshall against Mr. Vredenburg, Mr. Anthony, Mr. Wilmerding and myself personally, based upon the result of the trial of the indictment for criminal libel found against him by the Grand Jury of the County of New York, in September, 1890, and the other is an action for libel brought against Mr. Vredenburg by Mr. Leslie Bruce, editor of *Turf, Field and Farm*, because Mr. Vredenburg had written a letter in which Mr. Bruce's name was associated with Mr. Peshall's, and with the article for the writing of which Mr. Peshall was indicted.

Outside of the actions brought by Mr. Peshall, we have therefore but one action in which the American Kennel Club is interested, viz.: that brought by Mr. Gallup. As to that action there may be room for compromise, not because the legal position of the defendants is wrong, or because they are subject to liability, but because I believe my fellow officers and members would, and I would, be glad to see the suspension which the American Kennel Club was forced to visit upon the Albany Club removed, and the latter again a constituent in good standing of the former.

But as to the three actions brought by Mr. Peshall, why should there be a compromise? The defendants in the action are men of standing in the community, in their every relation to it. If there is any liability they must answer to it, and being responsible, they certainly would not proceed in a course which would subject them to an increased liability. They are not asking any compromise, nor do they believe a compromise desirable. Why under all the circumstances it should be thought desirable to swerve them from a course of action which as officers of the club they owe it to the club to persist in; or relieve them by compromise from a liability as individuals of which they do not ask to be relieved, is something which I leave for others to determine.

Your articles, as I said before, were undoubtedly well meant, and I am grateful for the interest which you take in promoting the interest of the American Kennel Club. I do not know from whom the suggestion of compromise has come, but it is somewhat of a coincidence that upon the day your articles were published, the *American Field* was the recipient of a telegram asking that it recommend a compromise; which telegram purported to come from Mr. J. Otto Donner, but which is declared by that gentleman to be a forgery. Some one apparently desires a compromise very much. Perhaps, since you have given us your advice, you will be disposed to accept from me a little in return, which I assure you is not given by way of retort, or captiously, but sincerely and with good feeling. It is to consider whether the person who so desires compromise may not be the same who forges telegrams to the *Field*, and whether he may not also be capable of abusing the confidence of FOREST AND STREAM with false information and suggestions of compromise to further his ends.

Requesting you to kindly give space to this letter in your columns, I remain,

AUGUST BELMONT.

Pres. A. K. C.

DOG CHAT.

ONE of Canada's cleverest vets is Dr. Mole, of Hamilton, Ont. He is one of the few who has made a study of the dog, and his papers read before the Hamilton Kennel Club at their members' shows are always interesting. He has effected some fine cures in Hamilton in cases of accidents to dogs. Miss McGivern's wire-haired Jack was fighting with another dog when a man, to part them, struck him over the eye with a billet of wood. For a couple of days the dog acted peculiarly, getting visibly more and more dazed. Dr. Mole having noticed it found that the skull was fractured and suggested trepanning. About this time the dog had a fit, and its struggles so aroused the sympathies of the fair owner that she declared that no expense should be spared to save him. Jack was taken to the hospital, and with the aid of one or two doctors he raised the skull and took a piece of bone out about the size of a dime which had pressed on the brain. The dog began to recover, the skull closed up, and he is still one of the gamiest wirehairs in that town and a terror to everybody's "felines." He won vhc. at the show and special for best local dog of his breed. Dr. Mole has now a Skye terrier in his care belonging to Mr. Crook, a hotel keeper, which fell a long distance down an elevator shaft and was almost crushed to pieces. The dog is still alive and may very likely recover. This doctor has also made a cure in the case of a dog with paralysis and chorea. The dog dragged his hindquarters along the ground. After much patience and careful treatment the dog is now running round as strong as ever. This shows what can be done even in the most extreme cases, with patience and a knowledge of just how to use that patience to the best effect.

We present our readers with an excellent portrait of Mr. A. D. Stewart, the well-known president of the Hamilton Kennel Club. We have had experience with many shows, but Mr. Stewart's second venture as a dog show superintendent, in excellence of management, surpassed anything we have yet seen. Mr. Stewart is a giant in height and size, standing 6ft. 4½ in. in his stockings, while he is large in proportion. A Scotchman by birth, he graduated at Edinburgh University, and, after traveling for a time, finally settled in Canada, where he took a position in the Bank of Montreal, at Toronto, and while there, although it is not generally known to the present run of dogmen, he superintended and managed the dog show held in that city in 1878 when Messrs. John Davidson and James Watson judged the dogs. Finally Mr. Stewart drifted to Hamilton, where he became Chief of Police, and was very popular on the force. Among other celebrated arrests, he effected that of the notorious "Mother" Mandelbaum. After a few years he resigned and, coming to New York, joined Pinkerton's staff of special detectives. Finding, however, that the climate here did not agree with him he returned to Canada and opened a brokering and real estate office. He was elected an alderman about two years ago, and takes a lively interest in the politics of the Dominion. Mr. Stewart is a man of about 37 years of age, and in his younger days was a celebrated athlete. While at college he won the mile swimming championship of Scotland. He was also accounted the best all-around athlete in Canada. In addition to being president of the Hamilton Kennel Club, he is secretary of the Bicycle Club and a member of most of the clubs of the city.

A dog with a historic pedigree has turned up at the Dundee dog and cat show. The animal, which has taken the first prize in the Bedlington class, is named Baccarat, and belongs to a Glasgow gentleman. The catalogue states the pedigree thus: "Baccarat, date of birth 6th August, 1889. Breeder, —. By Scandal, of Tranby Croft." Visitors may be inclined to regard this as a joke, but we are told that the pedigrees of all animals are revised, and if any mistake occurs the dog concerned is struck off the list—a probability which the owner would not be likely to risk.—*Park Mail Gazette.*

The number of dogs registered in Ireland last year was 384,097. The amount of dogs' license duty received was £38,409.

One of the most interesting features of the Toronto show was the greyhound racing. On Tuesday afternoon the race for the prizes offered by the show people took place, and after some unsatisfactory running, owing to the crowded state of the infield and the poor running of the several untrained contestants, few particulars could be obtained beyond the fact that Pious Pembroke, Mr. Purbeck's new greyhound, proved the winner. The races were unsatisfactory and gave rise to considerable talk among the owners, the owner of Why Not, the crack Toronto racing greyhound, offering to run the winner then and there for \$50.

Profiting by experience, the races on Thursday were much better managed, the running taking place on the track, a straightaway course of 170 yds. being obtained. The going was hard but did not seem to affect the dogs very much. A rabbit was used by George Thomas to invite the dogs to do their utmost. This race was a sweepstake of \$5 each, and the winner to receive a medal from the society and to be known as the champion of Canada. The dogs were entered and drawn as follows: A. W. Purbeck's Ornatius against T. S. Thompson's Why Not. A. W. Purbeck's Pious Pembroke against Fred Dixon's Dick. C. A. Burns's Sam against Harry Habart's Blucher. A. W. Purbeck's Lily of Gainsboro against A. G. Fenton's Lady Langtry. In the first round Ornatius made short work of Why Not, though it must be said of the latter that she was running almost on three legs, having cut her heel, and the hard track was too punishing. Ornatius had 6 yds. worst of the start and won by about ten lengths.

In the next race Pious Pembroke had the foot of Dick to the tune of some twenty lengths after a false start. The race between Sam and Blucher was won by the former after playing with Blucher all the way up the track. The last heat in this round between Lily of Gainsboro and Lady Langtry was rather unsatisfactory, Lily had a bad start, but picked up at the finish and won nicely. In the second round Ornatius and Sam ran off, but Ornatius played with him and won as he pleased. Mr. Purbeck's dogs were then the only ones left in, and as the championship had to be decided George Thomas withdrew Lily of Gainsboro and ran Ornatius and Pious Pembroke together. It was a clipping race, running head to head when Ornatius got the verdict by a neck and was declared the champion and Mr. Purbeck is entitled to the medal, which we are told is something quite worth winning. Mr. John Davidson acted as judge. "Honest John" delights in a bit of sport and can always be found on hand when anything like this is on the tapis. With proper training, like whippets, such races are very interesting, although at the same time it savors too much of the drag hunt, and we would rather see the real thing. Ornatius's time, as taken by a practical horse timer in the judge's box, was for the 171 yds. 10½ s. With a live hare in front of him no doubt he could improve this by a second or two. It was quite pleasing to those who uphold bench show form to find these three winners more than holding their own in the field, and especially as they have been doing summer shows in England and are only two or three weeks off the ship.

Montreal show has 338 entries, and when one remembers that no puppy or novice classes are provided, and no entry under 10 months, this is fully equal to 450 in an ordinary

show. The exhibition was to be opened as soon as Lord Stanley arrived at the show last Tuesday.

Mr. W. C. Reick seems to be doing better with Prince Regent's sons than he did with the father. Kingston Regent is taking all before him in Canada, and now he has safely landed his litter brother Marquis of Ripon, whom he tells is almost a counterpart of his noted sire, in fact, when he saw him looking out of a state-room door when he went on board the Hindoo, Sept. 14, it seemed as if the old dog had come to life again. Marquis of Ripon is about two years old, and stands about 33 in. at the shoulder. Just now he is very much out of coat and low in flesh, but this can soon be remedied. He resembles Prince Regent greatly in markings and color. Although he has won prizes on the other side he has not been extensively shown, owing to a slight chorea in one shoulder, but with care and change of climate this may be cured. Mr. Reick has shown good judgment and considerable pluck in securing these sons of Prince Regent, and we hope his zeal will be rewarded by what is the height of his ambition in that line—to breed a winning dog himself.

Mr. Frank Thompson, vice-president of the Pennsylvania Railroad, is known as a great lover of dogs, and always takes an interest in our shows. Dog men will therefore be sorry to hear that on Sunday his magnificent stables at Merion, Pa., were burnt down, and one valuable horse and several of his favorite dogs met a horrible death. The coachman, James Baker, was also severely burned.

Mrs. Eugene Clarke must be congratulated on her Japanese spaniel Ootah's successful delivery of five puppies. This is a most unusual number, two or three being as a rule the limit. They are by Kioto, a well-known winner at New York shows. He is a black and white, while Ootah is what is called a "custard and white," and a very pretty animal it is. Japanese spaniel mothers are, as a rule, scarcely as affectionate as they might be. They have an objectionable habit of making away with their young by performing the "happy dispatch" on them in just the same manner as the subjects of the Mikado do harikari, using their teeth instead of a knife. Ootah is said to have come from the Mikado's kennels, and is herself an exceptionally affectionate mother, the benign influence of Western civilization no doubt having a restraining influence on her "harikari" notions.

An advance copy of the list of premiums is out for the World's Fair dog show in Chicago. As we stated some time since, no dogs will be allowed to exhibit unless registered in the stud books of their respective countries, and application for entry will be considered by a committee of three appointed by the Chief of the Department of Live Stock, and their report will determine the eligibility of the entries. The prizes in the classes for mastiffs, great Danes, St. Bernards (separate classes for rough and smooth coats), deerhounds, greyhounds, foxhounds, shaggy foxhounds, bloodhounds, Russian wolfhounds, pointers (separate classes for heavy and light weights), English, Irish and black and tan or Gordon setters and griffons are: Challenge classes, dogs, medal; same for bitches. Open classes, dogs, first, \$40; second, \$20; third, certificate of merit; same for bitches. In the classes for Chesapeake Bay dogs, Irish water spaniels, Clumber spaniels, field spaniels, cocker spaniels (separate open classes for black and other than black), bob-tailed sheepdogs, retrievers, King Charles and Blenheim spaniels (no challenge classes in these two last named), poodles, bulldogs, bull-terriers, fox-terriers (smooth), fox-terriers (wire-haired), Irish terriers, Dandie Dinmont terriers, Skye terriers, Yorkshire terriers, black and tan terrier, (under 7 lbs.), Scotch terriers, Bedlington terriers, Clydesdale terriers, toy terriers (other than Yorkshire, under 7 lbs.), whippets, and pugs, dachshunde, beagles and Basset hounds, the prizes are: Challenge classes, dogs, medal, bitches the same. Open classes, dogs, \$20, \$10 and certificate of merit respectively; bitches the same. Collies, rough-coated, challenge classes, dogs, medal; bitches the same. Open classes, dogs, \$25, \$15 and certificate of merit respectively; bitches the same. The same in open classes for Newfoundland.

The annual meeting of the Canadian Kennel Club was a most interesting one, and we were particularly pleased to see the number of Canadian fanciers who took part in the proceedings at the Rossin House, Toronto, on the Wednesday night of the show. We counted over thirty local men and visitors. The report of the secretary showed that there were 514 dogs registered during the past year, and when a stud book is issued and pedigrees, etc., are made public, this number will be greatly increased. The financial report showed a balance of \$278.16 to the credit of the club. As we intimated some time since, it was intended to make the secretary's position a salaried one, and after discussion it was voted that \$150 a year should be paid this official in the future. Then several changes were made in the by-laws of the club. One of the resolutions passed, and a good one, was that no show held under the auspices of the club should last longer than four days. How this will affect the Toronto Fair show remains to be seen, but five days is too long for everyone concerned. A motion to abolish puppy classes was unfortunately lost, but we hope this happy result is only postponed, as it must come sooner or later. The election of officers was a matter of great interest, and we congratulate the club on their choice of president, for Mr. Davey has done more than any one to improve the breed of sporting dogs in the Dominion. The secretaryship was keenly competed for by Mr. H. B. Donovan and Mr. A. D. Stewart, the Toronto element, however, proving too strong for the Hamilton representative. The following is the complete list of officers for the year: President, T. G. Davey, of London; First-Vice-President, Dr. Mills, of Montreal; Second Vice-President, Dr. G. S. Millar, of Victoria, B. C.; C. H. Corbett, of Kingston; P. J. Keyes, of Ottawa, and Thos. Johnson, of Winnipeg; Secretary, H. B. Donovan, of Toronto; Treasurer, S. F. Glass, of London.

During the Toronto show Lady Jane, the well known Clumber, was replevined by her whilom or rightful owner. Another sample of Mr. Mercer's good luck. It seems he sold the bitch as a puppy to its present owner, and when it was grown either lent or gave it to his son, who in turn sold it to Mr. Mercer, the latter of course purchasing it in good faith. The father coming to the show recognized his dog and claimed that the bitch was his and his son had no right to sell it. Mr. Mercer received a lawyer's letter and summons to deliver the dog to its proper owner at the close of the show, which Mr. Mercer did. Whether Mr. Mercer will be reimbursed is problematical and it is unfortunate as it breaks his team for the other shows.

We are often asked where reliably-bred Chesapeake Bay dogs can be purchased, as most of the good strains of these dogs, indispensable to the duck shooters, are owned by private parties who do not advertise. We hear that Mr. J. G. Morris, of Easton, Md., has an excellent strain of this breed and has now both puppies and grown dogs that he can dispose of.

We have from time to time chronicled the doings of Mr. Charles Stedman Hanks, of Boston, Mass., while purchasing dogs in England and Russia. Further particulars of his purchases of fox-terriers and Barzoi may be of interest. He has named his kennels the Seacroft Kennels, situated at Manchester-by-the-Sea. Some time since we stated in these columns that he had purchased in England Damson, full

sister to Dominica, Mr. Logan's crack bitch. She has thrown since her arrival six puppies by the great D'Orsay. Another good one was Brockenhurst Queenie, purchased from Mr. Tine, and before she left was served by Venio, and she now has four promising puppies. Another one from Mr. Tinne's kennel was the bitch Grouse II, served by Mr. Redmond's celebrated Dominie, and from her he has five puppies. So it will be seen in starting the kennel Mr. Hanks has secured young stock of the very best blood. While in Russia he succeeded in buying three good Barzois, *i. e.* the dog Duk-hoi, from the kennels of Prince Galitzin, a bitch, Zlodeyka, from the Czar's Imperial Kennels, and a bitch, Svodka, from A. J. Rousseau's kennel. These Barzois left St. Petersburg Aug. 31, and are now on their way to this country, and it is to be hoped that they will arrive in better shape than Mr. Hacke's recent importations. The bitch Svodka was served before leaving Russia by the celebrated stud dog Otaman. We shall therefore soon have a very respectable collection of this breed in this country, and shall therefore need some definite standard to judge by, as they have evidently peculiarities of form that cannot altogether be judged on greyhound lines.

We remind our sportsmen readers that intend running dogs at the Eastern Field Trials in November next, that the entries for the All-Aged Setter and Pointer Stake, with prizes of \$500, \$250 and \$150, close Oct. 1. Forfeit \$10, with \$20 additional to fill. The Champion Stake also closes on that date excepting for dogs that win an All-Aged Stake after the date of closing of entries; these may enter the night before running. Forfeit \$10 and \$15 additional to fill. All entries must be sent to Washington A. Coster, Saratoga Springs, N. Y.

Mr. Watson informs that arrangements have been made whereby those who desire to attend the great coursing meeting at Great Bend, Kan., in October, can do so for a fare of \$50 there and back. This is a big concession, and further, if eighteen people signify their intention of going, a Pullman hunting car can be secured. The trip will last ten days, starting on Oct. 17, and surely there is a sufficient number of sportsmen who will send their names to Mr. Watson, 371 Fulton street, Brooklyn, to secure this privilege.

hounds, English setters and fox-terriers will, no doubt, be a sight to cheer the heart of every sportsman.

The coming dog show at Cincinnati, Oct. 14 to 17, is the talk of the town. Many calls have been made for premium lists, which are now in the printer's hands and will be mailed this week. The entries close Oct. 3; entry fee \$1 for first and 50 cents for each additional dog. The show will be held with Austin's dog bread. Letters to the secretary must be addressed to 3 East Fourth street, Cincinnati, O. Mr. Frank C. Wheeler judges all classes.

We have received a printed copy of the code of rules for coursing of the National Greyhound Club and adopted by the American Coursing Club. We notice that one of the rules provides that all dogs to compete in coursing meets of the club must have been registered in the *National Greyhound Club Stud Book*. The *Greyhound Stud Book* will be published by the National Greyhound Club.

Captain Edwards, of whose breed of terriers called the "Sealyham terriers" we spoke recently, writes to "Peto" of the *Cambic World* some interesting accounts of their plucky doings. In speaking of their hunting capabilities, he gives the following account of one of the smallest of his terriers: "She was not bigger than a tom cat and got last winter into an earth, which ran from a cover right up into a field. I could hear the little terrier fighting terribly not a foot from the surface. I sent for a spade, and there was a great crag fox and the terrier, the latter's face and head a mass of blood. I got her out, and in order to further test her pluck, let her in again. At him she went as plucky as ever. That day the Pembrokeshire hounds were drawing the opposite side. There was a river between us. They drew their side blank. Mr. Lort Phillips, our M. F. H., had one of his 'whips' my side, and the curious part of it was that when digging out the fox I could see the whip's horse had been standing for many minutes right over where the fox was, not a foot from the horse's hoof. Our M. F. H. did not know I had marked a fox. However, I bagged this great gray dog fox, and soon after, in going home, I met Mr. Phillips and the hounds, and I told him I had a bag fox. So we turned him off there and then. It was a quarter to 3.

handsome silver cup has been provided for the Derby at the American Coursing Club meeting of Oct. 20. The finances of the N. G. C. are in a flourishing condition. The committee reported that wax impressions of the medal to be given at various dog shows were looked for every day.

Kennel Notes deferred to next week.

IRISH SETTER TRIALS.

Editor Forest and Stream:

The following are the entries for the Derby Stakes of the coming Irish setter trials:

1. NUGGET (H. B. Anderson), whelped Jan. 3, 1890 (Redfern—Gypsy Maid). Breeders, H. B. Anderson and W. B. Burlingame.
2. FINGLAS (E. B. Bishop), whelped April 13, 1890 (Fingal III.—Aveline). Breeder, Rev. Robt. O'Callaghan.
3. COLERAINE (E. B. Bishop), whelped April 13, 1890 (Fingal III.—Aveline). Breeder, Rev. Robt. O'Callaghan.
4. ROSE OF CLAREMONT (Geo. H. Kunkel), whelped Jan. 20, 1890 (Claremont Patsy—Nino). Breeder, F. H. Perry.
5. PRIDE OF PATSY (F. H. Perry), whelped Jan. 20, 1890 (Claremont Patsy—Nino). Breeder, F. H. Perry.
6. ADONIS (H. E. Richards), whelped July 29, 1890 (Tim—Curren Bell III.). Breeder, Dr. G. G. Davis.
7. BESSIE MAVOURNEEN (B. Masden Vaughan), whelped July 29, 1890 (Tim—Curren Bell III.). Breeder, Dr. G. G. Davis.
8. LEIGH DOANE VI. (Wm. H. Child), whelped Jan. 3, 1891 (Fly—Betsy Leigh). Breeder, Wm. H. Child.
9. SQUAW (Hudson River Kennels), whelped April 15, 1890 (Darran Pat—Ruby Glencho). Breeder, L. A. Van Zandt.
10. QUEEN BON AIR BLUE (R. R. Jones), whelped Oct. 3, 1890 (Elcho, Jr.—Flipper). Breeder, U. S. Kennel Club.
11. FRANK BLYE (J. Frank Byers), whelped Oct. 3, 1890 (Elcho, Jr.—Flipper). Breeder, U. S. Kennel Club.
12. MAIL OF BOISTAL (Nelson McIntosh), whelped Dec. 10, 1890 (Inchiquin—Onoto Belle). Breeder, Nelson McIntosh.
13. ELCHO'S MAID (George E. Gray) (Elcho, Jr.—Maid). Breeder, Dr. Jarvis.

While the entry is not as large as I desired, still I think it is fair, particularly in view of the fact that an interested

MR. H. C. CORBETT, KINGSTON, CAN.

MR. A. D. STEWART, HAMILTON, CAN.

Having the hunting car will allow of several dogs being taken along free.

Mr. John Grace, of San Francisco, will judge at the American Coursing Club meeting at Great Bend, Oct. 20. This is a good selection, judging from reports of his previous efforts.

Mr. Jamrach is dead. Mr. Jamrach was noted the world over as a naturalist and importer, trader and exporter of wild animals. When Barnum was burned out he supplied him with many of his animals. To dog men he was known as an enthusiastic breeder of long-haired Russian greyhounds and Japanese spaniels.

Mr. Moorehead has sent us some further information regarding his newly imported bull-terrier, Streatham Monarch. This dog as a puppy was advertised for sale by Mr. Copeman as being "the best bull-terrier puppy living at his age, he being then four and a half months old, price, twenty-five pounds." The pup was sold at this price, but on the day of delivery fell ill with distemper, and after being nursed through a very bad attack, being at death's door for six weeks, he pulled through and was sold for fifteen pounds. His sire is a fine large dog, named Streatham Flyer, he by Gully the Great out of Daisy. His dam is the well-known Trentham Baroness, a daughter of the well-known bitch Miss Glendyne, now called Attraction, and at present the property of Mr. Mariner, of Milwaukee. He therefore combines the blood of the very best of his breed. Forty-eight winnings have been placed to his credit, and these have been won under fifteen judges. Streatham Monarch is two years and two months old, weighs 48 lbs., and is a most prolific stock getter, two bitches having whelped to him twenty pups, two litters of ten each.

Mr. Geo. H. Hill writes that the entries for the Blue Grass Kennel Club's inaugural dog show, to be held Sept. 23-26, closed with 461, divided as follows: 12 mastiffs, 28 St. Bernards, 4 Newfoundlanders, 10 Great Danes, 1 deerhound, 53 greyhounds, 6 Russian wolfhounds (Barzois), 24 pointers, 62 English setters, 14 Irish setters, 9 Gordon setters, 4 Irish water spaniels, 2 field spaniels, 4 cocker spaniels, 3 beagles, 89 American foxhounds, 6 shaggy foxhounds, 5 English foxhounds, 12 collies, 4 bulldogs, 3 bull-terriers, 1 Scotch terrier, 1 Dandie Dinmont terrier, 40 fox-terriers, 14 black and tan terriers, 1 Yorkshire terrier, 28 pugs, 5 Italian greyhounds, 3 Mexican hairless, 13 miscellaneous. This is a splendid showing, and such a collection of foxhounds, grey-

The fox went off like a bolt; the hounds, getting a view, nearly had him going through a fence; but he beat them after all, although they ran him till nearly 8 o'clock. And this is how he did it: Running parallel with the field in which we turned him out was a road; down this he went, then over the fence, then back into the road, over the fence again, and so on, ultimately getting well ahead, and at last got clean away and beat us."

Some people seem possessed of a mission to treasure up mementoes of celebrated people, but a certain lady of noble birth is original in her method of expressing her hero worship. She managed to despoil Bismarck's favorite dachshund of some of his hair which she had set in a gold locket. This reminds one of the struggle to shake the hand of the man that shook the hand of Sullivan.

"Strange, true and amusing," says the *Herald*, in an editorial, when "grim visaged war hath smoothed his wrinkled front," he proves to be quite as soft hearted as any member of the peace society. For instance, our war ship Marion was meandering about in the North Pacific a short time ago when a cur dog, who is an irregular member of the crew, succeeded in falling overboard. Nothing on earth is so worthless as a cur dog, except another animal of the same kind, yet there was a general hubbub aboard the Marion when the loss was announced, the vessel was stopped, a lifeboat was lowered, the beast was picked up, and then the vessel proceeded on her course. There was nothing wrong in the incident. It showed what tender-chaps our tars are when no killing is to be done; but it is funny when you think about it." Why? a dog's a dog for a' that.

While it is gratifying to be told that of the five suits growing out of the A. K. C. troubles only three concern the club, we are still of the opinion that, if these suits could not have been avoided in the first place, their early compromise, if practicable, would have promoted the interests of the club and of the kennel world. That they have worked harm, and are working harm to those interests, no well-informed person will deny. Of the personal suits we have never assumed to suggest any compromise.

The National Greyhound Club will submit to all its members the question whether they desire to have a list of judges. Some of the members have expressed a contrary desire, and in this way the point will be settled. Those who favor the list will be asked to nominate those they desire to act, A

member of the club wagered a bottle of wine that we would not receive twenty entries in both States together. In view of the fact that there is \$400 in cash and a valuable trophy to be divided into three prizes, I rather expect to see a goodly proportion to fill. Some of the handlers I know mean to do their best. Now for the All-Aged Stake. We are going to make that interesting. I am going to take a hand in it myself. Let us all make some entries, and may the best dog win.

G. G. DAVIS, Sec'y and Treas.

MONTREAL SHOW.

[Special to Forest and Stream.]

MONTREAL, Sept. 22.—The Montreal bench show opened to-day. Weather very hot; management behind. Judging commenced at 1 P. M. with mastiff class, which is good in number but very poor in quality. Flour City Kennels absent. Entries number over 350, with many absent. Catalogues not out first day. At 9 P. M. over ten thousand people had passed the turnstile to the building, which is too small for comfort. The show promises to be a big success. Winners mostly so far are circuit dogs. Many new ones are entered. Kingston Regent, Republican Belle, Zenith and Nun Nicer won in St. Bernards. Gem of the Season first, Scavenger second in challenge greyhounds. Maud Tarrington first, Spinaway second in bitches. Open dogs, Ornatus first, Pious Pembroke second. Bitches, Second Sight first, Bestwood Daisy second. Spaniels of good quality. In field spaniels, challenge dogs, Sampson first; bitches, Gladis first. Open dogs, Mawauk first; open bitches, Woodland Sally. Cockers, challenge dogs, Red Jacket first, Oban second, Rabbi reserve. Challenge bitches, Bessie W. first. Open dogs, Dufferin first; bitches, Essay first, Cora second, Flirt third. Judging postponed until 10 o'clock Wednesday. Dragging along in this way should be done away with.

BURLINGTON ROUTE.—But one night Chicago to Denver. "The Burlington's Number One" daily vestibule express leaves Chicago at 1 P. M. and arrives at Denver at 6:15 P. M. the next day. Quicker time than by any other route. Direct connection with this train from Peoria. Additional express trains, making as quick time as those of any other road, from Chicago, St. Louis and Peoria to St. Paul, Minneapolis, Council Bluffs, Omaha, Cheyenne, Denver, Atchison, Kansas City, Houston and all points West, Northwest and Southwest.—Adm.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

ALBERTA, CANADA, FIELD TRIALS.

THE second annual field trials of the Calgary Rod and Gun Club took place Sept. 9, says the Calgary (Can.) Tribune, at a point about twelve miles from Cochrane. Members of the club and their friends left the evening previous. Conveyances had been sent out to Cochrane to accommodate the party, who left at an early hour for the scene of action, when the dogs were drawn in the following order: Don vs. Royal, Norah vs. Jury, Psyche vs. Ben Hur, Dot vs. Ranger, Prince vs. Blarney, Dash B., a bye.

At 7:35 in the morning H. H. McCullough's pointer dog Royal and J. B. Smith's pointer dog Don were cast off in a hilly country, interspersed with bluffs. Both dogs started at a great speed; Royal raced up to a bluff and came to a magnificent point, Don, at the time, being in another direction. The birds had run to a bluff lower down the hill, but Royal was equal to the occasion and roared them nicely. McCullough, ordered by the judge to flush, did so. Don in the meantime was pointing in another direction. Birds were very plentiful here but were running wildly. Each dog roared and pointed in quick succession, some fine work being shown in this heat, in fact it was generally conceded to be the best heat run during the trials. After being down thirty minutes the heat was awarded to Royal.

The committee at this time thought this part of the country too bluff to see the work of the dogs properly, so a move was made to a place about five miles further on, when at 9 o'clock E. Hodder's Irish setter Norah and C. C. McCaul's English setter Jury were put down to compete. A single bird was marked and the dogs were sent in the direction. Jury showed game first and roared what was evidently a running bird. She, however, did it in an indefinite manner, and two birds rose wildly on reaching the top of the hill. Norah shortly after this made game and commenced to roil in a very stylish manner, finishing up with a nice point. On her hauler shooting the flushed bird she ran in, and in consequence lost the heat.

Mr. T. Stone's pointer Psyche and Mr. S. W. Trott's pointer dog Ben Hur were cast off at 9:30. Psyche went off in a listless sort of way and showed that for some cause she lacked the brilliancy of her work of last season, when she won these trials. Ben Hur pointed a single bird, but at this time Mr. Stone asked the privilege to withdraw his dog, which was showing signs of lameness. This was granted and the heat awarded to Ben Hur.

Mr. D. G. Robinson's English setter dog Ranger and Mr. George Gouin's English setter Dot were put down at eleven. Very inferior work was done in this heat, and had any one prophesied that Ranger would prove the ultimate winner his prophesy would have seemed as probable and ridiculous as if he had asserted (after the late boodle scandals at Ottawa) that the Conservative party would again be returned to power after a general election. Ranger was awarded the heat, not from the good work accomplished, but from his competitor's inability and obesity.

C. W. E. Hodder's Irish setter Blarney and Mr. Richard's English setter Prince were next cast off. No work of note was done in this heat, and after being down one hour the heat was awarded to Blarney.

Mr. W. H. Hogg's English setter dog, who had the bye, was now run for twenty minutes to put him on an equal footing with those that had run in former heats.

SECOND SERIES.

Royal and Jury were put down, and Royal again showed great brilliancy in his work and outclassed Jury, and was awarded the heat.

Ben Hur and Ranger now were pitted against each other. Ranger in this heat woke up and made a number of points, showing grand accuracy on his birds. Ben also ran better in this heat, but was beaten by a narrow margin.

Dash B. and Blarney then had a long give and take heat, the judges finding it very difficult to decide on the winner. They, however, eventually awarded the heat to Dash B.

Royal and Ranger were now cast off. Royal ran riot in this heat and was lost, Ranger in the meantime making two or three points. It seemed ten to one from previous work that Royal, who lost, would have won.

Dash B. and Ranger were now cast off to compete for first place. Dash B. showed great pace, range and style, but Ranger exhibited a splendid nose and good locating power, besides being very staunch on his points and steady to shot and wing. According to the point system Dash B. would have had this heat, but the judges considered the qualities of Ranger just mentioned more than balanced those of Dash B., and awarded him the heat and first place.

This left Royal and Dash B. to run for second and third prizes. The owners of these dogs, however, agreed to divide the same without running.

And thus a very successful and pleasant gathering ended. The first prize was a cup, presented by Mr. Thos. Stone, and \$30 cash by the club, the second and third being \$15 cash.

Mr. S. W. Trott performed the arduous duties of judge very efficiently and satisfactorily to all, being assisted by Mr. Thos. Johnson, of Winnipeg.

It being now about 6 o'clock, a start was made for Cochrane, which was reached after a drive of about fourteen miles, and where Mrs. Elliot had a smoking dinner ready, which was enjoyed as such a meal can be enjoyed after a long day's shooting on the prairie.

As most of the sportsmen had to return this morning, the shooting did not take place for the president's medal, but this competition will take place at an early date.

ZETTLER TOURNAMENT, Sept. 20.—The eighteenth annual shooting festival of the Zettler Rifle Club was begun to-day at the Cypress Hills shooting grounds. The programme is an extensive one, no less than 21 money prizes being offered, besides premiums prizes for the best five tickets. For the bullseye target, open to all comers, 18 prizes are offered besides premiums for the high number of bullseyes made by any shooter during the festival. The target of honor prizes, open to members only, and the judges' target prizes are the most interesting in the shoot. A ladies' match will be shot off later. The following is the result of the shooting of the first day:

King Target.—J. Copersmith 71, F. Ross 73, M. Dorrier 69, R. Busse 69, S. Flack 69, C. Wegmann 69, Dr. Boyken 68, M. B. Engel 63, J. Bodensacht 63, G. C. Jantzen 63, A. Stein 64, J. Krauss 63.

Bullseye Target.—J. Copersmith 71, F. Ross 73, M. Dorrier 69, R. Busse 69, S. Flack 69, C. Wegmann 69, Dr. Boyken 68, M. B. Engel 63, J. Bodensacht 63, G. C. Jantzen 63, A. Stein 64, J. Krauss 63.

Target of Honor.—J. Copersmith 71, S. Flack 63, M. Dorrier 63, R. Busse 61, M. B. Engel 61, G. T. Hoffman 59, F. Ross 56, G. Krauss 52, F. Armbrust 52, E. Boush 52, J. Klein 50, J. Blumenberg 44.

Sept. 23.—The eighth annual festival of the Zettler Rifle Club closed to-day at the Cypress Hills Park, and some fine workmanship was displayed by several of its members. The principal competition was at the ring and bullseye targets. The targets of honor also came in for a considerable share of patrons, but none of them could beat J. Copersmith's score of 71 made on the first day. In the ring target competition F. Ross's score of 73 kept the lead, although J. J. Boyken, W. H. Hayes and M. Dorrier followed it very close with 72 each. W. Hayes won the first premium prize for the best rings with F. Ross and J. A. Boyken second on a tie. F. Ross also won the two prizes for the first bullseye made on each day. A. Stein and L. P. Hanson taking the two for the last on each day.

The ladies' competition was very close. Mrs. Keller and Mrs. Wissel tying for first choice of prize. A. J. Christian and J. H. Townsend tied for the judges' prize with 143 each, being behind for second with 41. H. W. Hayes won the first prize for the bullseye target by measurement. The following are the scores of the tournament:

King Targets.—Best five double tickets: F. Ross, 73, 71—144; J. A. Boyken, 72, 71—143; W. Hayes, 72, 71—143; M. Dorrier, 72, 69—141; G. Jantzen, 71, 70—141; J. Krauss, 70, 71—141; R. Busse, 69, 70—139; C. Wegmann, 69, 70—139; A. Stein, 69, 70—139; M. B. Engel, 68, 70—138; J. Bodensacht, 68, 70—138; H. M. Pope, 68, 5, S. Lyon, 68, L. P. Hanson, 68, J. Dolaz, 67.

Bullseye Targets.—H. W. Hayes 111, W. Koch 204, F. Ross 214, F. Armbrust 30, A. Begerow 34, J. Copersmith 38, A. Stein 43, C. P. Jantzen 44, R. Busse 54, J. Bodensacht 55, M. Dorrier 63, S. J. Lyon 69, W. H. Hayes 73, G. Krauss 73, G. E. Jantzen 79, G. Jantzen 81, G. W. Haskaly 81, A. Begerow 97.

Target of Honor.—J. Copersmith 71, H. Holzer 67, Q. Flack 66, G. Jantzen 66, G. Zimmermann 64, M. Dorrier 63, F. Heiching 62, A. H. Kohlmeier 62, M. B. Engel 61, R. Busse 61, W. Hayes 60, G. L. Hoffman 59, E. F. Keller 56, H. Ringler 56, F. C. Ross 56, E. F. Klein 53, G. Krauss 52, G. W. Plaisted 52, F. Armbrust 52, W. J. Blumenberg 44, C. D. Dorian 44, W. Begerow 48, H. Oehl 47, J. Boyken 38, M. Trapp 35, M. R. Riggs 35, W. D. Ware 35, W. P. Hanson 28, F. Fabarius 23, K. Klein 15.

Ladies' Prizes.—Mrs. Keller 42, Mrs. Wissel 42, Mrs. Oehl 41, Mrs. Vogel 41, Mrs. Dorrier 40, Mrs. Zimmermann 40, Mrs. L. Zettler 39, Mrs. C. Zettler 38, Mrs. Windle 37, Mrs. J. Zettler 36, Mrs. B. Zettler 35, Mrs. Davis 34, Mrs. Busse 33, Mrs. Schert 32, Mrs. Heicking 31, Mrs. Schubert 30, Mrs. Schert 29.

At the close of the shoot the prizes were awarded to the lucky winners, after which dancing closed a very successful festival.

NEWARK, N. J., RIFLE CLUBS.—The Oriental Rifle Club held its regular meeting on Thursday night last, at which these officers for the ensuing term were elected: D. J. Mahoney, president; Gus Widman, vice-president; Frank Ecker, financial secretary; Louis Widman, recording secretary; Charles Schott, treasurer; August J. Widman, captain; Thos. Upton, sergeant-at-arms. The club has a membership of 58 members and decided to leave the list open until next Thursday. The Independent Rifle and Sporting Club held its first meeting of the season on Monday last, and considerable routine business was transacted. The election of officers for the ensuing year resulted as follows: President, J. M. Bray; vice-president, C. G. Camp; corresponding secretary, Henry Rummel; financial secretary, E. Throssell; treasurer, Wm. H. Davis; captain, Chas. Smith; rifle instructor, James McCallum; vice-captain, Chas. Smith; rifle instructor, Willis Camp. This club, which is the only one in Newark having headquarters of its own, is in a very prosperous condition and will put a strong team in the field this season. The books are now open for those who wish to join. The club has a fine house and two ranges at 88 Frelinghuysen avenue and is not connected with the Union.

THE TWIST OF RIFLES.—I have just been looking through the entertaining pamphlet of Brother (Billy?) Barlow of the "Ideal" Company and among other things a table of the twist employed by the different firms in the manufacture of various calibers. I wish some one who knows "Iron Ramrod" for example, or our interesting friend across the pond, "J. J. M." would tell us what principles, if any, are supposed to govern in this matter. For instance, why is it that for the common 44-40 cartridge the Remington Company gives one turn for every 20 in., the Colts one for every 28, and the Martin and Winchester factories one for every 36? In the other calibers there is little more uniformity. Are we to infer from all this that the twist was very little to do with the shooting of a rifle?—AZTEC.

CONNECTICUT.—The adjutant-general has issued orders for the annual State rifle match of regimental teams of the National Guard to be held at such time and place as General Watson may direct. The quartermaster-general is to issue 1,500 rounds of ball ammunition to each team contesting. The prizes are the State Second Regiment; a bronze medal for the Regiment and in 1889 by the State; won in 1885 by the Second Regiment and by the First Regiment in the following year; and a bronze statuette of a Roman soldier, first completed for in 1889 and won by the Third Regiment. There was no match last year. A medal will be given to each member of the team winning the first prize.

BOSTON, Sept. 19.—All comers' rest match.—W. P. Thompson 103, J. Frazer 111, T. Warren 109, M. R. Baxter 106, O. Moore 101, W. Peter 100, E. D. Tower 95, W. Conway 94, W. N. Browne 90, L. A. Moore 86, E. D. Drake 85, D. Martin 83.

All comers' off-hand match.—S. C. Sydney 85, L. A. Baker 83, J. B. Fellows 80, A. Maynard 78, G. B. Hobbs 77, D. N. Winn 73, M. T. Meek 72, D. Martin 70, E. H. Corney 68, O. Moore 66, W. Conway 65. Fifty yards, pistol match.—H. Severance 95.

NEW ORLEANS, Sept. 15.—The Southern Rifle Club held its annual meeting and election of officers to-day, with the following result: J. M. Lamare, Pres.; G. Evans, Jr., Vice-Pres.; L. A. Desgroues, Rec. Sec.; J. J. Lamare, Fin. Sec.; J. A. Boze, Treas.; J. A. May, Sec. of Armory; Lieut. A. Olier, Sr., H. Bremmard, Trustee; C. Beaver, Armorer. The club is every way in excellent condition, and possesses one of the best equipped rifle ranges in the State.

THE REVOLVER CHAMPIONSHIP.—Commencing Sept. 1, at the Creedmoor Cartridge Company's range, at Barbarton, practice shoots for the Walter Winans amateur revolver shot trophy will be shot for three times a week. The scores will be taken by a gentleman authorized and sent to headquarters. The days have been known and it is probable that the contests will occur on Tuesday, Wednesday and Friday of each week. There are a number of fine shots at the works of the company at Barbarton and competition is open to all.

CANADIAN SHOOTERS.—In his report upon the operations of that most excellent institution—the Canadian Military Rifle League—Secy. Lieut. W. R. Fringle urges that the League provide for Martini shooting, and in that case to organize a team to capture the Hilton trophy at Creedmoor.

THE PENNSYLVANIA STATE SHOOT.—The executive committee of the Pennsylvania State Sportsmen's Association, since sending out the programmes for the tournament to be held on Sept. 29 and Oct. 2, has concluded that the expert handicap is too severe a handicap even for experts, and has decided to adopt a new handicap for the first class of shooters, as follows: The experts will be required to shoot their scores first from a set of traps where the direction of the flight of the target can be changed instantly, and while shooting from known traps to shoot unknown angles, rapid firing system. They believe this handicap more nearly equalizes the expert and the amateur than the Keystone system of handicapping. The amateurs will shoot from known angles, known traps, and a firing system. The committee and the Sportsmen's Association will be held, extend a cordial invitation to all shooters in the United States and Canada to attend this meeting. Everything will be done for the pleasure and comfort of visiting sportsmen, and a grand time is guaranteed to all. For programmes, address N. A. Hughes, Williamsport, Pa.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

Sept. 23-24.—Baltimore Gun Club Tournament, at Acton's Park, Baltimore. For particulars address W. H. Linthicum, No. 15, St. Paul street.

Sept. 29-Oct. 2.—First Annual Tournament of the Pennsylvania State Sportsmen's Association, Williamsport, Pa. Targets and live birds. N. A. Hughes, Sec'y.

Oct. 1.—Rochester Rod and Gun Club Open Tournament. There will be at least two guaranteed prizes, all surplus added; one or two merchandise prizes, and a sweetest shooting all day. Rapid firing system. Address H. D. McVurran, Rochester, N. Y.

Oct. 5-6.—Washington (D. C.) Rod and Gun Club Tournament. A McCormick, 1013 Pennsylvania avenue, N.W.

Oct. 13-15.—Staunton (Va.) Gun Club, assisted by the Interstate Manufacturers' and Dealers' Association.

Oct. 21-23.—Reading's Tournament, Flemington, N. J. Key-stones.

Oct. 27-29.—Savannah, Ga., Chatham Gun Club, assisted by the Interstate Manufacturers' and Dealers' Association.

DAYTON SECOND ANNUAL.

DAYTON, O., Sept. 15.—Ohio is and has long been one of the foremost shooting States in the Union, and many famous shooters claim her soil as native ground. Out of the many Ohio shooting towns Dayton is one of the best, as witnesses many earlier trap events at that city, notably, last year's tournament. Cincinnati was once the foremost shooting town of the West, but Cincinnati is now foremost only in its hindmostness. Next year they will be hunting for mound builders' graves on the site of Cincinnati. Never was a place so sudden as that which transformed Cincinnati from an active factor in shooting matters to a defunct haven, where nothing goes but a tripod or a free-for-all. Dayton must easily claim the supremacy for southern Ohio. Only one Cincinnati shooter is here to-day, the "old Reliable" Ed. Taylor, who lifts up his voice and weeps for his native city. They are having a summer spectacular at Cincinnati just now, known as the "Last Days of Pompeii." This is touchingly appropriate. When Cincinnati can only send one shooter to Dayton shoot, distant only 50 miles, it's time to figure on last days.

Dayton shoot is the second annual given by those well known shooters, Mr. Scott McDonald and Dr. Parker. The tournament progresses upon the fine grounds of the Diamond Gun Club, as pleasant as any you will find, and much helped out by a spacious and tidy new house, to say nothing of an outdoor kitchen, which furnishes meals so good and so quick that a shooter with life. At some places they purposely give out such poor meals that they are reduced to hunger and weakness, in which condition their money is easier to win. The Diamond Club does not operate on that basis. It tries to make the shooter helpless by encouraging him to eat more than he ought to. The Diamond Club is so called because each member wears on his shirt front a diamond as a badge of membership. Cincinnati cannot wear diamonds. It wears over the Rhine—Rhine, when it has a shirt. If it had a shirt it might be here to-day.

The fact is, there are a good many absent who should be here. The attendance is very light, which is something that so well known a management as this ought not to have. The programme is good and varied one, and the \$600 in guaranteed purses ought to be plenty to attract a larger gathering. As it is, I question whether the boys will care to go. Scott and the Doctor to the guarantees, and they will probably not be shot on that basis. Foremost to suggest this was the always generous Col. Courtney, the Lefevre man, who can't bear to see any one play in hard luck. Col. Courtney, by the way, is the only one of the gun gang present. He was shooting pretty comfortably well to-day, and had a guarantee business, your uncle Courtney and Scott McDonald would have had to match coppers for gold. Penn, of Wheeling, West Va., fell into 20 straight a couple of times in the only shoots that counted, and Osborne, of Toledo, followed close enough with 38 to get second average, \$5. Andrew Mumma shot fair to middling, and was a "shorty" in the morning. The professional beauty newspaper man can do with a gun between words, in all, this was a very pretty, pleasant day, every way, though it would have been better if it had been bigger in some ways.

Only targets were shot to-day, blue rocks and Keystone in about equal number. The ties were generally divided. The money went 40, 30, 20 and 10 per cent. No favorites, nobody handicapped, nobody barred, no winning to make an entry, or to get your winnings or your lunch. Ten traps, Keystone rapid-fire system, were used, and everything was lively except the attendance. Way this was so light I shall not try to explain, unless it was that the field-shooting season is opening and will so soon be open. Trap-shooting is puzzling anyhow in its whys and wherefores. You don't bar them, or class them, and you don't get the crowd. You don't go to theorize about the attendance, because the weather is too warm for philosophy, but we all hope the crowd will pick up to-morrow.

The following are the scores of the day:

No. 1, 10 singles, \$1:

Courtney	0111101111	9	S Weed	0111011111	7
Osborne	0111011111	7	Porterfield	0111011111	5

Rifle and Trap Shooting.

RANGE AND GALLERY.

REVOLVER SHOOTING IN ENGLAND.—London, Sept. 5.—The season at the South London Rifle Club, the principal revolver shooting club in England, is drawing to a close, there are only seven more shooting days. There is a "spoon competition" each shooting day, and the revolver championship of the club goes to the member who makes the highest scores in the "spoon competition" on five separate days, at 20 yds. Up to the end of August the three leaders for this were:

Mr C F Lowe, 40 39 38 37—192 Mr Andrews, 41 38 37 34 33—183 Mr May, 38 38 38 37 36—187

On Sept. 1, Mr. Walter Winans went down for the first time this season, and in what was officially reported by the secretary as a "hurricane," made the following score:

The storm blowing from the left he had to fight against being blown to the right, and rather allowed too much for wind. Messrs. Lowe and May did not compete, but Mr. Andrews made 37, and Mr. C. Brown (who shoots under the professional name of "Young Nimrod") made a score of 36. Mr. Winans has now only seven days to make four scores in, and it is the time of year to expect rough weather, as against the fine calm days the others have made their scores in.

On Sept. 8, at the weekly revolver competition at the South London Rifle Club the winners were as follows:

Walter Winans..... 77777-41 C Brown..... 75657-38 H Andrews..... 75677-38

This makes the scores toward the championship of the club stand:

Walter Winans..... 41 41-82 H Andrews..... 41 38-79 C F Lowe..... 40 39-69

SOUTHBRIDGE, Mass., Sept. 19.—Members of Co. K, 6th Massachusetts V. M., have had their annual rifle contest. The Co. K team was fifth in the race. Each man had a possible 50. The work of the team follows:

Sgt Mills..... 543544454-42 Capt Dillaber..... 043443534-34 Sgt Brousean..... 54345344-40 Pvt Putney..... 532454243-34 Sgt Crozema..... 54344444-39 Lieut Goodell..... 243403424-30 Musician Brousean..... 54344444-37

Penn and McDonald div. first, Osborne and Sanford div. second, Pierson third, and Shorty fourth.

No. 6, 15 singles, \$1.50 entry: Courtney.....1111111111-14 Davenport.....111110111111-12 Mumma.....111111111111-14 Shorty.....111111111111-14 Sanford.....111111111111-14 Penn.....111111111111-14 Young.....111111111111-14 Osborne.....111111111111-14 McDonald.....111111111111-14 Taylor.....111111111111-14 Rike.....111111111111-14

Osborne first, second and third div., Davenport fourth. Extra sweep, 15 singles, \$1.50 entry: Courtney 11, Osborne 15, Young 11, Sanford 14, Small Weed 10, Rike 14, Brown 12, Stone 10, Penn 12, Mumma 11, McDonald 12, Albert 10, Pierson 11, J. W. R. Shorty 11. Ties div.

Extra sweep, 15 singles, \$1.50 entry: Courtney 14, Sanford 15, Osborne 11, Penn 13, Young 15, Rike 11, Pierson 12, Hanna 7, Stone 11, Shorty 14, McDonald 14, Mumma 11, Porterfield 11, Taylor 10, James 5, Parker 13, Nestor 9, Brown 11. Ties div.

Extra sweep, 10 singles, \$1: Courtney 8, Sanford 9, Osborne 10, Penn 8, Young 10, Rike 9, Pierson 10, Davenport 8, Stone 7, J. W. R. McDonald 8, Shorty 10, Mumma 5, Brown 10, Parker 8, Brubaker 8, Hanna 5. Ties div., Stone fourth alone.

Extra sweep, 10 singles, \$1: Courtney 8, Stone 6, Sanford 10, Young 9, Rike 10, Penn 8, Shorty 8, Brown 6, James 4, Buggs 7, McDonald 7. Ties div., Young second alone.

Extra sweep, 10 singles, \$1: Courtney 7, Sanford 10, Osborne 9, Penn 8, Rike 7, Young 10, Taylor 9, Protzman 8, Small Weed 6, Mumma 8, McDonald 8. Ties div. This closed the shooting for the day.

Wednesday, Second Day, Sept. 16.

The weather was clear and bright, becoming very warm in the afternoon. The shooting attendance was about the same, though many more spectators were on hand. The guarantees were by consent modified, so that the management will be protected. Osborne again won first daily average, 81 out of 81 in the guarantees. Sanford, 2d, 80. Scott McDonald chased them both, for a while in the averages. Courtney, a trifle used up by a cold, fell down below average pretty often, though his name was the first in every entry. Penn and Osborne left for home to-night. The battery of 10 traps was of 5 blue-rock and 5 Keystone traps, each throwing its own bird. The score:

Extra sweep, 10 singles, \$1: Courtney 10, Rike 6, Young 7, Penn 8, Pierson 6, McDonald 9, Stone 4, Mumma 7, Brown 5, Sanford 9, Artz 9. Courtney still wins.

Extra sweep, 10 singles, \$1: Courtney 9, McDonald 8, Mumma 8, Stone 7, Brown 7, Sanford 10, Young 5, Artz 5, Penn 10, Rike 9, Pierson 9. All ties div.

This closed the shooting, which had been pretty steady all day. To-morrow the shooting will be altogether at English sparrows, at which class of sport Dayton probably ranks first in the country.

A number of the shooters were very pleasantly entertained in the residence of Mr. and Mrs. Sylvester Troup. Master Mark Troup, aged 11, violinist and Master Carl, aged 13, cornetist, accompanied by Miss Emma Shank, aged 14, pianist, discoursed some very taking melody. These little folks are no tyros or bunglers, but musicians, and displayed a technique one could not have expected. Mr. Harley Throckmorton, of Chillicothe, who, by the way, is doing the official scoring, was also called upon and kept the audience delighted or convulsed for over two hours. Mr. Throckmorton plays 22 different instruments, including every stringed instrument known, and is an artist of exceptional merit at guitar and violin. He is something of a celebrity, and has traveled upon the theatrical road with various companies. His imitations of the negro and other dialects were pure fun, notably in the song where he described the ethnological and physiological reasons why the negro, the possum and the banjo are always found in close juxtaposition. The most charming of this young sprightly gentleman's music was his description of how to do old but ever charming feature he is simply delightful. If there be music in heaven, surely it must be the thin, sweet, weird music of the trembling crystal. Mr. Scott McDonald also assisted with the violin and guitar, on each of which he is an adept and a favorite among those who "follow the circuit." All in all, the evening was unique and felicitous in idea and performance, and Mr. and Mrs. Troup deserve very hearty thanks for their courtesies. The following gentlemen were also present: Mr. C. H. Syracuse, N. Y.; Harry Brill, Troy, Ohio; J. H. Strong and C. A. Young, Springfield; J. H. Brubaker, E. Hardy, Phil Wall, M. Langdon, Dr. J. A. Romsper, H. K. Buntin and Scott McDonald, Dayton; Geo. C. Osborne, Toledo; M. C. Sanford, Townsend, Ohio; W. J. Pierson, Tipp City; Harley Throckmorton, Chillicothe.

Thursday, Third Day, Sept. 17.

This was sparrow day. The targets were laid aside, and the attention of the shooters was confined to the Dayton specialty, the big-beaked English birds. To those not thoroughly familiar with this form of sport, some detailed mention of it may prove of interest. In many features it is as clearly entitled to the name of sport as either target or live pigeon shooting.

In the first place, the English sparrow is an unlovely bird, peevish, quarrelsome and nervous habit, and his sympathy attaches to him either in his capture or his taking off. States offer bounties on his head. He is excoriated as a nuisance and a fraud. If then we use such a bird as a target, it is quite as well, let us say, as that we should use so gentle and lovable a bird as the domestic pigeon. Sentiment might possibly in some minds attach to the latter bird; to the sparrow, none whatever.

Next, the sparrow is a very hardy and a very hardy bird. Naturally pugnacious and very hardy, it is prompt from the trap, and a vigorous flyer for its size. This and its diminutive size make it a difficult target. The scores show this to-day. It takes practice to make a good sparrow shot.

In the third place, the sparrow keeps fairly well in confinement. Next, it is easy to handle. Lastly, it is abundant and ready to be caught, and you know how to do it. The sparrow is a bird that Dayton has been having been thoroughly mastered by that genius, Mr. L. K. Buntin, one of the best known figures of Dayton sportsmanship. Mr. Buntin is county game warden, and was lately State warden. It was he who figured this summer in the shooting scrape reported in FOREST AND STREAM, he being obliged to shoot two roughs who resisted arrest and assaulted him. One of these fellows, who was a very bad fellow, was reported as being but a few days from being hanged. Mr. Buntin caught him once after the shooting, but within an hour there was a bond of \$150.00 waiting to see him released, and that was the last of that trouble. "Next time you take a Winchester," said the chief of police, "and shoot 'em harder." Well, Mr. Buntin, besides his duties as warden, has found time to study the sparrow question closely. He will some day write a paper for FOREST AND STREAM, and he has been very successful in his work. He has set a few sparrow traps which have caught most of the sparrows shot in Dayton, though some few of the birds are imported from Indianapolis. The way in which these traps work was shown me.

Sparrows can be caught in two ways, by the wall net or by the ground trap. The wall net is a rolling net, run up on a high spring frame against the wall, and the birds are driven into it. It is used only at night. The frame is placed against the wall and the net then drops down from above, rolling on itself and scraping the birds from the wall into the bottom of the net. This is not so interesting as the ground trap, for daylight use, which is Mr. Buntin's own device.

This trap, as shown to me, is a wooden frame, say 5 ft. square. At the sides are strong springs, which work just like those on the double-end rat trap, and there, two sticks which serve as stretchers or supports for the netting which makes the body of the trap. This net is made of two sections, which meet in the middle when the trap is sprung, making a cover over the imprisoned birds, which is precisely like an A tent of netting, about 18 in. or so in height. When the trap is set, the supporting sticks are laid back, end to end, and stuck into the hollow frame of the ground trap, and the rat trap is opened, and the birds are driven into the burlap flaps are drawn over all. All you can then see is a frame 5 ft. square, its sides say of 4 in. section, the top covered with a strip of gunny sack. Bury this frame if you like, or cover it with straw, and cover the ground within with bait, and you are ready for business. This trap can be made large or small and can be extended indefinitely by adding more net. Mr. Buntin has been covering 14 ft. square traps, and he has been very successful in catching 3,000 sparrows at that one place. He has caught 53 sparrows at one haul in the little 4x5 ft. trap.

"At first sparrows are very shy of the trap," said Mr. Buntin, "unless you bury it or cover it very well, but they soon get used to it and will get to lighting on the frame. I bait with cracked corn, and after a while they will get to feeding there in flocks. After you have got a lot of birds in the trap, just pull the string and you've got 'em. A lot of 'em escape the net."

"You have to be very careful in getting the birds out of the net, and not let any get away. If you let a bird get off, he will sit around there all the time, and give the thing away in sparrow English to the other birds. You won't catch any more sparrows till you kill that bird. I keep a Flobert for those fellows, though very few ever get away. Sometimes they have got to be shot so often that they are better fowls than what they are. The next day they are taken, as in the latter case they are weak from efforts at escape.

In the shooting to-day the handling was done by Mr. Buntin, assisted by 5 boys who put the birds into the traps. The birds were in two-story boxes, 50 in each compartment. Mr. Buntin thrust his hand in through the wire gate (or sometimes through an old hat) and caught the birds, and the boys were instructed to hold the birds by the neck, the body below the thumb, and the head out.

The traps for the shooting were 5 in number, very neat little things, about 4 x 6 in. They are the invention of Dr. Parker of Dayton. Each consists of two sections, closing together, box form, by two spiral springs inside. The pull on the cord draws the springs apart, and the bird starts at once, and the sharp clap of the trap closing together behind it gives it a good scare to make it go ahead. This it does very often successfully. At 25 yds. rise the bird looks about as big as a bumble-bee. Out of No. 1 and No. 5 traps it is only 45 ft. to the 25 yd. boundary (measured from No. 3 trap). You must stand close behind the shooter to see the fun of it, but a single shot is to see the bird. The bird's scales start out of it, the shooter will show him often they do that.

The proper load for sparrows would seem to be No. 12s. Most of the shooters used No. 10s. I liked the shooting of Mr. Sanford, of Townsend, very much, and he told me he used 12s in both barrels. The birds should be graced close to the traps, as their twisting flight will save them, as the fine shot do not always by any means knock them down, and the birds are really spread out in the air after 30 yds. Fine shot do not the velocity of large and need some driving power behind them. Mr. Sanford told me he used 4 lbs. of 10-bar trap wood powder, about 45 lbs. in his 12-gauge guns. This because he could not get the 12-bar grade at hand. Mr. Young, the clever trap shot from Springfield, very successful at targets, had hard luck at the sparrows, and so did "Shorty" Brown, the pride of the Miami Valley. All in all, spar-

row shooting is a grade of sport in itself, and needs study, experiment and practice. Scott McDonald, Dr. Parker, and others of the Dayton men are good at it. I should like to see the sport take hold in Chicago. We have birds enough there, and they can be caught. At the next Illinois State tournament this sport should have a showing, and it is sure to interest the masses. Mr. Buntin should be induced to take charge of the details. As conducted here at Dayton to-day, sparrow shooting is a sport and one which should be fostered.

The usual price paid at Dayton for the sparrows is 3 cents a piece. The State offers a bounty of 30 cents a dozen, I believe. Illinois pays 2 cents a head during December and January. The birds were shot to-day at 10 cents a bird, which makes this shooting a very good thing for a management. At 5 cents a bird if that were possible, this target would be more popular, but the slowness of the shooting would render that price impossible, doubtless, though, it is far more rapid than pigeon shooting.

Following are the scores: No. 1, 10 sparrows, \$2 birds extra: Mumma.....1111111111-10 Dr. Parker.....1111111111-10 Protzman.....1111111111-10 Rike.....1111111111-10 McDonald.....1111111111-10 Young.....1111111111-10 Hannah.....1111111111-10 Troup.....1111111111-10 Parker, Sanford and Shorty div. first, McDonald second alone, Hannah third alone, Rike, Young and Troup div. fourth. No. 2, special, 15 sparrows, \$2.50, birds extra: Hannah.....1111111111-10 Shorty.....1111111111-10 Rike.....1111111111-10 Troup.....1111111111-10 McDonald.....1111111111-10 Baggs.....1111111111-12 Dr. Parker.....1111111111-12 Young.....1111111111-12 Craig.....1111111111-13

Rike, Craig and McDonald div. first, Parker, Baggs and Sanford div. second, Hannah third alone, Mumma and Shorty div. fourth. No. 3, 10 sparrows, \$2, birds extra: McDonald.....1111111111-9 Rike.....1111111111-8 Young.....1111111111-6 Troup.....1111111111-6 Mumma.....1111111111-7 *Nestor.....1111111111-4 L. C. C. div. first, McDonald second alone, Rike and Baggs div. third.

*Not in sweep; paid for birds only. No. 4, 10 sparrows, \$2, birds extra: L. C. Div.....1111111111-7 Baggs.....1111111111-6 Parker.....1111111111-9 Porterfield.....1111111111-6 McDonald.....1111111111-9 Young.....1111111111-6 Kirby.....1111111111-10 Hannah.....1111111111-10 Sanford.....1111111111-9 R. K. Div.....1111111111-9 G. Sanders.....1111111111-8 Shorty.....1111111111-7 Kirby first alone, Parker, McDonald, Sanford and Rike div. second, Johns, Sander and Hanna div. third, L. C., Porterfield, Young and Shorty div. fourth.

No. 5, \$50 guaranteed, 25 sparrows, \$5, birds extra: McDonald.....1111111111-24 Rike.....1111111111-24 L. C. Div.....1111111111-24 Parker.....1111111111-24 Baggs.....1111111111-24 Hannah.....1111111111-24 Sanders.....1111111111-24 Sanford.....1111111111-24 Young.....1111111111-24 Kirby.....1111111111-24 Shorty.....1111111111-24 McDonald, Parker and Sanford div. first, Kirby second alone, Rike third alone, Baggs, Hanna and Young div. fourth.

At the close of the bird event it was nearly sundown. Considerable discussion was held among the shooters that the 15-bird event, \$75 guaranteed purse, was not shot as programmed. This could have been shot as billed, instead of delaying it till so late it was impossible to shoot it; but as other guarantees had been left out or modified by consent, and as several of the shooters had expressed a willingness for that cause out of courtesy for the management, the latter availed itself of the suggestion of the shooters, and the 15-bird event was not shot. It will be noticed that the \$75 purse guaranteed by the Parker gun people was not modified, but shot. This seeming unfair to a non-resident and simply courteous firm. I inquired of the management whether the Parkers would be asked to foot the loss, and was told that the management would make good all or part of such to Parker Bros. This, under the circumstances, would be the only fair thing to do. The shooting was a very successful one, and the loose and indefinite code, having no such firm rules, for instance, as has the turf for guidance. Shooters come to a tournament, attracted by good guarantees advertised. A guarantee is no guarantee, and not, therefore, good faith, unless paid or modified by consent. Such consent should be general and unmistakable, and this alone is the test of the ethics in the case. I have no doubt in my mind that the fair and generous men who have given the consent absolute, or they would themselves have insisted on a strict following of the programme. There seems but small moral in this, except that managements should be extremely careful in offering guarantees. I fancy, for instance, that the Interstate Association has had to foot its guarantees when they did not fill. It is the supposition that this is to be done in any such case and under any management. I think the boys will all be back next year at Dayton, however, and will have a good time again.

I have not figured the individual winnings very closely. Sanford told me he was about \$50 ahead at the close of the second day. He won also to-day. Osborne must have been something like that ahead on his two days, as he and Sanford shot close to each other. Penn, McDonald, Young, Rike and others must have been substantially ahead of the game. Besides the four money prizes, there were 100 small prizes, and the total of these footings \$300. These were apportioned finally as follows: Young and Weed a pair of vases; Courtney, Porterfield and J. W., a pair of trousers, ownership not yet concluded, though Courtney claims them; Protzman, a whisk broom and holder; Parker, a box of cigars and a picture, a hunting scene; Ralston, a Helkes hand protector; Taylor, a silver cup and a silk hat; Courtney protected by a hand protector; Mumma and J. W., each a quart of whisky and a hand protector; Young, a hand protector; Weed, a hunting coat; Buntin, Craig, Mumma, Stone, Rike and Gene, each a hand protector; Pierson, J. W., Stofe and Brown, each a quart of Col. Pepper's freewater; Pierson, a hand protector; Pierson and Osborne, a shell case, ownership not yet settled; Rike and Porterfield, a hat between them; Penn and Brown, a silver cup, and a decision of Courtney, a silver cup and a lot of perfume; Barrs and Wahl, a hand protector; Mumma, a hat; Shorty, a bamboo rod; Baggs, a hunting coat. All these various things were contributed by the generous local merchants, after the ancient and inexplicable custom by which trap-shooters and managements go begging and get something for nothing from those who often have no interest, financial or other, in the sport.

Dayton has a trap-shooting city, and the best, and the promise for the future. The town is also the center of an exceptionally strong game protective society, and the observance of the law is enforced for a large section thereabout. Dayton has further a strong kennel club and a good rifle organization.

E. HUGH.

WORCESTER, Mass., Sept. 12.—The meet this week at Coal Mine Brook range of the Worcester Sportsmen's Club was the last before the opening of the bird season. The principal event was the last of the series of the classification series. Each man had a possible 30 clay pigeons in the classification and 10 in the class. The work of each follows: G. J. Rugg 23, M. D. Gilman 24, J. K. Tolman 24. The money was divided according to the standing of the three men. Following is the classification and class B shoots, the first at 30 birds and the second at 10: Edward Walsh.....20 5 A. B. Clinton.....15 5 E. S. Knowles.....17 7 A. B. F. Kinney.....16 7 G. H. Gabeler.....8 4 Geo. Holden.....21 6 Edward Parker.....14 3 E. F. Swan.....12 6 Joseph Bertels.....10 3 Geo. McClellan.....5 6

BOSTON, Sept. 20.—The weather conditions were perfect for shooting this afternoon, and there was a good attendance of members of the Jamaica Plain Gun Club at its range at Clarendon Hills. Some excellent scores were made by the marksmen. The merchandise match was the first event, the scores resulting as follows: Ten blue-rock: Snow 8, Moore 8, Needham 7, Adams 5, Barrett 8, Wadsworth 5, Wetherbee 9, Swan 4, Webster 1, Heffner 1, Johnson 6, Wetherbee 5, Snow, Barrett and Moore second, Needham third. Seventeen sweepstakes matches were shot immediately at the conclusion of the merchandise match.

PHILADELPHIA, Sept. 12.—The crack Pencoyd Gun Club, of Manayunk, was defeated by the Modoc Gun Club, of Clifton Heights, in an exciting contest on the latter's ground to-day, at 25 Keystone per man, 6-man teams, by a score of 108 to 101.

QUIMBY-HATHAWAY.—Al Heritage had a large number of sportsmen upon his grounds at Marion, N. J., on Saturday afternoon last to witness the match between the above named gentlemen. The attendance was somewhat large, as Al had promised to have plenty of birds for sweepstake shooting. The conditions of the match were 25 birds per man, Quimby standing at the 35 yds. mark and allowing Hathaway 10 yds. the best of the handicap. The birds were a selected lot and the scores are creditable, Quimby's score under such conditions being particularly so.

As soon as the match was over sweepstake shooting began and continued until dusk.

W. P. Quimby.....	2212213020000111212020222—18	
Sweep No. 1, 6 birds, \$5 entrance, 3 moneys:

Muller.....	111011—5	Francis..... 111012—5
Ziglio.....	111122—6	

Hudson and Doeck withdrew pro rata in first money tie; the others shooting off Lindsley, Penrose and Ziglio div. with 9 each. A second match was made between Quimby and Hathaway, 25 yds. rise, use of both barrels. Quimby 25 yds. to use one barrel only, to be shot at Marion, Saturday, Oct. 3.—TEE KAY.

THE ESSEX TRAP LEAGUE.—Newark, N. J., Sept. 19.—The sixth and final shoot of the series of the Trap Shooters' League, of Essex county, which took place on the Riverside avenue grounds of the Woodside Gun Club to-day, was attended by a large contingent of shooters from different sections. The day was an ideal one for the sport, the wind being just cool enough to temper the rays of the sun so that everybody kept comfortable. The sport was announced to begin at 9 A. M., but it was after dinner time when the first gun was fired. Ernest A. Geoffroy was general manager of the shoot. The team race, which called for teams of six men each, each man to shoot at 25 blue-rock targets, was started at 3 P. M., W. R. Robart acting as referee and C. H. Townsend as official scorer. This resulted in another victory for the team of the Maplewood Gun Club, the scores being as follows:

Maplewood G. C.	132	Woodside G. C.	110	Roseville G. C.	94
-----------------	-----	----------------	-----	-----------------	----

This victory gives the Maplewood team five out of the six contests, the South Side team having won one and given the league trophy. The score of to-day was the highest made during the series. The score of 25 straight, made by Sicksles, of the Woodside team, was the first of the kind ever made on the grounds. The Maplewoods are justly proud of their victory, which proves conclusively that they have the strongest team in Essex county. The regular programme of events, nine in all, were shot off in order. The finest work of the day was done by Sicksles, who missed but 8 out of 95 targets.

FIRST TEXAS FIELD TOURNAMENT will take place at San Antonio, Texas, Oct. 9, 10 and 11, managed by Oscar C. Guessaz. American Association rules, excepting in the live bat matches. All target matches will be shot according to the rapid-firing system. Plenty of live pigeons and bats guaranteed.

KNOXVILLE TOURNAMENT SCORES have come to hand too late for insertion this week.

Yachting.

Model Yachts and Boats. Their design, making and sailing, with designs and working drawings. Postpaid, \$2.

CENTERBOARDS AS SHIFTING BALLAST.

IT is a curious and amusing fact that while with almost unlimited experience with the centerboard in America, the board has never been used as ballast, the first successful experiment with centerboards in Great Britain has been made in such a way as to bring up a very complicated question. Heavy metal boards are quite common here in canoes and open skiffs, and not entirely unknown in larger open sailboats, but in decked yachts of any size the weight of the board, though often considerable, has been merely incidental, and hardly estimated as an element of stability. The boards of Volunteer and Mayflower, for instance, of 4 in. oak with steel bolts and shoes and sufficient lead as well to sink them, are by no means light, but still bear a very small ratio to the total ballast. Very heavy boards have been tried at times, as in the old Maria, but not in recent years, and the question of their standing as shifting ballast has never been raised.

This year for the first time have centerboard yachts competed with success in British waters, the 10-rater Dora topping her class, while the honors in the 2½-rater class are divided by her sisters Elin and Oronsay, all being Watson boats. The success of these three craft, pitted against good fields of keel cracks would be enough in any case to excite very strong feeling among the conservative Scotch, and it is no wonder that there is just now a terrible hubbub over them when we learn that Dora, for instance, has a centerboard of yellow metal weighing over a ton, while the other two are generously weighted in proportion. While the limit of the Y. R. A. rule, that the boards shall be handled only by manual labor, has not been exceeded, in one club the prizes have been withheld from the smaller boats on the ground that their centerboards are shifting ballast, which is specially prohibited.

Absurd as this may seem to Americans, some allowance must be made for men who have grown old in the belief that the hated and prohibited "shifting keel" was the invention of the Evil One, and who are now called on to face a ton weight raised and lowered at will in a yacht only 30 ft. long and 10 ft. wide. What the outcome of the present agitation may be we cannot say, but it is a little unfortunate that the centerboard experiment has been tried under conditions which must call out an extra amount of prejudice against the new craft.

The claim that the centerboard is really shifting ballast, though in a measure favored by the fact that a heavy weight, almost equivalent to a lead keel, is lowered at will, is easily disposed of when we look closely into the origin and intention of the most excellent rule which is now almost as generally respected in America as in Great Britain, by which all shifting of ballast is prohibited. Although there is no more flagrant offense which a yachtsman can be guilty of than the violation of this rule, there is at the same time nothing morally wrong about the mere moving of weight up or down, or from one part of the boat to another. The sole reason for the rule lies in the fact that the great sail-carrying power which may be had by piling sandbags on the weather rail, or as was once the fashion in England, of heaping up shot bags on the windward transom, is obtained only at the risk of capsizing, while the form of vessel which is developed by the use of such ballast is a very bad one for every purpose. In order to prevent

CENTERBOARD CUTTER "DORA," 10-RATING. DESIGNED BY G. L. WATSON.

the use of craft which are unsafe from the nature of their stability at all times, and still more dangerous when caught with ballast to leeward, the shifting of all ballast or heavy articles from one side of a yacht to the other is now most strictly prohibited save in a few American clubs in which the sandbagger is still recognized.

The principle on which this rule is founded, however, does not apply in the case of a weight such as the centerboard, which is always kept in the middle line of the vessel and never shifted to the weather side. In the case of American yachts, the stability is not materially increased by the lowering of the board, or at least the yacht is now designed to have a perfectly safe range of stability with the board housed. In the case of the Scotch yachts, while the stability is greatly increased by the lowering of the heavy board, on the other hand it is not diminished to a dangerous degree by raising it. A yacht like Dora, with considerable displacement and a beam of 10 ft. on 30 ft. waterline, with a heavy fixed lead keel, should be perfectly safe from all danger of capsize even with the board housed.

Apart from the question of shifting weights and stability, there is an objection to very heavy boards and yachts of any size which may prove serious, and that is the danger of carrying a heavy movable weight hung from the keel. The strain of such a weight in a seaway must be very severe, far worse than if bolted firmly under the wood keel. This, however, is a structural difficulty that may be overcome, and is no worse than the danger from some fixed keels in the hands of ignorant builders. We judge from our exchanges that one strong ground of complaint against the centerboard boats is that by housing the board they cut off corners, besides being able to take risks in shoal water where the keel craft would certainly ground. In America the courses are in nearly all cases so located as to prevent any great advantage to the centerboard in this way, and if some remedy should prove necessary abroad it must take another form than the prohibition of the centerboard or even the compulsory use of it in one fixed position during the race under the plea that it is shifting ballast in the sense intended in Y. R. A. rule No. 15.

ONE GUN STARTS—MEASUREMENT.—Two proposals have lately been made in the Field for very important changes of the racing rules. One, made editorially, we quote elsewhere, relating to one-gun starts. The plan of starting with an interval of from 3 to 15 m., in which a yacht may cross was once universal in America, the interval gradually being reduced to 5 and recently to 3 m., while in many cases the one-gun start has been tried with success. The objections to the plan of timing at the line are much greater than indicated in the Field, where fleets of any size are concerned. It looks very pretty in print to see thirty or fifty yachts timed to a second in starting, but those who have had experience on regatta committees know how little is accurate and how much mere guess work. Even in experienced hands it is difficult or impossible to take the times of twenty yachts crossing together, many of them covered by larger craft. The other proposition is for the abolition of the length and sail area rule and the substitution of a measurement of "size." The "pound of putty" theory has played a very important part in all measurement discussions in the past, but still survives, in spite of the plain fact that it would produce a saucer-shaped craft with a deep lead fin and enormous rig.

STEAM YACHT RACING.—The promised race between the Vamoos and the Norwood is apparently as far distant as ever. The latest development is the breaking down of the Norwood's engine while on her way to the Harlem River on Saturday last, where she proposed to do some very fast steaming. This incident has proved a fruitful topic of discussion during the week. It is a fact, however, that the arrangements for a real race have actually gone so far that a letter has been written to the secretary of the American Y. C. requesting the club to take charge of a race to which Javelin, Now Then and the torpedo boat Cushing shall be invited.

NOVELTIES IN YACHT NAMES.—The great West has lately contributed two striking names to the yacht list; Mr. Hearst's new steam launch rejoices in the suggestive name of Vamoos, a

Western synonym of the Arabic "Imshi"; while a large and handsome steam yacht lately built on the Lakes bears the name of her owner, a fashion which is peculiar to Western yachtsmen and canoeists.

THE CLYDE CENTERBOARD DORA.

WE are indebted to *Le Yacht* for the accompanying sketch of the first centerboard cutter built on the Clyde, the Dora, designed by G. L. Watson for Allan Bros., former owners of the famous 5-tonner Doris. Dora is a "compromise," with moderately deep hull and a lead keel, in addition to which she carries a centerboard of Delta metal weighing 1½ tons. Her success with the keel boats has been the remarkable feature of the season in British waters.

NEW HAVEN Y. C. FALL REGATTA, SEPT. 17.

THE annual fall regatta of the New Haven Y. C. was sailed on Sept. 17 in a moderate S.W. wind, the course being from Pardee's Bar buoy around buoy in mouth of Housatonic River and return. There was no wind at 10 A. M., and the start was postponed until 11:15. The start was timed:

Phyllis.....	11 15 33	Stranger.....	11 16 40
Ripple.....	11 15 33	Vidette.....	11 17 00
Clara.....	11 15 33	Edna.....	11 17 10
Pioneer.....	11 15 33	Phantom.....	11 17 40
Dare Devil.....	11 16 12	Fleetwing.....	11 18 05
Phyllis.....	11 16 16	Seabelle.....	11 18 47
Carrie W.....	11 15 00	Libbie.....	11 19 09
Eurybia.....	11 16 33	Mariota.....	11 17 30
Egeria.....	11 16 27	Ariel.....	11 16 23

Phyllis broke down and Ripple sprung a leak, both withdrawing early in the race. Phantom fouled the outer mark and Flora turned from the wrong side, both being disqualified. The order at the mark was Phantom, Stranger, Eurybia, Zephyr, Carrie, Flora, Dare Devil, Libbie. On the run home under spinners Eurybia passed Stranger and won in her class. The times were:

	Start.	Finish.	Elapsed.	Corrected.
Phantom.....	11 17 40	Disqualified.		
Carrie W.....	11 16 23	5 02 23	5 46 00	5 46 00
Mariota.....	11 19 30	5 43 09	6 23 36	6 21 18
Flora.....	11 15 36	Disqualified.		
Eurybia.....	11 16 27	5 45 47	5 39 20	5 38 12

CLASS 3.				
Seabelle.....	11 18 47	5 54 14	6 35 27	6 35 27
Stranger.....	11 16 40	4 56 25	5 39 45	5 33 51
Phyllis.....	11 16 16	Withdrew.		
Vidette.....	11 17 00	5 59 16	6 42 16	6 36 22

CLASS 6.				
Dare Devil.....	11 16 12	5 05 55	5 49 43	5 49 43

CLASS 7.				
Ripple.....	11 15 43	Withdrew.		
Egeria.....	11 16 35	Withdrew.		
CLASS 8.				
Libbie.....	11 19 09	5 19 15	6 00 06	6 00 06
Fleetwing.....	11 18 05	5 23 53	6 11 48	6 06 27
Pioneer.....	11 15 58	6 22 16	7 06 18	6 59 17

CLASS 9.				
Zephyr.....	11 16 27	5 02 33	5 46 06	5 46 06
Clara.....	11 15 55	Withdrew.		
Edna.....	11 17 10	6 14 06	6 56 56	6 54 08
Ariel.....	11 16 23	Withdrew.		

A race for naphtha launches was won by Isabel, Plover breaking down while in the lead. The prizes were as follows: Class 2, Eurybia first prize, \$30; Carrie W. second prize, \$10. Class 3, Stranger first prize, \$30; Seabelle second prize, \$10. Class 8, Libbie first prize, \$20; Fleetwing second prize, \$10. Class 9, Zephyr first prize, \$15; Edna second prize, \$10. Class 10, Isabel first prize, \$15. The judges were W. W. Price, R. B. Farren and J. C. Gallagher.

ONE GUN VS. TIME STARTS.—"When the Americans adopted our plan of underway starts, they also took over the timing business in crossing the line; they have found it to work satisfactorily, and so have the French. The plan was abandoned here mainly because of the trouble, and because one or two committees got befogged in attempting to time the starters. There is no need of the latter occurrence in these days, and so far as the trouble is concerned, we are sure no committee would mind that. Another objection to the timing is, that the public and competitors would be worse off than ever in ascertaining which yacht is winning; but so far as the competitors go, they would find a pretty near estimate if no more than three minutes were allowed. There is also the objection to taking time at the start that there would tend to check the keenness and smartness at present exhibited at a start; this in some measure is true, but the deterioration would be small if no more than five minutes were allowed. One great advantage of reviving the plan, and one which, we are sure, sailing committees would much appreciate, is that it would practically do away with the necessity for recalls. The trouble, bother, and vexation caused by the 'recall' are indefinitely greater than that of clocking the yachts over the line; and we feel sure that, if the plan is made permissible, most sailing committees will act upon it, and most yacht owners appreciate it."—Field.

YORKVILLE Y. C. OPEN REGATTA.—The open fall regatta of the Yorkville Y. C. was sailed on Sept. 22, the courses being: A stakeboat anchored off the club house at 102d street and the East River to and around Gangway Buoy and return, for classes A, B, C, F, G and J, and to and around Stepping Stone Lighthouse and return for classes E, H and I. The times were:

CLASS A—CABIN SLOOPS OVER 30FT.

BROOKLYN Y. C., Sept. 19.—The regatta of the Brooklyn Y. C. on Labor Day was very unsatisfactory, but the club rules prohibit more than one regatta in a season. In order to have one good race, Com. Sutton, of the sloop Mull, provided prizes for all classes for a special race, nominally a cruise, on Saturday. The race was started so late, 4:45 P. M., that the finish was made by moonlight. The times were:

CLASS 1—CABIN SLOOPS.				
Start.	Finish.	Elapsed.	Corrected.	
Mary A.	4 48 30	7 11 30	2 23 00	2 23 00
Clara May	4 48 30	Not timed.		
Mull	4 40 42	6 52 45		
CLASS 2—CABIN SLOOPS.				
Iracquois	4 45 55	7 01 00	2 15 05	2 15 05
Vida	4 48 00	Not timed.		
CLASS 4—CABIN CATS.				
Panchea	4 53 40	Not timed.		
Lina	4 50 03	7 10 30	2 20 27	2 20 27
CLASS 5—YAWLS.				
Tropic	4 48 30	7 18 10	2 29 40	2 29 40
Mariguita	4 47 13	7 14 40	2 27 26	
CLASS 6—OPEN CATS.				
Alma	4 52 00	6 32 50	1 37 00	1 37 00
B. C.	4 51 03	6 53 53	1 39 53	1 39 53
Edda D.	4 52 10	6 30 35	1 38 25	1 36 51
Roma	4 55 00	6 38 42	1 43 42	1 43 42
CLASS 7—OPEN CATS.				
Dell	4 54 00	7 00 00	2 06 00	2 06 00
Luna	4 54 00	Not timed.		
CLASS 8—OPEN CATS.				
Empire	4 52 05	7 15 45	2 23 40	2 23 40
Isola	4 51 46	7 10 00	2 18 14	

The flagship Mull won in her class, but declined to take the prize.

BEVERLY Y. C.—The 180th race, sixth sweepstakes, was sailed at Monument Beach Sept. 19, in a good wind, smooth breeze, smooth water and a clear sky by way of variety. Hector was on hand in first class but had no competitors. Race in second and third classes was very close. Courses were No. 1, 104 miles, No. 7, 84 miles, and No. 9, 5 miles, for second, third and fourth classes respectively. Judge, T. S. Edmunds.

SECOND CLASS.				
Length.	Elapsed.	Corrected.		
Surprise, J. M. Codman, B. Y. C.	27.04	2 05 56	1 56 12	
Anonyma, F. L. Dabney, B. Y. C.	27.01	2 06 11	1 56 11	
Defiance, H. R. Perry, Mon. Beach, 26.04		2 08 15	1 57 20	
Mist, G. H. Lyman, Jr., B. Y. C.	26.08	2 08 21	1 57 26	
Widgeon, M. Williams, Jr., B. Y. C.	26.10	2 11 48	2 01 33	
Grampus, W. E. C. Eustis, B. Y. C.	27.09	Withdraw.		
Wildcat, T. N. Norcross, Mon. Beach 26.04		2 13 25	2 02 39	

THIRD CLASS.				
Length.	Elapsed.	Corrected.		
Eina, J. Parkinson, B. Y. C.	22.10	1 53 38	1 41 44	
Tycoon, J. L. Stackpole, Jr., B. Y. C.	23.01	1 53 47	1 42 08	
Puzzle, Wm. Amory, Jr., B. Y. C.	22.09	1 55 45	1 43 46	
Daisy, H. Stockton, B. Y. C.	22.01	Withdraw.		

FOURTH CLASS.				
Length.	Elapsed.	Corrected.		
Cat, B. Clark, B. Y. C.	19.03	1 23 51	1 14 09	
Edith, G. van Rensselaer, B. Y. C.	19.04	1 26 27	1 16 49	
Charmion, J. Crane, Jr., B. Y. C.	19.05	1 32 07	1 22 37	
Kitten, Toby Club, B. Y. C.	19.11	1 32 37	1 23 26	

Winners in second class were: Anonyma first, Surprise second, Defiance third. Third class: Eina first, Tycoon second. Third class: Cat first, Edith second.

AMERICAN MODEL Y. C., SEPT. 19.—The second leg for the Fisher cup was sailed off at Prospect Park Lake on Saturday, four yachts coming to the line in a whole-sail breeze, north at the start, chopping around to northeast just as first mark at end of first leg was rounded. A triangular course was laid off, the first leg being about 1 1/2 miles, the second leg 2 1/2 miles, and the third leg 1 1/2 miles, making in all 5 miles by chart. The first yacht to cross the line was the Harrietta (holder of cup) at 3:27:30, with wind on port quarter, making a very good steady run for first turning stake and sailing very fast. The Marjorie crossed at 3:29:45, Electra at 3:30:15 and Star at 3:30:25, the last yacht gaining on others very rapidly, rounding first mark 1min. 35sec. behind the Harrietta, having gained 1min. 15sec. on the leader. The others rounded close up all in a close race for second mark. Harrietta was in trouble with her main sheet, thereby losing considerable headway and allowing the others to get close up; but she managed to round the third mark ahead at 3:42:30, the Electra at 3:42:45 taking first place, Star falling back to third place, Electra having gained 1min. 45sec. on Harrietta and 1min. 10sec. on Star. Now they had the wind aft, with boom broad off to port, with prospects of a fast run, but the wind petered out somewhat at finish, the Harrietta crossing the line at 3:48:20, Electra 3:48:40, Star 3:49:22, Marjorie 3:50:25, the Harrietta making up 5sec. on this leg, Star gaining 3sec. on Harrietta, Marjorie 1min. 20sec. taking third place. The times were:

Star	Finish.	Elapsed.	Corrected.
Star	3 30 25	3 49 22	18 50
Marjorie	3 30 25	3 50 25	18 50
Electra	3 30 15	3 48 40	18 25
Harrietta	3 27 30	3 45 20	20 50

Electra wins by 32sec. elapsed time and 25sec. corrected from Star, and by 2min. 25sec. elapsed and corrected from Harrietta, former holder of the cup. The next leg for the cup will be sailed on Oct. 3.

CATBOATS ON THE BAY.—On Sept. 20 a race between 16ft. skiffs and skipjacks was sailed on New York Bay, the course being from the Battery, around a mark off Liberty Island, a second mark off Governor's Island and home. The prize was a silk pennant, presented by Policeman Dick Ganley. The times were:

Start.	Finish.	Elapsed.	Corrected.
Dimple	3 13 00	4 41 10	1 27 10
By-Ev	3 13 00	4 41 10	1 27 10
Good Enough	3 14 00	4 43 30	1 29 30
Tiny	3 14 00	Withdraw.	
Jessie L.	3 12 30	4 45 00	1 32 30
Puritan	3 14 00	Withdraw.	
Bum	3 02 00	Withdraw.	
Maggie	3 12 30	Withdraw.	
Dot	3 00 00	Withdraw.	

PAVONIA Y. C.—On Sept. 20 two races were sailed by the Pavonia Y. C. on New York Bay, the times being:

MATCH RACE—CATS.				
Start.	Finish.	Elapsed.	Corrected.	
Millie	12 57 15	5 32 53	4 36 38	4 35 35
Christine	12 57 45	5 37 16	4 39 51	4 39 31
JIB AHEAD—INSAIL YACHTS.				
H. H. Holmes	1 20 15	4 50 20	5 56 53	5 36 53
Lesler	1 25 45	4 49 47	5 35 48	5 30 13

WINTHROP Y. C.—The postponed races of Aug. 21 of classes 3 and 4 were sailed on Monday evening in a strong N.W. wind, the times being:

THIRD CLASS.			Length.	Elapsed.
Maggie, H. W. Hyde			19.00	42 40
Marion, Chesterton & Devereux			20.00	42 40
Mattie G., W. A. Garrett			18.05	36 15
FOURTH CLASS.			Length.	Elapsed.
Mofoe, D. W. Belcher			15.03	43 27
Scud, S. Merton			20.00	49 16
Cadet, C. L. Smith			16.00	47 00
Gracie, Chas. Belcher			17.00	48 00

STEAM YACHT RACING.—The following notice has been sent out this week: American Y. C., Milton Point, Rye, N. Y., Sept. 22, 1891.—The American Y. C. offer a special prize valued at \$500, to the steamer which shall start, Javelin, Now Then, Norwood and Vanamoore, for competition over the club straightaway course of 80 knots, starting from a stakeboat anchored 4 1/2 knots E. 1/2 N. from Race Rock, and finish off the club house. Course W. 3/4 S. to the buoy off the Scotch Caps. The race to take place on Saturday, Oct. 3, or at a later date, as may be agreed. Two or more to start in the race. The boats to comply with the sailing regulations of the club in that "the amount of steam carried shall not be in excess of that allowed by the inspectors' certificate." The prize will be presented to the steamer which makes the shortest time over the course without reference to allowance of time. Entries to be addressed to No. 115 Broadway, New York city. **GEORGE W. HALL,** Chairman Regatta Committee.

A HANDSOME YACHT TENDER.—Messrs. C. L. Seabury & Co., of New York, launched on Sept. 17 a very fine mahogany launch for W. K. Vanderbilt's steam yacht Alva, to take the place of the English launch used for several years. The launch is 30ft. over all, 6ft. 6in. beam, and 2ft. 2in. draft. The frame is of white oak, with mahogany planking throughout, with all fastenings of copper. The engine is compound, of 12 H.P., with a safety water tube boiler, both being designed by the builders. The boiler is tested to 250 lbs. per sq. inch, copper, castings, jackets, and fittings of copper or brass. There are two cockpits, covered by folding hoods, the interior work being of mahogany and quartered oak. The weight of the launch is 2,500 lbs., or 1,500 lbs. less than the English one.

ENGINEERS' LICENSES.—The Steamboat Inspection laws make a difference between licensed engineers of coastwise vessels and engineers of ocean steamers. An ocean steamer, specifically, is a vessel which navigates the high seas, and the high sea is three marine leagues from shore, say nine miles. As coastwise vessels are often on the high seas in the course of a voyage, it follows that an engineer of a coastwise vessel is not a lawful officer of the vessel when she is outside the three marine leagues, and cannot be held accountable for disasters, for he did not go outside the legal limit of his own will. It is well to remember this point.—*The Engineer.*

COMING RACES.—The Larchmont Y. C. is making an effort for a final race on Saturday, in which Cinderella and Clara will meet, while the schooners Viator, Rebecca and Princess are expected. The annual clam bake will be held on Oct. 3, and the club will go out of commission on the Monday following. The Douglas Y. C., of Long Island, L. I., has arranged a sweepstakes race of \$25 a boat for open yachts belonging to the club, to be sailed on Sept. 26, over the club course on Little Neck Bay. Silk pennants have also been offered to cabin yachts to be raced for on the same day.

ROCHESTER Y. C.—On Sept. 17 a race of the Rochester Y. C. was sailed off Ontario Beach, the times being:

Velnetta	2 35 40	Amelia	2 42 17
30FT. CLASS.			
Romola	2 52 49	Undine	3 05 30

Amelia protests Velnetta, no decision having yet been made.

THE SAILOR'S HANDBOOK AND INLAND MARINE GUIDE.—We have received from the publishers, Smith, Swanwick, of Cleveland, Ohio, the fourth annual copy of Beeson's "Sailor's Handbook and Inland Marine Guide," containing a great deal of information about the great lakes. Complete lists of all steam and sailing vessels are given, with tables of distances, lists of harbors and of charts, custom houses and officials. "The book is indispensable to all yachtsmen on the lakes."

A CRUISE OF A LAND YACHT.—There is very little water in the "Cruise of a Land Yacht," lately published by the Authors Mutual Pub. Co., of Boston; but the author, Sylvester Baxter, has written a charming story for boys. The "land yacht" is nothing less than a private car, in which the hero and his friends cruise about the United States and Mexico. The book is handsomely made, with many clever illustrations by L. J. Bridgeman.

CONSTELLATION.—Capt. Nat. Watson, of Huron, Pappoose, Enone and Sayonara, will be in command of Constellation next year, with Capt. Richardson, an experienced navigator, as mate. Capt. Watson has gone to Newport for the yacht, and after calling at Hempstead Bay for some of her gear, he will take her to Beverly Bridges to lay up. Later in the season she may fit out for a cruise to the West Indies.

LAYING UP.—Beatrice is now laid up at Salem; Alborak, Sayonara and Hiderin at Lawley's; Nautilus and Mineola at Bay Ridge. Oweene is still in commission. Jessica is in commission at New London, but is for sale. Volunteer is laid up at Lawley's, and Capt. Hall has gone home to nurse his sore leg, the result of an injury while the yacht was fitting out, which has lately become painful.

MIMETTE.—This cat yawl, advertised in another page, was designed for cruising, and with all her accommodation she is not too large for a singlehander. She is of modern design and build and very carefully constructed.

PHILADELPHIA Y. C.—One of the handsomest club books of the year is that of the Philadelphia Y. C., an organization now numbering 100 members, with a fleet of 56 yachts.

SOUTH BOSTON Y. C.—On Saturday the review and final sail of the South Boston Y. C. took place on Boston Bay, a very large number of yachts taking part.

ROMOLA, steam yacht, late Catarina, has returned from Europe and is now laid up at Tebo's.

Canoeing.

Secretaries of canoe clubs are requested to send to **FOREST AND STREAM** their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to **FOREST AND STREAM** their addresses, with lists of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

ALUMINUM FOR CANOES.—A correspondent suggests the use of aluminum in place of wood for the hull of a canoe, but so far as we can learn there is a serious obstacle in the liability of the metal to corrosion, especially in sea air. A rudder of aluminum bronze, a casting nearly 1/2 in. thick in places, has been used during the season on a canoe in New York, the boat only being immersed at intervals and lying afloat but a few hours at a time. In the course of a few months the metal has honeycombed, and after each immersion the surface is covered with a fine white powder which rubs off easily. The texture of the metal is destroyed and its strength is gone. From this test it would seem that the durability of thin sheets would be very limited, and that a canoe would not last out a season.

THE LAST RACE.—The open race of the Marine and Field Club, which is announced elsewhere, promises to be the most important event of the year in canoeing, as it will bring out nearly all the best men and canoes at the time when both are in their best racing form. The Marine and Field Club has done a very wise and at the same time a very sportsmanlike thing in offering the prizes for such a race.

BALLAST IN CANOES.—One of the strongest opponents of the use of ballast in racing canoes is Com. William Willard Howard, of the New York O. C., who last year sailed the Toltec, a large canoe, without an ounce of ballast. Within the past three weeks, however, Com. Howard has owned up to the soft impeachment of carrying ballast in his new Aztec, but only "a little for trimming purposes." At the same time two 25lb. bags of shot are missing from their accustomed place in the club house. Another member of the club has just ordered a new 4ft. slide to replace a 3ft. one, the largest he has ever used thus far.

BIG PINE CREEK AND ITS RAPIDS.

THE canoe club had been taking a little run on the river by moonlight, and as they returned to the boat house the men began talking of their usual summer cruise.

Some had made the entire run of the upper Susquehanna and wished to try some other stream, and Will suggested the West Branch of the Susquehanna. As it would take considerable time to get to the headwaters of this stream, some thought it possible to reach it by another route and found by the map that Big Pine Creek, Tioga, would be easily reached from their home and give a nice cruise.

From all inquiry they found Big Pine Creek to be a narrow mountain stream, very rapid and somewhat dangerous. This struck their fancy, and, wishing some excitement, it was decided to take this course.

But out of the whole number who signified their intentions of going only five found their way on the morning of July 26 to take the Lehigh Valley R.R. for Addison, N. Y., where a change of cars was to be made. These three were Tom, Jim and Will, companions together on many a previous trip.

The party reached Addison at 8 A. M., and after a stroll and breakfast at the leading hotel took the Addison & Pennsylvania Railroad to Gaines and enjoyed a ride over this narrow-gauge line. The two dogs were of the Gaines in time for dinner, which was eaten at the Vermilye House.

After dinner a team was engaged to take canoes, grips and box of provisions to the stream, but a short distance away. While they are unpacking it may be well to briefly describe the fleet.

Tom's canoe was of his own manufacture, and a credit to him, being a very pretty model, 14ft. long, 25in. wide, weighing 40lbs. Jim's was nearly the same size, but Will's was smaller, being only 22ft. wide and 14ft. long. The canoes were decked with rubber apron over all and supplied with double blade paddles. When the provisions had been divided and packed in the canoes they found them loaded somewhat deeper than desirable, but after starting they glided along very steadily.

The stream was quite muddy, so they could not see the bottom or pick out the course, but trusted to the looks of the water. The current was in fact a high, steep and the canoes glided along without any effort on the part of the canoeists, while the trees which hung over the water's edge and the high rocky mountains rising almost perpendicular above to a height of several hundred feet, made a cool retreat from the sun.

All they could do was to watch the narrow stream ahead, picking out the course here and there, now running around a huge rock, and in face of a high, steep and the canoes glided along without any effort on the part of the canoeists, while the trees which hung over the water's edge and the high rocky mountains rising almost perpendicular above to a height of several hundred feet, made a cool retreat from the sun.

But a few miles below they came to quite a swift dangerous place, the stream was quite narrow and ran with considerable force, and a clear sky by way of variety. Hector was on hand in first class but had no competitors. Race in second and third classes was very close. Courses were No. 1, 104 miles, No. 7, 84 miles, and No. 9, 5 miles, for second, third and fourth classes respectively. Judge, T. S. Edmunds.

This was only the beginning of the sport, and all were feeling very gay, singing snatches of songs or exclaiming as to the grandeur of the scenery, which lay beyond the power of description. But for the most part Pine Creek is a narrow, rapid stream with a constant wild current, but few pieces of dead water or even an eddy where one might stop for rest. On the west the creek flows almost under the high, thickly-grown mountain side, in some places very craggy and steep, now and then cut by a deep, narrow gorge which looked dark and gloomy, fallen timber, high crags, and a few small, dark spots filled these places at the bottom, showing how the headwaters of the stream were close to the east side differed but little, the mountain being further away from the stream, only at times approaching close to the water's edge.

A few miles down they passed a large tannery, and had slower running where the channel was somewhat wider; then the creek narrowed and began a wild rush. A short distance below there was a very slight high, steep and the canoes glided along without any effort on the part of the canoeists, while the trees which hung over the water's edge and the high rocky mountains rising almost perpendicular above to a height of several hundred feet, made a cool retreat from the sun.

This kind of running continued, the stream now and then changing its course and running under the base of the mountain until one began to think it would go into a tunnel, but soon it would come to a sudden bend, and as the canoe glided swiftly around it, the water was running down the back of the mountain, and would spin along through a narrow, rocky, crooked course; then another curve, and they passed along the edge of a hay field, where the industrious farmer is "making hay while the sun shines." At a blast from the horn the farmer drops his scythe and runs to the fence. "Say, look a-her!" he yells, "how far you fellers goin'?" "Hain't them pretty small boats to ride in?" Jim answers, "Oh, hain't them pretty small boats to ride in?" By the time some of the farm hands had arrived, and began discussing the merits and demerits of the fleet as it passed out of sight around another bend.

After some 8 miles of the most charming canoeing, Ansonia was reached with the Pine Creek R.R., which follows this stream to its mouth.

As the water is somewhat steadier here, the party floated along easily, fixing the aprons more tightly and making ready for another hard run. In a short while they are in the swirl and swash of the rapids. First there is a rush, then a splash and dash of water over the deck and apron and almost into the face, a jump, thump, bump, and the canoe just grazes a huge rock, over which the water is boiling in a mad fashion. It does not seem possible to avoid all the rocks, and there is many a narrow escape, sometimes holding the breath as one sees the bow almost on a boulder, then follows a furious use of the paddles—backward; and then, working the canoe one side, we breathe easier as she shoots by. Will was the last one to go through, and as Tom went into the rapid ahead it seemed as though he had sunk, as only his head and shoulders appeared above the water, but as Will followed on he came to the beginning of the fall, and to look down through that rush of wild boiling, spl

THE Patent Jointed Sinkers

Are made in two sizes, and by remov-
ing the center sections are quickly
changed from a $\frac{3}{4}$ to 1 $\frac{1}{2}$ or 2oz. with
a No. 2, and from a 3 to 5 $\frac{1}{2}$ or 8oz. with
a No. 8. All changes are made
without disturbing balance of rig.
Extra center sections furnished to
increase the weight as may be desired.
Ask your dealer for them, or send 10
cents for a No. 2, and 20 cents for a
No. 8.

TOMLINSON & CO.,

Book of the Game Laws

LAWS OF THE UNITED STATES AND CANADA
RELATING TO GAME AND GAME FISH.

If you live in Boston, or New York,
or Philadelphia, or Baltimore, or Chi-
cago, or St. Paul, or Duluth, or any
one of a hundred cities where there
are gun and fishing tackle stores,
you need not send to us for the
BOOK OF THE GAME LAWS; your
dealer has the latest (April) issue.
Price 50 cents. Buy of your dealer.

CHARLES DALY HAMMERLESS SHOTGUN

WITH OR WITHOUT AUTOMATIC SHELL EJECTORS. Important Notice!

Instead of giving the dealer larger discounts we have decided to give the sportsmen the benefit of a reduction, and have concluded to make extraordinary low **Net Prices** on the **Charles Daly Guns**.

While making this reduction we might mention that the high standard of workmanship for which the Daly gun has always been renowned shall be retained. We have expert testimony that these guns are equal in workmanship to the celebrated Purdey guns, and far superior to all other SO-CALLED London makes, such as Greener, Scott and Westley Richards. An examination will soon convince the unprejudiced customer. They are more conscientiously made, more beautifully finished, handsomer in appearance, with shooting qualities unsurpassed, in fact far ahead of guns costing \$100 more.

Should you live in or near New York, we would invite you to call and examine our stock and be convinced. If you live anywhere else in the United States and your dealer has none in stock, insist upon his ordering one, or order one direct from us. **Send for Catalogue.**

NEW PRICES:

SHARKS IN NORTHERN WATERS.

AN unusual number of large sharks has been reported during September in Long Island and Fisher's Island sounds. To these the name of man-eater is generally applied. As a matter of fact, however, the true man-eating shark (*Carcharodon carcharias*) is rarely seen on our coast. This species grows to a length of 25ft. and to the weight of one ton, being surpassed in size only by the basking shark. It is a relative of the enormous shark whose teeth occur fossil in the phosphate beds of South Carolina. Any shark measuring 9 or 10ft. in length is liable to be called a man-eater, and not without warrant, for all of them will attack man with slight provocation or when suffering from hunger. A few days ago Mr. Willard Nye, of New Bedford, Mass., was attempting to feed a small dusky shark at Woods Holl with the meat of a clam. He had a theory that the animal would turn before taking the food and would be slow in its movements; but to his surprise the shark snapped sidewise "as quick as lightning," took the clam and three fingers of the hand that fed it. Other sharks in the pool, attracted by the sight of blood, dashed up to the edge and would have made serious work if a victim had been within reach. The notion that sharks always roll over when taking food is deeply rooted in the popular mind, but the foundation for this theory is not evident. But we have seen them taking menhaden in the side of the mouth while in the upright swimming position, shaking the head like a dog until the sharp teeth cut off a portion of suitable size and afterward picking up the remainder of the fish, provided some other shark had not captured it. As Mr. Nye says, the shark is totally depraved and swift in his depredations; it is, therefore, a dangerous associate in close quarters, and bathers who fear it are wise. Its indifference to pain is notorious; at Woods

Holl, Mass., some years ago a great many examples were cut open to ascertain the nature of their food and internal parasites, and in some cases the contents of the abdomen were removed entirely. It was supposed that such rough surgery would kill them; but some of the eviscerated specimens were seen swallowing food after the operation as readily as if nothing had happened.

THE REVOLVER CHAMPIONSHIP.

THE time has come for the fixing of shooting dates in the Amateur Championship for revolver shooting. In fixing the conditions, FOREST AND STREAM, with an eye to the greater convenience of the greatest number, discarded the ordinary match method of getting all the contestants together for one grand simultaneous shoot, with all its inconveniences and virtual handicap to many of the competitors. Instead, it was decided to have the competition fixed to suit, as far as possible, the convenience of the shooters. This was the more readily decided upon since the distance—20 yards—permitted the use of galleries, where the conditions are practically uniform, and where various dates of shooting would not involve the chances of differing weather conditions.

From the number of trial-practice targets called for and sent out since the conditions were announced some months ago, it is certain that much preparation has been going forward in anticipation of possible participation in the match. If those wishing to make record scores now will write to FOREST AND STREAM, places and dates will be arranged for the shoots. These, of course, will be public trials, and due notice will be given in our columns of all steps taken. The conditions, it will be remembered, are framed on the most liberal scale, with the intention of permitting the best arms to come to the front in the setting of a very high standard of revolver work.

PUT OUT THE FIRES.

THE distressing reports of forest and prairie fires in the West, with consequent loss of human life and destruction of property, have in them a warning for shooters and campers. Particularly should the caution be heeded in areas affected by drouth, where the burning of a discharged gun wad or the spread of an abandoned camp-fire may cause a conflagration. It is a curious trait of humanity that individuals who are sensible enough in the customary walks of life manifest excessive stupidity and a thoughtlessness little less than criminal the moment they step aside from the rut. A grown up man will fool with a camp-fire in a dry time with all the innocent glee of a baby playing with a can of nitro-glycerine, and quite as unconscious of any possibilities of harm. The careless woods visitor who starts a forest fire usually pleads thoughtlessness and ignorance; but this is at best a poor plea and less worthy now than formerly. In these days of forestry commissioners and sportsmen's literature, no reasonable man can pretend that his ignorance should relieve him of the consequences of his folly. For one thing, if a person would share the enjoyments and reap the benefits of a forest outing, he ought first of all to acquaint himself with the rudiments of woodcraft; if he will kindle fires in the woods, he first must inform himself about woods fires, and how to care for them. As for them who will not so equip themselves and with information so forearm themselves, let them be debarred from the woods, and confined to the town where fire departments are maintained.

LOST.

STORIES are told of guides who have dropped sticks into streams to find which way they were flowing, and when the sticks went in a different direction from what they thought was right, disregarding their plain testimony, and avowing that the stream was running up hill.

Other stories are told of hunters who have been found frozen to death in the depths of tangled swamps with compasses picked to pieces because they would not point the way the bewildered man thought they should, and so were plainly out of kilter.

These stories, though individually unreliable, bear witness to a general truth. The fact is that it is the easiest thing in the world under certain circumstances to become "turned around" in the woods, and no one is exempt from this failing.

Old hands know and understand this fact. It is only

the tyros who do not, and who ridicule those who own up to having been lost. And when these scoffers go into the woods themselves, nine times out of ten there comes a night when they do not turn up at camp. Then there is rejoicing among those who have borne their arrogance, for it is the turn of these to crow, and they who laugh last laugh best.

In a flat wooded country with the sun obscured and no compass to guide him the best woodsman is apt to lose his way. Under less unfavorable conditions the same thing often happens from preoccupation. Interest in hunting or fishing drives away all thought of one's course till suddenly he is rudely roused to find that he is in an unfamiliar wilderness with no notion of the way out.

SNAP SHOTS.

A MICHIGAN law of this year embodies a principle unquestionably sound, but quite generally disregarded, respecting the stocking of private waters at public expense. The statute provides that when any navigable or meandered waters shall have been stocked with fish by the State or by the United States, the fishing in such waters shall be free to the public and limited only by general legal restrictions as to times and methods. The people shall have access to the waters for fishing, and no proprietor of adjoining lands shall recover for trespass more than any actual damage sustained. We believe that Michigan is the first to adopt such a law. It is the common practice in most States having fish commissions to supply fry to individuals and clubs for private waters. While these recipients of State bounty are to be felicitated upon their good fortune, it is difficult to understand why their fellow men should be taxed to supply them with infant trout, any more than with infant pigs or chickens.

Mr. Henry J. Thayer's appeal to the sportsmen of Massachusetts to spare the introduced grouse will meet with a cordial response. While the result of the undertaking to stock New England covers with Western grouse must for several years remain doubtful it should not be said that the Association failed, because the birds were killed off before they had fairly been given a chance. It is hoped that any observations of the grouse by gunners this autumn will be reported to Mr. Thayer, whose office is in the Stock Exchange Building in Boston.

We print a 32-page paper to-day, to make room for a large budget of newsy material.

A VENERABLE AFRICAN.

NOT long ago we showed that the story of the man who was pulled up out of a hollow tree by a bear was very ancient, and had been told and retold as original in widely separated parts of the world. There are numerous other pleasant little tales equally widespread, equally credible as of local happening, and not a whit less ancient. The other day a reader sent in for our "Camp-Fire Flickerings" (where, it must be confessed, some venerable jokes have been printed), a deer-hunting story, which he vouched for as never having been in print. It was recognized as an oft-told tale. The FOREST AND STREAM printed it more than ten years ago. It was given in the *Spirit of the Times* away back in the 30's; and no doubt one familiar with earlier shooting literature of Great Britain could trace it further still. Here is the story:

"That reminds me." I once heard a good story that I do not think has ever been in print. We were camped one night on the St. Francis River in the Sunk Lands where we were hunting. In the party was an old hunter, a typical Southern gentleman of the old school, who told among others the following story: In the old days, before the war, I was living on my plantation in Louisiana, and all my neighbors, prosperous planters, were ardent sportsmen like myself. In those days every Southern gentleman had a body servant who was always with his master and acted as his general factotum, and usually between the two there was a sincere and kindly regard. A neighbor of mine, who was devoted to field sports, had a servant of whom he was very proud and who also had a natural love for the chase. So, when any hunting was to be done, master and man were always found together. One night a party of us were on a steamboat on our way to New Orleans, and among the party, who were all neighboring planters, was my friend George and his inseparable body servant Joe. We were sitting in the cabin one night and had told many stories of the chase, and George had distinguished himself particularly for the many seemingly improbable stories that he told, but when we seemed incredulous and inclined to question he would call Joe in, who would verify the story and explain how such a wonderful shot was made. "One evening," said George, "I was hunting in a

swamp near my plantation. It was getting late in the evening and Joe had tied the horses and was following me up. I came to an open space in the trees and paused, and while standing there a fine 5-point buck came out into the open and stopped. I raised my rifle and fired and the buck jumped into the air and fell dead. I then went up to bleed him and to my surprise I found him shot through the head and through the hoof of his hindfoot. This, gentlemen, is the most wonderful shot I ever made." Some remarks were made which were calculated to cast suspicions on the truthfulness of the story and Joe was called in to dispel any lingering doubts, as he had seen the shot made. "Yes, sah," said Joe, scratching his woolly head, after he had been told the story, "I was with Massa Gawge when he shoot dat buck, and he act pow'ful queer, dat deer did. I was standin' right behind Mars Gawge when he shoot and I was watchin' dat deer, and jes as Mars Gawge threw up his gun to shoot dat old buck looked round awful curis like and den, jes as Mars Gawge pulled de trigger de old buck reached forward with his hindleg and scratched his nose with his foot, and de bullet hit 'im in de foot and den went into his head jest at de year and killed 'im." And Joe rolled up the whites of his eyes and showed his ivory in a smile that was contagious. Later that night Joe and his master were together at the bar of the boat just before retiring, and Joe was heard to remark: "Dat was pow'ful close, Mars Gawge, when I had to explain dat shot, but all at once I 'membered seein' a deer feedin' down by de youn, and all of a sudden he reached for'd with his hindfoot and scratched his year, and den I seed how it was done. But it was pow'ful close, Mars Gawge."

Another version is contained in the entertaining little volume of "Negro Myths from the Georgia Coast," by Mr. C. C. Jones, Jr. There it is given in the vernacular of the Sea Island negroes, among whom it appears to have had a place with the Buh Rabbit stories:

Er Buckra man bin berry lub fuh hunt deer. Eh nussen fuh brag too. Eh hab er Serbant wuh always gone wid um der wood fuh drible de deer. Him bin berry fond er eh Mossa, an eh ready any time fuh schway ter de tale wuh him tell bout how much deer nem kill and way dem shot um. One time dis Buckra man bin tell eh fren say him shoot er deer long er rifle, an wen eh gone fuh zamine um, eh fine say de ball shoot off en line foote an hit um een eh yes. Him fren couldn't see how dat happen, an dem yent bin want fuh bleeve de tale. Den de hunter man call pon topper him Serbant fuh proobe wuh him bin say. De Serbant speak de wud same luk him Mossa bin talk um. Den de gentlemen ax um how de same ball could er hit de deer een eh hine foot an een eh yez same time. De Nigger cratch eh head an den eh mek answer: "Gentlemen, me spec wen Mossa fire pon topper um, de deer mus be bin er bresh fly offer eh yez wid eh hine foot." Dat sorter saterfy de gentlemen, and sabe de Buckra man wud.

After the gentlemen done gone, de Serbant call eh Mossa one side an eh say: "Mossa, me willin fuh back anything you say bout hunt an kill deer, but lemme bague you nex time you tell bout how you shoot um, you pit the hole closer. Dis time you mek um so fur apart me hab big trouble fur git um togerruh."

The Sportsman Tourist.

TALES OF THE OLD WOODS.

THIRTY years ago the South Shore of Lake Superior was a great wilderness, save a few scattered towns along the shores. Back in the woods there was an almost impenetrable forest for a hundred miles or more. There the explorer found much to interest him besides the valuable minerals which he was in search of. The game was in the greatest abundance, both small and great, and the remembrance of it lingers pleasantly in my mind to this day. The student of natural history too had much to learn of the habits of animals now quite extinct in that region. It was there that one could study the habits of the black bear, the various fur-bearing animals, and fish in great variety. Bear, beaver, otter, lynx, and even the rare black wolf, were to be found without the seeking, they ran across one's path continually. I have met the bear face to face within 10ft. and neither of us flinched. Once I left the trail to gather a few luscious blackberries that hung temptingly over a big fallen pine. A rustling on the other side drew my attention and looking up there was a bear so busily engaged in the same pursuit that he seemed in no way disturbed at my appearance. He went on picking berries, gathering the vines in his arms and eating industriously, while I was picking my way backward and left him to his enjoyment, being unarmed.

I had several camps in the woods which were used occasionally, and it was impossible to keep these animals out of them. They burglarized them constantly, and made shreds of the blankets. Going to one of these camps one day, with one of my men, a half-breed Frenchman, we heard a terrible scrambling, and when near the camp saw a most comical sight. A big bear had been licking out an old butter keg, and had got his head fast in it. There he stood on his haunches, pawing for all he was worth to get the keg off his head. How he danced and rolled in his efforts was a sight never to be forgotten. We had no weapons with us or I could have got the finest skin I ever saw. It shone like silk, and waved as he danced about, like the long fur on the shakos of one of the old English lifeguardsmen. My Frenchman was in ecstasies. "Voilà! voilà!" he cried out. See him danser. See him pirouetter. Sacre N. de D., and rolling on the ground he laughed until he was black in the face. I was equally incapable of doing anything, if anything could be done. This went on for several minutes, while both of us made the woods ring, and so scared the bear that he bolted against a big tree and burst the keg and went off without saying good-bye, with the hoops about his neck. That camp was never disturbed after that.

The mosquitoes and black flies were past belief for quantity. I have struck my pick in the moss on the rocks and raised such a cloud of them that it was impossible to breathe, and a sudden retreat had to be made. Once one of my men was so tortured by them that he became insane and ran off like a deer, and although I had him searched for for several days we never found him. Men were frequently lost in those woods. One day I came upon a melancholy sight. The branch of a small birch was bent nearly to the ground over a ghastly heap of old clothes and bones. The small end of the limb was looped, and twisted in it was a bunch of sandy hair. This

was all that was left of some poor fellow who had been lost, and lost his reason in his fear and despair. Afterward we were told that a man had gone hunting from a camp and had never returned. We gave the bones to mother earth, and carried away shreds of his clothing and his sandy beard; but no one could identify them. A sad tragedy, of which those woods might relate several.

Beaver were so abundant at that time that one of my men took over \$800 worth of fur in one winter. It was a grand opportunity for studying these curious creatures. And this reminds me of a matter recently mentioned in the FOREST AND STREAM. It is in regard to the sinking of the wood laid up by the beavers for their winter rations. These sticks are kept at the bottom of the water in the same way that the boy's toy called a sucker sticks to a stone. The sticks are partly sunk in the mud and cannot rise because the water presses on them and cannot get under them to float them. There are many little scientific toys used in popular science based on this principle, only it is the air and not the water that is the material used. I had a water mill there and took the water from a well inhabited beaver pond. The water kept stopping in spite of all our tapping of the dam, which had been made by beavers. It was the beavers which I had seen bringing sticks to fill the opening we made in the dam. It was a choice between the beavers and the mill which should have the water, and to my great regret the beavers had to give up possession. I shot the last one bringing sticks to close the dam and saw him beat them down and stir up the mud and dead leaves with his tail to fill the crevices between the sticks. Then we had the water in peace. These animals are as playful as children. I have watched them for an hour at their slide on a steep bank, which was worn quite smooth by use. They would crawl up the bank, or rather wabble in an ungainly way, and run around to the slide and coast down into the water, where they would chase each other about as so many boys might do. The hindquarters of the beaver are delicious meat. The canvasback duck is not more toothsome, and the tail is a mass of rich jelly-like fat. For years it was one of the delicacies of our camp life. A bear's ham often varied it when we were tired of it. It was here that Mr. Morgan gathered materials for his book on beavers, the only one extant, I believe, and I had the pleasure of taking him to many of their dams in this neighborhood. One dam I showed him was nearly a quarter of a mile long.

Then the deer were so numerous that one day in the early winter I saw more than 300 brought into the village, that had sprung up by that time around the iron mines, and I bought a fine buck that weighed over 300lbs for \$1. The fat was three fingers thick on his loins. The skin made a fine sleigh robe. The Indians had caught these deer in their long <-shaped fences as they migrated southward at this season.

The trout, now alas all gone, were of the finest. At a river then called the Yellow Dog, I have taken them up to 5lbs. The first experience with this river was a wet one. I stood on the end of a log projecting over the water to avoid the brush, and cast my hook baited with a grasshopper. Before I had recovered myself I was jerked off the log and found myself up to my neck in the water, with all I could do to keep myself from going in deeper. I thought I had a lake trout about a 100lbs, weight on my hook. But it was only a 5lb. speckled trout. Four of us took as many as we could pack home (it was 60 miles away) in one day's fishing. We carried salt with us to cure the fish, and smoked them, after a light salting, over a smudge of birch bark. Thus prepared, these large trout are delicious. But they will not keep over a few days, or the over salting spoils them. One hour in the salt is enough. And so is my story for this time. H. S.

THE PELICANS ON WHISKYCHITTO.

"THE PELICANS" are unique. They (or it) are (or is) a club—but a club without organization, without constitution or by-laws, without officers or members, without even a name. Sometimes they are called "Pelicans," on account of their fondness for fish, and their capacity for catching and eating the same; sometimes the "P. D. Q.'s," because, when they make up their minds to go a-fishing they are off with a celerity that astonishes more slowly-moving persons; sometimes "The Truthful Jimmies," on account of the strict veracity which marks the narration of their exploits, and sometimes by other names, complimentary or otherwise, none of which they acknowledge. But as, for the purpose of these chronicles, they must have a name, that of "Pelicans" will do as well as any.

It was a typical mid-summer Louisiana day when the Righter, hot and perspiring from his eight-mile drive from his plantation on Bayou d'Anglais, dropped into the club's headquarters, in Lake Charles, to seek a glass of ice water, a fan, an easy chair and a whiff of the cool Gulf breeze. There he found The-Old-Man-Who-Bakes-Fish and the Maiden, clad in the scantiest vestments that decency would allow, wiping the sweat from their brazen foreheads and, as they smoked their pipes, discussing ways and means for a trip to Whiskeychitto after bass, or, as we misguided Southerners call them, trout. To them the Righter listened in silent contempt for a while, and then, in choice and forcible Anglo-Saxon, gave his opinion of any set of blanked fools who would ride forty miles in a lumber wagon, under a broiling August sun, to a place they none of them knew anything about, in a helpless attempt to catch fish in a season of the year and a stage of water when nothing but gars and mud-cats would bite. And if they expected him to make such a variegated and consummate ass of himself as to join such an expedition of cranks and lunatics, they were bigger fools even than he had always known them to be, if such a thing were possible. When the Righter's breath and his stock of objurgations were equally exhausted, the Old Man said, placidly, "We'll leave here about 5 o'clock Wednesday morning and be at your place in time for breakfast. Have your traps all ready and half a dozen big watermelons on ice."

"All right," promptly responded the Righter, "I'll be all ready for you."

So about 8 o'clock on the appointed day up rolled the wagon to Bayou d'Anglais plantation, and out tumbled the Old Man, the Maiden and the Churchman, hungry from their long ride. Breakfast was soon done with, and off they started, anxious to make as much headway as possible before the sun became too hot.

As the Maiden was the one who had proposed Whisky-

chitto, they naturally looked to him for guidance; but he, with that shy modesty which befitted his name, had failed to reveal to them the fact that he knew nothing about the place, and still less about how to get there. As none of the rest knew anything more than he did (about the road, I mean), they began to inquire the way of every one they met. This was a well-conceived scheme, and might have worked all right had they met any one who knew the road. But no one did, and as each wayfarer met was too kind-hearted not to do the best he could for them by sending them in a new direction, and as they implicitly followed each one's advice, the result was that their track, if platted, would have looked like a streak of forked lightning. They had intended to camp for the night at Phillips's Bluff, and, from the directions received, began to think that Mr. Phillips must own every bluff on the river for a hundred miles from its source. They went N.N.E. by W.S.W. and $\frac{1}{2}$ N., with an occasional change of course to E.S.W. and $\frac{1}{4}$ N.W. by W.N.W., varied with tacks to E.N.E. by W., or W.N.E. by S.

And so on, over the prairie, across belts of pine woods, through stretches of cypress swamp they kept their dogged way, scorched by the blistering sun, soaked with sudden tropical showers and bitten and punctured by sandflies and gallinippers, and through it all the Old Man kept his cheery good humor. The Maiden quietly sucked at his pipe or blushing told modest little stories of his experiences with Redbones and with preachers; the Churchman placidly flicked gigantic horseflies off his near mule or cracked a dry joke when the road or the heat was worse than common; while the Righter heaped maledictions upon all fools who went a-fishing and anathematized roads, people, weather and the universe in general. When at last they stopped for the night at old Belizaire's they only knew that after a day's steady travel they were seemingly no nearer the fishing grounds than when they started.

To them, in this state of doubt and despair, came riding by on his way home, a certain Creole, named Meel-yaw (by phonetic spelling), who kept a ferry on Upper Darbonne. He reported fish plenty there, and told such a glowing tale that next morning the Pelicans moved on to his place, guided through the swamp and woods by old Belizaire, who, with the courtesy and kindheartedness so characteristic of these people, neglected his own business and rode miles out of his way to do a kind act to a party of entire strangers. But, alas! either Meel-yaw was mistaken or the fish were not in a humor for biting. For three days the Darbonne was fished persistently, but, with the exception of a few small "pearch," the results were nothing. The weather was torrid, and ticks and red bugs by day, and gnats and mosquitoes by night, made life hardly worth the living. "Mr. Tanner," the colored gentleman who acts the combined parts of guardian angel, caterer and cook to the club, had a hard time of it during those three days. Had he been taken out, tied to a tree, and "given forty," one-tenth as many times as that procedure was threatened, he wouldn't have had skin enough left on his back to cover a flea. And, as if his tribulations by day were not enough, his nights were one prolonged torture, for, with the improvidence of his race, he had neglected to bring a mosquito bar, and those bloodthirsty wretches consequently made his life a burden, grievous to be borne. But his unfeeling good humor and politeness never forsook him, and his coffee was as clear and strong, his fried fish and squirrel stew just as delicious, and all the duties of his position as aptly and cheerfully performed, as though life were a bed of roses, and he in receipt of a princely salary, instead of doing and enduring it all for the mere love of it. For Mr. Tanner is as big a crank as any of the rest of the Pelicans. He'll drop his work any day to go fishing, and the club could not exist without him.

Sunday was a blue day in camp. The expedition so far had proved a failure, and the Righter's "damnable iteration" of "I told you so," didn't tend to soothe ruffled tempers. If they hadn't told their friends when they left that they were going to stay a week, they would have packed up and gone home, but, with that stubbornness which had won for them the name of "The Mule Team," they were bound to stick it out. While "cussing and discussing," a visitor came in the person of Ben H. Ben was a long-lost brother-in-law of the Maiden's, though the latter, with his usual modesty, had failed to mention it.

Ben told them that they were only five miles from the Whiskeychitto, which was as full of bass as the pine woods were of ticks, and that if they would come and camp at his place he'd fill 'em to the muzzle with peaches and melons. The Maiden replied, "Ben, you're a liar, and you know it. There isn't any such stream as the Whiskeychitto—there's not a bass in all Louisiana—and you haven't got a melon or peach on your place. But no place can be worse than this, so we'll go—if only to make you ashamed of yourself." And go they did, and it was a case of "Paradise Regained." Ticks, mosquitoes, sand-fies and red-bugs vanished as by magic. The weather smiled upon them clear and cool, like October in the Highlands. Every eddy and pool of the swift-flowing, sandy-bottomed stream was full of lively bass, ready to take the bait and try their tackle to the utmost. And, best of all, cheery, jolly Ben and his big-hearted sisters made them welcome in a way which excelled even the proverbial Southern hospitality.

Nothing in, on or around the place was too good for them. Butter, eggs, milk, cheese, melons, peaches—everything was theirs. By day, Ben paddled them in the progue to the likeliest holes for bass, and at night organized coon hunts for their amusement. It will be a long and cold day before the Pelicans forget what they owe to the Ben H. family.

As soon as the first string of bass was taken, The-Old-Man-Who-Bakes-Fish proceeded to show how well he deserved the name. Sing, O Muse! the triumphs of his zeal and skill! How deftly he split them from head to tail, removing back-bone and fins; how tenderly he placed inside the slice of lemon and of onion, the pinch of pepper and of salt; how daintily he larded them with the sweet, fresh butter; how snugly he wrapped them in their envelopes of wet, brown paper; how cosily he tucked them away in their bed of hot ashes, and how the fire of genius lit his eye as he compounded the sauce, stirring and tasting, adding a drop here and a pinch there, till it was neither too sweet nor too sour, too strong nor too weak, but simply and absolutely perfect. But what shall be said of the result, when at last the glowing embers were raked aside and the crisp wrappings were removed, while the fragrant steam arose, and the palate was stirred

by a new and undreamed-of delight. The first few minutes passed in silence, for pleasure was too deep for words; then the Righter, laying down his knife and fork, arose and solemnly addressed his companions:

"I have eaten terrapin and canvasbacks on Chesapeake Bay, clam-chowder from Harpswell Point to Stratford Beach, broiled mackerel fresh from the Banks ere death had time to dim his prismatic hues, crab-gumbo in the old French market in New Orleans, salmon-roe on Puget Sound, kippered herring from Heligoland and flounders fresh from Cilasieu, but never in all the long years of a wandering life has anything so filled and satisfied my gastronomic longings as does this last triumph of the genius of our incomparable comrade The Old-Man-Who-Bakes-Fish. Give me another 3 pounder, please!"

And the Churchman, breaking the philosophic silence which usually enwrapped him as the shell enfolds the pearl, said, calmly but firmly, "Them's my sentiments, too!" H. P. U.

A DAY ON THE KALAMAZOO.

WHEN one goes a-fishing there is nothing like having a proper companion, and when I joined my rod on the shady banks of the Kalamazoo River in Michigan a few weeks ago, I felt I was in great luck. My companion was the Sophomore of the University of Michigan. He had been with me several times before, but then only as a plain everyday youth who acknowledged there were many things yet to learn in this world of ours. But when a youth gets to be a Sophomore then his knowledge is supreme; he solves all problems off-hand; nothing is too deep for his understanding or his upstanding. Nevertheless, the Sophomore loved angling as a boy loves to steal watermelons, and his book lore on fishing was immense. He could quote from Prime and Nessmuk, from Walton and Henshall. And he had some ideas of his own, and good ones too. His great motto was "test your tackle," "for," said he, cocking his hat at a sophomoric angle, "many fish are lost at the critical moment from a failure of the tackle which a proper examination might have prevented." This was such sound advice that Izaak, Jr., could not help saying, "Correct my boy. But we all know a heap sight more than we practice. When I was a Sophomore like you many years ago I also was full of knowledge; but as the years go by I am gradually unlearning, and if I live long enough I will yet know something."

Discouraging thus, we arrived at a choice stretch of fishing ground along a green, shady bank, where the river current was deep and strong, and where the bronzed old bass were wont, in times past, to ply their vocation and their avocation. And now, what a sight met our eyes! Along this choicest stretch of river was congregated a church picnic party, with all that it implies. Throwing sticks into the water, and splashing along the shores, seemed to be the principal pursuits of these excursionists, and while it was no doubt fun for them, it was exasperating to us. So we turned the boat up stream for a mile above, where was another good reach of water. "I'd like to know," I said to the Sophomore, "why, as soon as one finds a good spot for fishing, these blasted excursions and picnics have to come nosing around and spoil one's sport. Ain't this world big enough without their having to follow up the poor angler wherever he goes to render his life miserable? Ain't there plenty of fine places without fish where these people could go? Why, I believe they set spies on the anglers just to find new places to visit. I can't see through it, I'm sure." And then the Sophomore began a labored explanation, but a well directed slip of the oar sent a small stream of water into his eyes and mouth, and Izaak, Jr., was spared the infliction.

But as we got up the river our spirits begin to rise. What music it is to hear the purling waters, and how pleasant to gaze upon the wooded banks of the river! No picnickers up here to mar our joy. Only the scolding chatter of an occasional kingfisher or the "kerplunk" of a turtle or frog as it tumbles into the water. But here at this point, just ahead of us, is a famous hole for bass; here is where Izaak, Jr., pulled out seven last year in a half-hour's time. There, at that old log on the bank, is the place to tie up. Aye, there is the same old stick we tied to last year; and in the water we see the same old snags. How these familiar things please one; after a year's absence, they are like the grasp of a vanished hand and the sound of a voice that is still!

I stand on the log, the Sophomore sits in the boat. Into the water, at the same time, we cast our minnows, and anxiously await results. Out straightened the line of the Sophomore with that steady strain which told of more than a minnow's struggle, and I heard "I've got one," and my comrade began to reel in; there was a rush, and back came the empty hook. In the first round the bass was too much for the University of Michigan. Then the Sophomore tried to explain that why he lost the fish was because the angle of the strain upon the point of the hook was not in conformity to the theorem of Euclid, that the sine—but zip! went the line of Izaak, Jr., a slight pause, then a twist of the rod, and, after a few minutes' tussle, into the net slid a pounder. "Game, for a small one," said the Soph. "And the 'sign' was all right in my case, eh?" Then the Soph. took in a small one in good style, and Izaak, Jr., another. No big bass here to-day, so up the river we go to where the Rabbit Creek enters. 'Tis a most delightful spot, and a couple of more pounders were taken. But the sun was getting low in the west, and we pulled down the river and went to the hotel for supper. My! what wonders a university education can do for the stomach. The way that Soph. caused the food to disappear was marvelous. He seemed to eat in all known languages. No time for learned theories then, but he did manage to say, between gulps, that it was always best to "test your tackle" before going fishing.

Next morning before the fog had lifted, Izaak, Jr., and the Sophomore were down at the river's bank, but our experience did not give us a great idea of day-break fishing. Only one was caught before breakfast, and the honor fell upon the Sophomore, who handled the two-pounder in a very creditable manner.

After breakfast we took the boat and went up the river again to the scenes of our exploits of the afternoon before. At the deep pool at the point, Izaak, Jr., caught a couple of fine bass, and his comrade had some good bites, but lost them, "in spite of my university education," as he exclaimed. And here happened an incident to me which no doubt sounds like a "fish lie" to the non-angler. While standing on the log my hook became snagged with about 30ft. of line out, and being unable to loosen it, I laid my rod on the log, and went along the bank to get a

frog. I was gone perhaps five minutes, and as I was returning I heard the Sophomore calling me in exciting tones to "accelerate my footsteps, as there was a vibration at the extremity of my rod;" so I "accelerated," and sure enough there was a good "vibration." I soon reached my rod, and pulling gently found there was a fish on, but as I struck to fasten him, like the Irishman's flea, he wasn't there. I reeled in my line and found on the hook two minnows; one had been hooked from the gullet of the fish, thus enabling him to escape. But I was much obliged to Mr. Bass for unsnagging my line. A few hours later, at another place, I again had a caught hook released by a bass, but this time the fish became mine.

We moved up the river watching the clean gravelly bottom for signs of bass. As we neared the shady side near a deep pool we saw a very large bass, looking to be 2ft. long as he lay fanning the water. "A veritable Anak," said the Sophomore, who was vainly casting a minnow in the direction of his lordship. We went up the stream a short distance and then returned to find the big fish still taking his ease. This would not do; so we went to near shore above the pool and tied to a fallen tree. There, for about half-an-hour, we had as finesport as any but a fish hog could want. Six fine bass, from three-fourths to two pounds, were added to our string. Here it was that the Sophomore's great idea of "test your tackle" came into play. He was in the back of the boat, casting toward the pool for an "Anak" of his tribe; he had several fine bites, but only got one fast. Finally, with about 40ft. of line out, he got a strike, hooked him fast, and then he yelled: "I've got that big one, sure;" and it looked as if he had, the way the tip of the rod acted. "Give him line," cried Izaak, Jr., but the Sophomore, who had been catching fingerling trout and swinging them over into the adjacent fields, didn't see the need of "giving line," but, on the contrary, raised his rod, and his line parted 20ft. out! Such a look as came over his face was a sight to behold. Disgust, disappointment and revenge were all there. "How did that happen?" I asked. "Did you test your tackle?" Then he humbly admitted that he had used the line a year ago, and had never tested it since, as it seemed all right when he was "fishing for trout." After repairing his line, and when ready to make another cast, he said, "Uncle," for he it known that the learned youth was entitled thus to call me, "a university education doesn't help much in catching fish, does it? I feel more like a sucker now than does any fish. But I didn't use any cuss words when my line broke, did I?" I assured him he was a hero in that regard, and that profanity and whisky were never desirable adjuncts for any angler.

Up stream we again went to the mouth of Rabbit Creek, but the sun was too hot for fish on that side of the river, for it beat down with terrible effect with the thermometer at about 100° in the shade. So we hugged the shady side, and at every likely place we would get a strike. Even during the noon hour, when the books tell us the fish do not bite well, there was no cessation in the biting, and while Izaak, Jr., handled the boat the Sophomore got the bites, and that was about all he did get; for, except the one in the early morning, his catch was only two small bass, but, counting those he lost, his catch would have been about fifteen. Now, why is it that two fishermen in the same boat, using the same bait, and having similar tackle, one will get the fish and the other will get left. Our rods were both casting rods 7ft. 3in. long, weight 8 1/2 oz., and our lines were both of silk. But the Sophomore persisted in using a No. 1 Sproat, while Izaak, Jr., used a No. 2-0 Aberdeen hook, and therein I think may be found a solution of the enigma. With a good-sized minnow, I believe a No. 1 hook is too small in spite of the writings of many in favor of whip-lash rods, and finer tackle. On our way down the river to the hotel I caught a fine 6lb. pickerel, or pike (which was it?), and the Sophomore caught several fine bites. But the basket of fish we took to the hotel was the finest seen for many a month, and the astonishment was great that we should catch them when so many had failed.

And thus ended our day on the Kalamazoo. Even the Sophomore, in spite of his ill luck, declared he never had such a time before, and would always remember the trip, and especially the "Anak" which broke his line. Next year, perhaps, when the Sophomore becomes a Junior and is less wise, he and Izaak, Jr., will again forget the cares of the world in an outing on the clear and classical Kalamazoo, for

Better a day on the Kalamazoo
Than a cycle in the city hot.

IZAAK, JR.

Natural History.

HOW TO COLLECT BIRDS.

A RECENT issue of the Bulletin of the U. S. National Museum contains a very useful article entitled: Directions for Collecting Birds, by Mr. Robert Ridgway, the curator of the Department of Birds. Mr. Ridgway's great experience as a collector and as a handler of skins collected by others makes him perhaps the best qualified person in the country to prepare a set of directions such as are given in this paper, and as a perusal of them will interest a very large number of our readers, the unsentimental as well as the ornithological, we quote from this paper at considerable length.

Passing over the subject of the collector's outfit, which includes the collecting gun, ammunition, skinning tools, poison labels, and so on, we come to the actual work of

PROCURING SPECIMENS.

The collector having provided himself with the kind of gun and ammunition which seem, according to his experience or judgment, most suitable, he should then place in his collecting-box or basket the following implements and materials:

- (1) A considerable "wad" of raw cotton for plugging shot-holes and the throats of specimens.
- (2) An insect powder bellows filled with corn meal, and an extra quantity of the latter.
- (3) A supply of paper cones or "cornucopias." These are best made of some moderately soft, bibulous paper, as newspaper or pamphlets. Some collectors prefer making the cones as they are needed, and carry with them folded newspapers or old pamphlets, but time will be saved if the cones, or some of them at least, are made before starting.

(4) A small bottle filled with strong carbolic acid. (This is needed only in warm weather.)

What to do with birds after they are killed.—Immediately a bird is killed it should be picked up by the feet (never by the tail) and held head downward to allow the blood to drain from the mouth, which may be hastened by gently pressing the bird; "flip" or otherwise carefully remove the blood clots which may adhere to the bill, feathers, or other parts, and apply corn meal to absorb what may remain. In the absence of corn meal clean sand will do, and in the case of birds with white plumage plaster of Paris will answer, but should be carefully removed before it becomes hard. The holes made by the shot, together with the throat and the internal (but never the external) nostrils, should be plugged with cotton, to prevent the escape of blood and the juices of the stomach. Before plugging the throat a small quantity of corn meal or clean sand should be inserted, as this will absorb the blood, etc., and prevent its escaping around the cotton.* Should an eye be broken by the shot, the liquid should be carefully pressed out and what can not be otherwise removed absorbed with corn meal or sand, as nothing is more difficult to remove from feathers after it once becomes dry.

It is very important that as much pains be taken as time and other circumstances will allow to clean blood and other stains from the plumage before becoming dry, as neglect of this precaution will in the end involve far greater loss of time or perhaps necessitate loss of the specimen itself.

In very warm weather, before the throat is plugged, the gullet should be swabbed with carbolic acid by saturating a small wad of cotton which has previously been wrapped around the end of a small stick, straw, or wire, or held in small spring forceps, with the acid, and then a small quantity of the acid should be applied to the skin along the median line of the abdomen, the feathers having of course been previously parted. In both these operations great care should be taken to prevent the acid from coming in contact with the feathers. Some persons use for this purpose a hypodermic syringe, but this instrument is quite unnecessary, besides being cumbersome and expensive.

When the bird has been properly cleaned and plugged it should be carefully dropped, head downward, into a paper cone of suitable size, the end of which should then be folded over the tail—care being taken not to bend or break the latter,—and also to avoid doubling the head, which is likely to be done unless the bill is kept exactly in the middle of the cone and guarded from too forcible contact with the paper during its insertion.

The bird thus enveloped should be carefully placed in the collecting basket, which should never be closely packed with specimens, as the pressure thus caused will not only force the blood through to the plumage, but in hot weather will also hasten decomposition. The larger specimens should be placed at the bottom, the smallest on top; and if the box or basket is only partly empty the space should be loosely filled with grass, leaves or paper, to prevent the specimens shifting about.

How to kill wounded birds.—A wounded bird should never be killed by thumping or pounding the skull. If the specimen is of small or medium size much the easiest and best way is to take it between the thumb and fingers, underneath the wing, and squeeze it tightly, thus causing its death almost instantly by suffocation. If of a large size this cannot be done, and the collector sometimes has a difficult problem to solve, particularly in the case of the larger birds of prey, whose sharp talons are to be avoided, it being very often extremely difficult to release one's self from their powerful grip, which, besides being extremely painful, may lead to serious results. A bite from the beak of such birds, even the most powerful, is comparatively a trifling matter, and in the case of the larger hawks and owls may be quite ignored. These birds when wounded usually throw themselves on their backs, with open feet presented for defense. In such cases the legs of the bird should be quickly seized and held firmly, which can easily be done by a careful and alert person. Then, while the feet are held, a sharp pointed knife or scalpel should be quickly plunged into the anterior portion of the breast, so as to strike the heart or its vicinity, and the bird held head downward to allow the blood to drain from the mouth. All these methods are more or less cruel, and therefore naturally distasteful to a sensitive person. But there can be no question that it is far more merciful to dispatch at once a wounded bird than to delay putting an end to its suffering. When practicable, chloroform can be used advantageously by simply saturating a handkerchief with it and holding it over the bird's head for a few moments.

Care of specimens on reaching camp or quarters.—In very hot weather, when specimens decompose rapidly, a drop of carbolic acid should be put into the throat and another into the intestines, to retard decay. This is most easily done by means of a "swab," improvised of a small stick and a little cotton. Care must be used not to allow the acid to come in contact with the feathers. When camp or quarters are reached, the specimens should be taken out of the cones, one at a time, carefully examined, and the cotton in the throat removed and a fresh plug substituted. Never delay skinning a specimen until it begins to bloat or until it begins to smell offensively, although, should it be impracticable to prevent this, very desirable specimens should be skinned even in this condition. The best way is to skin the birds as soon as possible, though in cold weather they may of course be kept several days without danger of decomposition. At the same time, however, allow a specimen to relax somewhat before you begin skinning it.

PREPARING AND PRESERVING SPECIMENS.

How to skin birds.—Before the process of skinning is actually begun, certain preliminaries are necessary, if the work is to go on smoothly. A suitable table, stand, or workbench must first be provided and placed in a good light. A paper cover should then be put over it (an old newspaper is as good as anything). Then the box containing the arsenic or mixture of arsenic and alum; that containing the corn meal; the skinning and stuffing in-

* Perhaps a still better plan is to push one plug of cotton down the gullet nearly to the stomach, before the throat plug is inserted, to prevent the juices of the latter from collecting in the throat, since, if allowed to do so in warm weather, they cause the feathers to slough off.

† Crumpled or bent feathers may have much of their elasticity and original shape restored by dipping in hot water. Steaming will answer the same purpose.

plements; the cotton, needle and thread; labels or tags; pencil, cleaning sponge and brush; cup of clean water, etc., are to be placed in convenient positions on the table, room for the specimen and the hands of the operator being of course reserved. A basin of water and towel, for cleaning and drying the hands, should also be within reach.

When everything is ready a label or tag should be securely fastened to one leg of the specimen, and the locality and date, as well as a number, inscribed on it, the same data being written in the collector's field catalogue after the corresponding number. No measurements are necessary, since all measurements of scientific value are best taken from the dried skin, though in the case of very large birds (and smaller ones also, if the collector has plenty of time) the total length and the spread of the fully outstretched wings may be taken and for convenience may be written with the length first and the spread last with a multiplication sign between, thus, 36. x 84.50, the measurements being best taken in inches and decimals. Then if there are any noteworthy features as to color of the soft parts they should be carefully noted, this being a very important matter and one sadly neglected by collectors. If the collector can provide himself with a small box of good water colors and suitable brushes, together with some pads of drawing paper, rough sketches of bills, feet, etc., may be made and the colors exactly produced. If not thus provided, or even as an additional aid if he is, a set of named colors on paper should be at hand to help him in naming the different hues.

The girth of the bird may then be taken by means of a band of stiff paper passed round the middle of the body over the wings and pinned in the form of a ring. It is then slipped off toward the feet, and after the skin is prepared is replaced, the stuffing inserted being enough to keep it from falling off. The exact circumference of the original bird can thus be readily maintained. In fact the ring may be slipped on before the stuffing is commenced and enough cotton inserted to fill out the shoulders within the paper.

After these preliminaries, relax the wings and legs by pulling and stretching; then make an incision through the skin only, from the lower portion of the breastbone to the anus. Should the intestines protrude in small specimens, they had better be extracted, great care being taken not to soil the feathers or to mutilate the sexual organs, thereby rendering it difficult or perhaps impossible to determine the sex. Now, proceed carefully to separate the skin on one side from the subjacent parts until you reach the knee, and expose the thigh, when, taking the leg in one hand, push or thrust the knee up on the abdomen and loosen the skin around it until you can place the scissors or knife underneath and separate the joint with the accompanying muscles. Apply a quantity of corn meal to the space between the skin and the carcass to prevent adhesion and to keep the feathers clean. Repeat this operation for the other leg. Loosen the skin about the base of the tail and cut through the vertebrae at the last joint, taking care not to sever the bases of the quills, and invert the skin, loosening it carefully from the body. On reaching the wings loosen the skin from around the first bone and cut through the middle of it, or, better, separate it from the body through the joint. Continue the inversion of the skin by drawing it over the neck until the skull is exposed. Arrived at this point, detach the delicate membrane of the ear from its cavity in the skull, if possible, without cutting or tearing it; then, by means of thumb nails, loosen the skin from other parts of the head until you come to the eyes, where extreme care is necessary in cutting through the white nictitating membrane to avoid lacerating the ball. Scoop out the eyes, and, by making one cut on each side of the head, through the small bone connecting the base of the lower jaw with the skull, another across the roof of the mouth behind the base of the upper mandible, and between the jaws of the lower, and a fourth (horizontally) through the skull behind the orbits and parallel to the roof of the mouth, you will have freed the skull from all the accompanying brain and muscle. Should anything still adhere it may be removed separately. In making the first two cuts care must be taken not to injure or sever the zygoma, a small bone extending from the base of the upper mandible to the base of the lower jaw bone. Clean off every particle of muscle and fat from the skin of the neck, and invert the skin of the head to the very base of the bill.

Then skin the wing down to the wrist joint, detaching the roots of the larger feathers (secondary and primary quills) with the thumb and finger nails; remove the muscle from the bones, leaving all of the latter.* The legs should then be skinned down to the lower joint of the thigh (the heel, or tibio-tarsal joint), and the flesh removed from the bone. Remove all the muscle and fat, including the oil gland, from about the base of the tail, great care being taken not to cut the roots of the feathers, which would cause them to drop out.

During every stage of the process of skinning the following very important thing should be specially remembered: (1) Always handle the skin, when detaching it from the body, as close as possible to the point of adhesion, to prevent stretching, a stretched skin being far worse than one full of holes or rents; (2) always keep the fingers between the feathers and the flesh, to prevent soiling the plumage; (3) apply plenty of corn meal or other suitable absorbent whenever a bloody or fatty place is exposed.

Certain kinds of birds require deviation from the above rules in some particulars. Most woodpeckers and ducks, for instance, have the head so much larger than the neck, that it is quite impossible to skin over the head by the ordinary method. In such case the neck should be cut off before the skull is reached, and the skin turned "right side out;" then make an incision from the top of the occiput down to the base of the skull and skin the head through this opening. Of course the incision should be sewed together after the skinning is completed, or at least after the specimen has been stuffed. Pigeons, cuckoos and some ducks, as well as other birds, have the skin very tender, and adhering so closely to the rump and lower part of the back (sometimes the breast also), that its separation is a matter of very great difficulty. Such birds should be kept until they are fully relaxed before

work on them is commenced, and the operation of skinning should be done with great care.

In warm weather or in hot countries very large birds (as herons, cranes, hawks, etc.) should have an incision made below the heel (tibio-tarsal) joint and the tendons cut off; then, by making another incision on the sole of the foot the tendons can be drawn out. The space made by the removal of the tendons should be filled with arsenic. This will prevent fermentation of the juices in the leg and generation of gases, which so often cause the skin to "blister" or separate, thus entirely ruining the specimen for mounting.

Birds having a pure white and very compact plumage on the lower parts should be skinned through an incision made under one wing, along the side, or on the back, which will be found very easy after a little practice.

[TO BE CONCLUDED.]

THOSE CALIFORNIA SONG BIRDS.—I see by your last number that the Californians think of stocking their State with singing birds. Now isn't it probable that nature understood her business when she made that region and omitted to scatter song birds through it? During certain seasons every spear of grass, every weed dries up for want of water, and every insect dies for want of grass and weeds; and how under such conditions little birds can live I can't imagine. They require water very often, and Californians expect too much if they suppose the little musicians are going to entertain them with no grain, grass seeds or insects to live on and not a drop of water to wet their whistle with. It may be that certain kinds of birds would thrive and rest contented in California if turned out in the vicinity of lakes or rivers, but I think they will lose their labor if they turn them out elsewhere.—DIDYMUS (Summit, N. J., Sept. 25). [But what about the new order of things created by irrigation?]

WESTERN NEW YORK NATURALISTS' ASSOCIATION.—Mr. E. B. Peck, of Clifton Springs, together with several others, for some time past have been interested in forming a society of naturalists, and on Sept. 16 a meeting held in Phelps resulted in the formation of a society to be called the Western New York Naturalists' Association. The membership is restricted to persons residing in the counties of Wayne, Ontario, Steuben, Allegany, Livingston, Monroe, Wyoming, Genesee, Orleans, Niagara, Erie, Cattaraugus and Chautauque. The active membership is limited to fifty, with an unlimited associate membership. Corresponding and honorary memberships were also arranged for. The initiation fee was fixed at 50 cents, with annual dues of 25 cents. The next annual meeting will be held at Brockport, Oct. 6, 1892.—O. S. B.

Game Bag and Gun.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

A GROUSE HUNT IN NEW HAMPSHIRE.

"KEEP a sharp lookout in the trees, and if you see one, don't wait for him to fly. All's fair in love and partridge hunting, I say. If the rascals will hide in trees, why shoot them on their own terms. That's my doctrine, and I never saw a man who hunted partridges much that didn't come to it."

So spake mine host, Sam Trescott, of the village "hotel" in Groton, New Hampshire. We were out on the hills for a day's hunt after ruffed grouse. It was late in the fall, and the birds were in their prime. A flock had been flushed and we were now following them up. Sam had been giving me some advice as to how to shoot the wily birds, and closed with the remarks quoted above. There was some force in his logic, but though I had nothing which I felt moved to urge in its disproof at that particular time, still

A man convinced against his will
Is of the same opinion still,

and besides I never could see a skulking grouse in a tree. There was some comfort in that reflection. So I let Sam lead the way, inwardly hoping, however, that we might find some of the birds at least on the ground, where they could be located by my setter Don.

The timber through which we were passing was chiefly hard wood, yet so many leaves still clung to the limbs of the trees as to make it difficult to see through them. With a kind of instinct of direction, however, which I have frequently noticed in native grouse hunters, my companion led the way unerringly for forty or fifty rods into the woods. "They ought to be right about here," he said in a low voice turning to me. Just then with a mocking whirr of wings a bird got out of a big ash tree right over our heads. Neither of us had the hammers of our guns raised, and if any theoretical grouse shooter chooses to tell me that a man can cock his gun and get in a shot at one of these birds flushing from a tree before it is out of range I must respectfully invite him to go to the Valhalla of prevaricators. It cannot be done. It looks easy enough on paper, but just try it yourself and see. You will find yourself in the condition of the young man who remarked that it was easy enough to write Psalms like David's. He was invited to try it, and—tried it. That was as far as he got.

It is not to be wondered at then, that grouse number one got away from us without so much as the smell of powder drifting in his wake. "Confound it!" cried Sam, "why wasn't I tending to business? That's always the way. If a fellow takes his eyes out of the trees for a minute, there is sure to be a bird sitting right over his head."

"Well, I am going to be prepared for another such an emergency," I replied, raising the hammers of my gun. "Give me as good a shot as that again, and I don't believe I should care to see the bird in the tree."

Meanwhile Don had been ranging at his own sweet will, and it was only when, of a sudden, I missed the patter of his feet in the leaves, that it occurred to me he might possibly be making game.

"Where's Don?" I asked.
"Don't care where he is," replied Sam, never relaxing a muscle of his straining neck. "Those birds are where he can't do anything for us."

"I am not so sure of that," I replied. "Suppose you continue your astronomical observations here for a few minutes, and I will find out." The last I had seen of Don he was ranging off to the left, so I turned in that direction, and had hardly gone 40 yds., when, coming to the crest of a little rise in the ground, I saw my faithful setter on a dead point just across a little glade. Fearing, if I called to Sam, the birds would flush wild, and knowing how intently my companion was occupied with his own affairs just at present, I resolved to move forward at once and take my chances. I could not tell how long the dog had been holding his game, but thought if there were any birds there they must be getting pretty restless by this time.

A few steps carried me to the center of the glade. Then came the sudden storm and thunder of wings which so often deprives the grouse shooter at once of the power of thought and action. Two splendid birds got up on the wing at the same moment. They were both of them within 20 yds. of me, and for the fraction of an instant the same line of vision photographed them on my brain. Then one swung to the right and attempted to cross the glade, while the other kept straight on. All this happened before my gun could reach my shoulder. But the instant it did so I swung on to the bird crossing me, with a kind of instinct for the more exposed shot. The report of my right barrel rang sharply through the woods. The smoke hid everything for a moment. Then I heard a bounce on the leaves and the rapid throb of wings. Don came bounding across me, and the next thing I knew the bird lay in my hand, the little spark of its life just quelled, but the body warm and throbbing yet with vigorous vitality. It was a young cock, and a plump, handsome specimen.

I had barely dropped it into my game pocket when I heard Sam's gun go off. Then I could easily distinguish the flutter which a wounded bird makes as it drops from branch to branch, ineffectually beating them with its wings. A moment later I hear Sam's excited shout, "Hello, there! Bring the dog here, quick! There's a wounded bird and I can't catch it."

Don and I responded on the run. We found Sam scurrying about in the bushes in a great state of excitement. "The confounded bird was away in the top of a tree, and I only broke one wing," he panted. "Here, Don—here!" and he put the dog on the scent of the wounded and running bird. A long and rapid chase it led us; for a wounded grouse will run like an ostrich. Don soon grasped the situation, and ceased trailing in his usual cautious manner. He hurried along hotly on the scent, we at his heels; and at length we drove the bird into a dense hemlock thicket, where the dog caught it and brought it to hand, still alive.

Sam leading the way, we now turned off to the left, and soon came out in a large clearing. Here, by the side of a clear and cold brook, we lay down to eat the lunch which we had put in our pockets and enjoy an hour's rest and smoke. Then we began to work our way around the east flank of the hill. The valley was broken into alternate pasture and woodland. There were scarcely any evidences of cultivation. Half-wild sheep and young cattle tenanted the narrow strips of pasture, and as we crossed the fields they huddled timidly and suspiciously together or fled with swiftness of the wind.

Now, for the first time, we began to find birds plentiful. But the cover was chiefly underbrush, and so thick as to make shooting difficult and uncertain. We found no more broods, but the birds lay scattered, giving us singles and doubles in a way which pleased me much better than looking for shots in the trees. Don gave us eight or ten splendid points, and we succeeded in bagging four more birds between us. I was surprised to find Sam quite an adept at snap shooting, in his own peculiar way. He fired invariably with gun below the elbow, and so extremely quick was he in this kind of shooting that the bird was scarcely off the ground before he fired at and either hit or missed it. It would hardly do for me to speak of this kind of work as "random shooting," inasmuch as Sam bagged three birds to my one. There must be considerable method in this kind of madness.

We reached the hotel shortly after 4 o'clock, not wishing to get so tired that we could not go out again on the morrow. A good supper refreshed us completely, and after an evening smoke and chat with the usual habitudes of the public room of a country hotel, I turned in and slept soundly all night.

Our beautiful day, however, turned out to be a "weather-breeder," and next morning I woke up to find it raining dismally. This, of course, put a veto on all plans for sport, and I spent the day in the house reading, playing an occasional game of checkers with mine host, and listening to some choice music which one of the latter's children ground out of a cylinder organ, with the assistance of a long roll or perforated paper. The most tantalizing of all the selections rendered, as I remember now, was "Johnny, Get Your Gun."

The next day I was up early. Five o'clock found me scanning the sky. The rain had ceased, although there was still a thin curtain of clouds between the sun and the earth. Breakfast was ready at half-past 5 o'clock, and by 6 o'clock mine host had harnessed his team and we were off. This day our course lay down the river, on both sides of which there were said to be plenty of birds.

Before we made our first stop the thin, silvery mist of clouds began to break away, and the sun broke forth in royal splendor, soon drying the wet grass and twigs. About four miles down the valley we came to a very beautiful piece of woodland, consisting mainly of white and golden birches intermingled with spruce. A friend of Sam Trescott's dwelt near by, and we hitched our team under his shed and started for the gently rising slope above the river. Climbing an old moss-covered rail fence, we were soon among the aisles of birches, their white trunks shimmering like the beautiful bodies of naiads or wood nymphs. Here was an ideal place to shoot, if we could only find the birds. We moved forward slowly and cautiously, with Don ranging in front.

It was not long before the eager dog began to show signs of birds. We had struck into a half-obliterated wood road, on one side of which there was a running thicket of thimbleberry bushes, thorn apples and sumac. Along this strip Don began to creep with that cat-like tread, which indicated that he expected to find birds close at hand. We cocked our guns and stepped expectantly forward abreast in the wood road. Still the dog forebore to drop to a point. He led us down into a hollow, where a tiny stream was flowing across a decayed

*Many prefer to clean the wing by an entirely different method, an incision being made on the under side along the bone, and the flesh removed through the opening thus made. This is the better way with large birds.

bridge of logs up the ravine a few rods, and then stopped with his whole body indicating the base of a great oak tree half way up the bank. We could see every inch of the ground between the dog and the tree. If there was a bird there it must be lying on the opposite side of the oak. Exchanging a glance of silent agreement Sam and I separated, he going to the right and I to the left of the tree. The dog stood his ground, and we knew that the bird must be lying close in front of us. And so it was, apparently crouched against the opposite side of the oak, for before we could reach the tree the grouse sprang as if out of its very roots. One person alone would have stood very little chance of getting a shot at the wily bird, but it could not so easily put the trunk of the tree between itself and both of us. The grouse came into view first on my side, and having a fairly unimpeded shot I succeeded in dropping it with my first barrel. Having bagged this bird we returned to the old wood road, as the likeliest place to run across others. Scarcely had we reached it when up sprang a brace of birds from the thimbleberry bushes, one of which fell to Sam's quick snap shot, while the other succeeded in escaping both of my barrels more deliberately aimed. We kept on down the road, and in a few minutes Don gave us another point. A small hen grouse got on the wing, and as she went straightaway we both fired and dropped her stone dead. Our next two shots were at birds flushing wild, and we failed to score.

CHICAGO AND THE WEST.

OPENING DAY AT HORICON.—I.

CHICAGO, Ill., Sept. 3.—Long ago something of a history of the Chicago field shooting clubs was attempted in these columns, and completed to such extent as then seemed justifiable, though the story covered only such clubs as had their membership exclusively or largely in Chicago, and such as at that time had most prominence. Any history of Chicago enterprise, however, must in these days be daily to be complete. Within two years several new field clubs have been formed in Chicago, and changes have occurred in others sufficient to bring them within the scope of the series of articles above referred to. This series would to-day be highly incomplete without mention of the organization generally known here as the "Horicon Club," but whose real corporate name was the "Diana Shooting Club, of Horicon," Wis., and whose membership, once confined largely to the latter State, has now by recent changes come to lie partly in this city—largely, indeed, so far as the most interesting features of the club are concerned. I have earlier mentioned the anticipated interest of "opening day" at Horicon, Sept. 1, and must beg now to blend the story of the pleasant event with the more general history of this club, which seems to have features as new, as distinct and as interesting as any yet found among the Chicago clubs.

Winneconne and Poygan marshes, about twenty miles from Oshkosh. Poygan Lake is strung on the Wolf River, which joins the northern Fox for Winnebago waters. We shall not follow the rail fence any further, and indeed I do not know whither it goes further, though the next jump must be a long one, for when the northern birds get in to Winneconne Marsh ahead of a storm they are very tired and hungry, and must have come a long way, certainly from far above the north line of Wisconsin, for we now have touched the last of the greater feeding grounds. Of all these grounds, the Horicon Marsh is the greatest natural breeding ground, and has been so for years. Indeed, we are now upon historic country, and could, if we liked, leave shooting for a time, and go into history of Indian and white man not altogether without pleasurable interest.

Near the quiet little country village of Horicon, one of those old, old towns that never grew, you may see to-day, on the pleasant wooded bluffs which skirt the great marsh, the corn hills still intact, which mark the planting grounds of the old Winnebago tribe, the first hunters, probably, who ever tasted the inimitable possibilities of that spot. Probably the Winnebagoes did little damage to the fowl beyond stealing an easy livelihood out of their eggs. They were lazy, like all Indians, so lazy that they planted their corn in these same hills, year after year, until the stalks dwindled and dwindled and hardly bore

AMONG THE WILDFOWL.—V.

"YOU SON OF A GUN."

Then I succeeded in killing a bird which flushed from a tree, and within the next twenty minutes Sam bagged two birds, one skulking along the ground through a thicket and another perched on the limb of a birch tree and watching us with undisguised interest.

This completed the bag for the morning. On returning to the team, Sam's friend insisted that we should take dinner with him, which we were nothing loth to do, as our lunch, though exceedingly good as far as it went, would hardly have gone far enough, I fear, for two hungry men. In fact, we easily finished it as a kind of after piece later in the afternoon.

Driving on for a couple of miles, we were fortunate enough to strike a piece of cover which contained some late woodcock, undoubtedly flight birds, and bagged six during the afternoon, besides two more grouse. I never enjoyed more delightful sport than we had in that little patch of birches and alders, while Don was working up those November woodcock. The birds lay close, flew swift as arrows when flushed, and were in prime condition for both gun and table. My companion was not used to this kind of wing shooting and only succeeded in dropping one bird. But he declared that he should try it again, and would beat me yet.

As it would take me about a day to reach home by rail, and as I must certainly be in my office by Saturday, this finished the record of my little trip to the hills of New Hampshire. We had not found many birds, nor made large bags, but found enough game to keep things interesting and had a generally good time. Mr. Prescott enjoys shooting as well as any visiting sportsman, and thoroughly understands the habits and tricks of the ruffed grouse. I hope another season will bring the welcome leisure which may be devoted to a second trip into the glorious New Hampshire mountains. PAUL PASTNOR.

GLOUCESTER, Mass., Sept. 13.—The plovers came along with the easterly storm of the 6th and 7th, and I have been told that it was the largest flight for a number of years. They did not stop here, but continued on their journey southward, and two days after the storm only an occasional one was to be seen on the marshes.—E. F. LOCKE.

I believe I have divided the Chicago clubs into the Kankakee River, Sandhills, Illinois River and Fox Lake groups, according to the sporting regions as above indicated. We cannot class the Horicon Club under any of these, and shall have to make another group for the Rock River country. Properly the Blackhawk Club of Lake Koshkenong would fall under this head also. The Rock River flows west of the Fox River, emptying into the Mississippi at Rock Island. The first great lake through which it flows is Lake Koshkenong, in lower Wisconsin, the famous wild celery lake which has already been described. Rock River lies along what we may term the celery flight of the northern wildfowl. Properly we should make a separate class of the "celery clubs." Under this head we should include the Fox Lake clubs, the Lake Koshkenong clubs, the Nee-pe-nauk and Kaw-Kaw clubs of Puckaway Lake, Wis., and perhaps an Oshkosh club or so, which latter we cannot call Chicago clubs and shall so pass by for the present. Horicon Club lies on this flight, though it has no celery feed.

Details like the above will be most interesting when the reader takes down a map and locates the points mentioned. A study of the question in that way will be indeed interesting. It will show, among other things, that the flight of the migratory fowl is by no means on a straight line, either going north or coming south. It is much more like the zigzag of a rail fence in its direction. Suppose we start in at the celery beds and wild rice of Fox Lake. The fall flight into Fox Lake comes from Pewaukee Lake, the headwaters of the Fox River, to the northeast, or from Lake Koshkenong, on the Rock River, a zigzag to the northwest. From the celery and carried Koshkenong, on the Rock, you must make a sharp zigzag in your fence northeast to Horicon Marsh, the headwaters of the latter stream, where there is the greatest breeding ground in Wisconsin, and untold abundance of wild rice, though no celery. Thence the angle of the northern birds, not those bred on Horicon, bends north-west again to Puckaway Lake, celery and rice. Puckaway Lake is strung on the northern Fox River, which flows into big Lake Winnebago, thence via the Neenah River along the old Indian water trail from the Great Lakes. Still another angle the birds must make to get to

an ear. Even so the tribe dwindled, and when the Diana Club was formed the last of the few Winnebago families around the great marsh faded away from the old haunts and silently joined that infinitely pitiful procession of an almost forgotten race.

But now we have overshot other history more directly essential to our purpose. In the earlier days white hunter and Indian hunter crossed each other's trail in all this country, and the smoke of the wigwam answered that from the cabin of the pioneer. In those days the great strip of rice and boglands was known to the latter as the "Winnebago Marsh." It was then, as it is now, between twelve and fifteen miles in length and six miles wide at its greatest cross section. Then, also, as now, it was a wilderness almost impenetrable of bayou, bog and slough, covered with the densest conceivable growth of rice, flag, cane, grass, reed, weed and all the infinite vegetation of the marsh. The farmers were wide apart and gradually sloping. Somewhere between the two rolling banks the channel of the Rock River formulated itself. At the village of Horicon it passed over and through a rocky ledge where it was possible to confine its waters with a dam. At this point that ancient citizen, Mr. Martin Rich, whom you may see to-day in Horicon and shake by the hand as I have done, built the dam for his big mill.

"Mart" Rich's dam was built in 1845, when this region was just beginning to settle up. It was a good dam. You can see proof of this yet in the timbers thereof which lie in ruins. It held the waters, but it could not stand the law. The farmers all claimed that it stepped on their riparian toes.

Naturally from the configuration of this country this dam on the ledge at Horicon village backed the waters far and wide over the shallow basin, through which they flowed so sluggishly. The "Winnebago marsh" disappeared from the face of the earth, and "Lake Horicon" took its place. This beautiful sheet of water, 16x6 miles in extent, filled all the basin up and lay high upon the sides of the timbered bluffs, as you may see by the water marks to-day. It was a fine sheet of water. The wildfowl shooting was then simply magnificent, and the fishing also was remarkable. In the winter the ice held hundreds of fishermen's shanties.

Now, all this land under the lake was of questionable value at best, but some men love a law suit, and pioneers were ever jealous of their rights. It seemed best for them to sue Martin Rich for backing water over their frog preserves or something of the sort. One by one they sued him, and one by one he beat them, till finally his purse gave out, which in the eye of human justice is the end of everything. So the dam had to come out. Mart. Rich destroyed it in the fall of 1867. A great rush of devastating water lasting for days, a destruction of millions of pounds of fish, an unsettling for the nonce of all wildfowl plans, and the great lake was again a great swamp, only this time its name was changed to the "Horicon marsh," as it is known to-day.

So the farmers got their hay lands and frog lands back again, and dreamed they owned the earth, because they had purchased or stolen from the Government on very reasonable terms. Speculation in these swamp lands fol-

southern and best portion of the marsh, had been leased for twenty-five years, the annual rental being \$100. This lease has now been provided for out of the club's sinking fund.

Originally only 25 memberships were sold, and the bulk of these were placed in Horicon and Milwaukee at first. It chanced that Mr. Percy F. Stone, one of our prominent Chicago shooters, who was born and raised in Wisconsin, happened to be passing through that part of the State when he heard of the starting of this club, in the spring of '83. He knew the marsh, and was interested at once, so much so that he telegraphed to the incorporators to meet him at the train as he passed south. To them he said, in brief, and while the train was waiting, "I will take five memberships." Arrived at Chicago, he forthwith took in on his spare tickets his friends J. O. Pierson, C. E. Cole, E. J. Marsh and C. C. Germain. These five formed a club within a club, and put up what is known as

blue-winged teal breed here in immense numbers. Woodcock, widgeon, spoonbill and redhead are plentiful. The canvasback is occasionally taken, and when the autumn flight southward fairly sets in, the pintails seem to outnumber all other varieties.

While this entire marsh tract presents attractions for sportsmen, the best, except in the far West and North, the grounds controlled by this club are the choice to be found in the extensive area covered by the marsh. They are easy of access, especially from Horicon by the river, which winds circuitously northward for a distance of about three miles, when it becomes lost in an infinite number of channels, bays and sloughs trending in every direction and of every conceivable shape. Following to the eastward this labyrinth of bog and channel, one soon reaches the "Four-mile-island Bay," a sheet of water covering an area of about three hundred acres. On its eastern shore rises a ridge of hard land, not many years ago denuded of its timber, but now thickly covered with a growth of young trees, which is known as "Four-mile Island," the favorite resort of camping parties. To the north of this bay is the "Skirmish Line." A channel connects the "Four-mile-island Bay" with a sheet of water covering about an equal area called "Malzen's Bay," into which the east branch of the river debouches its waters and affords access to the grounds from the east. West of the "Four-mile-island Bay," and connected with it by several channels, is a sheet of water covering about one hundred acres, which from the shallowness of the water and the interminable depth of the mud, is known as "Mud Bay." West of this, one again enters the maze of bog and bayou, but after wading a distance of about two miles, reaches another sheet of water of about two hundred acres called "Mieske's Bay." A mile north of this is the largest sheet of water on the grounds of the club, known as the "Big Lake," and covering about twelve hundred acres, and continuously supplied by the waters of the West Branch. From all these principal sheets of water innumerable inlets, cisterns, bayous and sloughs, bordered with sedges, flags, reeds and the various rank vegetation of the marsh, trend and wind in all directions and for seemingly endless distances, thus forming thousands upon thousands of acres fitted to the very highest degree by nature as the home of the waterfowl.

One lost in the infinite intricacies of these morasses, at the gloaming just preceding nightfall, when the myriad animal life is momentarily silent, cannot fail to be deeply impressed with the sense of utter seclusion and desolation in which everywhere pervades the place. But in a hazy autumn afternoon, when the fields and woodlands that fringe the great basin in which you stand are clothed in brown, and yellow, and crimson, and gold all around the horizon, and the western sky is bathed in the warm, soft tints of an October sunset, the desolate, uninviting picture, upon which a mere speck of water is pencilled, is lost and forgotten in the gorgeous beauty of the frame in which it is set.

It will be observed that the grounds leased by the Diana or "Horicon" Club are about 5x3 miles in extent, and cover all the open waters and channels of the marsh. Another club, with headquarters now at Milwaukee, controls all the marsh north of the Diana grounds; so that the whole marsh is preserved. A visit to the marsh shows it to be the most easily guarded territory imaginable. The ground covered by the marsh growth is too soft for a trespasser to attempt on foot, and the few channels which lead in to the shooting places can easily be covered by two or three watchmen. The club has two regular watchmen, both deputy wardens. Trespassing is practically unknown. For a time the club sold shooting permits, but even these have now been abolished, and a few guns only own this magnificent preserve. The result of all these natural and artificial conditions is that the supply of wildfowl is simply astonishing, as I shall later mention in detail. At this very point, however, it should be chronicled that, law or no law, the club never has nor will permit spring shooting. The club rules are so simple and admirable that they are herewith appended in full.

RULE 1. The open season for wildfowl shooting on the grounds of the club shall commence Sept. 1 and end Dec. 1 each year.

RULE 2. Sec. 1. No person not a member shall be allowed to shoot upon the club grounds except as a guest of some member, and then only upon a written permit issued by an officer of the club.

Sec. 2. No member shall be allowed more than one guest to participate in the shooting privileges at any one time.

RULE 3. Sec. 1. The following table will govern the time for commencing and ceasing shooting for each day, viz:

	Begins.	Closes.
Sept. 1 to 15.....	5:15	8:25
Sept. 16 to 30.....	5:25	8:00
Oct. 1 to 15.....	5:30	5:35
Oct. 16 to 30.....	6:00	5:15
Nov. 1 to 15.....	6:30	4:55
Nov. 16 to 30.....	6:40	4:35

Sec. 2. Any member violating this rule shall be liable to suspension or expulsion, at the discretion of the board.

RULE 4. No member, hired man, invited guest, or person holding a permit, shall be allowed to shoot for the market on the club grounds.

RULE 5. No one, member or otherwise, shall be allowed to bait birds on the grounds of the club for shooting purposes under penalty of expulsion.

RULE 6. No rifle, pistol, revolver or similar weapon shooting a ball at either game or targets will be allowed, and no gun of larger caliber than the ordinary 10-bore shotgun, fired from the shoulder, shall be permitted on the grounds under any circumstances.

There is no hobbledehoy business about this club. The men you meet there are gentlemen who observe only quiet and sportsmanlike methods.

But to return to the definite history of the club. The Chicago Shooting Box pursued its way very happily until death called away two of its members, Mr. Cole and Mr. Pierson. Their places were filled, but finally things so shaped themselves that it seemed wiser to turn in this property to the club, to extend the sale of memberships up to 40 out of the 50 to which the charter limits the club, to protect the lease, make some improvements and eventually to build a larger club house. In fine, this is the present policy of the club, the 40 mark has already practically been reached. The memberships are rapidly taken at the ridiculously low sum of \$150, this, with the annual dues of \$15, being cheap pay for such privileges. Little money is needed for spending on the marsh, for it needs small help to make it perfect, barring the few watchmen and the expense of a ditch or two. The revenue from the dues will soon be enough to cover the expenses of this tight little corporation. Another novel source of revenue is the "rat money." The marsh swarms with muskrats. Last year the club leased the trapping right to "Old Man Mieske," a German farmer, whose land adjoins the marsh, and who has been a great help to the club in many ways. Mieske cleared \$400 on the rat deal that year. An odd character, Mieske. He came to this spot forty years ago, when the country was perfectly wild. His fine house and barns show his success, as well as do his broad acres. He bought his farm with wild ducks, baited and slaughtered with a 4-bore. He killed 3 ducks at one shot, once upon a time. The ducks, the huts, and last of all the club men, who need teams, pushers, milk, eggs, chickens and what not, have in turn yielded golden harvest to this thrifty, dried up, but still hearty and vigorous old-man-of-the-marsh.

Connected with the club from the start, and so thoroughly acquainted with its requirements, it was natural that Mr. Percy Stone, so good an executive officer withal, should have prominent place in all this recent work of reorganization and preparation. It was Mr. Stone that shouldered the responsibilities and infinite detail of getting ready for the opening of the season this fall, and

MAP OF HORICON CLUB GROUNDS.

lowed, and the upshot of it all was that the taxes never got paid, and the land reverted to the United States Government.

Enter now upon the scene of one of those things known as a syndicate, in which Mr. Truman A. Woodford, Mr. Shepherd and Mr. G. H. Lawrence figured principally. This syndicate was known as the "Mechanics' Union Mfg. Co.," and it bought of the Government at auction sale at a price so low as 7 cents an acre a large body of the 25,000 acres covered by the marsh.

The wildfowl clung steadily to the lake or marsh all this time, paying no attention to the litigation, and within the last decade the desirability of a great wildfowl preserve here became apparent to a number of Wisconsin sportsmen. The Diana Shooting Club of Horicon was formed and incorporated, the charter members being Messrs. S. E. Davis, W. A. Van Brunt, C. A. Hart, J. B. Hayes and Geo. H. Lawrence, June 8, 1883, was the date of the club's incorporation, but on March 20, 1883, a lease had been arranged with the syndicate above mentioned, by which 5,800 acres of land, comprising the

the Chicago Shooting Box, where things were long run in a highly exclusive and bang-up style, dinner in courses, white caps on the cooks and waiters, and all that sort of thing. This comfortable club house, four rooms, with plenty of bunks and lockers for chance guests, made the only club building on the grounds. A Milwaukee and Horicon contingent built a big and roomy cabin boat, which is annually anchored at the edge of the marsh, as high up as the channel will permit, and other parties have put up shanties on the drier portions of the marshes for as may be seen by reference to the accompanying map. The latter is the personal work of Mr. Stone, and it is well done and highly useful, both to the reader and to shooters interested in this marsh. As explanatory of the map, we may quote from the club history written some years ago by a gentleman who was a member of Congress, or of the Legislature, or something, and who may therefore be supposed to be way off better able to write about it than I am:

Nearly every species of migratory water fowl known to the inland waters of North America can be found here. Mallard and

converged all the chaotic wishes of his fellow members into the happy focus of that event so eagerly awaited each year, the day of days, the "opening day." This year he had an additional and most serious source of trouble—the water on the marsh was too low to let in the boats. This occurs about once or twice in five or six years, and while it does not affect the number of ducks, it does seriously affect the shooting. About four weeks ago, therefore, Mr. Stone had a dam built across the river, just below the "first channel," about opposite the spot marked on the map as "Stony Island." The river here runs through banks of peat and muck, its bottom yards down in fairly fathomless mud. The dam was built of plank, peat, hay and mud. The river promptly burrowed under the dam, and blew a great hole out of it. This was temporarily filled, and 19 in. of water at the dam set the water back in the channels so that the boats could go in all right. This was just in the last of August, but unfortunately, only a few days before the momentous 1st, Mr. Stone got a telegram that the dam had gone out again. It was therefore with some despondency that the shooting party started for the marsh. Work on the dam was continued persistently, and on Sunday, the 30th, the leak was gotten nearly under control. There seemed to be no bottom to the mud. I saw a 16ft. fence board driven clear to the end into the mud at the dam, and the last blows of the sledge seemed to send it on down as easily as the first. No one can fathom the mud on Horicon Marsh. When this was Horicon Lake, the whole bog, rice, reeds and all, rose and floated, miles and miles of it. When the water was drained off most of the bog sank again. If the water rises the bog rises also. There are two kinds of mud on Horicon, the kind that floats and the kind that sinks. If you break through the bog while wading through the wild rice, you may sink up to your hips, or up to your waist. You may strike *terra firma* in a layer of sunken peat, or in one of the solid ledges which underlie portions of the marsh; or then again you may sink a thousand feet into the soft mud, the kind which doesn't float. I dropped my jack knife while putting out my decoys. It fell in 3 in. of water, but though I plunged my arm up to the shoulder after it, I never caught it, and think it is going yet. Study the infinite combinations of these two kinds of mud, the kind that floats and the kind that does not float, and you will soon learn that pushing a boat on Horicon Marsh is better when the dam holds.

It held all through the 1st, 2d and 3d, but the water rose all too slowly. This dam cannot be permanent. It is much an engineering feat to make one permanent that side or Horicon Ledge; but granted that, and you have the key to the prettiest shooting situation in this part of the West. We have no marsh here which approaches it. The fastnesses of the marsh protect the birds, and they are there in untold thousands. E. HOUGH.

NORTH CAROLINA GAME REGIONS.

A WAY from the immediate vicinity of the region of which I am writing comparatively little is known of the attractions offered the sportsman. Little do the disciples of William Henry Herbert dream of the paradise for the lover of sport in the Albemarle section of North Carolina, of the numberless resorts for water fowl on its boundless waters, of the endless chains of forests, abounding with deer, and bear and turkey, and of the broad fields where the quail and partridge feed. Currituck Sound has enjoyed an enviable reputation among shore shooters, long unchallenged by any rival within the United States, but of the other vast tracts of inland waters, and of the Southern home of field and forest game which has not been pounded to death by the continual hammering of the holiday shooter, an ignorance exists which is almost unjust.

The design of this paper is not to depict incidents of field life, but to afford specific information to those who care to enjoy it, consequently I shall confine myself mainly to pointing out localities which can be readily reached. To enjoy the sport in the Albemarle section one must take several days if he be from the North, but the expenses need not be heavy, as all of the points I shall mention are within a few hours ride of Norfolk, by the Norfolk & Southern Railroad or its steamers. Norfolk is connected directly by rail with nearly every portion of the United States, and by daily steamers with Baltimore, Washington, New York, Providence and Boston. The fare for the round trip from the two latter cities is \$18, by the Merchants' & Miners' steamers, and from New York by the Old Dominion is \$13. These prices also include meals and staterooms. At Norfolk the sportsman should stop at the New Atlantic Hotel, which not only provides the comforts of a Northern hostelry, but a special rate is given.

Currituck Sound, on the coast of North Carolina, undoubtedly affords the best duck shooting to be found in this country; and it does not require a greater expenditure of time and money to indulge in it than the sportsman can usually afford. All the conditions of shooting there are pleasant, for although, as in other places, there are good and bad days, still when the fowl do fly, they fairly swarm. It is nothing uncommon for a sportsman to kill 150 head of geese, swan and duck in a day's shooting. Then again there is little or no exposure or hard work about it; the points are not remote; and the thermometer rarely falls below 40°; the grasses and reeds, not being cut down by the heavy frosts as they are further north, afford natural blinds, where one can stand or sit at pleasure without finding it necessary to lie on his back; indeed, one often sits in a chair and waits for the birds. The Currituck, the Swan Island, the Lighthouse, the Narrows Island, the Palmer Island, and the Monkey Island clubs have shooting stations there. The shooting is best during the winter months, and in the main is done from a blind, a battery, or over decoys. Snipe shooting in the marshes is very good in season, and the forests are full of deer and bear. The route to Currituck from Norfolk is by the Norfolk & Southern Railroad to Snowden, the fare is \$1.20, then by stage to the shooting grounds. Board is \$2 per day, and the use of a boat and decoys about the same.

At Snowden the fields are always filled with coveys of partridge. This year the birds are unusually plentiful. Indeed, they are almost as numerous as English sparrows in Central Park. The law is off Nov. 15. Living is reasonable, about \$2 per day.

From Snowden one also enters the Dismal Swamp, where

deer and bear hide. Deer are very plentiful this year, and bears so unusually promiscuous that all the farms are posted with danger signs warning the sportsmen to look out for the bear guns which are planted in every conceivable locality.

Narrow Shore, Church's Island and Collington Island are most readily reached from Shawboro, which is 35 miles from Norfolk, fare \$1.30, on the Norfolk & Southern. The first two are best for duck, geese and swan, while Collington Island presents unusually good opportunities for the killing of deer, which, as I have said before, are very plentiful this year.

At Elizabeth City, 44 miles from Norfolk, on the Norfolk & Southern, fare \$1.70, the grounds lie adjacent to the town, and snipe, squirrels, partridges, duck, fox, deer and bear are abundant. Fox driving is a very popular sport. The new Albemarle Hotel provides the best of accommodations at \$2 per day. Bear hunting from boats in the Pasquotank River and Dismal Swamp Canal is very good.

Nag's Head, reached from Elizabeth City by the steamer Neuse, which, by the way, is an ocean steamer, fitted for ocean travel with its necessary accompaniments, presents good all-around shooting all the year around. In the season, snipe, curlew, willet, duck, geese, brant, swan, rabbit, squirrel, deer and bear offer excellent shooting. At Okisko, 53 miles from Norfolk, on the Norfolk & Southern, fare \$1.95, squirrel, partridges, coon and bear are found. They are also prevalent at Winfall and Yeopim.

At Avoca, on the Chowan River, near Edenton, and reached by the Norfolk & Southern steamer Roberts for \$3.70 from Norfolk, can be found nearly all game. Turkey is especially abundant. Bear and deer also offer excellent sport. Dr. W. R. Capehart, who has there a plantation of several thousand acres, can furnish all particulars.

An excellent inn has recently been erected at Bell Haven, on the Norfolk & Southern, for the express accommodation of sportsmen. It is 113 miles from Norfolk and the fare is \$4.05. Good waterfowl shooting may be had thereabouts; but deer are the attraction this year. Fourteen were shot in one day by two men recently.

No man who has not visited the Albemarle section of North Carolina can have any conception of the plentitude of game. During the winter months the streams are alive with waterfowl. In the fields and forests is game without limit. No great judgment is required in selecting a good spot, for the game is there, and any one who can pull a trigger can find satisfactory sport.

FRANK A. HEYWOOD.

THE CHATHAM ASSOCIATION.

Editor Forest and Stream:

Your readers have been advised from time to time of the very commendable and successful efforts of the Chatham Fish and Game Association to restock the lands in the Upper Passaic Valley with game birds and the river with game fish and prevent illegal shooting and fishing. The association is an incorporated body, and the statutes of New Jersey give power to members of fish and game protective associations to arrest without warrant any parties found illegally trespassing in shooting and fishing. It may not be known, however, to many of your readers that the laws of New Jersey also forbid the shooting on such territory by any one not a resident of New Jersey. The penalty is exceedingly severe, being not only a fine, but imprisonment and confiscation of guns.

The territory included in the reservation of this Association lies in the townships of Hanover, Livingston, Millburn, Summit, Madison, Chatham, New Providence and Passaic. The lands have been thoroughly posted with "No Trespass" notices, and printed condensed statements of the game laws have been widely distributed. We learn that it is the intention of the Association to defend fully the rights given them by the statutes and through their contracts with land owners. It will therefore be wise for those who are now arranging for localities to be visited at the opening of the season to seek other points. We are heartily in sympathy with the course pursued by the Association, which seems to be the only effective way of restoring to the lands and waters the old time abundance of game and fish.

A large number of quail were turned out in this territory last spring and numerous coveys have been seen daily during the summer and fall, but the number that may be shot by any one member has very wisely been limited. The Association is in a very flourishing condition. It has raised among its members a very large sum of money for further stocking the lands and waters, as well as for the erection of a commodious club house. The contracts for the erection of the building have been let. Its location is very central and extremely convenient for members and land owners. It is situated on Fairmount avenue, opposite the station of the D. L. & W. R.R. at Chatham. JERSEY BLUE.

TO MASSACHUSETTS SPORTSMEN.

PARTICULARLY OF MIDDLESEX, NORFOLK, PLYMOUTH, BRISTOL AND BARNSTABLE COUNTIES.

THE Massachusetts Fish and Game Protective Association, in its efforts to restock the public shooting grounds of this State, last spring loosed 250 or more pinated grouse (prairie chickens) in different parts of the above mentioned counties.

From reports received thus far it appears that the birds have thrived so well that at the present time there are probably at least 700 to 1,000 scattered throughout the eastern portion of the State; and without doubt many will be seen this fall by sportsmen.

The association, through its committee, most earnestly requests that every sportsman let go unshot at, any of these birds, thereby helping toward success a work being carried on entirely by private subscription for the benefit of every person in the Commonwealth who loves a gun. If not molested for a few years a splendid addition to our game will result, and Massachusetts will be the only State on the Atlantic coast where sportsmen may find this kind of game.

Nothing except failure can be expected, however, unless every sportsman shall aid in protecting from harm these birds now for the first time in this State for over 150 years. Give the birds a chance to live.

HENRY J. TRAYER, Sec'y of Committee.

BOSTON, Sept. 28.

MAINE'S BIG GAME.—We referred the other day to a letter written by Mr. E. E. Harlow, of Greenville, Me., in the Bangor News, stating that several moose, deer and caribou had been wantonly killed in the vicinity of Moosehead Lake, by persons undetected. The News returns to the topic, and says: "From a personal acquaintance with Mr. Harlow, the News knows him to be the soul of truthfulness. He has been around Kineo and Greenville for several seasons past, and knows a majority of the guides intimately. Hence, he is not liable to be imposed upon by 'hunter's yarns.' The inference is that he was rightly informed, that the guides saw what they reported, and that Mr. Harlow consequently gave a correct account of actual events. Since printing Mr. Harlow's communication, the News has taken pains to ascertain how far the law is violated in the Moosehead region, and while it is not ready to publish all the details learned, enough was found out to show that Mr. Harlow's report did not half tell the tale of illegal slaughter that is practiced in that vicinity. Employees of the Bangor & Piscataquis Railroad state that deerhounds and foxhounds are constantly going 'up Moosehead way,' and that the owners of these dogs declare openly they are going to dog deer. Names of parties who keep dogs at Greenville for the purpose of chasing moose were also given, and many other valuable pointers to show where the law breakers hide. The same story with variations comes from other parts of eastern Maine. The name of a sporting rendezvous at Chemo where dogs are kept to run deer has been given to the News with other particulars that would be of value to, and is available for any honest game warden in the State. THE FOREST AND STREAM, with the instincts of a true sportsman, would be glad to learn that the reports are exaggerated. So would the News; and while the News is practically convinced that the reports are true, it still waits, hoping to hear of arrests for law breaking, or, what is better still, a cessation of the most unholy practices that now prevail. The State of Maine is a grand old State. It is full of brave, law-abiding men and noble women. It is a shame, the News confesses, that there are cowardly lawbreakers who lay claim to citizenship. Yet it is a lasting shame and disgrace to the game commissioners and wardens to allow such deeds to go on from year to year without making a vigorous attempt to bring the offenders to justice. In conclusion, the News requests all persons who know of parties who are violating the game laws of this State to send full particulars to this paper. The names of those sending the particulars must accompany every letter, but will not be used if the writers desire to remain unknown. It is time that the pirates of the forest were shown up. They have ruled the State too long."

WAYS OF THE RUFFED GROUSE.—The ruffed grouse behaves at times in so strange and unusual way as to lead the most experienced observer and keenest student of woodcraft to wonder what its motives are. While in pursuit of this bird, in company with my brother, I was walking on a pasture land along the edge of a woods and had stopped at a point I deemed favorable, my brother being at the time some distance within the cover, when a grouse started. The bird flew toward me, and making a rapid swerve alighted on the greensward directly in front of me, just outside of the woods. He certainly was not over 25ft. away. As soon as he lit, as is their habit, he straightened up, and turning his head from side to side, looked around him. On the impulse of the moment without thinking, being somewhat excited perhaps, I drew up, and without taking aim fired at the bird. I had now done an unsportsmanlike act, and yet I had not shot a grouse on the ground. For strange to say not a shot had hit the bird. The whole charge went over and tore to atoms the foliage behind him. When I took the gun down there was the bird as before, he had not moved a particle. Thus we stood looking at each other for about a half minute, when my brother having heard the report of the gun, approached, the bird turned his head at the noise, and then taking a few steps flew and like a bolt disappeared through the foliage. When my brother came up I related the incident to him, and it was his opinion that the grouse remained after I had shot at him because he was paralyzed with fear. Was this the fact? or was it courageous conduct, combativeness? or was the bird fascinated by the sound of the gun? I leave the reader to decide this point and add another to the ways of this mysterious bird of the woods.—DORP.

HUNTING DEER WITH BIRD DOGS.—Portland, Ore.—Clear out here (at so near the "jumping off place" that we smile when reading of people going out into the far western wilderness of Montana or Dakota, which to us seems a long way east), I wish to echo the request of "Aztec" that we may hear more from "H. L." or others who know anything about still-hunting deer with bird dogs. Although it is hardly necessary in this comparatively little hunted country to use a dog, yet a dog companion is naturally desirable. Especially is it the case with one who as myself much prefers hunting alone rather than with human company, cronies excepted of course. Now, if we can train our faithful bird dogs to assist us in locating close game or in tracing the trail of wounded "meat," cannot we all see how much more of a fellow feeling and love we may justly claim for our glossy chum of the silken ears?—LOUIS B. AKIN.

HAMMERLESS GUNS.—The reason why I mentioned hammerless guns as being dangerous was that many persons are apt to be careless in their use on account of their fancied security, not that I intended to hint they were insecure because of their mechanism. A gun, no matter what make or character, should, like the working end of a strange mule, be treated with consideration.—REIGNOLDS.

FOR "CHICAGO AND THE WEST," see page 221.

ONE MOMENT, PLEASE.—Do you contemplate visiting Dubuque, St. Paul, Minneapolis, Marshalltown, Des Moines, St. Joseph, Leavenworth, Kansas City, or any point in the Northwest, the Puget Sound region or the balmy South or Southwest? The Chicago, St. Paul and Kansas City Railway will furnish you transportation enabling you to safely, quickly and comfortably reach your destination. Its splendid equipment and excellent management have made it a popular favorite. F. H. LORD, General Passenger and Ticket Agent, Chicago, Ill.—Adv.

A BOOK ABOUT INDIANS.—THE FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—Adv.

WORCESTER, Mass., Sept. 26.—At the meeting this week of the Worcester Fur Company the following names were proposed for membership: Arthur C. Moore, Sturbridge; D. F. Joslin, M. A. Moffit, H. M. Ingraham, E. J. Bates, A. L. Joslin, Oxford; H. C. Newell, Ashburnham; W. P. Brigham, Boylston; F. E. Harrington, West Brookfield; Samuel Smith, Wilson White, Hopkinton; E. W. Gill, Princeton; Byron Stewart, Millbury; W. L. Taft, Whitinsville; Chas. Crompton, H. W. Wyman, Harry W. Smith, Gilbert J. Rugg, W. B. Gage, Col. H. B. Verry, Chas. A. Merrill, Milton Rand, Chas. A. Allen, Asa R. Jacobs, Oliver A. Benoit, J. Henry Locke, Jos. A. Smith, C. Harry Morse, of Worcester.

AN INDISCREET BRAGGART named Helm, of Hartford, recently boasted in a Chicago shooting paper that he had been out shooting on Sunday and had eluded the vigilance of Game Warden Collins. Now, Mr. Collins lives in Hartford, and it was not to be supposed that he would let such a case as this go by default; he haled the Sunday game killer into court and compelled him to put his helm hard to starboard with fine and costs as in such cases provided.

MR. AUSTIN CORBIN sends us a map of Blue Mountain Forest, his extensive wild game park in New Hampshire, which was described at length in these columns last spring.

COONS AND COON HUNTERS.—The season is drawing when the FOREST AND STREAM will have another full page (and perhaps a column or two more) for the coon hunters.

The Book of the Game Laws.

A WORD WITH THE ADVERTISER.

THE question is often asked: **What Makes the Best Advertising Medium?** The answer generally given is: The best advertising medium is the one which places the advertiser before the largest number of the right sort of people in the way best calculated to produce the effect it is desired to produce and at the smallest cost.

This is just what the *Book of the Game Laws* does for advertisers of sportsmen's supplies.

I. There is no waste circulation among those who are not sportsmen—every copy goes where it will do most good.

II. Advertisements are placed opposite fresh reading matter, where they will be read.

III. The *Book* is kept for reference and the adv. thus exerts a lasting influence upon the purchaser.

IV. The advertising rates are reasonable.

Write to us about it.

FOREST AND STREAM PUBLISHING COMPANY,
318 Broadway, New York.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

FISHING WITH TRAINED CORMORANTS

By CAPTAIN F. S. DUGMORE, R. N. R., Master of the Falconry Club 1878 to 1883.

[Continued from page 186.]

CHAPTER I.—HOW TO PROCURE CORMORANTS FOR TRAINING.

WITH the foregoing preliminary explanations, I will now pass on to consider the practical questions that present themselves at the outset to the would-be cormorant trainer. In the first place, following the precedent set by Mrs. Glass in her well-known directions for cooking a hare, I will tell him how to obtain the birds for training. If he is sufficiently ambitious and self-confident to go to work at once with old-caught birds, there is no difficulty in getting them. It is only necessary to ascertain their favorite resting places in any tidal estuary; usually the summits of isolated piles, stakes or beacons, or—not quite so convenient for our purpose—a channel buoy. A large steel trap without teeth, or with the teeth thoroughly well masked with tow, oakum or sacking, as indeed even toothless jaws should be, and concealed by a little seaweed, will quickly supply our needs. The trap must have a line attached of sufficient length to allow it to fall into the water, or the bird's legs may be broken in its struggles. The best style of trap is that used on poles for catching hawks, with a semi-circular spring round and under the table, instead of at the side. But the ordinary rabbit or fox pattern will suffice for use on a buoy, if large enough. I always use very large traps, made especially for me in Birmingham (England), as if too small a toe may be taken off or the web injured. A noose, if cleverly set, can sometimes be used with advantage. Or if the water be muddy and opaque, a trammel net can be set beneath the surface round the resting post or buoy, off which a cormorant, when scared, will sometimes slip into the water and dive at once without taking flight. This net, however, must be closely watched, or the bird will be drowned if not promptly extricated. A dollar or two judiciously disbursed will often get a wild cormorant brought home uninjured by fishermen in whose nets he has got entangled. In fact, an unlimited supply of the old birds can be procured almost anywhere and at any season.

With the young birds it is very different.

The breeding places must be ascertained and visited at the right moment, and a supply obtained in the spring sufficient to cover possible loss by casualties of various kinds that are pretty sure to happen before next breeding season comes round.

In the North the dangerous ledges of precipitous cliffs must be visited for the young birds, while in the South, especially in Florida, the cormorants nest (toward the middle of April) on low trees, mangroves and other brushwood growing out of the water in some secluded bayou, generally very easily accessible. North and South alike, they breed together in large and unsavory numbers, in "rookeries," as their colonies are named in Florida; one such breeding place will probably accommodate for domestic purposes all the cormorants resorting to a stretch of fifty or sixty miles of coast.

The young birds should not be taken until nearly fledged, with black feathers showing plentifully through the white down of the infantile period of their existence.

Supposing that the embryo trainer can procure old or young birds with equal facility, it will be well for him, before deciding, to consider well the comparative advantages of devoting his energies to old-caught birds or nestlings. He must remember that nestlings are much the easier to tame, wild birds by far the easier to train, after the indispensable preliminary of taming has once been got over. And old-caught birds are generally much the best and most intelligent workers, though I have had nestlings that could not possibly be surpassed.

Nothing in the world can be easier than the taming of the young birds; in fact they tame themselves, and rapidly become even troublesomely affectionate and familiar. The only difficulty comes after they have learned the lesson of obedience, and consists in teaching them to catch fish. This difficulty disappears if their owner possesses even one bird that has previously gone through this very necessary part of his education, as his companions will very quickly learn to follow his example; in no birds is the spirit of emulation more strongly developed; so that an efficient working team can always be kept up, and strengthened from time to time without any difficulty, so long as one properly trained bird and good worker remains on hand. I consider it quite worth the while of a novice in the art, who does not care or feel competent to work ordinarily with wild-caught birds, to keep one or two of them, even if only half trained and scarcely manageable, solely for the purpose of saving many an hour from being lost in teaching the young birds how to fish.

Half-trained wild birds that cannot be trusted in open waters may yet be worked with success in small ponds or in narrow brooks. One objection to them is that they do not take to changes of diet quite so readily as young birds; this may be rather awkward in localities, few, I believe, in America, where the fish supply is apt to run short, rendering a temporary recourse to butcher's meat unavoidable.

For myself, I infinitely prefer the old-caught birds (a similar rule holding good in falconry), while notwithstanding counselling the average beginner to go in for nestlings (when procurable), with which his ultimate success, though much longer delayed, is an absolute certainty.

I once trained a wild green cormorant so rapidly that I took fish with him in the Frome River in Dorset, England, a fairly broad stream, as old country rivers go, just forty-eight hours after his capture. This I believe to be the fastest thing on record, and possible only in the case of a particularly good-tempered bird, and with a trainer like myself, able to read the bird's thoughts and to communicate his own.

CHAP. II.—TREATMENT OF YOUNG BIRDS; TRAINING TO THE DINNER SIGNAL.

We will now proceed with the management of the young birds as soon as taken from the nesting-place.

The best possible place for them is a pig-stye, or a little yard or pen arranged like a pig-stye—if paved, so much the better—with a shelter at one end in case of rain and a few large stones for the birds to sit upon, sufficiently high to keep their tails well clear of the ground. With a fence of upright laths, planted close together, clear of any horizontal supports inside, there will be no fear of their climbing over for some time to come, at any rate. If they do get over they will make a straight beeline for the kitchen, where their presence will scarcely be appreciated, their habits not being so scrupulously cleanly as might be wished, and their odor being about as musky as the scent of an alligator.

The first thing is to give them plenty to eat—failing fish, meat without bone or fat, bullock's heart, or occasionally bullock's liver—until their feathers shall have finished growing and their bones shall have become well-knit, the utmost pains being taken to promote the greatest possible development in size and strength. They should be fed, at first, three or four times a day, at least, with a gradual reduction to twice a day, morning and evening.

On no account whatever are they to be allowed to get into the water for a moment until all the white down has disappeared; the result would probably be quickly fatal. When first taken from the nest the less they are on their legs the better; so long as they will be contented to lie still and open their mouths, convenient pieces of fish cut into long strips, clear of fins and sharp bones, should be quietly slipped therein.

When, however, they begin to walk about and to look out for their feeder, it will be time to commence their training by making them acquainted with a call meaning "dinner," and, simultaneously, with the basket or metal can into which they will eventually be required to surrender the fish caught by them for their master's benefit.

It is important that their infantile minds should be early and permanently impressed with the idea that this basket, can or pail, answering to the "lure" used in falconry, represents their dinner table.

Most trainers use a wicker fishing basket, but a resonant metal pail or can of fishing basket shape, something like a live bait receptacle but larger and much deeper, possesses the very great advantage that a loud tap on it will always serve as a dinner-bell; and on working days will generally bring the laziest or most inattentive and disobedient bird helter-skelter to the bank. As a compromise, a tin pot, for the purpose pure and simple of noise-producing, can be attached to a wicker fishing basket.

The vocal call used at feeding time and invariably repeated loudly while the trainer is approaching their inclosure with food may be "Come along, come along."

FIG. 1.

Or a peculiar whistle may be used, but with less advantage. Arrived at the pen, morsels of food should be taken out and dropped back into the basket or can in full sight of the young cormorants while the call is being sounded and the vessel noisily rattled; a piece of fish may be thrown to each bird, to be cleverly caught with open

mouth and outstretched neck; and then the food receptacle, again rattled loudly, should be lowered among the eager throng, who will very speedily empty it without further assistance or persuasion.

I should have premised that the scissor-like edges of a cormorant's beak are capable of inflicting a very nasty gash, perhaps accidentally in the general scrimmage for food, and that the trainer should on this account be provided with a strong pair of thick leather gloves or gauntlets. Horsehide is preferable. The hooked end of the upper mandible, too, is apt to give a severe scratch or tear if the bird should chance to strike at the face or eye. Nearly all cormorant trainers are in the habit of protecting themselves by a wire fencing mask; in fact I imagine I am the only European member of the fraternity that has never adopted this precaution, preferring to make myself sure of the bird's good will—I may say affection—for except the goshawk, the cormorant is perhaps the most affectionate of winged beings—before allowing it to perch on my arm within dangerous distance of

FIG. 2.

my face. I have never met with the slightest accident in this way. Still I should be slow to advise less experienced trainers to risk an eye, which could be lost much more quickly and easily than it could be replaced.

All this time, while the young cormorants are getting their feathers, they can be gradually accustomed, at feeding time only, to more or less handling, always about the head, beak and neck.

Thus, if one bird is observed to be crowded out and unable to get his head into the food receptacle, an outstretched right hand may with advantage meet his eager head, just touch the upper mandible, glide over it and over the crown of his head, gently seize him by the neck and raise him on to the left fore-arm, presenting him with a delicate mouthful of fish before he has time to understand or protest against his sudden elevation. And so, in the course of a few days, it will come to pass that a motion of the helping hand will be eagerly looked for, and met by a general clamor of "Lift me, too!" in cormorant language; the fortunate bird often coming in (after the manner of humans) for a jealous bite or so on being relegated from the post of honor back into "the madding crowd."

All this takes some time and trouble to explain, because I am anxious that my pupils should thoroughly comprehend the *rationale* of all that I ask them to do—a perfect acquaintance with the *why* and the *wherefore* is the surest foundation for proficiency in any art, and, above all, in one dealing with highly intelligent living creatures; but the beginner will find it all wonderfully plain (and quick) sailing when he comes to put it in practice. It is necessary for me to tell him *precisely* how to touch or to lift the bird, to save him from the mistake of roughly collaring it by a wing, round the body, or by goodness knows what part that might first present itself to his grasp; with the result of a scrimmage, possible injury to both parties, and consequent certain loss of just what we want to gain and keep at all hazards, the bird's confidence and good will—I might add, self-respect.

A cormorant must never be laid hold of excepting by the beak and neck. In grasping the neck the palm of the hand should lie on and cover the entire top and back of the head, leaving the eyes clear; the fingers, excepting the forefinger, bending round under and behind the lower jaw, and the thumb pointing down the neck, the back of the hand always upward. (See Fig. 2). While so holding it a slight caressing motion of the fingers can be employed to tickle the bird about the ears, the surest method of appealing to the affections of all feathered beings that will permit of the liberty being taken. Singularly enough, while *falcons* (long-winged) will rarely, if ever, allow this familiarity, it is used with ease and with the greatest advantage in the training of *hawks* (short-winged). When the feathers are fully grown it will be necessary to decide whether or not to cut one wing. In the case of old-caught birds this is, unfortunately, *de rigueur*. With nestlings it is quite optional. They will never fly away, or, if they do, will speedily return. Its only advantage with them is that it prevents them from taking liberties, that in the exuberance of their affection are apt to become somewhat overpowering and embarrassing.

It is all very well taking our walks abroad with a mob of clamorous birds thronging round our legs like a flock of geese, but when it comes to half a dozen great lumbering fellows with flapping wings alighting for the perch of honor on one's shoulders, or on top of one's head, a man's equanimity is not always quite on a level with the occasion. Personally, I have such a horror of interfering with beneficent and always beautiful nature, or of crippling, however slightly, the powers given by nature, that I always leave some at least of my nestlings in full possession of their means of flight, and put up with such trifling mishaps as getting my hat occasionally knocked over my eyes by their unintentional buffets. If, however, it is decided that the quills of one wing are to be cut, it should be the left, always supposing that the trainer means to follow my own practice of carrying the bird on the left arm, leaving the right free to handle the head and neck, and to parry any little playful dashes at the face. Cut quills on the right wing would mean a left cheek constantly scratched instead of lightly brushed.

[TO BE CONTINUED.]

ADIRONDACK TROUT.—Wawbeek Lodge, Adirondacks. Wawbeek, N. Y., Sept. 26.—Trout fishing in September was certainly shown up at its best on the 15th of this month. Mr. R. L. Banks, Jr., of Albany, stopping here, caught 10 lake trout, weighing 66lbs., in five hours time, the largest weighing 13½lbs. This is the largest catch made in the given time in the Adirondacks this year.—T. EDMUND KRUMHOLTZ.

CAMP LIFE ON MUSKOKA LAKE.—II.

(Continued from Page 32.)

THE next morning the sky looked very threatening, and it was a question whether it would be policy to strike camp or wait until more favorable weather. "Heads we go, tails we stay." We went, and the weather was with us. It was a hard paddle, for the nearer we got to the mouth the thicker the logs became. Turning one of the river's numerous bends, we sighted the little shanty that gives shelter to the lone logman who guards the cut; as we slowly crowded our way toward the opening a figure emerged from the hut, and then there arose in the air a yell, such a yell, a combination of a war whoop and the cry of a catamount. I have heard many try to imitate it, but none to equal it, it is the sole accomplishment of Johnny the Frenchman. There is no affectation there as he calls out, "Gentlemen! Gentlemen! I am glad to see you." We are soon on land shaking hands and comparing notes with Johnny.

Bidding good bye to Johnny, who had thrown a couple of nice pickerel into the canoe from his well-stocked fish pound, we made our way through the cut and into Muskoka Lake. Skirting the shore, we made for a bluff about a mile further up, where we expected to pitch a temporary camp, for our intentions were to go back to the shanty as soon as the logman left. The bluff made a poor place for a camp, as it had no trees of any size and caught the full benefit of the wind which is so prevailing on this lake; but the mosquitoes did not bother us, on account of the wind.

Early next morning, after breakfast, we took one of our American flags and climbing to the top of a solitary pine which guarded the door of our tent, tied it to the topmost branch, thinking that if any Yankees should pass by they would be more likely to give us a call. While here our butter was procured from a farmer, if I may call him such. He is the owner of one thousand acres, of which about fifteen are tillable. Living up the river about three miles, he keeps his cows down at the lake; and each morning and evening rows down the river, makes a portage into Mud Bay, and from there over to the point where the cows are. One would think this was farming under difficulty, but the old man don't mind it, as the boys row the boat and milk the cows, while he sits in the boat and smokes his pipe.

Before many days we came to the conclusion that it would be necessary to look for another camping ground, as the wind sometimes made it almost impossible to cook a meal at the stove. We settled on the southern point of an island about two miles from shore, it seemed to fill all the requirements needed, and later on confirmed our good judgment, for we stayed there during the length of time we were in camp. The island was called Gowan's after its owner. Years ago he had built a cottage on the point where we intended to pitch our camp; but the cottage had gradually fallen to rack and ruin. On the east side of the island high rocky points ran out into the lake, affording excellent fishing grounds. A small wharf had been built near by in front of an intended camp, but like the cottage was gradually falling to pieces. It was not long before we had here an ideal camp. The tent was pitched under the trees about 30ft. from the water, on an elevation of 5 or 6ft.; as we lay on our cot at night we could hear the waves dashing themselves on the rocks at our feet.

One morning while getting breakfast we sighted a boat making around the point of Big Island, about three miles down the lake. As she drew nearer we recognized the Bertha May, the only tug on the lake, and owned by one of the lumber firms, who use her for towing logs and scows of lumber from their different mills. Seeing she was headed for our camp we went down to the old wharf to give her a welcome; as she drew nearer they recognized us by our canoe, and toot after toot of the whistle rang out, proclaiming they were glad to see us once more among them. The Bertha is soon tied to the wharf and we are shaking hands with our old friends, Capt. Bill, Old John the engineer, Jack the cook, and Bob and Hank the hustlers. They tell us they came up after a couple of bags of logs to take to the company's mills at the southern end of the lake, but as there is a head wind blowing they will not be able to do anything until it calms down, so we spend a pleasant afternoon lying in the shade and listening to the stories for which Old John has a remarkable memory. We have heard him tell hundreds of yarns and no two alike; whether he makes them up as he goes along or draws on his memory is a question which he refuses to answer. The Captain told us before leaving that he heard there was going to be a dance on Friday night at a settler's house about twenty-five miles up the lake. He would try and arrange things so they would be up after a big log on that day; and (with a wink of his eye) if there was a head wind we would go up to the dance.

Friday afternoon came and with it the Bertha May. The captain decided the wind would not allow them to start out with a tow, so it was agreed we should go to the dance.

The crew shaved and cut each other's hair; jumped in the lake and had a swim, and then were ready for the "blow-out." We started about 6 o'clock, and had not gone far before the captain made a proposition which showed had been a financier instead of a tugboat captain he would have made a grand success. It appears that at a dance of this kind whisky is as necessary as a cake at a wedding; so the captain proposed running into Prouse's, where a supply could be bought, and getting a gallon jug filled; then he was going to take about half of it out and fill the jug up with water. When we would get to the dance they would all want whisky; we would then take up a collection, return part way to Prouse's, and bring them back the gallon jug, while the boat would have the two extra quarts of pure whisky for nothing. All thought this a pretty good scheme, so the whisky was bought, divided and adulterated; but when we got to the dance and came to take up a collection, not a picayune could be raised; so the tug had a supply on hand which lasted them the entire season.

We arrived about 9 o'clock and found the dance going on in the barn, this being much larger than the house, which was a one-room log. A few lanterns hung up on convenient nails furnished light for the two sets of dancers who had the floor. We saw at a glance that there was a scarcity of the gentler sex; the contingent comprised six forlorn maidens; and one of the sets was danced *à la stag*. About two dozen fellows were

standing in front of the big barn doors watching the dance, while another dozen were scattered around the barn, sitting on plows and fanning mills. The next set saw the crew of the Bertha May in line; they had taken time by the forelock by asking the maidens for the next dance while they were still dancing in the first set; we found that this was quite the proper thing, for we noticed the Bertha's people held the floor for the next two or three dances. Will and I soon joined the crowd at the door, and found them indulging in society topics, such as the amount of hemlock bark Pete Brown was getting out, etc.

We struck up an acquaintance with a young fellow, who asked us if we had a bottle; we replied in the negative; he then asked us if we were hungry, a question which only has one answer in that country. He said he heard there was going to be a "feed" later on, but he doubted it, for if there was there would have been something said about it before this, but perhaps we had better go down to the house and see for ourselves. So to the house we went, where we found the room occupied by a woman and a couple of men, while a baby lay asleep in a rude cradle near the stove. A bedstead in one corner, a dresser with some crockery on it in another, and a few chairs and table comprised the contents of the house. On the table were a few pies and something else which looked like sandwiches. We noticed that our friend kept near the table, while we talked of the weather, the high water of the lake and other leading topics; but not a word about pie was said. Will became discouraged and proposed going back to the barn to see how the dancers were getting on. After we got outside our friend began to abuse the folks about inviting people to their dance and not offering them anything to eat. "Why," said he, "if a fellow did not keep his eye peeled he would have to go hungry." With that he produced a pie from underneath his coat. Making an equal division, we left the plate on top of a stump, and made our way to the barn where our friend informed every one that supper was ready, and they wanted the crowd at the house right away. They needed no second invitation.

Will and I did not want to see what the outcome was but made for the tug, where we crowded in a couple of bunks and were soon fast asleep. How long we slept I cannot say, but we were awakened by loud talking on the shore; going on deck we found the crowd down by the side of the tug and it looked for a short time as if there was going to be a general fight. During the supper numerous bottles had been produced, with the result of Hank and another man stirring up a quarrel of old standing. About a year before Hank had lost a deer hound; several weeks after it was found dead, shot through the body, lying in a piece of timber belonging to this man. He denied shooting the dog, although he said he had shot dogs for running deer out of season and would have shot his had he seen him. We finally got Hank on board and casting off our line started back for camp. It was so dark we could hardly see our hands before us, but it made no difference to the Captain, who seemed like another man as soon as his hand touched the wheel. Crowding on all steam, the little tug made her way through narrow channels, twisting in and out among the numerous islands, rounding points which seemed to stretch across our path, threatening destruction to crew and boat alike. Whether the Captain steers by instinct or not we cannot say, but he claims to be able to navigate blindfolded the lake from one end to the other. It was after 3 o'clock when we arrived at camp and it did not take us long to turn in. Next morning when we arose the Bertha May and her tow were not in sight; they must have pulled out a short time after landing to enable them to get the start that they had.

We began to notice the fish were not biting near so freely as they had been. Johnny, the Frenchman, claimed it was on account of the low water, the lake having fallen over 2ft. since our arrival. We have been doing most of our fishing with the troll, catching principally pickerel, and we knew from experience that as soon as they stopped biting the bass fishing would improve, which turned out to be the case.

For a steady fish diet we would prefer the pickerel to any other fish we ever ate. During the twelve weeks we were in camp we had fish once and very often twice a day, and can truthfully say the last meal was relished fully as well as the first. For the other nine months of the year we never have any desire for fish, and should it be placed on the table the chances are it would go away untouched. There are several reasons for this, the appetizing zest of the camp life, and the freshness of the fish being the principal ones. Fish caught at night and kept until morning taste altogether different from those caught, cleaned and put into the frying-pan before they are done kicking.

Day after day went by, each day having some new adventure to distinguish it from the rest. Some mornings we would start out with our tackle to be gone all day, exploring different parts of the lake, trying new fishing grounds, filling a pail with huckleberries from some small island, or lying in the canoe and drifting with the wind.

The Bertha May was often tied up at our camp, one time waiting a day and night for a change of wind. The nights they were with us Johnny would come over from the mouth, and we would all gather around the cheerful blaze of an immense camp fire, while old John would spin his yarns, the Captain would play the fiddle and Johnny wake the night with his fearful yells.

Johnny was a great character, take him all in all. Having a mixture of French-Canadian and Indian blood, he was superstitious, and had an utter disregard for the truth, especially in his fish and hunting stories. Never have I seen him throw his hook in the water without carefully spitting on it. He also carried a bone which he claimed was taken from the back of a sturgeon caught while the moon was at a certain fullness, and this he carefully rubbed on the spoon before starting out for a troll.

THE PRIZED GRAYLING, of Michigan, is by no means extinct. One of our Michigan correspondents reports "some good times with the grayling, too. Do not know as I said anything to you about that. Was up on the Manistee River twice and had good success each time. I have taken several large grayling this year, two that weighed 1½ lbs. each, and one that weighed good plump 1½ lbs."

SOUTHERN CALIFORNIA ANGLING.

THE devotee of the art of angling may find very satisfactory sport in several of our streams. While in northern California all mountain streams are tributary to streams flowing into the Sacramento or San Joaquin and thus afford a passage to the sea during at least a portion of the year, the streams of southern California never reach the sea except during the winter freshets in volume large enough to be passable for spawning trout. During these freshets the streams are very muddy and move with great velocity, the fall from the foothills of the Sierra Madre being 1,400ft. and the longest river course, the Santa Ana, not exceeding 70 miles. During the spring and summer the water is nearly all taken for irrigation and the remainder sinks in the loose sandy and gravelly soil of the various wide valleys which lead to the sea. There are, however, two streams—the Santa Inez and Santa Clara—which are passable for trout at all seasons; they drain the western spur of the Sierra Madre—the Santa Inez mountains. In all of these rivers the trout are uniformly the rainbow (*Salmo irideus*) with variations on account of location, which I shall now detail. The trout in the Santa Inez and Santa Clara, whose tributary—Sespe Creek—is supposed to be one of our best fishing streams, are coarser in meat and have larger scales than elsewhere in southern California. The trout average about 6in. in length, very rarely reach 8in. and are extremely wary. In the main range of the Sierra Madre the Arroyo Seco, San Gabriel River, San Antonio Creek and Bear Valley Reservoir, with its feeders, are the principal resorts for anglers. The largest and longest running of these streams is the San Gabriel; its greatest width is about 50ft., depth possibly 4ft. in summer stage, and its bed is filled with immense granite boulders, between whose shady shoulders, in deep pools, the knowing and agile *Salmo* finds a home. As in the Santa Clara, the trout are small, but are said to furnish capital sport. In all, the fishable branches of the San Gabriel comprise about 30 miles of the toughest climbing to be found in this vicinity, noted for its precipitous granite mountains. But when we come to Bear Valley Reservoir, we find the rainbow at his largest, and epicures say, too, that his flavor is in proportion to his size. This reservoir is maintained for irrigation purposes, and supplies 50,000 acres of land. It is an artificial lake, formed by building a rock wall across the course of Bear Creek where it flows through a gorge 300ft. wide. The depth at the dam, which is constantly overflowing, is 53ft., gradually diminishing toward the upper end of the lake, which covers 4,000 acres. There is plenty of food for trout in the reservoir. Its water supply is constant, plentiful and icy cold, so with no cares to fret him the trout grows very large and lazy. The largest so far caught weighed 13½ lbs., and individuals of 7 and 8 lbs. are quite usual. They do not vary much in appearance from the smaller trout of the running streams, and are said to maintain all their delicacy of flavor. Fishing in the reservoir is by permission, so the fish are protected from indiscriminate slaughter. The close season for trout is from Nov. 1 to April 1. Besides trout fishing, the sea fishing at the present time is excellent. Good catches of barracuda and Spanish mackerel (*Sarda chilensis*) are made daily. The yellow-tail (*Seriola dorsalis*) is just coming in. Good catches of rock cod (*Sebasticthys*) and bass (*Serranus clathratus*) are made from the rocky points along the shore. The best season here is usually from Aug. 15 to Christmas. At other times fish are not plentiful, so the fishermen say.

FRANKLIN BOOTH.

LOS ANGELES, Cal., Sept. 8.

ANGLING NOTES.

GEN. LOUIS FITZGERALD with a party of friends visited Barnegat Bay last week in search of weakfish and bluefish. They did fairly well, particularly Major A. P. Montant, who covered himself with glory. The party were drifting outside of the beach when the Major struck a big fish. He was rigged very light, only expecting weakfish, and was using an 8oz. Abbey & Imbrie split-bamboo rod; fortunately his reel held plenty of line, for the fish was at first utterly uncontrollable. The General had the deck cleared for action and timed the fight. The great fish made four complete circles around the boat and finally when the General called "time" a magnificent channel bass lay on his side, used up, played out by the skillful Major, who was almost, if not quite, as much exhausted as the fish. Time, 57min.; weight of fish, 38lbs. Major Montant was a happy angler and is having the fish mounted as a trophy of his skill by Wallace. Every season one or more of these Southern visitors are caught in our waters. This is the second heard from this fall. Last year, the readers of FOREST AND STREAM may remember, Mr. H. C. Wilson, of 28 Beekman street, caught one off Fire Island on a light black bass rod; this fish weighed 35lbs. The season before J. H. Stead and party landed two large ones and lost three or four—also while fishing off Fire Island. No doubt more could be caught if people only fished for them at this time of year.

Mr. Watson Tomkins, of Stony Point, N. Y., caught a fine shad one day last week while fishing in the Hudson River. Unfortunately he had no landing net and only a single snell hook. When he lifted him in the boat the gut parted and the fish struck the edge of the boat and fell in the water. He thinks it would have weighed between 3 and 4 lbs.

I suppose it is useless to prevail upon anglers to have their rods put in order before putting them away for the season, but if they only would do so it would be far better for the rods. Most people will put them away just as they last used them, often badly bent and out of shape, until a few days before they start out in the spring. The result is, that the pieces having been so long crooked remain so, and it is almost impossible for the workmen to get them back into shape again, to say nothing of the difficulty in getting the varnish to dry in so short notice. It takes from four to ten days for good rod varnish to get thoroughly hard, and anglers generally want their repairs ready the same day.

SCARLET-IBIS.

SENECA LAKE BASS.—Watkins, N. Y., Sept. 26.—This promises to be a great bass season in Seneca Lake. I have caught a number of two-pounders already, and after the frost brings the big ones will send you a stick full of fishing notes.—M. M. C., JR.

WASHINGTON ANGLERS.

MR. CHARLES H. LAIRD, of the U. S. Post Office, had a very successful trip to Point of Rocks last week, when his party succeeded in taking upward of 100 bass. Mr. Laird says that these fish ran the best of any he has seen from the Potomac, and he has caught his share of them. Quite a number were taken weighing from 3 to 5 lbs. each. Mr. Wetzel, another of Washington's well-known anglers, spent a day at Riverton last week, but was not so successful, securing only 5 bass. Mr. H. A. Parker, of the Smithsonian Institution, reports good bass fishing in Goose Creek, Virginia. He captured 9 one day, while another gentleman, fishing the same stream, took 18. The first were not so large, weighing from 3 to 1 lb., but as Uncle Thad. Norris used to say of small trout, "they were veritable firecrackers." Mr. Parker also caught a nice bass off the sea wall at the foot of Seventeenth street.

Yellow perch fishing is opening auspiciously. It is interesting to watch Capt. Blake, of the Mount Vernon steamer, fish for perch from the Marshall Hall dock. Of course the fish are small, but make up in numbers what they lack in size.

W. C. Kendall, of the U. S. Fish Commission, called a few days ago and told us some interesting things about the Chesapeake. Capt. Platt, of the steamer Fish Hawk, has preserved the skin of a 5 ft. tarpon, which was netted at Cape Charles City. Trout (weakfish), both spotted and plain, were observed at Crisfield early in September; a good many Spanish mackerel were present also; those taken weighed from 1 to 8 lbs. each. Croakers, spots and sea bass were in their usual abundance.

Messrs. J. H. Parkhurst and Clifford Wright had fine sport at Colton's Farm, near the mouth of the Potomac, early in the month. Silver perch or yellow tail (*Bairdiella chrysura*) were taken in large numbers. It is an excellent fish, and very abundant in the Chesapeake and its tributaries: as far as we are aware the silver perch is never found in fresh water. It is a small member of the weakfish family, and is not so closely related to the white perch as its appearance would lead one to suspect. The largest we have seen measured 9 in. and weighed about 1 lb. BONART.

WASHINGTON, D. C., Sept. 26.

ST. LOUIS NOTES.—A couple of weeks ago some of the members of the Calhoun Hunting and Fishing Club, finding gar-pike so abundant in the Gilead Slough, obtained permission of the fish warden to seine out the gars. They made one haul and got over 500 lbs. of the reptiles, and the next day started to make another haul, when the sheriff swooped down on them, and in spite of the fish warden's permit they were each fined \$10. Illinois officers seem to be on their mettle in a manner that would even satisfy Brother Hough. . . . The State Fish Commission of Missouri have at the St. Louis Exposition a fine display of native fishes in two large tanks. Another small tank has a beautiful lot of rainbow trout also taken from Missouri waters. The fish exhibit attracts as much attention as anything in the exposition.—ABERDEEN.

CUTTYHUNK BASS.—Cuttyhunk Club, Cuttyhunk Island, Mass., Sept. 20.—*Editor Forest and Stream*: I note in your issue of Sept. 17 under the head of "Cape Cod Notes," that "a party of four caught fifty scup and twenty-two sea bass in about two hours, using cut menhaden for bait." On the 17th, in Buzzard's Bay, off Quirk's Hole, I caught in less than two hours fifty-four scup and twenty-eight sea bass with menhaden and lobster for bait, to say nothing of the large cunners, flukes, and old maids (skate) caught by me at the same time. Yesterday afternoon from one of the stands on our island I took three striped bass, 20, 18 and 15 lbs., 54 lbs. in all, in less than two hours, also one bluefish 5 lbs., which (bluefish) we do not count. In July I caught while fishing for bass thirteen bluefish, smallest 5 lbs., largest 13 lbs., all taken with a light rod.—HENRY P. MCGOWN.

A BIG CHAMPLAIN BASS.—St. Albans, Vt., Sept. 26.—The largest bass of the small-mouthed species ever known to have been caught in the Great Back Bay of Lake Champlain, was captured near Samson's Lake View House, on Woods bar, so-called, on the 24th inst. by Mr. Jos. M. De Vean, president of the Mount Morris Bank, New York city, John Armstrong guide. The fish weighed 54 lbs. At the same place and same day Mr. A. F. Troesch, of New York city (Joe Armstrong guide), caught two large bass, one weighing 44 lbs. and the other 34 lbs. Mr. De Vean also caught a pike that weighed 94 lbs. He declares it was about as gamy a fish as he ever caught here. The 54 lb. bass was photographed by Miss Troesch and is to be mounted by Mr. Goron, Vermont's celebrated taxidermist, for Mr. De Vean.—H. L. SAMSON.

BLACK BASS FISHING IN THE UPPER POTOMAC is very good at present, and members of the South Mountain Fishing Club just returned from a successful trip say that the number of young bass of the year is unusually large; the conditions were favorable for the spawning and the early life of the fry. The chief difficulty now lies in the bait supply, which is hard to get. The famous stone catfish of the Susquehanna, although it occurs in the Potomac, seems to be absent from the region near Harper's Ferry, and the fishermen lack this desirable bait for the bass. The silvery minnow, the favorite of the anglers, is growing so scarce as to make its capture unreliable.—B.

BLACK BANDED RUDDER FISH.—Gloucester, Mass., Sept. 13.—The Italian bark *Andrea Lo Vico*, loaded with salt from Trapani, has been here about a week, and ever since she was docked a strange fish has been seen around her rudder. Capt. Collins calls it a black-banded rudder fish; it is about a foot or 15 in. long and is considered a curiosity by all who see it.—E. F. L.

WEST VIRGINIA BASS.—Dr. Henshall tells us that Fort Spring, West Virginia, is a capital headquarters for bass fishermen. Fort Spring is on the Greenbrier River, between Alderson and White Sulphur Springs. A good stopping place is at Robt. Curry's, one mile from Fort Spring, and right on the river.

A BLACK BASS weighing 54 lbs. was caught in the Delaware, near Egypt Mills, Pa., by Mr. H. C. Ford during his September fishing. The abundance of young bass of the year gives promise of fine fishing in the future; the shores of the Upper Delaware are lined with these little fishes.

Fishculture.

RAINBOW TROUT PLANTING.

DURING the past few years hundreds of thousands of rainbow trout fry (*Salmo tridentus*) have been liberated in many of the streams, ponds and lakes of Pennsylvania by the State Fish Commissioner, and only in very rare instances have they been known to propagate naturally. I am informed that about three years after the following named public streams were stocked rainbow trout fry were discovered in them in a thriving condition, and in nearly every instance is colder than is to be found in the general run of Pennsylvania streams. Hollister Creek, Wayne county; Hornbeck's Creek and Mill Creek, Pike County; Newville Creek, Cumberland county, and Tumbling Run, Schuylkill county. In fact the result of stocking public waters in Pennsylvania with this species of trout has been so unsatisfactory that the State Fish Commission concluded to abandon the hatching and distribution of them as far as practicable, and to that end about two years ago nearly all of the breeding fish, many of them weighing from 2 to 3 lbs. each, were liberated in streams of a low temperature with the hope that the conditions would be favorable and that they would strive with our brook trout for the mastery and that the result would be the survival of the fittest. As yet, so far as I can learn, very little has been heard of these adult fish, except one instance I call to mind, when Hon. H. C. Ford, last summer, while fishing for black bass in Egypt Mills pool, on the Upper Delaware, was greatly surprised when he felt a vicious strike, and reeled in a beautiful lake trout that touched the notch at 24 lbs. Evidently this trout had felt cramped in the narrow limits of either Hornbeck's or Mill Creek and moved down in search of wider range, and probably more abundant food in the way of minnows to be found in the river.

In nearly every instance observers have noticed that these rainbow fry linger about the place where they were liberated from one to two years, then mysteriously disappear, leaving no trace behind them and going no one knows where.

In the month of August, 1888, I was, in company with Col. Graves and Major W. D. Tomlin, of Duluth, Minn., both gentlemen being well known and enthusiastic anglers, a guest of the famous Baptism River Club, at their comfortable club house, situated at the mouth of the Baptism River, on the north shore of Lake Superior, and my banner day was on that beautiful stream, where I killed three of the largest brook trout it has been my good fortune to find anywhere. The river takes its rise far back in the wilderness and its course is broken by several beautiful falls. The first one is found about one mile from the lake; over it the water tumbles fully 75 ft. into a deep circular basin; into this pool many monster brook trout ascend from the cold waters of Superior during the summer months and find their progress stopped by the wall of rock before them.

I have always believed that the disappearance of the rainbow trout from Eastern waters was attributable to a wider range sought for, and I suggested to Col. James N. Granger, a very active member of the Baptism River Club, the advisability of trying the experiment of stocking the lower stretch of their river with this species of trout, at the same time explaining to him the peculiar habits of the fish. The following winter Col. Granger, acting on the suggestion, procured 10,000 rainbow trout eggs, hatched them successfully and liberated the fry in the Baptism below the lower falls.

A few weeks ago, in a letter received from Col. Granger, he says: "The rainbow trout which I planted in the Baptism have been heard from, a number of the fish have been caught off the stream this year. This proves the correctness of your surmises that the waters of the streams on the north shore of Lake Superior were adapted for that fish."

If the rainbow trout seeks a wider range than is to be found in the contracted limits of the trout streams of our Eastern mountains, as it grows in size, it will find plenty of it in Lake Superior; but it remains to be seen whether it will return to the Baptism River to spawn or not. I am of the opinion that it will be found in the river when the ice breaks up next spring. JOHN GAY.

WASHINGTON, D. C.

BETTER THAN AN ARMY WITH BANNERS.—The United States Fish Commission does not make much noise in the world, but it is adding more to the wealth of the country and doing more good than all the armies that have ever organized. From time to time the *News* has had occasion to speak of the Fish Commission and the excellent service it was doing in stocking the waters of Maine and New England with valuable fish. Hardly a week goes by without bringing fresh evidence of the good service it has rendered the nation. And the work of the Fish Commission is not confined to Maine or to New England. It extends all over the country, and takes in Alaska, the despised fountling which Mr. Seward adopted from Russia.—*Bangor Daily News*.

YEARLING CALIFORNIA SALMON.—The U. S. Fish Commission now has at Cold Spring Harbor, N. Y., 10,000 California salmon, which are to be distributed as yearlings. One-half of these are to be sent to the Battenkill, in Vermont, a tributary of the Hudson, and the remainder will be deposited in a stream on Long Island. It is confidently expected that the introduction of salmon of this size will soon make an impression on our streams, just as the operations in Vermont and elsewhere with yearling rainbow trout have speedily proved successful.

Joseph S. Frey, saloon keeper, on South Third street, and William Bercaw were trout fishing up in Monroe county on Saturday. While forcing his way through a thick clump of bushes overhanging the stream Bercaw saw a good-sized trout dart out from a bank of the creek and pass directly beneath him. Working his way to a secluded nook a few feet above, the angler cast a fly with such skill that in a few seconds he caught and safely landed a speckled beauty about 10 in. in length. He made a second effort, but could get no more trout there. Well, the fishermen continued on their way until their sport had ended and then they seated themselves to clean their fish, of which, of course, they had a fine lot. On opening one of the trout the fish was found to contain a diamond shirt stud. This caused Bercaw to look for his diamond, when it was found to be missing. Then it flashed to the fisherman's mind how fortunate he had been—that in passing through the brush his diamond had been forced from his shirt front: the trout he had seen dart in front of him had swallowed the jewel, and then he had succeeded in capturing the fish. To a reporter of the *Express*, who inquired of Mr. Bercaw concerning the truthfulness of the story the latter declared it to be a fact in every particular.—*Easton (Pa.) Express*.

The Kennel.

All communications must reach us by Tuesday of the week they are to be published; and should be sent as much earlier as may be convenient.

FIXTURES.

DOG SHOWS.

Sept. 29 to Oct. 1.—Third Annual Dog Show, in connection with the Central Canada Fair, at Ottawa, Ont. Alfred Geddes, Supt. Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.

Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y. Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.

1892.

Jan. 5 to 8.—The New York and New England Poultry and Kennel Club's Dog Show, at Albany, N. Y. W. C. House, Fort Plain, N. Y., Sec'y.

Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Berj. McInness, Sec'y.

Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. F. Capers, Secretary, Greenville, S. C.

Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.

Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.

March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.

March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Littell, Sec'y.

April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Hicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.

Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.

Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. G. Davis, Secretary, Philadelphia, Pa.

Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.

Nov. 23.—Second Annual Trials of the National Beagle Club, at Nantux, Rockland county, N. Y. F. W. Chapman, Sec'y.

Nov. 30.—Central Field Trial Club's Third Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y, 44 and 46 Wall street, New York city.

Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1893.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.

Jan. 13.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgair, Sec'y.

—Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

LEXINGTON DOG SHOW.

THE inaugural show of the Blue Grass Kennel Club closed Sept. 26, and for a first attempt in a new country the management, and especially Mr. Roger Williams, the energetic secretary, deserve considerable credit. The show proposed and carried out in a short time, it needed some hustling to get such a number of dogs as 463 together, but those who know the secretary and those who have heard of him, are aware that he is not apt to let the grass grow under his feet, and that they could depend on what he said. Considering the hot weather the arrangement of the benching was admirably adapted to give the dogs fresh air and keep everything sweet and clean without much disinfectant. The show was held under a covered track connected with Mr. Brasfield's sales stables out at the race track, a mile out of town. The shed was in the form of an oval, and allowed an alleyway of some 15 ft. between the inside and outside rows. The benching was the old style, without the partition, and I must say that a quieter, more friendly lot of dogs I never saw. Sometimes the mere fact of a partition separating two dogs makes them inclined to fight, especially if they know they cannot get at each other, hence the general rumpus at some of our shows. The numbering was hardly as good as might have been, a straightaway course could easily have been had, as the oval must have been over an acre in extent. The center of this oval was uncovered, and is a grass field, making an admirable place for judging, had the ring been inclosed with rope or fence. This show was not held in connection with the Charity Exposition which gave fox hunts, or rather chases, etc., on the track near by, still, one was supposed to help the other.

Major J. M. Taylor took all the sporting classes, and Mr. Frank C. Wheeler, who will be remembered as hailing from London, Ont., and an enthusiastic terrier man, passed upon the non-sporting division, and there was little grumbling heard. It was afternoon on Wednesday before the former got to work on his big classes of setters and finished them up. Mr. Wheeler did not commence till Thursday morning, when it did not take him long to rattle them off, or out we should say. The commended cards must not in many cases reflect on the judges, as they were particularly requested to do the very best they could for every one. The weather was all that could be desired, and though the attendance was never very large, still, the expenses being small, there will not be much, if any, loss to the club. Mr. Geo. Hill was all there with his jolly face, doing his best for every one and helping the secretary with the benefit of his long experience. Some distinguished visitors dropped in on Wednesday. Among them were Gov. Brown, Lieut.-Gov. Alford, Gen. Wade Hampton, himself an enthusiastic fox hunter; Gen. Don Carlos Buell, Senator J. C. S. Blackburn and Congressman W. C. P. Breckenridge. With these few lines I will pass on to a description of the classes, leaving other items of interest for "Dog Chat."

MASTIFFS.—(FRANK C. WHEELER.)

So far down South, and with the primitive kennel busy in these classes, all being local entries. The winner in dogs, Wafe, turns his feet out, has light eyes, ears wrongly carried, and has little mastiff type; Duke, second, has a snipy, weak muzzle; Onandaga, vbc., I preferred to any in body, but feet are poor; and Jack, he, loses behind, too straight; Prince deserved a couple of letters, as he has a truer type of head than any shown. Louise could only get two letters in the bitch class, wrong all over. In puppies a second went to K. U., though he might have just as well have been first, as he has a fair type of head and a very good front.

ST. BERNARDS.—(FRANK C. WHEELER.)

There is great room for improvement in this breed in this section, although at the same time it is not a dog for the country, and native-bred ones will never amount to anything, the climate being too warm and enervating, and most of them will run light and snipy. The winner in the open dog class, Columbia Knight, is a good-boned dog, moves queerly, lacks blaze, but has a nice coat; Neutie, second, is long-headed and shallow; Cerebus, vbc., is poor in color,

type, head and other characteristics; Hindoo, given he by request, is the best I can say of it, and Mr. Wheeler was foolish to let the card go. Beekie first in bitches, is weak in pasterns, head lacks type, is good in body but sadly cow-hocked; Queen, second, was the only good one on the bench, has a fairly good head and coat, and shows St. Bernard type throughout; Lady Abbott is another poor one, and hardly deserved it. Nettle was the only mentioned one in puppies, getting second. Mr. Sawyer's entries were unfortunately absent. Bitch puppy prizes were withheld. In smooths, Nadja is very plain faced, flat-sided, but has good bone and size; altogether, barring Queen, there was hardly a St. Bernard worth picking up.

NEWFOUNDLANDS—(FRANK C. WHEELER).

In Newfoundland, Flora, one of the Meadowthorpe Kennels' dogs, was the only decent one in the class, and won, small sized, but showing a good deal of proper type.

GREAT DANES—(FRANK C. WHEELER).

The presence of the great Imperial from Chicago showed the Lexington people what a great Dane should be; he was looking better than at Toronto, in flesh, and was, of course, made much of by every one. In bitches a second went to Columbian Daphne, a big brindle pup, with a most peculiar head; looked as if a bee had stung it and the swelling had not gone down; feet turn out, too. Columbian Nell, vhc., is a bigger, black dog, with a better head and body, and ought to have won. First was withheld. In puppies these two took the money in the same order.

There were no bloodhounds, and deerhounds had one representative only, a fair bitch, the winner at Jackson, Mich.

GREYHOUNDS—(MAJOR J. M. TAYLOR).

Quite a good muster, and the Rookwood Kennels are responsible for the improvement in this breed in that locality. Their Master Rich and Miss Rare, both very well known in the North, had their respective challenge classes to themselves. The winner in open dogs turned out to be Surplus, heavy in shoulder, good legs and feet, skull too thick. Blue, by Gay Lad, loses in front and loin. Cyclone, reserve, is a fairish dog, loses in front, shoulders and head. White Socks, by old Snowfligh, is too open in feet and not let down enough behind. Moonson, also vhc., is slack in loin and long cast; nice front. The others call for no particular mention. In the next class something of very fine quality was shown by Mr. Williams: this was Wild Idle, a black and white bitch, wonderfully well developed for her age, shown as hard as nails; feet might be a little more compact, but legs and chest are excellent, head well formed, ribs nicely placed, but of course not sprung enough yet, loin and quarters quite the thing; a bitch that will be noticed anywhere; she is only ten months old yet, and for a sapling she showed some very good muscling. Minnehaha is also nicely formed, behind the shoulders she is heavy. Skeddadle is a bit coarse, and Creole Belle is too long cast. In dog pups Faugh-a-Ballagh, a son of Norwegian, was placed ahead, beating High Flight in head, body and front, the latter's feet turning out, and he is too long-waisted. Salvator, a son of Brabazon's, is a nice yearling; bit too long in body and pen-headed. Touchstone, l.c., loses in front, head and hind parts. Out of twelve entries in this class the Rookwood Kennels had bred nine of them. In bitches Wild Idle had an easy win over Belle of Elkhorn. Greyhounds evidently take well in that country and are quite suitable.

BARZOIS—(MAJOR J. M. TAYLOR).

A first-class show of quality, Dr. Grimes having Mr. Hacke's best on hand, six were entered but four only put in an appearance. In dogs the new one Abreck took first; he is a capital made one, truer in front than the others, but hardly so deep in chest as Oudaff nor so good in head, but better in loin, ribs and feet, they were shown in excellent flesh, better than I have yet seen any of this breed, being particularly strong in loin and shoulders; Zlocoem, a well-known winner, must here take a seat further back, as his front will put him back. Prokaza, shown last spring and looking a trifle light, was the only representative of the female persuasion, the others entered not being in shape yet. These dogs created a great deal of interest, and, as might be supposed, were a revelation to the Kentuckians.

POINTERS—(MAJOR J. M. TAYLOR).

Not a very good collection, in fact poor. Our criticisms on some of these classes may appear a little severe, but truth must be told or breeders will not have any incentive to procure the good stock and improve their dogs. No challenge dogs, and most of the entries were local. Krupp, a lemon and white, won over Meadowthorpe Duke in heavy-weight dogs, losing in front but beating in other respects; Brown, l.c., has a fair body but is coarse in head and not right in forelegs. Bell's Kate won in the corresponding bitch class, and, barring her peculiar Roman-nosed head, she is a fair bitch, beating Dot far away, the latter having a very poor head. In light-weight dogs, Roger was only good enough for second, he is dish-faced, open in feet, but body and quality fair. In bitches Naso Belle won nicely over May, the former is rather too scooped out before the eye, feet turn out a little, body fairly well ribbed but shallow, good behind; May was beaten in body and front; Flora, c., is snippy, big in eye, and body and legs are only moderate, and she got quite as much as she deserved. Puppies could not raise a first, Mamos, given second, is long and snippy headed, and poor in front; Reuben, given a c., has no doubt seen his best time; the others were not mentioned.

ENGLISH SETTERS—(MAJOR J. M. TAYLOR).

Here was the quality exhibit of the show, and in numbers they beat everything except the foxhounds. Many of the winners have made their reputations in another field, and this made the exhibition doubly interesting. In challenge dogs, old champion Dad Wilson was on hand, but did not take part in the fight for honors, content to let his son show his worth. Cincinnati had, therefore, a bloodless victory and was shown in good shape. The noted field trialer Bohemian Girl also received a blue ribbon without any effort. Then came a romping big open dog class and it was shown under some difficulties, as there being no roped ring, the audience crowded the handlers somewhat. The Major, however, set them on the move and quickly picked out a select few and sent the others back. When it came to the second sifting Toledo Blade was marked for honors. Just on what lines these two, Cincinnati and Toledo Blade, are judged I do not know, as both are entirely different in type, Blade having a well-made, compact body, and the other being long in body and head and slack in loin; Dad Wilson's Boy, second, is well known, and ran a close second, being much the same type of dog and better in head. Gath's Mark, reserve, is well known everywhere; a bit coarse but well fronted, body a little long. Ben Hur of Riverview, vhc., is leggy, shallow in body, but has a nice head and front. Gamster, vhc., is a bit wide in chest and shape of head might be improved, but he has a nicely ribbed body and forelegs and feet. Rajah, same letters, a little faulty in head, has nice front and body. Sportsman Boy, l.c., is a trifle large, feet faulty and head too long, but well deserved his letters. Kentucky Dash, c., is coarse-headed and shallow in body. Sir Frederick, the new dog from England, is of a type that the judge does not care for; all the same he is a good dog with the best head in the class, bit short-necked, nice front, though elbows are hardly free enough; is well ribbed and stands well behind, coat is inclined to curl and is quite wavy on back; a dog showing intense quality and should be placed higher; his feet are not of the best. The number of entries in this class was twenty-seven.

The crush in the ring was repeated when the bitch class came in, twenty-four facing or rather circling the judge.

The quality, however, was hardly so good. The winner turned up in the sprightly Gossip, a bitch which attracted the Major's attention at the Central field trials last fall by her busy work and lively gait. She is nicely built, with a fair head and good running gear; had the second winner, Nell G., not been so timid in the ring it is doubtful how she would have been placed, as to use the judge's words, "she's as fine as silk," well fronted, nicely ribbed, good loin, nice skull, but muzzle and stop might be better. The Blue Ridge Kennels were close up with another of their good team of bitches, Belton's Countess, that took third at Baltimore last year. Sunshine, vhc., one eye opaque, nice skull, muzzle wrong before the eye, front and body pretty good. Then came several commended ones which without having serious faults, were hardly up to type of the others, though I had almost forgotten Lady Zoe, l.c., first at Cleveland in the spring and reported on then; she might well have had another letter. Lillian P., another h.c. one, is very poor in head, snippy, and so on, but has an excellent body. The puppies were not up to form, the best dog being Rex, given a second; he is very snippy and leggy. Juno won in bitches; she is the same way and the others call for no mention. Mr. Hudson's team won the kennel prize.

IRISH SETTERS—(MAJ. J. M. TAYLOR).

Irish setters were not so good. The winner in open dogs, Captain, is a dog of good color, but too slack in loin and hardly up enough in pasterns. He won at Wilmington the other day. Frisco Boy, second, has not a bad shaped head, skull a bit coarse, but he is straight behind and forefeet turn out a bit. Meadowthorpe Rover has a head too much on English type, and could be improved in ribs and loin. Biz Sarsfield is shallow in body, feet turn out and is plain in head. In bitches Lil V. is heavy in shoulders, faulty in feet and pasterns, falls away in quarters, but has a nice type of head.

GORDON SETTERS—(MAJOR J. M. TAYLOR).

The Gordons could hardly be called first-class as a whole, but this is nothing new. First went to Don, a dog with little claim to it, his head would adorn a bloodhound, with any amount of dewlap, head very thick, stands out at elbow, good but not Gordon in hindlegs; Meadowthorpe Heather Roy smother him in type of head, feet and coloring; a light tanned dog, Meadowthorpe Laddie was given c. In bitches Mrs. Dager's nice-headed young bitch Jaquet, winner at Cleveland, and making up into quite a fine bitch, good front, head, coat and color, beat Meadowthorpe Sallie easily, her feet and pasterns being very faulty, and she is out of coat, almost bare.

SPANIELS—(MAJOR J. M. TAYLOR).

The spaniel classes, after the grand collection seen all along in Canada, were poorly filled. An indifferent Irish water spaniel was shown. In fields Mr. "Foxhound" Cook brought down Newton Abbott Farmer, faulty in head, who was alone in dogs, and What Not, a youngster of Mr. Bell's, and quite a fair one too, was the same in her class. In challenge cockers the well-known King of Obos had barren honors, having the class to himself, and the same may be said of Obadiah in the next class, he is not the dog he used to be, and George Bell raffled him during Saturday afternoon, but who secured it I am unable to say, as I left before it came off. In any other color Lady Obos was returned the winner, she was described at Cleveland this spring. There were lots of dogs for sale, but not out for the money. One of Mr. Bell's is one of the best types I have seen for some time, head on the field line, but still a cocker, nice length of leg, splendid cocker body and properly built for work, a type of dog we should more often see. This one, of course, goes back to Canada, his owner not having seen it till he took it out of the crate at Lexington.

BEAGLES—(MAJOR J. M. TAYLOR).

Only a poor couple present. The winner, Jesse, is too long cast, fine in muzzle, nice skull, but not depth enough of body; and Lucy is another of the weedy kind, fast, perhaps too fast, in the field, but not bench show beagles.

FOXHOUNDS—(MAJOR J. M. TAYLOR).

To show off the capabilities of the district in the way of foxhounds may almost be said to be *raison d'être* of the show, and old Kentucky turned out in full war paint with an entry of 94. This, of course, passes all records, even that of Richmond in 1888. Type—well, there was type of a sort, some were built after the lean kind and others the reverse, though the extreme whippet-looking bounds one is wont to associate with the name of American hound was conspicuously scarce. The winners in the open class were what may be termed poor English bounds, heavier than the general run of American bounds, showing that they carry a considerable percentage of the former blood in their veins. It the judge made any mistake it was excusable for a more bewildering class I never saw as they trailed round the invisible ring. The class called for American bounds, and, therefore, I think that bounds showing the most evidence of American type should have been recognized when the money was given out; these, and only these, were those of the Cook Kennels. They are sorry, level and are bred true to a distinct type; they are rather fine coated, that is too smooth, but even that is another characteristic of this type of hound. Champion Brave and champion Bernhard were the only representatives in each challenge class, and were both shown fit and well.

Then the open class of 48 entries crowded in. Dogs, owners and handlers, or whippers-in I should say, were new to the business and situations were awkward sometimes. After the wedding out process the winner was found in Ben, a dog very much on the English type; good front, fair head, good bound coat and well made behind. Red Stone, a red dog from the same kennel, came next; he looks built for running all over and is a workmanlike-looking dog, not much behind the winner. Risk, from the same kennel, took third; he loses in front to the others. Reese, reserve, loses in front and ribs. Then came a lot of Mr. Walker's vhc. bounds, all fairly well made, faulty in feet and head formation principally. Roderick, a winner under this judge twice before, was left with a vhc. this time. He is, however, a well-made bound and should have been higher, and so might Drum II., who is also a first winner elsewhere. Streak third. They have all been mentioned in FOREST AND STREAM before. Brave's Boy is a nicely made bound of the Cook type, with excellent legs and feet. Then came the bitch class of 31, the Sphar kennel again furnishing the winner in Topsy, a red, who, though not very well shaped in head, has the necessary underpinning to serve all practical purposes. Nell, of the Bourbon Kennels, came next. She is well-fronted, but hardly so strong in loin or so good in shoulders; Mr. Walker's kennel coming up close with Fauny, losing in front and loin, good coat. Fly, a winner at other shows, took vhc.; she is too long cast and could be better in front. Jet, soft in coat, was another three-letter bitch, and Frances, second at New York, was another; she is a nicely formed bitch, and could have had more quite rightfully. Kate, another more on English type, took vhc. also. The others were more or less faulty in legs and feet, and there is no use mentioning them particularly, as it is not likely they will ever be seen outside of Kentucky's limits. The same may be said of the puppies, which were at the neither hay nor grass period.

In shaggy foxhound dogs, The Bard beat Wilson in head, coat and front, and in bitches Clara was well ahead of the others, she afterward winning special for the best.

Some English foxhounds were shown but they were little heavier than some of those winning in the American class. Fiddler, a fair-headed one, nice front, was alone in dogs

and so was Music in her class; the puppies were not up to much.

COLLIES—(MR. FRANK C. WHEELER).

The collie classes could not for any means be called a good lot. In dogs Sir Walter Scot II., whose career in the Canadian shows has been recently chronicled, won over Meadowthorpe Reality, an old friend in Scotch Baillie's days; he (Reality) is getting thick in skull, but still has his good coat, in which he beats the winner. Dudley, third, has light staring eyes, is too high in skull and ears are wrong. The bitches were barred out. In novice class Sir Walter Scot II. won over Dublin Scottia, who shows quality, but is weak in pasterns, big in ear and was out of coat. He afterward won in the puppy class, alone.

BULLDOGS—(MR. FRANK C. WHEELER).

The dogs were not worth mentioning and it is a mistake to do it, some would not be considered worth of a place among the Boston terriers even; prizes were withheld and cards given out. Princess Pedro had the only semblance to a bulldog and was given first in her class, faulty in skull and chops.

BULL-TERRIERS—(MR. FRANK C. WHEELER).

Dufferin in the challenge class saved the quality of those classes. Grip, prick-eared and too long and light in head and light in eye, was given first in dogs.

ROUGH-HAIRED TERRIERS—(MR. FRANK C. WHEELER).

Poor old Meadowthorpe Reiver, the noted Dandie Dinmont that used to do some winning under Scotch Baillie's handling, looked as if he would like to turn up his toes; scabby with mange, out of coat, he lolled up the sun a wreck of his former sprightly self; we did what we could for him for the sake of old times, and a tin of water seemed most acceptable. Meadowthorpe Donald, the Scotch terrier, though out of coat, was as lively as ever, and can give Kilt-ton a push yet. These were first in each class, only entries.

FOX-TERRIERS—(MR. FRANK C. WHEELER).

No challenge entries, and old General Grant was the best in the open dogs, shows age, is plain-faced and cheeky, he was followed by Blemton Match, one of Lucifer's sons, but I could not find him when wanted, neither could I find Gyp, third winner. Dixie Tartar, reserve, loses in front and head. Quits, vhc., was complimented surely, thick, coarse head and long coat; Chippie is another of this sort, also vhc., and Blucher will never do as well again I'm afraid. In bitches Blemton Lulu, that won first at Cincinnati last year, was the winner. Then there were a lot of puppies, more for sale than anything else, and it was impossible to find out which was which, you just took your choice and used your own judgment. Columbine, a weak looking little terrier, was the only wire-haired one; yes, it had a rough coat.

Irish terriers were *non est*, and black and tan terriers might just as well have been, for they were a poor, apple-headed lot, first going to Margoline, who has certainly less skull than the others, but her body held no hair, except tan markings: Guess was rather a pretty little thing, but what is the good of mentioning them, they are not the type, and so I must leave them to their mistresses, who will and do appreciate them better, one stating publicly that \$1,000 was her little brute's intrinsic value.

PUGS—(MR. FRANK C. WHEELER).

As might be supposed, the show was a pretty good one, Eberhart's Cashier taking the challenge prize, looking none the worse for his Canadian tour. In open dogs Mr. Pitts showed his new dog Bonsoir, which has a nice muzzle, skull could be fuller, eye all right, cobby body, good legs and feet and tail carried O.K. Dixie and Bradford Ruby II. were put equal second, why I do not know, if one is right the other is wrong. Dixie is much the best and one of the neatest little dogs out; could do with a fuller skull, muzzle and eye first-class, body most cobby, deep and broad, legs well-boned and straight and carries a good curly tail with true pug action. It is a pity his pedigree cannot be learned, but that he is a dog of good breeding is shown in every line. Bradford Ruby's size is his worst fault. Pug loses in head and body to the others and Grover Cleveland is too flat in skull. Plug is poor in ear and long in muzzle. Beauty III., the winner at Chicago, was an easy winner over Fannie K., beating her in head, ear and front. Plug and Ko Ko won in puppy dogs. Peggy Pryde, well-known now, won in puppy bitches over Kentucky Belle, beating in muzzle, body and curl.

ITALIAN GREYHOUNDS—(MR. FRANK C. WHEELER).

Lavender, spoken of before in these columns, won well over Prince, who carries his ears a la jack rabbit. Topsy, a very small Mexican hairless, was returned the winner in that breed. It was like a small Chihuahua dog without hair, and Oyez, vhc., is a Chinese chow chow and not a Mexican hairless at all.

MISCELLANEOUS CLASS.

A fairish Pomeranian won; the boys called him a "loup loup." Then a dog called Ponto came next, which I could find no trace of; then some Pima dogs, bred by Pima Indians, but what they are would puzzle any one. They resemble the worst fox-terrier one ever saw, and were given vhc. Two fair retrievers and some coon dogs, who, kennelled in the hottest and brightest part, could see no fun in that business and lolled about no doubt dreaming of the "darkey's" hour just before the dawn. H. W. L.

PRIZE LIST.

MASTIFFS.—Dogs: 1st, Frank G. Ott's Wake; 2d, Miss Mary Shunkin's Duke. Very high com., Frank G. Ott's Onondaga. High com., A. S. Allen's Jack. Bitches: High com., Ben Labree's Louise. Puppies: 2d, G. D. Weathers's K. U. Very high com., A. M. Gutzeit's Bunch.

ST. BERNARDS.—ROUGH-CASTED.—Dogs: 1st, Frank S. Anderson's Columbia Knight; 2d, Miss Anna Farrell's Nettle. High com., E. D. Sayre, Jr.'s Hindoo. Bitches: 1st, Ed. M. Wickliffe's Beekie; 2d, Percy T. Webb's Queen. Very high com., Meadowthorpe Reality. Lady Abbott.—Irish Setter Dogs: 1st, Miss Anna Farrell's Nettle. Bitches: Prizes withheld.—SMOOTH-CASTED.—Dogs: 1st, S. B. Buckner, Jr.'s Fritz. Bitches: 1st, Meadowthorpe Kennels' Nadja.

NEWFOUNDLANDS.—1st, Meadowthorpe Kennels' Flora.

GREAT DANES.—Dogs: 1st, Imperial Kennels' Imperator. Bitches: 1st withheld; 2d and very high com., Frank S. Anderson's Columbian Daphne and Columbian Nell. Puppies: 1st and 2d, Frank S. Anderson's Columbian Daphne and Columbian Nell.

DERHOUNDS.—1st, Chas. F. Rowland's Thorax III.

GREYHOUNDS.—CHALLENGE.—Dogs: 1st, Rookwood Greyhound Kennels' champion Master Rich. Bitches: 1st, Rookwood Greyhound Kennels' champion Miss Rare.—OPEN.—Dogs: 1st, H. Brown's Surplus; 2d, W. Sanders's Blre. Reserve, L. Gentry's Cyclone. Very high com., Young & Knart's White Socks, R. Woolley's Higlight, E. B. Wood's Moonson. High com., A. M. Young's Alfonso, M. Richardson's Salvator. Com., Fitzsach L. Scarless Chuanard, Rookwood Greyhound Kennels' Bird Catcher, D. H. Sine's Middleton. Bitches: 1st, Rookwood Greyhound Kennels' Wild Idle; 2d, S. Lyne's Minnehaha. Very high com., P. Talberr's Skeddadle, D. H. Sine's Mollie. Com., L. Grow's Belle of Elkhorn, Rookwood Greyhound Kennels' Creole Belle.—PUPPIES.—Dogs: 1st, E. V. Paul's Faugh-a-Ballagh; 2d, R. Woolley's High Flight. Reserve, M. Richardson's Salvator. High com., L. Williams's Touchstone, J. H. Weathers's Avon. Bitches: 1st, Rookwood Greyhound Kennels' Wild Idle; 2d, L. Grow's Belle of Elkhorn.

RUSSIAN WOLFHOOUNDS (Barzois).—Dogs: 1st, 2d and 3d, P. H. Hacke's Abreck, Oudaff and Zlocoem. Bitches: 1st, P. H. Hacke's Prokaza.

POINTERS.—55 LBS. AND OVER.—Dogs: 1st, John B. Castleman's Krupp; 2d, Meadowthorpe Kennels' Meadowthorpe Duke. High com., Luther Eastin's Brown. Bitches: 1st, George R. Bell's Bell's Kate. High com., Meadowthorpe Kennels' Dot.—UNDER 55 LBS.—Dogs: 2d, Robert Kennedy's Roger. Bitches: 1st, R. F.

Morgan's Naso Belle; 2d, Willie D. Herr's Mav. Com., Martin O'Neil's Flora. Puppies: 2d, John B. Castleman's Mainos. Com., Fabe Harrison's Benben.

ENGLISH SETTERS.—CHALLENGE—Dogs: 1st, J. E. Dager's Cincinnati. Bitches: 1st, J. Shelley Hudson's Bohemian Girl. **OPEN—Dogs:** 1st, J. E. Dager's Toledo Blade; 2d, G. O. Smith's Dad Wilson's Boy. Reserve, Blue Ridge Kennels' Gath's Mark. Very high com., J. Shelley Hudson's Gaster, W. H. Wallingford's Ben Hur of Riverview, and Blue Ridge Kennels' Dan Gladstone and Rajah. High com., J. Taylor Williams's Sportsman Boy and G. O. Smith's Sir Frederick. Com., W. H. Wallingford's Kentucky Dash and Thos. L. Martin's Teudor. Bitches: 1st and reserve, Blue Ridge Kennels' Gossip and Belton's Princess; 2d, Dr. L. A. Querner's Nell Q. Very high com., J. Shelley Hudson's Sunshine. High com., J. Shelley Hudson's Lillian P., Harry Worthwell's Lady Dudley and J. Taylor Williams's Lady Zoe. Com., J. Shelley Hudson's Kennel's Ladys, J. Taylor Williams's Belle Sportsman, W. H. Wallingford's Lucille Hall, J. E. Smith's Lou Gladstone and Daniel L. Martin's Niobe. **PUPPIES—Dogs:** 1st, withheld; 2d, Fabe Harrison's Rex. Bitches: 1st, Fabe Harrison's Juno. Very high com., P. B. Winn's May Win. High com., Oliver Redd's Flash. Com., C. P. Harp's Cute.

IRISH SETTERS.—Dogs: 1st, Seminole Kennels' Captain; 2d, Geo. R. Doeber's Frisco Boy. High com., H. C. Sherman's Biz Sarfeld, Meadowthorpe Kennels' Meadowthorpe Rover. Com., Jas. E. Pepper's Tan. Bitches: 1st, Jas. E. Pepper's Lil VI.

GORDON SETTERS.—Dogs: 1st, Geo. Perrin's Dog; 2d and com., Meadowthorpe Kennels' Meadowthorpe Heather and Meadowthorpe Laddie. Bitches: 1st, Mrs. J. E. Dager's Janet; 2d, Meadowthorpe Kennels' Sallie.

IRISH WATER SPANIELS.—Bitches: 2d, Howard Downing's Satan.

FIELD SPANIELS.—Dogs: 1st, The Cook Kennels' Newton Abbott Farmer. Bitches: 1st, Geo. Bell's Whatnot C.

COCKER SPANIELS.—CHALLENGE—Dogs: 1st, Geo. Bell's King of Obos. **OPEN—Dogs:** 1st, Geo. Bell's Obadiah. Bitches: 1st, Geo. Bell's Lady Obos.

BEAGLES.—Dogs: 1st, L. Gentry's Jesse. Bitches: 2d, L. Gentry's Lucy.

AMERICAN FOXHOUNDS.—CHALLENGE—Dogs: 1st, The Cook Kennels' champion Brave. Bitches: 1st, The Cook Kennels' champion Bernhard. **OPEN—Dogs:** 1st, 2d and 3d, Asa R. Spar's Ben, Red Stone and Rick. Reserve, W. S. Walker's Reese. Very high com., The Cook Kennels' Struck, Kodrick and Drum II., Redd Bros., Tickler, W. S. Walker's Scott, Boston Bragg, Seare, Sam and Troop. Com., Henry B. Bosworth's Red Jack, Redd Bros. Leader. Bitches: 1st, Asa R. Spar's Topsy; 2d, Bourbon Kennels' Nell; 3d, W. S. Walker's Fanny. Very high com., The Cook Kennels' Fly, Jet and Frances, Asa R. Spar's Kate. High com., The Cook Kennels' Fannie and May Queen, Redd Bros. Fanchon and Queen. Com., The Cook Kennels' Wild, Redd Bros. Hour and Fly, Bourbon Kennels' Ida. **PUPPIES—Dogs:** 1st, Bourbon Kennels' Guy; 2d, J. M. Downing's Commodore. Bitches: 1st, Bourbon Kennels' Texia; 2d, J. M. Downing's Lucilda; 3d, Dr. W. L. Atkins's Nell.

SHAGGY FOXHOUNDS.—Dogs: 1st and 2d, A. B. Whitlock's Bard and Wilson. Bitches: 1st, Meadowthorpe Kennels' Clara.

ENGLISH FOXHOUNDS.—Dogs: 1st, Meadowthorpe Kennels' Fidler. Bitches: 1st, Meadowthorpe Kennels' Music. Puppies: 1st, 2d and very high com., Meadowthorpe Kennels' Dick, Tom and Harry.

COLLIES.—Dogs: 1st, John Hawkes' Sir Walter Scott III; 2d and 3d, Meadowthorpe Kennels' Meadowthorpe Reality and Dudley. Bitches: 1st, John Hawkes' Sir Walter Scott. 2d, Seminoles Kennels' Dublin Scilla. Puppies: 1st, Seminoles Kennels' Dublin Scilla.

BULLDOGS.—Very high com., E. R. Puch's Toby. High com., H. B. Boulden's Gus and Willis Cole's Irish Pat.

BULL-TERRIERS.—CHALLENGE—Dogs: 1st, Wm. J. Bryson's Dufferin. **OPEN—Dogs:** High com., R. P. Buchanan's Grip. Bitches: 1st, Wm. Mariner's Princess Pedro.

SCOTCH TERRIERS.—Dogs: Meadowthorpe Kennels' Meadowthorpe Donald.

DANDIE DUMMONT.—Dogs: 1st, Meadowthorpe Kennels' Meadowthorpe Reiver.

FOX-TERRIERS.—Dogs: 1st, H. Larhman's General Grant; 2d, Matthew Wilson's Bl-mont Match; 3d, Dr. E. B. Hagyard's Gyp. Reserve, Dixie Poultry Ya ds and Kennels' Dixie Tartar. Very high com., Miss Hermine Gratz's Quits and Par Lamphear's Caeppu. High com., Miss Israel's Bluecher. Bitches: 1st, E. C. Reedinger's Blemont Lulu; 2d, Dr. E. B. Hagyard's Little Typset; 3d, Dixie Poultry Yards and Kennels' Hillside Marchioness. Very high com., Dr. E. B. Hagyard's Typset II and E. T. Clay's Gypsy. High com., John Foster's Mabel and Meadowthorpe Kennels' Scarsdale Folly. **PUPPIES—Dogs:** 1st, Frank Rieting's Stormy; 2d, Dixie Poultry Yards and Kennels' Dixie Tartar. Very high com., Meadowthorpe Kennels' Quiz. High com., John Foster's Tom and Meadowthorpe Kennels' Dr. Ed. Bitches: 1st, Meadowthorpe Kennels' Queen. **WIRE HAIRED—Dogs:** 1st, Meadowthorpe Kennels' Columbine.

BLACK AND TAN TERRIERS.—1st, W. T. Ficklen's Margoline; 2d, Miss Katherine Reed's Guest; 3d, W. E. Martin's Cate. Very high com., W. T. Ficklen's Jumbo, Mrs. J. H. Nelms's Topsy.

PUGS.—Dogs: 1st, A. E. Pitts's Bonsor; equal 2d, Eberhart Pug Kennels' Bradford Ruby II and C. L. Connor's Dixie. Very high com., L. Fogle's Pug, Miss Willie Sayre's Plug. High com., L. Strauss's Grove Cleveland. Bitches: 1st, A. E. Pitts's Beauty III; 2d, Eberhart Pug Kennels' Fannie K. **PUPPIES—Dogs:** 1st, Miss Willie Sayre's Plug; 2d, Miss Marie Leibins's Ko-ko. High com., F. W. Schapperle's Nero. Bitches: 1st, Eberhart Pug Kennels' Peggy Pryde; 2d, C. L. Connor's Kentucky Belle.

ITALIAN GREYHOUNDS.—1st, J. S. Rockwell's Lavender; 2d, J. Englehart's Prince.

MEXICAN HAIRLESS.—1st, Dr. C. E. Mooney's Topsy. Very high com., Marie Adair's Oyez.

MISCELLANEOUS.—1st, G. R. Edmiston's Snow Prince (Pomeranian); 2d, W. C. Samuel's Ponto. Very high com., Miss Rosa Jeffrey's Lavette (Pima dog), S. Thompson's Rags (Pima dog), M. Kimbrough's Pearl (English retriever), Meadowthorpe Kennels' Black Diamond. High com., Miss J. S. Boswell's Farley.

MONTREAL DOG SHOW.

[Special Report.]

THE Montreal Exposition Company's First International Bench Show of Dogs opened at the Exhibition Grounds, Montreal, Sept. 22 and closed the 25th. The show was well attended, and no doubt the company will reap a rich harvest of over \$1,000 profit. The building was pressed to its full capacity to accommodate the entries, the judging being done in a tent adjoining the building, where at certain times the heat was very oppressive. Dr. Wesley Mills acted as superintendent, while Mr. Coulson and Mr. Robinson worked like beavers. Spratts Patent did the benching and feeding. P. G. Keyes, of Ottawa, judged Clumber, field and cocker spaniels, while John Davidson, of Monroe, Michigan, judged all the other classes except black and tan terriers, which were judged by Messrs. Davidson and Joe Lewis jointly. The classes of dogs were about the same that have been through the circuit and which have been commented on at the other shows. Of course there were some strange entries, but the bulk of the money went to the regular campaigners.

MASTIFFS.

The exhibit of mastiffs was very poor in quality. Mode, in the challenge class, was alone, he has a nice head. In open dogs Lord Caution was rightly placed at the head of the class, fair in head and carriage of ears; second went to Victor, long in head; Victor, third, is light throughout. The best of the cards were given according to choice of a poor lot.

ST. BERNARDS.

No entries in rough challenge class. In challenge bitches Republican Belle made her first appearance in this class and won. In open dogs, Kingston Regent, the winner at other Canadian shows, good in head, bone and color, was an easy winner; he shows lots of quality. Second, to Duke of Wellington, very promising for his age, not quite right behind; Lord Dalhousie taking third prize. Prince, vhc., is too small. The rest were not high flyers. In the bitch class Zenith had a walk over, the Pottersburg entries being absent. In smooth challenge class Hector again came up

smiling at one end of the chain and Mr. Mann at the other. The judge finally gave first prize to Hector. In smooth bitches Nun Nicer had no competition, and was given first. She was shown at Hamilton.

BLOODHOUNDS.

Jack Shepard had it all his own way.

NEWFOUNDLANDS.

Only one entry, Czar, and a moderate one, head not correct and coat not straight.

GREAT DANES.

Favor, second at Toronto, was an easy first here; and second went to Pasha II., also well known; Brutus was absent. In bitches, Mount Royal Kennels' Minerva's Fawn was alone, she lacks size.

DEERHOUNDS.

Several deerhounds were shown, and were placed right; they were chiefly lacking in coat and head properties.

GREYHOUNDS.

were the same old stagers that have been doing the circuit with the Thomas combination, except in one or two instances. In challenge dogs first went to Gem of the Season and second to Scavenger, who through some accident has lost part of his tail. In challenge bitches Maud Torrington was placed ahead of Spinaway, a correct decision. In open dogs, a repetition of the other shows, Ornatius first, with Pious Pembroke runner up; third prize going to Elcho. In open bitches a surprise was in store, first prize was given to quite a fine bitch in Second Sight; second to Bestwood Daisy, brimful of quality, each had their admirers, and I leave them for the present; third to Lily of Gainsboro. The rest will not set anything on fire.

FOXHOUNDS.

One entry in each class, Trailer, second at Kingston, making an easy win here. The first in bitches is not nearly so good as the dog.

POINTERS.

These were good in quality, Mr. Davey bringing on his team. In challenge dogs, heavy-weight, there were no entries, and Belle Randolph won in the corresponding bitch class. Devon Nell taking second. In challenge light-weights Pommery Sec made another win in his class, Fan, Jr., being again first in bitches. In open dogs 55lbs. and over, Tempest again defeated Westminster Drake, King Bow's Bow, the Kingston dog, being absent, having run away from home, his owner had to leave without him. Open bitches saw Revelation, quite a nice bitch, the winner, Ighfield Madge taking second. In open bitches Mr. Davey again showed first and second in Lady Gay Spanker and Miss Rumor, both are very nice bitches and mentioned at Toronto show, Frivolity winning third prize for the Mount Royal Kennels; she is not good in head properties.

ENGLISH SETTERS.

Another surprise was in store for some of the winners at the other shows. Kent II. was placed first over Edgemark, the winner at Kingston, Hamilton and Toronto, third going to Ighfield Rhulas, vhc. to Kent's Rex, second prize winner at Kingston.

IRISH SETTERS.

Seminole again defeated Glen Jarvis, third going to Shot, heavy in skull. Max, vhc., is not good in color. The rest followed in the wake. In bitches, Elfrida won, good in head and color, over Aureo, second prize, who is now well known. Third prize to Ellen Vannan, vhc. to Rose Elcho, mentioned before.

GORDON SETTERS.

Dr. Dixon's team again cleaned out the prizes with Ivanhoe and Leo B. in challenge dogs, Duchess of Waverly in challenge bitches, Hilda winning second. Open dogs, two fairly good ones were shown, Kent winning first, Jim Dandy second. In open bitches that nice young bitch Lady Waverly won, with Clip second prize.

COLLIES.

Roslyn Wilkes here to compete for special only, left Roslyn Dandy a winner in challenge dogs. Metchley Surprise had a walk over in the bitch class. In open dogs Dowry, with his faulty head and ears, was again placed first. Moss, the second prize winner, is not good in head and lacks hardness of coat; Metchley Wonder II, taking third prize. I consider him a better type and should have been placed higher. In reserve, Rowdy got all he was entitled to; he lacks coat and head not right; Roslyn Conway, a racy sort, taking 4c. In bitches, Bernice was placed first; she is quite a different type to the winners in the dog class. Mayflower won second, not so good in head, third going to Floss, large in ear. Roslyn Belle, vhc., lacks undercoat.

SPANIELS.

Samson and Bradford Gladys were alone in their respective classes in field spaniels. In open dogs first prize was withheld, Brantford Mohawk taking second, with Hindoo third. They have been repeatedly noticed before. In field spaniel bitches Woodland Sallie was alone and Clumber spaniels were the same as at Kingston. In challenge cockers first went to Brantford Red Jacket, Oban taking second and the well-known Black Duke was pegged away back to vhc., Rabbid only getting reserve. Things will be pretty warm around Woodstock just now. In challenge bitches Bessie W. was alone. In open dogs Black Dufferin added another win, with Donovon coming in for second prize. In open bitches Geo. Bell's I Say won well, Woodstock Cora coming second. This turns the tables on Toronto. Brantford Flirt, third. All described last week. Open class dogs other than black had the winner in Redman, second going to Brownie, third to the well-known Rufus, a workmanlike dog, too. In bitches Jessie C. was placed ahead of Brantford Red Riding Hood, the name being long enough to kill the dog. Irish water spaniels had a couple of good entries, Handy Andy winning in dogs, with a nice bitch, Marguerite, short of coat at present, the winner in her class.

BEAGLES.

Not a large class, Roy K. winning in dogs, Vanity winning in bitches, with Stella second. These have been noted before. Also the dachshunde were placed as at Toronto, the winners are now old faces.

BULLDOGS.

Bo'swain made another win, also special for best bulldog. In bitches Bloater Girl won, the rest were not of special merit.

BULL-TERRIERS.

The Toronto awards were reversed in that Prince Bendigo was placed over Top Sparkle, he only taking third, while Common was given second, repeating the Hamilton judging. In bitches some more old faces faced the judge, My Queen getting first, Edgewood Fancy second, third going to Queen of the Dale.

In terriers, pugs, and so on, the winners have been noticed so often it is not necessary to repeat. The miscellaneous class was divided up, five prizes being given, the whippets taking most of it.

PRIZE LIST.

MASTIFFS.—CHALLENGE—Dogs: 1st, Hugh Falconer's Mode. **OPEN—Dogs:** 1st, Geo. J. Brown's Prince; 2d, G. J. Esplin's Carno; 3d, J. R. Short's Victor. Very high com., J. R. Short's Bill Nye and Turk. High com., J. R. Short's Monarch.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—Bitches: 1st, W. C. Reick's Republican Belle. **OPEN—Dogs:** 1st, W. C. Reick's Kingston Regent; 2d, T. S. Vipond's Duke of Wellington; 3d, M. Arabill's Lord Dalhousie. Very high com., Mrs. W. J. Tabb's

Prince. High com., W. G. McNaughton's Faust. Com., Mrs. H. V. Meredith's Carleton. **Bitches:** 1st, W. C. Reick's Zenith. **SMOOTH-COATED—CHALLENGE—Dogs:** 1st, W. C. Reick's Champion Hector. **OPEN—Bitches:** 1st, F. E. Lamb's Nun Nicer.

BLOODHOUNDS.—1st, R. G. H. Huntingdon's Jack Shepard. NEWFOUNDLANDS.—1st, J. A. Minnis's Czar.

GREAT DANES.—Dogs: 1st and 2d, Wolverine Kennels' Favor and Pascha II. Bitches: 1st, Mount Royal Kennels' Minerva's Fawn.

DEERHOUNDS.—Dogs: 1st and 2d, F. D. Monk's Banff and Lennox; 3d, M. Ingres's Chic. Bitches: 1st, F. D. Monk's Belle.

OTTAWA DOG SHOW.

[By telegraph to Forest and Stream.]

OTTAWA, Sept. 23.—The Ottawa dog show opened today. Weather very bad. Judge Davidson commenced judging at 10 A. M. and went through in the same day. Yesterday he sat in the Governor-General's chair, and, therefore, rushed the dogs through. The attendance very small. Nearly all dogs have been through circuit. Mastiffs only one. St. Bernards a poor class. The following are the winners:

GREYHOUNDS.—CHALLENGE—1st, Gem of the Season.—**OPEN—Dogs:** 1st, Justinian; 2d, Plutus Pembroke. **Bitches:** 1st, Jetsam; 2d, Second Sight; 3d, Bestwood Daisy.

ST. BERNARDS.—ROUGH—1st, Othello.—**SMOOTH—1st,** F. E. Lamb's Nan Nicer.

POINTERS.—CHALLENGE—Dogs: 1st, W. H. Hyland's Pommyery Sec. **Bitches:** 1st, W. H. Hyland's Fan N.—**OPEN—Dogs:** 1st, W. Ledyard's Tempest. **Bitches:** 1st, Mount Royal Kennels' Frivolity.

ENGLISH SETTERS.—CHALLENGE—Dogs: 1st, F. S. Brown's Edgemark.—**OPEN—Dogs:** 1st, Coburnet Kennels' Kent II. **Bitches:** 1st, Mount Washington Kennels' Nix.

IRISH SETTERS.—Dogs: 1st, Seminoles Kennels' Seminoles. **Bitches:** 1st, Mount Royal Kennels' Elfrida.

GORDON SETTERS.—CHALLENGE—Dogs: 1st and 2d, Dr. Dixon's Ivanhoe and Leo B. **Bitches:** 1st, Dr. Dixon's Duchess of Waverly; 2d, Mount Royal Kennels' Hilda.—**OPEN—Bitches:** 1st, Dr. Dixon's Lady Waverly.

COLUMBER SPANIELS.—CHALLENGE—Dogs: 1st, Mercer & Middleton's Johnny Jr. **Bitches:** 1st, Mercer & Middleton's Lady Bromine.

FIELD SPANIELS.—CHALLENGE—1st, Andrew Laidlaw's Samson.—**OPEN—Dogs:** 1st, Frank Cocker Kennels' Brantford Mohawk. **Bitches:** 1st, Luckwell & Douglas's Woodland Sallie.

COCKER SPANIELS.—CHALLENGE—Dogs: 1st, Brantford Red Jacket. **Bitches:** 1st, Andrew Laidlaw's Jessie W.—**OPEN—Dogs:** 1st, Luckwell & Douglas's Black Dufferin. **Bitches:** 1st, Bell's I Say.—**ANY OTHER COLOR—Dogs:** 1st, Othello. **Bitches:** 1st, Brant Cocker Kennels' Red Riding Hood.

COLLIES.—CHALLENGE—Seminoles Kennels' Roslyn Dandy.—OPEN—Bitches: 1st, McEwen & Gibson's Mayflower.

BULLDOGS.—1st, E. A. Woodward's Bo'swain.

BULL-TERRIERS.—1st, Anglo American Kennels' King of Hearts.

FOX-TERRIERS.—CHALLENGE—1st, Woodale Kennels' Ebor Nettle.—**OPEN—Dogs:** 1st, Woodale Kennels' Starley's Jack. **Bitches:** 1st, Mt. Washington Kennels' Rowton Sateen; 2d, Woodale Kennels' Woodale Rival.

IRISH TERRIERS.—1st, Anglo-American Kennels' Exile.

SKYE TERRIERS.—1st, C. C. Shinn's Sir Stafford.

BLACK AND TAN TERRIERS.—CHALLENGE—Rochelle Kennels' Meersbrook Maiden.—OPEN—Dogs: 1st, Rochelle Kennels' Broomfield Sultan. **Bitches:** 1st, Anglo-American Kennels' Matchless.

YORKSHIRE TERRIERS.—CHALLENGE—Bitches: 1st, Anglo-American Kennels' Venus.

TOY SPANIELS.—Dogs: 1st, Yorke & Forshaw's Royal Duke. **Bitches:** 1st, A. M. Goldsmith's Calumet Alice; 2d, E. Bradford's Fannie.

PUGS.—CHALLENGE—Dr. Cryer's Bob Ivy.—OPEN—Dogs: 1st, Miss M. Ballentine's Curtis. **Bitches:** 1st, Howard Bros.' Sateen.

The rest of the classes follow in the same way as at preceding shows.

AMERICAN KENNEL CLUB MEETING.

The regular quarterly meeting of the American Kennel Club was held at its rooms, No. 44 Broadway, New York city, on Thursday, Sept. 24, President August Belmont presiding. There were present the associate secretary, James L. Anthony; California Kennel Club, J. T. Edwell Richards; Collie Club of America, J. D. Shotwell; English Setter Club, Wilson Fiske; Macomah Kennel Club, James Mortimer; National Beagle Club, H. F. Schellbass; Rochester Kennel Club, W. Whitney; Southern California Kennel Club, James Watson; Toledo Kennel Club, Dr. H. T. Foote; Great Dane Club, G. Muss-Arnolt; American Spaniel Club, E. M. Oldham; New York and New England Poultry and Kennel Club, W. B. Churchill.

Minutes of the last meeting read. Mr. Anthony: I move the adoption of the minutes as read, with the exception of the portion referring to the report concerning the pointer special prize, and I ask that that be laid over for further consideration, for the reason that at the last meeting it was impossible to have the entry blank produced which was made at the Washington show. I expect Mr. Webster, if he shall be present at this meeting, will have it in his possession, and will produce it. I have been informed that it bears upon its face, the signature of the Charlotteville Field Trial Kennel Club, Mr. Dexter, owner, and signed by him. If so, that disposes of the question. The whole matter rests upon the question whether, at the time of the entry by the Charlotteville Field Trial Kennel Club, it was the property of Mr. Dexter, and whether he signed that entry as the owner of the kennel. In that event, the dog could not compete because the special stated that it must be for dogs owned and shown south of the Ohio River. Mr. Dexter lives at Buzzard's Bay, Massachusetts, and as he was the sole owner of the kennel his dog was not entitled to entry. On that ground I ask that that portion of the minutes go over, in order that when it comes up again we may have the original entry produced.

The Chair called upon the secretary to state what had transpired since the last meeting in regard to the matter. Mr. Vredenburgh stated that the secretary of the Washington City Kennel Club had called upon him and stated that he would be glad to furnish him with the entry blank. Mr. Richards moved that the minutes be confirmed. Motion seconded and carried. The secretary's report was read and approved. It was in part as follows:

Since our last meeting I have received applications for admission to membership from the following clubs: Mohawk Valley Poultry and Kennel Club, of Gloversville, N. Y.; the Omaha Kennel Club, of Omaha, Neb.; the Blue Grass Kennel Club, of Lexington, Ky. These clubs have complied with all the requirements of the American Kennel Club, and are eligible to admission at this meeting. In the case of the Blue Grass Kennel Club, I would report that its inaugural bench show began on the 22d inst., and it respectfully petitions this club to recognize its awards. I would recommend such action at this meeting, upon the condition that it complies with all the requirements demanded from active members. The following credentials have been filed at this office:

From the Duquesne Kennel Club, appointing Mr. James O'Hara Denny as its delegate; and from the New York and New England Poultry and Kennel Club, appointing Mr. W. E. Churchill as its delegate. I submit herewith resignations as active members from the following clubs: Buffalo Kennel Club, of Buffalo, N. Y.; South Carolina Kennel Association, of Greenville, S. C.

Aug. 14, 1891, Mr. C. M. Munhall, secretary Cleveland Kennel Club, filed at this office a notice of the suspension by said club of Mr. J. R. Frost for a violation of its bench show rules.

Aug. 17, 1891, complaint was made with me that the Louisiana Poultry and Pet Stock Association, of New Orleans, La., had failed to pay the prize awarded at its last show to Mr. Roger T. Harrison, New York. Mr. Harrison has made demands for said prize, and, under same date, I officially notified by mail the secretary of said club of the complaint, and requested a prompt liquidation of the amount due the exhibitor. No replies have been received by either Mr. Harrison or myself, and I would therefore recommend the enforcement of bench show rules Nos. XXV. and XXVIII.

At the annual meeting of this club, held Feb. 21, 1889, the following resolution was adopted: "That the Canadian Kennel Club, and all awards under its rules, its disqualifications and suspensions, shall be recognized by the American Kennel Club. The purpose of this resolution is to bring into a close connection the bench show clubs and exhibitors across the border and thus give substantial aid and assistance to the Canadian Kennel Club, then about organizing, and to practically bring together all factions and kennel interests in the United States and Canada. We are now completing the third year of this agreement, and it would appear that the American Kennel Club receives very little return for the aid it has given. It is true that you have received recognition of each other's registrations, yet we give the Canadian clubs the same benefits and advantages as are given to our own members, who have to pay annually dues therefor. The Canadian clubs do not contribute one dollar toward the support of this club, and our Canadian list of associate members and subscribers to the Gazette combined, only reaches a total of nine individuals. I therefore report the result of this action, deeming it my duty to keep you informed upon all matters pertaining to the interests of the American Kennel Club, and now leave the matter in your hands for consideration, and for such action as you may deem desirable.

In closing my report, I beg to bring to your attention the following editorial, published in FOREST AND STREAM, Aug. 27, 1891, entitled "It is not so much concerning?" and the official reply thereto, which will clearly inform you of the position of the members of the true state of affairs regarding the litigation now pending against this club and a few of its associates: [Here followed the FOREST AND STREAM article of Aug. 27, and the letter of Pres. Belmont published in our columns last week.]

The treasurer's report was also read, and on motion approved as follows: I herewith submit my report of moneys received and disbursed by me during the year 1890 to date.

Receipts from all sources from Jan. 1, 1891, to date.....	\$9,059.61
Expenses for same period	6,069.13

Balance on hand

Respectfully submitted, A. P. VREDENBURGH, Treas.	\$2,990.48
---	------------

Mr. Watson, secretary of the stud book committee as follows' and report was adopted: The number of paid registrations up to date is 2,653. To show the great advance made this year it may be stated that up to the end of August the number was 2,444, while last year for the same period the total was 1,490. The following cases have been passed upon by your committee: Pedigree of Bran, 15,700. This dog was registered as by Nulla more (4,701) ex Dot (9,566), and the Chestnut Hill Kennels state that it should have been by Strephon ex Dot. This error also affects Lassie Dorf, 16,210, and Bran's Jessie, 16,550. As the error was not made by the American Kennel Club officials your committee decided that the entries be cancelled, and that any new registrations must be at the expense of the owner.

Pedigree of Hebe K. The owner of the colored bitch Hebe K. and her owner make contradictory statements regarding the pedigree given, but as the breeder is the one who lodged the information that the pedigree is incorrect it has been ordered cancelled. Pedigree of Ice Palace Queen, 16,775. There is no dispute that the pedigree as registered of Ice Palace Queen, 16,775, is incorrect, and has been ordered cancelled.

The attention of the stud book committee is, however, drawn to the acknowledgment of J. T. Pincus, who, under date of April 13, says that he was told that the pedigree he gave was correct. Two requests for information as to who misled him have failed to elicit any response, although he was duly advised that his refusal would necessitate the case being placed before the club for further action. Your committee recommends that J. T. Pincus be suspended from membership until he has furnished the information requested.

Pedigree of Taylor's Cleo, 22,237. The owner of Lyncoke Elsa, 3,019, during the year 1889, when she stated to have whelped Taylor's Cleo, denies that she had any puppies in 1889. The registration has been cancelled.

As no response can be had from M. T. Mason, of Northampton, Massachusetts, as to his reasons for making such an entry, it is recommended that action be also taken on his refusal. The penalty of suspension against James G. Burns, of Buffalo, has been removed in accordance with the resolution passed by the executive committee.—JAMES WATSON, Secretary.

Reports from special committees being in order, the secretary read the following, on field trials and coursing meetings, submitted by Chairman Child, and laid on the table:

This committee recommends the reconsideration and repeal of the resolution passed by the executive committee of the A. K. C., May 22, 1880, relative to the definition of field trial record, so far as it relates to the same. Respectfully recommends the adoption of the following resolutions by the executive committee of the A. K. C.

1. Resolved, That only such field trial and coursing winnings be recognized at the American Kennel Club bench shows, as are made at a meeting held under the auspices of a club, a member of the A. K. C., or if, as held under the auspices of a club not such a member, at a competition open to all. 2. Resolved, That a dog winning two first prizes in stakes open to all field trial, or coursing meetings, held under the auspices of a club a member of the A. K. C., shall have won the title of field trial champion.

President Belmont: I have not handed in any report with reference to any arrangement to be made with the Coursing Club, because Mr. Whiton and myself have not actually reached a conclusion concerning it. I beg to report progress in the direction of a amicable arrangement, and such as would work perfectly well, but the feature which I fear will be liable to wreck an arrangement which we can make is that the Coursing Club desires the American Kennel Club to publish practically a coursing calendar, and the estimates of the printer upon the publication of such a volume are so expensive that I am afraid, unless the Coursing Club is willing to guarantee it, it would entail a considerable loss, besides occupying a large portion of the time of our secretary and his assistants. Unless some change is made in this respect, I desire that some other arrangement should be perfected.

Dr. H. T. Foote, of the committee appointed to investigate the breed of dogs of the Boston Terrier Club, reported as follows:

The committee has had very little opportunity to investigate the matter, and have been unable to learn anything of consequence until a few hours before the meeting was called to order, when Mr. Power, of the Boston Terrier Club, presented the stud book of the specialty club, containing some 32 pedigrees, carried to the third generation, and some of them to the fourth and fifth generation. As I understand from him, these dogs, in pedigree, were all dogs of this type, and he has the names of eight others that are eligible for registration in the stud book. He also expressed a number of objections to the stud book similarity in type, and assured us that good specimens of the breed were to be had from the first cross, or the second or the third cross—that is to say, breeding a dog from the third generation would insure a good specimen. One of the members of the committee, Dr. Glover, is not able to be here, and Mr. Watson and myself, while we feel confident of the existence of such a breed of dogs in Boston, are not able to recommend their recognition. That the committee is not strictly called upon to do so, as I understand, the committee was appointed to establish the existence of the breed. We feel that if the matter was laid over until the May meeting, and the Boston Club would show the dogs, many of us would go to the Boston show, where there is always a number of exhibitors, and the club undoubtedly has been very actively at work and appear very anxious to establish the breed, and that we should encourage them, but neither Mr. Watson nor myself feel satisfied to warrant a report that such a breed does actually exist to any considerable degree. That they have a number of very good specimens, perhaps a few hundred, as Mr. Power states, there is no reason to doubt. I have had no time to hand in a report on this matter.

Mr. Watson said he thought they had made all the investigation of the matter possible, and that they felt that there was not sufficient tangible ground to warrant all the Boston club desired. He thought it wrong to come to the American Kennel Club to enforce the dog upon the public; the public ought to enforce the dog upon the club.

Mr. Power being granted the privilege of the floor, said:

I would like to say that the Boston Terrier Club has proved the existence of this breed, and I have here photographs taken at random that show the similarity of the type of dogs, and they do not represent our first prize winner, or second or third. I think by this means we have proved the existence of the dog, and the existence of the club. The club now numbers fifty members, and it is in active operation. It is very difficult to get clubs throughout the country to provide a class for dogs unless they are recognized by the American Kennel Club, and it would be almost useless for the members to show their dogs, as the winnings would not count, and it would simply be throwing money away. The club means business and are very anxious to have recognition for these dogs. We can show thirty-two guaranteed pedigrees of three generations or over. Every pedigree has been adopted, name by name, after investigation of the stud book committee, and has been presented to the club and urged before the club for their action, and every one has been accepted. It is impossible to breed a dog from a bulldog terrier and make a Boston terrier in the first cross or second cross. If a dog was brought up, as the chairman of your committee suggests, before a judge, and was not a Boston terrier, he would be thrown out of the class immediately. We claim this dog has been bred for twenty years in pure blood, and the club is ready to stand behind the dog and push it. We would like your favorable consideration at this meeting. The club is acting in good faith, and is just as anxious to have a good dog as you are.

The report was filed, and the chair was empowered to appoint a committee to suggest safeguards under which the Boston Terrier Club may be admitted as a member of the American Kennel Club.

Whereas, The New Jersey Kennel Club, having elected Charles J. Peshall president, and appointed him its delegate to this club, and by such action indorsing the course pursued by said Charles J. Peshall toward the American Kennel Club, and in effect being parties criminals in proceedings prejudicial to the interests of this club;

Resolved, That Article 9, Section 1, of the constitution be enforced, and that the New Jersey Kennel Club be, and hereby is, expelled from this association.

Mr. Richards moved as an amendment to that resolution the following:

Whereas, The New Jersey Kennel Club has elected Charles J. Peshall president, after his disqualification by the American Kennel Club;

Resolved, That Article 9, Section 1, of the constitution be enforced, and that the New Jersey Kennel Club be, and hereby is, expelled from this association.

Mr. Max Wenzel thought the New Jersey Kennel Club should not be made to suffer on account of any action of its president, and should not be expelled without the opportunity to be heard.

Mr. Richards offered this substitute amendment, which was adopted:

Whereas, This club is informed that the New Jersey Kennel Club has elected Charles J. Peshall president, and has appointed him its delegate to this club since his disqualification by the American Kennel Club;

Resolved, That this club considers such action prejudicial to the welfare of the American Kennel Club under Article 9, Section 1 of the Constitution.

Resolved, That charges be preferred against the New Jersey Kennel Club, based upon their election of Mr. Peshall as president and as its delegate to this club, after his disqualification, for conduct prejudicial to the welfare of the American Kennel Club, and that it be referred to the advisory committee and to offer the New Jersey Kennel Club an opportunity to be heard upon the charges.

President Belmont asked for a motion giving associate members and members of kennel clubs the privilege of being in the room at any of the meetings, stating that at the last meeting there was some misunderstanding on the part of one or two associate members who were pre-empted concerning a ruling made by the chair, ostensibly to get rid of a certain stenographer, and who charged themselves with the motion that outsiders should be excluded from the room. He further stated that the resignation and led to the writing of a sharp letter on the part of another. It was decided that at any public meeting of the American Kennel Club any member of a club a member of the American Kennel Club and all associate members may be permitted to be present.

Mr. Shotwell: I want to call attention to the furnishing by the secretary of official reports to the proceedings of the club, to the different sporting papers. It is a very unusual proceeding. They have an opportunity of sending their own reporters here and writing up their own reports. These reports are furnished at some considerable expense, which I think should be avoided.

The chair stated that the reason that course was adopted was because for some time the papers did send their own reporters and it was very difficult to tell which reports were correct.

Mr. Shotwell moved that the secretary be instructed to discontinue the practice of furnishing reports to the papers after this meeting. Motion carried, Mr. Watson voting in the negative.

The Mohawk Valley Poultry and Kennel Club, of Gloversville, N. Y.; the Omaha Kennel Club, of Omaha, Neb., and the Blue Grass Kennel Club, of Lexington, Ky., were elected members.

Mr. Churchill moved that the secretary be instructed to inform the secretary, that their wins be recognized, be adopted. Carried, five to four.

The resignations of the Buffalo Kennel Club and of the South Carolina Kennel Association were accepted. The charges preferred against the New Orleans Club for default in payment of their prizes in January was referred to the advisory committee with power.

Regarding the communication from Mr. W. L. Washington, requesting this club to define the breeder of the Irish setter bitch Ruby Glenmore, Mr. Watson moved that the breeder of Ruby Glenmore was the Glenmore Kennels. The owner of the kennel at the time of her being exhibited at Washington did not own the dam at the time she was bred and was therefore not the breeder. There is suggestion from the part of Mr. Washington in any of his entries. Motion lost by four to two and matter referred to the stud book committee.

Resolution recognizing the Canadian Kennel Club and its awards, adopted at the A. K. C. meeting, Feb. 21, 1889, was laid over until the next meeting.

Mr. Watson moved that the secretary be instructed to notify Mr. J. P. Pincus, that, in default of a satisfactory explanation from him in regard to the pedigree of Ice Palace Queen, his name will be suspended and subject to disqualification by the club.

The same motion was passed in regard to the pedigree of Taylor's Cleo, referred to in the report of the stud book committee.

The report of the special committee on field trials and coursing meetings was laid over.

The secretary was instructed to ask the Washington City Kennel Club for the entry blank of the Charlotteville Field Trial Kennel Club its late show.

Dr. H. T. Foote gave notice that he would offer the following amendments to the rules: Rule XII. A dog suffering from eczema, mange or any contagious or objectionable diseases, etc., as now stated. Bench show committees may refuse to receive such dogs, classes for dogs of pure breeds or the choose, but in the following classes: 1. Omit "pure breeds of." 2. As it stands. 3. Omit "recognized" after prize in third line. Insert "in an open class;" after "won" in the fourth line insert "such." Rule XVII, Art. 4. The puppy class shall be for dogs over six months and under eighteen months in age. Art. 6. After "class" in third line insert "one of which shall have been won at New York, Boston, Chicago or Toronto, shall have the privilege," etc. Rule XXI. Special prizes shall only be offered for dogs of pure breeds, and no dog, etc., as at present. Rule—(about XIII.). Errors made in entering dogs may be excused unless another exhibitor is injured thereby, when the exhibitor shall be disqualified. Rule—. No shows shall extend over four days, including the last days of receiving and the first day of liberating the exhibits.

The meeting then adjourned.

WHITE VIOLET.—Editor Forest and Stream: A friend of mine recently called my attention to an advertisement in FOREST AND STREAM offering the "celebrated bull-terrier bitch White Violet for sale." Now, the celebrated White Violet—the one winning six firsts and four specials in England, first and special at Lynn (beating ch. Starlight), and first at Boston, 1891—is now in my kennel with five beautiful little puppies. I bought her from Mr. Harris, of North Wilmingham, and have his letters to prove it. If any one purchased the bitch advertised he has been greatly cheated. I should have written you about it before, but the confusion of moving with my family from Brooklyn to this place has prevented. The advertisement occurred in an August number, but which I cannot say, as the copy containing it is packed away among my books, etc. I think it due your readers that this should be exposed.—W. O. SNEED, M. D., Riverhead, N. Y.

DOG CHAT.

"MOST haste, less speed," is a saying that generally proves itself true, and that "the race is not always to the swift" is another one very applicable to this case. At the exhibition grounds at Toronto a small steamer plied between the city and the grounds. It is a pleasant sail enough, and "Honest" John Davidson, the two Lewises and Dr. Kimball thought the trip would be a change from the crowded cars on the second evening of the show. The whistle blew and "Honest John" and Joe Lewis, being swifter of foot than the other two, succeeded in jumping on board a steamer just as she started to move out of the dock. The other two were left, but not badly, for the receding steamer never stopped her engines till she landed the erring passengers at St. Catharines, many, many miles down the lake. No trains till morning and noon next day before they could return. It was hard, but the boys had their laugh just the same, and Joe Lewis, after encountering the various experiences of a trip to Europe, has pasted in his hat the motto "Look before you leap."

In talking with one of the Buffalo Kennel Club members we found that about the only reason they are not moving much in kennel matters is, that they cannot get a suitable hall to hold a show in, and it is suicidal to their interests to have one in the building they unfortunately had before. We hear that their president has resigned from the associate membership.

A marked catalogue was issued on Thursday at the Toronto show. Numbers corresponding with the catalogue were issued to handlers in the ring, although in many cases their use was allowed to lie idle. It is a feature that in future should receive the attention of every show manager, large or small. The public pays admission to see the judging and buying a catalogue expect to be posted as to everything that is going on, but if the handlers are not numbered in the ring they might as well leave the catalogues at the door.

Mr. T. G. Davey seems to have secured a good breaker in Mr. Hallam, judging by the way his dogs were shown and their nice condition. This handler we believe secured the prize for the best training and handling at one of the principal field trials in England in the spring. The prospects for the field trials at Chatham, Ont., are very flattering, and a goodly number of entries are assured. Messrs. Davidson and Smith will do the judging.

The American Pet Dog Club will hold its next meeting at 329 Lexington avenue, New York city, Oct. 14, at 2 P. M.

Mr. A. H. Moore has still further strengthened his kennel by purchasing from Mr. Booth the St. Bernard bitch Lady Hopeful, by Royal Hesperus out of Beryl. She has some good prizes to her credit, and is said to be brimful of quality.

Mr. Glazier, of Salem, Mass., is a man getting together a strong kennel of bloodhounds, and it is to be hoped he will afford the public every opportunity to see these noble hounds at coming shows. His latest purchase is the noted dog Jack the Ripper, from Mr. R. V. Blachford, Jackson, Miss. Would it not be well with a change of ownership to change its name as well, something not quite so blood-curdling.

The attorney for the English Kennel Club, Mr. Deuridin Dutton, has been instructed to proceed against Mr. Freeman Lloyd, unless he apologizes unconditionally for his remarks in our Philadelphia contemporary anent Mr. Shirley and the ownership of the E. K. C. Mr. Lloyd, judging from the correspondence published in the English papers, seems to have apologized sufficiently for his misapprehension, but the club persists in rubbing it in a little too hard, and we applaud the stand he has taken. There is a little too much absolutism in some of these matters.

The police of New York city have been busily engaged the past week in taking the dog census for the first time. It is a peculiar undertaking and not unfringed with danger, but the owners seem to bear it in good part, and it is not half so much trouble as taking the human census. Mayor Grant is responsible for the order, and there is little doubt that the Police Pension fund will be materially increased thereby. From four to twelve men have been detailed to cover each precinct, and it is estimated that the number of dogs in New York will not fall far short of 70,000. The law under which they proceed to enforce the taking out of a license is as follows: "Sec. 153. Every owner, person or possessor who harbors any dog shall take out a permit for each dog at the Permit Bureau, paying the sum of \$3 for the same. Sec. 156. The Mayor of the city of New York is hereby authorized to take such measures as he may deem most effective to carry into effect the provisions of this article." They say this law is obligatory. It declares positively that owners shall obtain licenses for their dogs. The enumerators work from 8 A. M. to 9 P. M., and it is expected all the returns will be in by the middle of this week, and the owners of those found to be unlicensed will receive notice to step up and pay.

We regret to hear from the manager of the Flour City Kennels, Rochester, N. Y., that their stud dog Horace has joined the majority. He died on Sept. 16 after a few days illness. He was by champion Minton out of Duchess. By the way, we hear that Mr. Whitney, the owner of this kennel, disgusted with the treatment he received at the hands of the Mastiff Club and its secretary, in reference to a pedigree which he wished to trace and their dilatory action in regard to the club cups he won in the spring, returned the latter to the club, not wishing to have anything more to do with it. This is not the way to treat one of our most influential and enterprising mastiff men. A club that has the interest of the breed at heart should do all in their power to keep such men in their ranks and encourage them to greater efforts, for to breeders like Mr. Whitney must we look for importations of desirable stock that will tend to improve the mastiff breed.

The fox chases at Lexington, Ky., cannot be said to have been a success, and with the thermometer playing with the nineties and a dry, dusty track, we do not see how it could have been otherwise. Foxes were started, but generally turned "brush" when they heard the yells of the "coons" by the grand stand, and were either chopped by the hounds which had just started or ran back to the sheds. On Thursday one fox got well around the track, and the hounds getting on the trail, the track having been watered, they ran a pretty race, several horsemen following them over the miniature hurdles set in front of the grand stand, led by General Gentry's twelve-year-old son, a true chip of the old block, and who was first in at the finish. A deer was also let loose, but turned back and ran clear through the dogs, who acted as if they thought it was a calf. The second attempt, the next day, proved a better one, and the deer led them a merry chase, making a gallant effort to jump the 10ft. fence surrounding the track. The sports were interspersed with bicycle races, the ancient game of tilting at the ring, and drilling of local militia.

Mr. Reick, owner of the New York St. Bernard Kennels, sailed yesterday for Europe. He will be away a month and will have some shooting with James Gordon Bennett.

On Thursday, about noon, General Gentry, who was untiring in his efforts to make every one feel happy and at home, corralled a number of owners of foxhounds, dogmen and others, and taking them to a tent in the infield, invited them to tackle a bountiful lunch and its Kentuckian fixings. Right willingly did they do it, and then we were treated to some fine old Kentuckian speeches, and P. H. O'Bannon, of Blue Ridge Kennel fame, nobly responded for the dogmen there and at large, in his happiest vein.

On Saturday afternoon an auction sale of dogs took place and Mr. "Amazement" Bell rang them up with his name-sake, and acting as auctioneer disposed of several dogs at low prices. We have not heard who secured the lucky ticket at the raffle for his noted cocker Obadiab, at a dollar a chance, but at the same time we all hoped it would be the fair reporter for the Kentucky *Leader*, who was presented with most of the tickets held by the susceptible dogmen present.

The Danbury (Conn.) dog show in connection with the fair is always a pleasant gathering, and should be taken in by all well-regulated dog men. There is no entrance fee and prizes are quite good, while excellent care is taken of the exhibitors. The show opens Oct. 6, and entries will no doubt be accepted this week. Mr. H. W. Lacy will again judge all classes. We believe several New York kennels will be represented. The show opens really Oct. 7, at 10 A. M., allowing ample time for exhibitors to get there.

We are indebted to Mr. Jean Grosvenor for some very interesting pictures of noted dogs in England, taken during his recent visit to that country with Mr. E. H. Moore. They represent champion Alta Bella and Mr. Moore, Lord Bute, Young Philimmon and Mr. Shillecock, Cardinal Beaufort, the mastiff, and several others, and enable one to form a very good opinion of these dogs without any aid from the deceiving artist's pencil. Mr. Grosvenor says he found the "doggy fellows" in England in most instances quite the right sort, and he had such a good time that he intended sailing on the Majestic a week or so since for a stay of two or three months. Our absence at the shows is our excuse for not writing of this before.

Junius Henri Brown, in the St. Louis *Globe-Democrat*, strikes the right chord when he says: "A liking for domestic animals, particularly for dogs—these appeal to virtues which many men do not—is an amiable quality, denoting sympathy and benevolence. He who hates dogs is apt to be at heart a misanthrope; he who abuses them is a greater brute than they. But there are degrees of liking; there are attachments to animals, it seems, that transcend reason and trespass on the confines immemorably ascribed to humanity. Such are the attachments which many women feel or feign for dogs of the most diminutive and ignoble kind. Men in general of the dog fancying order fancy dogs of size and dignity such as St. Bernards, mastiffs, spaniels, setters, collies and hounds. They make companions of them, educate them, and get great pleasure and comfort from their intelligence, fidelity and affection. But they do not treat them as they would their dearest friends, or as superior beings. It would be well if the same might be said of the peculiar canine sympathy of many women which manifests itself in so obnoxious a form. In the streets you meet them bearing miserable curs in their arms and generally prattling to them in a silly, sentimental way, as if anxious to advertise their folly. Occasionally they put their burdens gently down, and, holding a cord fastened to their collars, permit themselves to follow wherever the cur may lead. They are prone to such comments and soliloquies as: 'Where are you going, darling Fido?' 'You mustn't act so naughty, sweet Blanche,' 'Don't do that, my beauty.' 'Your mistress won't love you, precious pet, if you behave so badly.' Sometimes they translate such phrases into baby talk, unconscious, it is to be hoped, of their maudlin fatuity."

The joke was on worthy Dr. Foote at Toronto. The Doctor is not a heavy-weight by any means, but he can reach pretty high. He is always ready to fill a breach when required, and seeing a greyhound without a competent handler he undertook to show it to the best of advantage. Mrs. Foote sat at the edge of the ring when she heard a lady behind her say to her escort: "Just look at that tall slim man, he reminds me of the greyhound he is holding." "Yes," he answered, "same breed!" and Mrs. Foote enjoyed the joke as much as any of us, Doctor included.

After many delays and overcoming of many obstacles, San Francisco now has a model public pound. It was to be ready for occupancy on the 15th. The main building of the Animals' Home is 55ft. long by 30 wide, and is in the colonial style of architecture. We give particulars of the design of the building so that others may profit by the evident good arrangements made for the painless taking off of the city's stray dogs: To the south of the administration building is what is known as the Canine House, which is 31ft. square. The walls are 14ft. high, with a hip roof, making the building about 38ft. in height. The roof is supplied with ventilators and skylights, and is very commodious and airy. The floor will be of asphaltum, and plenty of water will be supplied to keep it clean. The floor has a pitch to the southeast for drainage to the main sewer. The house has an 8-foot entrance, so that the dog wagons may enter and deposit their loads. The floor will be divided off into small sections by movable fences or partitions, by means of which any dog or number of dogs may be kept from the rest. In the southeast corner there is an opening into which fits a cage. When it is decided to asphyxiate certain dogs they will be moved toward the cage, which closes and runs on a track to a small structure known as the lethal chamber. The lethal chamber will be 4½ft. by 9 and 4ft. high. It will be built of pressed brick lined inside with glazed tile. The floor will be of cement and the top a thick plate-glass covering. The door will screw in and be made air-tight. When the cage containing the dogs runs into the chamber the door will be closed. A gaspipe connects with the bottom of the chamber and the gas will be turned on. It is calculated that it will take from seven to nine minutes to complete the asphyxiation. When the time is over a stop will be taken out of the top of the chamber, and the gas that escapes will be ignited and pass off into the air without odor or offense to any one.

*The son of Mr. Dudley, whose father has been quoted as authority for the statement that the Cobden Club of England has a corruption fund of \$1,000,000 to lay out against McKinley, is well known, or was rather, to dogmen as a judge of mastiffs some few years ago. Lately he has taken no active part in mastiff affairs, although he still breeds them.

During the Lexington, Ky., show Mr. Geo. Bell purchased the field spaniel Newton Abbott Farmer from Mr. Cook, of foxhound fame.

Mr. R. D. Morgan, of Akron, O., sold his first prize winning pointer bitch Naso Bell, by Tory White out of Nan of Naso, to Mr. Sphar, whose foxhounds did so well at the show. Though not in the first flight as a show bitch Mr. Morgan tells us she is a good one in the field.

Mr. F. G. Taylor, of Toronto, is playing in hard luck just now. First his crack greyhound Scavenger was run over and had a piece of his tail taken off. The week after Mr. Taylor himself slipped in getting on or off the cars and had

his foot so crushed that though the doctors are trying hard to save it, it may eventually have to be amputated. All dogmen will sympathize with Mr. Taylor under the circumstances.

"Uncle Dick" writes us that the Johnstown Fair dog show was quite an enjoyable one. There were about 100 entries, Mr. Fellows acting as judge. He adds that the people in the Mohawk Valley are preparing for their show in December, when Mr. C. H. Mason will officiate in the ring.

The death of Watch adds another nail to the coffin of high prices in St. Bernards. St. Bernard breeders, and especially those in England, will receive the news of this grand dog's demise with sincere regret, not only because he was almost, if not quite, the best in the world, many good judges scoring him ahead of Sir Bedivere, though excepting in his grand head we could never see it. The price given for Watch was at the time second only to that of Plinlimmon, \$4,700 being the figure; and add this to the price of the grand ones that have passed away since the New York dog show, and our breeders have lost almost \$30,000 in St. Bernards alone. The money value does not, however, represent half the loss in the breeders' eyes, as such animals are not replaced in a day, however willing they may be to dip down into their pockets. Watch had undoubtedly the grandest head ever seen on a St. Bernard in this country. He was imported in the spring of 1890 by Mr. Poag, of Toledo, O. Watch has not been seen in public as often as he might have been, and was to a certain extent lost to the mass of St. Bernard breeders. He was by champion Guide out of Sans Peur, and therefore royally bred. He stood over 33in. high, and weighed in ordinary condition 220lbs.; he never was shown really well fleshed. It was only through assiduous care that he did not die when he first landed here, as he was badly treated on board ship and was sick for some time after. All dog lovers will sympathize, as we do, with Mr. Poag in his great loss, and trust that out of the several litters he has secured by him that he has something that will, to some extent, take his place. Watch was whelped Nov. 9, 1887, and was, therefore, quite in his prime.

Gordon setter men must remember that the entries for the Gordon Stake close Oct. 15.

The Pembroke hunt, master Mr. Mitchell Harrison, held their opening meet on Tuesday last with a run of about three miles. A fashionable gathering was present to see the bounds throw off.

We hear that Messrs. Reick, Jacob Ruppert, Jr. and the Westminster Kennel Club will each put up one hundred dollars for a trophy to be competed for at New York for the best American-bred St. Bernard at the latter show, age and conditions not yet decided.

We have received the September number of *Portraits of Dogs of the Day*, and in this issue the Artotype Publishing Co., 94 Reade street, New York, have fairly surpassed previous issues, publishing five instead of four portraits. The St. Bernard champion Hector, mastiff champion Ilford Chancellor, the collie Christopher, a group of Mr. Windholz's setters, and a capital picture of Capt. McMurdo and the pointer Rip Rap to please the field trial men, comprise a collection of pictures that every lover of dogs should be pleased with. This publication is on sale by Forest and Stream Publishing Co.

THE IRISH SETTER.

Editor Forest and Stream:

The prospect for the advancement of the Irish setter has never been so bright as it is to-day, and it only remains for the owners of this beautiful breed of dogs to take advantage of the opportunity that is now afforded them to run their dogs in separate trials to prove to the sportsmen of America that as a practical field dog the Irish setter is far above what he is believed to be by the advocates of the other breeds, and as soon as the ice is broken there is no doubt that many fine dogs will be brought out by their owners that have heretofore been kept in the back ground on account of the existing supposition that the red dog cannot get his duns in mixed trials. It is my candid opinion, however, that in our field trials, as conducted to-day, that the best dog will win regardless of color and breeding. I do not mean to insinuate that in days gone by a different state of affairs existed, but I wish to confine myself to the present of which I am better qualified to speak from personal observation and experience.

Mr. E. B. Bishop is in my opinion doing more for the true interests of the breed than has been done by any one in late years and his importation of that wonderful field trial winner Coleraine from the kennels of the Rev. O'Callaghan will add a stimulus to Irish setter affairs that will be most wholesome in its character, especially as she has already proven her wonderful worth by winning over the best dogs of any breed in England and at the largest and most important trials. In Finglas he no doubt has a dog that will also be of immense benefit to the breed. Mr. O'Callaghan wrote me of this pair while he was having them prepared for the trials and before Coleraine had run, and he spoke of them both as being the "best he had seen." Mr. Bishop has the best kennel of Irish setter bitches that has ever been brought together in America, and with a little judicious breeding he will no doubt produce Irish setters that will elevate their field standard to a high degree.

From a close observation of the best Irish setters of both England and America, I have come to the conclusion that Mr. O'Callaghan's dogs slightly excel ours, as a class, in body and leg formation, but I think the Elcho strain has the best of it in head, and although the Irish setter breeders of America have developed and maintained a very regular type, there is a distinctiveness about the Irish setters that have come from Mr. O'Callaghan's kennel that is remarkable for its uniformity, and it proves beyond question that he is breeding on the correct lines.

My friend, Mr. J. J. Mannion, of this city, an Irishman by birth, and an excellent judge of the Irish setter, spent the greater part of the past spring and summer in England and Ireland, and he has made the very startling assertion to me, that there does not exist in Ireland an Irish setter that has been bred in that country that he would pronounce typical of the breed. This is certainly a very broad statement, but I have received the same information from other sources equally reliable, and therefore cannot doubt it.

The Irish setter classes at the coming bench shows will be very interesting from all accounts, and I look for a new set of cracks to be brought out, but whether they will be superior to the winners of the last two years or even as good remains to be seen. I know positively of some half dozen youngsters that will take considerable beating if they are properly prepared and shown.

As a parting suggestion I wish to impress upon the breeders to not lose sight of the bench form and type of our dogs which has attained a degree of excellence surpassed by that of no breed of the canine race, and that the field qualities can be developed and maintained together with a very high degree of bench form has been proven by the experience of Mr. O'Callaghan whose example it would be well to follow, for as soon as we lose the type, which is most dear to all Irish breeders, we will have lost the Irish setter himself. In a word, keep the breed pure, breed only to high class and proven dogs, and demonstrate to the sportsmen of the world that the Irish setter in America is second to no other breed in existence.

W. L. WASHINGTON.

PITTSBURG, Pa., Sept. 6.

SPANIELS USED FOR SPORT.

BY EDWIN H. MORRIS.

THERE is an old legend referring to the spaniel which attributes the landing of the Danes in England to the sagacity of a dog of this variety. Lodebrooke, of the blood royal of Denmark, and father of Humbar and Hubba, was out in a boat with his hawks and his spaniel, when a sudden storm carried the boat away from the land and drove it on to the coast of Norfolk. This unexpected visitor was quickly secured, and together with his dog was taken before Edmund, the King of the East Angles, and accused of being a spy.

Lodebrooke soon made himself known to the King, who treated him very kindly, and when his skill in the chase was known he became a great favorite. This aroused the jealousy of the King's falconer, who endeavored to get rid of him, but being unsuccessful, he waylaid and murdered Lodebrooke, concealing his body in the bushes. The court soon missed the favorite, and although Edmund manifested great anxiety about the prince, nothing could be ascertained until the spaniel, who had remained in the woods by the corpse of his master, was driven away by hunger, and suddenly appearing, he approached the King and commenced to fawn, and then ran in the direction of the woods, to entice him to follow, and on so doing the dog took him direct to the dead body.

On the crime being traced to the falconer, he was punished by being placed in the prince's boat and committed to the mercy of the sea, which has been described in the following verse:

"Then forth they dragged the falconer,
As by their monarch told,
And they chained him down to the prince's boat,
As soon as the tempest rolled;
And when a huge cloud in the sky
Stood up with a giant's form.
On a wave, that rose to worship it,
They hurried him to the storm."

It seems that the boat was homeward bound, for it reached the shores Lodebrooke had quitted; the boat was recognized, and the assassin, in order to avoid punishment, said that Lodebrooke had been put to death by order of Edmund. This so exasperated the Danes that they determined on the invasion of England.

Without having any intention of trespassing upon debatable ground, it will be as well to remark that the "claims of long descent" which have been urged in favor of this or that variety of the spaniel family, generally commenced where they should have finished, and where an unusual amount of fervor has been displayed in favor of either variety, ignorance or interested motives have invariably been the prompter; hence, instead of our being able to begin with the Elizabethan period, we have traditional history taking us back prior to the Norman conquest. We find some reference to the spaniel in all the early books on sport, but none of them give any good clue for the tracing of the different varieties, they rather refer to them collectively as Shakespeare does in "King Lear" (Act IV., Scene 6):

"Hound, or spaniel, brach, or lym
Or bottail like or trundle-tail."

It is generally admitted by all the early writers that Spain was the home of the spaniel, as the name implies. When that country was at the height of her glory, when her warriors were renowned for their daring and Columbus had contributed to its lustre, the spirit of chivalry was strong in the breasts of those who remained at home, and this found vent in the practice of knight-errantry, in the daring of the bull fights, and was exhibited in a milder form in the pursuit of field sports. It was during this period that the Spaniards brought to so high a degree of perfection both the pointer and the spaniel, and as the wave of civilization extended northward, on its crest was borne the spirit of gallantry with the attendant love of the chase, and the dogs of Spain being so much superior to those used by other nationalities, it naturally followed that they were taken. Although the pointer was frequently used in conjunction with the spaniel by the falconer of those times in England, the latter was generally taken alone, and hence do we find reference to the spaniel as used for the lordly pastime of falconry in many of the early English writings on sport; but in none do we find the sport so charmingly referred to as in "Frank Forester's" lines:

"Lol they muster, lord and lady;
Brow of pride and cheek of bloom;
Pointed beard and tresses shady,
Velvet robe and waving plume.
"Housings gay and bits gold flashing,
Bells of falcons tinkling light;
Chargers tall and palfrey prancing,
Meet for damsel, meet for knight."

It is comparatively easy to thus demonstrate that the spaniel was in general use and was highly esteemed many years before most of the breeds which claim recognition today were heard of, but it is more difficult to explain the existence of several varieties, and perhaps the only good explanation that can be offered is that these dogs came to England through other countries, and not directly from Spain; and the general characteristics, form and color, were undoubtedly the result of the blending of the blood of other varieties of dogs common to those countries, through which they passed, leading to types totally different from the descendants of dogs of direct importation.

From pictures, or from specimens brought direct from Spain, or descended from such, it is clear that in those early days in his native country the spaniel was a dog of medium size, probably about 30 lbs. in weight, standing about 14 in. at the shoulders, more resembling the modern cocker spaniel in build, though more full in the muzzle, and more square than round in skull, in which respects he may be said to be nearer the field spaniel in type, although in general character he did not resemble the modern excessively long and low detachment.

The color of these dogs was liver, white and black, lemon, orange, sometimes with white patches, or a general mixture of the colors, with occasionally solid hues.

The condition of Spain for centuries has not been very favorable to the retention of any great degree of excellence in sporting dogs, and at present no dogs could be found in that country resembling those of the present age, or their prototypes of ages past. The nearest approach to them is to be found in the province of Picardy, in France. They were used in conjunction with the Barbet Griffon, Basset-hound, or Braque, and other dogs, to produce the "setting spaniel" for the hunters with the net, prior to the introduction of firearms, so that eventually true bred spaniels could only be found in England. In that country different districts selected such types as were particularly adapted to the country they were worked over, or perhaps chance and color had much to do with certain varieties being named after, and becoming common to different counties. Hence we find Sussex, Norfolk and Devonshire with types named after them. Formerly there were only two distinctions, those used for land, termed field spaniels, and those more generally preferred for water, called water spaniels. After this came the distinction of counties, color and uses, when the larger varieties, common to Norfolk, Sussex and the Midlands, were called springers, and the smaller kind found in Devon, the West of England and Wales were called cockers.

The water spaniels were sub-divided, and were formerly known as the old English, common to the southern and midland counties, which were liver in color, with occasional white marks, they were of medium size, and were passionately fond of water. The Northern or Tweeddale was very similar in color and instinct, but a trifle more resembling the curly-coated retriever. There were also two kinds in Ireland, the Northern, with much white, and not very thick set, and the ancestors of the present Irish water spaniels, which were then chiefly found in the South, and were liver in color, more cobby in build, and so far superior to any of the other varieties of water spaniels that they have been vastly improved, and are now held in high esteem, while the other varieties have become extinct, leaving the field, or rather the water, clear to the Irishmen.

This is a brief outline of the distant past of the spaniel in Britain, and in order to bring it down to the present we have but to record the introduction of dogs from France by the Duke of Newcastle about two hundred years ago, which were supposed to have been the result of a cross between the Spanish smaller sporting dog and the French Basset hound, these are now called Clumber spaniels, the first name being taken from the Duke's residence in Nottinghamshire, called Clumber House, and they were classed as spaniels, because of their supposed origin, and their being used for the same purpose as the ordinary field spaniel. Still they were known by some as the pheasant dog, because of the lack of a name, some doubt as to their being of the spaniel family, and because at first they were almost entirely worked on pheasants.

The cockers were at this time generally used for woodcock, and the springer or field spaniel, which now comprised all the various strains, were used for all kinds of covert purposes.

The field spaniels being the original, it will be well to adopt the Spaniel Club's order, and speak of this variety first.

The Norfolk spaniel has long since ceased to exist in its old form. He was too heavy and sluggish for the sportsmen of a century since, and he was merged into the stock common throughout England, then known as springers; which perhaps accounts for the liver, and lemon and white, of so many of the working spaniels of that country. There is a probability that the first stock was imported from France, and it may be that it was a prior importation of the dogs which the Duke of Newcastle found in a more primitive state, and which were afterward called Clumbers. There was a decided resemblance in color, and they were much the same in conformation and characteristics.

As the black field spaniel is only a result of modern views and bench show demands, and as the Sussex is the only variety which has been kept without any mixture of the blood of other varieties in earlier times, it will be right to refer to them fully, and as they were greatly used in the production of the black and tan, and solid black modern field spaniel, it will not be out of place, nor can it be taken as an instance of partiality, if the Sussex are taken first, though somewhat contrary to the order of things in club matters.

[TO BE CONTINUED.]

NOTES AND NOTIONS.

THE English correspondence of a Western paper gives a most astounding statement as to the action of the English Kennel Club in the permanent disqualification of Mr. Wm. Graham, and I cannot but feel that there must be something unexplained that accounts for such an unheard-of course. As it stands, dense stupidity and intolerable despotism strive for the pre-eminence. As stated, the trouble arose in Mr. Graham's dog being second to two dogs placed equal firsts, the full prize money for second being paid to Mr. Graham. The owners of the equal firsts being dissatisfied with the amount they received appealed to the Kennel Club, who ordered Mr. Graham to return the money received "in error," which he refused to do, and was thereupon disqualified for life. It seems past understanding how there could be any fog on what Mr. Graham's rights were with any one commonly conversant with the English language. "Equal" is a word of most positive and exact meaning, as definite as "better" or "worse," there is no possible chance for ratiocination here. The meaning of two dogs being "equal" is so obvious that it would be an insult to the intelligence of the readers of FOREST AND STREAM to offer an explanation. As they were equally entitled to the prize money there was but one way of settling it, an "equal" division. The owner whose dog was second was clearly entitled to the prize offered, and it is evident that the equality as to the first position in no way affected his rights. To rival this intense stupidity, the Kennel Club is said to have inflicted a penalty, properly incurred only by discreditable or dishonorable conduct, and it needs no argument to show that refusal to surrender a right properly belonging—in a word, a right—can never be discreditable or dishonorable. The assertion of the Kennel Club, as propounded in this reported decision, is that refusal to comply with their behests is disgraceful! This is too monstrous a doctrine to be tolerated for an instant. The truth is that all such bodies as kennel clubs are apt to lapse into absolutism; to administer the laws the body itself makes is a severe strain, and any victim of oppression such as is asserted in the foregoing case would do a service to clubs and the kennel public generally by taking his case into court, where the outcome would not be in doubt. Litigation is generally to be deprecated, but there are times when no other weapon will answer.

A well-known gentleman, for whom I have a great respect, suggests to me a consideration as to the report of a rude reception being given two American dog lovers at the office of the London *Stock-Keeper*, although these persons presented introductions to Mr. Geo. R. Krehl, the kennel editor of that paper. It goes without saying that the report must be very much overdrawn, circumstances might make the reception a cool one, but that any approach to the rudeness described would be permitted at that office is out of the question, nor would Mr. Krehl be described by the office force as "a man who sometimes works for us." The affair is paltry in the extreme, but it suggests attention to the almost criminal carelessness Americans display in giving letters of introduction to parties resident abroad. Our easy way of making acquaintances allows great latitude in such matters in this country, and we all give such letters with very little thought, but in Europe the case is very different, and an introductory letter there is taken as a thing of weight. In this particular case the writer of the letter of introduction could not have had any extensive knowledge either of the bearer of the letter or the party to whom it was addressed, and it certainly was rather stretching things to give such a letter under the circumstances. Think carefully when you give an introduction to an English party and be sure that you clearly express the full effect you wish the letter to bear.

Comical suggestions that English and American judges should follow the lead of Russian judges in awarding prizes to Barzols arise from the fact that one of this breed sent as a return gift by a Grand Duke to Col. North, the distinguished greyhound owner, was summarily set aside as a very bad one by English judges, and some references that have appeared from time to time to the odd mixture of metaphysics and dog show form in Continental show awards, suggest that the root of the ridiculous ideas Continental judges and fanciers so often display is in their attempt to combine form and use in one measure and to require that

the good-looking dog should always be a good performer, and as a natural sequence to this, that the successful performer be of the correct show form. Some such hazy idea is very apt to befog the brains of intellectual people everywhere when they first tackle fancy in her own realm; but centuries of practical success as fanciers by the British and our inheritance of their traditions have furnished a smother for the folly, both here and in England, and the outcries of it that constantly crop up soon terminate simply by neglect and lack of attention. But, as during their stage of incubation they worry intelligent beginners not a little, it is not amiss to consider the practical method that dispels such fogs.

The proper and only "true type" of any breed is that which most exactly subserves the purposes for which the breed is designed. Any malformation which is likely to unfit the dog for its uses is fatal to its being true to type, but it must always be borne in mind that no amount of perfection of form insures real usefulness. No sensible man would venture heavily backing the very highest show specimen of a greyhound in a coursing match when the animal had never run in one. It might have every detail of conformation to make it a great performer, yet lose its first course and never win another. Probably America never produced another race horse so perfectly built and such a lovely specimen as Montgomery, and very few, if any, uglier, more unlikely specimens were ever seen than the great Fashion, yet had they lived at one time and appeared in the same race, it would have been thousands to one on Fashion. The London *Stock-Keeper* lately noted that the great Master McGrath would have been put out of a show ring at sight, that the crack Comassie was a miserable weed, and that another celebrated animal that never lost a course was a most indifferent specimen. Now it by no means follows from these examples that we are to aim at breeding animals that look like Fashion, Master McGrath or Comassie. Nicholas I. and Lexington, Memnon and Mother Demdike, are instances of how the highest type can be united with the greatest of performances. We should breed for type first and foremost, and will find more instances of great performers among the truly formed than among the untypical animals. This is not only true of the specimens themselves, but of their breeding value, the few odd instances of queer and untruly formed animals that were great performers do not contain an instance of one that turned out of any marked breeding value.

The path out of this fog is a very straight and obvious one. Keep the two qualifications entirely distinct, a show ring cannot demonstrate ability for actual performances, and performances by no means involve true form.

Mention of weasels reminds me of various references that have appeared of late to a story of a dog being assailed by a large number of weasels, three dozen, I think, was the number mentioned—and with one exception, the references have been in the nature of ridicule, dubbing it "a fish story." Now, incredulity is almost as apt to go astray as the most infantile credulity, and in this case, it is by no means unlikely that the doubting Thomases are the ones "off." The congregation of three dozens of weasels is a very unlikely thing, but very far from an incredible one. All kinds of wild animals are subject to fits of congregating mania, when they draw together in great numbers for no conceivable reason. No theory of search for food will account for the migration of animals in all instances, those of buffalo, lemmings, etc., for it has often been shown that the migrations were from districts where food was abundant to others where it was comparatively scarce. Why snakes gather in lumps and knots, after the spring has opened, has always been incomprehensible, warmth being out of the question, they being cold-blooded animals. While therefore the congregating of a large number of weasels is uncommon and unexplainable, it will not do to laugh it away as impossible.

THE ONLOOKER

ACCLIMATIZATION OF DOGS.

Editor Forest and Stream:

Apropos of Dr. Niven's letter, I would contribute my experience, and draw no deductions from it, leaving that to whoever wishes to do so. I have imported six mastiffs at different times, four of them being bitches in whelp. In every case the animals thrived right along. All the bitches whelped good-sized litters of healthy pups. My dogs run at large over my ten acres without any restraint, are fed pretty much whatever they will eat and all they want; in fact, are pretty much left to themselves as far as other care than clean, comfortable shelter is concerned. I have also imported three adult and three bottail puppies, all of whom were kept under about the same circumstances as the mastiffs and all did as well.

Just what my experience teaches I hardly know, but I always did maintain that if you gave dogs a decent chance to do something like nature indicated, they would do pretty well, and when it comes to fussing over a dog, measuring its food, regulating its hours of feeding, etc., as though it were a delicate baby you were caring for, I propose to go out of dogs. Dogs are essentially and fundamentally wild animals, and how they are to be kept under unnatural conditions of confinement I do not pretend to know, although there is no question that some breeders do succeed in breeding and keeping dogs in good health and condition, with the very minimum of room and liberty. Dr. J. S. Turner, the distinguished mastiff breeder, is an instance in point; but very few are Dr. Turners.

HULTON, Pa.

W. WADE.

DEATH OF WATCH.

Editor Forest and Stream:

I write to inform you of the death of Watch on Sept. 21 of inflammation of the lungs. He was sick but a few days.

TOLEDO, O.

JOHN POAG.

DOG'S INSTINCT VS. MAN'S KNOWLEDGE.—Denver, Col.—*Editor Forest and Stream:* A St. Bernard bitch of mine while nursing a litter developed a cake in one of the teats. I tried to grease and rub it out, but to no purpose, as it enlarged rapidly, suppurating setting in. A physician living near gave me an ointment to apply, telling me to call with her the next evening. After an examination at the appointed time he said it was just ripe for the lancet, and he would call around in a few minutes and open it. But it was not necessary; on arriving home she began to gnaw at the swelling and soon had it well opened, the pus flowing out freely. I did nothing, made no application to the sore, which rapidly healed, and is now marked with a small scar. As my medical friend remarked, "I knew dogs would take good care of themselves, but never knew they would open an abscess."—C. W. T.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

Prepared Blanks sent free on application.

Shoodie. By H. Wurzbach, Midland Park, N. J., for beagle bitch, whelped April 21, 1891, by champion Royal Krueger out of Trissie W.

Chief of Tara. By H. G. J. Hollowell, Conshohocken, Pa., for red Irish setter dog, whelped Jan. 21, 1891, by champion Chief (champion Berkley—champion Duck) out of Bizreena (champion Nimrod—Bizarot).

In programme events and made a run of 166 straight. Averages: E. D. Miller 85 per cent. Amateurs: T. Eldridge, of Knoxville, first, 85 per cent.; S. Vangilder, of Knoxville, second, 82.1 per cent.

CANOEING IN 1891.

The success of *Orizana* is due to no one element or predominating feature, to no evasion of the rule, but rather to the fact that the whole boat, from keel to truck, in model, construction and every trivial detail, is the harmonious and symmetrical effort of a master mind; the result probably of years of observation and study in preparation for such a return as this to the field of sailing yachts. A careful study of the whole boat will show that in nearly all respects she

THE BURGESS FUND.—The fund for the education of the two sons of Mr. Burgess has reached the total of \$30,000.

TORONTO C. C.—A very tempting invitation in verse was sent out by the Toronto C. C. for a pow-wow at the wigwam "Fancy Free" on the Island, on Sept. 4.

The displaceme should contemplate and allow for the efficient carrying of a reasonable amount of extra weight, representing an ordinary cruising kit and stores—say 60lbs. The float must allow of a permanent well of sufficient length to allow the man to sit below; this needs about 4ft. There should be two watertight bulkheads, one forward and one aft the well, and not over 1 ft. apart. This precaution minimizes the danger of a capsiz; indeed, apart from being smashed up by a heavy sea, there is little or no danger attending the capsiz of a properly fitted sailboat. The man is in the rigging, and the skipper, provided he knows his work. The rig must be such as to be lowered by the skipper from the well while afloat. And lastly, no angle part—such as centerplate or empty hull—should be of greater weight than a man can lift or drag unaided.—*W. Baden-Powell, in "Yacht and Boat Sailing," Seventh Edition.*

Gaunting the three races, class W. Perkins participated in he has been a victor in eleven contests since the first of July. The boat he used is a new one, made expressly for him by W. F. Stevens, and is the one which he used a few days ago, when he won three notable races. It weighs but 40 lbs., with the paddle and is the first ever built of its kind. The skin is in one piece from gunwale to gunwale. Therefore the builders here are claimed that it could not be built in that size. Mr. Stevens has probably proved that it can. He also built the boats used in the sailing class by Paul Butler and D. S. Goddard, the latter being a new boat just built by Mr. Butler. —*Lowell Courier.*

KNICKERBOCKER C. C. FALL CAMP.—A three days meet will be held this week at Egg Beach, opposite Spuyten Duyvil, by the Knickerbocker C. C., beginning on Friday. A number of races will take place on Saturday. A number of canoe men from other clubs will be present.

IGUANA.—The new canoe owned and used by H. D. Murphy at the meet has been purchased by H. M. Smith, of Boston, who sailed the Hornet at the meet, and who has just joined the A. C. A. Mr. Murphy goes abroad this month to study art, and will be absent for a couple of years.

Canvas Canoes and how to Build Them. By Parker B. Field. Price 50 cents. **Canoe and Boat Building.** By W. P. Stephens. Price \$2.00. **The Canoe Aurora.** By C. A. Newell. Price \$1. **Canoe Handling.** By C. B. Vaux. Price \$1. **Canoe and Camera.** By T. S. Stride. Price 1.50. **Four Months in a Sneakbox.** By N. H. Bishop. Price \$1.50. **Canoe and Camp Cookery.** By "Sneak." Price \$1.

Answers to Correspondents.

No Notice Taken of Anonymous Correspondents.

MATCHLESS, Chicago.—The side with the head.

J. H. R.—The New Jersey law allows squirrel shooting between Sept. 14 and Dec. 16.

SUBSCRIBER.—The Virginia law does not forbid taking quail out of the State; but exportation is forbidden by the West Virginia statute.

W. A. S., Chepachet, R. I.—Is there any law now in force in Rhode Island restricting black bass fishing to three days in each week, or has there ever been such a law in the State? Ans. No such law is given in the *Book of the Game Laws*.

C. W. V., New York City.—Will you please let me know the game law of A. comack county, Va., as relating to ducks and geese, what months they may be shot in, and whether any restrictions as to shooting same on certain days only of each week? Ans. Wildfowl may not be killed between May 1 and Sept. 1, nor at any time in the night, nor except from the land; nor at any time by non-residents.

CHICAGO AND THE WEST.

CHICAGO, Ill., Sept. 24.—You can get prairie chicken and prunes for 40 cents now at C. C. Wm. Meyers' restaurant on Madison street, or at least this elegant dish was obtainable there a few days ago. Mr. H. D. Nicholls and Mr. C. D. Gammmon have between them located eight cases of prairie chicken and prunes at Mr. Meyers' place, and Mr. Abner Price one case, and Messrs. John Haskell and Ed Goodrich and a Mr. Potter three cases more. Game is being generally sold at the restaurants now, perhaps on the representations of unscrupulous dealers. It is unlawful to sell prairie chickens in Illinois until Oct. 1, though they may be killed Sept. 15.

President Price has had State Warden Buck in his employ for the past week, and the latter at last accounts had located six cases on restaurants, including two on the Washington street saloon restaurant kept by one Fredricks.

There will be four of the second crop Rector cases tried to-morrow morning, or rather they are set for trial then.

Night before last Messrs. R. B. Organ, W. P. Mussey, their friends Messrs. Haines and McPherson, and myself visited the Stock Exchange restaurant, Monroe and Dearborn streets, and located a whole broiled prairie chicken. No prunes are served with game at this place, which should be held as an extenuating circumstance. I hope the man Meyer, who serves illegal chicken and also prunes will get it hard and heavy.

Last evening Mr. A. H. Harryman and myself again went to the Stock Exchange restaurant. This time the waiter was approached in regard to some quail on toast, as per bill of fare, and he declared the birds young and very good. We found two of them so.

It is no trouble to get illegal game in the Chicago restaurants. It isn't much trouble to get the restaurants find, either, and the boys are going to have some more fun at this, a good deal of it, it would seem.

Col. C. E. Felton made high bag of Mineola Club, at Fox Lake, on opening day, 40 ducks. He is now absent in Minnesota chickens shooting.

Messrs. Place and Lapham had fair shooting at local ducks on their Heron Lake, Minn., trip, and also three days of good chicken shooting.

Dick Turtle and Sam Booth got 40 chickens last week on a little hunt in Lee county, less than 80 miles from

Chicago. The weather was very warm. The birds were already taking to the corn and were banded.

Messrs. John L. Jones and his friend Mr. John Howley made their annual trip this year to Worthington, S. D., and had good shooting at chickens and at local ducks. Hank Twitchell is a market hunter and good guide at Worthington. He says there will be water and a good flight of northern ducks in that region in October.

The late torrid season has burned up the already dry Northwest, but to-day advices come that rain is falling over the Dakotas and northern Minnesota. The latter region has been visited by heavy forest fires. Duluth has been enveloped in smoke for the past 36 hours. Extensive prairie fires have swept over South Dakota, causing the loss of several lives.

The fall season at Fox Lake has been poor. The northern birds are of course not down yet. Snipe very few. The Kankakee country expects little snipe this fall. The Illinois River valley is unusually dry below Peoria.

The Grand Rapids and Indiana and the Michigan Central roads will make hunters' rates via Chicago, Mackinaw and St. Ignace to points in northern Michigan and Wisconsin. The Chicago and Northwestern, Milwaukee and St. Paul, Wisconsin Central, and Lake Shore and Western roads have announced their intention to meet the rates at once.

State Game Warden Land, for Colorado, has lately tried to capture the parties who lately killed five buffalo on the Kenosha range, but failed to do. Colorado protects the buffalo absolutely till 1900. Warden Land says: "I judge that we have now in the State something less than fifty buffalo, and these are in four bunches. One of these has recently been seen in Middle Park and numbers but five. Another, and possibly the largest, is in the Kenosha range, and numbers possibly twenty. The third, of ten or fifteen head, is at Hahn's Peak, in Routt county. The fourth, and the smallest except that at Middle Park, is at Dolores."

Mr. W. W. Carney, late of Great Bend and Leavenworth, Kansas, and formerly owner of the Barton county ranch, where the American Coursing Club held its runnings, will no longer be identified with the Middle West, but with the Coast. He has gone to Portland, Ore., for permanent residence. This is a good thing for Portland, but bad for Kansas, where Mr. Carney was so generally known and respected.

Chicago shooters have enjoyed Mr. Townsend's spirited sketches, "Among the Wildfowl," but two or three have called my attention to the fact that there is something wrong with No. 3, issue of Sept. 17, "Where Ignorance is Bliss." The bird shown in the act of dropping into the decoys is going the wrong way. Ducks always alight against the wind, and the shooter puts out his decoys so that the wind blows against his back and toward the decoys. The reasons for this are obvious to a shooter. Mr. Townsend's fleet seems to point against the wind and the duck is lighting against the wind, but to do this it has had to cross directly over the blind. This would keep it out of sight while "making the draw," unless the shooter moved his head, as many shooters would. Out here we shoot with the wind blowing from blind to decoys, whenever that is possible, as our ducks are no longer ignorant and are apt to take a jump if they draw in close over a boat or blind by mistake. With the wind at back, the shooter has the whole beautiful picture of the "draw" in front of him. It is very likely that artistic reasons, however, influenced the able artist in grouping his figures thus and in taking advantage of the perspective, so as to have the canvas back in front. If Mr. Townsend did not know as much about shooting as any of us he could not make these pictures.

It is bad news to say that State Warden F. L. Buck, whose effective work for the State and for the Kankakee, Fox, and latterly for the Illinois State Association I have taken such pleasure in recording, is to leave the work altogether. He goes on the road for a hardware and tin house. Warden Buck has not received his salary for last April, he says, and he is not pleased with the fact that the Fox River people are making arrangements

with a \$45 a month warden to watch the ice fishing this winter, he is to be paid out of funds which Buck had helped raise. Perhaps there is some misunderstanding in all this. Certainly it is to be regretted we lose so good a man. The State has no appropriation out of which he can be paid. I should like to see the Fox and Kankakee associations make up that April salary between them. I believe Mr. Cole would favor this.

Sept. 25.—Mr. C. S. Burton is back from his shooting trip to Dalton, Minn., and is downcast. He says he did not get a dozen birds. The country was all dried up. From the car window he saw in one field fourteen stacks of wheat burning up in one of the prairie fires, the poor farmer looking on helpless.

Reports to-day are that rain is falling in the Northwest. The fires at Ashland, Wis., are dying out. The Rat River Marsh, near Medina Junction, Wis., was burning all day yesterday. A heavy fire has raged along the Wolf River country. Seven deaths in the fires are reported from Minnesota and Wisconsin. Below us the heat is intense. A fire on the Kankakee marshes now would mean that the bog and peat would burn down five feet deep, utterly destroying all duck feed, as was once the case at Cumberland Lodge. E. HOUGH.

AN INCIDENT OF DEER STALKING.—London, Sept. 20.—Thos. Fielden, member of Parliament for the Middleton Division of Lancashire, while deer stalking on Saturday in the mountains of Scotland, was resting on a crag at the summit of a mountain when he lost his balance and fell backward over a precipice. Gamekeeper Fraser sprang forward, and at great risk of being pulled over the cliff himself caught the vanishing bagstrap of the falling man and checked his descent so that he swung upon a rocky ledge 20ft. below. But for this he would have fallen to the bottom of the ravine, a distance of 1,000ft. Fielden had been made insensible by the fall and contact with the rocks. Fraser was obliged to hold fast to the unconscious man and could not leave him to summon help. He shouted and fired his gun to attract the attention of Mr. Banner and others who were hunting with Mr. Fielden. It was an hour before Banner and his party, who had heard the gun and were trying to locate the point where it was fired, caught sight with their glasses of their unfortunate companion. They sent their allies to fetch appliances for the rescue and care of the injured man and themselves hastened to the spot. It was six hours from the time of the accident before the rescuers arrived. The six men in the party then managed to raise Mr. Fielden, and he was carried on a stretcher to Gendoll Lodge, Mr. Banner's place, where medical care was procured. Mr. Fielden's ribs were broken and his ankle sprained and he also sustained severe scalp wounds, but his injuries will probably not prove fatal. Mr. Fielden unquestionably owes his life to Gamekeeper Fraser's faithfulness and presence of mind.—*Cable to the Recorder.*

During the terrific thunder storm on Tuesday afternoon a most remarkable event occurred on the farm of Fred Pless, about one mile from Long Lake, on the old Detroit and Lansing plank road, township of Genoa, Livingston county, says the *Detroit Free Press*. During the storm one of Mr. Pless's hired men was standing in the open door of the grain barn watching the descending flood, when a turtle was rained down. The reptile, when measured, was found to be 5 by 3½ in., and weighed 7½ lb. It struck upon its back in a pool that had been formed in front of the door by the rain with a "spat" or "crack" as loud as a pistol shot, indicating its fall from a considerable height. W. H. Russell, the attorney, who was at the house of Mr. Pless at the time, secured the turtle, and now has it at his room 27 Moffat block. His theory is that it must have been swept up into the clouds by some strong uplift of atmosphere from one of the numerous small lakes in that locality. Its great weight, however, makes the circumstances chiefly remarkable, much more so than the fall of aulewornas and small fish, which have been noted in the past.

For years the harness dressing manufactured by Frank Miller has been the favorite preparation in our first-class stables, for it is a preserver and beautifier. Miller's harness dressing gives a beautiful finish to the leather and will neither peel, crack, smut nor harden it.—*Adm.*

CHARLES DALY HAMMERLESS SHOTGUN

WITH OR WITHOUT
AUTOMATIC SHELL EJECTORS.

Important Notice!

Instead of giving the dealer larger discounts we have decided to give the sportsmen the benefit of a reduction, and have concluded to make extraordinary low **Net Prices** on the **Charles Daly Guns**.

While making this reduction we might mention that the high standard of workmanship for which the Daly gun has always been renowned shall be retained. We have expert testimony that these guns are equal in workmanship to the celebrated Purdey guns, and far superior to all other so-called London makes, such as Greener, Scott and Westley Richards. An examination will soon convince the unprejudiced customer. They are more conscientiously made, more beautifully finished, handsomer in appearance, with shooting qualities unsurpassed, in fact far ahead of guns costing \$100 more.

Should you live in or near New York, we would invite you to call and examine our stock and be convinced.

If you live anywhere else in the United States and your dealer has none in stock, insist upon his ordering one, or order one direct from us. **Send for Catalogue.**

OCTOBER DAYS.

FIELDS as green as when the summer birds caroled above them, woods more gorgeous with innumerable hues and tints of ripening leaves than a blooming parterre, are spread beneath the azure sky, whose deepest color is reflected with intenser blue in lake and stream. In them against this color, are set the scarlet and gold of every tree upon their brinks, the painted hills, the clear-cut mountain peaks, all downward pointing to the depths of this nether sky.

Overhead, thistledown and the silken balloon of the milkweed float on their zephyr-wafted course, silver motes against the blue; and above them are the black cohorts of crows in their straggling retreat to softer climes. Now the dark column moves steadily onward, now veers in confusion from some suspected or discovered danger, or pauses to assail with a harsh clangor some sworn enemy of the sable brotherhood.

Their gray-clad smaller cousins, the jays, are for the most part silently industrious among the gold and bronze of the beeches, fitting to and fro with flashes of blue as they gather mast, but now and then finding time to scold an intruder with an endless variety of discordant outcry.

How sharp the dark shadows are cut against the sunlit fields, and in their gloom how brightly shine the first fallen leaves and the starry bloom of the asters. In cloudy days and even when rain is falling the depths of the woods are not dark, for the bright foliage seems to give forth light and casts no shadows beneath the lowering sky.

The scarlet maples glow, the golden leaves of poplar and birch shine through the misty veil, and the deep purple of the ash glows as if it held a smouldering fire that the first breeze might fan into a flame, and through all this luminous leafage one may trace branch and twig as a wick in a candle flame. Only the evergreens are dark as when they bear their steadfast green in the desolation of winter, and only they brood shadows.

In such weather the woodland air is laden with the light burden of odor, the faintly pungent aroma of the ripened leaves, more subtle than the scent of pine or fir, yet as apparent to the scent, as delightful and more rare, for in the round of the year its days are few, while in summer sunshine and winter wind, in springtime shower and autumnal frost, pine, spruce, balsam, hemlock and cedar distil their perfume and lavish it on the breeze or gale of every season.

Out of the marshes, now changing their universal green to brown and bronze and gold, floats a finer odor than their common reek of ooze and sodden weeds—a spicy tang of frost-ripened flags and the fainter breath of the landward border of ferns; and with these also is mingled the subtle pungency of the woodlands, where the pepperidge is burning out in a blaze of scarlet, and the yellow flame of the poplars flickers in the lightest breeze.

The air is of a temper neither too hot nor too cold, and in what is now rather the good gay wood than green wood, there are no longer pestering insects to worry the flesh and trouble the spirit.

The flies bask in half torpid indolence, the tormenting whine of the mosquito is heard no more. Of insect life one hears little but the mellow drone of the bumble bee, the noontide chirp of the cricket and the husky rustle of the dragon fly's gauzy wing.

Unwise are the tent dwellers who have folded their canvas and departed to the shelter of more stable roof-trees, for these are days that should be made the most of, days that have brought the perfected ripeness of the year and display it in the fullness of its glory.

SNAP SHOTS.

IT is sometimes practicable to find a better use for a stately tree than to chop it down for firewood, and a more sensible use for an historical site than to build on it a factory. There has recently been incorporated in Massachusetts a society under the title of "The Trustees of Public Reservations," whose purpose is to acquire and maintain for the people the beautiful and historical places and tracts of land. Mr. J. B. Harrison, agent for the Trustees, invites correspondence from those who may inform him as to places which should be given attention by the Society. The special work assumed by the Trustees of Public Reservations must appeal to every lover of natural scenery and to every public-spirited citizen. We hope to see the example of Massachusetts followed by other States. New York has already secured the Niagara Falls Reservation, and ought to have an Adirondack Park.

The Rhode Island Association for the Protection of Fish and Game was incorporated many years ago, but after a while it fell into decay and faded from public view. So completely did it disappear that not even the sportsmen of the State most interested in fish and game knew of its existence. Last year, however, a new organization was formed, and when the members applied for a charter they discovered the existence of the old society. Some of its members were called together, the promoters of the new society joined it in a body, and with the accession of members and interest the long inactive association straightway became a power in the land. Systematic warfare was waged on the snarers who had had full swing so long as to have become defiant and boastful; and special attention was paid to the market men and the hotel keepers. Detectives were employed, prosecutions instituted, snares destroyed and snarers arrested. In short there has been an active campaign, and the results already attained are most encouraging. Rhode Island is only repeating the experience of other States and thus emphasizing anew the almost universal rule that if we are to have any effective game protection in this country, for the present at least it must be secured by the efforts of individuals and societies.

If there is any one "natural right" a Florida cracker clings to more tenaciously than to any other it is to kill deer at any time, not excluding the breeding seasons. In 1877 a law was enacted protecting deer, wild turkeys, quail and mocking birds from April to September. This was resented by the crackers, and one of the first acts of the next Legislature was to repeal the obnoxious statute. Subsequent efforts on the part of intelligent sportsmen of the State have been fruitless until this year; but now Florida has a law, which we trust will be respected and

retained. The open seasons prescribed are for deer the months of November, December, January and February, and for wild turkey and quail Nov. 1 to March 1. A provision evidently designed as a concession to local preferences is that the commissioners of any county may designate four other months for deer killing. This is quite in keeping with the practice in most Southern States, where such game laws as are in force at all are for the most part county laws. It appears to be out of the question for Georgia or North or South Carolina or Virginia or Alabama to fix on a law applicable to the entire State. The statute books are lumbered up with page after page of county laws, and these are annually changing to suit local convenience. As the chief excuse for game protection is to protect the game in breeding time, one fails to understand how the public can feel much respect for regulations which are so inconsistent and in that inconsistency so unreasonable. If nature demands the protection of birds in one county at one period, the demand is equally urgent in an adjoining county. We have already noted that under its new constitution Kentucky will find a way out of the confusing game legislation now in vogue, for all Kentucky laws must in the future be of general application.

The Illinois State Sportsmen's Association, as represented by its president, Mr. Abner Price, and those who are working with him, deserve all praise for the prosecutions of Chicago restaurant keepers who deal in illicit game birds. The newsy letters of our alert Chicago correspondent have kept readers of this journal fully informed of the progress of the work. Later developments, since the publication of Mr. Hough's last letter, may be summed up in a few words. C. C. William Meyer, convicted of selling four prairie chickens, has paid a fine of \$20 with \$14 costs; Aaron & Son, game dealers who supplied Meyer, were arrested, and with two barrels of illicit prairie chickens discovered by Warden Buck were taken before the justice, who let them off with a fine of \$30. In the two barrels were 133 birds, and a full penalty would have mounted up to \$3,300. It is trusted that the Association will not rest with the paltry result of the Aaron case. George Williams, of the Lakeside restaurant, has paid a fine of \$15 and costs, this for chickens. Rector has taken another continuance of his case. One after another the restaurant men are coming up to settle. What the effect of the year's work will be it is difficult to conjecture; but there would be no question whatever about it if the Illinois Association would supply funds for a persistent campaign this year and next year. After all has been said it remains true that the Chicago prosecutions are almost wholly the result of individual activity. The Association should not fail to support its officers in a work which is less for the benefit of Chicago than the State at large. So long as the South Water street game dealers handle game out of season the game will be sent to them from Illinois covers.

A New England sportsman, who has been shooting all his life and claims that something over 40,000 birds have fallen to his gun, is fond of asserting that of all these only two were killed out of season. One springtime, a relative being ill and her physician suggested a game bird as likely to tempt her palate, he took his gun and set out to provide for the invalid a robin or a meadowlark. He was crossing a little brook, when a cock woodcock got up before him; and without an instant's reflection he killed it. The other instance happened one day in August when he was out working a puppy. Most of the day had gone by and not a shot had been fired. At length the puppy made its first point, and a bird rose, which was taken to be a woodcock (then in season), but being shot proved a chicken grouse.

The frequency with which hunters in the woods are mistaken for game by other hunters has prompted the sportsmen of Bangor to invent a deer hunter's protective vestment, consisting of a flaming red coat, piebald pantaloons and gilded helmets. To this equipment should be added a tin trumpet to be tooted at frequent intervals like a fog horn at sea.

New York customs officers seized a big lot of smuggled snakes last week. One of the reptiles was declared to measure fifteen feet in length and to bark like a dog. As we have no infant snakes of that variety indigenous to this favored land the duty on serpent importations is clearly for revenue only.

The Sportsman Tourist.

FOUR OF A KIND.

"ALL aboard! Git."

The heavy farm wagon, drawn by a pair of as uncouth and raw mules as ever graced the western mountains, commenced to move and we were off. We, that is Ben, Dan, Jack and Shoshone, were going to spend a week at the lake. For this event elaborate preparations had been made. Under the seats were rifles, guns, rods, tackle, bedding, cooking utensils, grub and a wall tent. What more could we want? A twenty-mile uphill ride over a rough road is not a theme upon which the lyric nurse can spread herself. Nevertheless we sometimes derive health, zest and inspiration in spite of, rather than aided by our surroundings, and that all-day ride was as enjoyable to the mental man as it was uncomfortable to his physical tenement.

It was Indian summer; not the Indian summer of the East, with its gorgeous wealth of color, its hazy, sensuous atmosphere, its dreamy transition from the lusty life of summer to the dreary desolation of November, but that unique season of the far West, when grassy hills and pine-robed peaks but change their green for sober garb of gray and brown, when the fitful breezes do but moderate the burning heat of August. We have no autumn. At night we lie down and call it summer, and, before morning, a chilling, nipping frost has come. The branches are bare, birds have flown, white are the mountain crests and winter is here. But if there is an Indian summer amid these Watsatch summits, it is the brief season through which we have just passed.

At the end of the first hour we are four miles from our starting point, on the summit of a divide, where we stop to give the team a good rest. Behind and below us is the valley of the Upper Sevier, a perfect basin through which the slow-wandering river makes its sinuous path. That little group of cabins and houses in the center of the scene is Panguitch. About it are squares of golden stubble and brown rowen. Surrounding these, on every side, are the great gray hills, their soft blue serrated summits holding up the colder, clearer azure of the firmament. The wheels rumble and we pitch down into South Cañon and climb, between frowning, black walls, six miles further to the top of the second divide. From the second divide we drop to the creek level, and, by mutual consent, we stop at the "white rocks" to secure a trout dinner and then to cook it.

Famous throughout this section of the land are the white rocks. Here the fishermen resort, in season and out of season, but the supply of trout does not seem to diminish, nor does the dainty *fontinalis* learn wisdom by the experience of his fellows. The white rocks are rugged walls of sandstone, enclosing a natural meadow about half a mile long and from twenty to fifty yards wide. The creek is in places open and again the willows overhang deep pools where the trout hide during the heat of the summer day. But there is scarcely a spot, upon pool, riffle or eddy, where a fly cannot be placed and where it may not be placed so as to secure a rise. Three of the party went for the willows and soon had long straight poles, heavier by far than the fish that they expected to land. For bait they used whitewood grubs or grasshoppers. Shoshone stuck to rod and reel, and used a sober fly of his own fabrication, which he has found to be especially killing in these waters, though it is far from a thing of beauty when viewed from an artistic standpoint. Ben has been the champion of the creek. Fifteen years of fishing in its icy waters have taught him where the largest, sweetest, reddest of the ruby-spattered darlings lie, and he knows instinctively how and where to drop his bait. He drops in first. His willow bends until the tip almost touches the water. Then the butt is lowered and a silver streak flashes from brook, leaving in its wake a string of glittering pearls. An instant it hangs trembling over its native element; then, looking like a broken rainbow, it describes the arc of a majestic circle and lies stunned upon the emerald sward full twenty feet behind its captor. Very well done, Mr. Ben, very picturesque; but, while you have been going through your little performance, Shoshone's fly has been floating down the ripple just below you, and, though you saw it not, from out the boiling white caps came a gleam, a strike, the tug of war, and now you hear the merry music of the reel. Ah, yes! You may have the tranquil pools and crystal depths, but give the riffle to the dainty fly. Ben is too absorbed to pay attention to any one else. He goes down to another pool, while Shoshone lands five in quick succession. How many more he might have landed will never be known, for Dan, who is destitute of any sportsmanlike chivalry, makes up his mind that the riffle is the place for him. His heavy sinker splashes down, dragging the grasshopper after it, and, needless to say, the trout are gone.

We fished for perhaps half an hour and returned to the wagon with forty-three fish, none of which weighed less than half a pound. Jack had not made a success of his piscatorial efforts and had already built a fire and tried out enough bacon grease for the frying-pan. Ben took charge of the flour and bake oven. Dan and Shoshone cleaned the fish, and soon we were eating as though we had left before breakfast.

The afternoon ride was much more delightful than that of the morning had been. The creek flowed through a wide valley that was covered with meadows of lucerne and wild hay. The rolling hills that extended for miles to the north and south were timbered only at their summits, their slopes being covered with short grass, where thousands of cattle were lying or feeding. Every mile or two we passed a log cabin, coral and milk house. This is a great dairy region. In winter the ground is covered with deep snow, and no one visits the spot; but in May the cattle are driven back from their ranges on the Paria and Wawap. Then the families move up from the settlements to their summer homes. The books of the county assessor show that last summer (1890) 54,000lbs. of cheese and 14,000lbs. of butter were made in this little valley. The season ends about Oct. 1.

As the sun commenced to slope toward the west there was a constant flight of mourning doves about the wagon, this way and that scurried beves of half-grown dusky grouse, and now and then a sage cock would arise with loud clamor and sail majestically out of range. Over the creek were teal and greenheads, young broods, just

right for broiling. Nor were quail wanting. The quail do not belong on this side of the divide, but about eight years ago several pair were brought over from Dixie, and they having never been disturbed have multiplied with surprising rapidity. Dan wanted to borrow Shoshone's gun, but the latter had not forgotten the incident at the riffle and informed the would-be borrower that the game law did not expire for at least eight hours.

Five o'clock found us at the last steep climb of the journey. Beside us was the roar of the torrent, for the stream made a perpendicular drop of 30ft. between lofty walls that had been cleft rather than worn by the slow action of the water. One long, hard pull and our goal was in sight, Panguitch Lake, in the language of the Utes, "the place of fish." There it lay nestled among the grand eternal pine-clad hills, the liquid blue smiling at the ethereal blue above and mirroring in its clear depths the waving trees and sentinel peaks that deck its borders. Upon its limpid bosom sported a host of water fowl, and we knew from the upland peaks and distant cañons even now some noble, velvet-antlered bucks were watching our progress with curious eye.

Panguitch Lake has one gala day, the 24th of July, the Mormon's great holiday. Then it is the gathering place for southern Utah. For days the people of Kanab, St. George, Cedar, Parowan, Beaver, Panguitch and a host of smaller settlements make preparations for the festival. On horseback and in great white covered family wagons they come, until the lake, three miles long by one mile wide, is surrounded by a city of canvas. It is reported that on the last 24th but three able-bodied adult males were left in Panguitch, a settlement of 961 souls. However this may be, every year from 3,000 to 5,000 people gather at the lake and spend three days in eating and drinking, in horse racing and foot racing, in rowing and fishing, in buying terra alba candy, snow ice cream, circus lemonade, cheap tinctures, etc., and last but not least, in dancing. Then the canvas disappears as noiselessly and suddenly as it came, and naught is left to mark the place of revelry but ashes, oyster cans and broken beer bottles.

Driving slowly about the west shore we selected a camping place as suitable as it was beautiful. An elevated, grassy point dotted with scattering pines and flanked by a crystal stream that leaped and laughed in the sunset glow, beneath the soft Italian sky. Beneath two pines we set our tent and fixed our fire place. Ben and Shoshone made the beds, tables and seats while Jack and Dan got supper. The ducks near the point had risen with loud clamor at our approach, but as we ate they drifted back within easy gun-shot, as though fear of man was to them something unknown. Perhaps it was so, for the Western mountaineer uses no weapon but the rifle. He may have, among his lares and penates, an old, rusty, long-barreled, anti-bellum muzzleloader, but the breechloader is to him a new-fangled invention, "like the locomotive," and of the hammerless self-ejector he knows as little as of the telephone or phonograph. So much the better. Shoshone was prepared to profit by their neglect. In the twilight hour we stroll down to the nearest ranch and make arrangements for a supply of milk during our stay. This cost us, delivered, 12½ cents per gallon. Then came the smoker's hour about the camp-fire—the last and most delicious hour of the day, when earth and its cares steal gently from us, borne to dream-land on the balmy evening breeze, when the stars come out one by one, and brighten with joy as they see their own radiant forms reflected in the darkening lake, when we hear the music of the past and live again the days of auld lang syne. So night fell upon the world and sweet sleep upon wearied eyelids, and the silvery waves alone, that rhythmically rose and fell upon the glistening sands, watched and waited for the dawn of another day.

"Hist!"

That was all Ben said, but it was sufficient to awake Shoshone, and a few moments later a couple of misty forms stole out into the cold, bracing air of early morning, leaving Jack and Dan to sleep the sleep of the just, and to have breakfast ready when the sun should be an hour high. There was a light fleece over the water, and above this, over the eastern mountain, the morning star was beginning to pale.

"Which way, Ben?"

"Oh, I believe I'll go up the cañon after a yearlin'. Don't you want to take Jack's gun and go long?"

"Not much. I'm going for a mess of chickens. So long."

A pull at the half-filled coffee pot that rested in the ashes of last night's fire and we separated.

And this was Sept. 1, the day when the hunter and sportsman could bang away at any and every species of game that he could hope to find, and in all this region only Ben and Shoshone to take advantage of the privilege. Shoshone's path led him about the foot of the lake, down to the meadows where he knew the birds would take their early breakfast. Nervously he fingered the shells that had been loaded with so much care and precision. If there is a species of "buck-ager," called "chicken-ager" by specialists, he was afflicted with the disease, and a Pennsylvania barn door would have been safe at 40yds. From his feet rises a gray form and goes whirling away into the gloom. The gun is raised but as soon dropped to its old position.

"No, friend Centrocerus, I want nothing to do with you so long as any of your dusky cousins are to be found in the vicinity."

The coolness and steadiness come back, for the hunter must be his own god, find and retrieve as well as shoot. Whirr! whirr! whirr! One, two, three, a dozen up and still rising. How the old gun rang out, and how clumsy are those fingers after six months' rest! What an age it takes to get in fresh shells! Two more shots and the birds are out of range. Mark them down, then gather up the victims. Ah, it is slow finding in the damp, brown rowen, where there is every opportunity for concealment, but four dead grouse and a cripple, that requires a grace shot, is not a bad beginning. And now the sun creeps over the mountain and the golden light floods the valley. Here, there, everywhere are feathery forms flying swiftly through the air. This is the very intoxication of sport. From afar on the mountain Ben's rifle makes faint echo to the gun. He, too, is enjoying this grandest morning of the year.

Ten birds in the pockets of Shoshone's hunting coat remind him of a solemn compact, entered into by the quartette, wherein it was stipulated that, until the day before the return home, no more game should be shot or

caught than was required for camp use. So he turned back to the tent, above which the pale smoke of the morning fire curled lazily above the swaying pine tops. Ben had been back, aroused the sleeping beauties, and started up the hill with one of the mules. Even now his powerful basso profundo, singing one of the old songs of the "49ers," could be heard and soon he emerged from the aspen cover. Over the back of the mule was slung the biggest buck that we had seen in many a day. The wide-branched, velvety antlers almost touched the ground on one side and the sharp hoofs dragged upon the rocks on the other. And there were shouts of joy from the little camp as the aroma of coffee, slap-jacks and broiled chicken ascended heavenward.

After breakfast we "fixed" camp, built a shade of aspens, thatched with willows, from the tent to the fire-place, and snaked a couple of loads of dried aspen poles for fire-wood. Jack and Dan, to pay for their laziness during the early morning, were assigned the bulk of the work, and it was in the line of their duties to clean and care for the game. Ben reported the cañon that he had visited as being full of red raspberries, bullberries and service berries, and, while Shoshone rambled about the lake to secure a boat, the trio went berrying. Near the upper end of the lake the cabins of the professional fishermen are built. Here a boat was found; heavy, flat-bottomed, leaky, but it would save swimming after ducks and diving for trout, and that was all that was required.

The heat of the afternoon was devoted to the regular siesta. Then Shoshone launched his fragile bark and, with rod and gun, Dan furnishing the motive power, defied the perils of the mighty deep. Above the shore were scores of hell-divers and mud-hens, but far out the bosom of the lake was black with countless teal and mallards. To shoot or fish, that was the question. Dan claimed to know the best fishing grounds, and that settled it. Over the lake we sped, and the dark mass of natatores parted, sailing gracefully just out of range and leaving us a clear channel. Under the shadow of the eastern peak Dan rested on his oars and, pointing to a deep, dark pool, lashed into spray by the eternal falling of a brooklet that leaped full 20ft. from rock to glassy lake, said, "Cast in."

Shoshone arose and the grizzly-king fluttered over the spot indicated and dropped, as gently as a leaf, upon the surface of the water. No response to the feathery seducer. Again. The same result. The third time—

"Dan, get her stern to. I've got a whale."

"Divil a whale, but a dandy trout, old man," as the boat swung around and old *Salvelinus*, as proud as he was angry, showed what seemed to be three feet of radiant loveliness as he endeavored to snap the leader with his tail.

"Pull for the middle."

Dan obeyed as though his life depended on it. The craft was clumsy and Dan did not know how to handle her for this kind of work; so the only hope of success lay in forestalling any latent desire on the part of Mr. Trout to run beneath us. Fortunately the idea did not enter his head. He made a good fight for the lilypads, but boat and reel were too much for his strength, and after a fifteen-minute struggle he allowed himself to be drawn to the net. The scales at the tent showed him to be a 4½-pounder, and he was the largest fish taken during the trip. Dan was now fairly enthused with the spirit of the sport and needed no request to pilot the boat back to the spot where the first cast was made. But, alas,

"The best laid schemes o' mice and men
Gang aft a-gley."

Trout No. 2 came up to the scratch in elegant form and condition, but his tactics were diametrically opposed to those of his predecessor. Under the boat he was determined to go, and under the boat he went, leaving to Shoshone a broken tip and the sad memory of a trout that never was caught. But another boat was bearing down upon the scene to take up the sport where we had dropped it. Ben and Jack had managed to secure a punt, even more leaky and clumsy than ours. They had a can of grubs and a pail of minnows, and we were contented to leave them, and, because it was impossible to fish, to try our luck with the mallards.

Now, while the ducks were not exactly timid, they were unusually reserved in their manners, and refrained from making the acquaintance of strangers without the formality of an introduction. They could swim as fast as Dan could row, and they managed to keep about 75yds. from the boat. Once in a while there would be a little teasing flight of 20 or 30yds., and at such times the gun would do its duty. But the distance was so great that only cripples fell, and these it was impossible to retrieve. At length the birds drifted into a little bay from which escape seemed impossible. Shoshone changed his seat to the stern and laid a dozen shells on the seat. Dan grasps the situation. The boat is planted, fair and square, in the narrow entrance. Before us the brown, moving mass wedges and packs together until the inlet is covered by a solid carpet of feathers. For an instant the birds are undetermined what to do. Then, with one impulse, they rise. The noise is as the roar of the tempest in the forest, as the beating of storm-tossed breakers upon a rocky shore. Landward for a minute and then, by common consent, the grand wheel is made, and the mass comes back toward open water. They are scarce 20yds. above us. The sky is darkened and the sound of the gun that cracks until eight shells are gone is lost in the rush of many wings. Over the lake they fly, faster even than the mountain gale, the ranks of the living closing up the gaps that ruthless powder and shot had made. A mile away, over by the western shore, they alight, and we are left alone, between the blue above and the blue below, to gather up the spoils. Nineteen plump, iridescent-winged beauties are stowed away in the bottom of the boat, and we rejoin Ben and Jack, who have eight 2-pounders to their credit, and are as ready as we for supper.

What a supper that was! It took a long time to prepare it, but it paid for all trouble. Think of it ye purse-proud, game-loving Chicagoans, that pay \$1.35 for the leg of a chicken killed out of season, and then, with true devotion to the cause, cinch the seller! We had cream biscuit and coffee, baked fish, broiled chicken, fried duck, fried venison, and wound up with luscious raspberries and cream, the meal costing, barring the broken tip, less than 50 cents.

Clearly the pursuit of game on the morrow was out of the question. We had made an agreement and intended

to live up to it. There was game enough in camp to last for several days; so a bear hunt was proposed. A study of the topographical map of Utah will show the fifty miles between Panguitch Lake and the Cedar and Kanarra settlements to be an uninhabited mountainous region. The Pah Vaut range, that extends northward for 150 miles between the Sevier Valley and the western desert, here joins the main chain of the Watsatch, extending in an east and west direction, and the result is a chaotic mass of spurs and peaks. Here is the abode of big game—grizzlies, mountain lions, wildcats and deer. The grizzly is the king in the eyes of the hunter. As a proof of valor, daring and coolness, its hide is worth a dozen pelts of the mountain lion or a hundred big buck skins. To the average sportsman the killing of a grizzly places the lucky man on the top of the ladder and makes him an equal with the slayer of the bighorn. Ben's nerve and experience qualified him for the post of leader of the expedition and he was chosen captain without a dissenting voice.

Daylight found the camp deserted. At sunrise the hunters were four miles away up among the higher cañons and willow-fringed marshes where big bear were wont to resort after their morning meal. If the day should prove clear and hot we were on the right track, but if cool our climb had been for naught. Fortune favored us—the fickle dame is said to favor the brave—and not a cloud veiled old Sol's face. Deer sign were abundant, but they could not swerve the quartette from the path of duty. The cañon narrowed. The scant 10 ft. between the little creek and narrow walls was choked with underbrush and we could see but 3 or 4 yds. ahead. Suddenly we came to a halt. Every man's breath stopped for an instant and our hearts thumped like trip-hammers. We had run fair and square into the mouth of a cave that the briars had concealed, and any lurking bear or lion would have had the whole outfit at his mercy. Ben was the first to get his head. Holding his cocked rifle before him, he marched boldly into the den and the rest followed. The cave was deserted, but it had been so for only a few hours. It was Bruin's lair, and he had a well-worn trail from it to the upper part of the cañon. His track was hardly cold, and we were liable to run across him at any moment. Thanks to Ephraim's weight and magnitude our way was now comparatively clear. Slowness and extreme caution were necessary if we expected to make the surprise party a complete success. Already we had passed walls that he had made within a week, and everything indicated that the moment of engagement was at hand. A swallow of coffee from the canteen and every eye and ear were on the alert. It was now 10 o'clock. The sun was beating down furiously and we were suffused as to our clothing with perspiration.

Stop! Twenty yards ahead there is a crashing of willows and aspens and a grayish-brown mass, seemingly as large as a Norman horse, is indistinctly seen through the underbrush. Ben gets in the first shot and the fusillade opens. Bruin may be wounded, but he is not crippled. He wheels and charges toward his assailants. Four shots more and he falls, but only for a second. It is too warm for comfort, and we make a grand break for cover, trees, rocks, anything, at a "get there, Eli," pace. We scorn any imputation of cowardice, but circumstances alter cases, and none of us cared to be a shuttlecock for an angry grizzly's paw. Dan made for the open hillside. He is almost out of the thicket when a hop vine trips him. Up again, but the bear is close by and his gun is gone, and now commences the dodging race for life. We are trembling so from exertion and excitement that we can hardly land a true shot, and often the rifle is raised and lowered for fear of hitting the man who is in line with the crazy brute.

"Shoot, boys! Shoot for God's sake! Don't mind me. I can't keep this up much longer."

Shot after shot rings out. Bruin falls, rises, struggles feebly toward the fleeing man, then falls to rise no more. We do not stop to ask who made the lucky shot, for beyond him, unconscious on the ground, lies Dan. We fear that he has been struck by a misdirected bullet, but when we reach the spot we rejoice to find that he has only fallen in a dead faint, from which he soon recovered, full of spirits as ever, but weak and trembling like a leaf.

And now we turn our attention to the conquered. Skinning Ephraim, we find that any one of eight wounds would have proved fatal, and besides there were five or six flesh wounds. The hide is slung upon a pole, and Ben, Jack and Shoshone take turns, two and two, in bearing the spoils back to camp, which was reached about 5 o'clock. The hide was voted to Dan as a memento of his close call, and we envied him the soft, warm rug that we knew would lie before his fireplace in the little log cabin on the Sevier.

Thursday was devoted to business by Ben and Jack. They started early in the day to hunt yellow pine timber for their mill on the creek. Dan was still rather shaky on his pins and remained in camp. Shoshone went on a tour of exploration about the lake. He had walked about a mile when his nostrils were offended by an odor that was never wafted from Araby the blest. It was a combination of slaughter-house and dirty sage brush fire. It betokened the presence of Indians, but before he could reach the encampment he heard a familiar voice calling his uncomplimentary Ute name—"Senab yodes" (devil wolf). Coal Creek John, erstwhile the terror of southern Utah, was the speaker and Shoshone was invited to participate in the dance and feast that was in process of preparation. But, after noting the dozen deer skins that were stretched out to dry and getting some "pointers" as to the best localities for venison, he excused himself on the plea of a prior engagement. The fisher's cabin was next visited and the men who make their living from the lake were found in a state of excitement and curiosity.

A few days before a stranger from Salt Lake had come among them and contracted for all the fish that they could catch. Generally, as the trout will not bear the shipment in warm weather, the fishing season does not fairly open until November, but this stranger had a mysterious powder, which he called "our new secret preparation," that he guaranteed to preserve the fish fresh and sweet for weeks. The powder came in half-pound packages, from which he was careful to tear the label. It was soluble in water and in the solution the fish were soaked. Evidently it was a salicylate, probably that of soda, and it may have been the identical game preservative that has been advertised in the columns of FOREST AND STREAM. At all events it was a mascotte for the

fishermen and they offered fabulous prices for the formula or for the address of the manufacturer.

The professional fisherman's life in winter is a hard and dreary one. At 4 o'clock in the morning his alarm clock calls him and he gets breakfast and does the cooking for the day. Then he gets out on the ice (temperature seldom above zero) and chops as many holes as he can before dawn. All day long he has to watch these holes to keep them from freezing over. Into each hole he drops his hook baited with wood grub. The line is attached to a willow. Just at the peep of day the fish commence to bite and the poles commence to bob so that a man has to keep on the run if he would attend to business. When the sun is about an hour high the hunger of the fish is partially appeased. The fisher gets a bite every five minutes, every fifteen minutes and in the middle of the day, only a bite an hour on an average. Still holes and poles must be watched and he has no time for rest. At 4 o'clock biting begins again, at dark it is fast and furious. Then great iron kettles, filled with fat pine, are brought out on the lake, and soon the light of forty fires illuminates the scene. About 7 o'clock the trout are satisfied. Then the men go back to their cabins and get supper, after which they spend three or four hours in cleaning and packing the day's catch. It is nearly midnight before they can go to bed. On snowy days, when the ice has to be kept clean, their labor is nearly doubled. Altogether their lot is not an enviable one. From \$80 to \$120 for the winter's work hardly pays for the loneliness, discomforts and exposure.

By 6 o'clock all hands were back in camp and the programme for the following day was arranged. It was to be the last in camp and all that we could catch or shoot was to be taken home for family use. Ben was to go for deer, Dan and Jack were to fish, and Shoshone was to attend to the feathered bipeds. What success attended the efforts of three of the party and what sport they had can be judged only by the results. Shoshone started out on Friday morning intent upon the slaughter of ducks. He was his own pilot and oarsman, and this may account for the fact that he had absolutely no luck, getting only one little teal, and that rather by chance than skill. The birds refused obstinately either to be driven into an inlet or to swim within range. Then he rowed down to the lower end of the lake, tied the boat to the willows and went down into the meadows after grouse. At this time of day the birds were not to be found in the stubble and rowen, but resting on the ground under the willows that cover the creek bottom. They are not easily flushed and their flights are short so that a mere tyro can secure a big bag with little or no trouble. One flock of eight birds was beneath a willow upon which sat a small hawk, about as large as a sparrow hawk, but, more likely, a young sharpshin. Every time the chickens flew the hawk accompanied them. He would not stir from his perch until they arose, and he always lit within 5 yds. of them. He was too small to have been hunting prey, and his strange freak saved both his own life and that of the brood with which he had associated himself. But those birds were never missed. An hour's walking gave Shoshone twenty-two young grouse, which was as much as he cared to pack, and he rowed back to camp, dressed his game, ate a light lunch, and joined Jack and Dan on the lake, a peeled willow taking the place of a split-bamboo. It was a difficult matter to cast flies with such a pole, and it was a more difficult matter to play the fish when they were hooked, but a fair degree of success attended his efforts. After an hour's fishing we saw Ben walking back to the tent, leading the mules that he had taken in the morning. We were soon at the shore and lugging up 80 lbs. of fish, weighing from 1 to 3 lbs. each, as the result of the trio's labor, we found two deer, dressed and hanging beneath our bower. That evening as we were cleaning our fish Ben remarked:

"Well, I guess this 'll hev to do me until my fall hunt."

"Where you goin'?"

"Where I always go. Over on to the East Fork Mountains, and may be ez fur ez th' Escalante Desert."

"Guess I'll go 'long."

"Me, too."

"And I."

So, Providence and the weather permitting, and nothing interfering, the November grand hunt is in store for the quartette, and the buckskins of the East Fork will please note this fact and make due preparation for our reception.

Saturday morning broke, but no sun was visible. The clouds hung low on the lake and hid the opposite hills. There was a disagreeably tangible humidity of the atmosphere that almost dampened our spirits as we gathered about the coffee-pot and frying-pan. The mental gloom increased as we went out to loosen the guy ropes.

Bang! whiz! somewhere, not many feet above our heads, the bullet from a navy revolver cut the fog. We looked for the offender, and in a very few moments he hove in sight—a drunken cowboy who had just come up from the settlement, and who, had it not been for that bottle of Panguitch tangle-foot, would have reached his own mountain camp on the previous evening. He was too much under the influence of liquor to listen to reason, and after putting a couple of bullets into the sacked venison he then dismounted and made a target of the guy ropes. When Dan proposed to use force, he turned around and punctured his hat in a manner that would have done credit to any border tough. This settled it. No one wants to be a mark for a drunken man's unsteady aim. The gun was emptied, and before he could reload it Jack had grabbed him from behind and thrown him to the ground. We then rushed in, tied the culprit, now beside himself with rage, hand and foot, confiscated the gun, which Dan stuck in his own belt, telling Mr. Cowboy to call and get it when he came to town. The whisky bottle was tossed into the lake, and we proceeded to pack and load as though nothing had interrupted us. In an hour the mules were harnessed and we were ready to start. Ben then untied the cowboy's hands, leaving him to unfasten his legs at his own leisure.

"Young man," said Jack, "you're a leetle too fresh. You never want to git so drunk ez to forgit that four of a kind will always beat a full hand."

Followed by his imprecations as long as we could hear, we drove away. The clouds thickened, and upon the surface of the lake big raindrops were splashing. But below, upon the far-away settlement, the sun was shining, and with light hearts we went homeward out of darkness into light.

SHOSHONE.

PANGUITCH LAKE, Utah, Sept. 10.

Natural History.

HOW TO COLLECT BIRDS.

(Continued from last week.)

POISONING THE SKIN.—The skinning and cleaning of the specimen having been completed, the next thing is to apply the preservative. For this, as has already been stated, only arsenic or a mixture of arsenic and powdered alum should be used. This may be applied either dry or as a paste, by mixing with alcohol or water (alcohol being preferable). If the dry powder is used, it should be kept in a shallow box large enough to hold a medium-sized bird, and while the skin is in every part turned "wrong side out," it should be laid upon the arsenic and the latter applied thickly to every part, care being taken to put plenty of the poison about the head, particularly close up to the base of the bill, about the lower end of the denuded wing and leg bones and about the base of the tail. This is best done with the foot of a rabbit (or better still, that of the northern species, which has longer hair on the soles); but if one cannot be had, a substitute may be made by securely tying a wad of cotton to the end of the stick. After the skin is covered with the arsenic (which should be applied while its inner surface is moist), it should be held over the box and gently tapped to loosen the superfluous powder.

Should the alcoholic paste be preferred, it may be applied with a bristle brush, or better still with a wad of cotton tied to the end of a small stick, the advantage in the latter being that it can be thrown away when a day's work is done and a new one quickly made when another is required.

Cleaning soiled or greasy specimens.—While blood-stained specimens are supposed to have been partially cleaned immediately after they were shot, as directed, further cleaning is necessary before the bird can be considered a good and finished specimen. The final cleaning should be done when the bird is entirely skinned, but before the preservative is applied. Bloody specimens should never be washed before they are skinned, as the application of water only serves to draw out more blood through the shot holes.

After the bird has been skinned, however, and the inner surface of the skin thoroughly freed from blood by sponging or wiping, then the feathers may be washed clean, using a soft sponge and warm water, and dried with corn meal or some other clean absorbent substance, care being taken not to allow any of these substances, especially plaster of Paris, to dry on the feathers, each application being thoroughly removed as soon as it becomes saturated with the moisture. Repeated applications and much patience are required to clean a specimen thoroughly, but the result is well worth all the trouble and loss of time, unless the specimen is one of no value.

Corn meal is probably the best of all substances for drying moistened feathers, but cannot always be obtained. In its absence, clean dry sand, whiting or plaster of Paris may be used, although the two last named should not be used on birds of dark plumage, since it is next to impossible to remove it all from the feathers, which ever after have a dusty or powdered appearance. On birds of white or very light-colored plumage, however, plaster of Paris is better than anything else; but even on these as much as possible should be removed by persisting whipping and blowing of the feathers.

Dry blood stains should not be washed, but should first be pried or chipped off with the finger nail, or back of a knife, and then carefully scraped and manipulated with a stiff brush, such as a jeweler's brush or a tooth brush.

Fat birds are very difficult to clean, but the removal of every particle of fat is very important, since, in addition to the certainty of the fat which is allowed to remain on the skin gradually working out through the shot holes and other openings and greasing the feathers, the combination of the fat with the arsenic produces a chemical compound which is very injurious to the skin, rendering it "rotten," or brittle.

A bountiful application of corn meal, plaster, etc., during the process of skinning is a great help toward removing the grease, and in the case of large birds a piece of calico or cotton cloth sewed to the skin along each edge of the incision will serve to keep the feathers from contact with the fat, though even then an absorbent substance should be freely used.

Ducks and some other water birds when fat are particularly difficult to clean, owing to the fact that the roots of the feathers form numerous prominent points all over the inner surface of the skin, the spaces between them being filled with fat. In such cases the surface of the fatty coating should be slightly gashed with the knife or scalpel to release the oily substance, which should then be gradually absorbed by a persistent application and "rubbing in" of the absorbent substance. Of course all free pieces of fat should be first cut away.

Should the feathers have become greasy they should, after the bird has been skinned and the inside of the skin itself cleaned, as above directed, be washed with spirits of turpentine, and the latter removed by absorption with corn meal, whiting or plaster, repeatedly applied and removed, the absorbent substance, when saturated with the turpentine, being first shaken off and the feathers then carefully whipped with a light elastic stick, until no more remains. This process is tedious, but the excellent results amply repay for the time and trouble expended.

The cleansing of water birds, especially sea birds, requiring special treatment, the following directions (prepared at our request by Mr. Wm. Palmer) should be closely observed:

As prevention is better than cure, time employed in taking proper care of sea birds when first killed is well used; but it seldom happens that one is able to do this, and therefore it becomes necessary to spend more time in cleaning specimens than is desirable. When freshly killed, if a sea bird is immediately hung up by the legs for several hours, much vexatious work is spared the collector, but if one is on a lonely shore, with miles to travel, this is impossible. A box, open on top, but with movable slats on which to suspend the birds, is perhaps the best plan to adopt in a boat or on shore where several hours are spent. When tramping specimens may be

¹ If the skin has become dry it may be moistened by gently touching the surface with a wet sponge; but if the paste is used this is of course unnecessary.

hung up or laid on a rock or hummock until return, the object being to prevent friction and pressure while the body is warm and lax. When cold and hard it is best to wrap in cheesecloth, corn meal being freely used at the shot holes, and the mouth and internal nostrils plugged just before wrapping. But with even the greatest care the feathers will soil and it becomes necessary to clean them.

If a bird is very bloody when picked up, wipe off the excess of blood with a piece of raw cotton, and do not, if possible, allow the blood to get dry on the feathers; never wash it until you are ready to skin, unless you can dry also, and never wash in salt water if by any means you can get fresh.

When ready to clean, provide a vessel of warm water and dip the bloody feathers into it, working it the while with the fingers; do this in several waters until the blood is all dissolved out, then dry by pressure with a towel or cheesecloth; now, with a piece of raw cotton partly saturated with turpentine, gently wipe the wet feathers downward, so as to leave, as it were, a thin layer of turpentine; on this place dry plaster an inch or more thick, according to the size of the bird, etc. In a few minutes replace with more plaster, and continue until all the moisture is drawn from the feathers, when the plaster adhering may be wiped off with raw cotton and the feathers blown apart with a bellows, or by taking it to a windy place and smartly striking and alternately raising the feathers, the plaster will be blown away. A second application may be needed if the feathers are stained.

This cleaning is usually done after the bird is skinned, but sometimes it will be found convenient to do it before. Benzine may be used instead of turpentine, and sometimes soap or washing compounds will be found useful.

With small dirty spots the water may be applied with a piece of raw cotton, a sponge or cloth, and the feathers gently stroked downward toward the tail, parting the feathers with the left hand while the right applies the water. Cotton is much the best, as when dirty it can be thrown away and a new piece used.

The essential points in cleaning a bird skin are: (1) Never let the blood get dry on the feathers; (2) always use the plaster immediately after washing, and (3) always blow out the plaster from the feathers. At its best, cleaning feathers is a nasty job, but by following the above an otherwise worthless bird may be made almost as good as an unsoiled one.

A PEARL FISHERY.

MR. CHARLES H. TOWNSEND has published in the Fish Commission Bulletin a report on the pearl fishery of the Gulf of California. The season begins in May, and the divers all wear diving suits. The shells of the pearl oyster (*Melegrina margaritifera*) are the chief object of the industry, but the value of pearls adds considerably to the revenues. Pearls are accidental growths, "being caused by the deposition of nacre around some foreign object, as a bit of sand or a parasite, but usually an egg which has failed to develop properly." Some of the most valuable pearls are black. The largest one seen by Mr. Townsend was about as big as the egg of the bluebird. The largest one known is 2in. long and weighs 3oz. Mr. Townsend made a descent in a depth of 18ft., and found the experience very uncomfortable. "The light is gray and dim notwithstanding the intense sunlight above the surface, but within a radius of a few yards everything is distinctly seen. Owing to the pressure of water and the weights necessary to overcome it, a novice has the same difficulty in maintaining the perpendicular as a child that stands alone for the first time." The dredge of the Albatross frequently brought up shells of the pearl oyster in depths of 60 to 180ft. in the Gulf of California. The Bay of Mulege has furnished some pearls of rare value, among them "those magnificent pearls of which the collar was made for the Queen of Spain, and which evoked so much admiration at St. Cloud and Windsor Castle." Among the choice pearls are various colors, some white shot with dark specks, some light brown, sandy, gray or black; but the most valuable ones are pink.

A QUEER LITTLE KITTEN was seen one fine moonlit night at Woods Holl, Mass., and a thoughtless young man, who was on his way to church with a lady, gently kicked the intruder off the sidewalk—gently but disastrously, for the kitten was of the black-and-white-striped, strong-scented genus and did not suffer interference gracefully. The kitten held its ground, but the young couple hastened away and neither of them went to church that evening.

Game Bag and Gun.

Antelope and Deer of America. By J. D. Caton. Price \$2.50. *Wing and Glass Ball Shooting with the Rifle.* By W. C. Bliss. Price 50 cents. *Rifle, Rod and Gun in California.* By T. S. Van Dyke. Price \$1.50. *Shore Birds.* Price 15 cents. *Woodcraft.* By "Ness-muk." Price \$1. *Trajectories of Hunting Rifles.* Price 50 cents. *Wild Fowl Shooting;* see advertisement.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

AUTUMN.

THE sweltering days are over. Cool nights have come. The harvest has been gathered, but the stubbles are sprinkled with scattered grain and the shocked but unhusked corn dots the fields. The thunder showers are less frequent. The apples are being carted in, and the cider mill gives out its well-remembered creak as old Dobbin goes her round.

Now, if you are the true, keen field sportsman, whose slumbers of late have been broken by grouse's whirring wings or the sound of the shrill whistle of the woodcock, you know your time has come. You take from the closet the breechloader and look it over, throw it to your shoulder and glance along its barrels. The feeling is growing on you. How your heart thrills as you think of the bags last season and anticipate the present season's port! And fortunate you are if you happen to have been

country born or to have a friend or relative at an old country place where you are welcome in the autumn time. You know where to go for Bob White along the hedges by the old buckwheat field and down toward the hazel thicket, and for woodcock down along the spring-holes in the alders, and for the lordly grouse beyond the berry patch and bordering the sugar bush on the hillside facing the warm sun. The same old sugar bush! What a place it used to be in your boyhood for squirrels, gray and black and the little saucy red chickadee.

You step forth in the crisp morning air and feel the pure ozone as it fills your lungs. What a breath you draw in! How your eye glistens as you glance over the landscape! The grasses are dead and dry at the tops, the soft maple leaves are turning to crimson and gold, and perhaps you may perceive a slight tinge of frost on that upper rail as you leap the fence. And your dog—ah! how he enters into the spirit of the occasion; with what frantic rushes he bounds here and there, away from you and back again, but watching your every motion. Let him go; he will be all right after you have crossed a field or two. Let him run and roll over and give tongue in the mad excitement of the first outing of the season.

The thrills at your heart are increasing, and will increase and keep on in volume and intensity until—but we will not anticipate. You cross the pasture down to that swale fed by the spring holes. You know the place well; its alders and bogs have been trampled through by the cattle in the hot days just past. Steady, Dash! He is making game. How carefully he stops, now almost crouching. He pauses. See the swift backward glance of the eye to assure him that you are ready. How your heart is beating now! He comes to a point, and soon the bird springs from the bog and skirts toward that opening, or essays to climb up through the small treetops. Your heart stops beating, your nerves are on a tension; and, as Frank Forester says, with "eye of faith and finger of instinct," you touch the trigger and see the puff of feathers drift off to leeward, and the lordly bird turn over and pitch down by that water birch, or that clump of oak turning red and yellow under the magician's touch.

And, ah! when your faithful dog brings it to you, holding it so gingerly and yet so securely in those vise-like jaws, with not a feather ruffled, you gently take it from him and pat his head, saying, "Good dog; good fellow." And if it is a woodcock, you hold it up by its long bill and gaze at that large, full eye, fast glazing in death, and mark its round cinnamon breast and soft velvet-streaked back. Or if a grouse, you lay it on its back on the palm of your hand and stroke the feathers from the black ruff around the neck down its plump breast, calculating with the judgment of a sportsman on its weight. How your breast is thrilling now! And as you stow it away in the recesses of your shooting coat you feel that the world is very grand and that you are one of the very fortunate ones "in it."

JACOBSTAFF.

NOTIONS ABOUT GUNS.

THERE has been a lot of talk about feather-weight guns. Is not the principle that calls forth a 12-bore of this pattern an incorrect one, because of the recoil that is consequent? The feather-weight shoots much the same load as the heavy gun of the same bore. It is the bore, not the weight, that requires the proportions of powder and shot. One can hardly get along without 3½dbs. in a 12-bore, and that load, shot in so light a gun, is bound to recoil most uncomfortably after much shooting. My experience comes from using a light single-barreled 12-bore now and then and a 7½lb. arm, which latter I have shot many hundred times in a few hours, with black powder, and my shoulder told me the result better than I could describe it. I am aware that the nitro powders do away with much recoil from black powder, and while I am a wood powder advocate I am also aware that any force sufficient to send the shot out of the barrels at a high velocity must also expend a part of its energy back against the breech. I have found this so with a light gun and wood powder, and to such an extent that constant shooting would have proved very unpleasant. The gun I now shoot is a 9lb. 12-bore, yet it is too heavy. For constant handling, long tramps and quick shots the 5½ or 6lb. gun is a delightful weapon, and, all other things equal, would soon handicap the heavy gun, but a black and blue shoulder is worse than a cannon to carry. Hence, I believe, all things considered, that the happy medium, the best all-round weapons, is the light 16-bore. My boyhood shooting was with a muzzleloader of 16-bore and I was often very successful, even killing wild turkey with it. However, it must be true that the larger bore will do greater execution and a 12-bore as light as a 16-bore dare be, with no greater recoil than a 9lb. 12-bore, would be a wonderful weapon. But is such a thing possible?

Is there anything complicated about the proper use of wads under varying conditions? I cannot see it, though I know that in different guns different proportions of powder and shot are necessary. I have found in shooting two very different 12-bore guns that two black-edge wads would give much greater penetration than one black-edge, and just as much penetration as three or four of the same. The principle is simply this: The wad next the powder is often blown to pieces, the next one is not and it has sufficient stiffness to drive the shot perfectly, and another wad does not help in the least. I have made this experiment a number of times, but only with black powder. I cannot see why two black-edge wads are not as good as pink-edge or felt, they are good enough for me. Now, who knows it all concerning this?

One of your correspondents tells the young sportsman to carry his gun always at the half cock. The principle rather to be followed is never to touch the trigger till the gun is to be fired; but when tramping after game, expecting or at any time liable to shoot, the sportsman should always carry cocked and be careful where the muzzle of his gun is. If he waits to cock at a sudden rise of birds or jump of rabbit he is in more danger of shooting his companions when trying to get the hammers back in a hurry by his finger slipping off the hammer before the trigger catches than he would be by carrying the gun cocked all day long. Most boys hold a gun about horizontal when they are cocking it, and the muzzle may be anywhere if they are in a hurry. And if you wish to teach a boy to shoot quickly and steadily, don't handicap him with a half-cocked gun at a flush. Let him begin by doing as the old sportsman does, and be careful from the first. Again a gun with rebounding locks, or with the half-cocked notch properly filed so that

the trigger cannot be pulled away from the tumbler when in the notch, together with a strong trigger spring, is a safe enough weapon to be carried loaded in a wagon, a boat or a cyclone. Enough has been said of the hammerless, and enough may be seen on very short acquaintance to convince any one without a prejudice for new-fangled notions that the weapon is vastly superior to the hammer gun in every way, safety included.

I think most sportsmen are ignorant of the easiest, best, cheapest and simplest method of cleaning guns. In the first place, and most important, don't clean the inside of your barrels at all when you return from shooting, no matter how long the gun is to rest in its case or stand in the corner. Merely wipe over the outside of the gun with a rag that has been saturated with melted cosmoline (or some such like preparation from petroleum), rubbing a little hard. Then wipe with a dry rag if the gun is left too greasy. Before the weapon is used at all the inside working parts—the locks, ejectors, etc.—should be warmed and melted cosmoline run into every opening and joint. When the parts cool the grease hardens and stays, and it will last for years and preserve perfectly. When you are ready to go shooting again, swab and wipe out the barrels, which you will find are perfectly preserved under the burnt powder dust. They will look as new and bright after the wiper as if just polished. I have never known guns to rust even in salt air and drizzle when thus cared for. I have known cleaned and oiled barrels to get rust spots inside in spite of every other precaution.

S. F. A.

PRESERVING TROPHIES.

FROM Ward's Natural Science Establishment, Rochester, N. Y., comes a handsome booklet with excellent engravings of mounted heads of big game. The mounting of sportsmen's trophies is growing to be an extensive business with the establishment; and we quote the directions given for preserving such objects until such time as they can be put into the taxidermist's hands:

"To prepare and preserve heads of deer, elk, etc., divide the skin in a circle around the neck just forward of the shoulders. Cut it open along the top, to a point between the ears, from that point make a cut to each antler. Take off the skin, being careful not to cut the eyelids, and leaving part of the lining of the nostrils and the lips. Skin out the ears. Cut away all loose flesh and cure with plenty of salt, letting it dry in a shady place before packing. Skulls of all animals are interesting and valuable. They should be entire, without broken jaws, bullet holes or broken teeth, if possible. Disjoint from the neck without cutting the back of the skull. Wrap jaws so that teeth shall not be broken or lost. Skulls with antlers may be bleached and mounted on shields, and skulls of puma, bear, etc., on pedestals with brass standards.

"To Preserve Fish for Mounting.—The easiest method for the sportsman is simply to remove the entrails through a slit in the belly, and seal the carcass up tightly in spirits; or if the specimen is to be sent but a short distance and mounted immediately, a strong brine will answer as a preservative. In general, however, the skin should be removed, especially in the case of large fishes. To do this, make a flap of the entire skin on one side of the fish, choosing the side most injured by the gaff or loose scales. Make an incision from the back to the belly just back of the gills, along the belly to the base of the tail, and up again to the back. Raise this flap, carefully cutting the flesh away, and separating the fin from the body close under the skin. With this flap laid back, the dorsal and belly fins can be cut away from the body just under the skin, the backbone severed close to the tail and the fleshy body lifted out, cutting it away from the head last. Then all fleshy particles should be scraped from the skin, the inside of the head cleaned, eyes removed, etc. For the more perfect mounting of the specimen, any striking colors of the various parts should be noted, and the color of the eyes. After removal, the skin should be thoroughly rubbed with salt or alum and kept in a cool place. The sooner it is shipped for mounting the better. In case of a large fish, such as a tarpon or large muskallunge, it is desirable to mount only one-half longitudinally on a panel, in which case the flap turned back in skinning need not be preserved. A sharp knife and a pair of scissors are necessary implements."

The booklet is well worth sending for.

MAINE GAME.

Editor Forest and Stream:

Deer are reported very numerous in eastern and northern Maine this fall. Residents hunt them very little as yet, so they will just look up as one passes and, in some cases, continue to gaze. The best hunter in La Grange told me that on the east side of the Penobscot River, well back in clearings, 40 to 50 have been seen in droves and passed within easy range.

A. C. ADAMS.

A Boston correspondent writes: Inclosed find a letter I received on my return home from the West. It is not the first one of this kind, and in discussing the demerits of Maine native and visiting sportsmen you might like to know such facts. The letter comes from a Maine post-office and was written in August last. It reads: "Dear Sir—Do you have any use for fresh game? If so, how much do you pay for venison saddles? If you do not want game please write me what places would pay good prices for fresh game. This is a business letter and strictly confidential."

MOOSE HUNTERS HUNTED.—New York, Oct. 2.—A gentleman just returned from the Metabatchouan River tells me that Mr. W. H. Briggs, of Bridgeport, Conn., was out trout fishing with his guides near the club house the other day when they saw a cow and bull moose swim across the pond. That day they had left their rifles at home, as they were not expecting to go any distance. They cut off the bull and the guide struck at him with his hatchet. The moose swung his head to escape the blow, which broke off a piece of an antler. This enraged the animal and he made a plunge for the boat, putting both forefeet aboard and smashing the canoe. The occupants barely escaped with their lives and were rescued from drowning by some members from the club house; but everything in the canoe was lost.—W. H.

NEWFOUNDLAND CARIBOU.—Messrs. Cecil Clay and son, of Washington, and W. Holberton, of this city, sailed from New York last Saturday for a caribou hunt in Newfoundland.

AMONG THE CURRITUCK BAY BIRDS.—I.

WHEN getting ready for my regular summer bay bird trip—the North Carolina Sound—I looked around for a good quartette. As the world goes, one learns many things, and for a hunting party “us four and no more” is the exact number that will give the greatest mutual benefit. Four can pair off, four can separate equally, leaving no man like the fifth spoke of a wheel useless and alone. Four can make a full whist hand, or “seven-up”; four is the sportsman number as potent as the magic nine of the Chaldeans.

After an experience of a score or more of years spent in hunting, mine may be of some use to tyros, or old sportsmen, too, for that matter, who contemplate making up hunting parties, especially as the autumn quail shooting and winter duck hunting is approaching.

It is a matter of indifference to me whether my companions are good shots or not, actual shooting is but a fraction of time spent on the trip, and it is good comradeship that makes the sporting nomadism a success.

There are certain types of men that should be avoided

like poison on such expeditions. There is the good shot, selfish and opinionated, who can talk nothing but “shop” all the time. No matter what subject is broached, he turns the conversation to his own exploits, his sole object is to make others feel small, he never loses an opportunity to boast of his prowess, and in field, thicket, seameadow or river, he invariably chooses the best location or occupies the best blind, and like a bantam rooster, he is in a continual crow. Such a person can run up the score, but can add nothing to the enjoyment of the party. Then there is the envious man who wants the best of everything, and as envy and suspicion go together, he imagines that every one is leagued against him, and upon the slightest run of bad luck he announces his intention of breaking up the party and striking for home.

Who has not met the penurious man who treats a pleasure trip as if it were purely a business transaction, and haggles over every expenditure like an old customer in a pawnbroker's shop. “Sundries” haunt his waking hours, and drift through all his dreams. If he would, oh, if he would only keep it to himself, but he does not. No man will stand imposition, but there is a wide difference between extras and robbery.

Then the kicker—we all know what he is—but as he often affords food for mirth, and as the kicking comes as often from heredity, as untoward circumstance we can pass him by.

Lastly comes the chronic grumbler—worse than all the others combined. Just as a pinch of assafoetida can poison the whole atmosphere around, so can the grumbler diffuse misery and discontent to all brought within the boundary of his malign influence. He is an annoyance, a grievance, nuisance, vexation, bore, and a general sickener. If there is on a hunting excursion a greater thorn in one's flesh I have never met it. The grumbler settles down to work soon after the voyage commences, nothing suits him, it is worry, bother, plague, baiting and badgering. He is a kill-joy, a veritable prophylactic snag and sawyer to your pleasure boat floating down the stream.

Now the crowd I invited to my Currituck Club were men of different metal. Everybody in Washington knows Captain Burgess. A fellow of infinite wit, and like Falstaff, the cause of wit in others; well in the forties he is the image of Fritz, when Emmett of genial memory was at his best, and had he taken to the stage in his youth he would have made his mark. Cap, as he is called, is fond of all kinds of game and is as much at home bluffing on a bob-tail flush as blazing away at the birds from sink-box or blind. Mac was a tyro but willing to rough it, and except when his liver is out of order, takes alike with a frolic welcome “the sunshine and the storm.” York, the youngest of the lot, is an ardent sportsman, a quick, sure shot, and his capacity to rough it is second to none.

Now for the outfit—a party going on a hunt is almost sure to take much more than they need. I gave each man a list for a week or ten days' absence, they were simply to go in light marching order, with no wagon train. One old suit of clothes for hunting to be worn there and back, a change of underclothing, India rubber boots or old shoes, oil-cloth, 500 shells, a mosquito net, and old kid gloves with the fingers cut off, both to protect head and hands from the pestiferous mosquitoes, an old slouch hat, that was all, of course each man clubbed

in for liquids. Reaching Norfolk, I ordered one ton of ice to be forwarded to the club via the steamer, to preserve the birds. Then we took the cars to Virginia Beach, and meeting Captain Drinkwater's team, we drove along the beach for thirty miles to our destination. The tide being high it was an all day journey, for instead of fast trotting along the smooth velvet beach, we had to plough through eight inches of sand, and an ox team would have been as serviceable under the circumstances as a pair of fleet geese.

The Currituck Inlet Club was founded some five or six years ago by a small and select party of Norfolk gentlemen, who kept the membership down to one dozen. Afterward the club was enlarged to twenty, and then to thirty, the initiation fee was increased, and certificates of stock issued, though there were no printed constitution and by-laws.

The place was famous for its sea meadows, and has been celebrated for a century or more as the finest place for bay bird shooting on the Atlantic coast. The ocean on one side and Currituck Sound on the other; the club's meadows were about a mile wide and a couple of miles

pared with the adjacent clubs; this being the case it is in the interest of the club to guard zealously its rights and privileges. How this is done I will presently show.

The regularly appointed keeper of the club is C. S. White, or Shant White, as he is called. His brother Leon once lived on the lands of the Swan Island Club, but was forced by that organization to leave the place, and owning a marsh and piece of ground on the lands of the Currituck Inlet Club he erected his dwelling. Mac and I stopped at Shant White's, while Cap and York remained at Leon White's, about 100yds. distant.

Approaching the keeper's house we found him stretched upon a shucked pallet in the yard playing with his baby. A big pan filled with lightwood knots was burning brightly, and though the flames attracted the mosquitoes from far and near, yet the pungent, resinous smoke kept them at bay. These smudges are the favorite method employed by the islanders to get some rest and comfort in the early part of the summer nights; they retire early and get up late. Twelve hours good solid sleep, with a half dozen naps during the day are sufficient to keep them alive. About sunrise we started for the shooting

grounds about a mile away, a team carrying our guns and shells. The mosquitoes were out in force and literally covered our bodies; but with the nets covering our heads, the gloves on our hands, we bid defiance to them.

“Skeeters is bad certain,” remarked Shant, clutching a handful off his neck and crushing them in his palm. “They will carry me off, wagon and all, ef they keeps on this way; almost drain my blood.”

“What blood can they get out of you, Shant? tell us that,” remarked Cap.

“They ain't after my blood,” said the driver; “but after the supper I ate last night, I reckon, and then they will suck my bones ef I let 'em.” Then he got down, broke off a bunch of bushes and fought them as if a swarm of irreful yellow jackets were on the warpath.

Fortunately for the sportsmen, the beams of a hot sun, or a stiff breeze causes these pests to sink out of sight, and but for this wise provision of nature such a thing as hunting bay birds on the North Carolina coast would be an impossibility. I have had some hard experiences in my life with these insects. I have fought the Jersey mosquitoes, off the coast, battled with them in the Florida everglades, and suffered torments from them in the swamps of Cape Charles, but for persistency, bloodthirstiness and relentless persecution, I give to the North Carolina coast mosquito the palm. They seem to me larger than any other species I ever met, and as these shallow pools on the sea meadows are their breeding places, they literally are in swarms. In the drive through the bushes they covered horse, cart and occupants, and not until we got out in the open and caught the strong wind from the ocean did they leave us.

We occupied blinds a couple of hundred yards or so apart. A few bushes stuck in the ground, a small box to sit upon, a couple of dozen tin decoys stuck in the shallow ponds, and we were ready for work. The cart put back to the house, call about 10 o'clock. All around were the flying birds, and at once the snipe began circling over the decoys, and each gun was ringing out in the morning air. I alone had taken a trained setter to the club, who crouched in the blind awaiting my signal to bring the killed and wounded birds. The bay birds here rarely fly in flocks, and consequently all our shots were singles and killed flying. The birds seemed to detect the cheat as they approached near the decoys, and invariably shied off, thus bringing the gunner's skill in full play. I suppose we averaged a shot every two minutes, though of course not regularly. Sometimes we would fire so fast but for our thick gloves we could not have held the heated barrels, then a lull would come of a minute or two. For over one hour I made preparations to light my pipe, but before I could succeed I would have to stop to shoot, and my friend and comforter was taken up and thrown hastily aside a dozen times because the birds came so fast.

There was no necessity for calling them, they would head for the decoys of their own accord, and it required at times some fancy shooting. It was comparatively easy when they circled or beat against the wind, but when they darted by, borne on the pinions of the breeze, they went like a rocket, and one had to sling the muzzle of his gun fully five or six feet in front to knock them over.

ALEX. HUNTER.

[TO BE CONCLUDED.]

AMONG THE WILDFOWL.—VI.

DEAD FOR A DUCAT—AT SIXTY MILES AN HOUR.

in length. The grass is short and thick, with here and there shallow ponds that are filled with water except in a drought. These basins are the great reservoirs for the yellow shanks, graybacks, grass plovers, mostly, which arrive in May, disappear in June, and then return in the latter part of July and remain until some time in October.

While epicures and gourmands consider these birds most excellent in delicacy and flavor, yet few ever reach market, for these snipe are safe from the pot-hunter, for one reason, their flesh is so fat and tender, that they spoil in a few hours on a hot day, and they must be placed on ice shortly after they are shot, and kept there until they are served, else decomposition is sure to follow. Of course market gunners can not afford to bring ice such a distance even had they a refrigerator to hold it, and packing contrivances to ship them, hence, though the birds command a fancy price, and are in great numbers, none of the natives nor gunners care to waste their ammunition except to supply their own table.

This leaves the clubmen a fine show, and as few of them ever come down during the summer there is choice shooting for those who care to risk the positive discomforts of torrid weather, swarms of mosquitoes, and the absence of all fresh fruits and vegetables, for this pure sandy soil produces nothing, neither orchard nor garden stuff. Even the milk is canned.

The glory of this club is in its snipe shooting, the ducking privileges are far from choice, and cannot be com-

CHICAGO AND THE WEST.

OPENING DAY AT HORICON.—II.

SATURDAY at noon, the first of the Horicon shooting party left Chicago, including Mr. Percy Stone, Mr. L. M. Hamline, his guest Mr. J. Hall, and his young son, Leo Hamline, also a new member, Dr. H. C. Buechner and the writer. The distance, via C. M. & St. P. R. R., is about 150 miles, and Horicon is reached in the early evening, the three miles' ride cross country putting one down at the "Box" just in good time and elegant trim for the sort of supper Louie Dunham, the club cook, has waiting. Louie is an old Mississippi River cook and a high roller in culinary matters. We found that he had ordered, among other items, twelve dozen spring chickens. Before we had finished supper he grimly remarked that he was sorry he hadn't ordered another gross. If an assessment isn't due to square the table account at the end of the season, I miss my guess, for everything goes at Horicon.

Now, if the reader will kindly look up the Chicago Shooting Box, on the left hand side of the map as one looks toward the top, he will find where Percy Stone began to show the writer something of the marsh. "Miescke's Channel" runs clear up to the boat house, and is ordinarily full of water, but when Percy and I started down it, it took us over an hour to push through the mud down to the mouth of it, and then we could not tell where the mouth was. It is useless to ditch on the marsh proper, for the bog simply melts and fills a ditch with soft black mud. A bank for a ditch is an impossibility.

Some time before noon we got our boat, the best mud craft I ever saw, down through Miescke's bay to the dam, which was just then beginning to set the water back a little. In a common boat we should never have gotten there at all. The boat we had was one of Mr. Stone's design. It is much like the Point Mouille boat you see on the Lake Erie marshes, but not quite so deep. It is double-ended, decked and coamed, flat-bottomed with small rake, only 8 in. deep in the middle, 4 at each end, and rather beamy. It is very light, and can run on a heavy sprinkling of corn meal, water not being at all necessary, as we discovered. This I should call the typical Horicon boat, though the natives use a cranky double-end sharpie, easy to pole in deep water, but absurd for mud.

"Wait till we get into Four-Mile," said Percy, "and I will show you more young ducks than you ever saw." So we pushed on up First Channel, and over waterless mud flats, half way across Four-Mile Pond. Then we came upon the first bed of birds. I should think about 10,000 teal got out of one bay, and these started others, and our rapping on the boat later on started yet other thousands, until Percy's prophecy was fully proved. I never did see the like. The birds flew up and down the bank of wild rice which skirts the edge of Four-Mile Island, and flapped in and out of the cover as far as we could see or hear. There was no estimating the number. They were all birds bred on the marsh. For the first time in my life I was upon one of the vast natural breeding grounds of the North, probably to-day the greatest this side of northern Minnesota or British Columbia.

"The teal come out early," said Percy; "the young red-heads are still in the grass to great extent, and the mallards are not in this part of the marsh. We will go see if we can find some of them now."

With extreme labor we now worked in over a quarter of a mile of mud bar, into the edge of what is known as the West Bay. We left the boat, took our lives and our push paddles in our hands, and plunged through the rice bog up to the edge of a bit of water. Here we called aloud, and in answer myriad voices arose. We thought about 2,000 mallards got up in one flock. They came circling over us, a sight to drive one frantic.

"We'll get in here on opening day, if we have to drag the boat over the grass," said Percy. "Right here is where we two are going to shoot."

We made it back to the club house in the early evening, and by that time I had seen enough ducks, apparently, to supply the inhabited world with shooting. Percy told the others of the party about the low water, but thought

the Big Lake, further north, would have more water in it. Later information confirmed this supposition, and the bulk of the party went in that direction on Tuesday morning.

Mr. Stone's friends, the two Hunter boys, of Chicago, were to go with him, and I was also so assigned, a great good fortune, for he is doubtless the hardest worker and most successful duck shooter of the club. I never met a better, outside of the market-hunters. His plan was soon formulated. He and I were to take a tent, and go up to Four-Mile Island and pitch camp on Monday afternoon, then to return to the Box, meet the rest of the shooting party due there Monday evening, get the two Hunter boys, go back to the tent and sleep there over night, and thus get the much coveted early start Tuesday morning. We did go in with the tent Monday afternoon, got within 50 yds. of the island with the boats, cut a path through the wild rice with a sickle, and half carried, half dragged our skiff through the thick, deep mud and water to the inner edge of the rice. We found the island a thicket too dense to admit a tent, but on the edge of it the ground was more open. We pitched the tent on ground so soft

calls the "gloaming just preceding nightfall" when Tommy Hunter and I started for the dam. It was the dark of the moon, or at least there wasn't any moon visible, and to make matters worse, a dense white fog had settled over the marsh, so thick you could hardly see a dozen yards ahead of you. We declined a guide, however, and with the pleasing prospect of getting lost on the marsh started out, after arranging in regard to the signals in case we did get lost. Our scheme was to follow a line fence till we got to a certain wooded point, follow the edge of this till we came to the road, and then follow that till we got to the dam. This looked simple enough, but we soon found it difficult. The abominable fog shut out every landmark. Tommy Hunter had never been there before, and I was trusting to one trip and a compass. We found the timber, took the right bearing for the dam, but could not find the road. Back and forth we promenaded on the bluff, unable to catch the wheel marks, and afraid to trust ourselves to the marsh. It is astonishing how different a landscape appears after dark, especially with a white fog accompaniment. Finally I told Tommy that we might be somewhere, but I didn't believe it, and if so,

I didn't know where it was. I was irritated beyond measure at knowing where we were without being able to prove it. Finally I left Tommy on the point, and getting the Milky Way on my back started into the marsh, and then we fired three shots at intervals, getting no answer. The situation was most puzzling. We could get back to the club house, but could not get to the dam. At length we struck a cowpath, which by the compass had the right trend, and presently we found a cattle pond which was familiar. With Tommy for a pivot here I worked around in the marsh till I found the wagon trail. The next day I learned that we had crossed it on the bluff a half dozen times, but it was so scattered on the hard blue grass sod that we had missed the wheel marks.

We got to the dam ahead of Percy and Charlie Hunter, for they had had even a worse time than we. They had lost their lantern overboard, and their boat leaking badly and so taking in great weight, they had nearly stuck on the marsh where they could not empty her. With a saucer for a bailing vessel they had kept afloat, though very wetly so, and finally made their way down to the dam.

It was now nearly midnight, and the hardest of our trip lay before us. Percy and I divided up the baggage, taking a boat apiece, and the two brothers took a third boat. Percy went ahead with a lantern to explore the channel, and we followed single file, pushing up First Channel in the fog. My boat was last, and I shall not soon forget the weird effect I saw that night, the short gleam of the lantern on the white fog bank,

and the giant figures laboring dimly in the mist ahead. It was all very grim and ghostlike. You can not stay at home and see such things.

Of our push across the flats above the channel I shall say little, for it was simply awful. The picturesqueness soon wore off, and it became a sheer case of hard work, three feet at a time, push, push. At 1 o'clock in the morning we halted at the edge of the wild rice bank and consulted awhile, finally concluding that the next bank must be ours. Into the next bay we dragged on, and here Percy Stone found a duck roost and a muskrat house which he lined up, and out of these uncertain data he figured out the tiny hole in the rice where we had cut our landing in to the island. This was the finest piece of marsh work I ever saw done by amateur or professional. The difficulties of that fog-encircled journey cannot be understood till tried in similar fashion. That same morning old man Miescke, the best guide on the marsh, got lost on dry ground going up to Big Lake, and his son Emil, born on the marsh, also got clear out of his calculations on the lake. With no channel or current to give a hint, with a curtain of bog and marsh growth all about and a sea of white fog sweeping over all, the problem of finding a 14 in. hole in a fourteen-mile rice bank five miles off is one which may well be thought to offer difficulties.

It was 2 o'clock in the morning when we blundered half exhausted through the mud that lay between us and the tent. We threw ourselves upon our moist and uncertain bed with a great deal of relief and a good chance for

NOT TILL THEN.

WHEN the brush of glorious autumn

Paints the maple leaves with scarlet,

When the golden rod is decked with glistening sprays,

Then 'tis time to seek the woodcock

'Mid the brier-tangled thickets

On the hillsides, in the bright October days.

W. TOWNSEND.

and "trembly" that we kicked the tent pins down with the toes of our rubber boots, an axe not being necessary. It was the moistest looking camp I ever helped set up. As to how we were ever going to find that hole in the wild rice after dark, that was still another question.

The evening train on Monday brought up Messrs. C. E. Felton, C. B. Dicks and the two Hunter boys from Chicago and Mr. R. Merrill from Milwaukee, so that the Box fairly overflowed with eager shooting humanity. At the club boat below the dam we had already seen Capt. Clements and son of Milwaukee, Mr. L. J. Petit and several other shooters. Mr. Kretchmar and son were camped on Four-Mile Island above us, Mr. Boehme was over at Mayville shanty with two other guns, and all in all the occupancy of many of the choicer shooting points was already foregone. The party at the Box was divided up as follows: Messrs. Hamline, Hall, Dicks, Merrill and Buechner started at 3 A. M. the next morning for Big Lake, where their boats were taken Monday. Col. Felton and his pusher went by wagon to the dam early Tuesday morning, thence up First Channel to the middle bogs of Four-Mile Bay. Percy Stone and Charlie Hunter started at about 8 o'clock Monday evening by boat for the dam, and I was to take Tommy Hunter by land along the edge of the marsh, find the road that ran down to the dam, and there meet the boat party, all four then taking boat for the camp on the island. As it turned out, our camping party had rather more incident than its share.

It was about that time of day which the club historian

malaria, of which latter we never even dreamed. At 4 A. M., two hours later, we were up and eating a hurried breakfast. Before that time some one on the "Skirmish Line" had violated the rules and was firing in the sightless dawn. When we hurriedly pushed out into the flats again the guns began to boom on all sides, and the swish of passing hurrying wings was incessant. Opening day had begun!

An hour's push brought us all four to the mouth of the channel, into West Bay, and here we left the Hunter brothers. Percy and I pushed on deeper in, over a journey which I shall not attempt to describe. Walk a mile 3ft. at a step, two minutes to each step, and lifting 300lbs. every minute, and you may get a notion of it. Early as had been our start for West Bay, it was 8:30 in the morning, and the fog was lifting, when I got my decoys out, and half an hour later when I had my boat in the blind. Meantime the firing on the flats back of us was incessant, rattling like musketry of engaged lines two miles long.

We put but few birds out of West Bay, and found when morning cleared that the feed was largely killed there by the lowness of the water. Still the bars were covered with mallard feathers, and we knew we had found their midday retreat. After a little they began to come in, and Percy and myself were soon at work. I never saw birds answer decoy and call so well, and for an hour or so I saw the prettiest sort of duck shooting at its very prettiest. I could see the birds dropping to Percy's gun over on the right, and before long I had down seventeen, nearly all mallards.

Presently the firing ceased all over the marsh, and before noon Percy pushed over to my blind, a much disgusted man, and said he was going in. He had thirteen birds in his boat, and had lost numbers in the rice and on the bottomless mud. I could not say even so much as that, for my very best wading and pushing had only been able to get seven of my ducks together. The country was simply impossible to traverse, either by boat or on foot. After Percy left I shot only a little while, for it seemed more cruelly and waste. I left four big mallards lying in plain sight on a mud bar, which I could not reach in any way contrivable. With retrievers, or with gin, more of water, we should have had a grand day of sport.

Every locality has its own style of shooting. At Horicon there are two methods, over decoys and on the flyways. It must be remembered that here the birds are all young home-bred ones. The pounding on the marsh on opening day sets them flying wildly in the morning. Then they get tired and hole up in the recesses of the marsh, whence they do not emerge for a day or two. While they are flying over the marsh they decoy easily, but after they hide it is impossible to get in to start them up unless the water is higher than it is this fall. A few inches more of water would have added hundreds to the bag of opening day this year.

As it was, the low water played havoc with the club's expectations. Instead of 500 ducks, only about 100 were brought in. Col. Felton shot on Four-Mile Bay and only got seven ducks. The early Skirmish Line shooters had the best of it, but we heard of only thirty-five ducks as high bag there, where there was shooting enough to kill a thousand. The Hunter boys had their hard work mostly for nothing. The party at the Big Lake did better, Mr. Hall having high bag, twenty-five, Ben Dicks sixteen, and so on. They brought in about seventy ducks. Ordinarily more than 300 are brought in on "first day." It was 327 last year to five guns only. The average at the Box is rarely less than twenty-five per gun. Mr. Boehmer, of Mayville Shanty, has bagged ninety-three in one day. It was he who got thirty-five this year. Mr. Hamline has bagged eighty-three birds in two days there, and Mr. Stone does not usually fall much below fifty or sixty, never less than thirty-eight since 1884, and last year seventy-four before noon. The latter gentleman, who had gone to so much trouble to secure sport for his friends, felt a trifle disappointed, but he was the only one who felt so. Everybody else was philosophical and happy. Indeed, the shooting was plenty good enough, barring the difficulty of getting the dead birds, and the day was one of utmost pleasure from a shooter's point of view. An epicure might have "kicked" had he belonged to the tenting party on Four-Mile, for every living man of us went off and forgot his water jug, so the day of hard work was passed without a sup to quench the thirst, for what little water there was on the marsh was quite undrinkable.

The next day, Wednesday, saw the water in the dam slowly creeping back over the marsh. Had the dam held at first the marsh would have been in perfect order. They had about a foot of water at Big Lake, and the party of Tuesday went back there again Wednesday, but by noon they returned, as the tired ducks had not yet begun to fly. Percy Stone and I got a few jacksnipe near the club house. In a week or so, especially with a little rain, the snipe shooting on this marsh will be probably the best there is in the West. There is about ten miles of the finest possible ground for them. Bags of fifty, sixty or seventy snipe are easy here, and the walking along the wet knolls on the edge of the swamp is not hard. Last year Ben Dicks killed thirty-one jacksnipe out of his duck blind in one day. Yellowlegs, sand snipe and rail are never noticed by the shooters here, but fairly swarm on the marsh. It is a most remarkable breeding ground for all the water birds.

I can not ask space to say more about the Horicon marsh, but it well might take more space. I saw more wildfowl there than I ever saw on a marsh before. The northern flight had not dropped in at all, and the ducks we saw were all local birds. About Sept. 20 the first of the northern birds strike Horicon, though the main flight is not due so soon. About that time, too, the Horicon teal band up and start on their long journey for the south, along the rail fence route earlier described so far as Chicago. The Horicon mallards, and there are untold thousands of them, as we can all testify who shot there this week, breed on the marsh and stay there till ice. The Horicon redheads are at this date still very young, and are not all out of the grass. They will go south with the main flight from the north. We did not see all the ducks the marsh held. Even the teal can not all fly yet. I saw one bunch feeding on a bar, trim, beautiful little fellows, not much bigger than quails. They swam slowly back into the grass, not attempting to fly, though I approached them within 20yds. The pintail flight from the north is something tremendous, they tell me. I should imagine

that on a blustering day in October, when the birds were skurrying down before a northern storm, would afford such sport as would be hard to duplicate outside of Horicon. But you must ask old Miescke about that if you want duck stories.

One trouble about Horicon club arises from the discordancy of the Wisconsin and Illinois laws. The season opens in the former State Aug. 1, in the latter Sept. 15. Furthermore, the law of Wisconsin forbids one to "export, carry or convey" ducks out of the State. It may be thought that the club men would disregard this latter absurd law, which has been shown to be unconstitutional in a dozen courts, notably those of Indiana, but such is not the case. I do not know of any ducks that were brought across the line. Percy Stone gave a big bag full to relatives in Milwaukee, and I know all his ducks and mine went there. It seems too bad that we cannot have uniform game laws, at least for Indiana, Illinois and Wisconsin, which are so nearly alike and so much visited by the same sportsmen. The game dealers and restaurant men here, however, shall have no chance to lay a charge of inconsistency against the Horicon men. Certainly, in consideration of the facilities their incomparable marsh affords, the latter act with dignified and sportsmanlike reserve in framing and observing their own laws, much more strict than those of the State.

The wildfowl would be swept from Horicon marsh in two years now if it were not protected. It is protected, and I am glad of it. I wish every good marsh in the West were protected. I have no confidence whatever in the public's ability to take care of shooting privileges. History shows the greed and carelessness of the public in such matters. Preserves we must have, or the game is gone. Since this is so, it is fortunate that such rare privileges fall into the hands of men who appreciate and value them rightly and who will take care of them. A Horicon membership is now nominally \$150. In ten years it will be worth perhaps \$1,500, perhaps \$5,000. The game is going.

The following are the names of the gentlemen now holding memberships actually, though eight other memberships are due to be issued early: L. J. Petit, Milwaukee, president; F. C. Donald, Chicago, vice-president; Frank Falk, Milwaukee, treasurer; Percy F. Stone, Chicago, secretary. (The above, with Mr. F. T. Day, make up the board of directors, who have absolute power over the policy and management of the club.) The Chicago members are Messrs. C. E. Felton, C. L. Hunter, L. M. Hamline, W. S. McCrea, C. B. Dicks, W. T. Clark and H. C. Buechner; this list shortly to be extended. The Milwaukee men are S. and W. Clements, G. Preussner, B. Leitersdorf, H. and A. H. Gardner, Louis Auer, W. Sanderson and R. Merrill. Horicon members are H. Miescke, E. A. Kretschmar, L. Dietz, W. A. Van Brunt, C. A. Hart, S. E. Davis and J. B. Hayes. H. Boehmer is from Mayville, and T. C. Schove from Manitowoc.

E. HOUGH.

GAME NOTES.

THE Halifax (Nova Scotia) *Herald*, Sept. 30, reports: Major McDonnell, R.A., of Halifax, went into the woods at Half Way Lake, Cumberland, and killed a fine large moose. Franklin McLeod, Hubert Spiddle and Daniel Ryan, killed three moose in northern Queens. They still hunted two on Friday last and on Monday afternoon called up a fine bull near the Gardens road, so near that they went to the spot with a team and brought the moose home whole, and dressed it in Mr. Spiddle's barn. When dressed he carcass weighed 700lbs. Mr. Ryant did the shooting and ought to be looked after for violating the law. The *Gold-Hunter* says: Hunters are in the woods in all directions, and pretty soon moose horns will be plentiful. 'Twould be impossible to tell who are not out, or who are planning to go. We learn, however, that bombarding has been heard in likely localities where crack shots are in ambush. Last week a party were out in quest of moose. The familiar call succeeded in bringing to their view a fine large denizen of the forest. The idea was first to procure a photograph of the animal in his wild grandeur as a souvenir of the trip, before taking him down. Accordingly the camera was brought to bear with good success. Having exhibited himself thus long before their admiring gaze, and doubtless somewhat suspicious of the surroundings, he made a sudden dash, and disappeared in the forest, leaving but his shadow to tantalize the hunters. [To this record should be added two bull moose killed by Thos. J. Egan, of Halifax.]

Prospects for game very good indeed. Many flocks of birds nearly grown. Mild winters and comparatively few hunters. Very few were shot around here last season. I generally have some gentlemen from your city, but they could not well get off last season. Deer are getting to be right plentiful, and the foxes (the gray) are very numerous, and they are awful on game. We have a few wild turkeys; foxes are death on them. I saw a small flock of wild turkeys not long ago, and one of them was right white, the first I ever saw, and I am a dear lover of hunting and have killed a good many turkeys. The weather at this time hot and a little dry.

SAMUEL BURKE.

JENNING'S ORDINARY, Nottoway County, Va., Sept. 30.

Chicken shooting is over here, they began to pack about 11 days ago. Ducks are here in full force and shooting is fine. More jack snipe than we have ever seen before.—A. FORT PEMBINA, North Dakota, Sept. 28.

Game prospects good!
BERTFORD, N. C.

A. F. R.

THE MASSACHUSETTS FISH AND GAME PROTECTIVE ASSOCIATION sends us its handbook, which shows that the society's membership (of 470 all told) comprises representatives of 61 different cities and towns. The headquarters are in Boston; and communications may be addressed to Sec'y Richard O. Harding, 304 Washington street.

THE OCTOBER TERM of the Courts opened in this city last Monday, and Morello, the restaurant keeper of West Twenty-eighth street, paid a fine of \$150 in the clerk's office of the Court of General Sessions, the amount collected against him for selling game out of season last winter.

HUNTING DEER WITH BIRD DOGS.—In your issue of Sept. 24, in my note there are two errors. The word "recovering," in third line from bottom, should read, "running." The words "the setter has enough," in the eighteenth line from bottom, should read, "they have enough."—H. L.

FISHING WITH TRAINED CORMORANTS

By CAPTAIN F. S. DUGMORE, R. N. R., Master of the Falconry Club 1878 to 1883.

[Continued from page 203.]

CHAP. III.—TRAINING TO FOLLOW, AND INTRODUCTION TO THE WATER.

AS soon as all the down has disappeared from the plumage, the gate of the pen or sty may be thrown open, and the birds permitted to follow their trainer, always with his basket or food-can in hand, to the nearest pool or duck-pond—not running water—for half an hour's exercise; a genial sunny day being selected, and an hour not too late to allow of their getting thoroughly dry before night. While disporting themselves in the water, occasional scraps of fish should be thrown in well clear of the mob, to be raced for.

Birds remaining lazily on the bank should be driven into the water by cracking a dog-whip at them, at the same time calling out sharply, "Get away, get away!" in a tone eventually to be used as a signal to commence work.

Finally, the feeding call should be sounded, and the basket or can loudly rattled and deposited on the ground about 10yds. or so from the water's edge, each bird being allowed to help himself and to gobble down a few mouthfuls (only) before following trainer and basket home; then another mouthful all around, and a full feed as soon as they are all perfectly dry.

While the birds are young they should not be encouraged to follow for a longer distance than an eighth of a mile at most; less, if they are on a stony road; unless their wings have been left uncut, which will prevent their legs from being overtaxed and becoming bent and crooked.

A few days of this practice and there will no longer be any chance whatever of the birds getting lost.

If the wings are uncut, of course netting must be stretched over their pen, or they will be perpetually intruding into the kitchen, their master's study; or drawing-room, and in fact into any and every place in which their odoriferous company would be least appreciated.

CHAP. IV.—TRAINING TO FISH.

By this time our birds will have learned to retrieve bits of fish from under the water, and, what is equally important, to hold on to their prize; a lesson the greediness of his companions, ever on the lookout for a chance to snatch at the protruding corner of any scrap not properly pouched, will very speedily impress upon the understanding of each individual cormorant.

The next step is to teach them to catch living fish. And here, if a wild-caught bird be not available as "pupil teacher," let us hope that one at least of the team may turn out to be a bird of extra quick perceptions.

In this case, he will rapidly instruct all the rest without much assistance or interference.

Failing such a bird, we have before us the only really bothersome part of the training.

If the cormorants, six hours after a very scanty apology for breakfast, cannot be induced to notice a few live fish, running from four to six to the pound, or even a little smaller, placed ready for them in a small clear pool or large tub, it may be necessary to commence by introducing them individually, one at a time, to live minnows in a horse trough. If they seem extra stupid, a minnow or two may be shown in the hand and thrown in before their eyes.

My birds almost always entered themselves, sooner or later, after being promoted from their exercising pond to a swim up a river or trout brook.

First one bird would be tempted, while under water, to make a grab at a fleeing trout, and then the others, after trying their level best to rob him of the unwonted delicacy, would keep their own eyes uncommonly sharp-skinned, on the lookout for a similar bit of luck. But for this clear water is indispensable.

Care must be taken that they do not at this stage get hold of a catfish, a black bass, a perch, or any kind of fish armed with spines that might lacerate the membrane of the pouch.

Brook trout, or sea trout, "weakfish" (so-called) are the best quarry they can have to begin with.

Once the ice is fairly broken, three days will probably make the whole team expert fishers.

During these days we must be careful to call them ashore for a meal from the feeding basket (which must be kept out of sight while they are fishing or they will be pretty sure to strike work) before they have caught enough to gorge themselves, and become disposed to assert their independence. For at first, until our slaves shall have learned to hug their chains, it will not take quite so much as the blunders of a British Colonial Office to remind true-bred American cormorants that "All birds are born free and equal."

CHAP. V.—BREAKING TO COLLAR.

We have now to commence the final stage of education, training our cormorants to give up for their master's use the fish when caught.

We provide each bird with a collar, a pliant leather thong, pierced with several holes, so as to be capable of extension and contraction, and fitted with a buckle.

To this we attach, preferably by a hook swivel, a cord of a yard in length, which we make fast to an iron peg in the ground, or to a loop-knot in a rope sufficiently long to hold the entire team at least four yards apart; the ends

being securely pegged down on soft grass in a tolerably shady spot.

Here we leave the birds, after a very light breakfast given before collaring, until afternoon feeding time, watching to see that they do not get entangled in the course of their struggles against the unwonted restraint. These struggles will very soon cease for good and all, the cormorant, although by nature a good republican, being a bird of a decidedly philosophical turn of mind.

In the afternoon we go down the line with our food basket, sounding the feeding call, and throwing to each bird a bit of fish (which will be cleverly caught in the air) just too large to pass the collar.

Returning very leisurely to the head of the line, we gently approach the first bird (which is looking the very picture of abject discomfort), pass our right hand lightly down the upper mandible of the beak, caress the head, grasp it behind the ears, changing to the left hand, and

is very rapidly carried out, if carried out at all; i. e., if you can succeed in establishing a good understanding between yourself and your pupil.

CHAP. VII.—TRAINING WILD CORMORANTS.

The moment you receive the old bird, cut the quills of one wing (the left), put a collar on him, and tether him as previously described. Leave him alone as little as possible during the first forty-eight hours of his captivity. Lie on the grass close to him—guarding your eyes against possible attempts at reprisal—and with gloved hand make gradual and cautious advances to familiarity, avoiding abrupt or startling movements; scratch his head and tickle his ears, as soon as he has discovered that biting your strong glove is but poor sport, no fun to himself and no harm to you, and bears the light touch of your hand without wincing or straining at his cord.

The second day he will probably take a bit of fish from

self with slackening his collar and allowing him to swallow it. This will soon teach him to wait for your helping hand, instead of plunging in and swimming off with his prize at your approach. Watch his eye keenly as you approach him, and the instant you divine even a half-formed intention of escape, arrest your advancing footsteps and remain immovable, or even take a pace to your rear, so as to give him ample time to reconsider the question at issue.

Beware of allowing him to remain at large when nearly full-fed; this may come to pass when he has made many captures, and consequently has received many rewarding mouthfuls.

If you intend working your birds, whether wild-caught or nestlings, from a boat on broad estuaries or tidal waters with muddy shores and troublesome shallows, you must provide yourself with a flat raft about 8ft. square to be towed astern of your boat; and by feeding your birds upon it, teach them to clamber thereon for rest and drying instead of landing for that purpose. Keep your feeding basket in the boat and lift each bird in turn by the neck on to the gunwale to disgorge his fish and receive his reward.

This is the Chinese system of working, being the only practicable method of dealing with the mud-bordered rivers of the Celestial Empire.

If your team consists of nestlings, you can practice them in following your boat, which they will do for miles before they have learned to fish.

Needless to say, old-caught birds should not be used at all on estuaries until thoroughly steadied by long and successful practice.

[TO BE CONTINUED.]

CHANNEL BASS AT CAPE MAY.

I HAVE always been amused by the dicta of those who profess to know all about fishing and fish, given with the air, as Justice Manly (I think) characterized the speech of a barrister, "Don't speak to the Court as if you were God Almighty addressing a black beetle." There are those whose literary style is excellent, and who give information as to the habits and places for capturing fish, whose experience is confined to their desks. The great Samuel Johnson, if he knew the facts, would characterize their knowledge as "insipissated."

Some practical knowledge of fish would be of advantage to those who write of them and their haunts, and how to take them. For example, in regard to the channel bass. This is the fish known in the South as the red-fish, and on the New Jersey coast as the red drum. There are more namby-pamby and meaningless names attached to the bass family than any other; some ought to be separated and given a designation by themselves. The seabass may remain as designated, for it has no other name except (when small), and in New Jersey, "black perch" and "nigger bass." The magnificent striped bass should have its distinctive designation rock, not rock bass, which is the appropriate name of an insignificant fresh-water fish. There should be no more objection to calling a fish a rock, because the word means also something else, than calling another fish a pike, because that word is applied as well to a short spear. Black bass is indefinite, but is a name given to no other fish, although our Southern friends call the fish green trout!

But, assuming that the fish I have in mind is the channel bass, whether red fish or red drum (*Sciaenops ocellatus*), I believe, is the scientific name, our desk authorities are ignorant in regard to its habits. FOREST AND STREAM, Feb. 9, 1890, states that he is known as an occasional visitant on the New Jersey coast. The Government books say that he has been found as far north as Long Island, and as an occasional visitant on the coast of New Jersey.

I have for many years pursued sea fish which are powerful, about the coast of Cape May county, New Jersey, both in the ocean and in Delaware Bay. The channel bass is my favorite, with the rock, the bluefish and the weakfish closely following. I like game which I can carry in my pocket, and fish which I can't "tote."

Instead of being an "occasional" visitor to the New Jersey coast, the channel bass is the most reliable fish we have. From the middle of September to the middle of October the fisherman is sure of them. They swarm in

A TEAM OF TRAINED CORMORANTS AT WORK. (AS VIEWED BY A DIVER.)

with the right deftly slacken the collar sufficiently to allow the food pouch to be swallowed, rebuckling it as before. This we repeat four or five times, eventually unfastening all the cords and calling the birds homeward to their pen for a worry at the food basket, still with their collars on; finally removing the collars when the whole lot are standing helplessly round with their pouches full, and letting them finish their meal out of the basket without further restraint.

This, repeated for three days, will teach the birds that, though they may catch their food unaided, they stand in need of your benevolent assistance before they can swallow and enjoy it; the result will be that they will soon learn, when fishing successfully, to wait for that assistance at the water's edge, instead of obeying the first natural impulse of trying to escape with their prey.

After the first day, each bird when tethered should have a large flat stone to sit upon.

CHAP. VI.—PRACTICE.

Allowing only a mouthful apiece for breakfast, and adjusting collars immediately afterward, you may now commence, in the afternoon, to fish with your cormorants; a narrow stream that you can easily jump across being the best water to begin with, provided always that it is well stocked with fish; since disappointment is especially to be deprecated at this early stage of their sporting career. Keep the food basket out of sight, behind a bush or under a cloth, until you require to make use of it. Turn the birds in all together, working up stream, and keep them together, promptly heading back with your dogwhip any that break away down the current. As each bird makes a capture he will be driven ashore by the persecution of his less successful comrades (whom you must drive back instantly to their work), and will plant himself on the bank on a stone or stump with the tail, or perhaps even two-thirds of the length, of a fish protruding from his pouch. When all or most of your birds have thus got cargo on board, it will be time for you to attend to them with a view to relieving each in turn from his embarrassments. Approach him with the feeding basket in the left hand and a tempting morsel prominently displayed in the right. Drop this into the basket under his eyes; and, grasping his neck with your right hand in the manner previously directed, bend his head into the basket; when a little gentle persuasive pressure applied to the lower part of the pouch by the second, third, and fourth fingers, will probably induce him to disgorge his fish, for the purpose of instantly grabbing one of the more manageable pieces lying in its depths.

Slacken the collar and let him swallow this; then retighten it at once, and drive him back to work, unless so wet as to require drying; carrying him back to the water by his neck and throwing him in if he shows a disposition to stick to the basket after having received his reward.

If the first bird you attempt to unload manifests any disinclination to part with his fish, do not risk a trial of strength with him, but leave him severely alone, while you attend to another customer: the first meanwhile standing by half choked and very uncomfortable.

Later on, if the waters are not too full of small fry and too scantily stocked with good fish, it may save time to work your birds with collars sufficiently slack to allow them to swallow the rewarding mouthful, though not a fish of any size. Each will then have to be driven from the basket as soon as he has deposited his fish and helped himself to a mouthful in payment; otherwise he will quickly fill himself up and be fit for no more work until the morrow.

The collar should always be adjusted round the bottom of the neck, just below the pouch.

So much for nestlings. The training of old-caught birds differs, in that it consists principally of taming, and

your hand; small pieces only should be given and a slack collar used (to avoid necessity of readjustment) for three days at least. If he refuses food until forty-eight hours after capture, you must cram him as best you may: covering your head with a cloth by way of disguise, if compelled to adopt such forcible measures, and choosing for them the dusk of the evening.

These precautions are necessary, because we do not wish the bird to connect any disagreeable recollections with his trainer, whose identity should therefore be concealed as much as possible on occasions of this kind. Use the call and show the basket from the first; let him see every bit of food ostentatiously taken out of it, and allow him to help himself out of it after the fourth day, dropping in only a mouthful or two at a time, so as to prolong his feast.

Two days later unfasten his tethering cord and let him follow you and your basket, calling him along the road and out of small puddles or ditches, and finally out of a larger sheet of water with no fish in it. Unlike nestlings, never let him go without his collar (unless he is turned out to recover from sickness) into water containing fish.

Without starving or reducing him too much, he must be kept hungry; a mouthful in the morning and a half-meal in the afternoon will suffice at this stage; he should be left as little as possible to his own company. Practice him in permitting his collar to be tightened and slackened without opposition; then in exchanging into the food-basket a fish that won't pass his (slack) collar for pieces that will pass; and his training is finished.

There is no complication whatever about it, and very

CHANNEL BASS (*Sciaenops ocellatus*).

little trouble; all your efforts have to be directed to the establishing of a good understanding between your pupil and yourself, and all the rest follows as a matter of course; the thing is done.

You may now take him to your fishing grounds, avoiding at first localities where rocks, stumps or islets, to you inaccessible, are to be found; and eschewing for the present large stretches of open water, lest he should wander too far from you, and his wild instincts returning should tempt him to insubordination.

For a time he may require to be approached on the bank—always with outstretched hand displaying a tempting morsel—more quietly and carefully than the nestlings, unless you work him in their company; and will take a little more coaxing before he will surrender his fish when caught.

In fact, in order to avoid anything like a fight (which would quickly undo all that you have done), it may be better, if he manifests the slightest disinclination to part with his capture—very probable at first—to content your-

countless numbers along the shores of the ocean and up the Delaware Bay. Fifty-two were taken from the iron pier at Cape May Oct. 1. To be sure, the whole resident population of the little town were fishing, but the catch shows how numerous they are.

The channel bass is a beautiful fish of from 20 to 50 lbs. weight. I have never seen one upon our coast weighing less than the former or more than the latter. He is of a beautiful "old gold" tint, shading into red on the back and snow white beneath, with the distinctive black spot, sometimes broken into splotches, on each side the tail. When he takes the bait he makes a fierce run of from 100ft. to 100yds., and he cannot be checked until the run is made. Then he can be quietly reeled back and the line recovered on the reel, and his subsequent runs will be short and near the boat. Strong tarpon tackle is necessary, for sharks are numerous and very large. It requires a stout rod to kill a shark of 200 to 300lbs., and there are more strikes from sharks than bass.

There is variety in the fishing, too. Schools of croak-

ers, weakfish and bluefish pass along and make variety and interest. The croakers average 2lbs. weight and fight well. Weakfish average 4lbs., and bluefish the same. Sometimes the skates (some as large as a card table) are great pests, and flounders are taken up to 12 pounds. The fishing is interesting and exciting.

A few from the metropolis have found out Angelsea. I think it is the best place for fishing in this country outside of the Gulf of Mexico. Two express trains run there from Philadelphia daily. One gentleman from New York, I know, has fished there every day since May. The season will not close until November.

On the bay side is equally good fishing for the channel bass, with a large flavor of big sharks. The fisherman should take stage from the court house, which is also the junction for Angelsea, and go to Nathaniel Holmes's house at Dyer's Creek. There is good board and lodging at \$1 a day, and boat, bait and boatman at \$3 more. Two persons can have the best of fishing at \$2.50 per diem each.

I write this because I have been reading the pitiful scores about New York, and especially the wonderful luck of some New York angler (recorded in FOREST AND STREAM) who recently hooked a channel bass off Long Island, and "great mirration" (as Uncle Remus would say) was made over it. F. S. J. C.

Mr. Henry S. Tappan and Mr. Chas. S. Higgins were fishing off Fire Island last Sunday, when Mr. Tappan hooked, and after a hard fight took into the boat, a channel bass weighing 32lbs.

CHICAGO AND THE WEST.

CHICAGO, Ill., Sept. 26.—I believe I have said, and certainly should have done so, that a couple of weeks ago I was down on the Illinois River on the State Fish Commission steamer Lotus, in company of Dr. Bartlett, State Commissioner. If it were not for an early October trip with President Cole over the same country, I should like to make the patient column rules of FOREST AND STREAM squeak with a longer account of this pleasant voyage. Later it may be of interest to tell of the way the work of reclaiming young native fishes is carried out, but now all must be brief.

The Lotus is the pride of Dr. Bartlett's heart, and her captain and crew are equally beloved. Captain Brown is an ancient mariner of the great island waterways, and without him the Lotus would be incomplete. With him she has the best pilot on the river, and the kindest, gentlest soul on earth. Captain Brown, Mr. Bower, the U. S. Government foreman, with Charlie and Dan, engineer and fireman, made up the boat party during Dr. Bartlett's visit, and they were under orders to lay off and go up the river from the Meredosia Station to Beardstown, between twenty and thirty miles. We all stopped to fish at La Grange Locks, but the water was muddy and but a short stay was made.

At Beardstown we met many friends of the Lotus. Here is the hot center of marketdom. The fight between the market fishers and the newly organized Beardstown Rod and Gun Club has already received comment. It is a war not fairly begun, but will be a bitter one. We met Mr. A. A. Greene, president of the club, also Judge C. H. Cummings and Prosecuting Attorney Hewitt, all bright and able men. These Dr. Bartlett invited aboard, and out of the ensuing conversation learned facts which will be of interest in the \$5,000 damage suit which Smith, the Beardstown market-fisher, has brought against him.

"The men who make up our club," said Mr. Greene, "are our best citizens. We are moving carefully and have won every move so far. We will keep up the work, and will grow stronger and not weaker. We find that these fishermen are very ignorant. They are just like children, and we have to treat them as such. They always have fished here unhindered, and they think they always should. They cannot understand restraint."

"I was shown that very amusingly," broke in Judge Cummins, "not long since by old Garrison, the fellow who didn't ante up his fish at the fishermen's free fish fry, and who got thumped for not doing it, by the way. Garrison is ignorant to the last degree, and picaunish beyond that. He wouldn't hire a lawyer, but he did come in and borrow a lot of my law books. I question whether he could read a line. He kept the books several days, and then came into town looking wiser than a flock of owls. He got a crowd of his sort around him, and laid down the law to them, 'I tell ye, boys,' said he, 'them fellers kaint tetch ye fur seinin' fish, an' I know it. I been lookin' up the law, an' I read Webster. What does Webster say? Webster sez, 'All fish is free!' This exposition of a legal authority seemed to satisfy the crowd. They will probably go on seining until some one shows them that Webster does not say 'all fish is free.'"

The Illinois River is very low. Flats opposite Meredosia, where last year 50 car loads of fish were taken and distributed by the Commission, are this year entirely dry. The work is now carried on in Meredosia Bay, a big bayou, now very low and shallow. This work is carried on by the U. S. Government, which furnishes cars and crews, the State of Illinois getting a certain per cent. of the total shipping. The Lotus is indispensable in this work. She is ingeniously fitted up with a pump which forces fresh water continuously through a series of stop cocks which extends entirely around the deck. Under these cocks are placed the fish cans, the pump is started, and that is all there is to it. The stream of fresh water is constant, and if a fish is alive when it reaches the boat its safety is assured. There is absolutely no loss of fish. The old dipping system is done away with. This idea of Dr. Bartlett is now also in use on most of the Government cars. It is most fortunate. No other invention ever helped fish transportation in any degree compared to this. Its use means safety to the fish, no matter how long the journey. Of this, more in due course, and more the work in charge of Dr. Bartlett, who, outside of his own State at least, is valued as one of the highest authorities in the land on fish preservation. It may not be generally known, but the U. S. Government comes all the way out to the Illinois River bottoms to get all the pike, bass, croppie, sunfish and catfish that it distributes all over the Union. A more prolific stream than the Illinois does not flow in all our land. Illinois is recognized as the best field to gather supplies, and the method of this gathering is that first used by Dr. Bartlett. Again it may not be known, but Dr. Bartlett is offered a fine salary to leave his State work and go into the Government fish work altogether. This

he says he will not do, because he likes his State labors, though he does not get a cent for his pains. So much for the men who abuse him, and who think he is paid a salary by the State. His only pay is his U. S. salary for this work of reclamation of native fishes.

"Did you know that carp will bite worms?" said Dr. Bartlett to me. "They will bite freely and pull hard, though that is the best I can say for them. Last month a party fishing in Lamb Lake slough, twenty miles above Quincy, caught 160 carp on worms in one day, some weighing 4 or 5 lbs. We have caught mirror carp thus in Quincy Bay, right in town."

Protective work along the Illinois is rapidly extending. The latest society of which I have notice is the Astoria Protective. Of this Mr. A. A. Greene got for me the following brief account in the form of a letter to himself:

"ASTORIA, Ill., Sept. 16.—Dear Sir: Yours of the 14th received. Sept. 1 we organized the Astoria Game and Fish Protective Association with about twenty-five members and elected the following board of directors: John H. Lutz, Chas. Wilson, Harry Green, Henry Windherst, Chas. Tohr, Jas. Turner, Harry Rockwell, Lon Grove, Benj. Burgard and John Atkinson. The board elected Chas. Wilson, President; John H. Lutz, Vice President; John Atkinson, Secretary; Harry Green, Treasurer. We have received our charter and are in good shape. We used your by-laws with a few exceptions and additions and will have them printed shortly.—JOHN ATKINSON, Sec'y A. G. and F. P. A."

Astoria Club offers \$5 reward for information that will secure a conviction under the game laws.

Beardstown Club numbers over 100. Sept. 25 the Lotus was to be the scene of a mammoth fish fry picnic under the auspices of this club, and I must thank Mr. Greene for a neat invitation which I wish I could have accepted. This gathering is simply to marshal more closely the fighting clan. Astoria will follow, the Illinois Valley Association will join, and all along the line we will have some fun. This is the sportsman's year. To-day Mr. John Stockton, of the Swan Lake Club, of Lake Senawine, told me to call and see him as soon as possible. Swan Lake Club is made up of Chicago men, but it wants to fall into line to protect the Illinois River, and will give money for that. It is all a mistake to say Swan Lake has impeded any warden in his work. It wants to help the work of protection, and the Illinois River Association never had so good an ally as it will be. Get them all in, all these clubs, every one, into the Illinois River Association, and what splendid work can be done on that splendid stream and its not less splendid tributaries. We'll get results or we'll get reasons. We will see whether "all fish is free."

Sept. 27.—Still magnificent sport with the bass at Mak-saw-ba Club on the Kankakee. Billy Mussey 18, 15 and 13, three days; Jo Card 18, one day; Johnnie Maddier 13, one day. All small-mouths now. Mr. Mussey had one small-mouth that weighed 44lbs. Mr. Card hooked a pike that didn't exactly pull him out of the boat, but got him just as wet as if it had, for he stepped out of the boat while playing the fish, and went in all over. "Gimme that landing net, Teeters!" was the first thing he said to his boatman when he came up.

Col. Cooper and party are back from their mascalonge trip to their new lakes. They killed over 100 mascalonge. The best fishing of the season, bass or mascalonge, is from now on.

A very pleasant Indiana friend, Mr. Ed. Varus, writes from Cedar Lake, on the Chicago & Erie road, that the bass are biting splendidly there now. Mr. Varus's address is Winona, Stark county, railway station is Ora. I have fished most pleasantly and successfully with Ed. Varus as boatman, on Cedar Lake. Some ducks and snipe there also.

Beardstown is just above Meredosia, where the State and Government work of reclaiming young fishes is now in progress. There would seem to be a good deal of news in and around Beardstown in protective matters just now, what with all these interesting legal fights on hand and the struggle between the protective and destructive agencies in general. When you are after news it is best to go straight to where the news is and see the field. Furthermore, I have in mind Dr. Bartlett's long time invitation to come down and see the State boat at work. Therefore I shall start for the lower Illinois River to-night, it being only about 250 or 300 miles run from here to Quincy and perhaps 50 miles more to the east from Quincy to Meredosia.

State Fish Commission Office Boat, Quincy, Ill., Sept. 10.—Fortunately I find Dr. Bartlett at home, he being kind enough to meet me and take me over to the headquarters boat. This afternoon we will go over to the State working boat, steamer Lotus, on the Illinois. Quincy is on the Mississippi River, Quincy Bay, an arm of the river, running right past the "Q." depot. It is on Quincy Bay that the office boat is moored, and it is on the office boat that they take you in and entertain you and have a lot of fun with you. All strangers, it seems, are sent down to the office boat to be "initiated." Everybody that ever came to Quincy has been initiated there, governors, generals, statesmen, politicians, sportsmen, everybody. They initiated the county sheriff there yesterday. This is the stock joke of the Illinois Fish Commission, and if it wasn't too good to keep I'd never tell it, for there are still other men who may visit Quincy some day.

The way they do that, or the way they did it in my case, was this, Dr. Bartlett called up his foreman, whom I will call Billy:

"Billy," said he, "this is a friend of mine who is a fisher from away back. I've got to go up town for a while, but you take care of him, get him some minnows, and let him fish off the corner of the boat where they have been catching all those croppies lately. I'll be back pretty soon."

While Billy was gone after the minnows, I sat down by the door of the boat and thought I would do some writing. When he appeared with the minnows I thought I would just catch a fish or two, and then do some writing. When he got the tackle out, I concluded I would just fish altogether and let the writing wait.

The office boat is about 50ft. long, with a house on it, and a platform running about the house. Billy got me a chair and stationed me at a corner. "Just fish right near the corner," said he, "and you'll soon get a bite." And after baiting my hook he disappeared around the corner. I cast in my line according to directions, and in half a

minute I was agreeably surprised to see the enormous red float with which they had provided me begin to walk off and to finally disappear. I gave a yank on the long cane pole, felt the usual tug of a fish, but finally brought away the hook, empty. Again I baited, threw in, and hardly had my balloon float settled when it began to gyrate and finally went down with a jerk.

"Holy Moses! I've got one of those big yellow cats," I yelled. "Wait till I yank him."

"That's what you have," said a sympathetic bystander (who had been initiated); let him have it, and then lift him."

I let him have it, and I lifted him. Again the empty hook came away. I could not understand it, but baited up again and tried it once more. In half a minute the red float went down with a surge, and with desperation I snatched it up with all the strength of the cane pole. As I did so I stepped forward a bit, and, as the hook again gave way, I chanced to see a long cane pole come up, floating on the water, and peering round the corner I saw the face of Billy, convulsed and choking.

"Well, about how much does this cost me?" I asked him, calmly as I could, and as soon as he and the rest of the crowd could talk they told me. Then I was initiated.

The way the joke is worked is simple enough. They always place the victim in the same chair, at the same corner, and give him the same long cane pole, so that he sits back quite a way from the corner. Then Billy goes around the corner, and leaning over, thrusts his cane pole into the water, of course out of sight, and works it around until he catches the sunken hook of the victim, who, of course, from his position, can't see the least of what is going on. A short looped string tied to the end of his pole enables Billy to get hold of the hook easily, and long experience has taught him how to pull as hard as he likes and let go when he chooses. He can imitate a "bite" to deceive the very elect, and many is the victim who has been laughed at on the office boat at Quincy. Usually, or in special cases, they have a crowd of 50 or more back on the bluff watching the fun. A man has been known to fish for over an hour trying to catch that most deceptive fish, which constantly pulls that big red float under, but which will not hook itself. Sometimes the effect is varied by gently pulling the hook around the corner and attaching an old bottle, a red herring or a little bell kept for the purpose. In any event the whole thing is realistic enough. This is the duly authorized and official joke of the Illinois State Fish Commission. It is as old as Antony and Cleopatra at least, as history and Shakespeare show, but is just as good and just as practicable to-day as ever. I hope I have not spoiled its future by telling about it here.

This afternoon an officer came down and wanted Dr. Bartlett to settle a little judgment for an illegal net he had confiscated.

"Nary settle," said Dr. Bartlett.

"Then we will take your body," said the officer.

"All right," was the reply, "but when you lock up the servant of the U. S. Fish Commission you want to be mighty careful, you know."

The officer went away and left Dr. Bartlett with his body.

The Fish Commissioner's way is no flowery one. I have been watching the office work to-day. The daily mail is very heavy, and two-thirds of it is solid kick. Men charge the Commissioner with all sorts of things. A favorite charge is that he takes money to leave certain offenders alone. One fellow over at Havana to-day accuses him openly of accepting a bribe. "An' so," the letter runs, "you allow this illegal fishing to be smuggled in."

"I'd have to go over and smash him once for luck, Doctor," said I.

"Pshaw, I wouldn't have time, there are too many," said he. "I'll just write him and tell him to go to the d—l for luck. I'm used to this. We have only so much money, and can do only so much work, but we want to do and are doing all that our limits will allow. Outside those limits we dare not waste our time."

"How about this \$5,000 damage suit by Smith over at Beardstown?" I asked.

"That will have to be defended, and that was all they wanted. Smith has paid his lawyer \$500. He wants me to pay mine something. I will beat him. He can't collect damages for being stopped in an illegal act."

All in all, I should think times were not always altogether dull on the office boat.

"We will see a lot to write about, over at Meredosia," said Dr. Bartlett. E. HOUGH.

RHODE ISLAND BLACK BASS LAW.

THE following is the text of the Rhode Island law relative to stocked waters and black bass fishing. The question has been asked us whether angling for black bass is permitted only on Thursday, Friday and Saturday of each week. The law is given, and any one interested may interpret its meaning for himself. Sec. 11 was not given in earlier editions of the *Book of the Game Laws*:

Chap. 150.—Sec. 7. No person shall take or catch fish of any kind from any of the inland waters of the State, set apart by the commissioners of inland fisheries for the cultivation of fish, except at such times and in such manner as is hereinafter provided.

Sec. 8. The prohibition of the catching of fish by hook and line from fisheries stocked as hereinbefore provided shall extend and be continued for and during the term of three years from and after the time when any fishery was first established; provided, however, that fish may be caught through the ice only, and with hook and line, in those ponds set apart for the cultivation of black bass during December, January, and February, until the expiration of the aforesaid term of three years.

Sec. 9. After the expiration of said three years, no black bass shall be taken in any of the waters of this State, except Sneach Pond in the town of Cumberland, and Mowawant Pond, in the town of Scituate, between the first day of March and the fifteenth day of July, nor at any time, except by hook and line as aforesaid. Every person taking any black bass during the time aforesaid shall be fined fifteen dollars for each black bass so taken, and possession by any person of any black bass during the time aforesaid, shall be evidence that such black bass was taken in violation of this chapter.

Sec. 10. After the expiration of said three years, no fish shall be taken by any person from any waters legally set apart by said commissioners for the cultivation of shad or salmon, within one mile of the outlet of the streams so set apart, except from and after the fifteenth day of April until the fifteenth day of July, or at any time except by hook and hand line, or by not less than three-inch mesh net or seine or seines.

Sec. 11. No person shall take any fish from any of the waters of the State legally set apart for the cultivation of fish, during the times in which they are allowed to be taken by this act, except on Thursdays, Fridays and Saturdays, during said term, except during the months of December, January and February.

A BOOK ABOUT INDIANS.—THE FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—Advs.

FLY-RODS FOR LADIES.

IT has been my good fortune during the past fishing season to meet many ladies engaged in fly-fishing on waters where trout of 2lbs. or over were of not uncommon occurrence. Only to angling on such waters, be it understood, do the following remarks apply.

I have almost invariably found these ladies provided with rods of from 4½ to 6oz. in weight, varying in length from 8½ to 9½ft. Now, if such a tool was in such a place put in the hands of a man, would he not be considered as greatly handicapped? If he were a novice, would not every experienced angler regard his equipment as absurd? Is such a rod, if advisable at all under such circumstances, fit for any except an expert?

Reasoning in this way, I could but conclude that the whole thing was fundamentally wrong. He who publishes a wrong assumes the obligation of making known a remedy if within his power. I, therefore, offer this solution of the problem for what it may be worth.

Now, a novice should be given all possible encouragement in the way of success. To this end a longer and heavier rod than such as an expert would prefer is desirable. But the labor required to use the rod must be well within the physical power of the one using it, or physical fatigue will defeat the very end in view—the pleasure of the user.

It seems to me the following course will meet all the requirements and will prove of advantage all round—to the lady in that she can accomplish more with greater ease, and to him who provides the rod on the score of economy.

Take a good 8½ or 9oz. rod, cut it just above the handle and insert a ferrule. The rod can then be used just as before, the new ferrule, to my mind, being a very decided improvement. At any rate, beyond its weight it is no detriment. Now, provide a double-handed handle to fit, with the reel near the middle of the handle, just like a miniature salmon rod. The lady can use the rod with the double-handed handle and both hands. When the husband or other provider wishes to use it, he substitutes the single-handed handle.

Not only does one rod thus do double duty, but it will be found that most ladies can handle a rod of 10oz. with both hands, with far more ease and precision than one of 5oz. with one hand. The art of casting will be acquired in much less time than with a single-handed rod, more water can be covered, and greater success will give greater encouragement to persist. But one thing must be remembered by one used to a single-handed rod only. In casting with a double-handed rod, the lower hand is the center of motion and the upper hand must conform—that is, the lower hand remains comparatively still, while the upper hand moves with the rod.

HENRY P. WELLS.

NEW YORK, Oct. 1.

DEATH OF DR. CHARLES A. KINGSBURY.—Philadelphia, Oct. 4.—*Editor Forest and Stream:* It is with deep regret that I have to announce the death of Dr. Charles A. Kingsbury, of this city, which occurred Oct. 3, and which will be a severe shock to his many friends and acquaintances on this side and across the water. He had passed man's allotted time of three score years and ten, but was a person of splendid physique and an enthusiastic sportsman of the old school in its broadest and best sense, and a great admirer of FOREST AND STREAM, and other sporting papers of good moral tone. He was a person of unusual cultivation, had traveled far and wide in foreign lands, and was a wonderfully entertaining companion afield or afloat, and probably one of the most expert anglers in the United States. The writer has spent with him many never to be forgotten days tramping the fields during the open seasons or awaiting the coming of the sly water fowl, a sport he was passionately fond of. He was one of the kindest and most considerate of men, a friend through storm as well as through sunshine, and a prince among his fellows.—LEVI HEDGES, JR.

LAKE MATAMISCONTIS.—I have made a brief visit to my home in La Grange, Me., and gathered a little information about Lake Matamiscontis. A good many fishing parties went from our town to the lake during the summer. The greatest number of white perch taken that I could hear of was 500 by a party of three or four. My son went, but spent part of his time hunting, and caught only 30 or 40. No pickerel were taken as far as I could learn, and the white perch have been fished so much of late years that they average smaller in size than formerly. The lake is situated less than one-half mile from the settlement called Whitney Ridge, and is entirely surrounded by a thick forest. The road to the lake is quite rough, although carriages drive to it. Two or three boats only are to be let, and at a very cheap rate. The "home shore," so-called, is high and suitable for camping. Teams can be put up at Whitney Ridge at very moderate prices. The shape of the lake is more nearly circular than oblong, I judge, and it is probably four miles across it at the widest part.—A. C. ADAMS.

JUNIATA BASS.—Port Royal, Pa., Sept. 30.—This has been a star month for small-mouthed black bass fishing. The fish are taking the bait both in the river and the Tuscorora Creek. In the latter stream Mr. John Robinson, some four miles from its mouth, took 25 and 35 good fish on different days. At Millintown, on the river, bass have been taken this month in large numbers, one boat making a day's catch of 41. Another party from Patterson, directly across the river from Millintown, took two fish aggregating 9lbs. 10oz., the larger one being of 5lbs., the best bass we have heard of this season; 3½lb. fish are reported almost daily. The river is very low and clear, and the bass have taken to the holes.—ONYJUTTA.

PREPARED BUT NOT READY.—Among the old whaling captains are some quaint characters; and none of them probably is better known or loved than Captain Jerningham, who was eleven years ago in the fleet that harbored in Plover Bay, Siberia. Captain J. told a good story and we listened eagerly to his tales of adventure and danger. He told of many narrow escapes from sudden death by crushing of a boat or being caught in the jaws of a sperm whale. After hearing one of his most thrilling tales some one asked him what were his sensations at the critical moment. "Well, boys," he said, "I felt that I was prepared to die but not quite ready."

A LARGE OHIO "SALMON."—Bridgeport, Ohio.—The State dam on the Tuscarawas River at Tuscarawas, O., is a famous fishing place. It can be reached by the Pan Handle to Ulrichsville, from which it lies three miles west. I went fishing to the dam and arrived there about 4 o'clock P. M., and began to cast with minnows. I caught a great many bass, one of them weighing 5lbs. 2oz., and some "salmon" of 6lbs. The largest catch was a 15-pound "salmon," and this was made on a 9-ounce split bamboo. This is the largest fish of the kind that has been taken here by rod and line in my experience of fifteen years, and I wish to have it mentioned for the encouragement of Ohio fishermen. The "salmon" (pike-perch) is now frozen in a great block of ice and on exhibition at the Stam Hotel, Wheeling, W. Va.—NICK KUHN.

EXCELLENT BLUEFISHING can be obtained by going out with any of the fishing boats from Seabright, N. J., along the beach in that locality. Two gentlemen last week killed 120 on rod and reel, and there are plenty more left. One has only to go out about a mile and a half from the shore and we understand that the charges are very reasonable.

MR. NYE'S FINGERS.—In our account of "Sharks in Northern Waters" last week we meant to say that the shark "took the clam and lacerated three fingers of the hand that fed it." Mr. Nye's wounds were painful, but fortunately not dangerous.

Fishculture.

NEW YORK FISH COMMISSION.

THE twentieth annual report of the Fish and Game Commission of New York shows the results of an unusually successful year's work in stocking public waters with native and foreign food and game fishes and in protecting fish and game from unlawful capture. The amount of money expended in this diversity of duties was less than \$35,000. The number of young fish hatched and deposited was nearly 55,000,000, an increase of 15,000,000 over last year, and the extent of protective measures was greater than ever before. The zeal and energy of the chief protector, Mr. J. Warren Pond, have won for him a public acknowledgment of his valuable services in behalf of the State. Except with the shad there was a greatly increased output from the hatcheries.

Owing to the low temperature of the water in the Hudson and its roily condition, due chiefly to the illegal dumping of offal by scows, the number of spawning shad taken was remarkably small; but this decline was more than made up by the deposit of about nine millions of fry in the Hudson by the U. S. Fish Commission. The distribution of fish by the State is shown in the following table:

Shad.....	2,424,000	Frostfish.....	7,400,000
Landlocked salmon..	49,000	Smelt.....	7,400,000
Rainbow trout.....	210,500	Channel pickerel.....	2,000,000
Brown trout.....	596,296	Masacalonge.....	1,750,000
Lake trout.....	9,678,600	Yellow perch.....	12,000
Brook trout.....	4,225,000	Pike perch.....	4,000,000
Whitefish.....	9,000,000	Tomcod.....	3,200,000
Ciscoes.....	3,000,000	Lobster.....	27,700

A notable increase was made in the planting of lake trout, whitefish, cisco, frostfish, smelt, channel pickerel and masacalonge. The famous Caledonia hatchery under the superintendence of Monroe A. Green has eclipsed its best previous record in trout culture. The Cold Spring Harbor station, in addition to its work with the salmon family, has reared upward of ten millions of smelt and tomcod and has demonstrated the practicability of handling the weakfish and the lobster in its locality. At the Sacondaga and Adirondack hatcheries the stock of eggs is to be increased by building rearing ponds for the spawning fish, and if to these the Commission will add ponds for the care of the young until they arrive at the age of yearlings we may hope for better results from their outlay of time and money.

The Commissioners repeat and emphasize their recommendation for the revision and codification of the fish and game laws in the interest of intelligent interpretation and enforcement of their provisions, and they renew their protest against the spoliation of the Adirondacks, by corporations as well as individuals, in the following vigorous language:

"The Commissioners regret that after so much agitation, and even special notice by the Executive, measures have not been taken for the preservation of the Adirondacks. This question should receive the attention of the Legislature at once. The people have but one mind in this matter. The sentiment in favor of immediate steps for the establishment of a State park is universal throughout the State. It should not be delayed, and the next Legislature ought to act at once in the matter or this wonderful wilderness will exist but in the memory of its frequenters.

"Those who are familiar with it deplore already the serious inroads that have been made, and a few more years of neglect may destroy it entirely. Those who have driven from Boonville to Fulton Chain or to Woodhull can understand what will be left when the Adirondacks have been deprived of their timber, and those who have entered by way of the Chateaugay Road can appreciate the effects of a railroad upon such a country. In place of a virgin forest filled with beautiful lakes and running streams, there remains but a barren desert of blackened stumps and dried up watercourses.

"The value to the State of this natural park in its present condition must be apparent to all. When trees are destroyed and the game killed or driven away the land that remains is of value to no one. It is not capable of cultivation, and it may be truthfully said that the old clearings surrounding the Adirondacks are filled with deserted farmhouses. The health-giving properties of this great forest are in themselves so valuable that it should be preserved for this alone, aside from its value as the watershed for the Hudson, the Sacondaga, and other important streams. Legislation should be enacted at once, and this grand pleasure ground for the people of the State be kept for future generations."

OYSTERS IN SOUTHERN CALIFORNIA.—While attached to the Fish Commission steamer Albatross Prof. Charles H. Gilbert made some investigations in southern California relative to the planting of oysters. The small size of the rivers and their intermittent flow, together with the low winter temperature of the water in the bays, make the propriety of stocking the region. If, however, the experiment should be made, the most promising areas are to be found in Alamitos, Newport and Anaheim bays and the mouth of Los Boisos Creek, in all of which native oysters are reported in greater or less abundance. The report is published with illustrations in the Bulletin of the Fish Commission.

"RAINBOW TROUT PLANTING."—*Editor Forest and Stream:* In my article on "Rainbow Trout Planting," published Oct. 1, I am made to say that Mr. Ford caught a lake trout at Egypt Mills, Pa., but I wrote that he took a rainbow trout. Please make the correction. Everybody knows that lake trout will not thrive in Delaware River.—JOHN GAY (Washington, D. C.).

The Kennel.

Dogs: Their Management and Treatment in Disease. By Ashmont. Price \$2. Kennel Record and Account Book. Price \$3. Training vs. Breaking. By S. T. Hammond. Price \$1. First Lessons in Dog Training, with Points of all Breeds. Price 50 cents.

All communications must reach us by Tuesday of the week they are to be published; and should be sent as much earlier as may be convenient.

FIXTURES.

DOG SHOWS.

Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.
Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.
Dec. 30 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.

1892.

Jan. 5 to 8.—The New York and New England Poultry and Kennel Club's Dog Show, at Albany, N. Y. W. C. House, Fort Plain, N. Y., Sec'y.

Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInnes, Sec'y.

Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. F. Capers, Secretary, Greenville, S. C.

Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.

Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.

March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.

March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Littell, Sec'y.

April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston, Mass. E. H. Moore, Sec'y.

April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Hicksville, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.

Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.

Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. G. Davis, Secretary, Philadelphia, Pa.

Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.

Nov. 23.—Second Annual Trials of the National Beagle Club, at Nanuet, Rockland county, N. Y. F. W. Chapman, Sec'y.

Nov. 30.—Central Field Trial Club's Third Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y. 44 and 46 Wall street, New York city.

Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1893.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.

Jan. 18.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgariff, Sec'y.

—, Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

OTTAWA DOG SHOW.

[Special Report.]

THE Canadians finished their circuit of bench shows this week, the last one being at Ottawa, held Sept. 29 to Oct. 1. The weather was not very pleasant on the first day, neither was the attendance so large as might have been expected. It is not necessary to go into a detailed report, as the dogs have been commented upon so much at previous shows. Entries were very small in many classes, notably the larger breeds, the best of the dogs returning home from the Montreal show. The entries, numbering 260, were, however, all that could be accommodated in such a small building. Judging commenced on the first day. Spaniels were judged by W. B. Palmer, of Woodstock, Can. The rest of the classes were handled by Mr. John Davidson, of Monroe, Mich. The benching and other arrangements were far from satisfactory to the exhibitors.

Only one entry was shown in mastiffs, not a very good one but might easily have beaten those exhibited at Montreal.

In St. Bernards Othello, shown at Hamilton, won first, and he can hold his own in pretty warm competition. In bitches Nun Nicer was lucky not to meet with stronger company, though the second prize winner, not so good in color and quality, is better in size.

NEWFOUNDLANDS.

Dan O'Shea led the class, with Leo Czar winner of second, has been noticed before.

GREYHOUNDS.

The challenge class brought out three entries, Gem of the Season beating Scavenger and Maud Torrington. In open dogs Justinian, a new face, won. He shows plenty of beef, is coarse and far from being as good as the second in body and loin. Pious Pembroke, taking second, barring his head, is a good greyhound. Elcho won third prize, Ornatus being absent. Jetsam won first in bitches, Second Sight taking second, Bestwood Daisy winning third, is full of quality and should have been higher.

DEERHOUNDS.

Deerhounds were a fairly good show. Robbin, first prize, was the best of the lot. Hilda, second prize, is not so good in bone or head; and Duff is poor in head and ears.

FOXHOUNDS.

had two classes. In dogs King won, second prize going to quite a different type in Genius, one of the old stock, but does not move nor stand well in front. Bitches saw Vexation to the front; she is the same type as the second prize winner in dog class. Countess, second, is weak in make up.

BEAGLES.

In the challenge class Racer was alone. In dogs Courier won, but Dan O'Shea says it is a mistake in name. Roy K., second, has been noticed. Donovan, third, is not correct in head formation. In bitches, Stella, noticed at Toronto, won here, with Emmeline second.

GREAT DANES.

The brindle Juna, not good in head and lame, was placed over the small but typical Minerva's Fawn.

POINTERS.

The well-known Pommery Sec first in challenge, Ossining getting the reserve card, and in the ladies' division Fan, Jr., easily beat Belle Randolph in head, shoulders and body; both have been noticed very often. In open dogs Tempest beat King Bow's Bow, placed equal at Hamilton; he gets it in body and front, Bow is also coarse. Frivolity won in bitches, her head is not good, otherwise she is a nice little bitch.

SETTERS.

The same old faces. Edgemark in the challenge class. Kent II., first in open dogs, with Viscount, Tony Gladstone

and Kent's Rex following in the order named. As all of these have been repeatedly noticed it is no use repeating. In bitches Nia, the Toronto winner, was again placed ahead, Victress Llewellyn was given second and Albert's Nellie was placed in third place. These are now well known and it is a wonder how they stand the change of climate and constant travel so well, seeming to improve on it. Irish setters were fairly good for the numbers, and most of them had been round the circuit. Seminole proved the winner, Glen Jarvis coming next, with Eleo in third place. In bitches Elfrieda defeated the Toronto winner, Irene, Josie D., shown at Kingston, coming in for reserve. In Gordons the same old crowd again, Dr. Dixon winning all except open dogs, where he had no entries. Hector beat Nibs in this class, both fair dogs.

SPANIELS.

Several entries appeared in Irish water spaniels, Countess Bendigo, an old winner, being again to the front, with Marguerite, low in flesh and out of coat, second. She is better in head and topknot than the winner.

In Clumbers the well-known old rounder Boss III. was entered for specials only, but was in wretched condition. Johnny, Jr., and Lady Bromine won in their respective challenge classes. In open dogs Flop won the first prize; not flat enough in skull or deep in muzzle, eyes a bit light, good in bone and body, good in formation. The second prize winner is not correct in head, but has a good body and coat. La Grippe took third prize. The first in open bitches is a new one, was too heavy in flesh and out of feather. The second prize winner, Lucy II., has lost one eye and is small-sized, but capital in body and bone, fair in head, not quite massive enough. Vic, third, is high on the leg.

In field spaniels Samson won first, with Brifford Gladys second; both are well known. In open dogs Brantford Mohawk had a walk over. The first prize bitch, Woodland Sallie, is a nice bitch, rather on the small side.

Cocker spaniels were mostly those that had been on the rounds. In challenge class awards were upset, Brantford Red Jacket going to the front, equal second being given to Black Duke and Dufferin, champion Brant vhc. In challenge bitches King Pharo's Sister being absent, left Bessie W. the only one in the class. In the open class of black dogs Black Dufferin continued his victorious career to the end, and Bob Obo, second, is away behind the winner; he is coarse in head and undershot, but is fair in body; Donovan, third, may improve with age, is light in eye, good in body; Trumps, vhc., is high on leg. Open bitches were, as usual, a hot class, I Say again made a win here, second going to Rideau Flossie; Cleo II., third, is short and heavy in head, but good in body; Cora, winner of second at Toronto, was, unfortunately, either hung or died before the judging here; Brantford Flirt got vhc., she is light in muzzle. In open dogs other than black Othello won first; he is heavy in ear and skull is domed. Rufus, second, head coarse and eye a bit light. Bounce is also coarse in head. In the corresponding bitch class Red Riding Hood, a fair-headed bitch, but pinched a bit in muzzle, won over Rideau Robina, which is full in eye; Mollie was absent. In novice dogs Donovan won over Othello, both shown in other classes. Novice bitches were nothing extra, first to Rideau Romola, Floss Obo taking second.

COLLIES.

Roslyn Dandy was placed ahead in challenge class. Doury, the Montreal winner, was again in front. He is plain in head and coarse, light-eyed, etc. Rowdy is a cleaner cut dog, but has not the body of the winner, though better in head and ears. Mayflower, winner in bitches, is too lightly made, nice quality, second going to Cora II., well known, too cloudy.

BULLDOGS.

Bo'swain was again in front, but Nettle and Thunder are lacking in many bulldog characteristics.

BULL-TERRIERS.

The moderate King of Hearts had an easy win here, Mister Dick, coarse in head and too chunky, coming second. Duke of Wellington arrived too late for judging or might have won.

FOX-TERRIERS.

were mostly regular well-known rounders. The judge in challenge class placed Ebor Nettle first over Blanton Trump, Volunteer following. There might have been a little change here, though Nettle has a nice head and front. In open dogs Starden's Jack again was placed ahead of Dobbin. This might have been changed, too, as the latter is better in head and coat. Painter, third, is bad in ears. In bitches Rowton Safety turned the tables over Woodale Radiant; Safety is high on leg and has badly carried ears, is light in muzzle, but then Radiant is short in head. Verdict, third, might have been higher, as she is a terrier all over. In novice class the wire-haired Barton Sting, not in good condition, was placed behind Woodale Radiant.

IRISH TERRIERS.

This class had Exile, Jack Briggs and Kathleen winning in the order named. All are old show goers and the two first were placed as at Hamilton.

SKYE TERRIERS.

Challenge, first, the old timer Sir Stafford again. Bruce was rightly placed in open dogs over the short-headed Moss.

BEDLINGTON TERRIERS.

Dan O'Shea, with Zulo mentioned before was first.

BLACK AND TAN TERRIERS.

The judge thought Meersbrook Maiden and Sultan equal, and awarded the prize that way, but Maiden certainly shows more quality. The dog class did not fill. In bitches Matchless was again to the front. Grace, the winner at Kingston, coming next. English Lady has lost her teeth, which may have put her back of Grace, but teeth or no teeth there is no comparison between the two, as Grace is coarse and thick in head.

KING CHARLES SPANIELS.

were a good show, Calumet Alice winning in the challenge class, Royal Duke winning again in the open. Several nice Prince Charles were shown. Fannie, winner in King Charles bitches, is quite a nice one.

PUGS.

were the same as at other shows, nothing new of merit coming out.

Two ordinary Pomeranians or Spitz were shown, first prize going to the best one, Fred, second to Beauty, both faulty in head and coat.

Miscellaneous class was divided, a class being made for dachshunds. Gill and Feldman K., both well known, were given equal first, but Feldman in my opinion should have been easily first. In the miscellaneous class the judge gave equals to Jack Shepherd, Kilstor and Punch, and these might have been placed properly in the order named.

ROLNAY.

PRIZE LIST.

MASTIFFS.—Dogs: 1st, Mercer and Middleton's Eanfrid. ST. BERNARDS.—ROUGH AND SMOOTH.—CHALLENGE.—Dogs: 1st, Major J. C. Guillot's Othello. Bitches: 1st, F. E. Lamb's Nub Nicer; 2d, Major J. C. Guillot's Minerva; 3d, J. Terrance's Trump. NEWFOUNDLANDS.—1st, D. O'Shea's champion Leo; 2d, J. A. Minn's Czar.

GREYHOUNDS.—CHALLENGE.—1st, A. W. Purbeck's Gem of the Season; 2d, Geo. C. Taylor's Scavenger.—OPEN.—Dogs: 1st, J. B. Gordon's Justinian; 3d, Mount Royal Kennels' Eleo. Very high com. and reserve, Geo. C. Taylor's Milo and Nibs. Bitches: 1st and high com., D. B. Gordon's Jetsam and Stylish Girl; 2d and

very high com., Geo. C. Taylor's Second Sight and Northern Queen; 3d and reserve, A. W. Purbeck's Bestwood Daisy and Lily of Gainsboro. Com. L. N. Bate's Galatea.

DEERHOUNDS.—1st, Col. Audet's Robbin; 2d and very high com., Sir Adolphe Caron's Brian and Hylda. High com., A. E. Bradbury's Duff.

FOXHOUNDS.—Dogs: 1st and high com., Wm. Pownall's King and Johnny; 2d, J. Gibb's Genius. Reserve, M. Switzer's Trailer. Com., D. O'Shea's Ranger. Bitches: 1st, J. Gibb's Vexation; 2d, D. O'Shea's Countess.

BEAGLES.—CHALLENGE.—1st, Rockland Kennels' champion Racer, Jr.—OPEN.—Dogs: 1st, D. O'Shea's Courier; 2d, Rockland Kennels' Roy K.; 3d, Kingston and Bancroft Kennels' Donovan. Bitches: 1st, Howard Bros.' Stella; 2d and 3d, Rockland Kennels' Emeline and Fannie K. Reserve, D. O'Shea's Ruby. Very high com., F. P. Robson's Dot.

GREAT DANES.—1st and 3d, Dr. Hurdman's Juna and Tonka; 2d, Mount Royal Kennels' Minerva's Fawn.

POINTERS.—CHALLENGE.—Dogs: 1st and reserve, Wm. H. Hyland's Pommery Sec and Ossing. Bitches: 1st, Wm. H. Hyland's Fan N. Reserve, Robert Leslie's Bell Randolph.—OPEN.—Dogs: 1st, Wm. Ledyard's Tempest; 2d, Kingston and Bancroft Kennels' King Bow's Bow. Bitches: 1st, Mount Royal Kennels' Frivolity.

ENGLISH SETTERS.—CHALLENGE.—1st, Francis S. Brown's Edgemark.—OPEN.—Dogs: 1st, Cohanett Kennels' Kent II.; 2d and 3d, Mount Washington Kennels' Viscount and Tony Gladstone. Reserve, Kingston and Bancroft Kennels' Kent's Rex. Very high com., H. Northwood's Benzine. High com., James E. Hair's Sir Edward and Mount Royal Kennels' Mount Royal Stride. Com., Dr. A. Lawyer's Zeon. Bitches: 1st and 2d, Mount Washington Kennels' Nia and Victoria Llewellyn; 3d, Dr. John Hartman's Albert's Nela. Very high com., Kingston and Bancroft Kennels' Liberty II. High com., Mount Washington Kennels' Nora III.

IRISH SETTERS.—Dogs: 1st and 3d, Seminole Kennels' Seminole and Eleo; 2d, Glenidine Kennels' Glen Jarvis. High com., W. H. Lewis's Pat. Bitches: 1st, Mount Royal Kennels' Elfrieda; 2d, Douglas and Chambers' Irene; 3d, very high com., and high com., Seminole Kennels'—Aurone and Rose Palmerston. Reserve, Kingston and Bancroft Kennels' Josie D.

GORDON SETTERS.—CHALLENGE.—Dogs: 1st and reserve, Dr. S. G. Dixon's Ivanhoe and Leo B. Bitches: 1st, Dr. S. G. Dixon's Duchess of Waverley.—OPEN.—Dogs: 1st, W. B. McArthur's Hector; 2d, Dr. Davidson's Royal Nibs. Bitches: Dr. S. G. Dixon's Lady Waverley.

IRISH WATER SPANIELS.—1st, T. A. Carson's Countess Bendigo; 2d, Ed. Pitt's Marguerite. Com., James Carter's Drake.

CLUMBER SPANIELS.—CHALLENGE.—Dogs: 1st, Mercer & Middleton's Johnny Junior. Bitches: 1st, Mercer & Middleton's Lady Bromine.—OPEN.—Dogs: 1st, F. H. D. Voith's Flop; 2d, Wm. McMahon's Rake; 3d, Harry Morrison's La Grippe. Very high com., H. B. D. Bruce's Shell. Bitches: 1st, Mercer & Middleton's Lady Nancy; 2d and 3d, H. B. D. Bruce's Lucy II. and Vic.

FIELD SPANIELS.—CHALLENGE.—1st and 2d, Andrew Laidlaw's Brifford Gladys and Samson.—OPEN.—Dogs: 1st, Brant Cocker Kennels' Brantford Mohawk; 2d withheld. Bitches: 1st, Luckwell & Douglas's Woodland Sallie.

COCKER SPANIELS.—CHALLENGE.—Dogs: 1st and very high com., Brant Cocker Kennels' Brantford Red Jacket and Brant; equal 2d, Luckwell & Douglas's Black Duke and Andrew Laidlaw's Rabi. Reserve, Andrew Laidlaw's Oona. Bitches: 1st, Andrew Laidlaw's Bessie W.—OPEN (black)—Dogs: 1st, Luckwell & Douglas's Black Dufferin; 2d, Rideau Kennels' Bob Obo; 3d, Alfred Geddes's Donovan. Reserve, Corktown Cocker Kennels' Tim Obo. Very high com., Dr. Garrow's Trumps. High com., T. M. Robertson's Rex Obo. Com., F. H. Cunningham's Major. Bitches: 1st, Geo. Bell's I Say; 2d, Rideau Kennels' Rideau Flossie; 3d, Andrew Laidlaw's Cleo II. Reserve, Corktown Cocker Kennels' Dot Smirle. Very high com., Brantford Cocker Kennels' Brantford Flirt. High com., T. M. Robertson's Floss Obo. Com., A. F. Grant's Rideau Romo and F. H. Cunningham's Corinne.—OPEN (other than black)—Dogs: 1st, C. A. MacHaffee's Othello; 2d, F. J. Lehigh's Rufus; 3d, Corktown Cocker Kennels' Mollie. Reserve, E. A. Black's Brush. Com., Alfred Cowan's Jack Bitches: 1st, Brant Cocker Kennels' Red Ridinghood; 2d, A. F. Grant's Rideau Robina. Com., T. M. Robertson's Daylight.—NOVICE.—Dogs: 1st, Alfred Geddes's Donovan; 2d, C. A. MacHaffee's Othello; 3d, Corktown Cocker Kennels' Tim Obo. Reserve, Dr. Garrow's Trumps. High com., F. H. Cunningham's Major. Com., J. E. M. Desriviere's Bow. Bitches: 1st, Rideau Kennels' Rideau Romola; 2d, T. M. Robertson's Floss Obo; equal 3d, A. F. Grant's Rideau Robina and F. H. Cunningham's Corinne. Com., J. F. M. Desriviere's Fritz.

COLLIES.—CHALLENGE.—1st and reserve, Seminole Kennels' Roslyn Dandy and Metchley Surprise.—OPEN.—Dogs: 1st, McEwen & Gibson's Drury; 2d and 3d, Seminole Kennels' Roslyn Conway and Roslyn Rowdy. Reserve, Fred Daubney's Jack. Bitches: 1st, McEwen & Gibson's Mayflower; 2d, Seminole Kennels' Cora II.

BULLDOGS.—1st, Edwin A. Woodward's Bo'swain; 2d, John P. Lawless's Nettle; 3d, H. M. Lawless's Thunder.

BULL-TERRIERS.—Dogs: 1st, Toon & Symonds's King of Hearts; 2d, J. Moorehead, Jr.'s Mister Dick; 3d, Geo. Spargo's Rough. Bitches: Absent.

FOX-TERRIERS.—CHALLENGE.—1st, Woodale Kennels' Ebor Nettle. Reserve, J. K. Macdonald's Blanton Trump.—OPEN.—Dogs: 1st and 2d, Woodale Kennels' Starden's Jack and Dobbin; 3d, R. Northwood's Painter. Reserve, Mt. Washington Kennels' Diver III. Very high com., Woodale Kennels' Woodal Rival, Oriole Kennels' Blanton Ransack. High com., Toon & Symonds's Endeavor Spier. Bitches: 1st, Mt. Washington Kennels' Rowton Safety; 2d, Woodale Kennels' Woodale Radiant; 3d, Toon & Symonds's Venus. Reserve and very high com., Oriole Kennels' Warren Sparkle and Verdict. High com., Woodale Kennels' Woodale Refusal, Rideau Kennels' Clytie. Com., V. G. Hooper's Fussy.—NOVICE.—1st, Woodale Kennels' Woodale Radiant; 2d, Toon & Symonds's Blanton Ransack; 3d, G. W. Prescott's Arden Belle. Reserve, Rideau Kennels' Ebor Nettle. Very high com., J. Warlock's Sam. High com., S. Simms's Lady. F. H. Cunningham's Luke, P. Slattery's Jerry. Com., E. S. Skead's Bob.

IRISH TERRIERS.—1st and 2d, Toon & Symonds's Exile and Jack Briggs; 3d and very high com., E. Lever's Kathleen and Nailer.

SKYE TERRIERS.—CHALLENGE.—1st, C. A. Shinn's Sir Stafford.—OPEN.—1st, B. F. Lewis's Bruce; 2d, G. W. Kerr's Moss.

BEDLINGTON TERRIERS.—1st, D. O'Shea's Zulo.

BLACK AND TAN TERRIERS.—CHALLENGE.—Equal 1st, Rochelle Kennels' champion Meersbrook Maiden and Broomfield Sultan.—OPEN.—Dogs: Absent. Bitches: 1st, Toon & Symonds's Matchless; 2d, A. E. Elmer's Grace; 3d, Rochelle Kennels' English Lady.

YORKSHIRE TERRIERS.—CHALLENGE.—1st, Toon & Symonds's Venus.—OPEN.—Dogs: Absent. Bitches: 1st, J. Terrance's Flossie.

TOY SPANIELS.—CHALLENGE.—1st, A. M. Goldsmith's Calumet Alice.—OPEN.—Dogs: 1st, Yorke & Forshaw's Royal Duke; 2d and 3d, E. Bradford's Fannie and Ruby. Bitches: 1st, E. Bradford's Fannie; 2d, Yorke & Forshaw's Ruby.

PUGS.—CHALLENGE.—1st and reserve, Dr. M. H. Cryer's champion Bob Ivy and champion Bessie.—OPEN.—Dogs: 1st, Seminole Kennels' Kash, Jr.; 2d, Dr. M. H. Cryer's Prince Emmet; 3d, M. Ballentine's Curtis. High com., Miss N. Farries's Buzz. Com., Miss S. Farries's Moses. Bitches: 1st, Howard Bros.' Satin; 2d, Dr. M. H. Cryer's Cribbage; 3d and very high com., Seminole Kennels' Princess Nellie and Rustic Queen. High com., Mrs. H. S. Kirby's Judy.

SPITZ.—1st and 2d, Mrs. W. Roger's Fred and Beauty.

MISCELLANEOUS.—Equal 1st, R. G. H. Huntington's Jack Shepard (bloodhound), Toon & Symonds's Kilstor (Scotch terrier), E. Bradford's Punch (toy terrier).

DACHSHUNDE.—Equal 1st, B. F. Lewis's Gill and Joe Lewis's Feldman K.; 3d, Joe Lewis's Lena L.

SPECIALS.

Best pair of following breeds: Greyhounds, D. B. Gordon; English setters, Mt. Washington Kennels; Irish setters, Seminole Kennels; Gordon setters, Dr. D. G. Dixon; pointers, Wm. H. Hyland; Clumber spaniels, Mercer & Middleton; cocker spaniels, Andrew Laidlaw; collies, Seminole Kennels; fox-terriers, Woodale Kennels; black and tan terriers, New Rochelle Kennels; toy spaniels, Yorke & Forshaw. Best mastiff, Mercer & Middleton's Eufria. St. Bernard, Major J. C. Guillot's Othello. Greyhound dog, A. W. Purbeck's Gem of the Season; bitch, D. B. Gordon's Jetsam. Deerhound, Col. Audet's Robbin. Foxhound, J. Gibb's Vexation. Beagles, Rockland Kennels' champion Racer, Jr.

Great Danes, Dr. Hurdman's Juna. Pointer dog, Wm. Ledyard's Tempest; bitch, Wm. H. Hyland's Fan N. English setter dog, Cohanett Kennels' Kent II.; bitch, Mt. Washington Kennels' Nia. Irish setter dog, Seminole Kennels' Seminole; bitch, Mt. Royal Kennels' Eufria. Gordon setter, Duchess of Waverley. Clumber spaniel dog, Mercer & Middleton's Boss III.; bitch, same owner's Lady Bromine. Field spaniel, Andrew Laidlaw's champion Brifford Gladys. Cocker spaniel dog, Luckwell & Douglas's Black Dufferin; bitch, George Bell's I Say (2); novice cocker dog, Alfred Geddes's Donovan; bitch, Rideau Kennels' Rideau Romola. Collie dog, McEwen & Gibson's Dowry; best collie open class, Collie Club's medal, Dowry; second best, Seminole Kennels' Roslyn Conway. Best bulldog, G. A. Woodward's Bo'swain. Fox-terrier dog, Woodale Kennels' Starden's Jack; bitch, Woodale Kennels' Ebor Nettle (2). Skye terrier, C. A. Shinn's Sir Stafford. Bedlington terrier, Dan O'Shea's Zulu. Black and tan terrier, Rochelle Kennels' Meersbrook Maiden. Pug, Dr. Cryer's champion Bob Ivy. Toy spaniel, A. M. Goldsmith's Calumet Alice. Spitz, Mrs. W. Roger's Fred. Best brace cocker spaniels, Corktown Cocker Kennels' Tim Obo and Tip Obo. Best kennels: English setters, Mt. Washington Kennels. Irish setters, Seminole Kennels. Gordon setters, Dr. Dixon. Pointers, Wm. H. Hyland. Clumber spaniels, Mercer & Middleton.

THE MONTREAL DOG SHOW.

Editor Forest and Stream:

It is possible to state truth in such a way as to give a very erroneous impression. True, the management of the Montreal show was behind on the first day, but neither FOREST AND STREAM or any other paper, so far as I have noticed, has mentioned the enormous disadvantage under which we labored. Spratts were to bench and feed for us, but up to Saturday evening the car snipped from Hamilton with their stuff could not be heard from. The benching, etc., was not on the grounds till Sunday and not a bench put up till Monday. In the meantime we were occupied in trying to find the car and in devising schemes and arranging plans to meet the emergency. It is not strange therefore that several matters were behind, and in fairness to us this should have been mentioned.

The catalogue was not out on the first day, owing to no fault of mine, but to circumstances I could not control this year; but for this we are willing to take blame nevertheless. Unfortunately the climax came soon after the marked catalogue was out on Thursday evening by a fire in the printer's office, so that I am unable to send copies to many gentlemen who wished them.

The judging was not delayed, but went on with as much speed as circumstances permitted. It began as soon after the hour for receiving dogs had passed as was consistent with those concerned getting a little lunch, and continued on the first day up to nearly 6 o'clock, hot as it was. On Wednesday Mr. Davidson worked from 10 A. M. all day (lunch hour excepted) up till the light failed, leaving only a few classes and the specials for Thursday. Of rushing through the judging as at some shows I may have a word to say again.

Allow me now, Mr. Editor, to state briefly a few facts which have not come to light in the press reports. Montreal benched about 340 dogs, and it was generally admitted that the quality has never been excelled in Canada; the judging was steadily, carefully and satisfactorily done; all prize money, including specials, was paid before the close of the show to those claiming it; notwithstanding the dilemma caused by the delay in Spratts benching, we managed to bench and feed fairly well. We had no puppy classes and no dogs under ten months of age. A large proportion of the prizes was taken by Montreal dogs; in some cases they had whole classes almost to themselves, and many first prizes went to local dogs. The Montreal show is the first in the history of shows, I think, to separate dogs and bitches in all competitions, even for specials. The public was well pleased with the show and patronized it to the extent of 23,000 people. The balance of our account is very largely on the right side. At the same time my ideal of the management of a bench show is so far in advance of anything I have yet seen that I am personally not at all satisfied with the results. However, I do not think that on behalf of those concerned, and on behalf of the truth, I should allow the press reports to stand in their present misleading form. In conclusion I wish to thank the various visiting handlers and others for the good-natured way in which they adapted themselves to the drawbacks of the first day.

THE SUPERINTENDENT.

TORONTO DOG SHOW.

Editor Forest and Stream:

FOREST AND STREAM has stated that it does not wish a misstatement to go on record in its columns. Readers of FOREST AND STREAM believe that one of the leading objects of the Kennel department is to give information and spread knowledge. Most of us are of the opinion that any paper or any person should state facts. Therefore may I, without incurring anybody's ill will, ask for a reply to a few of the many misleading statements which appeared in your report on the Toronto dog show.

1. Mastiffs.—"Caution's Own Daughter had to give way to Lady Coleus, for the reason that I pointed out last week, not skull enough, though positions were reversed at Hamilton." As I, the judge that placed Lady Coleus over Caution's Own Daughter, am not authority for your statement, I think I am in order in asking you to substantiate what you have written.

2. Bull-Terriers.—"Mr. Mason thought Topsparkle the best; his coat, or lack of it, not to mention his head, should have put him back. Duke of Wellington, a heavily boned pug, came second; he is good in front, that is all." As a matter of fact, Duke of Wellington is not "good in front," and Topsparkle is decidedly better in front. However, will your reporter be good enough to state which dogs should have won the prizes and name the defects in those dogs?

3. "The class of dogs was about the same as at Hamilton the previous week, but the addition of puppy and novice classes accounted for the increased entry." Toronto had 581 entries. Hamilton had 308. Without counting the under 18-months-old, novice and puppy classes at Toronto, that show had still over 400 dogs against Hamilton's 308. By what method of figuring are three hundred as many as four hundred, and why was the statement made?

4. Greyhounds.—"Though in numbers not as large as last year, still the quality shown was about the best we have." It is a matter of fact that there were 22 entries last year against 31 this year. Why are the 31 of 1891 not as many as the 22 of 1890?

The statement that the "class of dogs (i. e. quality of dogs) was about the same as at Hamilton" is not sustained by the list of awards, which proves that Toronto was far ahead in quality as in numbers. The Hamilton show and its managers, like Baltimore, have had so much free advertising, puffing and taffy, in certain quarters, that I must apologize to your readers for mentioning them again.

CHARLES H. MASON.

CENTRAL FIELD TRIALS.

Editor Forest and Stream:

We would like to announce through your columns that the judges for our All-Aged Stake and Free-for-All Stake will be the same as for the Derbys, namely: Mr. J. M. Tracy, New York; Mr. N. Wallace, Farmington, Conn.; Mr. J. S. Churchill, Middleborough, Ky.

We would also consider it a favor if you would call the attention of your readers to the fact that our All-Aged Stake closes Oct. 15 and the Free-for-All Stake Nov. 1.

C. H. ODELL, Sec'y and Treas.

DOG CHAT.

IN reference to the number of dogs at Toronto and Hamilton, we may say that at the latter show 308 dogs were benched, or entered as benched, there being no duplicates. Toronto had 581 entries catalogued. We said in our report: "The class of dogs was about the same as at Hamilton the previous week, but the addition of puppy and novice classes accounted for the increased entry without any improvement to the show, as we saw several litters of puppies that had been better at home." The italicized part shows our reason for the remark. The puppy and novice classes, together with the duplicate entries these usually entail, amounted to 249 entries, leaving a regular entry of 332, a difference of 24—not a very wide mistake when speaking in a general way. We do not see what Mr. Mason has to grumble at in our comments on the greyhound classes, unless it is for the single reason of having a kick at something. Our reference to numbers applied more particularly to the open classes, where there were two more entered in 1890 than this year. We wrote without a catalogue of last year's show at hand, and having in mind the dog class of last year particularly, which had 13 as against 8 this year, we wrote as we did, forgetting that the challenge and puppy classes were larger this year. At the same time, we are not aware that this detracts from the splendid quality of this year's exhibit, with which Mr. Mason should rest content.

Speaking of the beagles we recently illustrated in *FOREST AND STREAM* from the *Stock-Keeper* (Eng.), that journal says, quoting us, "Their type of head is hardly what American critics ask for" and adds: "If our friends out there prefer the chump-headed square type or the wide-skull, snipy-muzzle, and goggle-eyed type, *tant pis pour eux*, and they cannot be properly imbued with true hound character." We are not aware that our criticism would lead any one to suppose that we had a liking for either, but rather each part in proportion with the other. At the same time those pictures lead us to suppose that the "snipy-muzzled" type are the dogs that are winning in England.

Owing to late acceptance of entries at Ottawa, there were altogether too many duplicate numbers. The A. B. C. system does not look well in a catalogue, to say nothing of the confusion it entails. The club is, however, to be complimented on securing such a good entry as 260 at the tail end of the circuit, with ne'er a puppy among them.

Mr. William Rabbitts, Jr., Spratts Co.'s able representative, whose doings we have chronicled occasionally, is usually original in his methods, but this time he has been content to follow in the well-beaten path. We find the following in the *Manitoba Free Press* of Sept. 24: "RABBITS-CROSS—Married on the 23d inst., at St. John's Cathedral, Winnipeg, by the Rev. Archdeacon Fortin, William Rabbitts, of Philadelphia, Pennsylvania, eldest son of Capt. W. J. Rabbitts, formerly of Newfoundland, to Annie M., eldest daughter of William Cross, Esq., master mechanic, C. P. R." The happy couple will make a honeymoon tour of British Columbia, California and other States, and we sincerely trust that Mr. Rabbitts' added responsibilities will never cause a shade to pass over the smiling countenance he is noted for among his fancier friends.

The dog show held in connection with the Westchester (New York) county fair, on Oct. 1 to 3, contained eighty-three entries. The dogs were judged by Mr. George Laick, Tarrytown, N. Y. The exhibits, with but few exceptions, were poor, but were a slight improvement on previous years both in numbers and quality.

We have received from the secretary of the American Spaniel Club a neat little book containing names and addresses of members and judges, constitution and by-laws and the different classifications for bench shows. To the spaniel man this is just what is required. Spaniel men should be proud of their club.

Those exhibitors who attended the Hamilton show will be sorry to hear that the management is \$700 on the wrong side. As a guarantee fund of \$2,400 was raised and in bank before the show opened this will be easily taken up, and we trust better luck will attend their efforts next year.

A test of the scenting powers of a pack of so-called blood-hounds was made a few days ago near San Antonio, Cal. They had been recently purchased and placed in the charge of a Mr. Bergen, a farmer, for training. The trail was made in the presence of the Sheriff and the County Commissioners. The dogs were fastened in their kennels and a man was started off from Mr. Bergen's house. He skirted the fence, and reaching the railroad track climbed upon a freight-car, walked along the roof of that and other cars, coming to the ground again 200yds. off. He then took two long planks and walked along them alternately, so that for 300yds. neither his feet nor hands touched the ground. He then continued his course, carefully covering his tracks in the dusty roadway for half a mile. He continued his course for two more miles, using various devices to destroy the trail and finally took refuge in a tree. About three hours after the man had reached the tree the dogs were brought out. As soon as they caught the scent they started off on a run, finding their first difficulty at the railroad car. They began to run around in widening circles until the scent was picked up again at a point where the man had left the car. The dogs, it is said, had but little difficulty in following the trail from there to the tree, where they came to a standstill, baying savagely when they discovered the object of their search. It would be interesting to have Mr. Winchell's opinion on this performance. We know that several hounds from his kennel have been sent to California, but whether they would be able to trail a man aided by planks in a dusty roadway is questionable.

We understand that Mr. F. H. F. Mercer ("Clumber," "Dogwhip," "D. Boulton," "Herald") was presented with a handsome gold watch chain at the close of the Ottawa show by the exhibitors. Mr. John H. Naylor made the presentation speech in his usually happy manner, leading off with a remark that he had been requested by the exhibitors to enter a protest against "Clumber," etc. Of course Friend Mercer was charmed to find it a bit of "Die Hard's" buncombe after all.

We hear that Mr. H. W. Huntington has sent his Barzoi bitch Zerry to England to be bred to the same dog as Luca goes to. She sailed on Saturday last.

The Ottawa show was not a success financially, and it is said that the dog men of that city will in future, for a time anyhow, be content to watch some one else undertake the worry and loss such ventures sometimes incur.

Al Eberhart writes: "Entries are ahead of my expectations for our coming dog show, to be held in connection with the Humane Society's fair, Cincinnati, O., Oct. 13 to 16, both as to numbers and quality. Many noted kennels have entered, and I want to thank my friends who have so generously responded. I hope this show will stimulate the dog interests in our city and wake up some of our rather sleepy members of the Cincinnati Kennel Club, so that we can give a show next year under A. K. C. rules. I feel highly gratified, considering that our prizes are cups and medals, that so many noted dogs will be here from long distances. Adams, United States and American Express companies

will return dogs free upon payment coming. Mark dogs to Al G. Eberhart, Superintendent Dog Show, Carthage, O. (not Cincinnati), and they will be delivered at the grounds, where I will be, at noon on Monday, Oct. 12, to receive them. Exhibitors must ship dogs to arrive not later than 10 A. M. Tuesday, 13th. Judging begins Wednesday at 10 A. M. Mr. Frank C. Wheeler judges all classes. The show will be fed with Austin's dog bred by Eberhart Pug Kennels. Our special prize list is large and open to all; several valuable specials in the list."

Many of the exhibitors and handlers will remember the man who had charge of the Flour City Kennels' mastiffs in the earlier part of last spring's shows. His name was Geise. It seems last week he was called upon by a policeman to help him in disarming a man who was drunk. In the scuffle Geise, becoming enraged, took the gun from the man and dashing it to the ground it went off, the charge lodging in Geise's groin. He was fatally wounded, but lived till next morning. He leaves a widow and three children. The woman is deserving and a subscription is afoot to save the home she lives in so that she may have a chance to earn a living for herself and family. Her husband had left the kennels some time before this happened.

Mr. C. A. Stone, secretary and superintendent of the Industrial Exhibition Association dog show, Toronto, Ont., has been connected with dog shows since 1877. He was born in London, Ont., in 1852, and gained his show experiences under that grand old manager, Charles Lincoln. He has had some position with every show held in London, and was secretary and manager at London in 1888, 1889, and Toronto

C. A. STONE.

1889, 1890 and 1891. Mr. Stone is also secretary of the Toronto Kennel Club. He was one of the first, if not the first, originators of the Canadian Kennel Club, being the first secretary. This position he held for two years, and is now one of the executive committee. Besides being connected with dog shows, he is an enthusiastic sportsman in the field, and was one of the organizers and the first secretary of the Canadian Field Trials. His fancy runs to English setters, his kennel being known as the Forest Kennel. He is a favorite with the dogmen of both countries, and works hard to make every show he is connected with a success.

The courteous secretary of the Blue Grass Kennel Club, Mr. Roger Williams, a man well-known in the ranks of greyhound breeders, was presented with a gold medal by the exhibitors at the Lexington show, in testimony of their high esteem of him as a man and of his fair dealings as the secretary. The medal was engraved with the following inscription: "To Mr. Roger D. Williams, by the exhibitors at the inaugural show of the Blue Grass Kennel Club." Mr. H. E. Cook made the presentation speech, and in a happy style spoke of the pleasant reminiscences they would take away with them of the land of good horses, gallant men and beautiful women. Mr. Williams acknowledged the compliment in a neat speech, saying: "Gentlemen, your action embarrasses me beyond measure, for I enlisted myself in the interests of the bench show solely to aid the Charity Exposition, and to show my great love for that noble animal, the useful dog. I had no hope or desire for emolument or praise; but at the same time, I cannot deny that I feel more than proud at the manner in which you have treated me to-day. I thank you, gentlemen, one and all." We are pleased to hear from Mr. Williams that the show will be a financial success, and he adds in a letter to us, "Do not accuse me of being 'off my base' when I tell you I bought a cocker, a great Dane and a Gordon setter at the show." In fact a number of sales were made, and it proved a good place for the regulars to unload. Mrs. King, the fair reporter of the Kentucky *Leader*, held the winning number in the Obadiah raffle, much to the delight of the dogmen.

We sadly miss our copy of the *Canine World* this week, and especially "Peto's" comments on current matters; sensible in his deductions he struck a line that we are sorry to see come to a check so soon. We trust, however, he will make another cast and lift the scent in some place, for we cannot believe he will give up writing altogether.

Mr. A. C. Wilmerding, the popular spaniel judge, returned from his trip to Canada loud in his praise of the hospitality and generous treatment he received at the hands of the Canadian spaniel men. They work their dogs as well as show them, and he spent several pleasant days after partridge round Woodstock with Messrs. Laidlaw, Kirk, Luckwell and Douglas, and the "cuckoo" joke on Douglas never misses fire.

The Australians are making rapid progress in a doggy way since the first Victoria dog show in 1884. Then they had 400 entries, this year 800. This increase is due to importations from England under the most adverse circumstances, a quarantine of six months being forced on every dog imported.

Mr. Howard of Montreal has purchased the noted bull-terrier White Wonder, about whom a good deal has been said from time to time in these columns. It is stated the dog is no longer deaf, a pea having been taken out of its ear.

If this is so, White Wonder has a brilliant future before him, as he is a clinking good one.

The English *Stock-Keeper* very kindly remarks this week that the *FOREST AND STREAM* "has become as full of news as an egg is of meat," and in "indorsing 'Onlooker's'" piece of advice about protecting strips to prevent bitches lying on their pups, says: "We adopted this precaution years ago, but somehow it fell into disuse in our kennel. 'Onlooker's' words have recalled its value to our mind, and the breeding strips have again been affixed to the beds." Perhaps other breeders will follow the good example and so save many of their pups.

We particularly draw the attention of sportsmen to the closing date of entries Oct. 15 for the All-Aged Stakes of the Central Field Trials. For the Free-for-All Stake the entries close Nov. 1. Full particulars are given in our advertising columns.

The advertisement of the Blue Ridge Kennels should command the attention especially of those who breed for work in the field. Their liberality in offering prizes for winning Derby dogs sired by their stud dogs is praiseworthy, and their \$1,500 Derby marks a departure in dog kennel management as rare as it is commendable. In fact, we believe, it is without a precedent.

NOTES AND NOTIONS.

CRITICISING the actions of so distant a body as the English Kennel Club is going somewhat far afield, but the community of interests in kennel matters often renders such criticism important. With this view in mind, the recent astonishing action of a Mr. T. Duerdian Dutton, counsel for the English Kennel Club, attains a most painful prominence. On behalf of the club, he demanded an apology from Mr. Freeman Lloyd for some misstatements published by the latter, and incorporated in his demand, the outrageous statement that Mr. Lloyd knew his statements were false when written, and refused any settlement that did not include this admission by Mr. Lloyd! This was a compound of despotism and intense arrogance not hitherto developed in kennel transactions, and I cannot but think that this scandalous demand was unauthorized by the club and that Mr. Dutton was alone responsible for it. No generous mind, no man above the level of a bully, ever wants an apology for any other reason than righting a wrong done him, and to make the apology the means of degrading the apologist, brings him who requires it below any possible or imaginable level of the offender. The Kennel Club owes itself two things, one to promptly accept the apology tendered by Mr. Lloyd in which he regrets his having honestly given out an incorrect statement and the other to retain other counsel.

The recent publication by the Eastern Field Trials Club of its amended instructions to judges at their trials, and the editorial comments in the *Canine World* on the offer by Mr. Wade of a prize for special, instinctive, intelligence in sheepdogs, both mark a long needed departure in all classes of dog competitions. Shows are primarily places where dogs are shown, which involves that their looks are the chief object to be considered, and, logically, it seems difficult to devise any other element to enter into such competitions. But field trials of any kind stand on an entirely different footing; their avowed object is to test the real, useful value of dogs, entirely apart from their appearance. Yet, as a matter of fact, it has come to pass that field trials are really competitions between trainers and handlers, and display their skill far more than they do the abilities, physical or mental, of the dogs. This is clearly a travesty on the only logical reason for their inception and continuance. The dog which conforms to the instructions of his handler, be those instructions given during the trial or in previous specific training, is certainly not the equal of the dog who knows his work and does it of himself unaided by his master's eye or hand. Not every sportsman is a trainer, not every herder of stock a master of the art of training dogs for the work, and the dog whose own mentality and education has fitted him to be a thorough helper of the user, is the dog we all want. This is admirably summed up in the introduction to a little work on training sheepdogs, in the statement that it should be the aim of the trainer to give the dog a liberal education, not to teach him a lot of tricks, and such instructions as the Eastern Field Trials Club proposes to give its judges will go very far to correct the mount-bank style of training dogs for, and working them at, field trials that has crept in during the last few years.

In the interest of kennel matters, it is to be hoped that the proposed dog show at the coming World's Fair, at Chicago, will fall through. On no grounds does such a show promise any good result, even on the financial ground it promises disaster, as I cannot remember a show held under such auspices that was not a failure in a money point. As an educational enterprise, it will effect but the least, for how many who would visit such a show would have the least idea of dog form, breeds of dogs, or any canine matter? Dog shows fall under the rule of all successfully conducted businesses, and, to use a homely phrase, "They must stand on their own bottom."

THE ONLOOKER.

BRUNSWICK FUR CLUB'S FIELD TRIALS.

Editor Forest and Stream:

The third annual field trials of the Brunswick Fur Club will be held at Princeton, Mass., commencing Nov. 9, 1891, and continuing until the several classes have been run off. These trials promise to be the most brilliant the club has ever inaugurated, for the officers have selected the ground with much care, and attended to every detail with thoroughness.

The prizes to be competed for are the American Field cup, the club's medal for highest general average, both of which go to the same hound, Mr. Baird's endurance medal, Mr. R. D. Perry's steel engraving, "A Promising Litter," which is to be held for one year by the best puppy, and cash prizes in each class to be offered by the club.

Arrangements have been made with Pratt's House, Princeton, to accommodate hunters and hounds for a dollar a day. A large attendance is expected, and it is desired that those intending to come should notify the secretary as soon as possible, stating how many hounds they will bring.

Princeton may be reached from Boston by Boston & Albany Railway via Worcester to Princeton depot, where conveyances will take passengers from each train three miles to Pratt's House, or by Central Massachusetts division of Boston & Maine Railway to Oakdale, thence by vehicles seven miles to Pratt's House. The officers of the club, with many members have decided to take the 8 A. M. train of the Central Massachusetts division B. & M. Railroad from Boston to Lowell station, Boston, on Nov. 9, and are due at Oakdale at 9:21, where conveyances will be waiting to take them to Pratt's by 10:30 A. M. Upon arrival the old hounds will be chained up, baggage dropped in office and the puppies taken at once to the hunting grounds for trial.

Princeton is said to be the best foxhunting country in New England, and foxes are promised us in great numbers. We cordially invite fox hunters from all parts to attend the trials and trust the fox catchers from the South and West will come and exhibit their packs at the end of the trials. We have several hounds we should like to race with theirs.

A. C. HOFFENGER, V. P. & Sec'y pro tem, PORTSMOUTH, N. H.

PEDIGREE OF LORD CLOVER.

Editor Forest and Stream:

How is it that none of our kennel papers undertake an analysis of Dr. M. H. Cryer's book "The Prize Pugs of America and England"? The reason for this query is that I have been very disagreeably made aware of the necessity for something of the sort. Dr. Cryer's work seems to be a good deal like the laws of the Medes and Persians. It is regarded as absolute authority on all that appertains to pugs on this side of the Atlantic. There seems to be a sort of general impression stalking at large that the poor fellow who first opposes the Philadelphia savant is virtually offering himself for a sacrifice between the upper and nether millstones.

Now without discussing the plan, trend and general result of the book in its relation to the fancy at large, allow me to go squarely on record as flatly contradicting some of the alleged history it contains. I refer in particular to the schoolboy account of the dog Lord Clover on page 72 of the work. I do not deny Dr. Cryer the privilege of forming whatever opinion he pleases as to the quality and merit or lack of both, in any dog of mine; but when he scatters broadcast a mutilated pedigree and gives me the lie direct on matters concerning my own kennel, it is time to call a halt. Dr. Cryer states first of all that Chas. M. Chatterton bred Lord Clover, and then very coolly cuts out and eliminates valuable blood from his victim's veins. He denies that Lord Clover is a grandson of champion Little Dorrit and then places me in the awkward position of one who attempts to forge a pedigree. For I, sir, as firmly and flatly reiterate that no man named Chatterton bred the dog and no man can show a cloud of any kind on his direct relation to Little Dorrit. I wrote Dr. Cryer four or five months ago in relation to this matter. I was then, and have been since, deluged with very unpleasant correspondence, all of it more or less an impeachment based on Dr. Cryer's book. I apprised the Doctor of his error and furnished him the facts. As the animal's owner I deemed myself entitled to the credit at least of knowing the dog when I see him. It appears I am not, for beyond writing a brief note embodying a vague promise to correct errors, the astute historian makes no sign. This was four months ago, and I have come to the conclusion that the nuisance must stop. It is no fault of mine that Dr. Cryer is ignorant of the subject matter which he handles. I decline emphatically to "knuckle under" to blunders.

I defy Dr. Cryer to successfully impeach the pedigree of Lord Clover as submitted: Lord Clover, by Loris ex Nellie, Loris by Diamond ex Queen Rose, Nellie by Stingo Sniffles ex Little Dorrit. More than that, he cannot know even the rudiments of the pedigrees of the present prize winning pugs in England, and miss acquiring a full knowledge of Goulding's Nellie, the dam of Lord Clover. Dr. Cryer professes acquaintance with English show rings and breeders. Let him write Mr. Houlker, secretary of the Pug Club, owner of Lord Clover's sire. Let him ask Mr. Proctor for a draught of the pedigree of Pitti Sing and champion Confidence; let him appeal to Mrs. Brittain, Mr. Gariuss, Mr. Hartley, the Red Dicker, Captain Oppenshaw, the folks at Cottesmore or at Kirby Lonsdale. They are all reputable fanciers of the breed and in a position to know the facts. But the Doctor will make no such appeal. His information, or more properly his lack of it, came from no such authoritative source. Any and every one is liable to error, but in this case that is not the point. Few men have the manhood to acknowledge errors, particularly of the inexcusable blunder stripe, and this seems to be the chief reason why I am forced to kick out of the traces or take all the mud from the Doctor's heels. This is the situation at present—I affirm that the dog in dispute is by Loris ex Nellie, Loris by Diamond ex Queen Rose, Nellie by Stingo Sniffles ex Little Dorrit. I also affirm that Mr. Goulding, of Leeds, bred Lord Clover, and that Mr. Proctor, also of Leeds, bred his dam. Dr. Cryer cannot produce an iota of reliable testimony against either of these propositions. He wastes time and energy if he ever attempts it.

THOS. I. BALLANTINE.

PEORIA, ILL., Sept. 14.

PETER AND THE CAT.

THE black and white cat, familiar by sight to thousands who cross the Jersey City ferry as the pet and pride of the ferry house employees, is not as frisky as she was a few nights ago. In fact, she shuffled off this mortal coil at precisely forty-two minutes past 10 o'clock one fateful evening.

In so doing she was assisted in a lively fashion by a pure white bull-terrier, known as Peter, who had a heated argument with her regarding the propriety of her roosting on his back. Of course, finding that she had taken an untenable position, she may have choked to death out of sheer vexation; but the weight of impartial evidence seems to be to the effect that Peter's jaws did the business, as he mutely argued his side of the case as well as he knew how.

To a cold and unsympathetic mind, ignorant of the illustrious positions occupied by these animals in the canine and feline worlds, the occurrence might appear like an ordinary, everyday scrunching and cat-clawing match. But such is not the fact. The cat in the case was the property of Capt. Robert Bloomsburgh, Superintendent of Ferries for the Pennsylvania Railroad. She came to him from foreign parts two years ago as an impoverished emigrant, and was a very wise cat in her day and generation.

She was also a great traveler, though she took no stock in trips on land. Her fancy was for "the sea, the sea, the open sea." Thrice, when she felt like making a voyage to Europe, she boarded the Rotterdam line of steamers, without any fuss and feathers, and just sailed away, saying good bye to no one. She was so well pleased with Rotterdam that she stayed there eight months on her first visit. Perhaps an absent spouse was the attraction, for she came back with the makings of a litter of kittens on her return from her first absence, and faithfully adhered to the custom thus initiated on each of her subsequent tours. Whenever she decided to try this country again, she would take passage on a return steamer as unostentatiously as she went away. On her arrival she would seek out Captain Bloomsburgh and "meow" a greeting to him quite as if she had been out of his sight for only a few hours.

Then she would resume her usual routine of life at the Pennsylvania Depot. But her disposition was such that her life there involved a multiplicity of occupations. Her foreign travel, high living, and the attentions lavished upon her by the many admiring friends she made, had the effect of increasing outrageously her innate pride and hauteur. The habit of taking charge of things grew upon her apace, and she became more arrogant and domineering after each trip abroad. She became so proud that she wouldn't look at other cats or associate with them. For want of any other name she was sometimes called "Annex."

Now it was her pride that went before her destruction and brought about her undignified, not to say ignominious, exit. She not only took to bossing all the other cats that came into the ferry house, but vainly imagined that she could lord it over all of the dogs she saw there as well. For a long time, however, she was successful in the exercise of her tyranny, and many an owner of prize-winning dog flesh has had his soul vexed with unavailing exasperation to see this domineering puss jump on the back of his pet and scratch, and gouge, and bite, until the harassed beast was forced to beat a howling but timely retreat.

Peter, her conqueror, was as haughty as Annex, for he was a bull pup of the purest caste. He is the property of Charles J. Peshall. Peter's father was champion Count, from the Duke of Manchester's kennels, who won 61 first

prizes and took every one of those offered in his class whenever he was exhibited in this country. His mother was Peshall's Baby, a high bred terrier which was never shown.

It was at 10:38 P. M. (official time) that Peter, accompanied by his valet, for so Mr. Peshall styles himself because of his assiduous attention to the dog's welfare, entered the ferry house from the Jersey City side. With them was his friend Dr. Horning, who knows a thing or two about dogs and has some terriers of his own which may become prize winners some day.

The trio made their way to the portion of the depot devoted to the use of passengers who travel on the Brooklyn Annex, and Peshall and his friend seated themselves on one of the benches. There was a large number of people present and many of them admired Peter's compact, muscular, snow-white body and his dignified mien. He sat himself down near the bench and looked about him with stolid composure.

It was at 10:40 P. M. (official time) that a low growl from Peter announced that he disapproved of something. His watchful valet, owner, guardian and friend looked up and saw the feline boss approaching.

"Be quiet, Peter," he entreated, and taking the cat in his arms carried her to another bench some distance off. This took but a few seconds, yet during the interval the watchful and waiting crowd had become greatly interested in the movement of the two animals. Knowing Peter's quiet disposition when he is left alone, and feeling a serene confidence in his ability to "keep tabs" on the cat, Mr. Peshall entered into conversation with Dr. Horning.

For just one brief moment, however, Peshall closed his weather eye, so far as the cat was concerned, and winked the other optic. That moment, which came at 10:41½ P. M. (official time), was fraught with disaster to Peter and destruction to Miss Tabby. Just how she sneaked around and planted her feet on Peter's back with a running jump seems to be, as Dundreary used to put it, "one of those things that no fellow can understand." But the fact that she got there with all four feet and began scratching at his eyes was made manifest by a series of yelps and snarls which brought everybody to their feet in an instant. Then the terrier clinched with his adversary.

"Come off, Peter, come off," shouted his master, as he grabbed his pet by the hindlegs and swung him and the cat to and fro in the air like an animated censer.

"Shake him up, Peter, shake him up," responded an enthusiastic "sport" who saw that the steel trap jaws of the terrier were set tight underneath the cat's forepaws.

But Peter took the "sport's" advice and attended strictly to business. Notwithstanding the fact that he was heavily handicapped by being waved about in Peshall's hands like a banner, in one-half of a minute, corrected time, the cat found out that she had bitten off more than she could chew, while Peter demonstrated that he had not. Within the same interval of time Captain Bloomsburgh's terror became permanently weary of life.

When Mr. Peshall saw that the jig was up, he yanked the lifeless cat out of Peter's grasp and proceeded to pummel him for his disobedience.

"Don't hit him," urged the "sport," "give him another cat. He beats bootjacks and bottles all to pieces."

"So say we all of us," put in a young man in a thunder and lightning suit. So the whipping was discontinued.

Peter thoughtfully licked his chops and, though somewhat disfigured, would have been able to attend his adversary's funeral, if he had been invited.

EDWARD WESLEY POTTER.

DEATH OF LEONBERG CÆSAR.—Minneapolis, Minn.

—Editor Forest and Stream: I wish to record the death of the Leonberg dog Cæsar, who was killed by an electric car in this city, July 13, 1891. Cæsar was the only son of Monarch, the winner of one first and three special prizes at the St. Paul dog show of 1887, also of 1888, these being the only dog shows he was ever exhibited at. Monarch was sired by the celebrated dog Sultan, whose arrival in this country was mentioned by FOREST AND STREAM July 31, 1879. Both Monarch and Cæsar were bred from Mr. S. L. M. Barlow's imported bitches Thekla and Minca, at Glen Cove, L. I. All of these dogs will be remembered by theatergoers for their wonderful performances in such plays as "The Dogs of the Forest," "The Danites," etc., etc.; Sultan being the only dog that ever had the honor of being an attraction at Booth's Theater, New York, where he was a feature for six weeks in 1881. All were mammoth dogs and remarkable specimens of their breed, Monarch standing 35in. at the shoulders, beating Sir Charles at St. Paul, Minn., who, up to that time, had taken several prizes as the largest dog exhibited. At the time of his death Cæsar was the property of Mr. J. H. Mochell, of Minneapolis.—W. E. STERLING.

BREEDERS' STAKE FOR MASTIFFS.—Port Huron,

Mich., Oct. 4.—Editor Forest and Stream: There is quite a strong movement afoot to make a breeders' stake for mastiffs whelped in 1891 to be shown at Chicago at the World's Fair in 1893. It is just what is wanted, and no doubt will find favor at the hands of our mastiff men. The object, I understand, is to develop the mastiff and to keep him before the public. It is a well known fact that they have not had the interest taken in them that they should have in the past few years. A good-sized stake would cause some of them to look around their kennels and find out what dogs they could breed to and get a winner. It is proposed to make the stake in payments, in 10 per cent. payments, Jan. 1, 1892, July 1, 1892, Jan. 1, 1893, and the balance of the amount on naming the dog or bitch to be shown. This, I think, should add interest in the breeding of a better class of mastiffs and no doubt would well pay the winner of the stake for his trouble.—JAS. J. LYNN.

DEATH OF THE COCKER FLOSSIE.—Newtownville,

Mass.—Editor Forest and Stream: I have lost my valuable liver and white cocker spaniel bitch Flossie (Col. Stubbs—Pet). She was run over and killed by an express train of the B. & A. R. R., Tuesday night, Sept. 29. She was considered one of the best liver and white cockers in this part of the country. She had many friends and not a single enemy. Was a grand little worker on woodcock, partridges and ducks. She was in whelp to C. G. Browning's Cherry Boy. I never expect to own her like again. She was my constant companion.—GEO. L. V. TYLER.

A LARGE PUP.—Sullivan, Ill.—As a subscriber to the

FOREST AND STREAM would like to submit a description of a St. Bernard pup I possess, which seems exceptionally large for its age. He was ten months old on Sept. 4, measures just 6ft. long, stands 32½in. high and, although very thin, weighs 136lbs. He is one of a litter, and while he is said to be a full-blooded St. Bernard, he is off-color, being a rich brown. White markings very good and has a fine head and limbs. He was sired by Monte.—GUY HOLLINGSWORTH.

ONE MOMENT, PLEASE.—Do you contemplate visiting Dubuque, St. Paul, Minneapolis, Marshalltown, Des Moines, St. Joseph, Leavenworth, Kansas City, or any point in the Northwest, the Puget Sound region or the balmy South or Southwest? The Chicago, St. Paul and Kansas City Railway will furnish you transportation enabling you to safely, quickly and comfortably reach your destination. Its splendid equipment and excellent management have made it a popular favorite. F. H. LORD, General Passenger and Ticket Agent, Chicago, Ill.—Ad.

DANBURY SHOW.—Fair Grounds, Danbury, Conn., Oct. 7.—Danbury show opened this morning with about 157 entries. Some fair dogs among them. Frank Dole here with a good string, also Dr. Haire. Wild Crow, Woodhaven, Edgewood, Fenwick and other Connecticut kennels well represented. Judging commenced at 11 and will continue to-day.—H. W. L.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

BRED.

Prepared Blanks sent free on application.

Cricket—King Kell. W. E. C. Thomas's (Brocton, Mass.) beagle bitch Cricket (Shorty—Belle) to Ringwood Beagle Kennels' King Kell (Sport K.—Bess K.), Sept. 8.

Damson—D'Orsay. Chas. S. Hanks's (Manchester-by-the-Sea, Mass.) fox-terrier bitch Damson (Dominie—Daphnia) to F. Redmond's D'Orsay, June 2.

Grouse II.—Venio. Chas. S. Hanks's (Manchester-by-the-Sea, Mass.) fox-terrier bitch Grouse II. (Rational—Olive II.) to Vickery's Venio, Feb. 11.

Brockenhurst Queenie—Dominie. C. S. Hanks's (Manchester-by-the-Sea, Mass.) fox-terrier bitch Brockenhurst Queenie (Rational Stine) to F. Redmond's Dominie, June 21.

Spook II.—Spokane. H. P. Brey's (Hamilton, Ont.) St. Bernard bitch Mary Jones to J. S. Williams's Monk (Sultan—Beulah), July 29.

Jennie III.—Roger. N. Wallace's (Farmington, Conn.) English setter bitch Jennie III. (champion Foreman—Tallman's Jennie) to L. Gardiner's Roger (champion Noble—Queen Meg), Oct. 27.

East Lake Virgie—Spokane. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch East Lake Virgie (champion Bradford Ruby—Puss B.) to their Spokane (champion Kash—Lady Thora), Sept. 10.

Little Brownie—Bradford Ruby II. Jas. A. Tucker's (Concord, Mich.) pug bitch Little Brownie (Dixie—Silver Shoe) to Eberhart Pug Kennels' Bradford Ruby II. (champion Bradford Ruby—Puss B.), Sept. 16.

Fannie K.—Eberhart's Cashier. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Fannie K. (champion Kash—Flossie II.) to their Eberhart's Cashier (champion Kash—Lady Thora), Sept. 20.

WHEPLES.

Prepared Blanks sent free on application.

Buffalo Lass. A. W. Smith's (Buffalo, N. Y.) black and tan terrier bitch Buffalo Lass, Sept. 27, four (one dog), by Rochelle Kennels' Broomfield Sultan.

Lady Verne. O. P. Kinnie's (Lima, O.) pug bitch Lady Verne, Sept. 28, six (five dogs), by Eberhart's Douglass II. (Douglass—June).

SALES.

Prepared Blanks sent free on application.

Little Goldie. Pug bitch, whelped March 18, 1891, by John Bull out of Phyllis II., by Eberhart Pug Kennels, Cincinnati, O., to E. L. Brainer, Grafton, N. D.

Bonady Belle. White fox-terrier bitch, whelped May 23, 1891, by Blanton Trump out of Hillside Baroness, by A. D. Stewart, Hamilton, Ont., to F. R. Close, same place.

Grouse II. White and black fox-terrier bitch, whelped Aug. 12, 1888, by J. C. Tinne, Lynton, Eng., to C. S. Hanks, Manchester-by-the-Sea, Mass.

Brockenhurst Queenie. White and black marking fox-terrier bitch, whelped Sept. 16, 1888, by Rational out of Stene, by J. C. Tinne, Lynton, Eng., to C. S. Hanks, Manchester-by-the-Sea, Mass.

Damson. White, black markings, fox-terrier bitch, whelped April 6, 1890, by Dominie out of Daphnia, by F. Redmond, London, Eng., to C. S. Hanks, Manchester-by-the-Sea, Mass.

Sam. White and tan marks fox-terrier dog, whelped Sept. 7, 1890, by Blanton Bravler out of Hillside Jaunty, by C. S. Hanks, Manchester-by-the-Sea, Mass., to Frank Kulgit, same place.

Spook II.—Spokane. H. P. Brey's (Hamilton, Ont.) St. Bernard bitch Mary Jones to J. S. Williams's Monk (Sultan—Beulah), July 29, 1891, by Ringwood Beagle Kennels, Brockton, Mass., a dog each to G. I. Hodgson and C. S. Brodrick, same place, and a bitch to D. S. Hall, South Cabot, Vt.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

W. M., Hyattville, O.—Two of a litter of six pointer pups, aged five weeks, have scabs on their sides and back. Very thick scabs, and matter is very white. Do not seem to run any. I believe the old bitch is troubled a little with eczema. What shall I do for it? Ans. Apply a little broacic ointment to the scabs twice a day.

J. D. B., Mount Morris, N. Y.—I have a fine young pointer dog which is poor and food does not seem to benefit him. To my certain knowledge he has a tapeworm, I having seen two or three feet of it. Ans. Give the dog, after 18 hours' fasting, worm pills or powders as advertised in FOREST AND STREAM, accompanying which are full directions. Repeat the dose in a week. Feed the dog on cod liver oil cake, meat, etc. Cakes can be procured from Spratts Co.

S. C., Woodbridge, N. J.—Will you please inform me whether dogs ever shed their teeth and if there is any cure for a disease of the gums that my dog has, causing him to have a very offensive breath. My dog is a small house dog, 8 yrs. old, very intelligent and on account of his doing many tricks has been fed too much rich cake, candy, etc., which I think ruined his teeth. Ans. Your dog is an excellent example of tartar on the teeth, which causes the gums to recede, and thus the teeth become gradually loosened and fall out. The tartar also causes ulceration of the gums. The teeth must be scaled and all very loose ones removed.

J. W. H., Newburgh, N. Y.—How can I cure a dog of fits? I have a fine pointer bitch, and I am having her broke. The man that is breaking her tells me that after having her out for a while she takes one of these fits, when she froths at the mouth and her eyes almost start out of her head, for about ten minutes. Then she partly recovers and starts to run away and don't seem to know her trainer for a minute or two. She has had seven fits already. Ans. First treat for worms and then give the following mixture: Bromide of soda 2drs., liq. arsenicalis 1 dr., water 3oz. Give one dessertspoonful three times a day. The dog ought to be kept in a quiet place and only allowed a little exercise for the present. It must not be excited in any way. See also that the bowels are regular.

W. W. W., Providence, R. I.—My bull-terrier puppy which you prescribed for in your issue of Aug. 20, although somewhat improved is still in a terrible condition. Two weeks ago she was one mass of sores, running pus, mucus and blood. Her left side which was contiguously affected all over has partially healed up, and apparently is improving daily, but is still in a very bad shape, especially about her head. When these sores first break out, the blood coming from the same coagulates and forms a crust as brittle and black as coal. As fast as I heal them they appear in other places, and have been and are now affected all over her entire body, including head, legs and tail. On various parts of her body, within a few days past, have appeared a number of swellings, varying in size from a dime to a quarter dollar piece, containing nothing but blood. She has lost entirely all of her hair, and her skin is still a bright red, and at times very feverish. Her stools are black as ink, and the odor therefrom extremely offensive. Appetite is good, and is as active as can be expected under her present condition. Please advise if I may continue same treatment as prescribed. What is her disease? Is it eczema or mange, or both? Am very sorry to trouble you again, but have no confidence in the vet. who I called in to see this puppy. His advice to "knock her in the head" did not meet with my views, neither did his diagnosis of her disease, or the treatment prescribed by him, inspire me with sufficient confidence to allow him to proceed with the same. Please advise me what to do. She is now three months old. I am ready to use the same freely, but "knock her in the head" never. Ans. From your intelligent description the bull-terrier must be suffering from follicular mange, but without an examination this cannot be determined. Mange is a most intractable disease and very difficult to cure, taking a long time, about six months, to do so. Apply the following ointment all over every other day, and to the sores daily. Nitrobenz. 30 grains, camphor 30 ounces; powdered boric acid, 4 ounces; oxide of zinc, 3 ounces. The naphthol must be dissolved in lard first by the aid of heat, then add the other ingredients and mix till cold. Give the following twice a day in a pill: Sulphide of calcium, 1 grain. Also wash the dog occasionally in a solution of sulphide of potash (liver of sulphur); two ounces to a gallon of warm water.

Individual championship of Pennsylvania, at live birds, prize, beautiful diamond badge, valued at \$50, presented by the citizens of Williamsport. To be contested for annually under the following conditions: Each contestant shall be a bona-fide member of a club or association, members of the Pennsylvania State Sportsmen's Association, or an individual member of the same. Entrance fee \$10 (birds extra), 40 per cent. of the entrance money shall go to the donors or holders this year, the balance shall be divided into three prizes, 50, 30 and 20 per cent. First prize, the diamond badge, to the person making the highest score, the next three highest scores to receive the 50, 30 and 20 per cent. respectively. The winner of the badge this year to receive 40 per cent. of the entrance money next year, the balance to be divided as above. Each contestant shall shoot at 15 live birds, under American Shooting Association rules, with the exception of 15-4, shot allowed, 12 or more guns. A bond in the sum of \$250 shall be given by the winner of the trophy to the club under whose auspices the association shoot is given. Provided, however, there be no association shoot given, it shall revert to the Williamsport Rifle and Gun Club, of Williamsport, Pa.

Ties for badge, miss and out: Fulford 8, Duston 7, Cooper 5, Welsh 4, J. Wolstencroft 3, W. Wolstencroft 0. Ties for second prize, miss and out: Thurman 11, Warfield 10, Clayton 2, McMillan and Hill drew pro rata. Third and fourth div.

This shoot was shot in with the State shoot, and those that belonged to the State Association and paid double entrance their scores counted for both on the State shoot, entrance \$10. Appended are the scores: Fulford 14, J. Wolstencroft 14, Clayton 13, McMillan 13, Cooper 14, Sober 12, Spear 10, Lindsay 11, Quimby 12, Stewart 14, Miller 15, Green 14, Brooks 13, Aggar 13, Penrose 14. Miller first, Fulford on shoot off won second, third and fourth div.

ROCHESTER ROD AND GUN CLUB.

ROCHESTER, N. Y.—The first annual open tournament of the Rochester Rod and Gun Club was held in the Driving Park in this city on Oct. 2. The attendance was a surprise even to the most sanguine, and the shoot was a success in every way but one, that was that the entries were so numerous and the consequent length of time taken to shoot off the events so great, that the programme was only a little more than half shot off by 7 o'clock P. M. In contest No. 3 alone there were 77 entries.

In consequence of the inability to shoot off the entire programme, it was decided and announced on the grounds that the club would give another shoot in about a month to finish the programme. All contests were shot under American Association rules, rapid firing system, at 10 traps. Events with over twenty entries divided into five moneys, 30, 25, 20, 15 and 10 per cent.; all other events 40, 30, 20 and 10 per cent. The men shot in squads of ten. In all but the events this was not shot off. Kingbirds were used in all events. Following are the scores:

No. 1, 15 singles, entrance \$1:
W. A. Hill 14 W. C. Hadley 12 C. Van Ostrand 10
C. A. Mosher 14 Orange 12 A. W. Starr 10
T. F. Musselman 14 W. Foley 12 W. H. Davenport 9
W. N. Richmond 14 John Reissinger 11 W. W. Harmon 9
C. J. Wilkinson 13 C. E. Lane 11 J. Roche 9
O. L. Weller 13 C. Bruhl 10 C. J. Goodrich 8
E. O. Halzer 13 A. E. Babcock 10 W. Hill 7
E. D. Hicks 13 J. Norton 10 A. Schmitt 7
B. Wagner 13 A. Rickman 10 George Bors 7
W. O. LaForce 12 O. F. Moschler 10 C. Reissinger 5
A. D. Martin 12 F. L. Smith 10 G. Jeffrey 5

No. 2, 10 singles, entrance \$1:
Wilkinson 9 McKee 8 Richmond 6
Davenport 9 Elliott 8 Ketchum 6
Walzer 9 5
Miller 9 Hadley 7 Foley 5
Gregg 9 McVean 7 C. Reissinger 5
Wagner 9 Borst 7 Youngs 5
Sprague 9 Orange 7 Starr 5

BROOKLYN TRAPS.

BROOKLYN, Sept. 29.—The regular monthly shoot of the Atlantic Rod and Gun Club, which was postponed from the third Tuesday of the month, was shot off this morning at the West End grounds, Coney Island. The competition was for the Quimby gold badge; five men entered, each to shoot at 20 bluebirds. C. Morris won the trophy with a score of 17. D. Monsees second with 16. In the afternoon the regular monthly shoot at live birds was held for the Engeman and Bonden medals, with extra prizes, twelve men entered, each to shoot at 7 birds, club handicap. C. Morris and D. Monsees tied with 7 straight. In the shoot-off for the trophy, C. Morris took place on target, killed 3 birds, 1 killing 2 birds, 1 killing 1 bird. D. Weyer won the Bonden medal with a score of 16 out of 17. B. Voorbees taking the third prize with a score of 10 out of 12.

The postponed monthly shoot of the Ridgewood Gun Club was held to-day at Deckelman's Ridgewood Park, Long Island. The club shoots at 7 live birds each, modified Hurlingham rules, 25yds. rise except L. C. Gehring, the holder of the medal, who was handicapped 3yds. Two 7 straight, 1 killing 2 birds, 1 killing 1 bird. P. Kramer and J. Wetz. In the shoot-off Kramer killed 3 to his opponent's 2 and took the medal.

The Diana Gun Club had its regular monthly shoot at Dexter Park, Long Island. The club shoots at 15 bluebirds in two classes, 28 and 30yds. C. Minich and C. Rings tied for the first medal in Class A and shoot off. In the shoot-off Minich won by a score of 9 to 7. In Class B, J. B. Hager tied with 7 each and had to shoot off. Three times they shot, and at last Hartman won by a score of 11 out of 21 shot at all told.

FLORIDA CHAMPIONSHIP.—The annual tournament of the Orlando Gun Club will be held at Orlando, Fla., Oct. 15 and 16. Bluecock targets. First day—Team match for Florida State championship, five men per team, 100 yds. range, 10 birds per man, 10 individual sweeps. Second day—Individual sweeps, Rapid-firing system. American Association rules of 1890 to govern.

NEW JERSEY TRAP SHOOTERS.

LAST April the clubs of Essex county organized the Trap Shooters' League of Essex county, for the purpose of holding monthly prize contests for teams of six men each. The last of this series of shoots was held two weeks ago, the Maplewood Gun Club winning first prize. The league met with such a flattering success and the sport receded such an impetus that the projectors have resolved to try and extend their field, and are now perfecting plans for the formation of an organization that will excel anything ever attempted in this country. They propose to go into forming an immense league that will take in every club in Essex, Hudson, Bergen, Warren, Morris, Sussex, and Passaic counties, and bring the shooters from those sections together in a series of contests that will interest the entire country. Everything in the way of preliminary details has been carefully considered, and it is expected that the organization will be formed so that the opening shoot may be held next month.

The plan is to form what will be known as the Trap Shooters' League of Northern New Jersey, which all the clubs in the above named counties will be urged to join. These clubs number about seventy-five. Each club joining the league will pay an initiation fee of \$2, and the annual dues will be ten cents for every name on the rolls. A series of tournament shoots will be held, one on the grounds of each club until every club has had its turn. Previous to the opening of the series each club will pay \$5 or \$10 into the league treasury, the amount to form a prize fund. At each shoot there will be a contest for teams of five men each from the various clubs, each man to shoot at twenty-five artificial targets, under such rules and regulations as may be ordered by the league. The club that wins the greatest number of shoots, the club that has won the greatest number of contests will be declared the champion of northern New Jersey, and a prize valued at thirty per cent. of the prize fund will be presented to the successful men. The second, third, and fourth clubs in order will also receive prizes valued at twenty, fifteen, and ten per cent. of the prize fund.

To make the contests still more interesting, the men breaking the first score in each shoot will receive prizes in three-fourths of the contests will receive prizes valued at eight per cent. of the prize fund. A number of prizes contributed by firms and individuals will also be disposed of in a manner to be decided by the league. At each of the regular shoots there will be a number of individual contests.

As the final touches will not be put to the scheme within a fortnight, it is not possible to say what clubs will enter. There is every reason to believe, however, that there will be the best of the twenty-five clubs in the first shoot. The prospects are that the following clubs will sign the roll as charter members: South Side G. C., Woodside G. C., East Side Mutual G. C., Amateur G. C., Roseville G. C., West Side G. C., Independent G. C., Waverly G. C., all of Newark; East Orange G. C., Endeavor G. C., Leonia G. C., Maplewood G. C., Paterson R. and G. C., Rolling Springs G. C., Cherry Hill G. C., Caldwell G. C., Verona G. C., Newton G. C., Hackensack G. C., Fairview G. C., Englewood G. C., Gentlemen's H. and G. C., Jersey City Heights G. C., New Jersey Shooting Club, Durham G. C., and Sufferns G. C.

THE STOCK PATENT DECISION.

Editor Forest and Stream:

Your readers and the sporting world generally will be interested to know that the Cleveland Target Company has finally won the suit which the Peoria Target Company brought against it, for infringement of what is known as the Stock patent for traps.

This case has been in the courts for a long time, since January, 1888. In May, 1890, an opinion was rendered by Judge Ricks, sustaining the patent, and ordering an injunction and a reference to a master. In November, 1890, a petition for a rehearing was argued before Judge Brown, now upon the Supreme Bench of the United States, and Judge Ricks. The rehearing was granted by them, and the injunction which was ordered by Judge Ricks in May was dissolved upon the giving by the defendants of a bond for \$10,000. This bond was promptly given, being filed the same day. The case was heard in May, 1891, at Cleveland, before Judge Jackson, of Nashville, Tenn., and Judge Ricks. The Peoria Target Company sent down to argue its case one of the most distinguished patent lawyers in the United States, Judge Lysander Hill, of Chicago.

Judge Hill aided Major Taylor E. Brown, who had conducted the case up to this time. Judge Jackson filed his opinion at Cleveland, Sept. 24, 1891.

Judge Jackson concludes his opinion as follows: "Our conclusions, in which Judge Ricks concurs, may, therefore, be summarized as follows:

1. That defendants do not infringe the first claim of the re-issued letters patent sued on.
2. That claims 3 and 4 of said re-issued letters patent are void, because there was no accident, inadvertence or mistake in the specification or claims of the original patent, and because said claims cover patentable inventions which were not embodied or intended to be embodied in the original patent, but are for new, distinct devices which formed the subject of separate or distinct patents.

3. That if said claims 3 and 4 constituted valid re-issues, the device they describe and seek to have patented, was first invented, that is, conceived and reduced to successful public practice by A. H. Hebbard, prior to the date at which Stock invented his pivoted device, and consequently no valid patent thereon could be issued to said Stock, either under the original or re-issue application. It therefore follows that complainant is not entitled to the relief sought by its bill, and that its suit should be dismissed, with costs to be taxed. It is accordingly so ordered.

HOWELL E. JACKSON, Circuit Judge."

Sept. 21, 1891.

The effect of this opinion is, of course, to end the litigation so far as the Circuit Court is concerned. It may be regarded as a complete victory for the Cleveland Target Company, and as justifying the confidence with which they have assured the trade and the sporting community throughout the country, that they would ultimately succeed in this suit, and that the threats which have been indulged in by the Peoria Target Company might be disregarded by the trade and by all interested in trap shooting.

The Cleveland Company have endeavored to supply the trade and all those who enjoy shooting, facilities for this sport at a reasonable, fair profit, and have been satisfied with a fair manufacturer's profit. They have profited hereafter to continue in this course, and we have no doubt that they will in the future, as in the past, the continued confidence of the trap-shooting fraternity.

THE CLEVELAND TARGET COMPANY.

CLEVELAND, Ohio, Sept. 23.

ONEIDA GUN CLUB.—Oneida, N. Y., Sept. 30.—The members held a shoot this afternoon for a fine pressed leather ammunition case. This case, together with a pressed leather gun case, were presented to the club by Mr. Emigh, of New York. The contest for the gun case occurred some time ago, in which B. D. Moot had the good fortune to win. In to-day's match F. Petrie won the ammunition case; and by virtue of the handicap agreed upon, B. B. Cheney won second, a box of E. & L. linen collars, donated by Munroe & Parsons, a local clothing firm. Scores as follows, 25 kingbirds, Keystone system:

Maxwell 01111111100111011111-21
Tuttle 10100001100101100111-14
Petrie 001111111111111111-24
Devereux 00111111111111111010-15
Moot 11111111111111111111-21
Munroe 0011111111111111101011-21
Ransom 0011010101010011111101-15
Cheney 0101011101110111011010-17

LONG BRANCH, N. J., Sept. 29.—A big crowd of enthusiastic shooters gathered at Long Branch to-day, in spite of the rain, to witness the second match at live birds between Frederick Hoey, of Long Branch, and Louis T. Davenport, of New York. The shoot was for \$1,000 a side, and considerable money was wagered on the result. The traps were set at 100 yds. range, 30yds. rise, 25yds. boundary, 5 traps, and the use of both barrels allowed. The rain swept across the grounds, to the great discomfort of the contestants and the spectators. Mr. John S. Hoey was the referee and Mr. Harold Wallack the scorer. The birds were strong, quick and erratic flyers. The men shot about evenly throughout the entire match, and amid much excitement brought down their last bird and tied on a score of 38 birds. Under the circumstances the record was an excellent one, the big drop in the rain, and stones a few inches over the boundary fence. The first match between Mr. Hoey and Mr. Davenport was won by Mr. Hoey by one bird, the score being 35 to 34. A third match has been arranged for a date about the middle of this month.

INTER-STATE TEAM SHOOT.—The next Inter-State Team League shoot will take place on the grounds of the Newark Gun Club, at Newark, N. J., on the 15th inst., and the final shoot at Woodlawn Park, under the auspices of the Fountain Gun Club, on the second Thursday in next month.

TORONTO, Sept. 30.—The scores at the Victoria Gun Club's shoot this afternoon at Davidson's farm were, at 10 birds, B. Barne, 10, J. H. Hargrave, 9, Haines 7, Taylor 8, McCready 8, Swift 5, Evans 5, Knowles 8, Miles 7, Boswell 7, J. Barnett 6, Oben 6, Underwood 5.

Canoeing.

Canvas Canoes and how to Build Them. By Parker B. Field. Price 60 cents. Canoe and Boat Building. By W. P. Stephens. Price \$2.00. Canoe Handling. By C. B. Vance. Price \$1. Canoe and Camp. By T. S. Steele. Price 1.50. Four Months in a Skunk-hoe. By N. H. Bishop. Price \$1.50. Canoe and Camp Cookery. By Seneca. Price \$1.

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

CHANGE OF RACING RULES.

BUT five or six weeks remain before the annual meeting of the executive committee, and those having suggestions to make relating to changes of the sailing rules will need to submit them very shortly to the chairman of the regatta committee. It will be remembered that as the rules now stand, all proposals for changes must be submitted to the regatta committee, and by it to the commodore in the annual report of the committee, and this must be done in season to insure at least fourteen days notice in the official organs before being voted upon by the executive committee. Those having changes to propose will do well in the first place to put the amendments in complete shape, as far as possible, and then to ascertain by inquiry and by reference to year books and canoeing publications whether the same proposals have been made before and possibly rejected for good reasons. After this is done the amendment may be sent to the chairman of the regatta committee, but a little preliminary work of this kind may save much trouble and loss of time at the meeting of the executive committee. Taken altogether, the racing rules, with one important exception, are now in very good shape, though several amendments are awkwardly worded and some minor points might be improved. With Rule I. excepted, the rules can well be left for another year exactly as they stand, thus avoiding that annual change which is so undesirable.

There are two or three points which, though quite important, hardly call for special amendments to the rules, but can be as effectively dealt with through a plain condemnation in the report of the regatta committee. One of these is the "pumping" with sails which created so much stir at the meet. Another is the interference with a leading boat by one in the race, but one or more rounds astern. A mere mention of each point in the report will, with the publicity already given, serve as an effective caution, and avoid the further cumbering of the rules. Among the less important defects in the rules may be mentioned the absence of any provision concerning the bonds for the two trophy cups, now given by each winner; the use of a red flag for two purposes at the start of a race, to indicate the port course, and also the one minute signal; and the punctuation and wording of Rule XII, relating to the use of the paddle, which is now in very indefinite shape. It has also been proposed to omit all the first sentence of Rule XVI., and to permit of a change of rules at any time by means of a vote by mail. There are other minor details of wording or punctuation in which the rules might be materially improved, but at the same time no necessity of any radical changes is apparent, and it is a question whether, with Rule I. corrected, the rules might not be allowed to stand exactly as they are for at least a single season; being taken up carefully in the fall of 1892 and revised in principle and detail by the aid of next season's experience.

CLUB HOUSES BURNED.—After several unsuccessful attempts, the canoe house of the New Jersey Athletic Club, at Bergen Point, N. J., was burned one night about two weeks since. The N. J. A. C. is a large organization, formed some four years ago, partly from the old Argonauta Rowing Club, of Bergen Point, and the Viking Boat Club, of Elizabeth. The Argonauta house was moved from the hills to the new club grounds on the Newark River, just near the long bridge, and used for the shells and rowing boats of the new club, the house and boats being leased for five years by the old club, which still retained its organization. At the same time the smaller house of the Viking B. C. was purchased and moved from the New York Bay shore at Bayonne to the club grounds beside the other house, being used mainly by the canoeists of the N. J. A. C. Several attempts have recently been made to burn the house, but one at last proved successful. Nearly all the canoes and boats were burned, the building being very rapidly consumed.

About four miles further up Newark Bay, at Greenville, is the Crescent C. C., a new organization, in part a successor to the old Essex C. C., of Newark. About a year since the house of the club was burned at night, all the canoes being destroyed. A new and larger house was built last winter, with roof floats and approaches, and a new fleet of some 20 canoes was made up. At about 1 A. M. on Oct. 2 this house was discovered in flames, and was burned before any of the contents could be saved. The fire was of incendiary origin, but no motive nor clue is apparent. Eighteen canoes were burned, some being insured. The house was partly insured, and will be rebuilt.

PURITAN C. C., OCT. 4.—First race wind E. light, distance 3 miles. The war canoe Goggozenia, under the guidance of Purser Apollonio, of the Eastern Division, C. A., started the races and accompanied the fleet. The finish was in almost a cany.

Start	Finish	Remarks
Renah, J. S. Dean	1	104x36 yawl.
Iona, J. E. Hill	2	104x36 yawl.
Ilex, C. E. Cartwright	3	Disabled.
Sachem, E. S. Gilmore	4	Withdraw.
Imp, J. W. Cartwright, Jr.	5	104x30.
Iris, L. Hedge	6	104x36 yawl.
Crane, G. R. Underwood	7	12x28.
XXX, G. A. Willis	8	Withdraw.
Isis, F. B. Wheaton	9	Withdraw.

The series will be continued on Oct. 11, 18 and 25.—JAMES W. CARTWRIGHT, JR., Sec'y.

ALUMINUM FOR CANOES.—Cleveland, O.—Editor Forest and Stream: I am much interested in "Muskekwano's" article on aluminum canoes, and like him, think it would work a revolution in boating. But the cost of the metal is in my estimation a bar we will have trouble in getting over. Will "Muskekwano" kindly give us the name of the producers of whom we can buy aluminum at fifty cents per pound? I understand that the Cowles Co., of Pittsburgh, the largest producers in this country, if not in the world, list the metal in bulk, wholesale, at \$2.00 per pound. Any light on this subject will be most gratefully received by Don F. BARRETT.

MARINE AND FIELD RACES.—The open races of the Marine and Field Club will be started at 5 P. M. on Oct. 10 at the club house, Bath Beach. Messrs. Butler and Goddard, with the leading New York canoeists will compete. The club house may be reached by the Thirty-seventh street ferry to South Brooklyn, from South Ferry, New York, and the electric railway to Bath Beach.

A. C. A. AUDITING COMMITTEE.—Editor Forest and Stream: The A. C. A. committee to audit the Secretary-treasurer's accounts is hereby appointed as follows: Rodney F. Hemenway and Frederick T. Walsh, both of Lowell, Mass.—WALTER U. LAWSON, Commodore (Boston, Mass., Sept. 30).

PASSAIC RIVER CARNIVAL.—The club four race set for Sept. 29 did not take place, but in the evening a large number of canoes and boats turned out for the lantern procession, which was a great success.

DOWN THE DANUBE.—Mr. Poultney Bigelow has returned to London after a long canoe trip down the Danube with Messrs. Alfred Parsons and Frank D. Millet.

KNICKERBOCKER C. C. CAMP.—The Knickerbocker C. C. held a very pleasant camp at Egg Beach on Oct. 3 and 4, a large number of local canoeists being present.

Yachting.

Small Yachts. By C. P. Kunhardt. Price \$7. Steam Yachts and Launches. By C. P. Kunhardt. Price \$8. Yachts, Boats and Canoes. By C. Stansfeld-Hicks. Price \$3.50. Steam Machinery. By Donaldson. Price \$1.60.

INTERNATIONAL YACHT RACING.

AT the foundation of international contests lies the America's Cup. To it a debt is owed by naval science of incalculable value. It has done more than scores of industrious designers could do if they studied their own work only and compared it with similar types. And from this famous trophy we still look for further influence in designing, and in the development of thought and practice in the noble art of naval construction.

If the conditions that surround the tenure of this wonderful cup be not such as to promote friendly international rivalry, then let the duty and wish of every spirited American yachtsman be to modify the "deed of gift" so that soon our transatlantic friends may visit us again, and stir us to get better and higher work.

Let us place the Cup within easy range of all the world, and if it be lost we shall have gained untold times its value in incentive to still greater improvement. But as we stand to-day as regards the America's Cup, we can easily afford to be lenient, with a yacht like the Gloriana to defend it, and a corps of designers well attuned to the "high pitch" of the requirements of yacht designing. —Lewis Herreshoff, in North American Review.

A CORINTHIAN CRUISE.

[Concluded from Page 219.]

WITH sundown came a breeze, and our sails once more filled and we were off. After dark I lost my bearings and made the mistake of heading for the Light for that of New Haven. As the wind was extremely light and almost dead, and we due south of the above light, it was a long beat. However, just as we got our supper and were beginning to admire our night sail over the now smooth waters, and watching the port and starboard lights alternately as we changed from tack to tack and noticing their light on our sail, we were suddenly disturbed by seeing the lights of another vessel off our port bow, evidently a steamer.

She was coming dead for us and the wind too light for us to cross her bows in time. Those on board must have seen our lights, but they never changed their course, and as things began to grow desperate the fog horn was vigorously blown. Oh! how relieved were we to hear a voice from the darkness cry "All right," and the course of the tug (as she turned out to be) changed. I hailed them for information as to where we were, for I had an idea in my head that it must be Faulkner's Island, and light we were running for, but the only information I got was, "You'll find out if you go in there much further." I was angry and alarmed, and doubly so when I saw a barge in tow of the tug coming right for us. Much further in and we would have struck the barge, but the wind blowing a little stronger I put the helm hard down, and as we ran off before it out of danger a cheery hail from the little looking barge came over to us. "Look out, captain, we have six tows behind us." "Thanks," shouted I. "Can you tell me where we are?" Again his cheery voice answered, "About in the middle of the Sound, opposite Faulkner's Island." Thus was my conviction strengthened that we were running into danger, and re-living all importunities to make a harbor, I made preparations for a night on the waters of the Sound.

As the reefs began to go, I made up my mind, and we glided along over the dark waters at a fair rate. I examined the charts, and the my brother handled the wheel, and found to my satisfaction that we could run all night on the marked course and not fall into any trouble; that course not changing from the time one enters the Sound until between Sands Point and Stepping Stones Lights. It is somehow always cold on the salt water, and although I added a warm blanket, I never suffered so much with the cold as that night. We had, too, to keep our eyes on the charts and the Sound steamers. Those we could tell by the throbbing of the paddles while yet some distance away, and although a steamer is supposed to give way to a sailing craft, I determined to take no chances, and as soon as one appeared near us I changed our course and ran due south for some of the twinkling lights along the Long Island shore, and as soon as the steamer's port light disappeared from my sight I resumed our course. Several of these maneuvers were gone through with during this long night, but we were luckily no sailing craft to trouble about. These are more dangerous, I think, than a steamer, their movements being so silent.

While I shivered and chattered over the wheel, the others slept, although my noble little wife was incessantly calling to me to let her come up on deck and assist, which I declined for good reason. Her husband and brother and myself, however, were in our charge, showing him the course to steer and giving him directions to call me in case a steamer came along or the wind freshened. I went below and turned in for half an hour, and I don't know when I enjoyed so short a time asleep as I did that. It is most impressive this sailing by night, especially on moonless nights. The stars peep down on the dark waters, framed in by the black outlines of the land, and the sea is so calm that the business of the situation by their silent twinkle. It strikes one to the heart, and a twinkle would be a relief, if it were possible. The utter sense of loneliness is oppressive. The wind faintly sighing through the rigging sounds like the breath of sleeping Night, and the faint splash of the waters is most soothing and at the same time a lonesome sound. The distant light-houses, with their flashing lights at intervals, seem like sentinels on the dark sea, who is having a lot of sport over one's lonesome and dark journey on the waters. Bah! Give me the sunlight, give me a gale; but after dark I don't want to sail.

As daylight advanced I discovered to my view a mass of black clouds in the east, which disquieted me, but as we were off New Haven I awoke our sleeping party to view the sunrise, only my wife responding, and the sun being at that port. Being well to the west of New Haven, we coasted in, as we approached, and announced it safe, and for such an ugly, unapproachable harbor we did well. We ran in though a trifle too close to the breakwater and took the ground, but a strong breeze from the east coming up, I brought the boom amidship and laying well over we slid from the treacherous mud-bank, and gliding up the harbor came to the anchor off the head of the harbor, where the channel, which is not very wide anywhere, a trifle out of your course and plunges you on a mud-bank. We came to anchor at 9:30 A. M., having been sailing just 24 hours, and after breakfast all turned in for a hearty sleep.

Monday and Tuesday were spent at New Haven, which, in spite of its hot and muddy harbor, we looked on as a veritable haven. Wednesday morning at 8:30 we sailed intending to make Hempstead Harbor. The wind was light, but after getting past Stratford Wedge Lighthouse we found it a trifle stronger, and we were enabled to bowl along at a respectable speed. The captain, mate and crew felt well after their long rest, and much skylarking took place from pure exuberance of feeling and spirits, and happily the day passed till our misfortunes later put a damp on our ardor. We arrived off Stratford Light. On looking around we found Stratford Shoal Lighthouse, a solitary tower in the middle of the Sound.

It was now approaching dinner hour, but on looking into the larder we found that unless we made Bridgeport, now almost abeam, our dinner, supper and breakfast must consist of naught but crackers and coffee. This makes a capital lunch when sailing, but is hardly stable enough food on which to work a yacht. Much thought as the hours wore on, they had to follow, and while the Captain felt to work to study the harbor and set down on the chart. While reaching for the above city we passed numerous fishermen busily engaged, while their boats sailed along with scarcely any guidance. We thought at first a yacht race was in progress, and next that they had escaped from their moorings, for a number of them looked deserted. We had a little brush with one of the boats, but they had the advantage of a topsail we reached the red buoy off the shore first, and passing in between this and the light considered ourselves in the harbor. We were fooled nicely. On passing the light set on a heap of rocks either naturally or artificially placed there we, in accordance with our chart, kept to starboard of the first beacon. The second beacon, so said the charts, could be passed on either side, and I foolishly, as there was no vessel coming in to follow, took the port side, and while taking in our stowaway were made aware of our mistake by a scrape and a sudden jar. We were aground.

Aground again. I was mad. I tried to lay the yacht over so she would glide off to starboard, where by sounding with the boat hook from our tender I found sufficient water. A fisherman now arrived on the scene and informed me that I kept 8 ft. to

the starboard of the beacon I should have passed safely. Bitterly I lamented my mistake, also my error, in not going into the beautiful harbor of Black Rock, just a short distance below, where it is pleasant to lie. Fearing the stores would close before we got off, I sent my wife and brother to town in the tender and remained to take advantage of the tide. The tide proving too slow in coming in I clapped on all sail, and trimming the sails all midships hoisted the flag over the cabin and began to make little hops like a frog, but up to starboard directly for the beacon. After having played bullfrog and leaped along the bar for some distance until the beacon was unpleasantly near, I put the wheel hard to starboard and like a fairy she glided off to port into deep water. I ran up the river until I arrived at a place where I saw a couple of yachts anchored, and then came up in the wind and dropped anchor. Long before my wife and brother arrived I had all the sails furled and everything snug. After leaving New Haven and spending half a day in deep water and half on a bar we rested once more in deep water.

Friday, July 3, we left Bridgeport about 12 o'clock. Our late start was owing to a warm oppressive calm which prevailed to that hour. Owing to the light wind it was with some difficulty that we at last got out of the harbor, but after passing Bridgeport Light a breeze came up from the southeast. From the appearance of the sky it was plain to be seen that the weather was a squall would arise. We passed by the beautiful park situated along the shores of the Sound, passed Fairweather Island Light, the Penfield Reef Light and then once more resumed our old course.

Starting so late in the day and wishing to be at anchor at sundown, we of course could not take a very long run. We passed the light of Bridgeport, on the left, the largest of which, called Sheffield Island, is Norwalk Island Lighthouse.

Upon the Long Island shore directly opposite is Eaton's Point Light; this light has the prettiest situation of any along that shore. From the surface of the water a yellow bluff runs upward to the height of 80 or 90 ft. Above this commences a green rolling slope, on the summit of which is built Eaton's Neck Lighthouse. This is a stout, white, painted white, with a black top, the keeper's dwelling is also painted white, and the red and white peculiar appearance of its windows, which seem from the distance to be black. The wooded slopes to the west of the light make an admirable background of green, which throws the lighthouse into bold relief.

It was now beginning to look threatening to the southwest, but we were bound to beat on. Oyster Bay we still kept on our course. We had nearly reached Lloyd's Neck, the largest of the islands, so fast I thought best to make for Huntington Bay, toward which a number of working schooners were making for shelter. We accordingly began to beat our way in, but when about off East Point the storm struck us nearly abeam, we heeled well over under the furious blast, but hastily throwing her head to the wind and leaving the wheel and maulsheet in charge of my wife, I ran forward and

Seeing it would take some time for us to beat into the bay and not knowing how hard the wind might blow, I took three reefs in the mainsail and set the No. 2 jib. Under this reduced sail the wind, though blowing furiously, was powerless to harm us, and fortunately the rain had not yet commenced. It was now too dark and stormy to give much attention to the chart, but the hasty glance which I gave to the compass and the light on my mind. However, I was a cross and aggressive sight. The storm was now passing and served as a guide, although they did not run very far in. We were in as close to the dark and wooded shore as we considered was safe, and dropped anchor in about 3 1/2 fathoms of water.

We had no sooner furled the sails and made all snug for the night, than the rain began to come down in torrents and the thunder and lightning of the lightning to flash almost incessantly. It was a strange and aggressive sight. The storm was now passing and served as a guide, although they did not run very far in. We were in as close to the dark and wooded shore as we considered was safe, and dropped anchor in about 3 1/2 fathoms of water.

We were soon reminded that it was the Fourth of July by the numerous flags displayed by the working schooners and steamers and by the sullen roar on shore of cannon. We soon had our ensign floating on the wind at the peak, saluting it as it arose by a discharge from a revolver. Our first tack brought us over to the Sound, but when we came about we lost nearly all we made. We took a cross and aggressive sight. The storm was now passing and served as a guide, although they did not run very far in. We were in as close to the dark and wooded shore as we considered was safe, and dropped anchor in about 3 1/2 fathoms of water.

Early the next morning we awoke to find the storm exhausted and the sun shining. The wind was due west and blowing pretty strong. We determined to attempt the passage, and by nine were under way. An exciting race with a sloop yacht followed until we arrived in the Sound. Had we a topsail we would have beaten her, but as it was we hung right on to her quarter until we were within a few courses, she reaching for Oyster Bay and we for the north shore.

We were soon reminded that it was the Fourth of July by the numerous flags displayed by the working schooners and steamers and by the sullen roar on shore of cannon. We soon had our ensign floating on the wind at the peak, saluting it as it arose by a discharge from a revolver. Our first tack brought us over to the Sound, but when we came about we lost nearly all we made. We took a cross and aggressive sight. The storm was now passing and served as a guide, although they did not run very far in. We were in as close to the dark and wooded shore as we considered was safe, and dropped anchor in about 3 1/2 fathoms of water.

We found quite a fleet there, The Veto, Magic, Nimrod, Loando, Stella, Diana, and later Nirvana. We were enabled to enjoy the scenery around us on account of our early anchorage. The hotel, situated on a rock extending into the water, rocky islets on all sides, the steep, rocky shore to the west crowned by farmhouses and waving crops of grain, and off toward the south a long, narrow strip of land, the water was very deep, and the land, which is composed of two green hills about three-quarters of a mile apart united by a narrow strip of land. On the western or higher part of the island is the lighthouse, a gray dwelling surmounted by a white lantern. Between Great Captain's and Little Captain's Islands is a chain of dangerous reefs. We lay around that evening on deck until after 12 o'clock watching the beautiful display of light and color on the black background of the sky, but that hour found us ready to turn in.

Sunday, July 5, we lay over enjoying life, and Monday and Tuesday we were compelled to stay on account of a fierce gale of wind from the west. One yacht lying near us on attempting to get under way, with three reefs in mainsail and small jib, was whirled round and round till she finally got under headway, and secured a good place, capable of shelter for a large number of vessels.

Wednesday opened fine, but with no wind. Toward noon it began to breeze up, bringing with it clouds which threatened rain. However, we got under way about 12 o'clock, and bidding our friends adieu as we passed, continued on our cruise toward New York. With a light southeast wind we ran out past Great Captain's Island and Parsonage Point into the now narrowing Sound, and resumed our old course. We were soon off Hempstead Harbor, a good harbor place, capable of shelter for a large number of vessels, and next passed between Sand's Point Light and Newton Rocks Light, where we changed our course to S. by W. 1/2 S. We got safely by Gangway Rock, Barker's and Hewitt's Points, but had no sooner passed Stepping Stones Light than rain began to fall, but luckily the wind came up a trifle stronger, and not desiring to lose such a favorable breeze we tacked by George's Neck and passed East Point at a good pace. As the tide of vessels were also taking advantage of the wind, I suppose all joined with me in my prayer that it would last us through Hell Gate. We arrived at the last mentioned place in time to take advantage of the tide, but we had only got into Little Hell Gate when puff and the wind was gone. A slight wind came up later from the northwest, but it was too late; the tide had turned and was slack. No sooner were we off Blackwell's Island than the wind again became so light as to barely move us. The tide luckily was ebbing and going our way, so, keeping out of the way of boats, rocks and wharves, we drifted down the east channel and down the East River till we again caught a breeze somewhere above the Brooklyn Bridge, and passed under that mighty work of genius with good headway. Making our way around the Brook-

lyn side, we came to anchor about 3 o'clock off the foot of Twenty-ninth street.

Here we lay for three weeks, making an occasional trip to the Hook, lying off the beautiful Highlands and in the Horseshoe, making our cruise just seven weeks. A more glorious time I never spent, and when I put the yacht in a basin for the winter and with solemn services lowered her flag and put her out of commission for this year, we all made up our minds that our next cruise should be longer still. L. J. S. PHILADELPHIA, Pa.

STEAM YACHT RACING.

THE progress of steam yacht racing for the past five years has not been so rapid and prosperous as to give cause for satisfaction to the friends of the sport, the amount of talking and writing having always been very large in proportion to miles steamed over regular courses; but the failures of previous seasons sink into insignificance beside the fizzle which comes as a finale to the discussion and agitation that has been inflicted on a helpless public for the past two months.

The American Y. C. has made a vigorous effort to establish steam yacht racing on a permanent and satisfactory basis; it has held several races; it has now the most costly cup ever offered, open to international challenge; and it is ready at all times, as is the case with present instance, to give prizes and carry out all arrangements for any parties desiring to enter. Its organization in 1883, the club has done all that was possible to encourage and promote racing.

Unfortunately the few races which have really taken place have not proved entirely successful, and of late it has been very evident that steam yachtsmen, with possibly one or two exceptions, do not wish to race, and will not start their boats. For several years no annual regatta has been held, and the one announced for last July, and for which a number of yachts were reported as entered, was postponed from the original date on account of a fog, which has not yet lifted, from all appearances.

So far as the regular fleet of large steamers is concerned, it is an indisputable fact that they will not race, and the reason therefor is not hard to find. No boat that is steaming about for season after season with a 30-knot clip on its shoulder is going to venture anywhere near an accurately measured course of 40 nautical miles, with a chronometer at each end, and the inevitable certainty of a published record of 13 to 15 knots in cold type.

There is a very wide difference in the standards of speed of the steam yachtsman and the sailing yachtsman. The standard of the former is absolute; he takes the best recorded time, of 27 knots or more, and calmly asserts that his own craft is good for, say, 18 to 26 knots, according to circumstances. The sailing yachtsman has, very fortunately, no speed records and no absolute standard, but everything is relative. He may assert most unblushingly that his craft can beat Volunteer, Gloriana or Minerva, but he does not at the same time claim a speed of 15 knots as her regular performance, and consequently is not afraid to race her at all. There is a polite and pleasing fiction about the actual speed of steam craft which would certainly be dispelled by racing; and it is not to be expected that owners as a rule will make a sacrifice of their boats on the altar of science.

So far as the larger craft, which are really built for other purposes than speed, are concerned, this does not matter much. While much might be learned from systematic and constant racing, there is still an unlimited field for improvement in the design and construction of their usual work of cruising and ordinary fast running, and nearly all the intricate problems of steam engineering and marine propulsion can be studied as well under these normal conditions as under the special ones incident to racing. Steam yachts are now so numerous, and the rivalry between different owners and crews is so strong that more or less competition exists without the aid of the set races and prizes which are necessary in the case of sailing craft.

There is, however, a type of steam yacht which is really racing is a necessity, the craft of 50 to 100 ft. length and built exclusively for speed, other considerations being for the most part neglected. A number of these yachts are now about New York, the Norwood, Vamoose, Now Then, Yankee Doodle, Javelin and others less known, and their performances, or rather promised performances, have been kept before the public for two months, until the very names of them have become a household word.

There is no question that all of the boats mentioned are very fast, some in all probability are capable of making a very creditable record, and a bona-fide race with three or four starters would be of interest to yachtsmen and to the general public, and possibly of real value from a scientific standpoint. From all appearances, however, there is no probability of such a race taking place, and the matter is apt to be dropped as it began, in idle boasts and pointless correspondence. The miserable fact of the matter is, however, no plausible explanation has yet been given, is enough to throw discredit on the whole proceeding, but it is only one of the many obstacles and hindrances which have arisen.

For some time these flyers have indulged in the safe and inexpensive pastime of racing various passenger steamers engaged in their regular routes, and when this amusement palls, a series of negotiations and correspondence follows, until the matter has gone so far that a race is actually arranged, the real trouble begins; one boat breaks down when after a year's preparation she is on her way to break the record for one mile, another certain winner cannot procure a license in time, a third flyer has lost her owner and cannot enter until she finds him; while to cap the climax, when every obstacle is removed, and a race seems inevitable, the two yachts get out of the light of day, and the nonsensical opportunity turns up from nowhere in particular and wrecks one of the contestants.

The conduct of one of the parties, the owner of Vamoose, has been dignified and sportsmanlike throughout. His yacht has been ready for some time, and he is evidently anxious for a race, his latest offer being a start of five miles to any other Herreshoff yacht over the water and the course. Unfortunately, however, the conclusion is forced on one after reading the nonsensical talk that has filled the daily papers that most steam yachtsmen would rather talk than race.

In all that has been published there is absolutely nothing of technical value, or of other than personal interest; all discussions of triple or quadruple expansion, composite construction, pitch and trim of the keel, and the like, have been the result of the presence of questions of ethics and etiquette, with the nonsensical "Git That" was justified in inviting the steward of the "Ah There" on board the former craft; what is the private opinion of the owner of the "Move On" regarding the designer of the same boat. The fact that the "Stay There" has broken a gauge glass is exploited at length in the daily papers, with diagrams of the break and the gauge, and the crew; while the bumping of the "No Water" against a pier head, with the loss of a hull plate, called for big headlines and several columns of correspondence. The correspondence is, by the way, one of the most remarkable features of the entire show, amounting in the aggregate to a "Steam Yachtsman's Complete Letterwriter."

Taken as a whole, the sensation that has been worked up by owners, crews and the daily papers is not racing, is not yachting, and is not discernible to all concerned.

If steam yacht racing is to be restored to that position which it has certainly lost of late, its friends must put a speedy end to one-sided trials of speed against boats which are not racing; to irrelevant and sensational correspondence and idle challenges; to interviews and assertions by irresponsible employees; and, above all, they must show at least one bona fide race in which some one shall win and someone else shall be beaten without crying about it.

KILL VON KULL Y. C. Oct. 3.—On Saturday a special sweepstakes for \$100 each was sailed between the four catboats Bon Ton, Ges So, Torment and Shore House, under the management of the Kill Von Kull Y. C. of Staten Island. The course was ten miles to windward, down the Bay, from Robbins Reef Lighthouse, and return. When the race was started, at 12:42 P. M., the wind was quite fresh, and the Killworth boat Ges So, sailed by Capt. Joe Ellisworth, was over canvassed. The times were as follows:

	Start.	Turn.	Finish.	Corrected.
Torment.....	12 42 10	2 20 15	4 46 14	4 04 24
Shore House.....	12 42 27	2 29 58	4 47 35	4 04 40
Ges So.....	12 43 15	2 40 05	4 54 36	4 05 25
Bon Ton.....	12 41 45	2 35 36	4 41 43	4 03 38

Bon Ton beat Torment 56s., Shore House 1m. 2s., Ges So 2m. 4fs.

LARCHMONT Y. C.—The final race at Larchmont took place on Oct. 3 between Viator and Rebecca, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Rebecca.....	11 35 00	6 02 51	6 27 51	6 27 51
Viator.....	11 29 45	5 23 24	6 43 09	6 40 09

The clam bake and entertainment in the afternoon and evening closed the season.

OWEENE.—The firm of A. B. Turner & Bro., brokers, of Boston, of which Mr. A. B. Turner, owner of Owenee, is the senior member, made an assignment on Oct. 2. Owenee has finished her racing and is hauled up at Lawley's.

GANNET, yawl, recently sold by Mr. Morgan, is the property of Mrs. C. A. Prince, wife of the half owner of Beatrix.

THE GREAT STEAM YACHT RACE.

THE great steam yacht race, under the management of the American Y. C., over its 90-mile course from New London to Milton Point, for a purse of \$500 offered by the club, was set for Saturday last. The entries were Vamoose, Norwood and Yankee Doodle, but the latter boat did not come to New York from Philadelphia owing to some difficulty over a license. Great preparations were made at both ends of the course, many outside steamers being ready to carry spectators. On Friday morning as the Norwood was steaming down the Sound for New London in charge of Collis S. Eaves, a licensed pilot, in broad daylight and in clear weather, she ran hard aground on Penfield Reef, smashing her wheel and bending the shaft. She put into Bridgeport and was later taken to Branchport for a new wheel and general repairs. Vamoose was ready at the starting line, but declined to make a record run, as proposed by Norwood's owner, and the race was postponed until the Norwood can be repaired, which will take from three to six weeks, when it will come off if nothing happens to prevent.

BEVERLY Y. C.

THE 181st race, 3d championship, was sailed Sept. 19 at Marblehead. As usual there was a smashing breeze all morning, which by noon had died down to a drifting breeze. Hawk was on hand, but refused as usual to take a walkover. The first leg was a free run to Curtis Point. Wanda made an excellent start. Kiowa was slow, 20s. later, followed by Marchioness and Kraken. Kraken with a walkover put out a long lead. Marchioness with her big sail fanned along fast. Kiowa took the lead. On the second run, a long and short leg to Bowditch Ledge, Wanda tacked to front with Kiowa after her, both lost to the others; they rounded, Kraken, Kiowa, Marchioness and Wanda, the latter 240m. behind Kiowa. It was a jam on the wind home, with the air dying out, only the strong ebb tide allowed the boats to make it on one hitch. Kraken put out a long lead. Kiowa gained handsomely on Wanda, while little Marchioness crawled up on Kiowa at the finish in a drift, her actual starting time was taken by arrangement, others were timed at the gun:

THIRD CLASS—CATS.			
	Length.	Elapsed.	Corrected.
Kiowa, W. Lloyd Jeffries.....	22.07	2 16 28	2 05 25
Wanda, R. C. Robbins.....	22.09	2 20 40	2 09 46

THIRD CLASS—SLOOPS.			
	Length.	Elapsed.	Corrected.
Kraken, Percy Chase.....	26.03	2 09 15	2 11 20

FOURTH CLASS.			
	Length.	Elapsed.	Corrected.
Marchioness, C. E. Hodges.....	26.06	2 16 06	

Kiowa, Kraken and Marchioness take prizes. Kiowa and Marchioness take and hold pennant, and Kraken ties Hornet.

The 182d race, third Buzzard's Bay championship, was sailed in a good northeasterly breeze Sept. 26, single reef at start, whole sail at finish. Violet had a sail over in the first class. Puzzle having won pennant in third, only Daisy and Eina fought the prize, latter winning by less than a minute. In fourth class Cat and Edith each had a leg, and made a hard fight, Cat getting pennant by 48s. The race of the day was in the second class, Mist and

Surprise each having a leg, every inch was fought for, Anonyma winning by 6s; the sail off will take place Oct. 3. Courses—No. 2, 10 1/4 miles for first and second classes; No. 6, 7 1/4 miles for third; No. 9, 5 miles for fourth. Wind N.E. by N., good breeze:

FIRST CLASS.			
	Length.	Elapsed.	Corrected.
Violet, Tobey Club.....	27.06	2 11 41	2 12 17

SECOND CLASS.			
	Length.	Elapsed.	Corrected.
Anonyma, F. L. Dabney.....	27.01	2 11 12	2 01 12

THIRD CLASS.			
	Length.	Elapsed.	Corrected.
Eina, John Parkinson.....	22.10	1 43 15	1 32 26

FOURTH CLASS.			
	Length.	Elapsed.	Corrected.
Cat, Bruce Clark.....	19.03	1 09 36	59 54

Winner first prize: First class, Violet; second class, Anonyma; third class, Eina; fourth class, Cat. Winner second prize: Second class, Surprise; fourth class, Edith. Champion pennant, actual time: First class, Violet tying Mattie; second class, Anonyma tying Mist and Surprise; third class, Cat. Judges, T. S. Edmunds and A. H. Hardy.

STATEN ISLAND Y. C., Oct. 3.—The Staten Island Y. C. sailed a special race for catboats over the regular 12 mile course on Saturday, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Danneberg.....	1 52 40	5 28 40	3 36 00	3 21 18
Mamie S.....	1 52 50	Did not finish.		
Amy.....	1 53 20	5 26 50	3 33 30	3 21 02
Cygnat.....	1 53 26	Did not finish.		

Amy wins by 16s. Mamie S. led, but when near the stake boat was becalmed and could not cross.

SAVIN HILL Y. C.—On Oct. 3 a race was sailed by the Savin Hill Y. C. between Fannie and Ustane, the times being:

	Start.	Finish.	Elapsed.	Corrected.
Fannie, F. P. Sharp.....	3 09 15	5 10 59	2 01 44	
Ustane, S. N. Small.....	2 08 20	5 10 15	2 01 55	

One of Fannie's crew was knocked overboard by the boom, but was picked up safely. Fannie has won five firsts and one second for seven starts. The judges were Messrs. Frank Driscoll and W. H. Besslerick.

NEWPORT CATBOATS.—On Oct. 3 a regatta for catboats was sailed off Newport under the management of Vice-Com. E. D. Morgan, N. Y. Y. C., who presented the prizes, three cash prizes in each of three classes, with a pennant for fourth and a life buoy to the last boat in. The wind was strong S.W., the courses being from the Torpedo Station around Castle Hill Buoy and around

Byre's Island and return, 11 and 18 miles. The winners are: First class, money prizes: Rainbow, Three Sisters and I. M. C.; pennant, Bessie; life buoy, Jennie. Second class, money prizes: Four Brothers, Lizzie and Martha; pennant, Annie; life buoy, Zephyr. Third class, money prizes: C. C., Osprey and Jerroba; pennant, W. A. Card; life buoy, Shamrock.

On Oct. 8 a second race was held for cash prizes given by the summer residents of Newport. The wind was N.E. with a heavy sea. The times were:

FIRST CLASS.			
	Length.	Elapsed.	Corrected.
Honoré.....	3 32 12	Amelia.....	3 39 21

SECOND CLASS.			
	Length.	Elapsed.	Corrected.
Bessie & Essie.....	3 36 43	Three Sisters.....	3 39 12

THIRD CLASS.			
	Length.	Elapsed.	Corrected.
Four Brother.....	3 42 12	Annie.....	3 49 03

FOURTH CLASS.			
	Length.	Elapsed.	Corrected.
Martha.....	3 48 16		3 51 38

FIFTH CLASS.			
	Length.	Elapsed.	Corrected.
C. C.....	2 36 19	Jerroba.....	2 39 42

SIXTH CLASS.			
	Length.	Elapsed.	Corrected.
Gordon.....	2 38 51	W. A. Card.....	2 42 09

Ethel and Four Brothers fouled, Ethel afterward springing her mast.

H. L. BURDICK.—Letter here for you from "Forked Deer."

E. L. E., New York.—The best book for your purpose is "Theoretical Naval Architecture," by Thearle, price \$4, two volumes.

J. R. P.—In West Virginia the deer season is from Sept. 15 to Dec. 15, use of dogs not permitted. Wild turkey, Sept. 15 to Jan. 1; quail, Nov. 1 to Dec. 20; ruffed grouse, Nov. 1 to Jan. 1. Forbidden to export deer or wild turkey.

P. K.—I have a rifle which I desire to stain or brown. Please give receipt and directions. Ans. Take 1oz. muriatic tincture of steel, 1oz. spirits of wine, 1/2oz. muriate of mercury, 1/2oz. strong nitric acid, 1/2oz. blue stone, 1qt. water. Mix well, and allow to stand thirty days to amalgamate. After the oil or grease has been removed from the barrels by lime, the mixture is laid on lightly with a sponge every ten hours. It should be scratched off with a steel wire brush night and morning until the barrels are dark enough; and then the acid is destroyed by pouring on the barrels boiling water, and continuing to rub them until nearly cool.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price \$2.50. For sale by FOREST AND STREAM.

BLUEFISH, WEAKFISH and STRIPED BASS

Can be caught in any of the waters around New York City. Big bluefish are in large numbers along the coast. We can supply the tackle. You can do the rest.

Call and examine our stock, or send us 10 cts. to cover postage, and we will mail you our 136 folio page illustrated catalogue.

ABBAY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

PRICES

We seldom mention prices when advertising. Don't believe in it. Our gun man, Mr. Holt, says he could fill this paper full of prices—interesting prices, enticing prices, entrancing, reliable, attractive, tempting, original, cash-with-order prices. Wouldn't know where to begin or leave off. Lots of time to write letters, though, no matter how many questions you may ask.

OUR CATALOGUE—YOU SHOULD SEE IT. Fifteen Cents pays postage

MONTGOMERY WARD & CO., 111 to 116 Michigan Avenue, Chicago

Notice to Fishermen. Cut Prices for 1891.

Here I am again as usual cutting the prices of Fishing Tackle. Low prices and good quality of goods increases my business. It will pay you to buy your tackle in Brooklyn.

CHARLES DALY HAMMERLESS SHOTGUN

WITH OR WITHOUT AUTOMATIC SHELL EJECTORS. Important Notice!

Instead of giving the dealer larger discounts we have decided to give the sportsmen the benefit of a reduction, and have concluded to make extraordinary low **Net Prices** on the **Charles Daly Guns**.

While making this reduction we might mention that the high standard of workmanship for which the Daly gun has always been renowned shall be retained. We have expert testimony that these guns are equal in workmanship to the celebrated Purdey guns, and far superior to all other SO-CALLED London makes, such as Greener, Scott and Westley Richards. An examination will soon convince the unprejudiced customer. They are more conscientiously made, more beautifully finished, handsomer in appearance, with shooting qualities unsurpassed, in fact far ahead of guns costing \$100 more.

Should you live in or near New York, we would invite you to call and examine our stock and be convinced.

If you live anywhere else in the United States and your dealer has none in stock, insist upon his ordering one, or order one direct from us. **Send for Catalogue.**

ANSWERS TO CORRESPONDENTS.

OCTOBER VOICES.

ON the marsh and in the woods one notes in October how few and how lessened in variety since the spring and early summer have become the voices that so incessantly stirred the atmosphere in those tuneful days.

Here, where then was heard continually the mating calls of many waterfowl, the booming of the bittern, the muskrat's whimper, the gurgling jangle of the black-birds, ceaseless as the babble of brooks, the resounding chorus of the bullfrogs, twitter of swallows and innumerable voiced expressions of happy, teeming life, the strained ear catches only the raucous quack of some dusky duck calling its dead or scattered comrades, the startled squawk of a lingering wood duck, the ejaculatory squawk of a rising bittern, the sudden outcry of a rail, alarmed by splash of oar or careless tap of paddle, and perhaps the clatter of a kingfisher, faring with jerky flight along the winding course of his fishing route.

These only now, with many intervals of silence, or if the marshes have been much harried by sportsmen, not even one of these, nor ought else to break the silence unless some blundering bumble bee comes droning aboard your craft, him perhaps that you saw in the frosty morning benumbed on the clover blossom where he supped.

Almost every songster of the woods has departed. Of those that stay or linger, only the chickadee remembers his love notes, and rehearses them but rarely. The robins tarry at the feast of wild cherries that now hang thick in black racemes among the orange leaves, but few and brief are the notes of the busy flocks. The tap of the woodpecker is a slow, laborious sound, never the rattling note that echoed through the woods in mating time,

and the yelp of the smaller kinds is brief and infrequent, though now and then a great log-cock marks the course of his loping flight with a loud cackle.

The voices that oftenest strike the ear are the clamor of the crows, the squalling of the jays, the bark of the gray squirrel and the scoffing of his little red cousin, never too busy with his nut rasping to indulge in an outburst of cynicism.

Louder than any of these, not a sound of nature, yet so common to the season that it almost seems one to the accustomed ear, from marsh and woodland bursts the sudden roar of guns, now deafeningly near, now faintly afar like a fitful puff of wind.

As one idling under October skies listens to these miniature thunder-claps, he is apt to guess upon what game the brief storm here and there is breaking. Here in the gaudy upland, was it a ruffed grouse bursting up like a gray rocket through the gorgeous foliage, the bright leaves fluttering down like sparks behind him? or was it a hare limping through the yellow tangle of frosted ferns? or a squirrel skulking in the topmost twigs of a nut tree?

Or there on the broad level of the marsh, where a long moment before the report strikes the ear, one sees the jet of smoke cast up and floating away in a dissolving veil, was it a duck splashing to flight from its sedgy cover? or a rail forced to reluctant wing from his lilypad raft? or a flock of teal following with swift pinions the bends of the channel? or was it a snipe fluttering out of the rush-shaded ooze and zigzagging away across the sunny marsh? or only a poor heron or lagging bittern?

Any of these it may have been, but whatever and wherever each sudden boom marked a moment of some one's expectation, some one's satisfaction or disappointment and some thing's sudden pang of death or exultation of escape.

With or without a gun it is good to be afield or aflood in these glorious days.

SHALL THE ADIRONDACKS BE STOCKED WITH BASS?

AT the last meeting of the New York Fish Commission President Blackford reported, as the result of recent investigation in the Adirondacks, that pickerel have invaded the Upper and Lower Saranac lakes, where they are rapidly increasing and constitute a serious menace to the trout supply. It is supposed that these fish were introduced here maliciously, as other pickerel were some years ago put into Meacham Lake, where the disastrous consequences to the trout fishing are well known. Commissioner Burden reported that pickerel had been found this year in waters near the Sacandaga hatchery, and he expressed a conviction that it was only a question of time when the entire Adirondack system of connected waterways would be invaded by this predatory species.

The presence of pickerel means the ruin of angling, for pickerel prey on the trout and will in time exterminate them. The Commissioners have been appealed to to exterminate the pickerel. But this is something they are utterly powerless to do. Once introduced into a water, the fish is there to stay; it cannot be exterminated by any known device of man. And more than this, it is extremely improbable that the Commissioners will be willing to furnish trout fry for waters cursed by the pickerel pest; for to plant infant trout would only be providing the pickerel with food.

Confronted by the present deterioration and ultimate destruction of trout fishing attractions in these waters of the Northern Wilderness, some of the persons most nearly interested are seeking a substitute. If the trout must go, the next best thing will be some other game fish; and the species best fitted to maintain itself by a natural *modus vivendi* in the same waters with pickerel is the black bass. Pickerel and bass observe an armed truce, live and let live, and thrive and increase together. Thus where it is no longer practicable to have trout fishing there may be bass fishing.

In reply to an inquiry by Dr. Samuel B. Ward respecting the stocking of the Saranac waters with black bass, President Blackford has cited Sec. 19 of the game law, which provides that no one shall put into the Adirondack waters any fish unless "indigenous to the particular water where placed," except non-preying or non-destructive fish which may supply food for trout. This law clearly rules out the black bass; if we are not in error the enactment of the statute grew out of the indignation which followed

Seth Green's introduction of black bass into the Raquette Lake in 1872 to the ruin of the trout fishing.

While the law is an excellent one, a modification of it might be wise to meet this emergency, and the Fish Commissioners might well be authorized to stock certain designated waters of the Adirondacks with black bass. It is probable that agitation to this end will be undertaken next winter to secure needed legislation. We understand that the Fish Commissioners look with favor on the project of Adirondack bass stocking; and we would be glad to have the opinion of others respecting it.

SNAP SHOTS.

IF a life spent among the wildfowl shall count for anything, Capt. Edward B. Gallup, of Havre de Grace, Md., is entitled to be heard when he talks on "the duck question." Born on Spesutia Island in Chesapeake Bay, world-famous for its canvashacks and redheads, and as he tells us raised on birds and fish, he has for more than a half-century been familiar with the conditions of Maryland wildfowl grounds. The interpretation of his ingenious dream, printed on another page, is in brief that the ducks are scarce because there are so many gunners in pursuit of them by day and by night, on water and on shore, by methods legal and in ways unlawful, by "sports" and by market-gunners—a destructive host which Maryland's voluminous statutes and hired duck police forces are powerless to cope with.

Mr. W. H. Pierce's short account of the stocking of Hemlock Lake is a story of honor and dishonor—of honor to the anglers who stocked the lake, and dishonor to the "poachers" who have depleted its waters. If, on general principles, the spearer of breeding fish is doing a mean act, he is guilty of a lower degree of baseness, when the fish he clumsily butchers have been provided by individual enterprise and at private expense for the common advantage and pleasure of the community. To this lower scale the spearing hotel keepers and cottagers of Hemlock Lake appear to have descended. The story should be read, because in small compass are here seen the working and results of public-spirited and meanly selfish motives in conflict.

Mr. Henry Loftie, of Syracuse, who has already done so much for the angling interests of Central New York, has offered to give a suitable plot of ground and to raise funds for a hatchery building if the State Fish Commission will conduct the work of pike hatching on Oneida Lake. At the meeting of the Commission last Tuesday Mr. Loftie's proposition was favorably received, and Messrs. Blackford and Burden were appointed a committee to take the matter in charge. At Mr. Loftie's request also a supply of muscalonge will be sent to Oneida Lake.

Long Island has a new game protective society, patterned after the Connecticut association of farmers and sportsmen; and every sportsman who shoots on Long Island should support the movement. The organization of the society is due primarily to the active efforts of Mr. H. B. Hollins, and with him are associated Messrs. Roosevelt, Wagstaff, Moeran, Frazer, and others, whose names afford substantial assurance of success.

Mr. F. W. Pugsley, of Poughkeepsie, N. Y., has issued a call for a meeting at Cooper Union, in this city, next Thursday to form a world's society for the preservation of all species of animal life which are in danger of extermination, one proposed line of effort being to establish preserves or parks of refuge, with a view to looking out for the animals and for posterity.

Maine deer are reported as abundant, and they must be to stand the hunting, which began in May and has been kept up ever since. Hounding is a generally practiced mode; it is done without attempt at concealment. The wardens acquiesce in it. Demoralization appears to be the rule.

Will some one who knows tell us why Wisconsin has forbidden the use of dogs in grouse shooting?

Something we have all heard; "You'd orter a been here last week!"

The Sportsman Tourist.

THE SUMMER GIRL.

I DON'T know how it happens, but places I used to go, Stealing away for a quiet day or a summer week or so, Have grown unhomelike to me now because of a curious pest— Perhaps that isn't a pretty word, or isn't the very best; I'm only a bluff old-fashioned fisherman anyway And blurt right out the word at hand whatever I seek to say; But, fact of it is, in my old haunts which nobody knew before, Are droves of dudes in rainbow clothes a crawling around the shore.

While fluttering here, and fluttering there, the summer girl is found, Who drives the fishermen away and draws the dudes around.

No more I meet the brave old lads so long my comrades leal, My bronzed and bearded cronies, my knights of creel and reel. No more I find them in the coves where languid grasses sway, Nor where the combers thump the ledge, nor down the dimpled bay.

No more across the waters their sails at sundown come, Red in the fading glimmer like sea birds gathering home. No more they fling beside the bar their prizes of the day, And tell betwixt heroic drinks how "big ones" broke away; But swarms of dudes, with sashes on, with silken tassels wrought, Sip lemon sodas on the porch and lisp their simple thought; While up the beach and down the pier, in outing flannels gay, Abounds the buzzing summer girl—who drives the men away.

I've heard it said they're mostly found in places by the shore, Maybe, but this I'm certain of, it never was so before. And there's Bill Pratt, he tells me that they're bred way back inland,

Though why they seek the water so, he doesn't understand. He doesn't seek it much himself, which is the reason why, Excepting as a chaser or in trout time with a fly. But no matter where they come from, there's one I saw to-day, A face as fair as lily buds that float upon the bay, With lips that would have lured a bee and eyes so shyly bright, I felt half sad and lonesome, till the bass began to bite. Ah, well! I'll pack my fishing traps and seek another ground, Some hidden cove, if such there be, no summer girl has found.

M. M. CASS, JR.

IN THE GREAT WOODS OF WASHINGTON.

HUMPTULIPS, Wash., Oct. 3.—*Editor Forest and Stream*: Your paper often publishes letters from various parts of the country, and so I thought one from this section of Washington might interest some of your readers.

Since June I have been buried in the forests of Chehalis county, on the east fork of the Humptulips. Such sense of isolation does it give one to go into these woods, and such a feeling of "returning to man" to leave them, that people here use the terms "Going in" and "Coming out" to describe the traveling to and from them. There is something tremendously solemn in their dim lights and far off, muffled noises. A dull, booming roar from some distant falling giant tree; the faint, faint echo of a rifle shot; the cry of a bird high up in some towering fir, and the thumps from the flying feet of some hidden, startled game—these are impressive sounds enough. But how much more impressive is it when the great trees bow with majestic sweeps to the mighty power of a heavy gale.

I remember one September, years ago, being camped six or seven miles north of Laramie Peak, in Wyoming. Our camp was in a low draw in the thick pine timber, but not far from a large open park. There were three of us—an old ranchman, my cousin, just out from the East, and myself. None of us were very much used to the thick timber. One gray, windy morning, when a spatter of rain came with every other gust of wind, we shouldered our rifles and each took his separate course for an elk hunt. I had not been out half an hour before I found my nerves and fancies being unpleasantly acted upon by the sighs and moans of the swaying trees and the howling of the wind. After some hesitation I betook myself back to camp, and there found my two companions had already returned. We looked, questioningly and with some amusement, at one another; and after the natural reluctance, each confessed to the same reason having brought him back that brought the others.

On quiet days, when the wind is not sighing nor the leaves rustling, one can hear the thunder of the ocean's surf. The mighty Pacific, though but twenty miles off, seems at other times to us shut down in these dense forests, an infinite distance away. Occasionally, on a favorable breeze, comes floating a mill's whistle from Aberdeen, quite a score of miles south in an air line. It is hard to realize, with all our primitive life and wild surroundings, that civilization is so near. There are no roads nearer than ten or twelve miles from my cabin; and one has to have a good knowledge of this region—the lay of its ridges, courses of its streams, and other points—before it is safe to strike out on the trails without a compass. Even with that the inexperienced often lose their way.

As yet the lumberman has left these forests untouched; but it will not be many years before the growth of the lumber trade of Gray's Harbor shall force the loggers to come here too. Each year he creeps nearer. Now there is not a good patch of timber for miles about on the unsurveyed lands that is not taken up by some squatter. I doubt if it takes four years to exhaust all the supply of fair public lands in this part of the State.

Trout are plentiful in the river; and now the salmon are running, it is easy to lay in a stock of them for winter use—a great advantage to us settlers so far from stores.

Elk are fairly numerous. I have, however, not seen larger herds at any time than eight or ten. Some acquaintances about two months ago happened to stumble on to a herd of fifty or sixty cows, bulls and calves, which leisurely crossed the trail ahead of them.

Deer are rarely seen right here. Black bears are now and then seen. Cougars at rare intervals. We have a few wolves, too, and now and again a wildcat or lynx prowls this way. I sometimes see their tracks in the sand of the river banks. But all this large game is in the late fall, winter and spring more plentiful nearer the coast, where the country is flatter and more open. Here it is rugged, the ridges being high and steep, and the valleys generally very narrow and tortuous. The soil is

nevertheless excellent, which accounts for the fine timber. It is no unusual thing to see in this vicinity quarter sections that will cut ten million feet and some more. The timber is mostly fir, with some pieces of hemlock and a scattering of spruce and cedar. There is an undergrowth seen on the top of some ridges of vine maple, and underbrush windfalls, except on these ridges, make traveling very hard work without any burden. With a 40lbs. pack it is a tremendous labor.

ROBT. H. LAWRENCE.

BLACK BASS IN JAMES RIVER.

Editor Forest and Stream:

Some of your readers may be interested in knowing the resources of the streams of this region. If the dams which at short intervals obstruct the waters of James River were removed that stream and its tributaries would soon become first-rate fishing ground for black bass. And the excellent trout streams that occasionally find their way to it from their sources in the Blue Ridge, the close proximity of the luxuries and refinements of good society to all the beauties of primeval nature in that delightful climate, would render that river a favorite resort of the game-fishing sportsman.

There is first-rate bass fishing here now—as good as there is in the world—but this is only stumbled upon occasionally and results from conditions which rarely exist. Before the dams were built—and since the railroad has supplanted and destroyed the canal they have become utterly useless—shad came up as far as Lexington. The bass is a comparatively recent importation, and the way in which it has flourished under adverse circumstances is an earnest of what it might do under better.

The original stock of bass, from which have sprung all those which now fill the waters of this part of the Atlantic and abroad, were brought over—by a gentleman whose name I am sorry not to remember just now—in the water-tank of the first locomotive on the B. & O. Railroad, that passed over the divide between the waters of the Ohio and the Potomac, and placed in the basin of the Chesapeake and Ohio Canal. Such is their wonderful fecundity and hardihood that in a few years the progeny of this stock made good fishing in the Potomac.

It is the small-mouth variety of the black bass which populates the upper James. I saw the first that were caught in that section, and the man who caught them made various conjectures as to the kind of fish they were.

"Silver perch," or calico bass, before the reign of their cousin, the *Micropterus dol.*, abounded in the long, deep, still ponds above the dam. These calico bass, chubs, catfish and even pike have almost entirely disappeared before the ravenous tyrant—and we could well afford to make the exchange.

About 1880 two old farmers of Rockbridge, as they were returning in their skiff from an hour's fish for calico bass, stopped in the mouth of Elk Creek, a large, clear, freestone, mountain stream, and baiting their hooks with live minnows dropped them into the water. Presently one of the men saw his "cork" go under and felt a tug which made his old veins tingle. After a hard struggle he landed a 3-pound black bass. That was the beginning of the bass fishing in the upper James. In the course of the evening those old farmers had twelve black bass in their boat, ranging in weight from 1½ to 3½ lbs. They went home with their fish, in great exultation, making, with moderate excitement, many erroneous and amusing guesses as to the nature of that "new" fish. Since then many big catches have been made by sportsmen famous and not famous.

Six or seven years after that time there was very excellent fishing here, but later, as the bass worked themselves down below the dams and failed to get back to spawn, the fishing fell off considerably. Recently, however, some of the dams have been removed, and in the longer stretches of open water the good effects are already apparent.

Coming down seven miles of the river one day in August just passed with three companions in two boats, fishing both with the fly and bait, we caught fifty-six bass of good size.

The most comfortable and profitable work I found was done with a helgramite used just as a fly on a light rod. Bass rise to the helgramite just as they do to a fly, and when they once taste it they greedily devour it, so that when they strike, you are almost sure to hook them if you give them time enough. The helgramite is in this locality one of the favorite foods of the black bass, and when the tough larva is properly placed upon the hook it is almost as durable as an artificial fly. I have caught ten bass with one helgramite used thus as a fly.

But one day in the present month all the conditions existed under which I have never failed to have the very finest fishing. After a hard rain for a day and night the river had become high and muddy, and its waters backed up for some distance into Elk Creek. The creek itself was somewhat flushed and just milky enough to render it possible to approach the bank without alarming the fish, which can scarcely be done in its usual crystal clearness.

With a fly-rod, a multiplying reel, a small braided silk line, a gut leader, and a small hook, which, if of good quality, I found superior to large ones, even for large bass—I cast a crawfish under the shadow of a bush on the opposite side of the stream. When the bait had sunk a few inches I saw the graceful form of a bass as he gently rose, took it in his month, and disappeared. I did not feel him at the end of my line, and yet, in another sense, I felt that he was there. Waiting a moment for him to swallow the bait, I gave a sudden jerk and had him hooked. Then the fight commenced, and I knew that he was a big fellow. For a long time I did not see him. He went low down and staid there.

The bass on my hook was not alarmed as yet. That was a good bait, and he was resolved to keep it, though it must have occurred to him that it was wonderfully strong and was making most frantic efforts to get away from him. He was mad, he sulked. But presently he seemed to get scared. A thought suddenly struck him that he had better try to get away from that crawfish. There must be something dangerous back of it. He reared, he plunged. My reel hummed as he went off down stream. After a little I checked him, and he started back, and it was well that my reel multiplied, or I would have had too much line on my hands.

My bass got wild and frantic. I got him close enough

to the top to see him now. He made some beautiful leaps, three or four feet above the water, but I held a taut line. After a half hour of plunging he was tired and sick. He only resisted by his sheer weight and I was dragging him to within reach of my dip-net. I had gotten him in shallow water when he made his last desperate and splendid effort for his life. Sticking his head out of the water he opened his mouth to its fullest extent, and with a savage jerk he disgorged the whole contents of his stomach, and sent minnows, crawfish, bugs, flies—or rather their remains—flying for yards in all directions—a pint or more—the earnings of a whole morning's vigilant voracity. He hated to give them up, but he had swallowed the hook and he knew that the trouble was there.

He did not disengage the hook, but when he made that sturdy jerk in the air my line snapped just above the hook—it had become rotten in the few days since I had used it, and I had foolishly failed to test it thoroughly. But I had not expected such fish.

I felt very weak "about the gills," I sat down and rested. That fish "grew upon me." The more I meditated upon him and the way he had fought me the larger he became in my eyes. That last time he opened his jaws was very vivid, it seemed to me I could have gotten my head into his mouth.

"At the very least," said I, "he was a seven-pounder." But I did not long sit thus. Breaking off the rotten end of my line I rigged up again. After some little casting I hooked another bass, and my former experiences were repeated, with the exception of the last feature. I landed him and he weighed 4½ lbs.

During the day, varying my bait between live minnows and crawfish and casting them into promising spots under the bushes, I killed eight black bass ranging in weight from 2 to 4½ lbs. And the crowning and most exquisite satisfaction of the whole day's sport was that one of the last fish that I killed was the same one that I had first hooked and lost. My hook with gut attached was still sticking in his gullet. He was a buck, but only weighed 3½ lbs.

For weeks afterward I ruminated with delight over the events of that day, and still have an agreeable picture impressed upon my brain of the bronze and old gold sides of a magnificent bass glinting in the sun as he rose like a cork through the Nile-green water under the green bushes and seized my hook—and then the heroic struggle.

There is a statute in Virginia to protect black bass during the spawning season, but it is enforced badly or not at all.

MILES POINDEXTER.

GLENWOOD, Va., September.

FREEMASONRY OF OUTDOOR LIFE.

BY W. H. H. MURRAY.

WHAT a splendid freemasonry this is of outdoor life! How gentle and generous its rivalries! Which head shall dive deepest in the cool depths or speck the white surf furthest from shore? Which rod shall lift the heaviest trout or gun show to its credit the fullest bag of game? Whose deck shall shine the cleanest, or whose white sails shall lead the fleet to evening's anchorage? Whose table of bark shall boast of the tenderest venison or lodge front display for ornament the noblest spread of antlers? Whose rifle is truest to the camp when food is scarce, or is silent longest when game is plenty and the larder over full? These are the generous and healthy rivalries of the outdoor life which stimulate but never fret, and leave both victor and vanquished healthy and happy still. Compare with these the scramble for wealth; the rivalries for gain; the suicidal despair of some; the vain and boastful bearing of others; the bitterness and ruin of those who lose; the arrogance of those who win; the sneering envyings and ranking jealousies, ripening to hatred as the years go on, which characterize the lives men live in store, office and street, and note the contrast. Who of us frank-spoken and kind-hearted vagabonds of tide and field, of deck and camp, are envious of any? Each man we meet is comrade, fellow-picnicker, brother-man, partner of ours in the sweet profits of our healthy, happy, natural life. Mild-mannered and light-hearted wanderers; boys with smooth or wrinkled faces, gray-headed some of us, but boys still, thank God; canoeists, campers, yachtsmen, our fires are lighted on a thousand shores, and our evening song floats over a thousand lakes and island-studded rivers. We are a family of nature's saints. Our spirits have been touched and softened by the sweet grace of nature. We have been indoctrinated in the truths that shine out of stars and which the blue heavens declare at noon and night. The leaves of the catechism we have studied have been the flowery meadows, the voiceful slopes of mountains, the shining beaches, the whispering leaves of trees, the thunder-shaken firmament or the star-lighted depth of level waters. From these un-Calvinistic text-books we have learned sweet lessons of God, whose gentleness we saw in the very leaves we studied. Our souls have drank the waters of life, fresh from native fountains, and our spirits have bathed their scars in rivers which flow from Him whose voice is as the sound of many waters. All hail! Ye healthy-bodied, healthy-minded, kindly-hearted, gentle-mannered saints of flood and field, of hill and river, of oar and sail, of deck and camp; your smiling faces rise before me in thousands, and your voices, in happy talk, in joke and song, come from afar and stir the silence around me into laughter. Joke, laugh and rest on, ye thrifty vagabonds and gentle loafers; into each hour you are storing the honey of health, on which in future days of toil and strain your strength shall feed and fill itself with vigor. I hail you, fellow saints, in this lower heaven of God, where each happy one is his own priest, each pure mind its own creed, and the gentle wishes of each heart its only "sum and substance" of doctrine.

ADIRONDACK DEER.—North Woods, N. Y., Oct. 12.—Few deer have been killed by parties leaving this place. Mr. White, of New York, shot a doe four weeks ago. His guide killed a doe also. A few days ago a doe came and put her head through the board fence four rods from Mr. Roberts's house. Mrs. Roberts stood in the door of the house a few minutes, then the deer walked through the lots a quarter of a mile to the garden of Mr. Quackenbush. The last seen of it, it was walking toward the woods. The next day Mr. Roberts found a doe dead in his pasture. The hide will be preserved.—RAY SPEARS.

Natural History.

BIRDS OF THE CHEHALIS FORESTS.

THE following notes of bird life in Washington are contributed by Mr. Robt. H. Lawrence, whose interesting description of the locality is printed on page 246:

The birds about me this summer I have somewhat carefully noted. Having a small clearing in front of my house, where the sun's ray falls for half the day, it seemed that I had a few more varieties than my neighbors. A family of Oregon jays came nearly every morning to forage about the door. I noticed them first July 28, when the young bird was still of a very dark color, and decidedly inexperienced, though able to fly pretty well. One day I built a brush fire and next day saw two Steller jays fluttering about it. They evidently knew a camp-fire meant stray morsels of food for them. They are rather more shy than the Oregon jay. A large hemlock tree (near the cabin) in falling must have knocked off some cones from a fir it leaned against. A few days after, on Aug. 14, a flock of American crossbills lit on the ground near my door step; and for many days they were constantly about; now whirring from tree to ground, only in a moment or two to whir back again. Some were most beautifully colored, a dark crimson lake and brown, others bright vermillion and yellow. About Sept. 5 these birds took to the high treetops, and I saw them no more, but could hear them chattering as they flew in straggling flocks up and down the river.

The American dipper is seen about the river here, and the belted kingfisher is often met with. This last bird is very abundant in the lower stream, or about the Harbor tide-lands. Ravens I often see, but always at a distance. The varied thrush, rock wren, western winter wren, chestnut-backed chickadee, Harris' woodpecker, sooty grouse, and Oregon ruffed grouse, are all pretty often seen or heard.

In salmon-berry time I heard a plaintive note at dusk or early dawn; but never saw the bird. I judge it to have been made by the russet-backed or dwarf hermit thrush. Two pileolated warblers spent some ten days about my brush heap. I first noticed the pair Aug. 15. A rusty song sparrow with a bit of moss in its mouth and a half-grown young one by its side, I saw Sept. 5 on a fallen hemlock. What it was doing with the moss I could not tell; though I observed it several times after in that place with the young one. Looking out of my cabin door the morning of Sept. 2 I spied a small bunch of feathers on a bough of the fallen hemlock. It was a tiny owl. I shot it, and on comparing it with descriptions in "Cones's Key" (ed. 1884) found it exactly fitted none. It may be a California pigmy owl (*Glaucidium gnoma californicum*); though I am not perfectly sure. At dusk Sept. 15 I heard the deliberate, clear, sad notes of a bird, which a settler, who was staying with me, said was a rain crow. "At least," said he, "that is the way they sound back in Virginia." The next day it rained. Again at dusk Sept. 27 I heard the sad, distinctly reiterative notes, and near the same place. The bird was overhead, high up in a dead fir, and I could see its form dimly outlined against the sky. It must be the yellow-billed cuckoo (*Coccyzus americanus*). A small flycatcher, very light in color, with no distinctive marks excepting two whitish wing bars (was it the little flycatcher?) three white-rumped shrikes seen together July 10; one western robin Sept. 3, others heard occasionally; and a small hawk or two, completes my list. When winter sets in I hope to add to it.

WAYS OF THE RUFFED GROUSE.

IN your issue of Oct. 1 "Dorp" mentions shooting at and missing a sitting grouse, and the bird remained motionless until frightened away by the approach of another hunter.

This same thing has occurred with me quite a number of times. When a boy, during my first experiences with this game, through a combination of bad guns, poor ammunition and buck fever, I several times missed sitting grouse at short range, and they almost always remained for a second shot. This generally brought them down, but once, one of the first I ever shot, seeing that I was badly rattled, very accommodatingly waited for the third shot, which I managed to hold a little straighter. My notion is that the birds do not connect the mere report of a gun with any sense of danger to themselves, and the same is true of other game. I have shot partridges in the northern Maine woods, and then moving on jumped deer within a hundred yards of the spot, which might easily have made off unobserved had they been so minded. Other hunters have observed the same thing and their views agree with mine.

In her papers on the Nicasotowis Lake region last winter Miss Hardy spoke of the creeping up to and shooting of a drumming grouse. Well this is a feat, and then again it isn't. It all depends on circumstances. In the Aroostock woods, where the birds are tame as hens, I have often walked up to and shot drumming birds, when I made nearly as much noise as a railroad train walking over dry dead leaves and sticks, and have seen them straighten themselves up and drum when they knew I was watching them a short gunshot away in plain sight.

On the other hand, when the birds are wild, haunt dense thickets, and the walking is noisy, it is impossible to get up to and shoot a drummer. He will hear or see you and sneak off.

Another thing, which I think is not generally known, is that in the fall the birds drum as the notion takes them, when feeding or roaming through the woods, not confining themselves to any particular place. They prefer a log, stone or other elevation, but in the absence of these will drum on the level ground. I have noticed this in many widely separated haunts.

E. W. L.

MAINE.

Among the many pleasant sounds heard at times in the woods by the hunter on a clear and calm day, not the least interesting is the deep booming of the grouse far in the woods on his ancient log. The location of this sound is extremely deceiving. I remember once, while standing quietly in the woods, hearing a grouse drumming far away, as I supposed. Moving in the direction, I had not gone more than 25 yds, when I came to an old log; and I was just going to sit down when a grouse rose close behind it. He was not more than 4 ft. away, This

bird, taking me thus by surprise, startled me considerably.

On another occasion I was walking 40 or 50 ft. from the edge of a woods in the field, when I heard a grouse drumming. I had not gone more than 40 yds, and approached a stone wall, when, looking over it, I saw a grouse just leaving a large boulder in the field, about 60 ft. distant. This bird had been driven out by a rival, and dared not perform the joyous act in the woods.

The grouse makes a whirring noise when he flies from the ground or a tree. This noise he can gauge at will, making it a roar or a mere buzzing whirr. I have heard a grouse many times rise from the ground with a sound no greater than the robin makes at times in its flight. The grouse in walking generally goes silently and softly, but at times just the reverse. I recollect once while seated on the brink or edge of a gorge eating my lunch, about noon on a warm, clear day in October, I heard a loud rattling among the dry leaves on the opposite side, about 60 yds. away. I supposed at first it was some person walking. After listening and looking sharply for some time I saw it was a grouse walking on the side hill about 15 ft. from the top. After the bird had gone about 50 or 60 ft. I heard the well-known roar, the leaves flew and the noise ceased.

The mother grouse talks, in her own way, to her little brood in those woods where the industrious ants have built up their mounds in great numbers, many of them larger than a half-bushel basket. Here, while feeding, she clucks to them to come, or utters a piercing cry of alarm and warning at the approach of danger, and other faint notes of endearment and love.

The male grouse also, when alone, clucks at times. The bird is always walking when he does so, and appears to be in a quandary as to some noise that he has heard, just as men sometimes whistle when surprised and not knowing what is to come next or how to act.

The ruffed grouse makes still another noise, which on a clear, frosty morning may be heard 100 yds. or more; it is a short, shrill peeping, frequently repeated as he moves slowly back and forth over the ground, always in thickest cover, because it is a note of extreme trepidation. The grouse will not remain long on the ground after this sound is heard, usually a quarter to a half minute.

I have heard the grouse make this noise when a hawk was perched in a tree 25 yds. away, and I have heard it also when a dog was slowly moving toward the bird, and not 50 ft. away. The grouse when he utters this sound is always near the edge of the woods.

DORP.

SCHENECTADY, N. Y.

A VIRGINIA RAIL IN NEW YORK CITY.—New York, Oct. 12.—The foundations are now being laid for a new building on the corner of Broad and Beaver streets, piles having been driven, the place being partly covered by water. Last Saturday morning the workmen there caught a Virginia rail, which had evidently stopped during its flight South.—SPENCER ALDRICH.

Game Bag and Gun.

Antelope and Deer of America. By J. D. Caton. Price \$2.50. *Wing and Glass Ball Shooting with the Rifle.* By W. C. Bliss. Price 50 cents. *Rifle, Rod and Gun in California.* By T. S. Van Dyke. Price \$1.50. *Shore Birds.* Price 15 cents. *Woodcraft.* By "Ness-muk." Price \$1. *Trajectories of Hunting Rifles.* Price 50 cents. *Wild Fowl Shooting;* see advertisement.

THE FULL TEXTS of the game laws of all the States, Territories and British Provinces are given in the *Book of the Game Laws*.

STALKING THE DRUMMING GROUSE.

I SUPPOSE if I were to sit down and in cold blood tell the readers of FOREST AND STREAM that I would deliberately steal upon old Mr. Grouse while drumming and shoot him off his favorite log I should hear a chorus of voices exclaim, "He's a pot-hunter!" Well, that may be, but I'll "deny the allegation and defy the alligator," and try to prove that I am not a pot-hunter. I believe in taking fish or game on the square. I have supreme contempt for the fisherman or the hunter who would catch fish or capture game in any other way than by placing his skill and knowledge of their habits, acquired only by experience and close observation, over and against their instinct, native shrewdness, and the means that nature has given them to avoid their natural enemies. I have no use for any one who would capture fish with dynamite, snare a grouse or drive a deer into the water and kill him with a club. I have profound respect for the fly-fisher or the skillful wing shot, and yet while I have caught hundreds of trout on the fly and have killed some birds on the wing it has been my fortune to learn these things without a teacher, for I have never seen a trout hooked on a fly nor a bird shot on the wing by any one except myself. This may seem strange to many; but remember, that until very recently I have lived either in the back woods or very near to them, and modern methods were not in vogue.

Much has been written on the ways of the ruffed grouse, and there is still much that may be written, for after all he is the royal game bird of this continent. To successfully stalk a drumming grouse and shoot him on his drumming log, requires no mean skill. This is true because you have to meet him on his own ground. Now, I don't know why a grouse drums, no more than do those other fellows know why or how the woodcock whistles; but I do know just the kind of a place old Mr. Grouse selects to beat his drum, and I think I know how he does it. I'll not tell you just now how he does it, but I'm not divulging any secret when I say that the cock grouse selects the deepest and closest thickets (such as grow around old fields, in old choppings and on hill sides) in which to do his drumming. Here on some favorite log or rock on a frosty morning and before the coming of a storm or a change in the weather, either in the fall or spring, he makes his music, that sets the heart of the hunter drumming too. There like a statue he stands, surrounded it may be by leaves and foliage just his own color. About once in every five minutes he drums, betraying to the hunter his presence, if not his exact location. An old drummer, if hunted by a dog while drumming, will seldom

free, but will seek safety by flying to some other thicket, where he will remain quiet until his pursuer has left, when he will return to his favorite haunts, and probably to his log, where he may be heard again. If stalked by the still-hunter the old drummer will seldom fly, but he will drop from his drumming place and run further into the thicket where he cannot be seen.

My first drummer was killed many years ago. The civil war had not yet been fought, and I was armed with a Harper's Ferry musket. It was about a 10-bore, and so long that I had to get up on to a log to load it, while the nipple was so big that I had to split the old-fashioned elk head caps to make them fit. In short, it wasn't much of a gun, compared with my new Remington, but it cost me but a trifle, while it afforded me a deal of boyish pleasure, with many a dinner of pheasants or wild pigeons, to say nothing of many a sore shoulder. Since I shot that old drummer, near the Saw Mill Run on the headwaters of Mot Branch, I have heard many an old cock beat his last tattoo; but none of them ever gave me the genuine pleasure I felt when the smoke of that old musket had cleared away and my first grouse lay dead at my feet.

I cannot tell you how to stalk a drummer successfully, no more than I can teach you on paper how to cast a fly on one of our mountain streams and catch the wary trout, but I can tell you how my last grouse was killed, and then my story is ended. Our grouse season opened Thursday, Oct. 1. Long before the frost had melted from the house-roofs or the fog had lifted from the lowlands I had climbed the western hills in search of grouse. For two hours I hunted carefully and had seen but one bird, but he had business elsewhere before I could interview him. I had left the high ground, where game seemed to be scarce, and had gone into the bottom. Working my way around the foot of the hill I tried to get a shot at a couple of large hawks that were screaming and keeping up a running fight with a flock of crows. I knew there ought to be birds in that locality, so I sat down to rest and to meditate on the uncertainty of a grouse dinner. In a very short time I heard an old drummer, but the wind and the racket kept up by the crows and hawks prevented my locating him. I sat still until he had drummed three times, when I concluded he was in a pine thicket on the hill above me. Taking off my hat, which was rather conspicuous, and stuffing it into my game pocket, I proceeded cautiously in the direction of the music. I concluded from the sound that he was within 100 yds. of me, and when I had gone about one-fourth of that distance I sat down. I had but a moment to wait until I heard the bird again, and before he had struck a dozen beats I was stealing upon him. I soon located him in a heavy thicket above me and just over the brow of the hill, so that I might get within a few yards of him without his seeing me. I crept close to the top of the hill and secreted myself behind a big log, where in a very short time I heard the thunder within 30 ft. of me. I could almost feel the wind from his wings and my heart tried to get up into my throat. Placing the root of a fallen tree between the bird and myself, I made a few short steps and stopped. Just in front of me and behind the root came the signal that I awaited, and before he had beaten a dozen notes I laid the drummer dead.

F. G. H.

CLEARFIELD, Pa., Oct. 5.

NOOSING DEER AND CARIBOU.

BEATTIE, Moose River, Me., Oct. 1.—*Editor Forest and Stream:* From this reputed home of the largest game of America, I will call an old friend to aid in awakening unknown officials of this State, as I find much remains here to be protected. To-day I visited Clear Pond, three miles north of the C. P. R. R., and found as I had expected well worn paths, where deer approach the feeding ground through a border of low-boughed cedars. But as I stepped from the old craft, in which I managed to keep afloat long enough to save a dry collar, I nearly grasped a small rope, of good quality, that was adroitly suspended in the cedars, with a running noose across the deep worn trail. The absence of tracks larger than of deer in the shallow water caused me to look further for similar devices, and two more were near at hand. Other trails had an odor and evidence of a struggle for life, but the ropes had been removed. At one point the spot was covered with faded boughs cut in early summer, and under them were the remains of a large female caribou, the hair showing that last winter's coat had not been shed.

The noisome character of the once pure air of this gem of the forest caused me to return by a logging road that runs nearly up there; and in the afternoon I visited Big Indian Pond and made the circuit in the most difficult traveling I had ever found in the forest. The low overhanging cedars that surround it have a backing of dense undecayed fallen trees of the same family, through which a young stock is growing. In one place, where several well-defined paths entered the feeding ground of lilies by a deep worn rut in the bank, I bent forward and endeavored to get out toward the water; and found my arms were bound by a wire, when I had been looking for more rope. On the shore of the pond I found evidence of last winter's crust hunting, the authors of which are gentlemen compared with these brutal demons who destroy the mothers, leaving the fawns to starve in sight of its choked protector.

I have looked carefully after a way to solve the question of extermination in this locality. There is but one—a fearless, honest man who will devote all his time in the vicinity of the extensive lumbering concerns on this river.

NED NORTON.

MASSACHUSETTS FISH AND GAME PROTECTIVE ASSOCIATION.—The regular October meeting was held at the United States Hotel, Boston, on Thursday evening, the 8th inst. After dinner, at which 125 of the members were present, the regular routine business was transacted. Messrs. Nat. A. Francis, Wm. A. Cameron, C. A. Priest and Ed. S. Beach were elected members, and fourteen proposals for membership were received.—RICHARD O. HARDING, Secretary.

VERMONT LEAGUE.—The first annual dinner of the Vermont Fish and Game League will be held at the Van Ness House, Burlington, Vt., at 8 o'clock P. M. Gov. Carrol S. Page, Hon. Redfield Proctor, Secretary of War, members of the United States Fish Commission, and other distinguished guests are expected to be present.

THE DUCKS IN CONVENTION.

WHAT has become of the ducks? This question is so frequently asked and not satisfactorily answered, that it is now called the great duck puzzle. Many are interested in this matter and it has caused the State thousands of dollars for the protection of ducks that visit our waters. Yet we are compelled to say that our duck laws are very little respected. Sports and pot-hunters have to pay a license for the privilege of gunning, which is handed over to the duck police, appointed by our Governor, like all other State officers, through the recommendation of a lot of political bosses.

I feel safe in saying I have accidentally learned the answer to the puzzle. I learned it in this way.

One day while on a visit to Spesutia Island, where I was born and raised, and the dearest spot on earth to me, I took a stroll around the beach, and looking out on the Susquehanna I saw several flocks of ducks. Feeling tired I sat down to rest and soon fell asleep. While asleep I had a remarkable dream. I dreamed that one of our native ducks, called black duck, came near where I was sitting and asked me if I lived on the island. "No," said I, "but I was born and raised here." He said he had often heard his family speak of five brothers who occupied the whole of the island in 1812, when John Bull's fleet came and anchored near here and stole all the chickens, turkeys and geese on the island.

I told Mr. Blackduck this was true—they were my ancestors. Then he said, "You are all right. I was afraid you were a Havre de Grace bird." He then gave me an invitation to attend a duck meeting, to take place near by, where would be representatives of some of the most noted families of ducks that visit these waters. The invitation was so remarkable that I accepted it promptly, and was escorted to the meeting, where I was introduced as a friend of the ducks.

The ducks flopped in and were soon ready for business. I saw my old friend Canvasback was boss. He called the meeting to order, and made some sensible remarks. He said that as the time was drawing near when the duck families would go to their native homes, they had determined to stop here a few days to see the great performance on the Susquehanna flats, which had been played for several years, and also hold a little experience meeting. Seeing me on the beach with a book in my hand they concluded I was a newspaper reporter and had sent one of our Southern birds to invite me to the meeting.

I told Mr. Canvasback I felt much flattered by the invitation, and was glad to see the duck families again in our waters.

"Yes," he said, "for a few days only, for as soon as your sports and pot-hunters see us sitting around, their navy will be ordered out and the great theatrical performance will commence."

I interrupted him to ask him what he meant. He said: "I am astonished that you should ask the question. Have you not heard that your Susquehanna flats are and have been for many years under the control of a large flock of birds called sports and pot-hunters, who have changed the programme and now have a dramatic company or variety show? If you have never been there during the gunning season you have lost the best leaf of the history of your life. They don't play any of Mr. Shakespeare's pieces, but their scenery and costumes are certainly grand."

Mr. Canvasback then gave me a programme of the play and said that before you will be admitted as a member you will have to go to Bel Air and procure a season ticket. A box ticket will cost you \$20, but you can get a second-class whacker's ticket for \$5. No reserved seats, as this is a grab game. The fellows who can say the most bad words generally get the best seats. Your programme will tell to be sure to be on the feeding and roosting grounds at 5 A. M., when you will see a grand sight. As if by magic hundreds of lights spring up in every direction, and you will conclude you have made a mistake and have alighted in the center of a large city. At 6 o'clock the lights are extinguished, which is a signal for the show to begin. When the sun shows his beautiful face above the treetops on old Bull's Mountain you will see the greatest navy that ever floated on top of the celery beds of the Susquehanna flats. Boats of all sizes, from a floating palace to a common 16ft. flat boat, and sports and pot-hunters of all classes and colors, from the city millionaire to a second-class colored gentleman. In front of every box are from 100 to 500 of those hateful wooden images called decoy ducks; but not a man can be seen—all are hidden in the boxes and whack boats, where they spend the entire day waiting for a dart or a scull.

Mr. Canvasback said some of the actors had been trying for years to learn the duck language, as he had frequently heard them attempting to call his family.

Mr. Blackduck and Mr. Widgeon both spoke up and said they had often been fooled by these sports and pot-hunters with a whistle.

Mr. Canvasback said all this was rough on the ducks, but the big-gun pot-hunters with sneak boats that can be found every calm night cruising all over the feeding and roosting grounds are worse. They go with large cannon-like guns, murdering the duck families by hundreds. When one of these big guns is discharged its roar can be heard for twenty miles, and Mr. Blackduck's family begin to cry, "Lindsay, Lindsay, why don't you come and see us again? If you have handed in your checks and your spirit can come, that will stop the big-gun pot-hunters." Lindsay was a strange bird that made his appearance in these waters some years ago, and after getting very sociable with the big-gun pot-hunters took his flight, but soon returned with two more birds out of his flock and gobbled up the whole flock of big-gun pot-hunters, with their cannon, boats and everything.

Mr. Canvasback said some people thought he ought to feel proud that his name and that of a fellow called Terrapin headed the list at all the great dinners, and that members of his family, even when dead, had been sold in the markets at \$1.25 a pound. He was not proud, he said, and was willing to leave all such vanities to other ducklings.

He then introduced Mr. Redhead, who told about the manner of warfare carried on in the lower rivers and creeks. He said there was no navy in those waters, but all the shores are rented or owned by a large flock of sports who live in the cities; and that on every point is a masked battery, with from 400 to 500 decoy ducks in front of it. This battery resembles a large bird's nest, as it is built of marsh grass, and is just large enough to accom-

modate two men, a Chesapeake Bay dog, a jug of water and a bottle of old rye. Here the sports spend the entire day, reminding you of a land terrapin, for when they see a duck they draw their heads into the nest, and you can see nothing but their eyes, but if any of the duck family go near these innocent-looking nests you will hear it thunder out of the clear sky.

Mr. Redhead told a good joke about one of these nests on Bengie's Point, where he saw a strange looking bird peeping out, and offered to bet no one could tell what it was. I said it was an American eagle. You came within one bird of it, said he. They call him Benny Harrison, and said he was the biggest bird in Uncle Sam's flock.

This remark came very near causing a row and the noise woke me up before any other members of other duck families had a chance to give their experience. But there was grim reality in all that I heard, and yet people ask, "What has become of all the ducks?"—Capt. E. B. Gallup in *Bel Air* (Md.) *Aegis* and *Intelligencer*.

CHICAGO AND THE WEST.

CHICAGO, Oct. 3.—A prairie fire is reported to have burned over a strip of country 200 by 300 miles in extent west of the Missouri River, N. D. The report comes from Fort Yates. A bone gatherer of the plains is said to have started the fire. Much game must have been scattered or destroyed.

Snow fell in Montana and over much of the British Possessions Sept. 30.

The West and Northwest remain very dry. No fall flight of ducks can be expected in this part of the country. At Horicon marsh, Wis., snipe have been abundant, though the water is still too low for successful duck shooting. At Fox Lake, lower down on the flight, snipe are now scarce, and the northern birds not in, except a good run of teal. Ed. Howard wrote down yesterday that he thought the shooting would be good. The cold storm north may have set the flight down a bit, but the shooting will not amount to much.

Horicon marsh, above the Diana Club line, has been burning for some time, the fire having gone six miles wide and six feet deep, into the peat. Kankakee marsh, below here, is dry enough to burn as badly. Little shooting is reported from the Kankakee. Jack Whiting, who last week got twenty-eight ducks in a day and a half, sixteen of them mallards, is pointed out as a phenomenon of luck.

Mr. John Houston and his friend Mr. Brady, just back from the Platte, in Nebraska, report any quantities of snipe. They got fifty-seven ducks in two hours one day. Mr. Houston also had the singular fortune of killing a glossy ibis, a bird certainly not usually found so far north. The specimen is to be mounted. I have not seen it, but the name is so given by Dr. Velie, of the Academy of Sciences.

A shooter, whose name I do not get, bagged sixty snipe near Sioux City, Ia., one day this week. The birds seem all west of us.

I was out in Iowa this week. At Des Moines I met Charlie Budd, C. O. Perkins, "Friday" Eason, Mr. Royal and Irish Setter Perry, all sportsmen of the deepest dye. Mr. Perry shows hopes, for a dog man at least, inasmuch as he is now engaged in the newspaper business. Charlie Budd told me he could get some quail not far from Des Moines, and a few woodcock below the city. Mr. Perkins reported a very successful two days' shoot at chickens in Hamilton county, below Mud Lake. This is the county where I used to shoot when I was a boy. It was quite wild then, but all settled up now. The corn protects the birds. I am glad there are some left on that once marvelously prolific region.

At Newton, Iowa, I heard of two or three coveys of chickens not far from town. Shooting at these birds in that county (Jasper) has not been thought of in late years, but a few of the birds hang round the old farms. My father has showed me where inside what are now the town limits of this quiet village, he used to kill 30 to 40 chickens a day if he wished. No one dreamed in those days that these birds would ever be scarce.

Mr. Valentine Hicks, of the Rising Sun Game Park Association, Ashton, Ill., writes me to-day that they are still prosecuting trespassers on their leased grounds. He says he would like to ask me out to shoot, but the new by-laws forbid it. There are chickens in that section.

Mr. Geo. T. Farmer this week took one day off at Monico Junction, Wis., bagging 7 woodducks and a 22lbs. mascalonge.

Mr. Spross, of this city, bagged 97 ducks on the club marsh at Toledo, O., Sept. 1.

Oct. 5.—Unquestionably a season of scarcity is upon us so far as wildfowl are concerned. A few birds are down ahead of the late cold snap north of us, but we have little to offer them by way of attractions. The Kankakee has no wet marsh. Tolleston Club loses the best of its shooting by reason of a natural gas company laying pipes across its marsh, the workmen disturbing the birds. The Illinois River is very low. The Mississippi River at Davenport is lower than it has been for 27 years. I have already spoken of the lowness of the water on Horicon marsh, Wis., and I append a letter from my friend, Mr. W. Y. Wentworth, State Warden and club superintendent of Blackhawk Club on Lake Koshkonong, Wis., which shows a bad outlook for that once famous water. Mr. Wentworth says:

"BLACK HAWK CLUB HOUSE, Lake Koshkonong.—As is the case all over the West, the long-continued drought has caused all our streams and lakes to be very low. I don't think there can be found in Lake Koshkonong any water 6ft. deep at this date. The bog north of the house is nearly dry, and it is an impossibility to push a boat through it. There are less birds here now than I ever knew at this season of the year. I cannot account for the scarcity, but such is a fact. There is an abundance of feed; rice and celery never grew more abundant in our water. Usually at this date we have teal, mallard, blue-bill, black-head and red-head, but strict search does not find them now, and we must be content and wait their arrival from their nesting grounds.

"We have had good fishing here most of the season, large catches of bass, Oswegoes principally, a few small-mouth. Good fishermen have not failed of good catches. Swan and Crossman, of Milwaukee, and Geo. Bluhn and Duffee, of Chicago, can testify to above statements.

"The club has made several improvements to their grounds, having purchased and leased more lands; they now control nearly 500 acres of land. Have posted some

and propose to control it for their own use and their friends. Have built a new cottage, making more room. The membership is full, and all active members, 50 being the limit.

"If you can make it convenient to come up here, if only for a short time, please let me know and I will send you a permit and try to use you well while here.—W. Y. WENTWORTH."

Mr. John Stockton, of Swan Lake Club, whose grounds are near Lake Senachwine on the Illinois River, has an item of great interest in his story of the planting of the wapato, or Indian potato, on Swan Lake grounds. The wapato, as many will know, is a great duck food on the Northwest coast. It is not learned to be native east of the Rockies, I believe, nor low down the coast. Hon. John Dean Catton, that eminent naturalist who has done so much in many ways for sportsmanship, suggested to Mr. Stockton that he try planting the wapato, adding that he thought it would spread all through the Illinois Valley, as he had himself tried it in one of his ponds in the home park at Ottawa, where it bid fair to take possession of the whole water. Mr. Stockton purchased \$60 worth of the bulbs of Mr. Geo. L. Curry, Jr., Portland, Ore., and last spring these were planted. It has been, so far, impossible to tell what success has attended the experiment, and the season has been unfavorable at best; but some of the pushers report a "new plant" as having appeared, and eventual success is probable.

While upon the topic of the Swan Lake Club, I should say a word about protective matters. It will be remembered that Dr. M. D. Green, the La Salle fish warden, had some rather slighting words to say about the sporting clubs in his recent story of the work he had done in apprehending illegal fishermen. Swan Lake Club must have been meant, though not mentioned. The facts are that the Woods boys, keepers of Swan Lake Club, were among the party arrested on Senachwine by Warden Green, and the latter probably thinks that the club might employ better club keepers than illegal marketmen, jumping from this to the conclusion that the club favors lawlessness.

Than this last conclusion nothing could be further from the facts. Swan Lake Club sportsmanship is genuine, and as good as that of any of us, and the club would lend itself to no form of lawlessness. I know personally that the Woods boys were told that if they did anything illegal they could not look for help or sympathy from the club. I know further that last January the club actually paid these same Woods boys \$250 cash to keep them from doing what they could legally do, \$125 not to shoot any mallard ducks and \$125 not to catch any bass. This may seem like hush money, but it is not, as will appear from the terms of the Swan Lake leases. To get possession of this marsh, much of which was taken from "old man Woods," the privilege of legal netting and certain shooting was expressly reserved. Therefore, within the limits of the law, which, under that old "corporate dam" clause, have never yet been actually determined, the Swan Lake Club can not stop the Woods boys from netting. Yet, as if to expressly show and prove their opposition to any waste of wild game or fish, they have put their hands in their pockets and paid, in addition to their lease and to the keepers' salaries, this extra money to save the bass and birds. As for the coarser fish, not game fish, the Woods boys will not give up any rights: they can legally get there, for they make a considerable amount of money at that. The club deprecates this, but can not stop it. Stopping that form of fishing is for Mr. Green and the rest of us. Swan Lake Club will contribute its share toward stopping illegal fishing in the Illinois Valley. "I wish we could get a law to prohibit seining and netting altogether," said Mr. Stockton to me. I believe this to be the voice of the club, and I know the club is one of sportsmen worthy of that name in every way. Certainly they should not be blamed for what they can not help, and when it is seen just how it is that this peculiar feature of netting is in existence on their grounds, I do not believe that blame will be attached to them by any reasonable man. When the Illinois Valley Association want funds let them send to Swan Lake Club, through Mr. Stockton, let us say, and I think the result will set at rest any doubts as to their willingness to help any proper measure in protection. I will go further than this and say that I do not believe there is a legitimate Chicago club which would oppose a warden in his work, or which would not aid him in his work if possible. If there is a single specific instance against this general proposition I should like to hear of it and to publish it.

Bright shining like a good deed in a naughty world is Mr. Sharp's bag of thirty-six snipe one day last week on Mak-saw-ba grounds. This is the only bunch of snipe I have heard of for sometime. We are in the doldrums.

An Atchison, Kas., man sends on for inspection by friends here a new target which is affording them some fun in the Sunflower State. This is a target for night shooting. In appearance it is much like the ordinary composition target, except for an elastic band crossing from two hooks let into the sides of the target. These hooks also carry each a bit of fuse paper. The target is placed in the trap, any one of the ordinary traps serving, and before being thrown these fuses are lighted and burn brightly during the flight. If struck by a shot the rubber band pulls the two separate fuses together in one compact flame. This night shooting is said to be great sport. I have not yet seen it anywhere, but some of the country clubs here may take it up. E. HUGH.

CONNECTICUT NOTES.—Since the rain and cooler weather I have been out with a descendant of Grouse-dale trying to enjoy the weather and invigorate myself among the game birds in the vicinity of Willimantic, and with satisfactory success, for the game bag averaged three quail, one woodcock and one partridge a day. For this success we will thank the stars or rather the unusually good seasons since the blizzard, for they have been excellent ones for the birds to increase, multiply and replenish. One of the land owners, with whom I caught a ride, told me that he heard more shooting in the latter part of September than he had since and for a number of days about the Fourth of July; he heard a good many shots to the southward, toward the creek. They were presumably after woodcock, and it's a great pity that any shooter would punish himself and dog so much in those hot days of July for the sake of proving that old Adam has not been thoroughly outbred yet.—C. N. B.

AMONG THE CURRITUCK BAY BIRDS—II.

[Concluded from Page 229.]

I USED that morning a No. 12 Colts gun, and found it worked admirably. The natives here though invariably shoot snipe with a No. 10 bore. As regards the size of shot the standard seems to be No. 8, but I think that it too large for the work, one size smaller, or even two, being better adapted to the task, as the snipe is not a tough bird and is easily killed.

The sun was about an hour high when the sky became overcast with clouds, and one of those sudden storms so common to the North Carolina coast burst upon us. The rain came down in a perfect deluge, and driven almost horizontally by the gale of wind. Now it was that the bay birds came with a rush, and it was something new to me to shoot in the face of a tropical thunder storm. The rain was so dense it was impossible to see the snipe until they were well over the decoys, and it was tough work bringing them down. I had to shoot entirely with my back to the wind, it was utterly impossible to see how to aim facing the blast. The rain came like buckets of water dashed in my face, completely blurring my vision. As it was I made many misses, and only knocked over about one for every two shots. In a few moments the face of the whole country became changed, instead of the level sea meadows with here and there a pond, the scene was reversed, and as the storm died away and the sun burst out his struggling beams showed a vast sheet of water, with only here and there a hillock of sand.

Then ensued some minutes of rest which we all utilized in gathering our game. My setter Jessie saved me many a long chase after cripples. It is a singular fact that a blue-blooded setter hates to retrieve a salt-water snipe. From long generations of hunting the quail, they learn to know that kind of game by instinct, and any bird so different in scent from the quail, or upland game birds, ceases to afford them pleasure. Certainly, Jessie manifested at first great reluctance to touch them, and it was only the result of implicit obedience brought about by thorough training that made her obey my commands.

Unless one forces himself to eat at the untoward hour before sunrise he is certain to suffer for it. Nature abhors a vacuum and shooting at such a place on an empty stomach is sure to be followed by a violent headache; the face becomes flushed, the eyes glassy, and the temples throb painfully. The summer before all my three companions were compelled to stop shooting and be taken back home in the cart utterly prostrated. This time I insisted upon the crowd eating at least a biscuit apiece, so when we knocked off for the morning all hands were as fresh as the proverbial lark.

A count up showed that my pile contained 114 birds to 150 shells fired. Cap came next with a score of 80, while York made a fine showing, it was his first experience with the bay birds, and with 100 shells used he had brought down 57 birds, all single shots.

Tuesday we varied the proceedings by a water trip to the various clubs in the Sound. The Swan Island property is very valuable, so also is that of the Lighthouse Club, and a glance over their register shows they are a set of genial, jolly fellows, sportsmen and gentlemen to the core. Our party is much indebted to the courteous keeper of the Lighthouse Club for many kindnesses. Monkey Island Club is a secluded retreat and is probably the smallest club in existence, having only four members. There have been three new clubs lately formed in this vicinity, the Martin Island Club, the Deal Island Club, and the Ragged Island Club. The two former are fine places for ducks, such as mallard, shuffus, black duck and the like; but the Ragged Island's property is without exception the finest game preserve along the whole Atlantic coast for redhead and canvasback. This lies in Back Bay, adjoining Currituck Sound, and consists of some thirty or more islands, ranging from six acres to a few rods in area. The preserve is about three miles long by one and a half miles wide. The Ragged Islands have been the most famous shooting spot in this section, indeed, if all the tales I have heard of the bags made there are true it is a sportsman's paradise. The shares of this association are held at \$1,000, Mr. C. A. Woodward, a young merchant of Norfolk, is the president.

Returning, we reach our own club about 10 o'clock, nearly starved, only to find Shant gone to bed and nothing in the house to eat, he not expecting us until next day. We then went over to Leon's house, and found the remains of a supper. As hungry as we were, the sight took away our appetites, and we told him we would eat no supper if he would have a smoking hot breakfast for us early in the morning. To this he assented, and we returned to sleep with such aching voids that it tintured our dreams.

We aroused ourselves and went over to Leon's to eat that hot breakfast; to our dismay the whole house was buried in a profound sleep. After hammering at the door that worthy came yawning into the porch, his "gallusses" hanging down his back. He then drawled out he "hadn't no breakfast," and he ushered us into the same table that had already turned our stomachs the

evening before. There lay the greasy ham and the saleratus biscuits. It was eat or starve, we could not go to the blinds in our condition, since we had not eaten a square meal for twenty-four hours. We were like the man who had to eat crow, "we got outside of it, but we didn't hanker arter it."

Getting Shant White to hitch up his team, York and I put out for the blinds, and during the whole journey not a word was spoken. We were too mad. But the bay birds flew beautifully, and kept us working at our guns in a lively manner. I used a No. 10 and 16, and the latter fully answered my purpose in the majority of shots.

After the first rush of birds was over I filled my briar-root, and discovered I had forgotten to bring matches. Calling Jessie, I strolled over to York's blind and found him puffing away at his pipe, the perfect picture of contentment. I noticed a couple of strange men in the blinds banging away like mad. I was amazed, for I knew none of the clubmen had arrived, so I inquired of my companion what it meant. "Why," said he, "they are two visitors that Shant White invited to shoot."

"Who gave him the power to invite people to shoot over the club grounds?" was my natural question. "No one," responded York, "White says he owns a portion of this marsh, and can ask whom he pleases; he invited Burgess and myself to come and shoot here whenever we wish to, saying he would take care of us." "Well," I

wing equal to a seagull's, and they know how to use them; when killed they do not fall, but tumble to the ground. I soon fired my last shell from my No. 10 Greener and seized my No. 16-bore, but I might as well have shot with a horse pistol.

The sun had set by this time, and I killed a few that were directly over my head, but I did not knock over more than one in five shots with the small gun. I stopped shooting before it was too dark to pick up the birds that had fallen in the pond, and just as the wagon drove up I finished my count, having exactly 51 grass plover and a few yellow shanks. Though I built a blind in the same spot soon after, I never killed another plover, nor did any of my companions. The birds simply and mysteriously disappeared. Cap's score during the day was 160 gray ducks and yellow shanks.

Thursday morning all of the party save myself went fishing about three miles up the beach, where a half submerged wreck lay. They caught nothing, but the sun got in its powerful work and as they had splashed about bare-footed they all had blistered feet and ankles. The condition of the men Friday was pitiable. Mac was sick in bed, York had a big swelling on his upper lip, which prevented him enjoying the hugest joke, for to laugh was torture. The skin was cracking on his nose, and he could hardly limp across the room. Cap was used up, his ankles had all the skin burned off by the sun, his face

badly scorched, and his wrists blistered by bites of mosquitoes and bedbugs, and I was scarified by the devilish insects on wrists and ankles. I went to the blinds alone that morning, and had scored over a hundred birds before my friends appeared. The yellow shanks and grass plover had vamoosed, and the graybacks were by themselves. When Shant White dropped me my decoys the sun had just risen, and I was no sooner settled in my blind than three men formed a skirmish about 100yds. ahead of me, and two more stood an equal distance behind me, and they blazed away at every bird that flew over them. By what authority they were shooting on the club's territory I do not know, nor did I ask. I was almost as humble as Uriah Heep by this time. Though I said nothing, I was like the Irishman's owl, and kept up a thundering sight of thinking. The birds flew beautifully, and when my 125 shells were exhausted it was somewhere about 9 o'clock, so I signaled Shant to bring up his cart and take me back to his house. The others remained in the blinds and returned three hours later, with but few birds, as they had dispersed over the feeding grounds.

Early in the morning, and late in the evening, is the best time for shooting, the birds are on the wing then and stool readily. It is a waste of time, labor and patience to sit in the blinds during the forenoon and afternoon, to say nothing of the positive discomfort of sitting under a dazzling sun, unprotected by shade or umbrella.

The secret of making big bags consists in three things, first, good shooting, it goes without saying that the expert handling of the gun is the paramount consideration. Secondly, to keep motionless in the blind until the very mo-

ment you are ready to shoot. A single incautious gesture and the game will swirl to the right or left out of gunshot. The third is, to let the birds pass the decoys, and just as they turn or beat back give it to them. Never, if you can help it, let a bird light among the decoys. One is almost certain to shoot, and the scattering pellets will riddle the decoys as well as kill the birds. Many large scores have been made by members. The club has unfortunately no written record, and he tallies are marked like Rip Van Winkle's score on the wall. As brief as it is, nothing could plainer show what excellent shooting this place affords. The worst score was a member from Washington City, who wrote on the wall under date of May 7, 1890, "I bagged five yellowlegs, and that was all. I made big preparations, and these snipe cost me about \$20 apiece."

Friday all hands were out early, and it being our last day we remained in the blinds until the early afternoon. Cap, who took an all day's shot, closed the day with 106. Both York and Mac did well. I stopped at 113. A final count up showed that the grand total was 1,267 birds. As large as the score is, it could have been easily doubled had we hunted steadily and started out by dawn every morning.

On returning from each shoot the birds were laid side by side belly upward in shallow zinc cases about 3ft. long, 12in. wide, and about 8in. deep, there was only one layer of birds put in each case, which was then fastened and placed in a large refrigerator, and covered with broken ice. In shipping these cases were placed in ice boxes. The birds soon become frozen, and will remain fresh and sweet as long as the ice last, which should be renewed every twenty-four hours. It is indispensable that this is looked to, a change of temperature for even one hour will ruin the birds. We were compelled to order another ton of ice; at least half was lost by melting in transit. Another thing, the birds when packed must be perfectly dry. The slightest moisture decomposes them.

After dark all hands set to work collecting our traps. Mac and I settled with Shant. His charges were ex-

CLUB TEAM TROPHY.

The trophy, made by Messrs. Tiffany & Co., of New York, is a punch bowl, 13½ in. in height, 14 in. dia. at the top, and 10 in. at the base. The bowl is decorated with a flock of pigeons and festoons of laurel growing from the top edge, while the stem is divided in sections, where the names of the winners are to be inscribed. On the lower part of the base is etched in floriated letters the inscription, "The Club Team Trophy." The bowl is richly gilt inside, and circling around the lining the names of the competing clubs are etched in harmony with the decorations: The Carteret, Westminster Kennel, Country Club and Larchmont. The cup is now on exhibition in Tiffany's window on Union Square.

rejoined, "I don't see that we clubmen have any rights at all."

"No," said York, "neither Burgess nor I are going to take any stock in this club, we might as well throw our money in a ditch." About noon we knocked off with about eight dozen birds apiece to our credit.

Wednesday evening we drove in the wagon several miles, and seeing some grass plover I placed my decoys in a pond and without any blind I squatted on the edge and awaited developments. The others kept on to occupy their old blinds. Of all the birds in this section the grass plover is the finest, and largest, they do not often come in such numbers as to afford continuous shooting. They are fast flyers, and rarely circle around the decoys, but dart by. I happened to strike the right spot at the right time, and never in my experience did I ever see such a steady flight, they came twenty or thirty a minute without a break. I had some three score of No. 10 shells, and I fired straight along, the birds dropping right and left, and but for my dog I would have lost most of them, for it was useless to chase cripples, one would miss a dozen shots by so doing, and owing to the long shots, fully one-half were only winged and fell into the grass. Jessie lay crouched at my feet motionless, and only at the word of command would she dart like a streak after the bird and drop it at my feet. Owing to my want of concealment all the birds shied to the right or left and every shot had to be taken over 50yds. Just about this time there occurred the most fascinating effect for a sportsman that it is possible to conceive. The birds flew straight from the west, and low in the western horizon was a huge bank of clouds behind which the beams of the setting sun gleamed, changing the mass of vapor into a roseate, golden and crimson hue. The sight was a gorgeous one, and dazzled the eye. Right from this mass of opaline tinted clouds the birds shot out like a dart hurled by a powerful engine. The glare was so strong that the birds could not be seen until within 50yds. It seemed an optical illusion, to see the flash and glancing of wings appear suddenly from the fantastic, colored mist and luminous shade. These grass plover have a spread of

tremely moderate, \$7.50 for board, \$2.50 for boat hire, cart hire and personal attendance. Just then York came in laboring under some excitement and asked me to come over to the other house as there was going to be music in the air, Leon's bill would bankrupt the crowd. It was exactly double the other. I have one beside me now, and will copy the unique production: "Board for Cap and York, \$18; horse and wagon, \$6; three days' labor, \$9; for hire of boat, \$2; one bottle of 'peches', \$1; down to Wash Woods, \$2.60; use of decoys, \$4.50; fishing, \$1.50."

Charging \$9 for personal service topped in the way of extortion anything that ever came under our observation, seeing that both York and Cap cut their own bushes, made their own blinds, planted their own decoys, brought in their own birds. The labor of this worthy consisted in dumping his guests on the ground and then driving off. Even the decoys were not his, I lending York a portion of mine. A highwayman will generally allow his victim to retain enough money to take him back home, but Leon would take his last cent if he could.

Last summer Col. Lewis was at the club and received an urgent telegram recalling him home. It happened on the odd day of the week, the steamboat only leaving on the even days, so the only way to get to Norfolk was by a drive to Virginia Beach. Shant's team was away, and the Colonel applied to Leon to take him to Virginia Beach. Now the regular price for carrying sportsmen to and from the beach to the club is \$2 each way; but this Shylock insisted upon charging the Colonel just five times as much, well knowing he had the guest in his power. Not a cent would he abate; the Colonel paid the bill, but has never been down to the club since. The issue is plain, if this man is allowed to invite guests at will to this club, and to practice such extortion, the Currituck Inlet Association will go to pieces to a certainty. If this man does own the land his house stands upon and the piece of marsh he claims, it should be inclosed within a wire fence, and he be made to keep within bounds.

Many of the shares are held by sportsmen in Baltimore, New York and Boston, and it is a pity their shares should be made as valueless as the paper they are printed upon. And it is hard that an exceptionally fine hunting resort in defiance of all right and justice should be utterly ruined. Either this squatter must go or the club will be bursted insisted of twelve months.

The three sportsmen I took down intended joining the club, but now decline the honor with thanks. I could not blame them.

ALEX. HUNTER.

BOSTON SPORTSMEN.

Editor Forest and Stream:

The open season on quail in Massachusetts begins on Oct. 15, before these lines can have been perused by the readers of the FOREST AND STREAM. The prospects for quail shooting in that State are fair, but they would be better but for the fact that too many quail have been killed since the law was off on partridge and woodcock. The dog points a bird. The hunter is all on the *qui vive* for a partridge. The bird is flushed, but up goes a quail! In nine cases out of ten bang! goes the gun, and possibly bang! a bird with both barrels. This is done almost before the sportsman has time to think, even if he be a good friend of the conservation of quail. The temptation is great, and the chances for shooting, almost unintentionally, are numerous. A report comes from reliable gentlemen who have been shooting shore birds on the Cape this fall, that it is of no use for the Massachusetts Fish and Game Protective Association to put out live quail and partridge on many parts of the Cape for the sake of restocking with these game birds. The farmer's boy is there with his snares, and in some cases the farmer himself. One gentleman declares that he knows of many rods of snares in the vicinity of Marshfield, and of birds being taken in them. He does not care to furnish information to the game protectors that shall lead to the conviction of the guilty parties, for he goes to that neighborhood every fall for shore bird shooting.

The Plummer boys, Gordon and Albert, of the Boston leather trade, had more than their usual luck, at Nantucket, with the shore birds this year. The shot 70 lbs. of birds on their trip. The number of birds was 380 in all, with the biggest score at 283 in one day. The next day after this big shoot not a bird was to be seen at the very place where the great luck was had. The flight had passed.

L. W. De Pass, assistant secretary of the Boston Chamber of Commerce, with Dr. W. B. Cutler, of Boston, and C. W. Hodkins, of Reading, have lately returned from a fairly successful trip to the Cape after shore birds. They report fair flights this fall.

E. M. Gillam, commercial editor of the Boston *Advertiser*, is shooting rather more than usual this fall. Mrs. Gillam is also shooting with him. She is practicing with the shotgun with the determination of becoming a good wing shot. They live in Denham, and go out nearly every morning with their finely trained dogs. The other morning Mr. Gillam rather missed a good shot. A friend invited him the night before to be on hand at 4 A. M. to start for a duck hunt. He was up in season and started to drive to his friend's house. The road he was somewhat acquainted with in the daytime, but in the darkness matters did not look right. He drove and drove, but still did not reach his friend's house. The road did not look right. At last he reached his friend's place by a very roundabout way twenty minutes past four. His friend's wife informed him from her chamber window that her spouse had been gone about five minutes, fast driving would doubtless catch him. Again Mr. Gillam drove and drove till he was tired, and at last he drove home and put up his team. Later he met his friend with seven beautiful black ducks, the result of the morning's shoot. Mr. Gillam has another invitation to a duck shoot.

Two of the most successful local gunners in suburban Boston, as well as two of the best shots, Gardiner Eames, well known as "Gard," and Charlie Davies, have been out several times, with the result of a good brace of partridges each time. The other day they started three birds. One Gard shot. The other two were likely to get away, but Charlie's right barrel nailed one. He whirled and shot the other with his left. But the charge did more. One shot hit Gard squarely between the eyes. It went in so far that it had to be cut out. But Gard kept on gunning as usual. He says that at first he thought that his left eye was gone. "If 't had," he remarked afterward, "I should probably have kept on gunning

but if it had been my right eye, I should have been obliged to have practiced shooting from the other shoulder. If it had been both eyes I should most likely have been obliged to have given up shooting altogether."

Among the late sportsmen to start for the Maine woods and waters may be included Mr. L. Dana Chapman, of Dame, Stoddard & Kendall, tackle dealers in Boston, with S. C. Dizer, of Prouty & Dizer, of the boot and shoe trade. Late in September they started for the Megantic preserves, with the view of hunting moose in Canada till the open season in Maine, when they designed to make a return trip, via Tim and Seven Ponds.

Mr. E. B. Hosmer, of the well-known grain firm of Hosmer, Crampton & Hammond, of Boston, is looking for moose and deer at the Megantic preserves.

Mr. Herbert C. Leeds finished the trout season at Birch Lodge, Richardson Lake, the guest of Mr. Bayard Thayer. Mr. J. Otis Wetherbee, a well-known Boston lumber dealer, also spent a couple of autumn weeks at that beautiful camp.

Judge Allen, of the Massachusetts Supreme Court, made the autumn trout season at Lake St. John. His success was only fair in that much boasted region.

Mr. H. S. Kempton, assistant managing editor of the *Boston Herald*, is making the first and second weeks in October at Camp Stewart, Richardson Lake, looking for deer and partridges.

Mr. P. H. Kelly, the well-known Catholic church builder, with his friend Bateman, the architect, were at the Upper Dam for two or three weeks. But they did not have their usual success at fly fishing. The weather was too hot and the water far too low.

SPECIAL.

PENNSYLVANIA QUAIL SEASON.

Editor Forest and Stream:

Our Legislature some time ago cut off two weeks of our quail season by making Dec. 15 the closing date; the purpose as given was to save the birds from being pot-hunted in the deep snows; but as we have few snows prior to Jan. 1 this was unnecessary. Not content with this the next Legislature cut two weeks off the beginning of the season, moving the opening date to Nov. 1, thus making the time but six weeks, probably the shortest season of any State, and certainly an absurdly small proportion of the year in which to use our dogs and guns; I understood this movement was made by members from a few of the garden-spot counties, Lancaster, etc., who probably hoped thus to save their few remaining birds; but their country assuredly cannot be garden spots and game covers at the same time, and it is doubtful if complete protection in such closely cleaned up fields and pastures would help the supply, while it is plainly unfair to the remaining nine-tenths of the State, which require no such limited season.

It may be said that Oct. 15 found some coveys of quail too small to shoot; yet if the opening date was deferred to Dec. 1 there would even then be an occasional lot of undersized birds, for it is found that now and then broods will be hatched as late as the fall months; but take a normal season, and by Oct. 15 most of the coveys will be found well grown.

The change to Nov. 1 deprives the quail hunter of probably two of his happiest weeks in the season. October is the ideal shooting month, and the last two weeks of it, when the master and dog hardened their muscles and cultivated endurance, when the former, as much as the shooting, enjoyed nature at her best. Even though it cuts off the Christmas shooting for the vacationist and home-comer we will willingly forego December's last two weeks, but for the two cut off at the beginning of the season we say make the season an even eight weeks and restore us again those last days in lovely October.

ONYJUTTA.

MOOSE IN NOVA SCOTIA.

Editor Forest and Stream:

I have just returned from a two weeks' moose hunt in Nova Scotia, and am prompted to give my experience. I went to the same grounds that I hunted in the fall of 1890, and found the cow moose signs more numerous than last year, but the bulls scarcer. This I attribute to the unusual hot weather of September. The bulls will not travel much until frosty weather. The trout fishing was fine, and partridges more plentiful than last year.

The first morning's hunt we called up a large bull moose. He stood about 300 yds. off, almost breast on (a trifle quartering), looking straight at us. He never made a bit of noise in coming to the call. Finding he would come no nearer, I fired at him and wounded him badly. The bullet passed through him somewhere, as he was bleeding on both sides, and although we followed him for nearly three miles, we had to give him up.

The next morning we called up another bull, but he would not come out of the cover. We could hear his horns knocking against the trees, and hear him answer, but we never saw him.

Two mornings after I killed a very large bull moose. The largest I have ever seen. We were calling some four miles to northwest of our main camp. That was an exciting morning's sport. It was wonderful what sagacity that animal showed in coming to the call. At one time he stood for fully fifteen minutes without moving, about 600 yds. off, looking straight at us. Finally he moved toward us. We could see his great black body passing through the underbrush and hear his horns striking the trees. At last he came out in an opening about 200 yds. off, and looked in our direction. He made a grand picture as he stood there, with his mane bristling up and horns looming out in the foggy light of dawn. Thinking that as good a time as any, I shot. He ran about 150 yds. and fell stone dead. He was shot through and through. He would easily weigh 1,000 lbs. when dressed. His horns were not so long as one would suppose they ought to be for so large a moose. They spread 3 ft., and the bend of the horns measured almost 5 ft. They are nicely palmated and even. We salted him down where he fell, and the meat filled three large barrels.

That same morning we heard a cow moose give a long plaintive call, and looking in that direction we saw her standing in an open not very far from where we had been calling. She soon passed out of our sight. A cow came up with the bull that I killed. A few days after we called up another bull, but we did not get a glimpse of him.

One could have good sport on these grounds in October,

as the bulls must have come in there by this time. There have been fifteen moose killed that I know of, within a radius of thirty miles of where I hunted, and probably several more that we did not hear of. A bull moose was hauled out past where we camped the last night in the woods. I fear from what I heard that a good many of these moose were snared. This fall I saw four moose and heard two others in two weeks, and last year in three weeks I saw eight and heard several others. We set three log bear traps and baited with trout, but after awhile the bait became soft and the bears took out the bait, failing to spring the traps.

H. W. HAMLYN.

HONOKUS, New Jersey.

NOTES FROM THE GAME FIELDS.

CANADENSIS, Monroe Co., Pa., Oct. 5.—The grouse shooting among the Pocono Mountains has not been a success so far this year. The birds are in good numbers, but on account of the heavy foliage cannot be seen when they are flushed. Rabbits are in large numbers, and on Nov. 1 will offer lots of sport. Every morning the hound runs one or two into the clearing back of this shooting box. There are a few ducks flying now; and once in a while we get a few on Elk's Pond, which is a short distance from here. One bag made on the first day of the grouse season consisted of two woodcock, five doves and eight grouse—a far return for a twelve-mile tramp. The birds are on the hills still feeding on the wild frost grapes, and so are very hard to get at, as the walking is beastly. We are all looking for a hard frost and a good blow to help rid us of the foliage. The trout fishing was very good this year and promises to be better next, as the underbrush along the runs has been cut out.

COLLINGWOOD.

Snow geese first appeared in this vicinity Sept. 28. Hutchin's brant arrived about a week earlier; in small flocks yet and flying high. Canada geese have been flying for three or four weeks. Mallards and teal are coming down from the north in small numbers, although duck shooting has been good around the coulees and slough holes wherever there is any water. Prairie chicken shooting has been very good and there are a good many strong coveys left yet. The indications are good for excellent goose shooting for the next six weeks. Visiting sportsmen of the right kind will be well received and can get good accommodations.

E. T. JUDD.

CANDO, North Dak., Oct. 3.

Have been hunting ever since I could hold an old musket against a tree, but have never seen quail so thick in all my life. Come down and be convinced and satisfied.

H.

DOVER, Oklahoma.

Weather is delightful. Quail are more than plenty. Fishing always good.

TARPON.

TARPON SPRINGS, Fla., Oct. 5.

A SUFFOLK COUNTY ASSOCIATION.

REPRESENTATIVES of the principal sporting clubs of Suffolk county, L. I., have recently formed a game protective association entitled "The Suffolk County Game Protective Association." The objects of this association are the enforcement of the game laws of this State and the preserving and propagation of game and fish in the county of Suffolk.

Special game constables will be placed in various parts of Suffolk county, and the association has determined to take energetic measures to secure the enforcement of the game laws, to prevent the unlawful taking of game birds and the selling of the same out of season.

The directors are: Harry B. Hollins, Alfred Wagstaff, Arthur D. Weekes, Robert B. Roosevelt, and Frederick Edey. Its membership includes representatives of all the sporting clubs on Long Island. Mr. E. H. Moeran is counsel of the association.

Among the clubs represented in the association are the Southside Sportsmen's Club, the Brooklyn Gun Club, the Waverly Gun Club, the Bay Shore Gun Club, the Southampton Sportsmen's Club, the Robins Island Club, the Westhampton Club, the Flanders Club, the Hempstead Club, and many others.

The association has been organized for the same purposes and somewhat on the same principle as the one now so successfully conducted in Connecticut, and it is to be hoped that it will receive the hearty cooperation of the public and the authorities in accomplishing the laudable objects for which it was formed.

THE CONNECTICUT ASSOCIATION.

THE officers of the Connecticut Association of Farmers and Sportsmen for the Protection of Game and Fish, for the year, are: President and Treasurer, A. C. Collins, Hartford; Vice-President, Dr. N. W. Holcombe, West Simsbury; Secretary, Hon. Geo. P. McLean, Simsbury; Directors: Hon. Geo. P. McLean, Simsbury; Hon. J. C. Chamberlain, Bridgeport; John R. Pitt, Middletown; Francis B. Skinner, Rockville; F. W. Whitlock, Waterbury; Samuel A. Eddy, Canaan; Geo. A. Reed, Chaplin; Z. E. Robbins, Norwich. Executive Committee: A. C. Collins, Hartford; Dr. N. W. Holcombe, West Simsbury; C. H. Smith, Jr., Hartford; A. E. Hart, Hartford, and Geo. P. McLean, Simsbury.

Mr. Collins writes: "Since our organization in 1888 we have successfully prosecuted seventy game and fish law violators at an expense of nearly \$1,400. It costs about \$20 to convict a fish or game violator, or in other words, it costs our \$1 members about five cents for each conviction. If we were furnished evidence it would cost less." We bespeak for the association a cordial support by farmers and sportsmen. The movement is in the right direction. They have hold of the right end of the stick.

LOCKED ELK HORNS.—Mr. E. C. Sloan sends us an interesting photograph of two pairs of elk horns locked together. They were discovered by Capt. David Howard and his son in Pacific county, Wash., and were sold to a Milwaukee purchaser for \$200. The skeletons of the antlered foes were found where the horns were; as Mr. Sloan says, "There was no survival of the fittest here." It was found impossible to separate the two without breaking them.

STILL-HUNTING DEER WITH DOGS.

Editor Forest and Stream:

Since contributing an item to your paper in regard to still-hunting deer with bird dogs my attention has been called by Mr. J. H. Mayne Campbell, of Toronto, to a very interesting article, by Sir Henry Pottinger, in the February last *Fortnightly Review*, entitled "An Island Deer Forest," Norway. It seems the writer of that article had no luck in "bagging" a deer and resolved to try an "elk dog," a hound, in still-hunting the red deer, and met with success. He labored under very great disadvantages in the use of that dog on that occasion, because the dog had to be handled in the leash by a servant. A dog which the sportsman is compelled to handle in that way in still-hunting deer is better than no dog.

I stated in a previous article that I have for several years been without a dog, yet for two seasons during that time a companion with whom I have hunted deer had a good blooded setter, yet the dog was not well broken for deer and had to be led, and would be continually testing the patience of his master by trying to pass the wrong side of a tree, or under a log when the convenience of his master required him to jump over, or by the chain becoming entangled in brush. A led bird dog, according to my experience, is far preferable to a led hound in still-hunting deer. The bird dog will allow himself, when his master becomes vexed at the pertinacity of his dog, in going where according to the judgment of his master he ought not to go, to be jerked bottom side upward, without whimpering, but the hound, according to my observation, will on every trifling chastisement, when led, cry out at the top of his voice.

Let the sportsman take his intelligent, well-broken bird dog with him once when still-hunting deer and he will never regret the experiment.

H. L.

AMONG THE WILDFOWL.

Editor Forest and Stream:

Your Chicago correspondent, Mr. Hough, under date of Sept. 24, mentions that there is "something wrong" with sketch No. 3 of the wildfowl series, entitled "Where Ignorance is Bliss." In a few words (with your permission) I propose to explain just what the sketch was intended to convey:

A duck hunter has set his rig on a sedgy point, and, after a survey of the waters adjacent thereto, seeing nothing either swimming or flying, he concludes (the day being perfectly calm) to take a snooze, hoping for a breeze later on. The sedgy grass stands straight, scarcely nodding, so still is the air. A catspaw gently plays among the decoys, 'tis just enough to make them head up, and with the catspaw ruffling the water, a wandering canvas-back takes the opportunity to breast it and investigate, while our friend is sleeping.

From the tone of Mr. Hough's letter I judge he is pleased with these sketches, and I trust that succeeding numbers will meet with commendation from one who is evidently a thorough sportsman, both legally and otherwise.

W. TOWNSEND.

BAY RIDGE, N. Y.

A HOLLYWOOD INCIDENT.—The New York Times tells this little story of an incident at Hollywood Park, Long Branch: "Everything was conducted on a scale of splendor and magnificence that bewildered the native Jerseyman, who began to regard Mr. Hoey as a modern Monte Cristo, with an endless source of wealth. His ambition was to establish the most unique place of its kind in America, if not in the world, and money was not spared to carry out that ambition. Travelers from all parts of the country went to Long Branch to see Hollywood. The proprietor himself was generally seen on Saturday in a suit of the rustiest old clothes and a time-worn hat inspecting his possessions. A small fox-terrier was his faithful companion on these occasions. Very often he was mistaken for one of his own workmen. One morning he caught a sportsman shooting at quail in the woods in the rear of his residence. He pointed to a sign, 'No shooting or trespassing allowed,' and asked the gunner if he had seen it. 'Yes,' said the sportsman, 'but old John won't know the difference.' Hoey was dressed in his rusty suit. He walked up to the young man and said in an off-hand tone, 'That's a fine gun.' 'Yes, I paid \$220 for it. It is one of the latest. You see it is hammerless.' 'I never saw a hammerless gun,' said Mr. Hoey, innocently. The sportsman handed him the gun, with the remark, 'Look out, she's loaded!' 'So much the better,' said Hoey, stepping back and pointing it at the sportsman. 'It will cost \$25 more to get it from the Justice of the Peace. So old John won't know the difference, will he? Now git!' And he got."

A MEXICAN SPORTSMAN'S CLUB.—Mexico City, Oct. 2. —A meeting was held yesterday to arrange the preliminaries for the organization of a shooting club called the Chapala Shooting Club. The object of the club is to purchase grounds for shooting purposes adjacent to Lake Chapala on the Guadalajara branch of the Central Railway. The proprietary members are: R. S. Towne, New York; E. C. Brown, San Luis Potosi; E. W. Gould, Jr., E. H. Whorf, W. A. Frost, A. C. Michaelis, E. W. Jackson, Guillermo Landa y Escandon, Charles Sommer, Daniel Turner, W. H. Keller, Thomas Braniff, R. M. de Arozarena, Geo. D. Barron, E. Harris, H. C. Payne, Mexico; H. A. Vaughn, Guadalajara; S. W. Reynolds, Boston; H. C. Pierce, St. Louis; M. S. McCay, E. V. Sedgwick, San Luis Potosi. Other applications for membership are in hand which will soon be dealt with. Besides the 25 proprietary members, there will be 25 associate members elected. The necessary grounds will be secured forthwith and a club house erected thereon, and boats, etc., will be bought, a committee having already been appointed for the purpose. The lake and district of Chapala abound in game, and the members of the club will have excellent sport there. A hunt will be organized just as soon as the club house is erected. The principal game will be duck, snipe and geese.

LONG ISLAND DEER HUNTING.—The law permits deer hunting on Long Island for the first ten days of October, exclusive of Sundays, but this year hunting was kept up on both Sundays, the 4th and 11th. The number of deer killed can only be conjectured, but it approximated 75.

GAME PROTECTOR KIDD.—In summer and winter, fall and spring, says the Newburgh (N. Y.) *Journal*, Dr. Willett Kidd is a busy man. He conducts a dental business, and at the proper seasons indulges in ice-boating and fishing. Yet as fish and game protector he is industrious as well, all the year round. One of the official's latest victims, in contact with the inexorable game laws, is the young son of a well known and wealthy New York wholesale grocer. This young man has recently been obliged to pay the full fine imposed for a violation of the law in wantonly shooting pretty song birds. Another of Dr. Kidd's latest cases is that of a prominent official down in Rockland county. That gentleman has settled for an infraction of the law, in catching fish in a net in Orange county. He ought to have known better before the act; he certainly does now. New case No. 3 is that of Wm. Rhinehart, an Ulster county market man. He lives at Rutsonville, but is charged with having transported certain game birds out of season from Bruynswick. Both places are located out near the town of Shawangunk. Suit has been brought against Mr. Rhinehart in the Supreme Court for the recovery of penalties aggregating \$250.

ST. LOUIS NOTES.—This week there was concluded an important deal in the way of a hunting and fishing preserve. [Some 10,000 acres of land, taking in eight miles of the Merimac River, located in Crawford county, has been purchased by a number of St. Louis gentlemen, among whom we note Judge T. R. Partis, James E. Blythe, D. Able, George Bain, W. W. Withnell, George Burnett and J. W. Bucl. The price paid for the property was \$50,000. It is proposed to spend \$50,000 more in making improvements, and a summer hotel is on the programme. The property is less than 100 miles from St. Louis, and contains an abundance of large game. The quail season has opened with many hunters out, who report an abundance of birds. One hunter reports to us having in one day come across three broods of quail too small yet to fly. It seems as if these young birds must be the result of a second hatching, but if not, the opening season should be Nov. 1 instead of Oct. 1.—ABERDEEN.

PULLED THE MUZZLE.—The Troy Times reports that a Castleton, Vt., boy went out Sunday to pick up walnuts that had fallen from the trees Saturday night, so as to prevent outside parties getting them. He took a shotgun. While picking the nuts he saw a gray squirrel in a tree. He reached for the gun, which he had laid across a fallen tree, and took hold of it by the muzzle. In lifting it the trigger caught on the tree and the gun was discharged. The charge of shot entered his left arm, near the wrist, and ploughed through clear to the elbow, tearing the arm almost to pieces and showing the arteries, muscles and bones. He made his way to his grandfather's house, and from there he was taken home, where the doctor attended.

"Forest and Stream" Nursery Rhymes.

IX.

TOM, Tom, a nimrod's son
Sneaked his father's loaded gun;
Out in the field he found a hare,
"Old Betsy" she was fixed for bear,
She pecked his nose, she soiled his clothes,
But still he smiled for he got there.

AZTEC.

X.

A gun crank bought a gun,
For a while he thought it fun
To "target" the same,
Till his shoulder was lame,
And of shot he'd used a ton.

A shooter went out to shoot,
The targets went off with a scoot,
He "held on," "held ahead,"
Wasted plenty of lead,
And missed 'em all, the unlucky galoot.

LEDGE FISHING FOR OUNANICHE.

TO say the ouinaniche is a landlocked salmon, writes Ripley Hitchcock in the *Christian Union*, would seem to relegate him to the rank of his brethren of Lake Sebago and Lake Sunapee and other peaceful waters—an honorable rank, yet inferior to his own. For the ouinaniche, while the naturalists may dismiss him as simply the *Salmo salar*, variety *sebago*, is the result of peculiar conditions. For him, more than most of us, life is a struggle. He lives in the rush and roar of torrents, and seeks his food where no weakling may venture unscathed. At the Main Chute of the Saguenay, where the vast volume of white water roars past Laurentian crags, and at the foot of cataracts on the Mistassini and Peribonca, the ouinaniche is at home. Naturally, he has become possessed of a body like vibrant steel, a tail of incredible size and power, and a dorsal fin which shows above the water as he feeds like a lateen sail. If in all this there lurks the sin of over-emphasis, it will be pardoned by those who know the joy of finding a fisherman's legend founded upon the eternal verities.

I leave to others the discussion of the migrations of the ouinaniche, his exact habits, and the possibilities of his extinction. My own introduction was under circumstances so adverse at first that I seemed on the point of repeating the familiar experience of those who gorge the bait offered to "sportsmen" by the hotel prospectus and railway advertisement. I had "oufitted" at Roberval on Lake St. John,

and, with my two half-breeds, a canoe, two tents, blankets, and a small mountain of supplies, I crossed the lake on an absurd little logging steamer, which finally stopped by the simple process of running aground on the sand-bars a mile off the mouth of the Mistassini. The birch-bark canoe was launched and loaded, and the men bent to their paddles in a heavy rain, which pursued us fitfully at dinner, at our night camp in the dripping forest, and at our waking. The men hung back. "Trop mouillée," was Philippe's constant plaint—my stalwart Philippe, with a face more ferocious than that of any Apache renegade whom I have ever seen in Arizona, and a voice like that of a homesick calf. It was simply one of the questions of will and discipline which are apt to be raised in "the bush," and by good men, too, merely to test a new employer and to determine the chances of an easy-going trip. But the issue was met and settled then and there, and late in the afternoon of the second day, despite rain and four long portages, we reached the magnificent fifth falls of the Mistassini and apparent failure. Not a single ouinaniche could be bribed to take my flies.

It is easy to console one's self with the familiar "it is not all of fishing to fish" when the fisherman stays his hand from mere satiety; but philosophy is more difficult for the empty-handed. It was true that the air of that northern solitude was a tonic, and the cataract itself worth the journey from New York. Yet philosophy and the natural man fought hard for the upper hand as I lay on my fragrant bed of fir boughs, listening to the patter of rain on the tent and the roar of the mighty waterfall close at hand. But in the morning, after more fruitless endeavor here and there among waves which tossed the canoe like the traditional cockle-shell, we landed on a sharply sloping ledge of Laurentian rocks. There I stood braced in a crevice above the water, but not out of reach of waves which leaped up from a troubled sea, and there in that angry flood, where fly-casting seemed a mockery, I found the ouinaniche. There was a sudden tug down under the surface, and at the answering strike a silvery body flashed four feet high in air, and I heard Louis's whoop and Philippe's shout, "C'est un gros, Monsieur, un gros!" "Un gros" the fish certainly seemed to be, as twenty-five yards of line were taken from the screaming reel in the first rush out into the rapids, were another leap was followed by a rush straight in, and then a fit of sulks. So the moments crept on, each second vibrant with suspense, while the gallant fish, now in water, now in air, fought with a courage and tenacity which I have never seen equaled by trout or black bass, nor by a grise in point of endurance, nor hardly, pound for pound, by a salmon. How long this battle royal lasted it would be hard to say. Philippe measured time by his pipe, and he smoked three. At last I was able to strain the ouinaniche toward the ledge where Philippe clung precariously, and in another instant the fish was in the net, Louis was gripping it through the meshes, and both men were scrambling like cats up the face of the rock to a safer place. There we administered the *coup de grace*, and I noted the shapely head, the clean-cut body, with the iridescent greenish gill-markings and dark spots on the silvery sides, and I marveled at the width of the powerful tail and the size of the dorsal fin. No sportsmen could ask finer game, and no gourmet could take exception to a fish whose flesh is more savory than the trout, and less cloying than the *Salmo salar*.

It was off this same Laurentian ledge that I fought and killed all my ouinaniche during those rare days. They were days of moving experiences with ouinaniche which seemed to spend all their time in air, with others which leaped up on the rock beside me, or fought their way far out into the rapids, or "bored" doggedly at the bottom, while the line vibrated as if at strokes of the powerful tail. And all this time I was at a place which would make the fortune of the summer landlord if it were, unhappily, accessible to "summer visitors," and not so far to the northward that even the outpost cabins of settlers are below, and the only human beings to the north are a few trappers and the Eskimos.

TROUT INJURIES.

Editor Forest and Stream:

May I ask for information? While on my last outing in Maine I visited Blanchard Pond in the Dead River region, and there enjoyed one evening's fly-fishing such as I have never experienced before or expect to for some time to come. The trout averaged 14lbs. each, and took my silver doctor and brown-hackle viciously. I have caught speckled trout weighing over 4lbs., but never did any give me battle like these of Blanchard Pond. After supper, as we were admiring our gamy beauties, my guide called my attention to several ugly sores on the sides and backs of all my fish and asking me to explain their presence. I could not, and that is what I am about to lay before you. On turning to my diary I find that the pond is a pretty sheet of some five acres in extent, surrounded by heavily wooded hills and supplied by springs. The water is a clear coffee color and very cold. Along its border long-stemmed lilies grow and are its only vegetation. Curiously enough it has no visible outlet, yet this lake rarely rises or lowers its surface, as can be seen by its shores. The trout themselves were finely shaped, lithe and ferocious, very, very dark in color, with spots almost black, the upper jaw projecting and terminating in a slight hook similar to the salmon. They were apparently in good health except for the sores, and gills, which were very pale or faded. We did not eat these fish, fearing they had some blood disorder. Have you ever met with a similar case in your experience? and if so, please state plainly the circumstances, and thereby help to explain, to me, a very interesting case.

SEDLGE.

[Judging from the hooked jaws we believe that the injuries observed resulted from battles between the males approaching the breeding condition. It is to be noted, however, that leeches cause sores on certain fish, although we have not known this to occur with trout. Another very common cause of injury in the salmon family is the fish louse—a species of lernæan, which fastens itself to the sides, gills and mouth, and causes severe inflammation and ulceration. It has been supposed that the habit of going to sea was acquired through the desire of becoming free from these troublesome parasites.]

A BOOK ABOUT INDIANS.—THE FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—Advt.

FISHING WITH TRAINED CORMORANTS

By CAPTAIN F. S. DUGMORE, R. N. R., Master of the Falconry Club 1878 to 1883.

[Concluded from page 232.]

CHAP. VIII.—DAILY MANAGEMENT.

WHEN all your cormorants have been thoroughly trained, and have had say a week's constant practice with plenty of good luck, the wearing of the collar may be dropped except on fishing days, when it must be adjusted immediately after the morning mouthful.

If you keep them in a pen and there does not happen to be among the lot a spiteful bird, a born anarchist or agitator by nature, given to biting his fellows and to making things generally disagreeable all round, no substitute for the collar will be necessary. But if you have no convenient inclosure, or if you find any difficulty in keeping it clean—a paved yard should be slushed down every day—picket your birds by the legs on a grass plot, using leather "jesses" $\frac{1}{4}$ in. broad, somewhat similar to those worn by trained hawks and falcons.

The hawking jess pure and simple (Figs. 3 and 4), ex-

FIGS. 3 AND 4.

cepting that it is cut straight, lightness being no object, is generally used; with a yard long cord, knotted or running-looped at one end, passing through a hole in each jess, in lieu of "leash" and swivel (Fig. 7). But it has one disadvantage; it cannot be quickly removed by gloved fingers.

Consequently I prefer an arrangement of my own (Figs. 5 and 6), the jess being used as a simple slip or running

FIGS. 5, 6 AND 7.

noose, with a stop consisting of a sudden break in the width of the leather to prevent its tightening close round the leg. This can be slipped off in a moment without any difficulty.

Keeping your cormorants thus tethered by the leg to loops on the picketing rope, a whole team of eight to twelve birds can be fed in five minutes instead of twenty, which would be required if collars were habitually worn.

To avoid destroying the grass, as well as for sanitary reasons, the picketing line should be shifted every day, or every alternate day at the very least. With regard to feeding, once a week before a day of perfect rest, the birds should have a "gorge" or full feed. On other days, when fully grown and trained, they should get about a half feed in the afternoon, in addition to a mouthful or so in the morning.

Over-feeding, especially while the bird is wet, may bring on indigestion; for the digestive organs of cormorants are by no means so strong as would be imagined, judging from their exuberantly healthy appetites.

Underfeeding and overwork, together with too much exposure to cold and wet, may bring on cramp of the lower limbs, almost always ending in hopeless paralysis. For indigestion, rhubarb and cayenne pepper or pepper corns, concealed in a morsel of food, are the best remedies. For cramp, cayenne, warm wraps and the kitchen fire.

Either malady, not attended to, will often prove fatal within twenty-four hours; neither need ever occur with reasonably careful management.

For laziness and torpor, thirty drops of the second homeopathic solution of nuxvomica on powdered white sugar, repeated for several days an hour before feeding (in the morning), may effect some improvement.

The best possible cure for a trained cormorant that appears to be seedy or out of sorts (of which drowsiness is the first unmistakable symptom) is a recourse to Dame Nature herself.

Turn the bird loose for a couple of days, without collar, into some small lake or pond containing more or less fish, and leave it to take care of itself.

When a sick bird is under treatment, the collar must invariably be removed, lest it should impede vomiting and cause apoplexy; as also at any time when a bird may be observed trying to throw up a "casting" of fish bones and indigestible skin.

After all the birds are perfect at their work, they should, as a general rule, be used in couples or in threes; both because emulation will prove a powerful incentive to exertion, and because they assist one another greatly under water, the hindmost bird often striking at and capturing a fish that has suddenly doubled back past his leading comrade. (Illustration 1.) They work together just like greyhounds at a coursing match.

Until quite perfect, it is better to work the team all together, so that backward birds may be stimulated by the example of their companions, until all shall have approximately attained a uniform standard of excellence.

To be capable of giving a good afternoon's sport, a working team of cormorants should not consist of less than six good birds, to be used in relays of two at a time, the remainder resting or drying themselves. A team of nine can be worked with great advantage in relays of three. To make quite sure, I prefer a minimum strength of eight; consequently, if nestlings are used, considering that any losses cannot be made good until next breeding season, not less than twelve birds should be procured and put in training. Once trained, any superfluous birds can be kept in reserve without trouble. They never forget their training to such an extent that it cannot be completely recalled in a couple of days.

In districts where wild birds can be readily caught at

any time, the total strength of the team may be fixed at six; their capacity for work is usually much ahead of nestlings.

While these numbers are recommended as placing their owner in a position to be certain of showing sport at any time without risk of failure, I do not wish to dishearten persons who may prefer to go in for the use of cormorants on a much smaller scale, or only as an aid—and a very material aid—to their housekeeping economies. In a favorable locality, a couple of wild-caught cormorants, while costing nothing for their own maintenance, will amply suffice to keep a large family thoroughly well supplied with fish, and that without occupying much of their master's time: given fairly well-stocked waters, of which there is assuredly no lack in America, the two birds will provide daily more fish than a dozen people can consume.

A couple of nestlings, if good ones, will do almost as much; but the smaller the number of nestlings that are put in training together, the less chance there is of any of them turning out exceptionally well. As before explained, each bird assists in the education of his fellows. So that it is well to train more than are required, afterward reducing the strength of the team by judicious drafting.

CHAP. IX.—THE PALANQUIN.

We now come to the means of conveyance to and from the fishing grounds that we intend working. If these are close to home, the trainer and his friends can carry a cormorant apiece on the left arm, the right hand retaining, as a rule, hold, or at least a light touch of the bird's head. This, not only as a precaution to save the carrier's face from possible damage, but to prevent the eager bird jumping off and hurrying prematurely to work directly the water is sighted.

If you have some distance to go by water, with a little assistance the birds may possibly be kept tolerably quiet in your boat. But if an overland journey of a mile or so, or perhaps a long drive, has to be performed, it is quite another matter, and you must have recourse to a cormorant palanquin. (See Fig. 8.)

FIG. 8.

This is a rectangular box or hamper, 3ft. 6in. in length from 32 to 40in. in breadth, divided into either six or eight compartments running the entire length of the palanquin and closed at each end by flap doors opening downward. The compartments are in two tiers.

The object of the door at each end is to allow of the bird, which must have no room to turn round inside, being both put in and taken out headforemost; this is indispensable, to save the tail from being smashed. Loops are arranged on the four upper corners of the palanquin, for poles by which it is carried, and as a means of suspending it under the axles or buckboard of a wagon or buggy.

If the palanquin is made of wood, each of the doors must be pierced with several $\frac{1}{4}$ in. holes for ventilation. For the sake of lightness, strong basket-work is preferable to wood. My own cormorant palanquin is made of cane with a wooden floor to the upper tier.

Wood or basket-work, it must be thoroughly washed out immediately after being used.

The birds, each tempted in for the first time or two by a tiny morsel of fish at the further end of its own compartment, should not be kept in the palanquin longer than is necessary; but as soon as practicable after arrival at the scene of operations, should be tethered out by the collar to the picketing-rope, a shady spot being selected in summer, a sunny and breezy place in cold or damp weather.

CHAP. X.—L'ENVOI.

In conclusion, I would add a few words of encouragement to those of my readers who may be induced by what I have written to take up seriously one of the most charming, easy, and economical of outdoor amusements; one, moreover, with which it is in their power, if of unselfish disposition, to afford much pleasure to any number of friends and acquaintances, whom perhaps the hustle and bustle of business leaves without leisure to provide for themselves the active relaxation and unbending that, as a mental tonic, is so much more valuable than mere, dull, passive rest.

They may go ahead in the full confidence that the art is absolutely devoid of the element of uncertainty that attaches to almost all other outdoor sports, such as falconry, racing, gunning, angling or dog-breaking; in each of which, at best, occasional success, alternating with, and oftentimes spoiled by disappointment, can alone be reckoned on with anything like certainty.

The cormorant master is not dependent on a precisely proper amount of ripple on the water, or of flying clouds in the sky, without which the holiday so long anticipated by the fly-fisher may turn out a melancholy blank.

Given the fish, and given the trained cormorants, "a blank day is an impossibility."

A muddy state of the water, or too large an expanse of it, may deprive him of some of his pleasures, by concealing the beautiful evolutions and ingenious maneuvers of the birds, as with snake-like necks and prying eyes they rapidly explore every hole in the bank, the dark recess behind every clump of roots or group of boulders, while traveling up against the river's current; but he can still see each captured fish brought to the surface, adroitly pouched, landed, and obediently surrendered; while he enjoys the proud satisfaction of feeling and asserting man's "dominion over the fowls of the air," not by their wanton destruction, but by rendering their marvellous intelligence subservient to his own. It is sport, too, that can be taken up at one time and temporarily dropped at another, to suit the convenience of the moment; and that without loss.

Unlike hawks, cormorants, when once perfectly trained and well practiced, can be left idle for many months without any permanent deterioration whatever. After being shut up in a yard for a year, and their food hurriedly thrown to them, two or three days exercise will

make them as good as ever they were; though, of course, where their owner has a small isolated lake at his disposal, turning them loose thereon is a more satisfactory way of keeping the birds through a period of idleness.

It is quite possible to use cormorants all through their moult, while scarcely advisable to choose that season to recommence work with birds that have been long idle.

Then it is a great comfort to feel that the cormorants having no intrinsic value and being so easily replaced, an accident such as the loss of a bird or two is not a misfortune of any great consequence; so long as one good bird is left, recruits will almost train themselves; moreover, a disappointment about birds from the April breeding places in the South can always be remedied up to the end of June, or even July, by having recourse to the cliffs of the far North.

I believe nothing is required beyond the advent of some energetic propagandist who would add the performances of a good fishing team to the attractions of a camp-meeting of the American Canoe Club, to enlist so many disciples that ere long cormorant fishing shall become a national and popular recreation of the masses of the American Commonwealth; so to remain long after the present feverish multiplication and increasing perfection of implements of destruction shall have deprived the gunner of any game to shoot at excepting clay-pigeons, and shall have made field trials impracticable for the dog-breaker; unless indeed the same clay-pigeons rubbed over with red herring or aniseed, and sown promiscuously over the competition grounds, can be utilized to display the attainments of his pointers and setters.

The foregoing not very voluminous chapters do not, I think, constitute much of a tax upon the understanding or the memory of the tyro; and yet, as a very old cormorant fisher, I can safely affirm that they contain all the information than can possibly be required. No authoritative text-books on this art exist, so far as I know, in the English (or American) languages. A French pamphlet, written after perhaps half a dozen, days or less out with trained cormorants, by an ardent Parisian (literary) sportsman and old friend of my own, whose trainer was (previously) sent to me to be trained some seventeen years ago, is, I believe, out of print; as is also a chapter or appendix to an excellent work on falconry by another old friend of mine. Both are to me inaccessible at present, my library being thousands of miles away.

But an ounce of fact is proverbially worth a pound of theory; consequently the learner may follow the foregoing directions with the assurance that they do not contain one single word of compilation or imagination, but are drawn exclusively from my own personal experience; and that I do not ask him to do anything that I have not myself actually done.

Once more counselling him to go and do likewise—only more so—I now take my leave of him, with best wishes for the signal success that, he may take my word for it, is at his absolute command.

[The writer has consented to reply to any requests for further explanation that may be addressed to him (under cover to our office) by actual learners.]

MAINE WATERS.

THE Maine trout season closed exceedingly dull. The number of trout taken in Maine waters was probably smaller during the late August and all of September than for many years. Low water was doubtless greater the cause of this ill-success to the rod and reel fisherman than any other. No rain in the Maine woods during the summer and none in September rendered the streams and lakes remarkably low. Such conditions are not favorable to trout fishing, especially when accompanied by weather abnormally hot. Indeed the latter days of September and the first days of October were hotter in the Maine woods than was the average for the same number of days in July. Trout fishing was at a low ebb. Not even the evenings and mornings were crisp and cool as usual in the late September, conditions which bring the trout up to the fly at that time of the year. No active rising to the fly is reported from any of the Maine waters this fall. This dry weather and remarkably low water may also be productive of other results not favorable to the fish, as well as the ruining of the fall trout fishing this year. The trout have begun to seek the spawning grounds as usual. But these spawning grounds are not found where they should be. On the contrary, the water has far receded from them and they are only plats of dry gravel, in some instances, many rods from water sufficient for the trout to breed in. Richardson Lake, one of the Rangeleys noted for its noble trout, was on Oct. 1 fully 18ft. below high water mark, and 14ft. lower than it has been for the past 4 or 5 years at the commencement of the season when the trout usually seek the spawning grounds. The other lakes of the Rangeley chain are nearly as badly off, as indeed are all of the many trout lakes in Maine that are used for the storage of water for the turning of mills below. What is the result of this low water thus far? The trout are on new spawning beds further down the mouths of the streams they have usually ascended to spawn. Giant trout might be seen on these beds on the last days of September. Considerable fly-casting was done over them by excited sportsmen. But they did not rise to any considerable extent. Mr. C. H. Johnson, of the Camp Stewart party, took one on a mongrel fly, partly silver-doctor and partly something else. The fish weighed 6lbs.; a male, with all the usual autumn markings of dark vermillion sides and greatly hooked under jaw. Had the fish been plump, as in the spring time, it would have weighed at least 7lbs. There was nothing in the cavities of the body. The fish had evidently eaten nothing for weeks.

What is to be the result of this low water at the beginning of the spawning season? Later, and before the spawning season is over, the new spawning beds will be under many feet of dark and probably roily waters. The fall rains will doubtless bring up the lakes and streams to the usual pitch. The little trout, if hatched under such conditions, will be in the very teeth of all the enemies that nature has taught the parent trout to seek to avoid for their progeny, by ascending the streams as far as possible to spawn. It does not look as though the trout breeding season of 1891 could be much of a success in most of the Maine waters, and the possibilities of artificial stocking are brought more forcibly to mind than ever.

SPECIAL.

THE HEMLOCK LAKE BASS.

HEMLOCK LAKE, N. Y., Oct. 8.—*Editor Forest and Stream:* In *FOREST AND STREAM* of Sept. 24 is an article, "Black Bass in Hemlock Lake," which is correct so far as it tells the tale of stocking the lake with bass in 1859. But credit is given to the Lima Club entirely, whereas the movement originated in Springwater with twenty-two subscribers to the paper; then it was sent to the late H. J. Wood, of Lima, who obtained twenty-nine more subscriptions at Lima and Livonia. The original paper lies before me; I have kept it as a memento, my brother, Geo. A. Pierce, keeping the contract as a memento. These bass were the large-mouth or Oswego bass and never became plenty.

The black bass we now get are the small-mouth. They were put in the lake in January, 1871, together with rock bass and wall-eyed pike, by Geo. A. Pierce, N. A. Kellogg, myself and two or three others. I went to Rochester and obtained them of Seth Green.

We had fine bass fishing until two years ago. For two years the poachers have speared them on their beds while they were taking care of their young, thus destroying thousands at a blow; and the hotel keepers, rim leaders in it, then ask their patrons to come and fish in the summer, and wonder fish are scarce.

Last May and June I could see almost any night from my cottage from one to five lights spearing bass. Result: the bass fishing ruined.

The trout fishing is also ruined by set lines and gill nets; but few are now caught, though for twenty years nearly every winter N. A. Kellogg and myself have procured trout fry from Mumford in behalf of Springwater and Dansville subscribers, and stocked the lake. Mr. L. A. Pratt, of Rochester, and Lima and Livonia parties have also put some in. Three years in succession we put in whitefish; a few have been caught by gill-nets. Pickerel and perch were placed in the lake in December, 1883, by A. Southworth, H. S. Tyler, S. G. Grover and others of Springwater. A disease used up the perch a few years since, and they are now seldom caught. Fly-fishing for perch at one time was great sport.

The above is a correct account of the stocking of Hemlock Lake, one of the finest lakes in the State, its clear, deep waters producing the finest quality of fish. It is quite a summer resort; on its shores are about 130 cottages and four hotels. It is seven miles long, one-half mile wide, and about 100ft. deep. Abrupt hills, over 1,000ft. high, rise each side, covered with a forest on the steep sides. Just now the trees are putting on their autumn tints. In the summer there are on the lake numerous steamers, yachts and rowboats, making a lively picture. Alas! the fishing is ruined by the poachers, and that includes many who own cottages, as well as some of the landlords. W. H. PIERCE.

CHICAGO AND THE WEST.

CHICAGO, Ill., Oct. 2.—Mr. Frank Lawrence had on exhibition yesterday at Spalding's a magnificent mascalonge lately taken by himself at Tomahawk Lake, Wis. The fish was reported to weigh 32½ lbs., and was a beauty in every way, as shapely as a salmon.

I suppose the worst fish liar and best tackle salesman on earth is Mr. A. Hirth, of Spalding's house here, better known as Papa, or Paw, or old man Hirth. Mr. Hirth could doubtless stop a clock, but he could not stop a street car. Attempting the latter, he sprained his knee, and has had a great deal of trouble with the injury since then. I do not think his conscience can be sprained.

Our friends should by this time be pretty well acquainted with the Mak-saw-ba notables, Messrs. J. P. Card and Billy Mussey, and so I know I shall be forgiven for my regular weekly Mak-saw-ba bass item. This week it is hardly less than wonderful. There were brought into Mak-saw-ba Club house last Saturday 75 bass, nearly all small mouths. Of these Mr. Card had 21, of which 16 were small-mouths, a total weight of over 50 lbs. Mr. Mussey had 15 and Messrs. Holden, Harris, Organ and Kinney also had fine strings. Mr. Kinney took what is thought to be the largest bass ever brought into the club house, a big-mouth that weighed 6½ lbs. Billy Mussey also caught a dogfish that weighed 14 lbs. The quantity of fish being taken out of that narrow, deep stream in Mak-saw-ba marsh is something fairly startling.

The Kankakee Association has a Committee on Protection. It is time this committee should do something. It should delegate a man to visit Mr. Dennis, the State Fish Commissioner of Indiana. It should further take action in getting a warden for that part of the river which lies in Illinois, as all below Mokena does. It seems that an evil exists of which little knowledge has existed, here at least, and that is winter netting. I append a letter from Mr. George Kamper, president of the Vermilion County Association, whom Dr. Bartlett reports as one of the best wardens he has in the State. The latter was written to Dr. Bartlett, and by him referred to President Cole, of the Kankakee Association, from whom I obtained it. It reads as follows:

DANVILLE, Sept. 23.—*Mr. S. P. Bartlett*—DEAR SIR: I have just returned from a three days' fishing trip in the Kankakee River at Mokena, and you can readily believe that I did not fail to inquire into the matter of illegal fishing in that vicinity. I found that during the cold weather there is a great deal of fishing with gill nets, trammel nets, hoop nets and spears, and that perhaps hundreds of tons of game fish (bass, pike, wall-eyes, croppies, goggle-eyes, etc.) are destroyed annually by those methods within ten miles each way of Mokena. I know of course that the Kankakee River Association, which is composed principally of Chicago sportsmen, intend to enforce the law, but have made a wrong start.

I know a young man there named Chas. Helmhaugh, who is a true sportsman and a genuine enthusiast in fish and game protection, who would be the right man in the right place. He lives a mile above Mokena and knows every violator up the river for ten miles. Charlie is enthusiastic enough in the cause of fish protection to have gotten from me a promise that I would come up there any time he might call for me, although that would be considerable of a sacrifice for me to make. The distance from Danville to Mokena is 75 miles, and although trains run it in about two hours the fare of \$4.00 per trip, coupled with other small necessary expenses, causes me to have absolutely no desire to make trips of that kind. I give my time and labor cheerfully, but can hardly afford to give in addition a considerable amount of money for the good of the cause and to principally benefit others.

If the Kankakee Association would make arrangements with Chas. Helmhaugh, they might succeed in stopping the illegal slaughter of game fish, which is being carried on every winter near Mokena.

I am not acquainted with any members of the Kankakee Association and have for that reason applied to you in the hope that you may be able to do something in the matter, feeling that you will be confident that my sole desire is for the good of the cause, trying simply to devise the best possible means for accomplishing the desired end.

Hoping to hear from you in this matter I remain yours, respectfully,
GEO. KAMPER.

The above is very good testimony for Mr. Helmhaugh, and it is very good food for thought for that hibernating committee.

Mr. Geo. E. Cole, president of the Kankakee Association, and myself expect to run down the Kankakee and look at the fishways next week, thence going down the Illinois River to Peoria, where the State boat Lotus is at present lying, and meeting there Dr. Bartlett and all the jovial crew of that sturdy little steamer for a further trip down the Illinois. Properly made, this would be a pleasant and useful trip, though hurry will spoil much of it for us. The Kankakee is very low, and it is said a row-boat cannot float in one unbroken stretch over 12 miles.
E. HOUGH.

ABUNDANCE OF SALMON.—*Editor Forest and Stream:* Is there any foundation for the following story clipped from the *Two Republics* of Mexico City? "This is a great year for big crops. Now it is the salmon crop that exceeds anything in the history of the United States. Puget Sound is reported to be so filled with salmon, making their annual run to the sound shores and the fresh water streams for feeding and spawning, that the steamboats seem to be floating on a solid mass of fish. The paddles kill hundreds of them, and are choked with their bodies. The sound steamer captains describe the run as an unbroken string of salmon thirty miles long, and the water for that distance being fairly alive with them. Neither the oldest inhabitants nor the aged Indians remember such a big salmon run. The result of the enormous run is a big reduction in prices. Usually good salmon sell for 10 to 25 cents apiece, but now at 1 cent each the market is glutted with the finest quality of fish. At Port Williams, a few days ago, two casts of a seine netted over 3,000 fine salmon. Everybody is fishing."—*AZTEC.* [It is true that Pacific salmon have been unusually plentiful during the past summer, prices to fishermen have been uncommonly low, and serious troubles have been caused by the surfeit of fish. The runs of salmon are in direct relation to the amount of rainfall, drought being followed by a scarcity of ascending fish and freshets by increase in the number and size of the incoming schools. Concerning the Alaskan yield Mr. Franklin Booth writes us: "Big catches are reported from Chignik Bay and Bristol Bay this year. Karluk has fallen off from its 1889 record, but still is a good fishing ground." The bays mentioned are on the east and west sides of Alaska Peninsula. Karluk is on the west side of Kadiak Island. The decline here is ascribed chiefly to injurious methods of fishing, but was influenced also by the withdrawal of most of the men in the height of the season. The rivers of southeastern Alaska were unusually full of salmon.]

ALBANY ANGLERS.—Mr. H. S. Ball writes in the *Albany Union*: "The season for fresh-water fishing has about closed. To be sure, there will be many days when lines will be cast after bass and pickerel, but the average angler puts away his tackle long before November sets in. From this time on but little fishing will be done; a few enthusiasts will keep up the hunt, and even when winter comes and the waters are ice-bound, they will be found angling through the ice, a very enjoyable pastime when properly followed. In the vicinity of Albany the season has been only fairly successful. Large catches have been few and far between, while the average weight has been lighter than usual. In the waters some distance away, the usual good reports have reached us. The St. Lawrence, Lake George and Lake Champlain have furnished better records than any time during the past ten years. The Adirondack region, outside of club preserves, is in a woeful state of depletion. Anglers should always look forward to the next season; if the results of the year have been bad, they can be made better. How? By coming right down to easest work, enlisting the services of our fellow anglers, in seeing that the streams and lakes are restocked, and most important of all, seeing that during the closed season these waters are protected from the ravages of the fish hog and fish thief. There is a great deal the angler can do from now on to better the possibilities of next season. He can well afford to put in both his time and money, for the next season will soon roll around again, when by augmented scores and better sport he will be paid for all he has done."

THE ANGLERS' ASSOCIATION OF THE ST. LAWRENCE RIVER continue to display their old-time activity in protecting the St. Lawrence River from netters. A few days since Protector Northrup with assistants made an inspection of the upper portion of the river, and in the vicinity of Fox Island, where several nets had previously been taken, he found and captured 10 large hoop nets, which were burned the same evening at Alexandria Bay. Protector Northrup seems to be a thorough and efficient officer and is continually on the scent for law breakers. Since his appointment on July 14 he has captured 16 trap, 10 hoop and 3 gill nets, besides a number of night lines. It is to be hoped that at an early day the Canadian authorities will see the wisdom of protecting their side of the river as efficiently as the Anglers' Association of the St. Lawrence River do the American waters.

RED DRUM OR CHANNEL BASS.—New York, Oct. 5.—While chumming for bluefish last week with Mr. John G. Prague, he landed a reddish fish, weight 38 lbs., length 4ft. The fish was sent to New York, and quite a dispute arose as to its proper name. The fish had a head like a cod, red back, silver belly and three black spots on each side of its tail. What name is the fish known by in these waters?—P. H. MORRIS. [About New York the fish is called red drum. See plate 125, Fisheries Industries, U. S., where it is styled redfish or bass of the South. Sometimes only one black spot is present on the tail and occasionally several are seen.]

BIG CATCHES.—I was glad to see the article of "O. O. S." in your issue of Sept. 3 in regard to "big catches." When I remember the many good fishing waters I knew 10 and 20 years ago—when I remember the bushels of fish I have seen caught and left to rot upon the shore—and the strings of mother bass caught off the spawning beds, when I realize the fact that to-day those fishing grounds are practically barren and worthless, then my gorge rises, and I should like to see the perpetrators of these outrages "beaten with many stripes."—H. P. U.

ST. LOUIS NOTES.—The Big Piney River has become a great favorite for bass fishing, and many fine strings have been taken this fall. Spring Lake, in Illinois, is also furnishing fine sport and big bass. We are informed that seining and dynamiting fish has been carried on all summer in the Merrimac River. What is the Missouri law for, and what have the State Fish Commissioners done to prevent this illegal destruction of fish? The Merrimac River is one of the finest streams in Missouri, and should be full of game fish. Now it is given over to gar pike and catfish.—*ABERDEEN.*

A STRANDED WHALE measuring 75ft. in length and with flukes 15ft. across was cast up on the beach at Ocean City, Md., on Friday last. Hundreds of people have been attracted to the place by the dead monster. A telegram was sent to the National Museum reporting the stranding, and the curator of mammals, Mr. True, went to see the animal in the interest of the Government collection.

OCTOBER BLACK BASS FISHING has improved in the Potomac since the recent rains. A fishing party at Great Falls, D. C., last week took seventy-five bass, among them some 8½-pounders. At Waverton, near Harper's Ferry, and for some distance down the river, fishermen are having excellent sport. Reports from the Shenandoah also are very gratifying.—*B.*

Dogs: Their Management and Treatment in Disease. By Ashmont. Price \$2. Kennel Record and Account Book. Price \$2. Training vs. Breaking. By S. T. Hammond. Price \$1. First Lessons in Dog Training, with Points of all Breeds. Price 50 cents.

FIXTURES.

DOG SHOWS.

Dec. 4 to 8.—Sixth Annual Dog Show of the Northern Illinois Poultry and Pet Stock Association, at Rockford, Ill.
Dec. 10 to 14.—Inaugural Dog Show of the Freeport Poultry and Pet Stock Association, at Freeport, Ill. T. E. Taylor, Sec'y.
Dec. 20 to Jan. 2.—Fourth Annual Dog Show of the Mohawk Valley Poultry and Kennel Club, at Gloversville, N. Y. F. B. Zimmer, Sec'y.
1892.
Jan. 5 to 8.—The New York and New England Poultry and Kennel Club's Dog Show, at Albany, N. Y. W. C. House, Fort Plain, N. Y., Sec'y.
Jan. 5 to 9.—Annual Dog Show of the South Carolina Poultry and Pet Stock Association, at Charleston, S. C. Benj. McInness, Sec'y.
Jan. 13 to 16.—Second Annual Dog Show of the South Carolina Kennel Association, at Columbia, S. C. F. E. Capers, Secretary, Greenville, S. C.
Feb. 9 to 12.—Fourth Annual Dog Show of the Mascoutah Kennel Club, at Chicago, Ill. John L. Lincoln, Jr., Sec'y.
Feb. 23 to 26.—Sixteenth Annual Dog Show of the Westminster Kennel Club, at New York. James Mortimer, Supt.
March 1 to 4.—Dog Show of the Philadelphia Kennel Club, at Philadelphia, Pa. F. S. Brown, Sec'y.
March 15 to 18.—Second Annual Dog Show of the Duquesne Kennel Club, at Pittsburgh, Pa. W. E. Little, Sec'y.
April 7 to 10.—Seventh Annual Dog Show of the New England Kennel Club, at Boston. Mass. E. H. Moore, Sec'y.
April 20 to 23.—Fourth Annual Dog Show of the Southern California Kennel Club, at Los Angeles, Cal. C. A. Sumner, Sec'y.
May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco, Cal. H. L. Miller, Sec'y.

FIELD TRIALS.

Nov. 2.—Inaugural Trials of the United States Field Trial Club, at Bicknell, Ind. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 10.—Second Annual Trials of the International Field Trial Club, at Chatham, Ont. W. B. Wells, Sec'y.
Nov. 16.—Eastern Field Trials Club's Thirteenth Annual Trials, at High Point, N. C. Members' Stake Nov. 12. W. A. Coster, Secretary.
Nov. 23.—Irish Setter Club's Field Trials, at High Point, N. C. G. G. Davis, Secretary, Philadelphia, Pa.
Nov. 23.—Gordon Setter Club's Field Trials, at High Point, N. C. L. A. Van Zandt, Secretary, Yonkers, N. Y.
Nov. 23.—Second Annual Trials of the National Beagle Club, at Nainital, Rockland county, N. Y. F. W. Chapman, Sec'y.
Nov. 30.—Central Field Trial Club's Third Annual Trials, at Lexington, N. C. C. H. Odell, Sec'y. 44 and 46 Wall street, New York city.
Dec. 14.—Philadelphia Kennel Club's Field Trials. Charles E. Connell, Secretary.

1892.

Jan. 10.—Second Annual Trials of the Bexar Field Trial Club, at San Antonio, Texas. G. A. Chabot, Sec'y. Amateurs only.
Jan. 18.—Trials of the Pacific Field Trial Club, at Bakersfield, Cal. J. M. Kilgariff, Sec'y.
—Fourth Annual Field Trials of the Southern Field Trials Club, at New Albany, Miss. T. M. Brumby, Sec'y.

COURSING.

Oct. 20.—American Coursing Club's Meeting, at Great Bend, Ira D. Brougher, Sec'y.
Nov. 2.—International Coursing Club's Meeting, at Merced, Cal.

BEAUFORT RETURNS TO ENGLAND.

Editor Forest and Stream:

Champion Beaufort returned to England Monday last on the steamer Taurin. He will arrive in time for the Crystal Palace show on the 27th. Beaufort was in the most perfect health and show condition. His visit to America has improved the dog, if such a thing was possible, and to see him running and playing in the fields with the young ones he has sired he seems as much of a puppy as any of them, and from a distance he can hardly be distinguished from the others. It is to be hoped Mr. Taunton will enter him for competition with England's best that have appeared in his absence, just to prove that he is still the best mastiff living, and the greatest show dog, as he always has been. That he is the greatest stud mastiff remains unquestioned. Mastiff breeders in allowing him to return made the greatest mistake. They prefer to import his get at big prices to use as show and stud dogs, as they always have done when they wanted a sure winner. But he has left some here that we can be proud of. It remains to be seen how they will be used. If American breeders were judges like the English breeders, there would be some hopes for the mastiff here in the future. If they used the same understanding and judgment that the breeders of trotters or of the great milking strains of Jersey or Holsteins, we would not have to go across the water to buy correct ones. If such a dog as Beaufort is and always has been is "guessed at," not judged, the breeders know it. They do not then breed to a dog simply because he has won prizes, but with the object in view of improving their type. The universal request to have champion Beaufort returned there for stud purposes clearly proves they have bred nothing his equal. J. L. WINCHELL.

FAIR HAVEN, VT.

NATIONAL BEAGLE CLUB TRIALS.—Franklin Park, Mass., Oct. 6.—*Editor Forest and Stream:* We would respectfully announce to the beagle men of America that Frank Forest will not run in the field trials this year (1891), as, in the interest of the National Beagle Club, we desire that dogs other than the winners of last year should make a record this year.—*FOREST BEAGLE KENNELS.*

DANBURY DOG SHOW.

ANOTHER pleasant little reunion of Connecticut fanciers took place at this pretty town last week. The show properly opened on Wednesday, Oct. 7, and closed on Saturday evening. There is always a charm about the Danbury Fair show. In the first place there is a delicious sense of freedom from the trammels of red tapism so often encountered at these shows. The managers are obliging, courteous and hospitable, and if the exhibitor does not win a prize it is from no fault of these good people, as the judge must be blessed with considerable firmness of character to withstand their urgent appeals to not withhold this and that prize. "Oh! give them something, come a long way, perhaps, and you know it costs money." Something like this was whispered in my ears repeatedly. Still, it was a pleasant little show, not so many well-known faces there perhaps as last year, not yet so many dogs, but still on the whole quite a fair show. Frank Dole was there and winked the other eye as he told me of his varied experiences among the dog men of England during his summer trip. He had a good string along with him as usual, and after the prizes were awarded he was busy trying to find out how much he had won, as part of the entrance fee, five-eighths of one dollar, was returned to the winner. As there were no catalogues printed it made it difficult to find out who was in it, so to speak.

Dr. Haire, Louis Contoit, W. H. Hyland and other fanciers were present. Mr. Geo. E. Sears worked hard to keep everything going smoothly, ably aided by Mr. Reed, who worked like a Trojan to get the dogs into the ring. The quality on the whole was about on a par with last year, but until this show is held under the wing of the A. K. C., and wins will count, they cannot hope to get the entry they should have so near to New York. This very likely will be arranged for next year, when we shall expect to see a well-organized exhibition. This year the long list of Canadian shows also had a deterring effect on the handlers who had expected to be present. As there were no catalogues, the awards were taken from the secretary's books.

MASTIFFS.

There were no challenge classes in any breed. In the dog class of the above breed three put in an appearance, but neither of them would entice the heart of a connoisseur of the breed. Scipio, getting an old dog now, added another win to his list; never a good dog, he still had better type and a head nearer the standard than Grover, who is long in head and none too good in forelegs and feet, he, however, is deeper in muzzle, better in forelegs and much better in body than Kaiser William, who this time had to be content with vhc. In bitches, Ethel beats Medusa in body, forelegs very much, and skull, although she was shown in whelp and as much too fat as the other was too thin. Puppy prizes were withheld, the only representative would have made a fair greyhound.

ST. BERNARDS.

Three entries. The winner and only one present in dog class was Le Roi, a well bred dog, but whose head was the best part of him. Coat stary, and he might be better on his pins. The bitch class produced two runts, snipy and far from high class. First was withheld, and the judge, unable to tell which was the worst, gave them equal second at the earnest request of the manager.

GREYHOUNDS.

Mrs. Adam Forepaugh showed a fairish one in the dog class in Clyto, who beats Fido in head, neck and fore and hindlegs. Something better appeared in the bitch class with Spinaway to lead off, she beating Topsey in head, shoulders and hind parts. Dr. Knox showed a very fair pup in Nellie, which took the prize in its class.

GREAT DANES.

With the dogs from the High Ground Kennels on hand there was, of course, a good show of this breed. The well-known winner Pascha beating his kennel mate Nero in head, cleanness of neck and body. Tigi, vhc., a savage one, had to be judged in his stall. He was a fairish dog, peculiar in color, a sort of liver harlequin, with drop ears. In bitches Flora Florida, not improving with age, scored over Lucy in head, body and general quality. Queen, a harlequin, getting vhc. She loses in head considerably to the others, being snipy. In Newfoundlanders no self-respecting judge could give any prizes to the brutes shown, although urgently requested and told "it was only Danbury," at which show the opinion seems to prevail that everything goes.

DEERHOUNDS.
